BERTRAM, CORNEILLE BONAVENTURE: Protestant clergyman and Hebraist; born at Thouars, France, in 1531; died at Lausanne, Switzerland, 1594. He studied at Poitiers, Paris, Toulouse, and Cahors. Learning, in the last-mentioned city, that the authorities had received an order to massacre all the Protestants, he fled to Geneva, where, in 1567, he became professor of Oriental languages in the university. Among many valuable works he wrote the following on Hebrew matters: (1) "Gal 'Ed" (Heap of Testimony), "Comparatio Grammaticæ Hebraicæ Aramaicæ," Geneva, 1574; (2) "De Politia Judaica tam Civili quam Ecclesiastica," Geneva, 1580, a work on Hebrew institutions and history, which enjoyed great popularity, and passed through many editions; (3) "Grammatica Hebraica et Arabica," Geneva, n. d.; (4) "Lucubrationes Frankentallenses, seu Specimen Expositionum in Difficiliora Utriusque Testamenti Loca," Frankenthal, 1586. Bertram also published a translation of the Bible very much appreciated at that time, Geneva, 1588. In this translation he followed Sebastian Munster and Tremelius; and very often he made use of rabbinic commentaries.

T. I. Br.

BERURIAH (=probably **Valeria**): Daughter of the martyr R. Hananiah ben Teradion, and wife of R. Meïr; born in the first quarter of the second century, she lived at Tiberias after the Hadrianic persecutions. Her traits of character, gleaned from Talmudic passages, show her to have been a helpmate worthy of her great husband, and to have possessed a personality corresponding to the emergencies of the troublous times following upon the failure of Bar Kokba's insurrection. They betray intellectual qualities and attainments as well as womanly tenderness and stanch virtues. It is said that she studied three hundred Talmudic subjects daily (Pes. 62b), and R. Judah endorsed a decision of hers, on a question about clean and unclean, in which she went counter to the view of "the wise" ("ḥakamim") (Tosef., Kelim, B. M. i. 6).

Her womanly tenderness is shown by a Biblical interpretation (Ber. 10a): Her husband, grievously vexed by wicked neighbors, prayed for their extermination. Beruriah exclaimed: "What! do you dare pray thus because the Psalmist says: 'Let ḥaṭaïm be consumed out of the earth'? (Ps. civ. 35) Observe that he does not say ḥoṭeïm ["sinners"], but ḥaṭaïm ["sins"]. And then look to the end of the verse: 'And the wicked will be no more.' Once sins are rooted out, there will be no more evil-doers." Of her ready wit the following is a specimen (*ib.*): In a dispute between Beruriah and a sectary, the latter quoted Isa. liv. 1: "Sing, O barren, thou that didst not bear," and mockingly asked whether barrenness is cause for singing. Beruriah directed him to look to the end of the verse: "More are the children of the desolate than the children of the married wife." The principle upon which both interpretations rest, "Look to the end of the verse" (שפיל לסיפיה דקרא), became an exegetical rule current among the later Talmudical sages.

Her Wide Knowledge of Scriptures.

In 'Er. 53b *et seq.* there are other examples of her knowledge of Jewish Scriptures and her almost coquettish playfulness, coexisting in her with a capacity for righteous indignation, displayed when it was proposed, for her father's sake, to pay funeral honors to her scapegrace brother. Father, mother, and sister alike denounced his conduct, the last applying to him Prov. xx. 17 (R. V.), "Bread of falsehood is sweet to a man; but afterward his mouth shall be filled with gravel" (Sem. xii.; Lam. R. iii. 16).

Beruriah's life fell in calamitous times. Not only did she lose her father through the Hadrianic persecutions, but her mother at the same time suffered a violent death, and her sister was carried off to Rome, or perhaps Antioch, to lead a life of shame under coercion. At Beruriah's instance, R. Meïr set out to save her sister's honor, and succeeded ('Ab. Zarah 18a; Sifre, Deut. 307; Eccl. R. vii. 11). In consequence he had to flee to Babylonia, and Beruriah accompanied him.

Sudden Death of Her Two Sons.

Beruriah is best known in connection with the touching story of the sudden death of her two sons on the Sabbath, while their father was at the house of study. On his return, at the conclusion of the Sabbath, he at once asked for them. Their mother replied that they had gone to the house of study, and, feigning to disregard her husband's rejoinder, that he had looked for them there in vain, she handed him the cup of wine for the Habdalah service. His second inquiry for them was evaded by a similar subterfuge. After R. Meïr had eaten his evening meal, Beruriah asked formally for permission to put a question to him. "Rabbi," she then said, "some time ago a deposit was left with me for safe-keeping, and now the owner has come to claim it. Must I return it?" "Can there be any question about the return of property to its owner?" said R. Meïr, half astonished and half indignant that his wife should entertain a doubt. "I did not care to let it go out of my possession without your knowledge," replied Beruriah, seemingly in excuse, and, taking him by the hand, led him into the room in which the bodies of their two sons were lying on the bed. When she withdrew the cover, R. Meïr broke out in tears and plaints. Gently Beruriah reminded him of his answer to her question about the return of a treasure entrusted to one for safe-keeping, adding the verse from Job (i. 21): "The Lord gave, and the Lord hath taken away; blessed be the name of the Lord." This story, which has found a home in all modern literatures, can be traced to no earlier source than the Yalḳuṭ (Prov. 964, quotation from a Midrash).

With Beruriah's death is connected a legend mentioned by Rashi ('Ab. Zarah 18b). To explain R. Meïr's flight to Babylonia, the commentator relates the following:

> "Once Beruriah scoffed at the rabbinical saying, 'Women are light-minded' (Ḳid. 80b), and her husband warned her that her own end might yet testify to the truth of the words. To put her virtue to the test, he charged one of his disciples to endeavor to seduce her. After repeated efforts she yielded, and then shame drove her to commit suicide. R. Meïr, tortured by remorse, fled from his home."

The historical kernel of this story can not be disengaged. As told, the narrative is wholly at variance with what is known of Beruriah's character and that of R. Meïr. Beruriah probably died at an early age.

BERUSH. See BAER OF MESERITZ.

BERYL (תרשיש): A stone, ranging in color from blue to pale yellow and found all over the world; three kinds are to be distinguished—beryl, aquamarine, and emerald. According to Ex. xxviii. 20 and xxxix. 13, the beryl was the first on the fourth row of the breastplate of the high priest. It is also mentioned frequently in the apocalyptic literature; *e.g.*, Ezek. i. 16, x. 9, xxviii. 13; Dan. x. 6).

BERYTUS. See BEIRUT.

BESALU (Latin, **Bisuldum**): City in Catalonia, Spain. Its small Jewish community had the same privileges as that of the neighboring Gerona, and was taxed together with it. A number of documents dealing with taxes of the Jews of this place are preserved in the archives of Aragon at Barcelona. Besalu is the birthplace of the family Caslar (called in Jewish documents Descaslars, דישקשלאר), of Abraham b. David Caslar, Joseph ibn Zabara, and others.

G. M. K.

BESANÇON: City and county of France, in the department of Doubs. Although no mention is made of this city in Jewish sources, it is known that it had a prominent part in the history of the Jews and was also of some importance even from a literary point of view. By his marriage with Jeanne of Burgundy, Philip the Tall, king of France, became ruler of this province in 1316. In a letter of Dec. 14, 1321, he gave to the queen the spoils from the Jews, who he had driven from his territory. Some years afterward they were recalled, but when in 1348 the Black Plague broke out, the inhabitants accused the Jews of being the cause, persecuted them, and had many of them executed, and finally (1360) the wretched survivors who had escaped the massacres were exiled from the province by a decree of Princess Marguerite.

There is no mention of Jews in the city of Besançon (which is the capital of the county) before 1320, when, in the depth of winter, they were driven from the environs, and knocked at the gates of this free city, which was under the patronage of the emperor of Germany. Five of them, on account of previous commercial relations, having succeeded in entering the city, asked permission to remain at least until the end of the winter. The leading men of the city, in order to please the barons D'Arlay, who were favorably inclined toward the Jews, gave their consent that the fugitives should reside among them.

The new inhabitants of Besançon, however, paid for their right to remain by many and burdensome obligations. They were required to pay a heavy poll-tax every month to the city treasury, were forbidden to appear in the city without a white and red cloth attached to the breast, and were ordered to dwell in a specified street, the gates of which were closed every evening. The street which they inhabited is now called "Rue Richebourg"; and it is said the Jews' sojourn there gave rise to this name. A piece of land, chosen by the leading men of the city, was assigned to them as a burial-place. The Jews acquired free access from the city and province only after the French Revolution.

As a matter of interest to the student of Jewish history, it may be mentioned that the library of the city contains a manuscript copy of the Hebrew Bible (2 vols. folio) with curious illuminations, showing that the manuscript, which is not dated, and is written in square characters, emanates from the fourteenth century. Moreover, it appears from a Judæo-Arabic inscription on the initial page that the manuscript was sold in Yemen in Iyyar, 5252 (May, 1492). After various transfers it came during the Revolution from the Benedictine abbey into the city library of Besançon.

As regards administration, the Jewish community of Besançon belonged formerly to the jurisdiction of the consistorial district of Nancy, having as its spiritual head Solomon Wertheimer. Since 1858 it has been reattached to the jurisdiction of the district of Lyons which in that year was made a consistorial department. Since the death of Wertheimer, in 1865, J. Auscher has served as pastor, first with the title of rabbi, and later as consistorial chief rabbi; for, in 1872, after the emigration of the Jews from Alsace and the redistribution of the districts following the Franco-German war, the community of Besançon became the seat of a consistory. It now (1902) includes the following Jewish communities: Dôle, Baume-les-Dames, L'Ile sur Doubs, and Montbéliard.

BESANT, SIR WALTER: English writer; novelist; born at Portsmouth Aug. 14, 1836; educated at King's College, London, and at Christ's College, Cambridge; died in London June 11, 1901. Besant was among those persons who helped the Russian and Polish Jews who flocked to the East End of London. He lived to see at least one of his many novel views on social subjects and aspirations realized: the Palace of Delight, which figured in his "All Sorts and Conditions of Men" (1882), having given rise to the People's Palace in the East of London. While this was not meant exclusively, or even partially, to benefit Jews, yet it did so, owing to its situation, which was in the center of a large Jewish population.

From 1868 to 1885 Besant acted as secretary of the Palestine Exploration Fund. During this period he wrote in collaboration with E. H. Palmer, the Orientalist, a "History of Jerusalem" (1871), and acted as editor of "The Survey of Palestine." In 1893 he published his novel, "The Rebel Queen," in which the heroine and many of the minor characters were Jewish.

BESCHAU. See MARRIAGE CUSTOMS.

BESCHREIEN (compare English "beshrew"): A Judæo-German word for lauding a person or thing to such an extent as to cause him or it to be harmed by malevolent spirits. This superstitious belief is of old German or Teutonic origin. Grimm ("Deutsche Mythologie," ii. 864) enumerates various terms, such as "berufen," "beschwatzen," "beschwören," besides beschreien, comparing them with "incantare" (whence "enchanter"), "carminare" (whence the English "charm"), all of which denote the exertion of evil power by means of certain words. Wuttke ("Der Deutsche Volksglaube," p. 155) casts more light on the subject; stating that what the evil eye is for the beautiful object exposed, evil speech is to persons or things lauded for some good quality. The superstition, he says, is rooted in the universal pagan fear of a deity begrudging man's perfect happiness, rather than in that feeling of humbleness which restrains man from boasting of his health, wealth, or the like. Little children especially are exposed to the evil influence of loud praise; wherefore it is customary, when children are lauded for their beauty, strength, or intelligence, to add the word "unbeschrieen" or "unberufen"—which means, "Let that not cause them to be bewitched." There are special formulas in use against such beschreien (see Wuttke, *l.c.* pp. 163, 264). Some use as a prophylactic measure the formula: "God protect him!" "Behüt's Gott!" The Jews adopted both the expression and the superstition from the Germans in the Middle Ages (see Güdemann, "Gesch. d. Erziehungswesens und der Cultur der Juden in Deutschland," p. 205). It has been claimed, however, that the ancient Hebrew greeting, "The Lord bless thee!" offered by the passer-by to the laborers in the cornfield at harvest time (Ps. cxxix. 8; Ruth ii. 4; Judges vi. 12) originated in a similar view, the blessing being intended to avert the evil influence of a begrudging glance or speech.

A. K.

BESHT, ISRAEL OF MIEDZYBOZ (or **MEDZHIBOZH**). See BAAL SHEM-ṬOB, ISRAEL.

BESOR: A wadi or river-bed where two hundred of the followers of David stopped while the rest of the force pursued the Amalekites (I Sam. xxx. 9, 10, 21). Guerin ("Judée," ii. 213), identifies Besor with the modern Wadi el-Ghazza, which has an outlet into the Mediterranean sea, southwest of Gaza.

J. JR. G. B. L.

BESSARABIA: Government in southwest Russia; separated by the Pruth and Danube from Rumania on the west, by the Dniester from Podolia and Kherson on the north and east, and bordering on the Black Sea from the Sulina mouth of the Danube to the estuary of Ovidiopol. The population in 1889 was 1,628,876, the Jews numbering 180,918. In 1897 the population was 1,936,392, of whom 225,637, or 11.65 per cent, were Jews. According to statistics of the Jewish Colonization Association, the Jewish population in the cities in 1898 was 173,641. Official documents show that Jews first emigrated to Bessarabia from Poland and Germany in the sixteenth century. They settled there in great numbers, not being permitted to live in the neighboring principality of Moldavia. At the present time a considerable part of Bessarabia is forbidden ground for the Jews, the MAY LAWS of 1882 being administered in a hostile spirit by the local authorities, who have officially declared their towns to be "villages" in which no Jews may reside. Moreover, many places in Bessarabia are situated within a distance

30

of fifty versts (33 English miles) from the frontier; and here only such Jews are permitted to live as were registered there before the issue of the edict of 1858.

Bessarabia excels among the Russian governments in the culture of the vine; and in this, as in the cultivation of tobacco, large numbers of Jews are employed. The chief articles of export are grain, fruit, and wine.

Until the middle of the nineteenth century most of the local commerce was in the hands of the Jews. Many Jews also were engaged in agriculture on leased lands, while many were innkeepers and farmers of post-stations. The May Laws and the introduction of the liquor monopoly by the government reduced many Jewish families to a deplorable condition. Zashchuk, who endeavors to foster the view that Jewish commercial activity is harmful to the general population, admits that, owing to the indolence and incapacity of the Bessarabians, the Jews are indispensable to the development of all branches of trade. From statistics gathered by the Jewish Colonization Association, the artisan class in 1898 comprised 20,976 persons; viz., 8,580 masters, 7,075 journeymen, and 5,321 apprentices. A small number of the Bessarabian Jews live as agriculturists in colonies founded between 1836 and 1854. (See AGRICULTURAL COLONIES IN RUSSIA.) The Bessarabian colonies are established on parcels of land leased from private proprietors. There are six colonies in the districts of Soroki and Beltzy: Dombroveny, Bricheva, Valya-Lui-Vlad, Vertinzhany, Lublin, and Markuleshty. Their present condition is as follows:

	Land in Deciatines.	Number of Farms.	Number of Colonists.
Dombroveny	1,179	139	1,132
Lublin	234	62	411
Vertinzhany	390	47	397
Valya-Lui-Vlad	346	82	716
Bricheva	289	83	820
Markuleshty	504	123	820
Total	2,942	536	4,296

The following table shows the number of Jews in the district and the percentage of the total population:

GOVERNMENT OF BESSARABIA (CENSUS, 1897), JEWISH POPULATION.

Districts.	Males.	Females.	Total.	Per Cent of the Total Population.
Kishinev	25,450	27,793	53,243	19.01
Akkerman	6,016	6,266	12,282	4.64
Bendery	8,214	8,261	16,475	8.44
Byeltzy	13,493	13,768	27,261	12.89
Izmael	5,766	5,851	11,617	4.75
Orgyeyev	13,004	13,284	26,288	12.20
Soroki	15,233	15,749	30,982	14.19
Khotin	23,397	24,092	47,489	15.45
Total for Govt.	110,573	115,064	225,637	11.65

H. R. S. J.

Proposed Colony of 1840.

In the year 1840 David Zelensky of Krementchug, Joseph Rabinovitch of Pavlograd, and Jacob Goldenweiser of Uman presented a petition to Count M. S. Vorontzov asking for his cooperation in the realization of their plan for the founding and organization of a Jewish agricultural colony in Bessarabia. The unsatisfactory condition of Jewish agricultural colonies established before that time was due, they said, to the social and religious conditions of the Jews, to the habits forced upon them by many centuries of artificial life, and to the deep-rooted prejudices against them. The petitioners did not ask for material aid, but for the moral support of the government, and for the privilege of buying from the government 5,000 deciatines of land in Bessarabia suitable for the founding of a model Jewish agricultural colony, purposing "to awaken among other Jews the inclination to agricultural occupations; to pay due attention to the industries relating to agriculture, such as cattle-breeding, gardening, and truck-farming, as well as sheep-raising, bee-keeping, the breeding of horses, the development of the silkworm industry, and of wine-making." The number of the first settlers was to be limited to 50 families; each family was to possess at least 450 rubles for traveling expenses and establishment, and was to promise to pay off in twenty years the price of the land assigned. Vorontzov enthusiastically seconded the efforts of the organizers, and called for expression on the subject from the military governor of Bessarabia. Lieutenant-General Feodorov, who was at that time acting in this capacity, replied that there was no single piece of unoccupied territory of 5,000 deciatines available for the purpose. Vorontzov, therefore, was obliged to inform the petitioners of his unsuccessful efforts, and the proposed plan was never realized.

Jewish Agriculturists.

The more liberal spirit of the reign of Alexander II. brought with it the extension of the rights of his Jewish subjects, and the privilege of purchasing landed property within the pale of settlement. Seventeen Jewish colonies, which had been founded between the years 1836 and 1854, covered an area of 9,305 deciatines. These colonies (Dombroveny, Markuleshty, Vertinzhany-Rogojeni, Mereshevka-Lankantzi, Bricheva, Nemewvka-Lublin, Kapreshti, Novie Teleneshti, Zguritsa, Aleksandreni, Valya-Lui-Vlad, Lomitchanets, Konstantinovka, Jchenkar, Ivanos-Nikolaevka, Shibko, and Romanooka) were, under Alexander II., in a comparatively prosperous condition. Moreover, Bessarabia was at that time the only region complying with the requirements of the law prohibiting the Jews from acquiring other than unoccupied land, and many Jews were accordingly attracted to the Bessarabian lands.

The first Jewish landowner in Bessarabia was "Honorary Citizen" Joseph [Jevzel] Günzburg, the progenitor of the present Baron Günzburg. He purchased in the districts of Jassy, Soroki, Akerman, and Bendery 14,004 deciatines and 76,000 falechs of land for a sum of 287,209 rubles. This led to the presentation of two different and opposing petitions to the government within the same year. On the one hand, a group of Jewish capitalists in St. Petersburg petitioned for permission to purchase land occupied by freedmen, and for all the privileges conferred upon non-Jews through the territory within the pale of settlement, with the provision that neither the Jewish owners nor any of their coreligionists should sell spirituous liquors. On the other hand, the nobles of Bessarabia petitioned the government to enforce the old laws prohibiting Jews from purchasing or owning any land in Bessarabia. A. G. Stroganov at first decided the case against the Jewish petitioners, and the military governor, General Ilyinski, also reported unfavorably. Notwithstanding this, however, the czar (March, 1859) decided in favor of the Jews, who showed that the land had increased in value.

Foreign Jews.

The timber trade, which, at the beginning of the nineteenth century, was not an unimportant factor in the life of New Russia, owed its growth and prosperity to foreign Jews. Notwithstanding the decision of the government (1824) forbidding the settlement of foreign Jews in Russia and even ordering the expulsion of those that had already become Russian subjects, the government gave unstinted support to the pioneers in this new branch of commerce, in the hope that the example of the foreign Jews would inspire their Russian coreligionists to give up their petty commercial transactions for those of a broader character and greater usefulness to the community.

At the beginning of 1840 the petition of eight Austrian Jews, for the privilege of retail trade in timber along the entire course of the Dniester river, was transmitted to the minister of finances, who called for a report on the matter by the governor-general of New Russia, M. S. Vorontzov. Vorontzov answered that "since there was great need for timber all along the lower Dniester, and the supply from Austria insufficient, he thought it advisable to permit the petitioners, as well as all foreign dealers in timber floating their merchandise from Austria down the Dniester, to sell it unhindered all along the course of the river." This expression led to the decision of the committee of ministers, indorsed by the emperor, to grant for three years (1840–43) the privileges solicited. The favorable result of this petition encouraged another group of Austrian Jews to ask for similar privileges along the river Pruth. These were granted as an experiment for two years, and in 1842 were extended for an additional four years. When the additional four years had come to an end (1847), the merchants petitioned for at least one year for the liquidation of their business. The matter was referred to Feodorov, governor-general of New Russia, and received his favorable comment; whereupon the government granted the petition of the Austrian Jews, and was so favorably impressed with the results of their enterprise that six years were granted them instead of the one year requested.

H. R. J. G. L.

BESSELS, EMIL: German-American Arctic explorer and naturalist; born at Heidelberg June 2, 1847; died at Stuttgart March 30, 1888. At the university of his native place he studied medicine and zoology. In 1869, under the encouragement of Petermann of Gotha, he made his first journey to the Arctic ocean, during which he traced the influence of the Gulf Stream to the east of Spitzbergen. In 1870 he joined the German army as a military surgeon, and received public commendation from the grand duke of Baden for his services. A year later he volunteered to go as a surgeon and naturalist with the Hall expedition, which sailed on the "Polaris" from the Brooklyn (N. Y.) navy-yard. Nothing of moment took place until the ship reached 82° 9′ north latitude, when Captain Hall, who had been on a short hunting expedition, returned to the ship, partook of a cup of coffee, and shortly after became violently ill (Oct. 24, 1871). Bessels treated him; but the patient several times disregarded the physician's advice. About Nov. 2 Hall showed signs of insanity, refusing to partake of food, and having the idea that he was being poisoned. He died Nov. 8, 1871.

Upon the return of the members of the expedition in 1873, after numerous mishaps and disasters, Morton, second mate of the "Polaris," brought a charge of murder against Bessels, alleging that the latter had administered morphine instead of quinine to Captain Hall. The secretary of the navy directed an inquiry, which was conducted by Surgeon-General of the Army J. K. Barnes and Surgeon-General of the Navy J. Beale, who reported "that Captain Hall died from natural causes—viz., apoplexy—and that the treatment of the case by Dr. Bessels was the best practicable under the circumstances."

Bessels, after this, spent some years at the Smithsonian Institution, Washington, in preparing for publication the scientific results of the voyage, the most striking of which was the proof of the insularity of Greenland deduced from tidal observations. His most important work was "Scientific Results of the United States Exploring Expedition Steamer 'Polaris,'" Washington, 1876. He published numerous papers on general natural-history subjects (see "Royal Society Catalogue of Scientific Papers," vii. 164; ix. 229, 230). Later Bessels joined an ethnological voyage on the U. S. S. "Saranac" to the northwest coast of America; but the vessel was wrecked in Seymour Narrows, B. C.

BET: The second letter of the Hebrew alphabet. Its numerical value is two, wherefore the bet in the word ביצחק (Gen. xxi. 12) is interpreted as an allusion to the two worlds Isaac is destined to inherit—this world and the world to come (Yer. Ned. iii. 38a), or in the existence of which Isaac and his descendants believe (Gen. R. liii.). According to Bar Ḳappara, the Torah begins with the letter bet in allusion to the present and the future worlds (Gen. R. i. 14); according to R. Levi, in order to suggest by its shape (ב) that men should not pry into the secrets of what is above or beneath or behind, but simply inquire into the work of creation that lies open before them (*ib.* i. 13). See also AKIBA BEN JOSEPH, ALPHABET OF.

BET BELTIN (בית בלתין) (called also **Bati Baltan, Biltin,** and in the Talmud **Beram**): A steep hill above the Euphrates, on which is built the modern town of Bir; lat. 37° 3′ N., long. 38° E. Travelers and caravans from Aleppo to Diarbekir, Bagdad, and Portia cross the Euphrates at this point. According to the Mishnah (R. H. ii. 4), Bet Beltin was the extreme point of Palestine to which messengers came from Jerusalem to announce the new moon. This they did by kindling fires on the summit of the hill.

BET DIN (בית דין; pl. **batte din**): Rabbinical term for court-house or court. In view of the theocratic conception of the law, which pervades Biblical legislation and is strictly carried out by rabbinical Judaism, including both civil and religious law, the bet din is not only a civil, but also a religious authority.

The Great Bet Din.

The "Bet Din ha-Gadol," or Great Sanhedrin at Jerusalem existing during the time of the Temple, was called also "Sanhedrin Gedolah" or, briefly, "Sanhedrin" (Soṭah i. 4, ix. 11; Sanh. i. 6; Shebu. ii. 2.) According to the Talmud, this bet din represented the supreme court of the country mentioned in Scripture (Deut. xvii. 8-13), and acted chiefly as court of last instance in legal or ritual disputes, in which case its decisions had to be obeyed on pain of death (compare rebellious ELDER). It also had a certain voice in the affairs of the state—no war of offense (מלחמת הרשות) could be undertaken without its permission—and it was in charge of civil affairs to the extent of appointing the judges of the country. The principal passages regarding this bet din are: Sifre, Deut. 152-155; Sanh. i. 5, 6; Hor. i. 1-5. The president, who bore the title "Nasi," was in a way the supervisor, but not a member of the court, which consisted of seventy members, corresponding to the seventy "elders" appointed by Moses (Num. xi. 25). The most learned and important of these seventy members was called "Ab Bet Din," a title similar to that of vice-president (see ZUGOT). It is highly improbable that there was a bet din of this class in Jerusalem before the destruction of the Temple (compare SANHEDRIN). The detailed description of such an authority found in the Talmudic works is probably theoretical even in its chief points, and may have had its origin in the fact that the bet din instituted after 70 was considered the ideal by the Rabbis, and that they were reluctant to omit it from the earlier periods of Jewish communal life. Hence the Talmudic sources speak very freely of a bet din that existed from the time of Moses to that of the Rabbis (R. H. ii. 9), mentioning even the bet din of Gideon, Jephthah, Samuel (Tosef., R. H. ii. [i.] 3), or those of Shem, of Samuel, and of Solomon (Mak. 23b), which they imagined similar to a later rabbinical court. And, furthermore, since the conditions in heaven were supposed to be analogous to those on earth, they likewise spoke of the heavenly bet din (בית דין של מעלה) (Mak. *l.c.*), calling it the "Great Bet Din" (בי דינא רבה) (Soṭah 22b).

Bet Din at Jabneh.

The bet din as the highest religious as well as civil authority of the Jews can only be proved to have existed for the period between 70 and the end of the third century. It was Rabban Johanan b. Zakkai who made his bet din the intellectual center of the Jews when the destruction of Jerusalem deprived them of their bond of unity. He could not, of course, give his bet din the political importance of the old Sanhedrin; but, considering the new conditions under which the Jews were living, he succeeded in investing it with greater powers than any authority had before possessed. It had entire charge of the calendar system, and hence became the religious and national center not only of Palestine, but also of the Diaspora. Its power and influence increased under Rabban Johanan's successor, Rabban Gamaliel II., culminating under Judah ha-Nasi I., whose grandson, Judah Nesia, may be regarded as the last person under whom the bet din was the real center of the Jews. Hence the Talmudic sources speak of Rabban Gamaliel and his bet din (Tosef., Ber. ii. 6), and of R. Judah ha-Nasi and his bet din ('Ab. Zarah ii. 6), meaning thereby the central body representing the highest civil as well as religious authority of the Jews.

On the death of Judah ha-Nasi the bet din of the Nasi lost its importance in consequence of the rise of Jewish scholarship in Babylonia toward the middle of the third century, as well as the increasing oppression of the Palestinian Jews under the Roman rule. Although the dignity and, also, to some extent, the power of the Nasi continued until the end of the fifth century (compare Origen, "Epist. ad Africanum," xiv.), the bet din was no longer an intellectual center. According to Talmudic sources, decrees (TAKKANOT) binding for all Judaism were issued by the patriarchs before and during the time of Judah Nesia; but his successors had not such authority. In Babylonia no bet din was ever considered a central authority, even for Babylonia alone, although, of course, the higher the reputation of a scholar, the greater was the authority of the bet din under him. Similar conditions obtained there even in the time of the Geonim, for no central bet din could exist on account of the rivalry of the two academies. From about 500 there was not even any formal and authoritative ordination, and members of an actual bet din must be ordained at least. Alfasi made an attempt to reestablish the former central bet din, considering his bet din the highest ecclesiastical authority, and claiming for it prerogatives which belonged to the Bet Din ha-Gadol (R. H. iii., beginning; compare Naḥmanides, "Milhemet," on the passage). If Jacob Berab had succeeded in reintroducing ordination, his bet din would have achieved the position of that of Rabban Johanan ben Zakkai; but he encountered too much opposition.

Other Classes of Batte Din.

Aside from the Bet Din ha-Gadol and the similar bet din of the Nasi, the term was applied to every court, consisting either of 23 members, who sat only in capital cases—דיני נפשות, or of three (according to some, five), who decided in monetary affairs—דיני ממונות (Sanh. i. 1-4; Tosef., *ib.* i. 1). Yet even in Talmudic times it was usual to have at least 11 scholars present at court (Sanh. 7b), a custom observed in later times also, at least in difficult cases. A scholar of standing (מומחה) required no assistant for holding court (Sanh. 5a), so that, during the Middle Ages as well as in modern times, the local rabbi alone frequently represented the bet din. In larger communities, however, there is a bet din consisting of at least three members, which sits daily except on Sabbath and holidays, and decides ritual as well as legal questions. The local rabbi generally presides, but in large communities the direction of the bet din is an office in itself, the incumbent of which bears the title "rosh bet din." The associate rabbi of a place has the same title, while among the Ashkenazim, and especially among the Polish-Russian Jews, the rabbi proper is designated as "ab bet din" and "resh mata." Compare Authority, Courts of Justice, Judges, Kahal, Nasi.

BET HILLEL AND BET SHAMMAI: The "School (literally, "house") of Hillel" and the "School of Shammai" are names by which are designated the most famous antagonistic schools that flourished in Palestine during the first century (first tannaitic generation), and which more than others contributed to the development of the oral law.

Down to the advent of Hillel and Shammai, who were the founders of the great schools bearing their names, there were but few casuistic differences among the schools. Between Hillel and Shammai themselves three (or, according to some authorities, five) disputes are mentioned in the Talmud (Shab. 15a; Ḥag. ii. 2; 'Eduy. i. 2, 3; Niddah i. 1); but with the increase of their disciples disputations increased to such an extent as to give rise to the saying, "The one Law has become two laws" (Tosef., Ḥag. ii. 9; Sanh. 88b; Soṭah 47b).

Discussions Between the Schools.

The prevailing characteristics of the disputes are the restrictive tendency of the Shammaites and the moderation of the Hillelites. Three hundred and sixteen controversies between these two schools are preserved in the pages of the Talmud, affecting 221 Halakot, 29 halakic interpretations, and 66 guard-laws ("gezerot"); and out of the whole number only 55 (or about one-sixth) present the Shammaites on the side of leniency. Moreover, even where the characteristic tendencies appear to have changed masters, the practical result remains the same: being the logical and consistent resultants of some opinions expressed elsewhere, and in line with the natural tendencies of the respective schools; and some of their restrictive views the Hillelites subsequently rejected, adopting what were exceptionally the more moderate views of the Shammaites ('Eduy. i. 12 *et seq.*; compare Weiss, "Dor," i. 179 *et seq.*). That the latter, as a school, ever receded from their standpoint to join the ranks of their more moderate antagonists is nowhere indicated; though individuals of that school, like Baba ben Buṭa, sometimes acknowledged the unreasonableness of their party by deserting its standard for that of Bet Hillel (Beẓah 20a; Yer. Ḥag. ii. 78a). Hence it is that the Mishnah introduces some of their controversies with the remark, "These are of the lenient views of Bet Shammai and the restrictive views of Bet Hillel" ('Eduy. iv. 1; Tosef., 'Eduy. ii. 2).

Characteristics.

The reason assigned for their respective tendencies is a psychological one. The Hillelites were, like the founder of their school (Ber. 60a; Shab. 31a; Ab. i. 12 *et seq.*), quiet, peace-loving men, accommodating themselves to circumstances and times, and being determined only upon fostering the Law and bringing man nearer to his God and to his neighbor. The Shammaites, on the other hand, stern and unbending like the originator of their school, emulated and even exceeded his severity. To them it seemed impossible to be sufficiently stringent in religious prohibitions. The disciples of Hillel, "the pious and gentle follower of Ezra" (Sanh. 11a), evinced in all their public dealings the peacefulness, gentleness, and conciliatory spirit which had distinguished their great master; and by the same characteristic qualities they were guided during the political storms which convulsed their country. The Shammaites, on the contrary, were intensely patriotic, and would not bow to foreign rule. They advocated the interdiction of any and all intercourse with those who either were Romans or in any way contributed toward the furtherance of Roman power or influences. Dispositions so heterogeneous and antagonistic can not usually endure side by side without provoking serious misunderstandings and feuds; and it was owing solely to the Hillelites' forbearance that the parties did not come to blows, and that even friendly relations continued between them (Tosef., Yeb. i. 10; Yeb. 14b; Yer. Yeb. i. 3b), for a time at least. But the vicissitudes of the period exerted a baneful influence also in that direction.

When, after the banishment of Archelaus (6 C.E.), the Roman procurator Coponius attempted to tax the Jews, and ordered a strict census to be taken for that purpose, both schools protested, and the new measure was stigmatized as so outrageous as to justify all schemes by which it might be evaded. The general abhorrence for the system of Roman taxation manifested itself in looking with distrust upon every Jew who was officially concerned in carrying it out, whether as tax-collector ("gabbai") or as customs-collector ("mokes"); these were shunned by the higher ranks of the community, and their testimony before Jewish courts had no weight (B. Ḳ. x. 1; *ib.* 113a; Sanh. iii. 3; *ib.* 25b). About this time the malcontents held the ascendency. Under the guidance of Judas the Gaulonite (or Galilean) and of Zadok, a Shammaite (Tosef., 'Eduy. ii. 2; Yeb. 15b), a political league was called into existence, whose object was to oppose by all means the practise of the Roman laws. Adopting as their organic principle the exhortation of the father of the

Maccabees (I Macc. ii. 50), "Be ye zealous for the law, and give your lives for the covenant of your fathers," these patriots called themselves "Ḳanna'im," Zealots (Josephus, "B. J." iv. 3, § 9, and vii. 8, § 1; Raphall, "Post-Biblical History," ii. 364); and the Shammaites, whose principles were akin to those of the Zealots, found support among them. Their religious austerity, combined with their hatred of the heathen Romans, naturally aroused the sympathies of the fanatic league, and as the Hillelites became powerless to stem the public indignation, the Shammaites gained the upper hand in all disputes affecting their country's oppressors. Bitter feelings were consequently engendered between the schools; and it appears that even in public worship they would no longer unite under one roof (Jost, "Gesch. des Judenthums und Seiner Sekten," i. 261; Tosef., R. H., end). These feelings grew apace, until toward the last days of Jerusalem's struggle they broke out with great fury.

Relation to External World.

As all the nations around Judea made common cause with the Romans, the Zealots were naturally inflamed against every one of them; and therefore the Shammaites proposed to prevent all communication between Jew and Gentile, by prohibiting the Jews from buying any article of food or drink from their heathen neighbors. The Hillelites, still moderate in their religious and political views, would not agree to such sharply defined exclusiveness; but when the Sanhedrin was called together to consider the propriety of such measures, the Shammaites, with the aid of the Zealots, gained the day. Eleazar ben Ananias invited the disciples of both schools to meet at his house. Armed men were stationed at the door, and instructed to permit every one to enter, but no one to leave. During the discussions that were carried on under these circumstances, many Hillelites are said to have been killed; and there and then the remainder adopted the restrictive propositions of the Shammaites, known in the Talmud as "The Eighteen Articles." On account of the violence which attended those enactments, and because of the radicalism of the enactments themselves, the day on which the Shammaites thus triumphed over the Hillelites was thereafter regarded as a day of misfortune (Tosef., Shab. i. 16 *et seq.*; Shab. 13a, 17a; Yer. Shab. i. 3c).

Bet Shammai and Bet Hillel continued their disputes—probably interrupted during the war times—after the destruction of the Temple, or until after the reorganization of the Sanhedrin under the presidency of Gamaliel II. (80 C.E.). By that time all political schemes and plans for the recovery of the lost liberty had become altogether foreign to the ideas of the spiritual leaders; and the characteristics of the Hillelites once more gained the ascendency. All disputed points were brought up for review (see 'Akabia); and in nearly every case the opinion of the Hillelites prevailed (Tosef., Yeb. i. 13; Yer. Ber. i. 3b; Grätz, "Gesch. der Juden," 2d ed., iv. 424, note 4). Thenceforth it was said: "Where Bet Shammai is opposed to Bet Hillel, the opinion of Bet Shammai is considered as if not incorporated in the Mishnah" ("Bet Shammai bimeḳom Bet Hillel enah Mishnah"—Ber. 36b; Beẓah 11b; Yeb. 9a); that is, null and void.

Constituent Members.

Of the personnel of these schools there is no record, they being invariably cited collectively as "Bet Shammai" or "Bet Hillel." Nor can their number be stated with exactitude. In round figures, the Babylonian Talmud (Suk. 28a; B. B. 134a) gives the number of Hillel's disciples as eighty, while the Palestinian Talmud (Yer. Ned. v. 39b) makes of them as many pairs. Both sources mention two of them by name, Jonathan ben Uzziel and Johanan ben Zakkai; and it is added that Jonathan was the greatest and Johanan the least among the whole number. No such traditions are recorded of the Shammaites. Of their school three are mentioned by name; viz., Baba ben Buṭa (Beẓah 20a), Dositai of Kefar Yetma ('Orlah ii. 5), and Zadok (Tosef., 'Eduy. ii. 2); but they are mentioned simply because, though Shammaites, they sometimes upheld the views of the Hillelites. See Hillel and Shammai.

J. SR. S. M.

BET HA-MIDRASH: High school; literally, "house of study," or place where the students of the Law gather to listen to the Midrash, the discourse or exposition of the Law. It is used in contradistinction to the Bet ha-Sefer, the primary school which children under thirteen attended to learn the Scriptures. Thus it is said in Gen. R. lxiii. 10: "Esau and Jacob went together to the bet ha-sefer until they had finished their thirteenth year, when they parted; the former entering the houses of idols, and the latter the batte ha-midrashot." Elsewhere it is stated, "There were 480 synagogues (batte kenesiot) in Jerusalem, each containing a bet ha-sefer, (primary school for the Scriptures), and a bet Talmud (same as bet ha-midrash), for the study of the Law and the tradition; and Vespasian destroyed them all" (Yer. Meg. iii. 73d; Lam. R., Introduction 12, ii. 2; Pesiḳ. xiv. 121b; Yer. Ket. xiii. 35c, where "460" is a clerical error).

Meaning.

The same tradition is given somewhat differently in Bab. Ket. 105a: Three hundred and ninety-four courts of justice were in Jerusalem and as many synagogues, "batte ha-midrashot" (high schools), and "batte soferim" (primary schools). According to Yer. Ta'anit iv. 7, p. 69a; Lam. R. ii. 2, iii. 51, there were 500 primary schools in Betar, the smallest of which had no less than 300 pupils (compare Soṭah 49b, Giṭ. 58a, which speak of 400 schools, each with 400 pupils). The number of schools (480) in Jerusalem besides the one in the Temple is derived by gemaṭria from the word מלאתי = 481 (Lam. R. *l.c.*).

The bet ha-midrash in the Temple hall (Luke ii. 46, xx. 1, xxi. 37; Matt. xxi. 23, xxvi. 55; John xviii. 20) is called the "bet ha-midrash ha-gadol," the great high school (Tanna debe Eliyahu R. ix. [x.], xvi., and elsewhere). It formed the center of learn-

Its History.

ing, and was, of course, the oldest one, standing in close relation to the "Bet Din ha-Gadol," the high court of justice in the Temple. Its history can not well be traced. A "bet wa'ad," meeting-place of scholars, existed as early as the days of Jose ben Joezer of Zereda, the martyr of the Maccabean time, who teaches: "Let thy house be a bet wa'ad for the wise" (Ab. i. 4). The name "bet wa'ad" is met with also in Soṭah ix. 15; Yer. Ber. iv. 7c; Yer. Ta'anit iv. 67d, and elsewhere. The hearers or disciples were seated on the ground at the feet of their teachers (Ab. *l.c.*; Luke x. 39; Acts xxii. 3). In the first century, schools existed everywhere at the side of the synagogues (Acts. xix. 9, "the school of one Tyrannus"). The primary school, bet ha-sefer, was, however, instituted at a later time, first by Simeon ben Sheṭaḥ, about 100 B.C. at Jerusalem (Yer. Ket. viii. 32c), and later introduced generally, for the benefit of all children, by Joshua b. Gamla in the first century (B. B. 21a; see EDUCATION). The Haggadah reflects a later mode of life when speaking of a bet ha-midrash of Shem and Eber which was attended by Isaac, occasionally also by Rebekah, and regularly by Jacob (Targ. Yer. to Gen. xxii. 19, xxiv. 62, xxv. 22; Gen. R. lxiii.; Tanna debe Eliyahu R. v.); of that of Jacob at Sukkot, which Joseph frequented (Targ. Yer. to Gen. xxxiii. 17, xxxvii. 2; Num. xxiv. 5); of that which Judah was sent to build for Jacob in Egypt (Gen. R. xcv.; Tan., Wayiggash, xi.); or of that of Moses, where Moses and Aaron and his sons taught the Law (Targ. Yer. to Ex. xxxix. 33; compare Num. R. xxi.: "Joshua arranged the chairs for the scholars attending the bet wa'ad of Moses"). Similarly the prophet Samuel had his "bet ulphana" (Aramaic for "bet ha-midrash") in Ramah (Targ. to I Sam. xix. 19). Solomon built synagogues and schoolhouses (Eccl. R. ii. 4). King Hezekiah furnished the oil for lamps to burn in the synagogues and schools, and threatened to have killed by the sword any one who would not study the Law; so that soon there was no 'AM HA-AREẒ to be found in the land, nor a child or woman unfamiliar with all the precepts on Levitical purity (Sanh. 94b). Especially those of the tribe of Issachar devoted their time to the study of the Law in the bet ha-midrash, Zebulun the merchant furnishing them the means of support (I Chron. xii. 33; Deut. xxxiii. 18; Gen. R. lii., xcix.; Targ. Yer. *l.c.*).

Jethro was promised that his descendants would never see the schoolhouses (batte ha-midrashot) disappear from among them (Tanna debe Eliyahu R. v.; compare Mek., Yitro, 'Amaleḳ, 2).

In Mishnaic times (Shab. xvi. 1) it appears that public discourses were held in the bet ha-midrash; but Targ. Yer. on Judges v. 9 indicates that it was used later for the study of the Law, and the popular discourses were delivered at the synagogue.

Earliest Forms.

The first bet ha-midrash of which there is authentic record is the one in which Shemaiah (Sameas) and Abtalion (Pollion) taught, and which Hillel, when a youth, could attend only after having paid admission-fee to the janitor (Yoma 35b). Whether or not this charge of a fee, so contradictory to the maxim of the men of the Great Synagogue (Abot i. 1), "Raise many disciples," was a political measure of the time, it seemingly stands in connection with a principle pronounced by the Shammaites (Ab. R. N., *A*, iii.; *B*, iv., ed. Schechter, p. 14), that "only those who are wise, humble, and of goodly, well-to-do parentage should be taught the Law." On the other hand, the Hillelites insisted that "all, without exception, should partake of the privilege, inasmuch as many transgressors in Israel, when brought nigh to the Law, brought forth righteous, pious, and perfect men." Against the Hillelite principle, R. Gamaliel wanted to exclude all those who had not stood the test of inner fitness. He was outvoted, with the result that 400 (or, according to some authorities, 700) chairs were necessarily added in order to seat the newcomers (Ber. 28a). The customary seating of the pupils on chairs marks an improvement, and this new feature gave to the schoolhouse the name "yeshibah" (Abot ii. 7) or "metibta" (B. M., 85a, b).

The bet ha-midrash of Jabneh was called "vineyard," either because it stood in a vineyard (Schürer, "Gesch." 3d ed., ii. 325, note 49) or, as rabbinical tradition asserts, because it was built in semicircular shape, thus resembling a vineyard (Ket. iv. 6; 'Eduy. ii. 4; Yer. Ber. iv. 7d). At all events the name "vineyard" became the usual appellation for the bet ha-midrash; hence Song of Songs vii. 13 (A. V. 12), "Let us get up early to the vineyards," was applied to the bet ha-midrash ('Er. 21b).

It is frequently recommended as highly meritorious to be one of the first to come to the bet ha-midrash and the last to leave (Shab. 127a; Giṭ. 7a; Meg. 15b; Suk. 28a; Sanh. 3b).

Rules of the Bet ha-Midrash.

It was believed to bring misfortune to sit at meals during the time that the discourse was being held in the bet ha-midrash (Giṭ. 38b). It was forbidden to sleep in the bet ha-midrash (Tanna debe Eliyahu R. xiii., xiv.). In Babylonia, where scholars spent their whole time in the school, exception was made to this rule (Ber. 25a; Meg. 28a). Mothers won special merit by training their children to go to the bet ha-sefer, and wives by waiting for the return of their husbands from the bet ha-midrash (Ber. 17a). Every session at the bet ha-midrash was expected to offer some new idea to the student; hence the frequent question: "What new thing was offered at the bet ha-midrash to-day?" (Tosef., Soṭah, vii. 9; Ḥag. 3a; Yer. Giṭ. v. 47d; and elsewhere).

Importance of the Bet ha-Midrash.

The bet ha-midrash ranks higher than the synagogue; consequently a synagogue may be transformed into a bet ha-midrash; but the latter can not be changed into a house of worship (Meg. 26b, 27a). "He who goeth from the synagogue to the bet ha-midrash—that is, from the divine service to the study of the Law—will be privileged to greet the majesty of God; for so says Ps. lxxxiv. 8 [A. V. 7]. 'They go from strength to strength, every one of them appeareth before God in Zion'" (Ber. 64a). To the bet ha-keneset (synagogue) and the bet ha-midrash in Babylonia are referred the words of Ezek. xi. 16, Hebr.: "I will be to them as a little sanctuary in the countries where they shall come" (Meg. 29a). The Haggadah finds allusions to the bet ha-midrash in Ps. xc. 1: "Thou hast been our dwelling-place in all generations"; and Ps. lxxxii. 1, Hebr.: "God standeth in the midst of the congregation of [those who seek] God" (*ib.*; Gen. R. xlviii.); and also in Balaam's words (Num. xxiv. 5): "How lovely are thy tents, O Jacob, thy tabernacles, O Israel" (Targ. Yer. to Num. *l.c.*; Sanh. 105b); likewise in Cant. viii. 10: "I am a wall and my breasts like towers" (Pes. 87a), and Cant. ii. 8, 9, refer to the synagogue and the schoolhouse: "The voice of my beloved! behold he cometh leaping . . . ; my beloved is like a roe," meaning that God proceeds from one synagogue to the other, and from one bet ha-midrash to the other, to bless Israel (Pesiḳ. v. 48b).

The Heavenly Bet ha-Midrash.

God also has His bet ha-midrash in heaven, and teaches the Law to the righteous (Tanna debe Eliyahu R. i., iii., iv., v., viii., ix.); it is called the "upper yeshibah" or "metibta" (B. M. 86a; Ber. 18b; Ta'anit 21b). "He who accustoms himself to go to the bet ha-keneset and bet ha-midrash in this world shall also be admitted into the bet ha-keneset and bet ha-midrash of the world to come" (Joshua b. Levi, in Deut. R. vii.; Midr. Teh. to Ps. lxxxiv. 5 [A. V. 4]).

The name "bet ha-midrash" recurs in the Arabic "madrasah," for school; and Jews under the influence of Arabic life called the bet ha-midrash also midrash (Güdemann, "Gesch. des Erziehungswesens und der Kultur der Juden in Frankreich und Deutschland," i. 92 *et seq.*, 265; "Quellenschriften zur Gesch. des Unterrichts," p. 99). A systematic plan of education of the thirteenth century, published and translated by Güdemann, *l.c.*, proposes to impose on each member of a congregation in the whole country or district the old half-shekel tax for the maintenance of the great bet ha-midrash or high school to be built in the capital near the synagogue, and for primary schools to be in each town, where the disciples, together with the teachers, should live during the week, separated from their parents and removed from all contact with the outside world. During the Middle Ages the bet ha-midrash was open day and night for both public discourses and private studies. It contained usually a large library for the use of the students, and became an attractive center and meeting-place also for scholars of other cities. Inevitably this privilege was frequently abused, and the bet ha-midrash often became the resort of idlers and poor homeless strangers who spent their time in gossip rather than in study. The official name given by non-Jews to the bet ha-midrash in Nuremberg (1406) is "Judenschule" (see Güdemann, "Gesch. d. Erziehungswesens und der Kultur d. Abendländ. Juden," p. 67, note 10). Whether the same name, "Judenschule," for the synagogue, given to it by the Christian population (Güdemann, *l.c.* p. 94, note 2), originated from the use of the bet ha-midrash also as a place of worship by the students, customary as early as Talmudical times (Ber. 8a), or from other causes, the proverbial "noise of the Judenschule" seems to refer to the lively discussions which took place in the bet ha-midrash (though at times the synagogue was used also for learned disputations), and not to any disorder in connection with the divine service.

The number of hearers or disciples at the bet ha-midrash was not limited as was the case in the Ḥeder, or primary school (Abrahams, "Jewish Life in the Middle Ages," p. 349). The rabbis or ordained teachers, as a rule engaged by the community to take charge of the studies in the bet ha-midrash, often dwelt in the same house; thus in Germany where the bet ha-midrash received the Latin name Clausa (Claus = cloister), also called "Claus Rabbis" or "Clausner." The synagogue and bet ha-midrash were often in the same building or adjoining each other. For the course of studies and other regulations concerning the bet ha-midrash, see the articles Education and Teacher; also Academies, Baḥur, Ḥeder, and Yeshibah.

BET-TALMUD: Hebrew monthly review, devoted to Talmudical and rabbinical studies and literature; founded in 1881 by Isaac Hirsch Weiss and Meïr Friedmann, at Vienna, and published by the former until its discontinuance in 1886.

Besides the editors, among the contributors to this monthly were such scholars as Buber, Brüll, A. Epstein, Güdemann, Reifmann, Schechter, and many others prominent in the domain of Jewish learning. Some of the articles published in "Bet-Talmud" were also printed separately.

BETERA, BENE. See Bathyra.

BETH-ANATH: A Canaanite city in the territory of Naphtali, the name of which contains, as one of its elements, the name of a god, Anath. Though the Israelites did not succeed in conquering this city, the Canaanitish inhabitants became tributary to them (Josh. xix. 38; Judges i. 33). The city is mentioned several times in Egyptian inscriptions (W. Max Müller, "Asien und Europa," pp. 195, 220). The exact location can not be definitely ascertained. It is generally supposed to be on the site of the present village 'Ainitha, in a fertile valley southeast of Tibnin in Galilee; but it is doubtful whether an impregnable fortress could have stood there. Since Rameses II. speaks of a mountain Beth-anath, W. Max Müller holds that the city itself lay in the valley.

J. JR. F. Bu.

BETH-ANOTH: City in the hills of Judah (Josh. xv. 59). It has been identified by both Conder and Buhl ("Geographie," p. 158) with the modern Beth Ainûn.

J. JR. G. B. L.

BETH-ARABAH ("house of Arabah"): A town situated, according to Josh. xv. 61, in the wilderness of Judah. It was a border-town between Judah and Benjamin, and hence is credited to the former (Josh. *ib.*); while in Josh. xviii. 22 it is enumerated among the towns of Benjamin. Lying to the south of Beth-hoglah in the Jericho plain, indications point to its identification with the modern 'Ain al-Feshkha, as proposed by the late Robertson Smith. In Josh. xviii. 18 the name is given as "Arabah."

J. JR. G. B. L.

BETH-ARAM (Josh. xiii. 27) or **BETH-HARAN** (Num. xxxii. 36): A city east of the Jordan. The Talmud speaks of it as "Bethramta" (ביתרמתה); Eusebius as "Bethramphta"; and Josephus as "Betharamatha." Herod the Great built a palace there which was destroyed after his death. The city was rebuilt by Herod Antipater and called "Julias," in honor of the wife of Augustus. As the original name of the empress was Livia, Eusebius and others called the town "Livias." The site is indicated by the ruins on the hill Tell-er-Rameh, in a fertile part of the Jordan.

J. JR. F. BU.

BETH-ARBEL: Mentioned only once (Hosea x. 14) as a city destroyed by Shalman. Opinions vary both as to the location of the place and as to the identification of Shalman. The most probable location is that of the modern Irbid on the east side of the Jordan (G. A. Smith, "Historical Geography of the Holy Land"). As for Shalman, Schrader ("K. A. T.," ii. 440-442) says he is a Moabite king, Shalamanu. Conder favors Shalmaneser III.; Wellhausen ("Kleine Propheten") and Nowack (Commentary) Shalmaneser IV. A solution may be found in the Septuagint reading, "Beth-Jeroboam" for "Beth-arbel" and "Shallum" for "Shalman." The passage would then refer to the destruction of the house of Jeroboam by Shallum (II Kings xv. 10).

J. JR. G. B. L.

BETH-AVEN: A city on the border of Benjamin in the wilderness (Josh. xviii. 12), east of Bethel (Josh. vii. 2) and west of Michmash (I Sam. xiii. 5). It was the scene of a battle between Saul and the Philistines, in which the latter were defeated (I Sam. xiv. 23).

In Hosea iv. 15, v. 8, x. 5, Beth-aven is probably a disguise for Beth-el, particularly in x. 5, where calves of Beth-aven as objects of idolatry are mentioned.

J. JR. G. B. L.

BETH-AZMAVETH. See AZMAVETH.

BETH-DAGON: The name of several places apparently in ancient Palestine. The second element is the name of the Philistine god Dagon. In the Old Testament mention is made of a city called "Beth-dagon," allotted to the tribe of Judah (Josh. xv. 41; compare Tosef., Oh. iii. 9); and within the territory of the tribe of Asher there was also a Beth-dagon (Josh. xix. 27; compare Tosef., Sheb. vii. 13). Sennacherib also mentions a Bit-daganna on his inscriptions (see Schrader, "K. B." ii. 92; Delitzsch, "Wo Lag das Paradies?" p. 289) which appears to be a third distinct locality. Beth-dagon occurs at the present day as the name of various places in Palestine; but it is doubtful whether any ancient cities can be associated with them. The Beth-dagon southeast of Jaffa is probably too far north for the Judean city mentioned in Josh. xv. 41; the Beth-dagon in the district of Acre, mentioned by Scholz, answers the required conditions.

J. JR. F. BU.

BETH-DIBLATHAIM: City of Moab (Jer. xlviii. 22) identical with ALMON DIBLATAIM.

J. JR. G. B. L.

BETH-EL: A city famous for its shrine, on the boundary between Ephraim and Judea—the site of the present little village of Bêitin, on the southern slope of the Ephraimitic mountains. (See illustration on page 120.) Originally the town was called Luz (Gen. xxviii. 19); but this name was displaced by that of the shrine, Beth-el ("house of God"). According to Gen. xii. 8, Abram erected an altar east of Beth-el; but the erection of the shrine—that is, of the holy stone—is ascribed to Jacob (Gen. xxviii. 18; compare Gen. xxxv. 6, 14). Since in these narratives (Gen. xxviii. 19, xxxv. 7) Beth-el, "the holy place," is distinguished from the city Luz, the shrine must have been outside the city. A suitable place would be the hill to the east of Bêitin, where now are the ruins of a small fort. But Schlatter ("Zur Topographie Palästina's," pp. 236 *et seq.*), who thinks that the name Beth-aven in the Old Testament (Hosea iv. 15 *et seq.*) is merely a sarcastic disguise of "Beth-el" (so also the Talmud; Neubauer, "G. T." p. 155), concludes from Josh. vii. 2 (compare Gen. xii. 8) that the shrine must be sought somewhat more to the east at Deir Dîwân. The statement in the text of Josh. vii. 2, and Josh. xvi. 3, also, which places Beth-el, together with Luz, on the boundary-line of Ephraim, can not, for textual reasons (compare the Septuagint reading), be taken as a conclusive proof that the shrine was at a great distance from the city. According to Judges xx. 18, 26 *et seq.*, the shrine was of great importance in the days of the Judges; still more so after the division of the kingdoms, when Jeroboam made it the chief Ephraimitic shrine (I Kings xii. 29 *et seq.*; compare II Kings x. 29), "the king's chapel," as it is called in Amos vii. 13. At the time of Elisha there was a community of prophets at Beth-el (II Kings ii. 3). The oldest prophets name Beth-el as one of the centers of degenerate Israelite cult (Amos iii. 14, iv. 4, v. 5; compare Hosea iv. 15, v. 8, x. 5). Amos came into the city at a great feast, and raised a storm of indignation among the priesthood and the people by his merciless condemnation of Israel (Amos vii. 10 *et seq.*).

Even after the conquest of Ephraim the shrine of Beth-el retained its importance (II Kings xvii. 28). When Josiah took possession of this old part of the Ephraimitic dominions he uprooted the illegitimate cult (II Kings xxiii. 15). After the Exile, Beth-el belonged to Judea (Ezra ii. 28). At the time of the Maccabees it is sometimes named as the seat of Syrian garrisons (I Macc. ix. 50). Otherwise, the place is only mentioned by the first Christian topographer, the Pilgrim of Bordeaux, and by Eusebius, as a small country town. In Lam. R. ii. 3 it is stated that Hadrian placed a guard at Beth-el to capture Jewish fugitives.

J. JR. F. BU.

BETH-EMEK: A town on the border between Asher and Zebulun, belonging to the latter (Josh. xix. 27). It lay to the east of Acco; but its exact location has not been determined.

J. JR. G. B. L.

BETH GUBRIN: Name of a city mentioned in the Talmud and in the Midrash (Neubauer, "G. T." pp. 122 *et seq.*), called "Betogaboa" by Ptolemy and others. It does not occur in the Old Testament; but Reland shows that it was one of the Idumean forts captured by Vespasian (Josephus, "B. J." iv. 8, § 1). It was also called "Eleutheropolis," under which name it is often mentioned by Eusebius. In his time it was the capital of the province within which it lay. The site of the ancient city is determined by the present village Bêt Gibrûn in southwestern Judea, that contains some ruins. In the vicinity are many natural caves, artificially enlarged; hence it is thought that the name "Eleutheropolis," that is, "free city," arose through a confusion between "ḥor" (cave) and "ḥor" (free). The original name, which was not supplanted by the Greek form, is found in even the oldest Mohammedan writers.

J. JR. F. BU.

BETH-HACCEREM: According to Neh. iii. 14, a Judean city; described in Jer. vi. 1 as a high place visible at a great distance. Jerome (on the passage) speaks of Beth-haccerem as a village still existing on the road between Jerusalem and Tekoa. This coincides with the so-called "Mount of the Franks" (Jebel Furêdis), a high peak south of Jerusalem. But since it was on this hill that Herod the Great built a fort called "Herodion," it could hardly have become a mere village in the days of Jerome. If the statement of Jerome be true (and there is no sufficient reason to doubt it), Beth-haccerem can not be the 'Ain Karim, west of Jerusalem, as Cheyne ("Encyc. Bibl." i. 556) has it. This latter is rather to be identified with the "Kerem" mentioned in the Septuagint to Josh. xv. 59. However, the village Beth-Kerem, which, according to the Mishnah (Niddah ii. 7), had a reddish color, may be identical with the Biblical Beth-haccerem.

BIBLIOGRAPHY: *Catalogue of Anglo-Jewish Exhibition*, No. 939.

J.

BETH-HORON: Name of two villages at the western end of the Ephraimite mountains, called respectively "upper Beth-horon" (Josh. xvi. 5) and "nether Beth-horon" (Josh. xvi. 3, xviii. 13; I Kings ix. 17). They are nowadays spoken of as the two villages "Bet 'ûr et-Taḥta" (the lower) and "Bet 'ûr el-Foḳa" (the upper). They were situated on an old road leading from Gideon to the plain on the coast; this is mentioned in the Old Testament as a difficult and steep road between the villages of

Beth-horon (Josh. x. 10; *ἡ ἀνάβασις* Βαιθωρών, I. Macc. iii. 16), or Morad Beth-horon (Josh. x. 11; *ἐν τῇ καταβάσει* Βαιθωρών, I. Macc. iii. 24). In ancient times the road was the principal highway between the mountains and the plain. Here the Canaanites fled from Joshua (Josh. x. 10 *et seq.*); and by this road the Egyptian king Shishak probably invaded the country, since Beth-horon is mentioned in the inscription relating his victory (W. Max Müller, "Asien und Europa," p. 166). It was for strategic reasons that Solomon fortified the lower Beth-horon. In Grecian times the Syrian general Seron attempted to force an entrance by Beth-horon into the country, but was repulsed by Judas Maccabeus (I Macc. iii. 13 *et seq.*). Nicanor afterward met with the same fate (I Macc. vii. 39 *et seq.*). When Bacchides became master of the Jewish country he strongly fortified this important point. It is again mentioned when the Romans under Cassius sustained heavy losses there (Josephus, "B. J." ii. 19, § 8). It may also be gathered from the Old Testament that these two villages were built by the daughter of Ephraim (I Chron. vii. 24), and that Sanballat, the adversary of Nehemiah, came from there (Neh. ii. 10, 19; xiii. 28). For the form "Horôni" compare '*Ωρωνίν*; *i.e.*, "Horonaim" in Septuagint of Josh. ix. 10 and 11; Sam. xiii. 24. Several of the Talmudic scholars came from Beth-horon (Neubauer, "G. T." p. 154).

J. JR. F. BU.

BETH-JAAZEK: According to the Mishnah (R. H. ii. 4), a large court in which the Sanhedrin awaited the announcement of the new moon. The Palestinian Talmud ascribes its name to the fact that the calculation of the calendar was settled (פזע) there.

J. JR. F. BU.

BETH-JESHIMOTH: Town in the district east of the Jordan, allotted to the tribe of Reuben according to Num. xxxiii. 49 and Josh. xii. 3, xiii. 20; but in Ezek. xxv. 9 it is mentioned as a Moabitish city. Josephus calls the city "Besimoth" ("B. J." iv. 7, § 6). Eusebius speaks of it as "Bethsimuth," and states that it was situated on the Dead Sea, 10 Roman miles southeast of Jericho. Its exact site is said to have been on a sandy hill southwest of Beth-haran. From this it appears that the Talmudic assertion that Beth-jeshimoth is 12 miles distant from Abel-shittim is not correct (Neubauer, "G. T." p. 251).

J. JR. F. BU.

BETH HA-KENESETH. See SYNAGOGUE.

BETH-LEHEM-JUDAH (I Sam. xvii. 12; Judges xvii. 7, xix. 1): The modern Bait Lahm, situated about 5 miles south of Jerusalem, some 15 minutes' walk east of the road to Hebron, on a range of hills surrounded by fertile and beautiful valleys. The city was also called "Ephratah" (Josh. xv. 60, LXX.; Micah v. 1 [A. V. 2]; Ruth i. 2, iv. 11; but hardly Gen. xxxv. 16, 19; xlviii. 7). In I Chron. ii. 50 *et seq.*, iv. 4, Ephratah is the wife of Caleb from whom Beth-lehem descended. Beth-lehem is mentioned among the cities of Judah in Josh. xv. 60, in a passage which is missing in the Hebrew text, but which has been preserved in the Septuagint.

In the epic stories of the Book of Judges neither Beth-lehem nor any other city of Judah is mentioned. In the additions to this book it is named as the home of the Levite who migrated to Ephraim (Judges xvii. 7). Beth-lehem is also the scene of the idyl of Ruth. It was through David, whose family lived at Beth-lehem, that the little country town achieved an unexpected fame. The characteristic story told in II Sam. xxiii. 13 *et seq.* shows how much David was attached to his native city. But he did not remain there. He chose a larger capital, and thus Beth-lehem could continue undisturbed in its quiet ways. According to II Chron. xi. 6, the town was fortified by Rehoboam. Micah (v. 1) predicted that Beth-lehem, Ephratah or (omitting "lehem") Beth Ephratah would be the birthplace of a new Messianic David.

Nothing further is found in the Old Testament concerning this country town, that was probably nothing more than an insignificant village, except that a number of its citizens returned to Judah after the Exile (Ezra ii. 21). It is not mentioned in the Book of Maccabees, nor in post-Biblical times by Josephus. But it became of world-historic importance as the traditional birthplace of Jesus, and as such is still the goal of pious pilgrimages. Hadrian built here a shrine to Adonis, in order to irritate the Christians; this shows how important the town had become to the Christian world. As early as the second century a stable in one of the grottos close by the town was pointed out as the birthplace of Jesus (Justin Martyr, "Dial. cum Tryph." pp. 70, 78). Constantine built a splendid basilica in Beth-lehem, substantially the same church which is still admired by modern travelers. Below the church is the grotto regarded as the birthplace of Jesus. Jerome occupied a grotto near by when translating the Bible. During the Crusades Beth-lehem suffered greatly from Mohammedan violence. To-day it is a flourishing town, inhabited only by Christians.

J. JR. F. BU.

BETH-PEOR: A place in the valley of the Jordan which, in Josh. xiii. 20, is apportioned to the Reubenites. In Deuteronomy (iii. 29, iv. 46, xxxiv. 6) it is stated that the people were in the valley of the Jordan, opposite Beth-peor, when the Deuteronomic law was promulgated. Hosea (ix. 10) probably means the same place when he speaks of Baal-peor. According to Eusebius ("Onomastica," ed. Lagarde, ccxxxiii. 78; ccc. 2), the city was situated 6 Roman miles from Livias (or Beth-haran) near Mount Peor (compare Num. xxiii. 28). According to another statement of Eusebius ("Onomastica," ccxiii. 47), this mountain lay on the road from Livias to Heshbon; and according to Jerome (*ib.* cxv. 1), it was 7 miles distant from the latter. But no place corresponding to these descriptions has as yet been found. The references to Beth-peor in the Talmud, collected by Neubauer, "G. T." pp. 252, 253, prove that the place survived the destruction of the Second Temple.

J. JR. F. BU.

BETH-REHOB or **REHOB:** An Aramaic city which sent reenforcements to the Ammonites during the war with David (II Sam. x. 6, 8; compare

I Sam. 14, 47, LXX.). According to Judges xviii. 28, the city of Dan was built in the plain of Beth-rehob. The latter is also mentioned as the northern frontier place of Palestine (Num. xiii. 21). Robinson tried to identify Beth-rehob with the fort Hunên along the western border of the upper Jordan valley; but judging from the statements in the Old Testament, it must be a place east of the Jordan. It is possible that Beth-rehob is the ancient name of Banias, assuming that this place is not to be identified with Hasar Enan (compare Baal-gad).

J. JR. F. Bu.

BETH-SHAN. See Beth-Shean.

BETH-SHEAN or **BETH-SHAN:** Fortified town of Canaan. The Baisân of to-day, in the lower part of the Jalûd chasm, 120 meters below the level of the sea. The Israelites did not succeed in conquering this city, which was strongly fortified by nature (Josh. xvii. 16; Judges i. 27). Whether it was conquered by the Philistines or whether the Canaanites opened their city to them is not clear from the stories of I Sam. xxxi. 10 and II Sam. xxi. 12. But like all the other cities that had not been vanquished, Beth-shean had fallen into the hands of the Israelites by the time of Solomon (I Kings iv. 12). In Greek times it was Hellenized and named Skypthopolis (Judges i. 27, LXX.; II Macc. xii. 29; Judith iii. 10; Josephus, and elsewhere). But the Hebrew name is used not only in I Macc. v. 52, xii. 40 *et seq.*, but also in the Talmud (see Neubauer, "G. T." pp. 174 *et seq.*), and has entirely supplanted the Greek name. At the time of Hyrcanus the city again fell into the hands of the Jews, but became free under Pompey and belonged to the league Dekapolis. During the war for independence Beth-shean was taken by the Jews, but it was soon recaptured by the pagans, who took bloody vengeance on the Jews. Interesting ruins of temples, bridges, a theater, etc., bear witness to the flourishing condition of the city in Græco-Roman times. The Talmud speaks of the fertile surroundings of this town, and of the strictness with which the Jews living there fulfilled the Law (Neubauer, "G. T." *ib.*). The forms Beth-shean and Beth-shan rest upon slightly variant spellings of the Hebrew form, "shan" representing a natural contraction of "shean."

J. JR. F. Bu.

BETH-SHE'ARIM: According to rabbinic accounts, the Sanhedrin was destined to pass through ten exiles during the period 30–170, and to be compelled to wander from place to place. One of its stations was to be the city of Beth-she'arim, in which R. Judah I. resided for a long time (R. H. 31b; Sanh. 32b; Ket. 103b). As the next place of sojourn was Sepphoris, Beth-she'arim is identified with El-Shajerah (Al-Shajarah), south of Sepphoris (Neubauer, "G. T." p. 200). From the etymology of the name, תערא=שער, Schwarz ("Das Heilige Land," p. 138) identifies it with the modern village Turan at the Jebel Turan northeast of Sepphoris (Fischer and Guthe's Map of Palestine, c. 3).

According to Tosef., Ter. vii. 14, Johanan b. Nuri also dwelt in Beth-she'arim; and, as the same place is called בית שריי in Yer. Ter. viii. 46a, the two names must be identical. The latter name of the place is used also in Yer. Kil. ix. 32b and Yer. Ket. xii. 35a: thither was conveyed the coffin of R. Judah I., who died in Sepphoris. בית שריי is also mentioned as a place of burial in Yer. M. Ḳ. iii. 82c. Certain texts of the latter, however, substitute Bet-biri in the neighborhood of Cæsarea.

Bibliography: Kohut, *Aruch Completum*, ii. 87; Hildesheimer, *Beiträge zur Geographie Palästina's*, p. 39; Buhl, *Geographie des Alten Palästina*, p. 217.

G. S. Kr.

BETH-SHEMESH (IR-SHEMESH in Josh. xix. 41).—**Biblical Data:** A city of the hill-country between Judea and the coast on the southern side of Wadi Sarâr, called to-day 'Ain Shems. According to Josh. xix. 41, it was one of the cities of Dan, and according to Josh. xv. 10, it was on the boundary-line of Judea. In Josh. xxi. 16 it is named as a Levitic city. The Ark of the Covenant of Yhwh remained here for a time after it had been released by the Philistines (I Sam. vi. 9 *et seq.*). At the time of Solomon, Beth-shemesh was the seat of one of the royal officers (I Kings iv. 9). Later on Amaziah, king of Judea, incurred a serious defeat there. Under Ahaz, Beth-shemesh was conquered by the Philistines (II Chron. xxviii. 18). Nothing further is heard of the town, although it still existed at the time of Eusebius. Another Beth-shemesh was situated in the territory of the children of Naphtali (Josh. xix. 38; Judges i. 33). There seems to have been still another Beth-shemesh, mentioned in Josh. xix. 22. Neither of these latter two has been identified. The Beth-shemesh of Jer. xliii. is generally supposed to be the Egyptian Heliopolis, which is called On in the Old Testament. On account of this discrepancy Winckler ("Alttest. Untersuchungen," p. 180) would strike out Beth, and translate shemesh "pillars of the sun."

J. JR. F. Bu.

——**In Rabbinical Literature:** Various explanations are offered for the disaster which, according to the Masoretic text, befell fifty thousand people in the very moment of their rejoicing over the return of the Holy Ark (I Sam. vi. 19). Josephus explains ("Ant." vi. 1, § 4) that they sinned in presuming, not being priests, to lay their hands upon the Ark of the Law. The Talmud affirms that the inhabitants of Beth-shemesh were irreverent, greeting the appearance of the Ark with the cry, "Who angered thee that thou wert wroth, and who then hath appeased thee that thou art kindly disposed toward us?" Another account is that these people perished because they were so sordid as not to pause in their work in the fields at the appearance of the Ark.

The somewhat curious wording of the passage (I Sam. *l.c.*), "He smote of the people seventy men, fifty thousand men" ("and" does not appear in the Hebrew text), is explained by rabbinical authorities as indicating that this enumeration refers to two classes of people: the learned, whose number seventy represents the Sanhedrin, and the ordinary people, represented by the larger number. Other expounders, no doubt referring to the Septuagint reading which mentions only the seventy men, interpret this as meaning that only the members of the Sanhedrin perished, but that on account of their prominence their loss was equal to the loss of fifty thousand of the plain people (Soṭah 35a, b; Yer. Sanh. ii. 20b; compare also the Targum and pseudo-Jerome, "Quæstiones," upon I Sam. vi. 19).

L. G.

BETH-SHITTAH ("place of acacia-trees"): A place near Abel-meholah. To it the Midianites fled when pursued by Gideon (Judges vii. 22). The name occurs only here; the place has not been identified.

J. JR. G. B. L.

BETH-ZUR: A city in southern Judea (Josh. xv. 58; I Chron. ii. 45; Neh. iii. 16) which was fortified by Rehoboam (II Chron. xi. 7). It was a strongly walled place, situated on the eastern boundary-line of Judea. The town was repeatedly besieged during the time of the Maccabees (I Macc. iv. 28 *et seq.*, vi. 50, ix. 52, x. 14, xi. 65). Its situation is indicated by the ruins near a hill of Bêt-sur, or Burj-sur.

J. JR. F. Bu.

BETHABARA: An unidentified place mentioned in John i. 28. According to Origen's reading, the name is brought into connection with the Hebrew "'abarah" (crossing), and is supposed to refer to one of the many fords of the Jordan. Another reading is "Bethany" (*Βειθανία*), but no place of this name east of the Jordan is known. Grove, Wilson, and Cheyne combine both readings into *Βηθανάβρα*—that is, "Beth-nimra" in the Jordan valley, northeast of the Dead Sea.

J. JR. F. Bu.

BETHANY (*Βηθανία*): A place referred to in the Gospels, and probably also in the Talmud, under the forms ביתייני, בית אוני, בית איני, and בית היני, but not mentioned in the Old Testament (Pes. 53a; Tosef., Shebi'it, ed. Zuckermandel, 30, 71). According to John (xi. 18), it was "nigh unto Jerusalem, about fifteen furlongs off"; according to Jerome ("Onomasticon," ccviii.), "in secundo ab Ælia milliario" (at the second mile-post from Jerusalem). This is the site of the village El-Azariyeh on the southeastern slopes of the Mount of Olives. The identification is established by the name "El-Azariyah," which is the Arabic form for "Lazarium," as Bethany was sometimes called by the Christians. The village, with its olive-, fig-, almond-, and carob-trees, is a little oasis in that barren region. The figs (Hebr., "te'enah"), which are also mentioned in the Talmud, probably gave the place its name.

J. JR. F. Bu.

BETHAR: City in Palestine, scene of the war of Bar Kokba (132–135), and mentioned as such in Mishnah Ta'anit iv. 6; Yer. Ta'anit 69a; Babli Ta'anit 26b, 29a; Lam. R. to chaps. ii. 2 and iv. 8; Yer. Ber. 3d; Tosef., Yeb. xiv. 8; Bab. Yeb. 122a; Sanh. 17b; R. H. 18b, as well as in many other passages in Talmud and Midrash. The name is written in various ways: usually ביתר, but in the Cambridge and Hamburg MSS. (Ta'anit iv. 6), ביתתר: so also in "Halakot Gedolot," ed. Hildesheimer, p. 189, and Sherira's "Letter," ed. Neubauer ("Medieval Jewish Chronicles," i. 4, MSS.); but *ib.* ii. 109, בית תֵר, the reading in Kohut, "Light of Shade," p. 41; בית תר, in Cant. R. to chap. ii. 17, but בית תור, Neubauer, *ib.* i. 171. These sources indicate that Bethar was a town of importance as early as the time of the destruction of Jerusalem, and was, moreover, the seat of a Sanhedrin; its inhabitants, who frequently suffered at the hands of the Jerusalem pilgrims, are said to have rejoiced exceedingly over the fall of that city. Bar Kokba made Bethar the chief base of the uprising against the Romans; and upon its suppression, Bethar—within the walls of which large masses of Jews had sought refuge—was closely surrounded by the Romans under Julius Severus, and was besieged for two and a half years (132–135): see concluding part of Seder 'Olam R. compared with Yer. Ta'anit 69a, and Lam. R. ii. 2, according to which this period of time does not refer to the duration of the war, but to that of the siege of Bethar; the war itself, according to Jerome (on Dan. i. 9, end), lasting three years and six months. During the war Bethar afforded shelter to an enormous population, which fact gave rise to exaggerated rabbinical accounts that Bethar had several hundred schools for children, and that the school youth boastingly declared that they could overthrow the enemy with their pen-reeds. When the stream, Yoredet ha-Ẓalman, ran dry in summer, the city began to suffer from want of water. The Samaritan Book of Joshua (ed. Juynboll, xlvii.) relates that the provisions, which were secretly conveyed to the town, suddenly, as if by miracle, ceased to be supplied. It is said that there were two subterranean passages leading from the city to Jericho and Lydda; that the Jews made use of them for the transportation of provisions; and that the Samaritans betrayed this secret to the Romans and thus brought about the fall of Bethar. Rabbinic sources (Yer. Ta'anit 68d; Lam. R. to chap. ii. 2) also speak of a Samaritan's treachery that, furthermore, caused the death of the pious R. Eleazar of Modin. Hence it may be concluded that Bethar was situated close to the Samaritan territory, and that the story of the underground passages to Jericho and Lydda can not be credited, for they are plainly features of the siege of Jerusalem, transferred to Bethar. Neubauer is therefore incorrect in locating Bethar in the vicinity of Beth-shemesh, basing his opinion on the *Βαιθάρ* of the Septuagint on II Sam. xv. 24; for this place is not found in the Masoretic text, and thus no light is conveyed from that source as to its locality. Eusebius ("Hist. Eccl." iv. 6) calls the city *Βίθθηρα* (variant *Βεθθήρ*, *Βηθήρ*)—which agrees with the above-cited spelling, ביתתר; and he states that Bethar lay in the vicinity of Jerusalem. On this account Schürer and others (Ritter, Tobler, Derenbourg, Renan) identify Bethar with the modern Bittir, which is situated at a distance of three hours southwest from Jerusalem and contains the remains of an old fortification on a steep neck of land. The *Βητάρις* of Josephus ("B. J." iv. 8, § 1) is said to be different from this Bittir. If, however, Bethar had been situated near Jerusalem, it is inconceivable that Jerusalem should have taken no part in the war. Grätz ("Gesch. der Juden," 3d ed., iv. 144), on the other hand, declares the statement of Eusebius to be erroneous and locates Bethar north of Antipatris, four Roman miles south of Cæsarea. This would put Bethar in the neighborhood of Samaria.

Lebrecht (in "Magazin für die Wissensch. des Judenthums," iii. 1876) also places Bethar in this region—that is to say, at a great distance northward from Jerusalem—and endeavors to prove that Bethar is identical with the Roman Castra Vetera of Sepphoris; ביתר was said to be the equivalent of "Vetera" (compare Hoffmann, "Magazin," 1878, p. 188). This view is followed by Kohut, Fürst, and Krauss in their Talmudic dictionaries. Nevertheless, the site of Bethar must still be considered doubtful. From the Talmud it can be determined only that the town was situated near the sea (Giṭ. 57a; compare Yer. Ta'anit 69a), for the blood of those killed is said to have flowed into the sea. Bethar was destroyed on the same day as Jerusalem, on the Ninth of Ab (Ta'anit iv. 6; compare Jerome on Zech. viii., where instead of "Bethel" read "Bethar"); the killed (הרוגי ביתר) were left to decay in the open field; and only after the hatred of war had abated was it made possible to give them burial.

[In favor of the identification with Bittir, however, it might be mentioned that in 1874 Clermont-Ganneau discovered there a Latin inscription mentioning detachments of the fifth (Macedonica) and the tenth (Claudia) legions, the very ones which had been called from the Danube to put down the revolt of Bar Kokba. A Roman garrison was left at Bittir just because of its strategic importance. See Clermont-Ganneau, in "Académie des Inscriptions, Comptes Rendus," 1894, pp. 149 *et seq.*; Hanauer, in "Pal. Explor. Fund, Quart. Statements," 1894, p. 149; Buhl, "Geogr. des Alten Palästina," p. 165; Cheyne, in "Encyc. Bibl." i. 555.—G.]

BETHEL, or **DE SYNAGOGA** (מן ביתאל, "of the house of God"): An Italian-Jewish family, several members of which are known as liturgical poets and copyists. According to a family tradition, it was one of the four prominent Jewish families deported by Titus to Rome after the destruction of the Temple. The name "Bethel," however, seems to be derived from Casadio (= house of God, "beth-el"), probably their place of origin.

Traces of this family are found as early as the twelfth century. By the middle of the fifteenth century the name had almost disappeared, and the family had assumed the name of Anaw, of which family the Bethelides had always been a branch.

The following members are best known to fame:

Ismael ben Moses Bethel: Physician; lived in the middle of the sixteenth century.

Jehiel ben Mattithiah Bethel: Physician; lived at Pisa in the fourteenth century (compare "He-Ḥaluẓ," ix., part 2, p. 50).

Jekuthiel Bethel: Son of the preceding; copyist; lived at Rome at the beginning of the fifteenth century. The library of Parma possesses a "Maḥzor" written by him for Nethaneel ben Abraham (see Steinschneider, "Hebr. Bibl." vii. 115).

Joab b. Benjamin Bethel: Liturgical poet; lived at Rome at the end of the fourteenth century and the beginning of the fifteenth. He was the author of a "Ḳaddish" in 8 strophes (compare Zunz, "Literaturgeschichte," p. 490; Landshut, "'Ammude ha-'Abodah," p. 80). He is mentioned by Rieti in his "Paradiso," p. 105.

Joab ben Nadan ben Daniel Bethel: Liturgical poet; lived at Rome in the fourteent century. He was the author of a "Reshut" on "Nishmat" for the Feast of Pentecost (compare Luzzatto, "Mebo," p. 23).

Bibliography: Zunz, *Gesammelte Schriften*, iii. 167 *et seq.*; Mortara, *Indice Alfabetico*, p. 8; Vogelstein and Rieger, *Gesch. der Juden in Rom*, i. 299, 307, 332.

BETHESDA: A pool in Jerusalem. According to John v. 2—the only passage wherein it is mentioned—it was "by the sheep market," hence on the north of the Temple-hill. Its exact location can not be definitely fixed. The Pilgrim of Bordeaux (about 333) and also Eusebius ("Onomasticon," cclx., ed. Lagarde) describe it as a double pond with reddish water, surrounded by five colonnades. Hence it might be identified with the two ponds below the convent of the Sisters of Zion. During the Middle Ages, Bethesda was supposed to be the pond on the western side of the French church of St. Anne (compare "Palestine Exploration Fund," 1888, pp. 115 *et seq.*). There is a later tradition, entirely without foundation, that identifies Bethesda with the Birket Israel, a large basin at the northeastern corner of the Temple-hill.

F. Bu.

BETHPHAGE: Town mentioned in several passages of the New Testament (Matt. xxi. 1; Mark xi. 1; Luke xix. 29), in all of which it is brought into connection with Bethany, or the Mount of Olives. It was, therefore, on the road to Jericho, near Jerusalem, and outside of the wall. This is known also from Talmudical references, where it is given as the Sabbath distance limit (Neubauer, "G. T." p. 147). According to some passages of the Talmud, also, it would appear that Bethphage (Tos. Pes. viii.) was near, yet outside, Jerusalem בית פני, Soṭah 45a). Yet it is referred to as surrounded by a wall (Pes. 63b, 91a; Men. 78b), which description does not exactly correspond to any known locality in the immediate neighborhood of Jerusalem. The exact location, however, has not been determined (see Buhl, "Geographie des Alten Palästina," p. 155).

J. Jr.
G. B. L.

BETHSAIDA: A town in northern Palestine not mentioned in the Old Testament, but referred to in the Gospels, and by Josephus, Pliny, and others. According to Josephus ("Ant." xviii. 2, § 1; 5, § 6; "B. J." ii. 9, § 1; iii. 9, § 7), Philip transformed the village Bethsaida—situated on the Jordan where it discharges into the Sea of Galilee—into a large, flourishing city, which he called Julias. The Gospels mention the village Bethsaida; Jesus sometimes stayed there; and Philip, Andrew, and Peter came from there (Matt. xi. 21; Mark vi. 45; viii. 22, 26; Luke ix. 10; John i. 44, xii. 21). It has been falsely assumed from some of these passages that there was a Bethsaida west of the Jordan. The statement of John (xii. 21) that Bethsaida lay in Galilee is not convincing, as Josephus and others sometimes consider portions of the eastern coast of the lake as belonging to Galilee (compare Buhl, "Geographie des Alten Palästina," p. 242). But one must probably make a distinction between Bethsaida-Julias and the fishing village Bethsaida mentioned in the Gospels. The latter was probably close by the lake, while the city of Philip lay higher up, near the little plain of Batiha.

J. JR. F. Bu.

BETHUEL.—Biblical Data: **1.** According to Gen. xxii. 22, a descendant of Arphaxad (compare Gen. xi. 13–22). He was the son of Nahor and Milcah, and father of Laban and Rebekah. Since in Gen. xxv. 20 and xxviii. 2, 5, Bethuel is called "the Syrian [Aramean] of Padan-aram," he must have been, according to this source, a descendant of Aram, the brother of Arphaxad (Gen. x. 22; compare Budde, "Urgeschichte," pp. 421–426). In the story of Rebekah's marriage (Gen. xxiv.) he is only mentioned once, as taking an active part in events (verse 50, "then Laban and Bethuel answered"). Some critics omit his name here, and assume that Bethuel was already dead at that time (Ball, "S. B. O. T." *ad loc.*; Holzinger, Commentary to Gen. p. 170). Other critics (*e.g.*, Dillmann, *in loco*) suppose that throughout Gen. xxiv. the name "Bethuel" is a later addition. Gunkel (Commentary to Gen. pp. 226, 229) finds here two traditions, and supposes the Bethuel of verse 50 to be a younger brother of Laban. Some critics think that Bethuel may have been the name of an Aramean tribe in Mesopotamia.

2. Name of a town in the tribe of Simeon (Josh. xix. 4; I Chron. iv. 30), the site of which has not yet been identified.

J. JR. B. E.

——In Rabbinical Literature: Bethuel, being king of Haran, exercised the *jus primæ noctis* in his dominions. The people consented, only on condition that he should use this privilege also toward the members of his own family. God, therefore, let him die suddenly when Eliezer wooed Rebekah for Isaac, in order to spare her the dreadful ordeal. This explains why, in the Biblical account of Eliezer's wooing (Gen. xxiv. 50), Bethuel is at first mentioned, but afterward only Rebekah's mother and brother are referred to, Bethuel having died during the night (Yalk. i. 109, probably from the lost Midrash Abkir). Another legend states that Bethuel intended to kill Eliezer when he saw the treasures which the latter brought with him, and, not being able to carry out his purpose, on account of Eliezer's great strength (see ELIEZER, IN RABBINICAL LITERATURE), he mixed poison with his food. The angel who accompanied Eliezer changed the plates, however, so that Bethuel ate the poisoned portion which he had intended for Eliezer, and died therefrom (Yalk. *l.c.*, Midrash Aggadah, ed. Buber, Vienna, 1894, i. 58, 59). According to the old Midrashim, Bethuel refused to give his daughter in marriage, and for that reason God caused him to die suddenly, while Eliezer was staying in his house (Gen. R. lx. 12).

L. G.

BETHULIA (Βαιτουλούα, Βαιτουλία, Βετυλούα, Βαιτυλούα; Vulgate, **Bethulia**): Name of the city which, according to the Book of Judith, was besieged by Holofernes; the home of Judith. In the shorter version of the legend published by Gaster ("Proceedings of the Society of Biblical Archeology," 1894, xvi. 156 *et seq.*), Jerusalem is the besieged city. The name "Bethulia" may, therefore, be assumed to be an allegorical one, meaning perhaps "Beth-el" (house of God), or it may be a word compounded of "betulah" and "Jah" ("YHWH's virgin"). In the better-known longer version, however, the whole context points to the situation of the city as having been on the mountains to the south of the large plain of Jezreel. Bethulia is, moreover, spoken of in a way to distinguish it decidedly from Jerusalem. It may therefore be accepted that in the longer version the story has been connected with a definite tradition current in that locality. The original allegorical name, however, may have been applied to a place in that region; but it has not yet been possible to find traces of the name in the region to the south of the large plain. The name "Mataliye," a place on a hill south of the small fertile plain Merj-el-Gharaḳ, comes nearest to it; but this point is too far south to correspond to the details given in the Book of Judith. This objection applies even more strongly to the fort Sânûr, which is still farther south, and to which, among others, Guerin refers it. Marta ("Intorno al Vero Sito de Betulia," 1887) has tried to identify the city with El-Bared, west of Jennîna, a location that, topographically considered, is quite possible. According to Willrich ("Judaica," 1900), "Bethulia" is a corruption of "Bethalagan."

J. SR. F. Bu.

BETROTHAL (אירוסין in Talmudic Hebrew): The term "betrothal" in Jewish law must not be understood in its modern sense; that is, the agreement of a man and a woman to marry, by which the parties are not, however, definitely bound, but which may be broken or dissolved without formal divorce. Betrothal or engagement such as this is not known either to the Bible or to the Talmud, and only crept in among the medieval and modern Jews through the influence of the example of the Occidental nations among whom they dwelt, without securing a definite status in rabbinical law.

In the Bible.

Several Biblical passages refer to the negotiations requisite for the arranging of a marriage (Gen. xxiv.; Song of Songs viii. 8; Judges xiv. 2–7), which were conducted by members of the two families involved, or their deputies, and required usually the consent of the prospective bride (if of age); but when the agreement had been entered into, it was definite and binding upon both groom and bride, who were considered as man and wife in all legal and religious aspects, except that of actual cohabitation.

The root ארש ("to betroth"), from which the Talmudic abstract ארוסין ("betrothal") is derived, must be taken in this sense; *i.e.*, to contract an actual though incomplete marriage. In two of the passages in which it occurs the betrothed woman is directly designated as "wife" (II Sam. iii. 14, "my wife whom I have betrothed" ("erasti"), and Deut. xxii. 24, where the betrothed is designated as "the wife of his neighbor"). In strict accordance with this sense the rabbinical law declares that the betrothal is equivalent to an actual marriage and only to be dissolved by a formal divorce.

After the betrothal a period of twelve months was allowed to pass before the marriage was completed by the formal home-taking ("nissu'in," "likkuḥin"). In case the bride was a widow or the groom a widower, this interval was reduced to thirty days (Ket. v. 2; Shulḥan 'Aruk, Eben ha-'Ezer, 56). After the dispersal of the Jews had brought them into contact with the Western peoples, this arrangement was felt to be inconvenient and out of harmony with the prevailing views. It therefore became

Betrothal Scene at Nuremberg.
(From Kirchner, "Judisches Ceremoniell," 1726.)

Betrothal and Home-Taking.

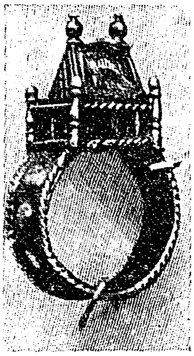
customary to perform the entire marriage ceremony, betrothal and home-taking ("erusin" and "nissu'in"), at one time; and an affiancing or engagement similar to that prevailing among non-Jews was introduced. This was not an entire innovation, as its roots already existed in the custom of "shiddukin" or consent to marry, which existed in the days of the Talmud and probably also in the Biblical age. It was considered indispensable by the rabbis that a man should gain the good-will and consent of his prospective bride before entering upon a contract of marriage. Rab, the Babylonian amora, was accustomed to punish severely any one who married without first having persuaded and gained the consent of his wife (Ḳid. 13a; Yeb. 52a *et al.*).

What was in the Talmudic age a mere personal matter became in later times a formal custom, which was celebrated with much pomp. At these occasions it was customary to make out a formal contract to marry and to stipulate that a penalty should be imposed upon either party who should fail to fulfil his or her part of it. Such agreements were known as "shiddukin" (consent to marry), and also as "tenaim" (conditions), or among German-speaking Jews "ḳenas-mahl" (penalty-feast), because of these stipulations and penalties. They are still customary in many countries in modified form.

There is now no legal duration of time between betrothal and marriage, the length of the engagement being left entirely to the option of the parties concerned, except that the marriage may not take place in less than seven days after the agreement to marry has been reached (Nid. 66a; Shulḥan 'Aruk, Yoreh De'ah, 192).

Gifts.

In Talmudic days, as in modern times, gifts formed an important feature of betrothal and marriage customs. These were of several kinds. The gifts which the groom sent to his bride were called "siblonot" or "sablonot," a term which Benjamin Musafia and Kohut explain as derived from the Greek *σύμβολον* ("a gift or payment made as a sign or a mark by which to infer something; a token") ("'Aruk ha-Shalem," vol. vi., *s.v.* סבלונות). This derivation is corroborated by the fact that the Talmud (Ḳid. 50b) debates the question whether the sending of siblonot can be considered a proof of marriage or not. Jastrow, however ("Dict." *s.v.* סבלון), derives the term from סבל ("to carry"), corresponding to the Biblical "massa" and "masset." It was also customary for the male friends of the groom to send gifts, which sometimes took the form of money donations and were useful in assisting the groom to defray the expenses of the wedding. These presents were termed "shoshbinut" (friendship-gifts), from the Aramaic "shoshbina" (friend or neighbor), supposed by Musafia and Kohut to be derived from the Greek *σύσκηνος* ("one living in one's tent; messmate; but see Payne-Smith, "Thesaurus," *s. v.*). Sachs ("Beiträge zur Sprach- und Alterthums-Forschung," 1852, pp. 82 *et seq.*) derives the word from שושבא, the myrtle-bearing companions of the bridegroom.



Silver-Gilt Betrothal Ring, Bearing Letter מ for "Mazal Ṭob."
(From the Victoria and Albert Museum, London.)

Betrothal in its legal sense ("erusin") is performed in the following manner: After the ordinary benediction over wine, the person performing the ceremony continues as follows: "Blessed art Thou, O Lord, our God, King of the universe, who hast sanctified us with Thy commandments and given us commandments concerning forbidden connections, and hast forbidden unto us those who are merely betrothed, and permitted unto us those lawfully married to us through 'canopy' ["ḥuppah"] and 'betrothal' ["kiddushin"]. Blessed are Thou, O Lord, who sanctifiest Thy people Israel through ḥuppah and ḳiddushin," after which the groom hands to the bride a ring or some object of value (not less than a peruṭah, the smallest current coin), saying, "Be thou betrothed unto me with this ring [or object] in accordance with the laws of Moses and Israel" ("kedat Mosheh we-Yisrael").

The Legal Ceremony.

As stated above, this act of betrothal is at present combined with the rite of home-taking; and after the placing of the ring upon the finger of the bride, the marriage contract (Ketubah) is read, to form an interval between the two acts. The recitation of another benediction over wine and of the customary seven wedding benedictions forms the completion of the wedding ceremony. See Wedding.

(After Kohut, "Geschichte der Deutschen Juden.")

BETTELHEIM: Name of a Hungarian family. The first bearer of it is said to have lived toward the second half of the eighteenth century, in Presburg. To account for its origin the following episode is related in the family records:

> There was a Jewish merchant in Presburg, whose modest demeanor gained for him the esteem of his fellow-townsmen. He was popularly called "Ein ehrlich Jud" (honest Jew). His wife was a woman of surpassing beauty, and many magnates of the country, hearing of her charms, traveled to Presburg to see her. Count Bethlen was particularly persistent, and, failing to attract her attention, he decided to abduct her. Mounted on his charger, he appeared one day in the open market, where the virtuous Jewess was making purchases, and, in the sight of hundreds of spectators, lifted her on his horse, and, heedless of her cries of entreaty, was about to gallop off with her, when her husband appeared on the scene and, after a fierce personal combat, succeeded in rescuing her.

That a Jew should engage in a hand-to-hand encounter with a nobleman of the rank of Count Bethlen was so unprecedented, and the deed itself was

THE JEWISH ENCYCLOPEDIA VOL III. COPYRIGHT 1902, BY FUNK & WAGNALLS COMPANY, NEW YORK & LONDON.

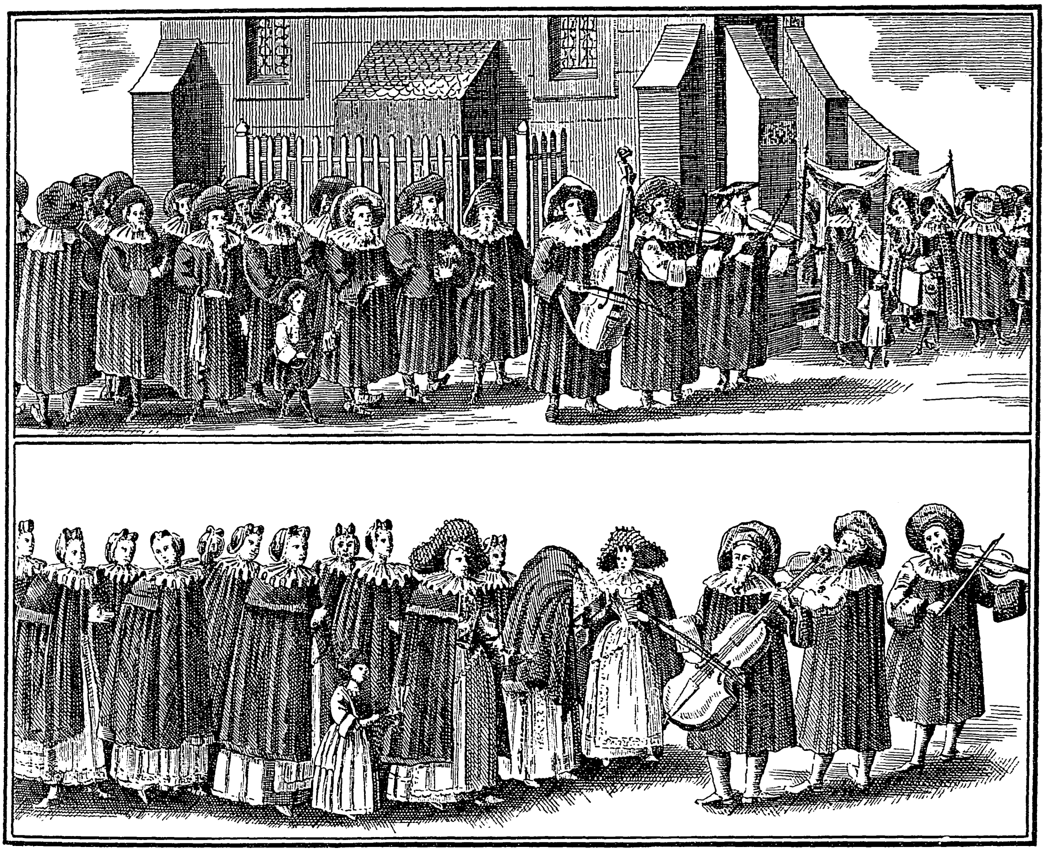
GRAY LITH. CO. N.Y.

ITALIAN KETUBAH, or BETROTHAL DEED, dated 5555 A.M.

(FROM THE NEW YORK PUBLIC LIBRARY.)

so daring in view of the social status of the Jews of those times (which remained unchanged until the liberal laws of Emperor Joseph II. were promulgated), that the populace thenceforth styled the hero of the story "Bethlen-Jude." This name clung to him until the royal edict, bidding Jews to assume family names, went into force, and then the name was changed to "Bettelheim." Among the family relics preserved by a scion of the house in Freystadtel, on the Waga, is an oil-painting which depicts the daring rescue of the Jewess from the hands of her abductor.

Of the descendants bearing the name of Bettelheim the following are the most prominent:



PROCESSIONS OF BRIDEGROOM AND OF BRIDE, CIRCA 1700.
(From Kirchner, "Jüdisches Ceremoniell," 1726.)

1. **Albert (Aaron) Siegfried Bettelheim:** Rabbi and Hebraist; born in Hungary April 4, 1830; died at sea Aug. 21, 1890. At the age of eleven he entered the yeshibah of Presburg, and afterward studied in the Talmudical schools at Leipnik, Moravia, and Prague; enjoying the tutelage of S. L. Rapoport, from whom, at the age of eighteen, he obtained his rabbinical diploma. Bettelheim officiated for a short time as rabbi and religious teacher at Münchengrätz, and then returned to Prague to enter the university, whence he graduated with the degree of Ph.D.

Becomes Censor of Hebrew Books.

In 1850, and for several years thereafter, Bettelheim was the Austrian correspondent of a number of London journals, and acted as private tutor ("Hofmeister") to Count Forgács, then governor of Bohemia, and afterward Hungarian court-chancellor. In the early fifties Bettelheim removed to Temesvár, Hungary, where he was director of the Jewish schools and editor of a political weekly called "Elöre" (Forward). In 1856 he became the "official translator of Oriental languages and censor of Hebrew books" at Czernowitz, where, in 1858, he married Henrietta Weintraub, the first female Jewish public-school teacher in Hungary. In 1860 he became rabbi at Komorn, Hungary, where he was appointed superintendent of all the schools—the first Jew to gain such a distinction. Thence he went to Kaschau, where he officiated as rabbi until 1862. While at Kaschau he edited a Jewish weekly, "Der Jude" (jargon), to combat the views of the Jewish Congress, then holding animated conventions at Budapest. There, too, he edited a political weekly, whose progressive ideas were discountenanced by his congregation and held to be prejudicial to Judaism. The fanaticism of his people became so pronounced that, being threatened with excommunication by one of the colleagues of his former domicile in Komorn, he decided to emigrate to America with his family.

Emigrates to America.

In 1867 Bettelheim was elected rabbi of the Crown street congregation (now Beth Israel) of Philadelphia, and became a professor at the Maimonides College. In 1869 he became rabbi of congregation Beth Ahabah, of Richmond, Va., where he established and edited a German weekly, "Der Patriot" (afterward changed into a daily, with the title "The State Gazette"). While in Richmond he entered the Medical College, and was graduated with the degree of M.D. He intended to write a work on Jewish medicine, and has left behind a number of monographs and other documentary material not yet published.

Though assured of a remunerative practise as a physician, Bettelheim, at the solicitation of his congregation and of clergymen of other denominations, whose honored associate he was, did not forsake the pulpit. In 1875 he was elected rabbi of the Ohabai Shalom congregation of San Francisco, Cal., where he became chairman of the Society for the Study of Hebrew, composed entirely of Christian clergymen, and director of the Society for the Suppression of Vice. He held other public offices, and delivered the baccalaureate sermon at various high schools and colleges. He occupied the pulpits of the Unitarian and Baptist churches in San Francisco, and afterward in Baltimore, where, in 1887, he became rabbi of the First Baltimore Hebrew Congregation, an office he held till his death. In Baltimore he became identified with a number of public institutions and charitable organizations, and instructed some non-Jews in the elements of the Hebrew language.

While on the homeward voyage from a visit to Europe, he died on board ship, and was buried Aug. 21, 1900. Two Catholic priests, whose acquaintance Bettelheim had made on the voyage, read the Jewish burial service and recited the "Kaddish" as the body was lowered into the sea.

His Literary Activity.

Bettelheim's literary activity was of the most varied kind. Besides the items enumerated above, it may be noted that he was the art critic of a prominent San Francisco journal; coeditor of the "Jewish Times" (now the "Jewish Times and Observer") of San Francisco, from 1880 to 1886; a regular contributor to the "Argonaut" of that city; a frequent contributor to the "Jewish Exponent" of Philadelphia, and the "Menorah Monthly" in New York. He was the author of some charming ghetto tales and stories of Jewish life, two of which—"Yentil the Milk-Carrier" and "The Baal-Milhamah-Rabbi"—were translated into German, Hungarian, and Hebrew. He was at work for over twenty years on a Revised English Bible, about three-fourths of which he had completed in manuscript at the time of his death. Many of his suggestions and scholarly notes are incorporated in the last two volumes of Kohut's "Aruch Completum."

2. **Anton Bettelheim:** Austrian critic and journalist; born at Vienna Nov. 18, 1851. He studied law, and for some time was engaged in active practise, but abandoned the profession for a literary career. Although he had received his degree of "doctor of law," he attended the lectures of Giesebrecht and M. Bernays at Munich on literary subjects. Fired by the eloquence and enthusiasm of the latter, he undertook the study of Beaumarchais' life and writings, and, to this end, resolved to make original investigations in the libraries of London, Paris, The Hague, Carlsruhe, and Spain. After an extended tour through Germany, France, England, and Spain, Bettelheim became, in 1880, the feuilleton editor of the Vienna "Presse." He retained this position until 1884, when he became editor of the "Deutsche Wochenschrift." In 1886 he joined the editorial staff of the "Deutsche Zeitung," which position he resigned shortly after to publish the "Biographischen Blätter," subsequently issued as "Biographisches Jahrbuch und Deutscher Nekrolog."

Bettelheim's works are: "Beaumarchais," a biography, 1886; a translation of Littré's "Wie Ich Mein Wörterbuch der Französischen Sprache zu Stande Gebracht Habe," 1887; "Volkstheater und Lokalbühne 1887," 1887; "Ludwig Anzengruber, der Mann; Sein Werk, Seine Weltanschauung," 1891; "Die Zukunft Unseres Volkstheaters," 1892; "Deutsche und Franzosen," 1895; "Acta Diurna, Gesammelte Aufsätze," 1899; and "Führende Geister," 1890–97.

Bettelheim is also one of the editors of Anzengruber's complete works, published by Cotta, 1890.

S. E. Ms.

3. **Caroline von Bettelheim-Gomperz** (also called **Tellheim**): Court singer and member of the royal opera, Vienna; born June 1, 1845, at Pesth. She studied piano with Karl Goldmark, and singing with Läufer. At the age of fourteen she made her début as a pianist, and two years later appeared for the first time in opera at Vienna. She eventually obtained a permanent engagement at the Royal Opera in that city. She has occasionally starred in her favorite rôles in other cities of Germany as well as in London. She is the wife of Julius Ritter von Gomperz, president of the Austrian chamber of commerce and member of the Upper House.

S. J. So.

4. **Felix Albert Bettelheim:** Physician and surgeon of Panama; born in Freystadtel, on the Waag, Hungary, Sept. 2, 1861; died in Baltimore, Md., April 4, 1890. He was the son of the rabbi Aaron Siegfried BETTELHEIM, and emigrated to the United States in the sixties. In his seventeenth year he was graduated from the University of California with high honors, and three years later from the Medical College in San Francisco. From 1880 to 1881 he was resident physician of the San Quentin state prison; from 1881 to 1883, ship's surgeon of the Pacific Mail steamship "Colima"; 1883–89, surgeon-general of the Panama Railroad and Canal

Company. Through his efforts the first hospital in Panama was built; and he became one of its staff of physicians. He held several high offices and received a number of medals and testimonials from the government in recognition of his services.

Bettelheim was the discoverer of a new germ peculiar to tropical countries, an account of which is given in medical records. In 1889 he studied clinical methods in the great European cities. On his return to America he died from a tropical liver complaint which was held by American authorities to be unique and was described by Professor Osler, of Johns Hopkins University, in a London medical journal. He was a frequent contributor to the "Lancet" and other periodicals, and left a posthumous work, "On the Contagious Diseases of Tropical Countries," still unpublished. A text-book by Dr. Thorington of Philadelphia, on the diseases of the eye, is dedicated to Bettelheim's memory.

A. G. A. K.

5. **Jacob Bettelheim** (pseudonym, **Karl Tellheim**): German dramatist; born at Vienna Oct. 26, 1841. He attained considerable prominence by his first attempt in the field of literature, "Elena Taceano," a romance. This he followed with "Intime Geschichten" (novelettes) and a drama, "Nero," written in collaboration with Von Schönthan in 1889, the year in which he married Fräulein Brentano. A farce, "Die Praktische Frau," was his next production, after which came in quick succession "Giftmischer" and "Vater Morin," two plays; two dramas, "Ehelüge" and "Sein Bester Freund"; "Madame Kukuk," a farce; "Syrenen," a drama; "Seine Gewesene," farce; "Aus der Elite," farce, 1894; "Der Millionenbauer," drama, in collaboration with M. Kretzer; "Verklärung," drama, 1897; "Verklärung," farce, 1898; "Der Retter," comedy, 1898; "Onkel Jonas," a popular drama, in collaboration with O. Klein, 1898; "Victorinen's Hochzeit" (translated from George Sand's play), 1879; "Marguerite" (from Sardou), 1886; "Der Erbe" (from De Maupassant), 1894; and "Im Verdacht" (from Labiche).

Bibliography: Kürschner, *Deutscher Literatur-Kalender*, 1901, p. 98.

s. E. Ms.

6. **Karl Bettelheim**: Austrian physician; born at Presburg, Hungary, Sept. 28, 1840; died July 27, 1895. He received his medical education at the University of Vienna, where he studied under Hyrtl, Brücke, Rokitansky, and Skoda. In 1868, two years after obtaining his doctorate, he was appointed assistant to Oppolzer, and served in that capacity until 1870. Three years later he became docent of medicine (*Innere Medizin*) at the University of Vienna. From 1870 to 1878 he was editor of the "Medicinisch-Chirurgische Rundschau," and for several years was chief of the department of internal diseases at the Polyclinic, and physician-in-chief of the Rudolfinerhaus at Unterdöbling, near Vienna.

The scientific investigations of Bettelheim are chiefly on the pathology of the heart and blood-vessels. His experimental researches on mitral insufficiency and on the mechanics of the heart following compression of the coronary arteries are considered of great value.

Bettelheim's writings comprise a number of papers on diseases of the blood and circulatory organs, on certain affections of the alimentary canal, and reports of interesting clinical cases, which he published in the leading medical journals. His most important contributions are: "Ueber Bewegliche Körperchen im Blute," and "Ueber einen Fall von Phosphorvergiftung," in the "Wiener Medicinische Presse," 1868; "Ein Fall von Echinococcus Cerebri," "Stenose eines Astes der Pulmonalarterie," and "Bemerkungen zur Diagnose des Magencarcinoms," in "Vierteljahrschrift für Psychiatrie"; "Die Sichtbare Pulsation der Arteria Brachialis, ein Beitrag zur Symptomatologie Einiger Erkrankungen der Circulationsorgane," in the "Deutsches Archiv für Klinische Medicin," 1878; "Die Bandwürmer beim Menschen," in the "Sammlung Klinischer Vorträge," 1879. He translated from the French R. Lepin's "Pneumonia Lobvin," Vienna, 1883; and "Diseases of the Spinal Cord," by the English neurologist Gowers. Bettelheim also described the origin of the second sound in the carotid artery ("Entstehung des Zweiten Tones in der Carotis," in "Zeitschrift für Klinische Medicin," 1883).

Bibliography: L. Eisenberg, *Das Geistige Wien*, ii. 26; Hirsch, *Biographisches Lexikon*, i. 440; Pagel, *Biographisches Lexikon*, p. 161.

s. W. S.

7. **Leopold (Meyer Leb) Bettelheim**: Hungarian physician; born in the second half of the eighteenth century. He was not only eminent in his profession, but was considered a Hebraist of some importance. He lived in Freystadtel, on the Waag, and there held the responsible office of physician-in-ordinary to Count Joseph Erdödy, the influential court chancellor of Hungary, in whose private residence are still preserved the surgical instruments used by Bettelheim in saving the lives of the count and his family, together with documents recording some remarkable cures effected by him.

In 1830 Bettelheim was the recipient of a gold medal of honor from the emperor Franz I. for distinguished services to the royal family and to the nobility.

8. **Samuel (Shemuel Ẓebi) Bettelheim**: Son of Leopold (No. 7); physician, merchant, and political agitator during the troublous years preceding the Revolution of 1848; afterward served in the army. His wife, **Eva**, was a woman of unusual scholarly attainments, and an earnest student of the Bible and its commentaries. She was an excellent Talmudist and wrote a number of disquisitions on learned rabbinical questions. The famous reformer Hodza, an evangelical pastor and organizer of a violent Slavonic movement in northern Hungary in 1848, was her instructor in classical and modern literature.

Bibliography: *Gróf Erdödy József Krónikája* (printed for private circulation only), pp. 84-86; *Pozsonyi Közlöny*, 1863, p. 6; a transcript from old family records supplied for this biography by Dr. Joseph Bettelheim in Budapest.

s. G. A. K.

BETTING: The mutual agreement of two parties as to gain and loss upon a certain contingency. It seems to have been unknown in Biblical times. There is no mention of it in the Scriptures, unless an allusion to this kind of easy gain is intended in such proverbs as the following:

Possibly Alluded to in Proverbs.

> "He that tilleth his land shall have plenty of bread, but he that followeth after vain things [A. V. "vain persons"] is void of understanding" (Prov. xii. 11). "Wealth gotten by vanity shall be diminished, but he that gathereth by labor shall have increase" (*ib.* xiii. 11, A. V.). "He that maketh haste to be rich shall not be unpunished" (*ib.* xxviii. 20, A. V.). "He that hasteth after riches hath an evil eye, and knoweth not that want [or disgrace] shall overcome him" (*ib.* xxviii. 22, Hebr.).

An interesting case of betting is related in Ab. R. N. xv. and Shab. 30d *et seq.*: "Two men (A and B) bet whether it was possible to provoke Hillel to anger. One of them (A) said, 'I can do it.' They agreed that, if he did provoke Hillel to anger he should receive from the other (B) 400 zuz [the alternative of the bet, that in case of failure he was to pay to B the same amount, is not mentioned]. He tried his best, but failed. Then he exclaimed: 'If thou art Hillel, the prince of Israel, I hope that there are not many in Israel like thee; for through thee I lose 400 zuz.' Hillel replied: 'Learn to control thyself; the lesson learnt by Hillel's patience is worth even twice the stake.'"

If two parties have bound themselves by a bet, however blamable the act of betting may be, they have to act in accordance with the moral precept, "That which is gone out of thy lips thou shalt observe and do" (Deut. xxiii. 24 [R. V. 23]). They are at least morally bound; but it is not certain whether the loser is also forced by law to abide by the agreement. In the Mishnah (R. H. i. 8; Sanh. iii. 3) betting seems to be among the vices that disqualify those addicted to them from giving evidence. The passage runs thus: "The following are disqualified from giving evidence: He who plays at dice ["meẓaḥeḳ be-ḳubia"] or lends on interest, or bets on pigeons." The original for the last expression is "mafriḥe yonim" (literally, "causing pigeons to fly") and is thus explained in the Gemara (Sanh. 25a): "If thy pigeon comes before the other" [supply] "then I pay thee so and so much." Another explanation is offered by Ḥama, who can not adopt the first definition of "mafriḥe yonim," because the principle of betting is already mentioned in the phrase "playing at dice."

Bettors Disqualified as Witnesses.

Two reasons are given why a betting man can not be heard as witness: (1) Rami b. Ḥama says: "The winner has no right to take the money of the loser; and if he takes it, he is guilty of robbery." (2) Rab Sheshet says: "A person addicted to betting wastes his time in idleness, and does not fulfil his duty as a human being of contributing by his work his share to the welfare of mankind" ["eno 'oseḳ beyishshubo shel 'olam"]. Both agree that betting disqualifies a person from giving evidence, but with this difference: Rami b. Ḥama declares a betting man guilty of robbery, and therefore disqualified even if he bets only occasionally; while Rab Sheshet would not declare him disqualified, unless betting is his sole occupation (Sanh. 24b).

Whether a betting man is guilty of robbery or not depends on the legal value of the betting transaction. Two parties frequently agree to certain conditions, because either party hopes to gain by them, and thinks only of the one eventuality that is favorable to him. The reverse seems to him to be out of question; and neither party is actually prepared for the loss. Such a transaction is called "asmakta" (see ASMAKTA). Rab Sheshet denies that the rule of asmakta applies to the case of meẓaḥeḳ be-ḳubia, or playing at dice. The Tosafot, in discussing this subject, come to the conclusion that when a certain sum of money is laid on the table with the understanding that the winner shall take it, the transaction is legally valid; but that games which are played on credit are asmakta, and the stake is not recoverable by law.

Maimonides' Views.

Maimonides, in his commentary on the Mishnah, speaks of the immorality of the above-named games as follows: "He who indulges in this game spends his time in things which do not contribute to the well-being of his fellow-man; and it is one of the principles of our religion that man ought to occupy himself in this world either with the study of the Torah, in order to perfect his soul in the wisdom of the Torah, or in some useful work or handicraft or trade; but so that he finds some time for the study of the Law." In the same sense he speaks, in his Yad ha-Ḥazaḳah, Gezelah we-Abedah, vi. 11: "Our sages declare many things as forbidden because they involve robbery; viz., playing at dice, and the like, and even where the term 'robbery' does not apply, it is forbidden as a useless occupation" ("'oseḳ bi-debarim beṭelim"). There are some authorities who consider a game at dice less serious, and allow it as harmless (compare Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 207, 13, note).

BETURIA, PAULINA: Roman proselyte to Judaism (about the year 50), known under the name "Sarah," who, according to her Latin epitaph, was eighty-six years and six months old at the time of her death. For sixteen years she was a Jewess, a mother of the synagogues ("mater synagogarum") of the Campesian and Volumnian communities in Rome. A proselyte variously mentioned in Talmudic sources as Beluryah, Beruryah, Belurit, and Beruẓia, who was learned in the Jewish law, and who induced her slaves to become proselytes (Mek., Bo, 15; R. H. 17b; Yeb. 46a; Gerim ii. 4), is perhaps identical with Beturia.

G. S. KR.

BEUGNOT, AUGUSTE ARTHUR, COUNT: French statesman and scholar; born at Bar-sur-Aube March, 1797; died at Paris March 15, 1865. Originally he adopted the profession of advocate, but soon abandoned it in order to devote himself entirely to the study of history, and especially the history of the Crusades. He was scarcely thirty-five years old when he was elected member of the Académie des Inscriptions et Belles-Lettres.

Among many valuable works he wrote, "Les Juifs d'Occident, ou Recherches sur l'État Civil, le Commerce, et la Littérature des Juifs en France, en Espagne, et en Italie Pendant la Durée du Moyen-Age," Paris, 1824. This essay is not free from errors such as are common to those that obtain their information from secondary sources. In the preface, in which he passes in review the period of the struggles of the Jews with the Romans, and the state of the Jews exiled under the Roman emperors, Beugnot betrays scant knowledge of ancient Jewish history. Thus he asserts, contrary to the most authentic documents, that Julian the Apostate never granted to the Jews permission for the rebuilding of the Temple. Nevertheless, the work contains much information on the history of the Jews of France, Spain, and Italy, which has proved valuable to later historians. The author, who was a Catholic, does not attempt to extenuate the horrors of the persecution of the Jews in the Middle Ages.

S. I. Br.

BEUTHEN: City of Prussian Silesia. No precise information is forthcoming as to when Jews first settled in the city. The mention of Beuthen in the Mainzer Memorbuch (year 1231) is uncertain; but it is known that Jews lived there as early as 1421. The first documentary evidence relating to the Jews of Beuthen dates from the year 1612. In 1617 there was one Jew there, Mauth Arendator by name; and in 1639 two more Jews were admitted to residence. In 1640 a Jew named Kretscham received from Count Gabriel Hentzel the privilege of establishing an inn, and in 1653 another received the right to sell liquor. In 1656 a court Jew resided here; and in the following year an investigation as to the number of Jews was made for the purpose of increasing the taxes. The responsa of Menahem Krochmal in 1657 mention the rabbinate of Beuthen. The Jews were often ill-treated and sought protection from the count, who, in 1688, wrote in their behalf to the city authorities.

In 1715 there were only four families in Beuthen; in 1732 the Jews received a plot for a cemetery, the oldest tombstone still in existence dating from the year 1743. The number of families had in 1782 increased to twenty-three; and in the same year the first prayer-meetings were held in the house of the Boehm family. These were followed by the first synagogue in 1809; the second being inaugurated in 1869, when also the first reader and shohet were appointed.

In 1808 a Jew had been elected member of the common council. The community, which in 1811 consisted of 255 persons, had increased in 1855 to 1,110, in 1885 to 2,290, and in 1901 to 3,026 persons.

The first rabbi, Moses Israel Freund, officiated from 1790 to 1813; the second, Mendel Cohen, until 1829; the third, Israel Deutsch, author of several writings, until 1853; the fourth, Jacob Ezekiel Levy, until 1864; while the fifth, Ferdinand Rosenthal, served from 1867 to 1887, being succeeded in 1889 by M. Kopfstein.

Bibliography: Kopfstein, *Gesch. der Synagogen-Gemeinde in Beuthen*, Beuthen, 1891; Salfeld, *Martyrologium des Nürnberger Memorbuches*, p. 282; Brann, *Gesch. der Juden in Schlesien*, i. 27.

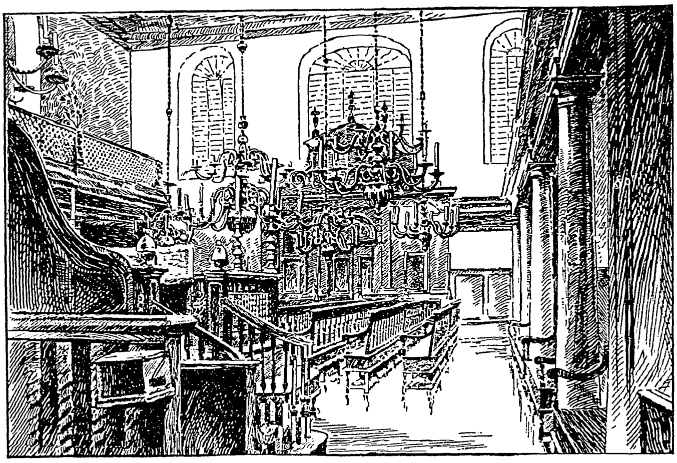
BEVIS MARKS GAZETTE. See Periodicals.



Interior of the Bevis Marks Synagogue, London.

(After a photograph.)

BEVIS MARKS SYNAGOGUE (known officially as the **Synagogue Saar ha-Samayim**): The oldest Jewish house of worship in London; established by the Sephardic Jews in 1698, when Rabbi David Nieto took spiritual charge of the congregation. At that time the worshipers met in a small synagogue in Cree Church lane; but the considerable influx of Jews made it necessary to obtain other and commodious quarters. Accordingly a committee was appointed, consisting of Antonio Gomes Serra, Menasseh Mendes, Alfonso Rodrigues, Manuel Nunez Miranda, Andrea Lopez, and Pontaleao Rodriguez. It investigated matters for nearly a year, and on Feb. 12, 1699, signed a contract with Joseph Avis, a Quaker, for the construction of a building to cost £2,750 ($13,335). On June 24 of the same year, the committee leased from Lady Ann Pointz (alias Littleton) and Sir Thomas Pointz (alias Littleton) a tract of land at Plough Yard, in Bevis Marks, for sixty-one years, with the option of renewal for another thirty-eight years, at £120 a year.

Avis began building at once, incorporating in the roof a beam from a royal ship presented by Queen

Anne herself. The structure was completed and dedicated in 1702, and, with the exception of the roof, which was destroyed by fire in 1738, and repaired in 1749, is to-day as it was 200 years ago. In the interior decorations and arrangement the influence of the great Amsterdam synagogue of 1677 is apparent. In 1747 Benjamin Mendes da Costā bought the lease of the ground on which the building stood, and presented it to the congregation, vesting the deeds in the names of a committee consisting of Gabriel Lopez de Britto, David Aboab Ozorio, Moses Gomes Serra, David Franco, Joseph Jessurun Rodriguez, and Moses Mendes da Costa.

The Bevis Marks Synagogue was for more than a century the religious center of the Anglo-Jewish world, and served as a clearing-house for congregational and individual troubles all the world over; *e.g.*, the appeal of the Jamaican Jews for a reduction in taxation (1736); the internecine quarrel among the Barbados Jews (1753); and the aiding of seven-year-old Moses de Paz, who escaped from Gibraltar in 1777 to avoid an enforced conversion.

The synagogue formed the center of the Sephardic community of London till the foundation of the Bryanstone Street Synagogue, in 1866, after which the attendance at the functions declined so much that in 1886 the "yeḥidim" contemplated selling the ground and the building; but a Bevis Marks Anti-Demolition League was founded, under the auspices of H. Guedalla and A. H. Newman, and the proposed demolition was given up. The synagogue held its bicentenary celebration with great pomp in 1901.

J. E. Ms.—J.

BEẒAH ("Egg"): Name of a Talmudic treatise of Seder Mo'ed, the second of the six "sedarim" or orders of the Talmud. Its place in the Seder is not fixed. In the Babylonian Talmud it occupies the fourth place and follows immediately after Pesaḥim. This arrangement coincides with that of the Pentateuch, where the law concerning the holy days is directly connected with the description of Passover (Ex. xii. 16).

Frequently Called "Yom-Ṭob."

In the Mishnah and Talmud Yerushalmi another method is followed, and the treatise occupies the seventh and the eighth place respectively. The name "Beẓah" has its origin in the fact that the treatise begins with this word; a solitary instance among the treatises of the Talmud, it has a parallel in the name "Eykah" for Lamentations, in the Hebrew names of the five books of the Pentateuch, and in the names of the chapters of each treatise of the Talmud. Instead of "Beẓah" the treatise is frequently called "Yom-Ṭob" (Holy Day), in accordance with its contents. The general rule laid down in the Bible in the words "No servile work shall be done in them, save that which every man must eat, that alone may be done of you" (Ex. *l.c.*), is assumed as clear and known; and this rule was held to constitute the difference between "all servile work" (כל מלאכת עבודה), prohibited on holy days, and "all manner of work" (כל מלאכה), prohibited on the Sabbath. But certain problems resulting from these principles had to be solved; and these are discussed in the five chapters of this treatise.

Chapter i.: The main theme of this chapter is the law of "muḳẓeh," "a thing laid aside" so as not to be used for the present. The opposite of muḳẓeh is "mukan," "a thing kept ready" for use. This distinction is based on the divine command (Ex. xvi. 5), "And they shall keep ready [והכינו] what they bring in"—in reference to the manna, which had to be kept ready for the Sabbath from the sixth day. Traditional interpretation generalized the idea expressed in this commandment as follows: A thing which before the commencement of the Sabbath or holy day was not intended for use on these days is muḳẓeh, and must not be used or handled on these days. There are various degrees of muḳẓeh; *e.g.*, "muḳẓeh meḥamat issur"—muḳẓeh on account of some forbidden act which its use would necessitate; "nolad" (born), that which has not existed on the eve of the Sabbath or holy day, and is therefore muḳẓeh. There is a difference of opinion between the schools of Shammai and Hillel as to the force of the above law of muḳẓeh. The preparation of food permitted on holy days sometimes necessitates the carrying of things out of the house, or fetching of things from outside into the house—an act forbidden on the Sabbath, under the title of "hoẓaah" (taking out) (Mishnah Shab. vii. 2), as "taking out," one of the thirty-nine kinds of work included in the precept "Thou shalt do no manner of work." The application of this prohibition to holy days forms a point of difference between the aforenamed schools.

Chapter ii.: The permission to prepare food on holy days is restricted to food required for those days; but if a holy day is closely followed by the Sabbath, the food for the Sabbath may be prepared on that holy day, provided such preparation has commenced on the eve of the festival. This first instalment of the preparation for the Sabbath on the eve of a holy day is called "'erub tabshilin," "the link that unites the cooking" for the Sabbath on the eve of the holy day with that done on the holy day, and causes the latter to be permitted. The next point discussed in the chapter is the question whether things other than the preparing of food, if required for the celebration of the festival, or for the well-being of man—such as slaying certain sacrificial animals, or warming water for a foot-bath—may be done on a holy day.

Chapters iii., iv.: The permission to prepare on a holy day the food wanted for the day does not include hunting, fishing, or the purchase or fitting of implements required for the preparation of food (*e.g.*, whetting the slaughtering-knife, burning charcoal, etc.).

Chapter v.: On certain acts which are prohibited, not as "servile work," but as a preventive ("gezerah") against breaking any of the divine laws concerning the holy day. Such prohibitions are termed "shebut" (abstention from doing), commanded by the Talmudic sages.

The Tosefta calls the treatise "Yom-Ṭob," and has four chapters, contracting chapters ii. and iii.

into one. The treatise occupies the place between Sukkah and Rosh ha-Shanah, as in the Mishnah. The Gemara, both Palestinian and Babylonian, discusses the laws contained in the Mishnah with but a few short digressions, such as those in Bab. 4b; remarks on Yom-Ṭob Sheni, or the second days of festivals; (*ib.* 15b) Rabbi Eliezer's censure on those who left before his lecture was concluded; (16a) how Shammai and Hillel, each in his own way, showed their gratitude to God for the enjoyment of good food; (25b) on good manners in taking food; and others.

Of special commentaries on the treatise of Beẓah the following two are noteworthy: "Shiṭṭah Meḳubbeẓet," by Rabbi Bezalel Ashkenazi, and the commentary of Rabbi Menahem Meïri.

J. SR. M. F.

BEZAI: A family, 324 of whose members returned with Zerubbabel (Ezra ii. 17, and the parallel account, Neh. vii. 23). The name also occurs in the list of those who signed the covenant with Nehemiah, and may there be identified with the leader of the clan (Neh. x. 19); who in I Esd. v. 16 is called **Bassai.** It is interesting to note that the name "Besai" occurs on a clay tablet found at Nippur (Hilprecht, "Pal. Explor. Fund, Quarterly Statement," Jan., 1898, p. 55).

J. JR. G. B. L.

BEZALEL (A. V., Bezaleel).—**Biblical Data:** In Ex. xxxi. 1-6, the chief architect of the Tabernacle. Elsewhere in the Bible the name occurs only in the genealogical lists of the Book of Chronicles, but according to cuneiform inscriptions a variant form of the same, "Ẓil-Bêl," was borne by a king of Gaza who was a contemporary of Hezekiah and Manasseh. Apparently it means "in the shadow [protection] of El." Bezalel is described in the genealogical lists as the son of Uri, the son of Hur, of the tribe of Judah (I Chron. ii. 18, 19, 20, 50). He was said to be highly gifted as a workman, showing great skill and originality in engraving precious metals and stones and in wood-carving. He was also a master-workman, having many apprentices under him whom he instructed in the arts (Ex. xxxv. 30-35). According to the narrative in Exodus, he was definitely called and endowed to direct the construction of the tent of meeting and its sacred furniture, and also to prepare the priests' garments and the oil and incense required for the service.

J. JR. C. F. K.

——**In Rabbinical Literature:** The rabbinical tradition relates that when God determined to appoint Bezalel architect of the desert Tabernacle, He asked Moses whether the choice were agreeable to him, and received the reply: "Lord, if he is acceptable to Thee, surely he must be so to me!" At God's command, however, the choice was referred to the people for approval and was indorsed by them. Moses thereupon commanded Bezalel to set about making the Tabernacle, the holy Ark, and the sacred utensils. It is to be noted, however, that Moses mentioned these in somewhat inverted order, putting the Tabernacle last (compare Ex. xxv. 10, xxvi. 1 *et seq.*, with Ex. xxxi. 1-10). Bezalel sagely suggested to him that men usually build the house first and afterward provide the furnishings; but that, inasmuch as Moses had ordered the Tabernacle to be built last, there was probably some mistake and God's command must have run differently. Moses was so pleased with this acuteness that he complimented Bezalel by saying that, true to his name, he must have dwelt "in the very shadow of God" (Hebr., "beẓel El"). Compare also Philo, "Leg. Alleg." iii. 31.

Bezalel possessed such great wisdom that he could combine those letters of the alphabet with which heaven and earth were created; this being the meaning of the statement (Ex. xxxi. 3): "I have filled him . . . with wisdom and knowledge," which were the implements by means of which God created the world, as stated in Prov. iii. 19, 20 (Ber. 55a). By virtue of his profound wisdom, Bezalel succeeded in erecting a sanctuary which seemed a fit abiding-place for God, who is so exalted in time and space (Ex. R. xxxiv. 1; Num. R. xii. 3; Midr. Teh. xci.). The candlestick of the sanctuary was of so complicated a nature that Moses could not comprehend it, although God twice showed him a heavenly model; but when he described it to Bezalel, the latter understood immediately, and made it at once; whereupon Moses expressed his admiration for the quick wisdom of Bezalel, saying again that he must have been "in the shadow of God" (Hebr., "beẓel El") when the heavenly models were shown him (Num. R. xv. 10; compare Ex. R. l. 2; Ber. *l.c.*). Bezalel is said to have been only thirteen years of age when he accomplished his great work (Sanh. 69b); he owed his wisdom to the merits of pious parents; his grandfather being Hur and his grandmother Miriam, he was thus a grand-nephew of Moses (Ex. R. xlviii. 3, 4). Compare ARK IN RABBINICAL LITERATURE.

L. G.

BEZALEL: Palestinian amora of the fourth century, who is known in Midrashic literature only as the author of haggadistic sentences. Two of these have been handed down by Berechiah, the well-known haggadist and transmitter of haggadistic traditions. In Pesiḳ. xxi. 145b (where the name is corrupted, but easily recognizable) Bezalel interprets the peculiar form "kehaḥallonot" (כהחלונות) (Ezek. xl. 25) by saying, "The windows of the Temple were 'kehot' [dull] (כהות); they were opaque, narrow within, and widening toward the exterior, in order to send light forth to the world." The second saying reported by Berechiah in the name of Bezalel is a simile referring to Ex. xxv. 40 (Cant. R. iii. 11; in Pesiḳ. i. 4b, and in other parallel passages the name is miswritten or has dropped out). A third sentence contains an allegoric explanation of Hosea ii. 7 [A. V. 5]. "Her 'mother' is the Torah, which, like a harlot, becomes an object of contempt among the ignorant, when those who are engaged in its study make the Law contemptible by their conduct." Bezalel gave this explanation in answer to a question which the above-mentioned Berechiah asked him (Ruth R. i. 1 [parashah 1], where the name of Berechiah has been omitted by mistake).

BEZALEL B. JUDAH HA-LEVI OF ZOLKIEV: Polish Talmudist of the second half of the eighteenth century. He wrote a commentary to the sayings of the fathers (Frankfort-on-the-Oder, 1781), entitled "Bezalel."

BIBLIOGRAPHY: Zedner, *Cat. Hebr. Books British Museum*, p. 95; Benjacob, *Oẓar ha-Sefarim*, p. 88.

L. G. I. BER.

BEZALEL B. MOSES HA-KOHEN: Talmudist; born at Wilna, Russia, Jan. 14, 1820, where he died April 13, 1878. He was a competent Talmudist at the age of eighteen, and felt himself qualified to criticize the "Mishkenot Ya'akob" of Jacob b. Aaron of Karlin, one of the chief Talmudists of the time, in a letter addressed to him. In 1840 Bezalel became ecclesiastical assistant in Wilna, and held the position until his death. Although the title was a subordinate one, Bezalel was in reality—at least from 1860 to 1878—the spiritual head of the large community at Wilna. Moreover, he not only cared for this community, but answered religious questions directed to him from far and near. Consequently many of Bezalel's answers to the questions, which were theoretical as well as practical in their bearing, are to be found in the responsa literature of the time. Equally numerous were Bezalel's contributions to the works of others, especially those printed in Wilna. His independent work, longer than the others, is "Reshit Bikkurim" (Firstlings), Wilna, 1869, responsa and treatises on Talmudic topics. The Romm edition of the Talmud contains marginal glosses on many of Bezalel's treatises.

Bezalel differed from his more narrow-minded colleagues in showing an inclination for secular sciences. He had, also, a fine historical and critical feeling for rabbinical literature, and some of his historical and critical notes possess considerable value. His wide reading in modern Talmudic literature is remarkable, even if conditions in Russia be taken into account, religious study there being limited almost entirely to the Talmud. Bezalel's extraordinary modesty and active goodness are still frequently praised.

L. G.

BEZALEL BEN SOLOMON OF KOBRIN: Preacher at Slutzk, government of Minsk, Russia; later at Boskowitz, Moravia; died before 1659. He was the author of the following works: (1) "'Amudeah Shib'ah" (Her Columns Are Seven), containing homilies on the Bible; divided into seven parts, each of which bears the title of a Biblical expression connected with the name of Abraham, Isaac, Jacob, Moses, Aaron, David, or Solomon (Lublin, 1666). This work was published by the order of the Council of the Four Lands and of the Lithuanian Rabbinical Assembly, held at Lublin in 1666. (2) "Ḳorban Shabbat" (Sacrifice of Sabbath), on some ritual laws and religious customs concerning Sabbath; divided into thirty-nine chapters (Dyhernfurth, 1691). (3) "Pelaḥ ha Rimmon" (The Piece of the Pomegranate), containing twenty explanations of the forty-nine which had been written by Bezalel on a difficult Midrashic passage (Amsterdam, 1659). (4) "Ḥabaẓelet ha-Sharon" (Rose of Sharon), commentary on Psalm cxix., mentioned in the introduction to the preceding work. (5) "Zayit Ra'anan" (Green Olive-Tree), homilies on the Pentateuch. (6) "'Emeḳ ha-Baka" (Vale of Tears), commentary on Lamentations. The last two works are still extant in manuscript.

BEZEK: **1.** The scene of battle between the tribes of Judah and Simeon, and the Canaanites and Perizzites (Judges i. 4–6). **2.** Place where Saul collected his forces for the fight against the Ammonites (I Sam. xi. 8). Identified with the modern Khirbet Ibzig, 14 miles southwest of Beisan (Moore, commentary to Judges i. 5).

J. JR. G. B. L.

BEZER: A city of refuge in the territory of Reuben (Deut. iv. 43; Josh. xx. 8). It was also one of the cities allotted the Levites by the tribe of Reuben (Josh. xxi. 36, Septuagint; I Chron. vi. 63 [A. V. 78]). In the Mesha inscription it is a Moabite city, probably the same as the Bozrah of Moab mentioned in Jer. xlviii. 24. Bezer has not yet been identified with any of the cities whose ruins are found in the plateau of Moab. It must be distinguished from BOSOR or BOSORA.

J. JR. F. BU.

BEZETHA: According to Josephus, the name of a hill north of the Temple-mound, and separated from the latter by a valley. After the erection of the third wall it became part of the city of Jerusalem. Josephus ("B. J." ii. 15, § 5; ii. 19, § 4; v. 4, § 2; v. 5, § 8) gives the meaning of the name as "New City," according to which "Bezetha" is a strange transcription of בית חדתא. A more correct rendering is "house of olives" (בית זיתא) It is not certain whether this place is identical with "Bezeth" in I Macc. vii. 19, where Bacchides pitched his tents after leaving Jerusalem. In "Ant." xii. 10, § 2 it is called Βησζήθω (variant reading, Βηθζήθω), and is referred to as a village.

J. JR. F. BU.

BÉZIERS (formerly **Bediers, Beders, Besers,** and **Bezares**; Hebr., בדרוש, בדריש, בדירש, בירדש, בשיש, בישיש, בידאיש, דברש, ברוש, ברודש): Town of France in the department of Hérault. The date of the settlement of the Jews in Béziers is lost in antiquity. Two letters of Sidonius Apolonarius and the canons of the council held at Agde in 506 establish the existence at that time of numerous and prosperous Jewish communities in the province of Languedoc (Vaissète, i. 243; Sidonius Apolonarius, iii., epistle 4; iv., epistle 5). The Jews of Béziers did not escape the fate of the other Jewish communities in this province, which had to endure the most violent persecutions during the reign of the Visigoths. After

Earliest Mention.

the defeat of the Saracens by Charles Martel in 732, the condition of the Jews of Béziers, as that of those of other towns, became more favorable; and this state lasted during the reign of the Carlovingians. In the eleventh century the Jews of Béziers were affected by the persecutions that broke out in western France.

Albigenses.

But the Jews of Béziers were fortunate in comparison with those of other towns. The viscounts cherished the most kindly feelings for them, and the greater part of the Christian inhabitants, being Albigenses, lived on friendly terms with their Jewish fellow-citizens. Even the restrictions gradually disappeared and were transformed into taxes imposed for the benefit of the princes or of the bishops, which they had to pay in addition to the poll-tax common to all the inhabitants. Thus, through the intervention of the viscount Raymond Trencaval, the bishop Guillaume abolished, in 1160, the custom of throwing stones at the Jews during Holy Week, and substituted a yearly payment of two hundred melgorian sous and a yearly tax of four livres of the same coinage. The good-will of the viscounts of Béziers displayed itself far beyond mere toleration; they even entrusted the Jews with important public offices. The Jews, on their side, were attached by bonds of gratitude to the viscounts and did not participate in the plot which, in 1167, brought about the assassination of Raymond Trencaval. They were therefore excluded from the massacre of the inhabitants that Roger II., with the help of his Aragonian allies, perpetrated in order to avenge this crime.

Roger II. gave the Jews numerous tokens of his confidence and favor. He took the notables among them under his personal protection. Thus in 1172 he interceded in behalf of the Talmudist Abraham ben David (RABaD), and, having taken him from the prison into which the lord of Posquières had thrown him, granted him shelter in Carcassonne. The functions of bailiff, under his government, were often entrusted to Jews. A Jew called Nathan figures with the title of bailiff as a witness to a deed of Roger II. Raymond Roger, the successor of Roger II., followed the example given by his father and assigned for his Jewish bailiffs a distinguished rank among the barons of his court. A Jew of Béziers, called Samuel, figures, together with the barons, on a deed by which Raymond Roger granted the bishop many rights.

In the Thirteenth Century.

The prospects of the Jews of Béziers darkened in the thirteenth century. In the bloody crusade that the pope undertook against the Albigenses, the Jews had their share of suffering. The ambitious Count Simon de Montfort marched against Raymond Roger, who was doubly hated by the pope for his secret friendship with the Albigenses and his protection of the Jews. On July 22, 1209, Béziers was stormed and the inhabitants massacred. Two hundred Jews lost their lives in this massacre, and a large number were driven into captivity. In consequence of the victory over Raymond Roger, the Church acquired a supremacy which it often used to molest the Jews. The council of Avignon (1209) and the Lateran council (1215) had prescribed various restrictions upon the Jews; and the council held at Béziers in 1246 prohibited them from practising medicine. But these restrictive measures were not always carried out, and the Jews of Béziers could evade them more easily than those of other towns, since the Christian inhabitants of Béziers were more accustomed to tolerance; but as that evasion required heavy pecuniary sacrifices, this formerly flourishing community became gradually impoverished, and Philip le Bel in banishing them, Sept., 1366, in order to get hold of their property, must have been disappointed.

Jewish Scholars.

Béziers was a focus of Jewish learning. Abraham ibn Ezra visited it, and about 1155 wrote there his work, "Sefer ha-Shem" (Book of the Name), in which he mentions the names of the scholars Abraham ben Ḥayyim and Isaac ben Judah, to the latter of whom he gives the title "Prince." Benjamin of Tudela, who visited Béziers in 1165, praises the scholars Solomon Ḥalafta and Joseph Nathan. The Talmudist Meshullam ben Moses, the author of "Sefer ha-Hashlamah" (Book of Completeness), lived in Béziers in the first half of the thirteenth century. In a responsum drawn up at Béziers, Solomon ben Asher and Joseph ben Gerton are mentioned as colleagues of Meshullam. Solomon ben Joseph ibn Ayub settled at Béziers at the request of several notables of the town, and translated from Arabic into Hebrew many philosophical works. The cabalist Jacob Cohen of Segovia stayed at Béziers at the end of the thirteenth century. Poetry was represented there in the persons of Abraham ben BEDERSI, who derived his name from the town, his son Jedaiah, Don Astruc Eleazar Azobi, and Meshullam Azobi.

BHORUPKAR, SAMUEL BAPUJI: Beni-Israel soldier; born near Bombay, India, about 1790. He entered the Fourth Bombay Regiment on Feb. 2, 1811. In 1813 he served with the Poona Brigade under Colonel Cooke, and in 1814 was engaged in Katyawar and on the banks of the Runn against the Waghurs; in 1815 in Guzerat, at Bhuj, in Katyawar and Ookamundul; was present at the capture of the forts of Anjor, Kunkote, Dhingkee, and Joonkee; in 1816 was at Jamnuggur and Dwarka, and at the taking of Deesa, Palampur, Veerumpur, and Kurrunjah; in 1817–18 served in the whole of the campaign in Malwa in pursuit of Holkar, and in 1819 was at the capture of the forts of Newtee and Raree in the southern Konkan. From 1821 to 1827 he was employed on various field services in Guzerat, at the taking of the fort Limbuj, and at Dongerpur, and subsequently in the southern Konkan on several occasions.

Bhorupkar was promoted to the rank of a jemidar Jan. 9, 1828, and to that of subedar on Dec. 28, 1833; was appointed subedar-major on Jan. 1, 1839; was admitted to the Second-Class Order of British India, with the title of bahadur, on March 24, 1841; and retired from service Feb. 3, 1847.

J. J. HY.

BIACH, ALOIS: Austrian physician and medical writer; born in Lettowitz, Moravia, Austria, May 1, 1849. He was educated at the gymnasium at Brünn and at the University of Vienna. After graduating as M.D. in 1873, he established himself in Vienna, where he was appointed a member of the board of health. In 1883 he became privat-docent of medicine (*Innere Medicin*) at the university in that city. Biach has occupied the position of secretary to the society of physicians of Lower Austria.

In addition to his work on "Die Neueren Antipyretica," Vienna, 1889, he is the author of many essays, of which the following may be mentioned: "Ueber Aneurysmen an den Herzklappen," in "Jahrbücher der Gesellschaft der Aerzte in Wien," 1878; "Ueber Jaborandi und Seine Alkaloide," in "Mittheilungen des Vereins der Aerzte in Niederösterreich," 1879; "Versuche über die Physiologische Wirkung des Chinolins," in Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin," 1881; "Cirrhosis Hepatis mit Wandständiger Thrombose der Vena Portæ und Vena Meseraica Superior," in "Mittheilungen des Vereins der Aerzte in Niederösterreich," 1884; "Entwicklung von Krebs des Magens auf der Basis eines Runden Magengeschwürs," in "Wiener Medizinische Presse," 1890.

s. F. T. H.

BIAL, RUDOLF: Violinist, conductor, composer, and manager; born at Habelschwerdt, Silesia, Aug. 26, 1834; died at New York Nov. 13, 1881. He began his career as a violinist in an orchestra at Breslau, and then made a tour of Australia and Africa with his brother Karl, a pianist of distinction. On his return to Germany, Bial settled in Berlin, where he successively became orchestral director at Kroll's Theater; the Wallner Theater (1864), where many of his operettas, etc., were given; of Kroll's Opera House, where, for several years, the most distinguished artists of Europe sang under his management. Later, Bial was a concert agent in New York.

Bial was a prolific composer of operettas, farces, orchestral pieces, and dances; and several of his compositions enjoyed considerable popularity.

BIALA. See Russia.

BIALEH, ẒEBI HIRSCH BEN NAPHTALI HERZ (called Ḥarif, "the keen"): Rabbi and Talmudist; born about 1670 at Lemberg, Galicia; died Sept. 25, 1748, at Halberstadt, Prussia. He conducted a Talmudic high school in his native city until 1718, when he received a call as chief rabbi to the rich community at Halberstadt. His humanity, gentleness, and unselfishness won him the love and admiration of the people as well as of his colleagues; and he became known as a Talmudic authority throughout Germany. Bialeh was particularly fond of teaching, and when he left Lemberg to go to Halberstadt eighteen of his pupils went with him. His attitude toward them was that of a brother; and he possessed a certain tolerance for the secular sciences, the study of which was then beginning to make headway among the young Jews of Germany. Among his numerous pupils were Elhanan Ashkenazi, Isaiah Berlin, and Meïr Barbi.

Bialeh was restrained by modesty from publishing any works; but he left several manuscripts, which are in the possession of some private persons in Halberstadt; and some of his approbations appeared in the works of his pupils and colleagues. Both in his writings and orally he denounced the prevalent exaggeration of the pilpulistic method; as, for instance, in his approbation to Jehiel Michael's "Nezer ha-Ḳodesh." In general he seems to have followed the logical method, and to have preferred the simple interpretation of the Talmud (see his responsum in Samuel ben Elkanah's "Meḳom Shemuel," No. 5).

His sons were: **Solomon Dob Berush**, rabbi at Glogau; **Naphtali Herz**, rabbi at Dubno; **Abraham**, rabbi at Rawitsch; **Samuel**, assistant rabbi at Halberstadt; and **Simḥah**, rabbi at Dessau.

BIALLOBLOTZKY, CHRISTIAN HERMANN FRIEDRICH: Jewish convert to Christianity; born April 9, 1799, at Pattensen, near Hanover; died March 28, 1868, at Ahlden-on the-Aller. Bialloblotzky studied Christian theology and philosophy, and received the degree of D.D. at the University of Göttingen in 1824, the subject of his thesis being "De Legis Mosaicæ Abrogatione." He wrote several works on Christian theology, and published the following on Jewish subjects: (1) "The Chronicles of R. Joseph ben Joshua Meïr, the Sephardi," a translation of Joseph ha-Kohen's "Dibre Hayamim," published by the Oriental Translation Fund, in two volumes, London, 1834-36; (2) "Oẓar ha-Shorashim, Lexicon Radicum Hebraicarum," in Hebrew and Latin, London, 1843; (3) "Sefer ha-Shorashim," a lexicon of the Hebrew roots, in Hebrew and English, *ib.*

BIALYSTOK, LITHUANIA. See Byelostok.

BIBAGO, ABRAHAM BEN SHEM-ṬOB (**Bibaz** and **Bibas-Vivas** are corruptions of the name): Spanish religious philosopher and preacher; born at Saragossa; resided in 1446 at Huesca, and was still living in 1489. At the court of John II. of Aragon, he was, as he himself relates, engaged in controversy when only a young man with "a renowned Christian sage" on the dogma of the Trinity. Like Joseph ben Shem-Ṭob, his older countryman, he was familiar not merely with the entire Arabo-Judean philosophy, but also with Christian theology as presented in Latin. He studied the latter so as to be able to defend the Jewish faith in a scholarly manner. Bibago was not "a mere preacher who wrote philosophical homilies," as Grätz says ("Gesch. der Juden," viii. 227), nor "an opponent of philosophy," as Renan represents him to be in his "Averroès et l'Averroïsme" (3d ed., p. 198), but a rational believer censuring in unsparing language those zealots that "cling only to the shell but reject the kernel, and pose as pious while vilifying a thinker such as Maimonides."

His Defense of Judaism.

The writings of Bibago include: (1) "Derek Emunah" (The Path of Faith), his chief work, written toward the close of his life, and printed in 1521 at Constantinople. Like all his writings, it has, according to Steinschneider, not received the full recognition it deserves. It is, as the title suggests, a presentation and, at the same time, a defense of the Jewish religion as leading man to the highest knowledge of God and to eternal happiness. It is divided into three treatises, which are subdivided into divisions or parts (called "gates") and chapters. The first treatise deals with: (gate 1) the doings of God; (gate 2) His knowledge; and (gate 3) His providence. The second treatise deals with: (gate 1) the intellect; (gate 2) its nature and object; (gate 3) man's highest object; (gate 4) the blending of faith and knowledge—which topic is but slightly touched; (gate 5) the problem of matter and sin; (gate 6) the question whether Moses sinned; and (gate 7) the true faith. The third treatise deals with: (gate 1) the fundamentals of faith; (gate 2) miracles; (gate 3) creation of the world; (gate 4) ethics; and (gate 5) the special articles of faith. In the fifth part he warmly defends the creed of Maimonides against his antagonists; and his arguments were subsequently literally reproduced by Abravanel in his "Rosh Amanah." In this work, in which many Biblical and rabbinical passages are explained, he takes cognizance of Christian and Mohammedan theology. He quotes Greek philosophers like Plato, Aristotle, and Pythagoras; also Euclid and Ptolemeus, Galen and Themistius, as well as Arabic thinkers like Averroes, Avicenna, Alfarabi, and Gazzali, and even the fable-book "Kalila we-Dimna." Of Christian writers he quotes Eusebius; and of Jewish writers often not only Maimonides, Naḥmanides, and other philosophers, but also cabalistic works like the "Bahir," the "Zohar," "Sefer Yeẓirah," and the "Hekalot." He indorses a saying of a sage that "Reason and Religion are the world's two luminaries"; and he strongly opposes prayers "addressed to angels or to the departed, a practise customary among the Christians."

Isaac Arama, Bibago's contemporary, used the book freely. Joseph Solomon del Medigo, the well-known physician and writer, speaks with warm praise of the work, though he complains that the Cabala had crept into it. But the fact must be taken into consideration that, as Steinschneider says, "the cabalists at the close of the thirteenth century had made philosophy the handmaid of the Cabala, and this caused the philosophers on their part to take into consideration the writings and the ideas of the Cabala that had grown into prominence." It is true that Jacob ibn Ḥabib, in his "'En Ya'aḳob" at the close of Berakot, censures Bibago for putting constructions upon the Biblical texts that they could not bear; nevertheless he praises "the beauty of these interpretations, which insinuate themselves into our hearts."

Other Works.

(2) "Eẓ Ḥayyim" (Tree of Life) deals with creation, and has for its object the refutation of the arguments advanced by Aristotle, Averroes, and others in favor of the eternity of the world. The author quotes this treatise three times in the "Derek Emunah" and gives a fair insight into it. (3) A homily on Gen. v. 29, "Zeh Yenaḥamenu," published at Salonica in 1522, treats also of creation and the Sabbath; but is not, as is stated by Michael ("Or ha-Ḥayyim"), part of "Eẓ Ḥayyim" (see Steinschneider, "Monatsschrift," 1883, p. 95). (4) From quotations in the "Derek Emunah" it appears that Bibago wrote a work under the title of "Maḥazeh Shaddai," treating of the belief in resurrection. (5) A work on sacrifice as means of communion with God. (6) A refutation of the objections raised by Naḥmanides against Maimonides. (7) "Ma'amar 'al Ribbui ha-Ẓurot," a treatise on "The Plurality of Forms, Particularly in Man"—Paris manuscript 1004, though without his name. (8) Two philosophical letters to Moses Arondi. (9) A compendium of therapeutics after Galen; besides a number of philosophical works in the form of commentaries to Averroes. (10) A commentary on Averroes' work on logic, "Demonstration" (מופת), written at Huesca in 1446, exists in manuscript, Vatican and Paris. In this work Bibago defends Averroes against Levi ben Gerson. (11) A commentary on Averroes' "Physics," referred to in (12) a commentary on Averroes' "Metaphysics"—still extant in manuscript at Munich. In the introduction he deplores the lack of philosophical research among his coreligionists, who are unable to defend their faith against Christian scholars that study philosophy and science in their schools; and in view of this deficiency he undertook the explanation of Aristotelian metaphysics, however much opposed it was to the pure and sacred ancestral faith. This work shows familiarity not only with all Arabic philosophers, but also with Boethius, with the works of Duns Scotus and Occam, known to him probably through the translation of Elijah Habillo, and with Nicholas Bonettus, a Spanish monk who lived in 1486. Without originality of thought, Bibago nevertheless represents, says Steinschneider, "that class of learned and productive writers which Spanish Judaism produced at the close of a brilliant epoch."

Encourages Philosophical Study.

K. S. B.—K.

BIBEL'SCHE ORIENT, DER: A magazine of which only two numbers appeared (Munich, 1821), these being supposed to be edited by Isaac Bernays. Its object, as stated in the first announcement, April 24 (the second bears date of Aug. 12, 1812 [1821]), was "to exhibit the spirit of the sacred books in all their purity and clearness, but without any learned verbosity, and to determine the rank of these fiery utterances from olden times as well-defined expressions of the human soul, aside from their strongly marked peculiarities and their value as important historical documents."

"Der Bibel'sche Orient," whose style is dark, mystical, and confused to a degree, carries mythology into the Scriptures: it betrays the influence of Schelling's quaint philosophy. While regarding the Bible and the development of the Jews from a world-historical point of view, its editor comes to the conclusion that all religions can manifest themselves only by exerting reformatory influences. Though looking with contempt upon Mendelssohn and his disciples, the author was even more in favor of the Reform movement than were the latter.

"Der Bibel'sche Orient" attracted considerable attention upon its first appearance, but was soon forgotten.

BIBIKOV, DMITRI GAVRILOVICH: Russian soldier, administrator, and statesman; born 1792; died 1870. In 1837 Bibikov was appointed military governor of Kiev, and governor-general of Volhynia and Podolia. During the fifteen years of his administration of the southwestern provinces, he more than once resorted to harsh measures with regard to the Jews who were directly or indirectly involved in the Polish agitation, for the suppression of which he was responsible. Hence his marked animosity, especially toward the Jews of Berdychev, which city was at that time one of the centers of Polish revolutionary intrigues, and in which a secret branch of the Polish national bank was established. While attacking abuses, Bibikov nevertheless manifested on many occasions a spirit of consideration for the educated Jews. It was due to his remonstrations with the government of Nicholas I. that several severe restrictive laws were relaxed in behalf of the Jews. Such were the measures allowing Jewish residents of the government of Kiev to visit that city for business purposes; that annulling the order of the Jitomir authorities which prohibited the Jewish blacksmiths in Jitomir from following their trade; that permitting the Jews of Starokonstantinov, Zaslav, Ostrog, and Kovno to obtain passports and gild certificates from the local district treasuries instead of procuring them from Novogradvolynsk; that granting to Jewish merchants of the first gild the right to farm inns in crown dominions of the western provinces; and that permitting the Jews to elect from their own number city brokers and notaries public in places where the population consisted of both Jews and Christians.

In 1852 Bibikov was made minister of the interior, which post he filled until 1855. It seems that in this capacity he became more than ever imbued with the prevailing anti-Jewish spirit of Nicholas' régime. In one case, at least, his name is mentioned in connection with a measure prohibiting the Jews from living in certain parts of Jitomir, the restriction being promulgated in compliance with Bibikov's proposition. His brother, Ilia Gavrilovich Bibikov, governor-general of Wilna, was favorably disposed toward the Jews, and was interested particularly in their educational affairs. The Hebrew poet Abraham Baer LEBENSOHN composed a poem, "kol Ne'urim," commemorating his visit to the Wilna Talmud Torah, which was published in his "Shire Sefat Ḳodesh," ii. 85, Wilna, 1869.

H. R. B. B.

BIBLE CANON: § 1. The Greek word *κανών*, meaning primarily a straight rod, and derivatively a norm or law, was first applied by the church fathers (not earlier than 360) to the collection of Holy Scriptures, and primarily to those of the so-called Old Testament (Credner, "Zur Gesch. des Canons," pp. 58–68). But although the older Jewish literature has no such designation for the Biblical books, and it is doubtful whether the word was ever included in the rabbinical vocabulary, it is quite certain that the idea expressed by the designation "canonical writings" (*γραφαὶ κανονικαί*), both as including and as excluding certain books, is of Jewish origin. The designation "Apocrypha" affords a parallel instance: the word is Greek; the conception is Jewish (compare the words "Genuzim," "Genizah").

Meaning and Scope.

Origin of Idea.

The idea of canonicity can only have been suggested at a period when the national literature had progressed far enough to possess a large number of works from which a selection might be made. And the need for such selection was all the more urgent, since the Jewish mind occupied itself in producing exclusively writings of religious import, in which category, however, were also included various historical and didactic works. Which writings were included in the recognized collection, and in what manner such collection was made, are questions belonging to the history of the canon, and are discussed in this article: the origin and composition of the separate books come under the history of Biblical literature.

Designations.

§ 2. The oldest and most frequent designation for the whole collection of Biblical writings is ספרים, "Books." This word, which in Dan. ix. 2 means all the sacred writings, occurs frequently in the Mishnah, as well as in traditional literature, without closer definition. The expression ספרי הקדש ("Holy Books") belongs to later authors. It is employed first by the medieval exegetes; for instance, Ibn Ezra, introduction to "Yesod Morah" and "M'ozne Lashon ha-Ḳodesh"; see also Neubauer, "Book of Tobit," 43b, Oxford, 1878; Grätz, "Gesch. der Juden," 3d ed., vii. 384; Margoliouth, "Cat. Hebr. and Samaritan MSS. Brit Mus.," Nos. 181, 193; and elsewhere infrequently, but never in Talmud or Midrash. This fact goes to show that the ancients regarded the whole mass of the national religious writings as equally holy. The Greek translation of the term is *τὰ βιβλία*, which (as may be seen from the expressions *καὶ τὰ λοιπὰ τῶν βιβλίων* and *καὶ τῶν ἄλλων πατρίων βιβλίων*) is used by the grandson of Sirach in the introduction to Ecclesiasticus (Sirach) to designate the whole of the Scriptures.

“Outside” Books.

The canonical books, therefore, needed no special designation, since originally all were holy. A new term had to be coined for the new idea of non-holy books. The latter were accordingly called ספרים חיצונים (“outside” or “extraneous books”); that is, books not included in the established collection (Mishnah Sanh. x. 1)—a distinction analogous to that afterward made, with reference to the oral law itself, between “Mishnah” and “Outside-Mishnah” (משנה and משנה חיצונה, or its Aramaic equivalent ברייתא, “Baraita”). Possibly this designation was due to the fact that the Apocrypha, which in popular estimation ranked nevertheless with religious works, were not included in the libraries of the Temple and synagogues (for illustration of this see Books, and Blau, “Zur Einleitung in die Heilige Schrift,” i. *et seq.*). Another designation, מקרא (“that which is read”), applied to the whole of Scripture, is founded upon the custom of reading the Holy Scriptures to the people on Sabbaths and holidays: it is a term frequently opposed to משנה and מדרש, which designate oral teaching (Ned. iv. 3; Ḳid. i., end; Abot v., end). A third designation is כתבי הקדש (“Holy Scriptures,” Shab. xvi. 1; B. B. i., end, and elsewhere), the Greek equivalents of which are *γραφαὶ ἅγιαι* (Rom. i. 2) and *ἱερὰ γράμματα* (II Tim. iii. 15). This term indicates, not the writings belonging to the sanctuary, nor of Israel (Geiger, “Nachgelassene Schriften,” iv. 12), but holy writings in contradistinction to profane works (כתבי הקדש and כתבי הדיוט, Tosef., Yom-Ṭob, iv.; ed. Zuckermandel, p. 207, 12), perhaps works inspired by the Holy Spirit. This interpretation is also favored by the expression *πᾶσα γραφὴ θεόπνευστος* (II Tim. iii. 16; compare Eusebius, “Eclogæ Propheticæ,” ed. Gaisford, p. 106).

“Torah.”

A fourth designation for the entire Bible is תורה (“Law”) (Mek., Beshallaḥ, 9; ed. Friedmann, pp. 34b, 40b; Pesiḳ. R., ed. Friedmann, 9a, and elsewhere), also found in the New Testament under the form *νόμος* (John x. 34; II Esdras xix. 21). This designation owes its origin to the opinion that the entire Holy Writ is the Word of God, and that the Prophets and the Hagiographa are included in the Torah (see below). It is also possible that, since “Torah” was the title of the first and principal part of the Biblical writings, it was transferred to the entire collection.

The fifth designation, כתוב (literally, “it is written”), frequently found personified (as, for instance, הכתוב אומר, etc.) (“the ‘Katub’ saith”; compare Bacher, “Aelteste Terminologie der Jüdischen Schriftauslegung,” p. 90), is, strictly speaking, an abbreviation, and should be supplemented with the name of the book in which “it is written.” The Greek equivalent is *γραφή*; *πᾶσα γραφὴ* (II Tim. iii. 16), a translation of כל הכתוב, which, strange to say, is found in the works of Profiat Duran, though certainly it is very old. The sixth designation is *διαθήκη* (“covenant”), from which the term *παλαία διαθήκη* (*Vetus Testamentum* = Old Testament) in the Christian Church has been derived. Even in Ecclus. (Sirach) xxiv. 23 the Pentateuch is called *βίβλος διαθήκης*, and the term ספר הברית (“Book of the Covenant,” Ex. xxiv. 7; II Kings xxiii. 2, 21) is similarly translated in the Septuagint. Though “diathēkē,” like “Torah,” came to be applied to Holy Writ (first by Paul, II Cor. iii. 14; compare Matt. xxvi. 28), the expression ספר הברית (“Book of the Covenant”) is never found with this significance in Jewish tradition, except in an apparently polemic utterance of Simon ben Yoḥai (about 150), where a reference to the name “diathēkē” for the Torah occurs (Yer. Sanh. 20c; Lev. R. xix.). In all probability this designation, which, like the term “Old Testament,” involves a Christian point of view, was used very rarely. In post-Talmudic times other designations were employed; *e.g.*, עשרים וארבעה ספרים (“The Twenty-four Books”) (see G. Margoliouth, “Cat. Hebr. and Samaritan MSS. Brit. Mus.” i. 22b, 25a, 27a, 35a); מחזור (“the cycle,” in the Masorah; in a codex of the year 1309; and in Ginsburg, “Introduction,” p. 564); מקדשיה מקדשיא (Ginsburg, *l.c.* p. 748). Medieval authors called the Holy Writ also פסוק, which originally meant “verse” (Bacher, “Rev. Etudes Juives,” xvi. 278). Another very common designation is ת׳נ׳ך, the initials of תורה נביאים כתובים (“Law, Prophets, and Holy Writings”), an expression frequently occurring in Talmud and Midrash. A similar acrostic name is א׳נ׳ך, an abbreviation of the words אורייתא נביאים כת׳. In the Middle Ages these mnemonic terms were conveniently regarded as real words, and received translations; namely, “ear-tips” and “plumb-line” respectively.

Testament.

Other Expressions.

In the Mishnah (compare Yad. iii. 5) the canonicity of the Holy Books is expressed indirectly by the doctrine that those writings which are canonical “render the hands unclean.” The term connoting this quality, מטמאין את הידים, thus comes very near to the technical equivalent for the word “canonical.” The nature of the underlying conceit is not altogether clear. It is most likely that it was meant to insure greater caution against the profanation of holy scrolls by careless handling or irreverent uses (Yad. iv. 6; Zab. v. 12; Shab. 13a, 14a). It is an open question whether this capacity to render “the hands unclean” inhered in the scroll kept in the Temple. It appears that originally the scroll in the Temple rendered food unclean; while only outside the Temple were hands made unclean (Kelim xv. 6; R. Aḳiba, Pes. 19a). At all events, the term מטמא את הידים was extended to all the writings included in the canon, and designated ultimately their canonical character or its effects as distinguished from non-canonical books (Yad. iii. 2-51; iv. 5, 6; Tosef., Yad. ii. 19; Blau, *l.c.* pp. 21, 69 *et seq.*; Friedmann, “Ha-Goren,” ii. 168, but incorrect).

§ 3. The Jewish canon comprises twenty-four books, the five of the Pentateuch, eight books of the Prophets (Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel, the Minor Prophets), and eleven Hagiographa (Psalms, Proverbs, Job, Song of Solomon, Ruth, Lamentations, Ecclesiastes, Esther,

Contents and Divisions.

Daniel, Ezra, and Chronicles). Samuel and Kings form but a single book each, as is seen in Aquila's Greek translation. The "twelve" prophets were known to Ecclus. (Sirach) as one book (xlix. 10), and the separation of Ezra from Nehemiah is not indicated in either the Talmud or the Masorah. A Bible codex written in Spain in 1448 divides Samuel, Kings, and Ezra into two books each (Ginsburg, *l.c.* p. 586). These books are classified and arranged into three subdivisions, "Torah," "Prophets," and "Hagiographa"; Greek, *νόμος καὶ προφῆται καὶ ἄλλα βιβλία* (Ecclus. [Sirach]). In Yalḳ. ii. 702 they are styled as abstracts, "Law, Prophecy, and Wisdom," תורה נבואה חכמה; compare Yer. Mak. 31d, below, and Blau, *l.c.* p. 21, note. The division of the Prophets into נביאים ראשונים ("Earlier Prophets") and נביאים אחרונים ("Later Prophets) was introduced by the Masorah. By the former expression the Talmud understands the older Prophets, such as Isaiah, as distinguished from the later Prophets, Haggai, Zechariah, and Malachi (see Sifre, Deut. ii. 27, 357; Yer. Ber. 8d, 23, etc.). In contradistinction to the last three, Samuel, David, and Solomon are sometimes called the old Prophets (Soṭah 48b, top). The entire Holy Writ is also designated by the term "Torah and Prophets" (R. H. iv. 6; compare Meg. iv. 5; Tosef., B. B. viii. 14; Sifre, Deut. ii. 218), and the same usage is found in the New Testament (Matt. v. 17, vii. 12, xxii. 40; Luke xvi. 16, 29, 31). The abstract terms "Law and Prophecy" are found once in Pesiḳ., ed. Buber, 111a.

Earlier and Later Prophets.

Another division is that into "Torah and Ḳabbalah" found in Ta'an. ii. 1; Tosef., Niddah, iv. 10; Sifre, Num. i. 112, 139; "Ḳabbalah" signifying tradition, which is regarded as having been carried on by the Prophets. The Aramaic equivalent for קבלה is אשלמתא, the Masoretic name for the Prophetical Books, and Hebraized into שלום by Ben Asher ("Diḳduḳe ha-Te'amim," p. 2).

Still another division is "Torah" and "Miḳra." In Sifre, Deut. ii. 317 "Miḳra" is used as a general term for the Prophets and the Hagiographa—a usage which may also underlie Gen. R. xvi. (ed. Wilna, 75b) and Cant. R. xvi. 6, below (see, however, Bacher, "Aelteste Terminologie," cxviii. 7). The Midrash on "plena et defectiva" opposes "Torah" to "Miḳra" (Berliner, "Peleṭat Soferim," p. 36), as does also Ben Asher (Blau, "Masor. Untersuchungen," p. 50). The Masorah and Spanish authors use the word in the same sense (Bacher, *l.c.* pp. 118 *et seq.*; also in "Ḥuḳḳe ha-Torah," in Güdemann, "Gesch. der Cultur der Juden in Deutschland," p. 268), and it probably came to have this meaning because it is abbreviated from the expression שאר מקרא, "the remaining Miḳra."

The Hagiographa.

The third division, "the Holy Writings," may have received its name in a similar way. Originally, the whole Bible was called "Holy Writings," but subsequently men perhaps spoke of the "Law and the Prophets," and the "other holy writings," and finally briefly of the "Holy Writings." Similarly, the current name "Ketubim" (Writings) is probably also an abbreviation of the fuller expression, "the other writings," or the "Holy Writings." This etymology is supported by the usage of Sirach's grandson, who calls the Hagiographa *τά λοιπὰ τῶν βιβλίων*, and of Ben Asher a thousand years later, who speaks of "the Law, the Prophets, and the other books" (*l.c.* 44; emended text in Blau, "Zur Einleitung," xxix. 3). This is not the only instance of Asher's fidelity to older traditions. Characteristic evidence of the threefold division may be noted in the following citations:

> "In the New-Year's prayers, ten passages of the Bible (from the Torah, Prophets, and Hagiographa) must be introduced at least three times" (Tosef., R. H. iv. 6). "Ben Azzai connected the words of the Torah with those of the Prophets, and the latter with those of the Hagiographa" (Lev. R. xvi. 3). "This is the progressive method of studying: first, a primer (passages of the Pentateuch) is read; then the Book (ספר, Torah), then the Prophets, and finally the Hagiographa. After completing the study of the entire Bible, one took up the Talmud, Halakah, and Haggadah" (Deut. R. viii. 3). "To be considered conversant with the Bible one had to be able to read accurately the Torah, Prophets, and Hagiographa" (Ḳid. 49a). "Just as the Torah is threefold, so Israel is threefold, consisting of priests, Levites, and Israelites" (Pesiḳ., ed. Buber, 105a). "Blessed be God, who gave the threefold teachings to the threefold nation, by three persons on the third day of the third month" (Shab. 88*a*). In answer to the question of the Sadducee, concerning the Biblical basis for the belief that God causes the dead to rise, the patriarch Gamaliel sought proof "in Torah, Prophets, and Holy Writings" (Sanh. 90b). This doctrine is written in the Torah, repeated in the Prophets, and a third time in the Hagiographa (Meg. 31a; compare Mak. 10b, 15). Hanina set up the rule that "kesef" (silver) means simply a "selah" in the Torah, a "litra" in the Prophets, and a "talent" in the Holy Writings (Bek. 50a; Yer. Ḳid. 59d; see also M. Ḳ. 21a; Ta'an. 30a; Sanh. 101a).

For passages of similar import from the Jerusalem Talmud and from the Midrash, see Blau, "Zur Einleitung," xxii. 5, xxiii. 1.

Number of Books.

§ 4. Tannaite literature makes no mention anywhere of the number of the Biblical books, and it does not seem to have been usual to pay attention to their number. This was felt to be of importance only when the Holy Writings were to be distinguished from others, or when their entire range was to be explained to non-Jews. The earliest two estimates (about 100 C.E.) differ. II Esdras xiv. 44-46 gives the number as 24; all variant readings of the passage (94, 204, 84, 974 books) agree in the unit figure, 4.

Epiphanius' division of the number 94 into 72 + 22 ("De Ponderibus et Mensuris Liber," in Lagarde, "Symmicta," ii. 163) is artificial. Josephus expressly puts the number at 22, as does Origen (Eusebius, "Hist. Eccl." ii. 25); while Jerome (Preface to Samuel and Kings) mentions 22, but nevertheless counts 24. Since both of these church fathers studied under Jewish teachers, it is probable that some authorities within the synagogue favored counting 22 books; and the hesitation between 22 and 24 can be explained by a Baraita (B. B. 13b), according to which each book of the latter two divisions (Prophets and Hagiographa) had to be written separately as *one* roll. Since Ruth with Judges or with Psalms (Jerome, and Baraita B. B. 14b) might form one roll, and Lamentations with Jeremiah another, the rolls would be counted as 22, while the books were actually 24. That there were 24 books will be apparent from the classical Baraita on the question (see § 5 of this article). But in more than ten passages of the Midrash 24 books are expressly mentioned; and the authorities adduced are exclusively amoraim. Simeon ben Lakish (about 250) compares the books with the 24 ornaments of a bride (Isa. iii. 18-24); saying that just as the bride must be decorated with 24 ornaments, so the scholar must be adorned with the knowledge of all the 24 books (Ex. R. xli. 5; Tan., Ki Tissa, xi., ed. Buber, p. 111; Cant. R. iv. 11). R. Berechiah compares them with the 24 divisions of the priests and Levites and with the 24 nails driven into sandals (Num. R. xiv. 4, xv. 22; Eccl. R. xii. 11; Pesiḳ. R. ix. a, ed. Friedmann); while, according to Phineas ben Jair (beginning of third century), the 24 books (Num. R. xiv. 18) correspond to the 24 sacrificial animals (Num. vii.). The fact that the 24 books of the written Law and the 80 of the oral tradition make up 104 (Num. R. xiii. 16) recalls the number of the books mentioned in II Esdras. Counting the Minor Prophets as 12, the number 35 is obtained (23 + 12), as in Num. R. xviii. 21 and Tan., Ḳoraḥ, ed. Stettin, 552.

For the understanding of the concept of a canon, the following passages, literally rendered, are especially important:

Eccl. xii. 12 teaches: "And further, my son, be admonished by these [understood as reading "against more than these, my son, be cautioned against confusion"; the Hebrew "mehemah" (more than these) being read "mehumah" (confusion)] that he who brings more than twenty-four books into his house brings confusion. Thus, the books of Ben Sira or Ben Tigla may be read, but not to the degree of 'weariness of the flesh'" (Eccl. R. on the passage).

"And further, by these, my son, be admonished," saith God; 'Twenty-four books have I written for you; take heed to add none thereto.' Wherefore? Because of making many books there is no end. He who reads one verse not written in the twenty-four books is as though he had read in the 'outside books'; he will find no salvation there. Behold herein the punishment assigned to him who adds one book to the twenty-four. How do we know that he who reads them wearies himself in vain? Because it says, 'much study is a weariness of the flesh' (Eccl. xii. 12), from which follows, that the body of such a one shall not arise from the dust, as is said in the Mishnah (Sanh. x. 1), 'They who read in the outside books have no share in the future life'" (Num. R. xiv. 4; ed. Wilna, p. 117a; compare also Pesiḳ. R. ix. a and Yer. Sanh. xxviii. a).

The chief difference between these two passages is that in the first only the "weariness of the flesh," that is, the deep study (but not the reading) of other than the Holy Writings, which were learned by heart, is forbidden; while in the second passage the mere reading is also forbidden. The older point of view is undoubtedly the milder, as the history of the book of Ecclus. (Sirach) teaches. The Babylonian teachers represented the more liberal view (compare Sanh. 100a and Yer. Sanh. xxviii. a, 18).

The "Twenty-four" Books.

There is probably an allusion to twenty-four books in Yer. Sanh. xx. d, 4 and Gen. R. lxxx., beginning. The Babylonian Talmud (Ta'an. 8a) mentions 24; Targ. to the Song of Solomon v. 10 does the same. Dosa ben Eliezer, in a very old Masoretic note; Ben Asher ("Diḳduḳe," pp. 5 [line 12], 56); Nissim of Kairwan (Steinschneider "Festschrift," Hebrew section, p. 20, below); and many medieval writers and codices count twenty-four books. The number 24 was also known in ancient times in non-Jewish circles (Strack, in Herzog, "Real-Encyc. für Protestantische Theologie und Kirche," ix.^{3} 757).

Sequence.

§ 5. The classical passage for the sequence of the books is the Baraita in B. B. 14b. With the exclusion of interjected remarks chronicled there, it runs as follows:

"The sequence of the Prophets is Joshua, Judges, Samuel, Kings, Jeremiah, Ezekiel, Isaiah, the 12 [minor] prophets; that of the Hagiographa is Ruth, Psalms, Job, Proverbs, Ecclesiastes, Song of Solomon, Lamentations, Daniel, Esther, Ezra, Chronicles. Who wrote the books? Moses wrote his book, the section of Balaam and Job; Joshua wrote his book, and the last eight verses of the Torah; Samuel wrote his book, Judges, and Ruth; David wrote the Psalms, by the hand of the ten Ancients; namely, through Adam (Psalm cxxxix. 16, perhaps also xcii.), through Melchizedek, Ps. cx.; through Abraham, Ps. lxxxix. (איתן האזרחי explained to = Abraham); through Moses, Ps. xc.-c.; through Heman, Ps. lxxxviii.; through Jeduthun, Ps. lxii.; perhaps lxxvii.; through Asaph, Ps. l., lxxiii.-lxxxiii.; and through the three sons of Korah, Ps. xlii. xlix., lxxviii., lxxxiv., lxxxv., lxxxviii. [The question whether Solomon should be included among the Psalmists is discussed in Tosafot 15a.] Jeremiah wrote his book, the Book of Kings, and Lamentations; King Hezekiah, and his council that survived him, wrote Isaiah, Proverbs, Song of Solomon, and Ecclesiastes; the men of the Great Synagogues wrote Ezekiel, the Twelve Prophets, Daniel, and Esther Ezra wrote his book and the genealogy of Chronicles down to himself."

From the fact that in this account of the authors Moses is mentioned as the author of the Torah, it may be inferred that in the collection from which the Baraita is cited the sequence also of the five books of the Torah was probably given. But it is also possible that the Pentateuch, from its liturgical use in the synagogue, was so familiar as to be regarded almost as a single book, of the separate parts of which no enumeration was necessary.

Prophets.

The most striking sequence in this passage is that of the Prophets, given as Jeremiah, Ezekiel, and Isaiah, a sequence commented on in the Talmud. There it is explained that this is because the Book of Kings ends with destruction, Jeremiah begins and closes with destruction, Ezekiel begins with destruction and ends with consolation, while all of Isaiah consists of consolation. Thus, destruction appropriately follows upon destruction, and consolation upon consolation. The artificiality of this interpretation needs no explanation; but it must be remarked that such sequence is not chronological. The clearest explanation is that of Strack, who claims that the Baraita evidently arranged the prophetical books according to their size, a principle apparently followed also in the arrangement of the Mishnah treatises. According to their length, Jeremiah, Ezekiel, Isaiah, and the twelve Prophets stand to one another in the ratio of 41, 36, 32, and 30. The same principle is apparent in the sequence of the older Hagiographa, where the insertion of Job between the Psalms and Proverbs (the works of father, David, and son, Solomon) is particularly noticeable. Since the Baraita regarded Moses as the author of Job, this book might quite appropriately have been placed at the head of the Hagiographa, as was indeed recommended by the Talmud. Now, according to their lengths, the Psalms (with Ruth), Job, and Proverbs stand to one another in the ratio of 39, 15, and 13; and Job, therefore, follows Psalms. The sequence of the three Solomonic books, wherein the placing of

Ecclesiastes before the Song of Solomon is especially remarkable, illustrates the same principle of arrangement, the largest being placed first.

The author of Ecclesiasticus (Sirach) has the chronological order of the modern Bible: Isaiah, Jeremiah, Ezekiel, and the twelve (Minor) Prophets (see Ecclus. [Sirach] xlviii. 22; xlix. 6, 8). Since the Baraita does not enumerate the books according to the succession of their origin and their age (even within the divisions of Prophets and Hagiographa), it must have considered only the order of Biblical writings so far as they belonged to the same section and were therefore to be written in one roll. Since (as is apparent from B. B. 13) the question which books were permitted to be included in one roll, or whether each book had to be written separately in one roll, was much discussed in the second century, the above-mentioned Baraita, which was also current in Palestine (see Yer. Talmud, Soṭah v., end), may well be assigned to the second century; and there is no justification for considering it of older date. But this much is surely ascertainable from this Baraita, that the first half of the prophetical canon (Joshua-Kings) had a fixed sequence dating from preceding times, and concerning which there was no doubt.

The Earlier Prophets.

That is to say, these four books follow one another and, continuing the story of the Pentateuch, form a consecutive narrative of Jewish history. This is seen from II Macc. ii. 13, where, in mentioning the books "concerning the Kings and Prophets," the prophetical canon is divided into two parts. In post-Talmudic times, also, there is no variation in relation to the sequence of Joshua, Judges, Samuel, and Kings; while the order of the Greater Prophets is irregular, the only uniformity preserved being in placing the Minor Prophets invariably at the end. Most of the manuscripts (including the St. Petersburg codices, which, dating from the years 916 and 1009, are the oldest known), and the oldest five editions, have the generally adopted chronological order, Isaiah, Jeremiah, and Ezekiel; three manuscripts agree with the Talmud, while two have the following peculiar order, Jeremiah, Isaiah, and Ezekiel (Ginsburg, *l.c.* p. 6).

Ginsburg (*l.c.* p. 7) has collected, in the following table, eight varying sequences of the Hagiographa:

VARYING SEQUENCES OF THE HAGIOGRAPHA.

	I.	II.	III.	IV.	V.	VI.	VII.	VIII.

Hagiographa.

A closer examination of the table reveals that actually three arrangements only are given; for Nos. i., ii., iii., and vii. differ only in regard to the position assigned to the Five Rolls, and represent the Talmudic arrangement; the five early editions also follow this sequence, but have the Five Rolls in the order followed in the liturgy, and put the Psalms, instead of Job, after Proverbs; Nos. iv. and v. vary only in regard to Ruth. No. vi., however, is entirely unique, apparently arranging the books according to their size, if Ezra and Nehemiah be considered as two books.

The Five Rolls, however, form a class by themselves, and follow the order, in which they are employed on successive festivals, in the liturgy. Leaving out of account this last-mentioned sequence, two types remain: the Talmudic and the Masoretic. The most striking point of difference is the position assigned to the books of Chronicles, which are placed in the Talmud at the end, but in the Masoretic text at the beginning. The Talmudic sequence is chronological; the Masoretic considers the size of the books.

The Five Rolls.

In regard to the Five Rolls (חמש מגלות; of which Ginsburg [*l.c.* p. 4] gives a table showing five lists of varying order), it should be noted that, in reality, they show only two sequences: one following the chronology of the authors; the other, the liturgical custom of the synagogue ("Jew. Quart. Rev." xii. 223). These variations in the order of the last Prophets and of the Hagiographa—particularly the latter—are significant for the history of the canon; for they show that these writings acquired canonical importance at a later period than the first Prophets and the Law. Owing to the earlier canonization of these latter, their sequence was so firmly established as never to give rise to question.

Collection.

§ 6. The most radical criticism agrees that the Torah is the first and oldest part of the canon. The narrative of Neh. viii.-x., which describes an actual canonization, is of prime importance for the history of the collection of the Holy Writings. It is thus generally agreed that in the middle of the fifth century B.C. the first part of the canon was extant. There is no foundation for the belief that, according to Neh. viii.-x., the Pentateuch was not fully completed until that date. The opinions of the synagogue will be discussed later; here only external testimony concerning the canonization will be considered. Perhaps the last three verses of the Book of Malachi, the last prophet, are to be considered as a kind of canonization. The warning concerning the teachings of Moses, and the unusually solemn words of comfort, make it seem probable that herein is intended a peroration not only to the speeches of the last prophets, but also to the whole twofold canon, the Law and the Prophets. These verses could not have come from Malachi; but they may very probably have been added by another anonymous prophet, or by some appropriate authority, in order to let the words of the Holy Scriptures conclude with a Divine reminder of the Torah, and with a promise of great comfort. Another example of what may be called "canonical ending" for the entire Holy Writ may be seen (N. Krochmal, "Moreh Nebuke ha-Zeman," viii., No. 11) in the last three verses of the Book of Ecclesiastes. This declamation against the makers of books sounds like a canonical closing; and it was really considered such by the oldest Jewish exegetes (see above, § 4). The admonition to keep the Commandments, and the threat of divine punishment, may be compared to the reminder of the Torah and the idea of punishment in Malachi.

Evidences of the Canon.

Evidences of Sirach.

While there are no other evidences in Holy Writ itself of a collection of the Holy Writings, there are some outside of it, which, in part, may now be mentioned in chronological order. The author of the apocryphal book Ecclesiasticus (Sirach) was a contemporary of the high priest Simon—either the first or the second of that name—who lived at the beginning or at the end of the third century B.C. He knew the Law and Prophets in their present form and sequence; for he glorifies (ch. xliv.-xlix.) the great men of antiquity in the order in which they successively follow in Holy Writ. He not only knew the name שנים עשר הנביאים ("The Twelve Prophets"), but cites Malachi iii. 23, and is acquainted with by far the greatest part of the Hagiographa, as is certain from the Hebrew original of his writings recently discovered. He knew the Psalms, which he ascribes to David (Ecclus. [Sirach] xlvii. 8, 9), and the Proverbs: "There were those who found out musical harmonies, and set forth proverbs [A. V., "poetical compositions"] in writing" (xliv. 5). An allusion to Proverbs and probably to the Song of Solomon is contained in his words on King Solomon: "The countries marveled at thee for thy songs, and proverbs, and parables [or "dark sayings"], and interpretations" (xlvii .17); the last three words being taken from Prov. i. 6, while the Song of Solomon is alluded to in "songs." He would have had no authority to speak of "songs" at all from I Kings v. 12; he must have known them. While he had no knowledge of Ecclesiastes, his didactic style proves that he used Job, as is also indicated by the words חכמי שיר בספרתם (xliv. 4, and afterward, ומושלים). Ecclesiastes, Esther, and Daniel are not included in his canon (see Halévy, "Etude sur la Partie du Texte Hébreux de l'Ecclésiastique," pp. 67 *et seq.*, Paris, 1897); he considers Chronicles and Ezra-Nehemiah as Holy Scripture (xlix. 12 = Ezra iii. 2; xlix. 13 = Neh. iii. and vi.; compare Neh. vi. 12); he mentions distinctly "the laws and prophets" (xxxix. 1); in the following sentences there are allusions to other writings; and verse 6 of the same chapter leads to the supposition that in his time only wisdom-writings and prayers were being written.

The grandson of Sirach (132 B.C.), who translated his ancestor's wisdom from Hebrew into Greek, tells in his preface no more about the canon than is apparent from the book itself; but he tells it more clearly. He mentions three times the Torah, Prophets, and "other writings;" he knew no "terminus technicus" for the canon's third part, as one was not coined until two hundred years later. In the original these passages are respectively as follows: *δία τοῦ νόμου καὶ τῶν προφητῶν καὶ τῶν ἄλλων τῶν κατ' αὐτοὺς ἠκολουθηκότων δεδομένων . . . εἶς τε τὴν τοῦ νόμου καὶ τῶν προφητῶν καὶ τῶν ἄλλων πατρίων βιβλίων . . . ὁ νόμος καὶ αἱ προφητεῖ καὶ τὰ λοιπὰ τῶν βιβλίων.*

II Maccabees.

In the Second Book of Maccabees (124 B.C.; Niese, "Kritik der Beiden Makkabäerbücher"), written only a few years later than the Greek Sirach, the following is stated: "The same things also were reported in the records, namely, the memoirs of Neemias; and how he, founding a library, gathered together the books concerning the kings, and the prophets, and those of David, and the epistles of the kings concerning holy gifts. And in like manner also Judas gathered together all those books that had been scattered by reason of the war we had, and they are with us. If now possibly ye have need thereof, send such as will bring them unto you" (II Macc. ii. 13-15). The Torah is not mentioned; its general circulation rendered its "collection" unnecessary. The second part of the canon is unmistakably intended by "books concerning the kings" (Joshua, Judges, Samuel, and Kings) and by "prophets" (Isaiah, Jeremiah, Ezekiel, and the Minor Prophets). Since the Hagiographa had not yet received a definite name, they are mentioned as "those of David" (the Psalms), as the first and most important book—a custom followed in the New Testament even at a time when there was no doubt concerning the existence of collected Hagiographa. The expression, "the books of the kings concerning holy gifts," seems to refer to the royal letters mentioned in Ezra and Nehemiah, and if this be so, then the Hagiographa do find mention; viz., Psalms and Chronicles, their first and last books.

It should also be noted that Nehemiah and not Ezra is named: a circumstance which indicates the age of these statements; since the son of Sirach likewise glorified Nehemiah and made no mention of Ezra, whereas even the oldest rabbinical authorities consider Ezra as a writer far superior to Nehemiah, the aristocrat.

Philo.

Philo, in his extant works, makes no mention of Ezekiel, Daniel, or the Five Rolls. Since, however, even Sirach mentions Ezekiel, Philo's silence about him is undoubtedly accidental; consequently, his failure to name the other books can not be taken as a proof that they were not in his canon. Moreover, the Laws, Prophets, Psalms, and other books are referred to by title in his "De Vita Contemplativa," § 3. It is true, Lucius ("Die Therapeuten," Strasburg, 1880) doubts the genuineness of this work; but Leopold Cohn, an authority on Philo ("Einleitung und Chronologie der Schriften Philo's," p. 37, Leipsic, 1899; "Philologus," vii., suppl. volume, p. 421), maintains that there is no reason to do so. Consequently, Siegfried's opinion ("Philo," p. 61, Jena, 1875) that Philo's canon was essentially the same as that of to-day, is probably correct (H. E. Ryle, "Philo and Holy Scripture," London, 1895).

New Testament.

The New Testament shows that its canon was none other than that which exists to-day. None of the Apocrypha or Pseudepigrapha is ever quoted by name, while Daniel is expressly cited in Matt. xxiv. 15. Matt. xiii. 35 (= Luke xi. 51) proves that Chronicles was the last canonical book. The statement, "That upon you may come all the righteous blood shed upon the earth, from the blood of righteous Abel unto the blood of Zacharias," contains a reference to II Chron. xxiv. 20. The three chief divisions are enumerated in Luke xxiv. 44—"Law," "Prophets," and "Psalms"—as they are in Philo. Usually, however, only the Law and the Prophets are mentioned (Matt. v. 17; Luke xvi. 16); but by them the three divisions are intended just as the Talmudic teachers include the Hagiographa under Prophets (see § 3). This usage is to be attributed, on the one hand, to the lack of a current technical term for the Hagiographa, and on the other to the opinion that the collected books of the Holy Writings were written by the Prophets. In view of these facts, the silence of the writers of the New Testament concerning Canticles, Ecclesiastes, Esther, and Ezra has no bearing on the question whether these writings were or were not included in the canon (see Strack, *l.c.* p. 750).

Josephus (*c.* 38-95) enumerates 22 books, which he divides as follows: 5 books of Moses; 13 histories, containing the history of Israel from Moses' death down to Artaxerxes I., written by the Prophets; and 4 remaining books consisting of hymns and admonitions. "It is true our history hath been written since Artaxerxes very particularly, but hath not been esteemed of the like authority with the former by our forefathers, because there hath not been an exact succession of prophets since that time: and how firmly we have given credit to these books of our own nation is evident by what we do; for during so many ages as have already passed, no one hath been so bold as either to add anything to them, to take anything from them, or to make any change in them" ("Contra Ap." i. 8). It is evident that Josephus, instead of counting Ruth and Lamentations as separate books, combined them with Judges and Jeremiah, respectively. As historical books he considered all that narrated anything historical, and thus included Job. He considered Psalms, Proverbs, Song of Solomon, and Ecclesiastes non-historical. No other arrangement would have been possible for Josephus; for it is known from Talmudic and Midrashic literature that in his time, when the Tannaites flourished most, all the now familiar books were considered canonical. For various interpretations of Josephus' narrative, see Strack, *l.c.* p. 752.

Church Fathers.

The evidence of the church fathers, such as Melito of Sardis (about 170; in Eusebius, "Hist. Eccl." iv. 26) and Origen (died 253; in Eusebius, *l.c.* vi. 25), both of whom count 22 books, but mention 24, is unimportant; since they invoke the authority of their Jewish teachers, whose canon is known from the tannaite literature. Of still less weight is the evidence of Jerome (died 420), who also had Jewish instruction, and simply repeats what was current opinion among the Amoraim ("Prologus Galeatus" and preface to Daniel).

The Prophetical Canon.

§ 7. In addition to the written evidence mentioned above, the circumstance that the Samaritans (who considered themselves Jews) accepted only the Pentateuch and part of Joshua is of great importance in determining the historical development of the canon. It brings out the momentous fact that a recognized canon of the Prophets did not exist in the middle of the fifth century B.C.; while, on the other hand, it is certain from Sirach (see § 6 of this article) that the prophetical canon was completed by 200 B.C. at the very latest. Since Sirach considered prophecy as long since silenced, and had no recollection of any authoritative close of this canon, the view that the list of the Prophets was completed at least one hundred years before his time is very plausible. Consequently, the prophetical canon must have been closed, at the very latest, at the beginning of the era of the Seleucids (312). Zunz ("G. V." ed. i., p. 14) says with reason: "The holy books, containing the Law and the Prophets, must have been collected a few generations after Nehemiah. Their age extends back far beyond that epoch. The decided predilection shown toward this part of the Biblical books, still visible in later times and in all religious institutions, must be explained by the fact that it had long been honored as the only surviving monument of the Jewish state at a time when the latter no longer existed, and other national writings, whether of earlier or later time, were attracting attention" (compare also *ib.* p. 33). Ryle ("Canon of the Old Testament," p. 123) assumes that the prophetical canon was completed during the high-priesthood of Simon II. (219-199 B.C.). He adduces in proof the prophetical books themselves, which, according to him, contain many additions of a late date, showing that previous to this period they had not been canonized; K. Marti (commentary on Isaiah, in "Kurzgefasstes Handbuch") even argues that in Hillel's time the canon was not yet closed. However, the fact that Daniel is not included in the Prophets is of importance, and demonstrates that the prophetical canon must have been closed before 165 B.C.; for the best of criticism is agreed that Daniel belongs to the Maccabean era; it would have been included in the Prophets had at that time the canon still been open.

Determination of the Hagiographa.

§ **8.** While Sirach (see § 6) knew and made use of most of the books of the Hagiographa, his chapters contain no allusion whatever to Ecclesiastes, Esther, or Daniel. It does not follow from this that he did not know these books, but that he simply did not consider them Holy Writings; moreover, it is certain that in 200 B.C. the canon of the Hagiographa did not exist in its present form. A second foundation for this theory would be the date of the Book of Daniel, which in its present form, and with its allusion to Antiochus Epiphanes, was not known before 165. A third argument is deduced from the fact that while the translator of Sirach in 132 knew no technical name for the Hagiographa, he nevertheless speaks plainly of a third part of Holy Writ. Accordingly, there is no sound reason to doubt the statement in II Macc. ii. 14 (see § 6 of this article) that Judas Maccabee collected the books scattered during the wars.

No doubt, the Syrians in their persecutions had diligently searched for scrolls of the Torah, and (since they knew no difference between the various Hebrew writings) for other Biblical books (I Macc. iii. 48). Under the circumstances, it is quite comprehensible that the warlike Maccabean and his pious followers took special care to collect the Holy Books. On the other hand, under the rule of the princes who followed Simon, most of whom sided with the Sadducees, circumstances were unfavorable for determining a canon for the third portion of Scripture by agreement as to which books should be included and which excluded. It was impossible to determine the canon in the post-Maccabean period, because then the various schools of tradition began to flourish. So important a matter as the canon would not have been easily settled, as the controversies of 65 and 90 C.E. show (see § 11), and indeed there are no traces of a discussion of the subject. In view of all these circumstances, one is warranted in assuming as most probable that not long after the Maccabean wars of freedom the Jewish community had reached an agreement as to the books of the third canon.

Everything points to the correctness of the opinion of Zunz (*l.c.* p. 34) "that long before the destruction of the Temple, and not long after Sirach was translated, the Holy Writings comprised the present cycle." Ryle (*l.c.* pp. 184 *et seq.*), also, believes that the Hagiographa were completed before the death of John Hyrcanus (106 B.C.). To be sure, he distinguishes two periods: that from 160–105 B.C. for the admission, and that from 90–110 C.E. for the final ratification of the complete canon. But this distinction makes no difference as to the principal matter in issue.

Principle of Canonization.

§ **9.** Jewish tradition adopts the view that every word of Holy Writ was inspired by the Divine Spirit. This Spirit is believed, in every case, to have rested upon a prophet; and, consequently, every Biblical book was said to have been written by a prophet. The chronicler attributes the authorship of the Book of Samuel, which he designates as "the acts of David" (I Chron. xxix. 29) to Samuel, Nathan, and Gad. The oldest Baraita (see above, § 3; B. B. 14b), dealing with the sequence and authors of the Biblical writings, assumes the author of every book to have been a prophet, and finds him either in the titles or the sequence of the books themselves. Moses, Joshua, Samuel, Ezra, and the Prophets wrote their own books; Moses wrote Job, the hero of which was his contemporary; Joshua wrote the last eight verses of the Pentateuch ("so Moses, the servant of the Lord, died," etc.); Samuel wrote Judges and Ruth; Jeremiah the Books of Kings, which preceded his own book, and Ezra the Chronicles (see Blau, *l.c.* p. 33). There is thus an unbroken chain of prophets from Moses to Malachi; the chain of tradition in Abot i. 1 mentions prophets but no priests: "Forty-eight prophets and seven prophetesses prophesied for Israel. None of them took from or added anything to the Law, except the reading of the roll of Esther" (Baraita Meg. 14a; compare "Seder 'Olam," xx., xxi.).

Not only the Patriarchs, but David and Solomon also were considered prophets. Thus the Psalms, written by David; Proverbs, Canticles, and Ecclesiastes, written by Solomon ("Seder 'Olam," xv.; compare Cant. R. i. 35; Lam. R. xi. 1; and B. B. 15a); Ruth, by Samuel; Lamentations, by Jeremiah; Daniel, by Daniel; and Chronicles and Ezra-Nehemiah, by Ezra (who is identified with Malachi, Meg. 15a), are all of prophetic origin. Esther alone apparently is without a prophetic author. For this reason, "Seder 'Olam" (end of ch. xx.) considers that Mordecai was a prophet who, contemporary with Haggai, Zechariah, and Malachi, prophesied at the time of Darius; while Daniel (who in Esther R. iv. 5 is identified with Hatach), according to his own book, lived as early as the reign of Nebuchadnezzar. Josephus—who believes that prophecy ceased in the time of Artaxerxes I.—considers as divine only the books written by prophets (see the passage, "Contra Ap." i. 8, quoted above; compare Grätz, "Monatsschrift," xxxv. 281 *et seq.*). Thus only works regarded as having been inspired by the Holy Spirit were included in the canon. Neither the Talmud nor Midrash knew the difference between prophecy and the Holy Spirit, as drawn in the Middle Ages. Take the following examples:

Esther was a *prophetess*; for it is said (Esther ix. 29): "Esther wrote" ("Seder 'Olam," *l.c.*). Chajes ("Torat Nebiïm," last page, Zolkiev, 1836) has rightly inferred from this passage that, according to tradition, every written word was of prophetic origin. Rabbi Levi says: "Formerly, if man did anything of importance, a prophet came and wrote it down; but now . . ." (Lev. R. xxxiv. 8). David prays in Psalm xix. 15 (A. V. 14): "Let the words of my mouth be acceptable"; that is, "may they be transcribed for later generations, and may the latter not read them as Homer is read, but let them meditate upon them and be rewarded for doing so, as they are for studying Nega'im and Ohalot (Midrash Shoḥar Ṭob, i. 8, ed. Buber, p. 5a). Of Ps. xlii. 5 it is said (Lam. R. Introduction, p. 24): "There were 600,000 or even 1,200,000 prophets. Every prophecy which was of importance for its own time or later generations was published; but, on the other hand, those prophecies having significance for their own, but not for future times, were not published" (Cant. R. vi. 11). "God said to Moses, 'copy the Torah, Prophets, and Hagiographa, that you may have them in writing'; Halakot, Midrash, Haggadot, and Talmud, however, are to be preserved only verbally" (Ex. R. xlvii. 154a). R. Isaac considered that "all that the prophets foretell in every generation, they learned on Mt. Sinai" (*ib.* xxviii. 100a). "The entire Holy Writ is really the word of God, so that the authors are to be considered merely as media." "When Haggai, Zachariah, and Malachi died, the Holy Spirit left Israel" (Tosef., Soṭah, xiii. 2; Yer. Soṭah, end; Sanh. 11a).

Therefore, whatever is in the Holy Writ must have been written, at the very latest, during the time of these last three prophets, frequently mentioned in Talmud and Midrash. The Great Synagogue had many prophets among its members, and therefore had the right to have the Esther scroll written down (Shab. 104a; Meg. 2a; Yoma 80a; Tem. 15b).

Ben Sira and Other Apocrypha.

§ 10. It was due to the principle referred to in the preceding section that the Wisdom of Sirach (Ecclesiasticus), which was used as a school-book many centuries after the completion of the canon (hence called Παιδαγωγός, whence the Jewish "Alphabets" of Ben Sira), either found no place in the canon, or was excluded from it. Since, in his work, the author names himself and the high priest Simon, the post-prophetic origin of the work was evident:

In the Tosefta it is stated (Yad. ii. 13, ed. Zuckermandel, p. 683): "Neither the books of Ben Sira nor any of the books written thereafter [that is, in post-prophetic times] render the hands unclean,' [that is, are canonical]. The Mishnah (Sanh. x. 1) adduces this dictum in the name of R. Akiba: "He who reads the outside books (ספרים חיצונים) shall have no share in the life to come." To this the Palestinian Talmud adds: "for example, the books of Ben Sira and Ben La'ana." But the reading of Homer and all other books written thereafter shall be accounted as the reading of a letter. On what ground? They may be read, but not to weariness" (Sanh. 28a). This passage is usually considered incomprehensible. In the first place, its severity against Ben Sira is not intelligible; secondly, it is not clear why the books of Homer should be preferred to Ecclesiasticus (Sirach); thirdly, in one of the Baraitot (Sanh. 100a) it is said that the books of heretics are meant (ספרי מינים), and only Joseph, a Babylonian amora of the beginning of the fourth century, states: "The book of Ben Sira also is not to be read." This prohibition is indeed contradicted by historical facts; for since Sirach's wisdom is frequently cited by the Talmudists (compare the latest compilation of citations in Cowley and Neubauer, "The Original Hebrew of a Portion of Ecclesiasticus," Oxford, 1897), the reading of his work can not have been forbidden. Moreover, as the context clearly shows, passages of Ben Sira are twice cited as though they were part of the Hagiographa ('Er. 65a, by Rab from Sirach vii. 10, and B. Ḳ. 92b by Rabba bar Mari; see also "Jew. Quart. Rev." x. 241). Even if it be supposed that these two cases arose from a confusion due to lack of memory, the two Talmudic teachers thinking the verses quoted by them to be from a Biblical book, withal it clearly follows that Sirach *was* read, and so high an authority as Akiba could not possibly have declared that whoever read in Ben Sira would destroy his future salvation. As a result of these difficulties it has been decided to amend the passages of the Jerusalem Talmud in question (Joel, "Blicke in die Religionsgeschichte," i. 71 *et seq.*; Grätz, "Monatsschrift," xxxv. 287). It would seem that all these difficulties might be obviated by keeping clearly in mind the fact that the Talmudic teachers distinguished two kinds of reading: (1) reading in public and aloud, or zealous study, and (2) private reading. The Midrash on Eccl. xii. 12 (see above, § 4) forbids adding another book such as that of Ben Sira or Ben Tigla to the twenty-four books; but says they may be read, expressing this opinion in the same way as does the Talmudic passage under discussion. The whole passage therefore bears out the following construction: Akiba maintains that not only he who denies the divine origin of the Torah forfeits his share in the future life, but also he who reads the outside books as though they were Holy Writings; that is, who treats them as such either by reading them aloud or by interpreting them before the community. This or a similar penalty is not threatened in the case of apocryphal works in general, but only in connection with a well-known and highly prized book; consequently Akiba's statement must have been directed exclusively against Ben Sira's collection of proverbs. Concerning this book, Epiphanius also states (*l.c.* in Lagarde, "Symmicta," ii. 157) that it does not belong to the Holy Writings, and adds: "but the ספרי המירם and other works written in post-prophetic times may be read [that is, read privately]; for, according to Ecclesiastes xii. 2, they may be read, but not to the extent and in the manner of wearying the flesh."

From these passages it is evident that no attempt was made to stamp out the Apocrypha; on the contrary, an influence was certainly exerted which was not altogether unfavorable to them (see above, § 4). In conclusion, be it remarked that Maimonides ("Hilkot 'Ab. Zarah," ii. 2) holds Akiba's expression, "outside books," to refer to idolatrous, non-Jewish, extra-canonical writings, and that in the fourth century, in the passage in Sanh. 100a, a reason was sought for forbidding the reading of Sirach. Accordingly, the prohibition against reading non-canonical works generally can not have been old.

Controversies About Separate Books.

§ 11. There were controversies concerning the admission into the canon of the Book of Ezekiel, Solomon's three books (Proverbs, Ecclesiastes, Song of Solomon), and Esther. But no controversy arose concerning the Apocrypha: all were agreed that they were non-canonical. The opposition to Ezekiel was only temporary; owing to its contradictions of the Pentateuch, many wished to hide it away (that is, to prevent its use); but "Hananiah ben Hezekiah ben Garon spent three hundred jars of oil to release it." Others wished to prohibit its use because a child in school, having read the first chapter, made a picture of the "ḥashmal" (A. V., "color of amber") which then emitted flames; nevertheless, Hananiah championed it (Ḥag. 13a; Shab. 13b; Men. 45a). The opposition to Proverbs, because they contained contradictions, was very slight. For the same reason, it was contended that Ecclesiastes ought not to be read (Shab. 30b). Apparently the opponents belonged to the strict school of the Shammaites (Bacher, "Ag. Tan." i. 21). Others wished to prohibit the reading of Ecclesiastes on the ground that it expressed heretical ideas (Lev. R. xxviii., beginning, and elsewhere).

A longer struggle raged around the question whether Ecclesiastes "rendered the hands unclean" that touched it, necessitating their washing. The passages bearing on these controversies (see also above under § 2) read as follows:

"All books, except that of the Temple-court, defile the hands" (Kelim xv. 6). [By this expression all Biblical books are meant, as is clear from the Tosefta (*ib.* ii. 5, 8, p. 584). "The hands are defiled not only by the book of the Temple-court (ספר עזרא, read ספר עזרה) that was taken thence, but also by the prophets, by the separate books of the Pentateuch, and by another book (ספר אחר=Hagiographa; see Blau, *l.c.* p. 21) that is put there."] "The heave-offering is defiled by the book." (Mishnah Zabim v. 12; Shab. 14a, Rashi: "all the sacred writings.") "The holy writings defile the hands"; "the thongs of the phylacteries defile the hands"; "the upper and lower edges of the book, as well as those at the end, defile them." "Even though a book be so blurred that only 85 letters (as many as in Num. x. 35, 36) remain, it will defile." "All holy writings (כתבי הקדש) defile"; so also the Song of Solomon and Ecclesiastes, as R. Judah said: "The Song defiles; Ecclesiastes is in dispute." R. Simon said: "Ecclesiastes belonged to the few cases in which the Shammaites were lenient in their decision and the Hillelites severe." R. Simon b. Azzai said: "I have a statement, from the seventy-two elders and dating from the day when R. Eliezer ben Azariah became head of the school, that the Song and Ecclesiastes defile." R. Akiba replied: "God forbid! No Jew has ever contended that the Song defiled; for the whole world is not worth so much as the day when the Song was given to Israel. Thus while all the Hagiographa (כתובים) are holy, the Song is most holy; if there was any dispute, it was only concerning Ecclesiastes." R. Johanan b. Joshua, son of R. Akiba's father-in-law, said: "The controversy was as Ben Azzai states, and so it was decided." The Aramaic passages in Ezra and Daniel defile, but if the Aramaic be written in Hebrew, or the Hebrew in Aramaic, or ancient Hebrew characters, it would not be so. "A book defiles only if it is written in Assyrian (modern Hebrew characters) on animal skin, and with ink" (compare Blau, *l.c.* pp. 69 *et seq.*). The Sadducees said: "We complain of you, Pharisees, for you say, 'The Holy Writings, but not the books of Homer (ספרי המירם), defile.'" Then said R. Johanan ben Zakkai: "Have we only this against the Pharisees that they say the bones of an ass do not defile, but those of the high priest Johanan do?" The Sadducees replied that they believed bones were declared impure lest wicked people should make use of the bones of their parents (Niddah 55a: "that people might not make saddlery out of their parents' skins"). Johanan answered, that according to them, there was also impurity in the Holy Writings, but that the books of Homer, which were not honored, did not defile (Tosef., Yad. ii. 19: "in order that no covering for an animal might be made out of the books").

The chief passages in the Mishnah Yadayim (iii. 2–5; iv. 5, 6) are to the same effect. The Tosefta Yadayim takes the same general view, but makes the important addition that the Evangels (Gospels) and the books of heretics (הגליונים וספרי המינים) or Ben Sira and all books written "thereafter" (post-prophetic times) did not defile (ii. 13, 683; compare 129, 2, and Shab. 116a). It should also be noted that, according to R. Simon ben Menasya, while "The Song defiles, since it was inspired by the Holy Spirit, Ecclesiastes does not, because it was produced solely by the wisdom of Solomon" (ii. 14; compare 'Eduy. ii. 7, and Mishnah v. 3; Meg. 7a). The following passage, however, as will be apparent from its contents, dates from a later period:

> "Formerly the Proverbs, the Song of Solomon, and Ecclesiastes, because they contained only proverbs, and did not belong to the Hagiographa, were hidden (גנוזים = declared non-canonical), until the men of the Great Synagogue explained them" (Ab. R. N., A, i, B, i, pp. 2, 3, ed. Schechter; compare Midr. on Prov. xxv. 1). R. Akiba said: 'He who, for the sake of entertainment, sings the Song as though it were a profane song, will have no share in the future world" (Tosef., Sanh. xii. 10, p. 433; Sanh. 101a).

Canticles and Ecclesiastes.

These passages show that the struggle concerning Ezekiel and Solomon's three books had arisen even before the destruction of the Temple, and that the contention concerning the Song of Solomon and Ecclesiastes had attained such considerable magnitude that Akiba was compelled (about 100) to threaten the forfeiture of future life, in order to save Canticles. Since, immediately before the destruction of the Temple, the Sadducees and Pharisees were disputing concerning the defilement of hands by the Holy Writings, the law which declared that the latter did render hands unclean can not have been anterior to this time. In fact, it can not have been made much earlier than one hundred years after the Temple's destruction.

Grätz ("Kohelet," p. 149) argues that there was about 65 C.E. an assembly of the Hillelite and Shammaite schools in Jerusalem, and that in the year 90, on the day that Gamaliel II. was dismissed, the teachers of the Law decided which books were to be honored as canonical.

Esther.

The Tannaites of the second century attempted to show that the Esther scroll might be written down; and they based their decision upon Ex. xvii. 14 (Mek., Beshallah, 6; Meg. 7a; Yer. Meg. lxx. a). This eagerness proves that there was at least some question as to its admissibility. The inquiry whether Esther was revealed, and was therefore to be reckoned as Scripture, was by no means discouraged (Yoma 29a). Many sages, Akiba among others, tried to prove from separate sentences (as, for instance, "Haman spoke in his heart") that it was dictated by the Holy Spirit (Meg. 7a). According to the eminent rabbi Samuel (after 200), Esther "does not defile." Simeon (150) states that only Ecclesiastes is doubtful; while Ruth, the Song of Solomon, and Esther "defile the hands." It is evident from many sources (compare Sanh. 100a; Yer. Ber. xiv. 15; Meg. 19b) that the canonicity of this book was not certain. The controversies in the Church are merely echoes of the voices raised (but suppressed) in the synagogue against the canonical respect paid to various writings.

Inspiration and Its Degrees.

§ 12. It is almost impossible to-day to form an adequate conception of the love and admiration felt by the Biblical scribes for the Torah. Of the many passages illustrating this the following are, in many respects, characteristic:

> "The Torah is one of the seven things that existed before the Creation. According to Simeon ben Lakish, it is 2,000 years older (Pes. 54a; Gen. R. viii. 2; Cant. R. v. 11). Even Abraham obeyed all its laws (Mishnah Kid., end), and when Moses ascended to heaven, he found God with the Torah in His hand and reading the passage about the Red Heifer, Num. xix. 1–10 (Pesik. R. 68b). It was given to Israel unconditionally (Mek. 60b) by Moses, who made one copy each for every tribe and corrected them all from the copy of Levi (Pesik. 197a). He gave it closed up, according to others, in a roll (Giṭ. 68a). He wrote the last eight verses also; for not a single letter emanates from any one else. According to a more liberal opinion, however, Joshua was supposed to have written these verses (B. B. 15a). Before him who denies its divine origin the doors of hell shall never close, and he shall be condemned to stay therein eternally" (Akiba in "Seder 'Olam," iii., end, and Tosef., Sanh. xiii. 5; compare Sifre, Num. i. 112, 116; ii. 102; Sanh. 99a; Yer. Sanh. 27d and elsewhere). "The Law will endure forever" (Mek. 19a). "Any prophet who attempts to annul one of its laws will be punished by death" (Tosef., Sanh. xiv. 13). "Though all mankind should combine, they could not abolish one yod (the smallest letter) of it (compare Matt. v. 18). When Solomon took unto himself many wives, the yod of ירבה ('he shall multiply'; Deut. xvii. 17) cast itself down before God, and denounced the king (according to others, this was done by Deuteronomy). Then spake God: 'Solomon and hundreds like him shall be destroyed, but not one of your letters shall ever be annihilated'" (Cant. R. v. 11; Gen. R. xlvii.; Num. R. xviii.; Tan., Korah, No. xii; for the accusing letters, compare Pes. 109a). "The whole world is but a thirty-two-hundredth part of the Torah" ('Er. 23b). "When a copy of the Law was burned, people rent their clothes as though one of their dearest relatives had died, and such rents were never to be sewed up (Yer. M. K. 83b, and elsewhere); but a copy written by a heretic (מין) might be burned, and one written by a non-Jew had to be buried" (Giṭ. 45b). "Before the Torah the people had to stand up in the synagogue; and while it lay unrolled on the reader's desk, speaking (even about Halakah) and leaving the synagogue were forbidden" (Ket. 33b; Pesik. 118a). At least one copy had to be in every town (B. B. 43a; Tosef., *ib.* xi. 23). Scholars would even take one with them when on a journey (Mishnah Yeb., end). Even if a copy were inherited, it was considered proper to write oneself another copy; and if possible this had to be a beautiful copy (Sanh. 21b; Nazir, 2b). Before birth each one is taught the Torah; but when he sees the light of day an angel touches his mouth, and makes him forget it all (Niddah, 30b).

In those days the knowledge of the Bible was astounding: many scholars were able to write it entire from memory (Yer. Meg. 74d). Instruction in it was gratuitous (Ned. 37, and elsewhere). Even to its last letters the Torah comes from Moses, through whom God gave it to Israel, for only the Decalogue was revealed from the mouth of God Himself, in ten utterances (Sifre, Deut. ii. 305, 357; Mek. 46a). Moses is therefore called the "great writer of Israel," "the great sage, father of the wise men and of the prophets" (Soṭah 13a; Sifre i. 134, ii. 306). In countries other than Palestine, the Word of God was revealed only in a clean place or near a river (Mek. 106a, note 14).

Relation of Torah to Prophets, etc.

Just as all prophecy came from Moses, so all Holy Writings began in the Torah; for there is nothing in the Prophets or the Hagiographa that is not at least suggested in the Torah (Num. R. x. 6). Hence the question: "Is there anything that was not suggested in the Torah?" The answer is given: "Like the latter, the Prophets and the Hagiographa came from God Himself." In Sifre, Deut. ii. 306, to an utterance of Jeremiah is applied: "Lord of the Universe! Thou wrotest [it]"; and of every book it is said either that God wrote it, or that He caused it to be written. For Talmudic scholars the twenty-four books form one book, known to the Patriarchs, and even to the primeval generations; and accordingly every favorite verse is attributed to some Biblical hero: "Solomon said"; "David declared"; "Daniel stated"; "Moses, too, affirmed it" (Tosef., Yoma, ii. 1).

Nevertheless, a distinction was made between the Torah, on the one hand, and the Prophets and the Hagiographa, on the other; for, while the study of the latter books would bring the same reward as would that of the Torah (Lam. R. i. 13, iii. 10), the Prophets and the Hagiographa were not of equal importance with the Torah. Thus, the transgression of a commandment in the Prophets or the Hagiographa was not punishable by scourging (Yer. Yeb. iv. 19a; Pesiḳ. R. 61b). Any inference drawn from the Prophets or the Hagiographa had to be authenticated in the Torah (Yer. Ḳid. 66a). Simeon b. Lakish said outright, "What need have I of the Psalms? It is stated in the Torah" (Pesiḳ. R. 21b; compare 22a, below; 146a, 10; 174a, below). The Prophets and the Hagiographa are only transmitted קבלה (Naz. 53a; M. Ḳ. 5a), so that no legal (Torah) deductions are to be drawn from the prophecies (דברי תורה מדברי קבלה לא ילפינן, B. Ḳ. 2b, etc.).

As the first and actual revelation of God, the Torah stood far above the Prophets and the Hagiographa; while in the future the latter will cease to be, the existence of the Torah will be an unending one. Tradition thus distinguished, as to rank, between Moses and the other prophets; but it knew nothing of a difference between the prophetical gift (רוח נבואה) and the Holy Spirit (רוח הקדש), as defined by Maimonides: such distinction rests upon verbal expressions for "prophets" and "Holy Writings." In the treatise Soferim, and elsewhere, the Hagiographa are called קדושה ("holiness") in distinction from the Prophets, which are styled קבלה ("revelation"). The older terminology, however, applied קבלה, also, to the Hagiographa; and there is no mention of any alleged difference in degree of inspiration between the two.

E. G. H. L. B.

——**Untraditional View:** The word "canon," borrowed probably from the Phenicians (*κανών*, *κάνη*, from קנה = "rod," "carpenter's rule"; compare קנה המדה, Ezek. xl. 3), but found already in Homer ("Iliad," viii. 193, xiii. 407, xxiii. 761), seems to have been used among the rhetoricians of Alexandria to denote a collection of literary models or standard works, and a list of such classics (Quintilian, "Inst. Or." x. 1, 54, where "ordo" and "numerus" are translations of *κανών*; compare, Jerome, "Ep. liii., ad Paulinum" and "Prologus Galeatus in II Regg."). In this sense it is used also by Aristeas (*c.* 35 C.E.) ("Ep. ad Philocratem," clxiii., ed. Wendland). In Gnostic circles the authority of the sayings of Jesus was characterized by this term (Ptolemy [*c.* 200 C.E.], "Ep. ad Florum," in Epiphanius, "Hæres." xxxiii. 37). As the name of a catalogue of sacred books, the term is used by Athanasius ("Ep. Festalis," xxxix. 1, 168) in 367 C.E., in the spurious canon 60 of the Council of Laodicea (after 364), and in the possibly genuine "Iambi ad Seleucum" by Amphilochius (d. 395). Books that were regarded as sacred (*γράφαι ἅγιαι*) and God-inspired (*θεόπνευσται*) and had been generally adopted for public reading (*δεδημοσιευμέναι*), in distinction from esoteric or heretical writings withdrawn from public use (*ἀπόκρυφαι*), were designated "canonical" (*κανονικαί*).

In Palestine such sacred writings were declared by the Pharisees to be objects "making the hands unclean" (מטמאין את הידים, Yad. iii. 2, 5; iv. 5, 6), apparently necessitating a ritual ablution after contact with them. While protesting against this innovation, the Sadducees (*ib.* iv. 6) seem to have been agreed in recognizing a body of sacred Scriptures (כתבי הקדש) and in cherishing these above certain other books. The introduction of this custom would naturally tend to fix the limits of the canon. Only contact with books that were actually used or regarded as fit for use in the synagogue would demand such a washing of the hands. It was their employment in the cult that rendered them sacred.

What was, or might be, read in public worship (המקרא) constituted the canon. Therefore the question could arise whether the Aramaic targums made the hands unclean. The new ritual, by accentuating the sanctity of the books publicly read, necessarily abridged the liberty of introducing new works, and raised doubts concerning the fitness of some that had been used. The finally established canon must be looked upon as the result of a critical process reducing the number of books approved for public reading.

Inclusion and Exclusion of Apocrypha.

Among the works eliminated by this process were, undoubtedly, on the one hand, many of the writings that maintained their place in the Alexandrian canon, having been brought to Egypt and translated from the original Hebrew or Aramaic, such as Baruch, Ecclus (Sirach), I Maccabees, Tobit and Judith; and, on the other hand, books like Jubilees, Psalms of Solomon, Assumption of Moses, and the Apocalypses of Enoch, Noah, Baruch, Ezra, and others. In some cases the critical tendency may have led only to the removal of what was rightly deemed to be later accretions, such as the additions to Daniel and Esther, while in regard to disputed writings, such as Canticles, Ecclesiastes, Esther, Ezekiel (and probably Daniel), the more liberal policy finally prevailed.

While this criticism still continued in the second century of the common era, its main results appear to have been reached as early as the end of the first. Josephus ("Contra Ap." i. 8), about the year 100, counted twenty-two sacred books. The Greek Bible he used had evidently been brought down to the number required in Pharisaic circles. It is not known with certainty what books were included. It is probable, however, that Lamentations and Baruch formed one book with Jeremiah, and that Ruth was an appendix to Judges. Esther still seems to have had its additions. Among Josephus' thirteen prophets none was included that he regarded as later than Artaxerxes Longimanus. It may perhaps be doubted whether he could have described Canticles as a work laying down principles of conduct (*ὑποθήκας τοῦ βίου περιέχουσιν*). This would better suit Ben Sira. But the consideration of supposed greater age and Solomonic authorship may have decided in favor of Canticles. That the number may be the same and yet the constituent books to some extent differ, is evident from the fact that Melito in Palestinian synagogues found a canon containing twenty-two books in which Esther was lacking and Ruth separate (Eusebius, "Hist. Eccl." iv. 26), while Origen reports the twenty-two books with their Hebrew titles as including Esther and with Ruth joined to Judges as Baruch and Lamentations to Jeremiah (*ib.* vi. 25). Again, in Athanasius, *l.c.*, Esther is wanting among the twenty-two canonical books, whereas in Canon 60 of the Laodicean Council, dependent on Athanasius, Esther occurs, as also among the twenty-two canonical books enumerated by Jerome in his "Prologus Galeatus." It is scarcely by accident that this number coincides with that of the letters of the Hebrew alphabet. The same tendency that led poets to write alphabetic psalms prompted scribes to arrange the canon so as to make the total twenty-two.

Twenty-two or Twenty-four Books.

According to the Apocalypse of Ezra xiv. 44, 45 (*c.* 95 B.C.), this prophet wrote ninety-four sacred books: first twenty-four for the worthy and the unworthy to read, and then seventy to be withheld and to be given only to the wise. This legend shows that twenty-four books were looked upon by this author as intended for public reading. Although the books are not enumerated, there is no reason to doubt that this canon was substantially identical with that of Josephus. The difference may be simply due to the fact that, in some circles, Ruth and Lamentations were copied on separate rolls for convenience in public reading on Shabuot and on the Ninth of Ab. This may have involved the rejection of Baruch, and the removal of the threnody on Josiah from Lamentations. If an additional reason for counting twenty-four books were needed, the twenty-four priestly families (I Chron. xxiv.), or the twenty-four celestial representatives of Israel (Rev. iv. 4), would readily supply it (if not the twenty-four letters of the Greek alphabet). This number, given in the Baraita preserved in B. B. 14b, coexisted with the other (Jerome, *l.c.*), and ultimately prevailed.

It is manifest that to Pseudo-Ezra the seventy books were more important than the twenty-four. They had been hidden, preserved as treasures, until they should be made known to the wise. This idea had already been used by Daniel to explain the late appearance of his prophecies (Dan. xii. 4, 9). These apocalypses were too precious to be read to "the unworthy." Possibly this conceit was designed to serve a double purpose: accounting for their recent discovery, and also making a virtue of their rejection from use in the synagogue. With pride and affection their friends called them גנוזים (*ἀπόκρυφα*); to those who rightly saw in this literature a danger to the supremacy of the Law, the term גנז came to mean the removal of a book from synagogue use, as in the case of rolls that had been worn out, or of rolls not thought to render the hands unclean (see, however, APOCALYPTIC LITERATURE).

If some critics continued to urge the exclusion of this or that book from the canon of twenty-two or twenty-four rolls (see below), there are not lacking, on the other hand, signs of a readiness to include one or another of the "ḥiẓonim" (outside books). Thus Sirach is occasionally quoted (B. Ḳ. 92b) as a representative of the Hagiographa; and Baruch was still read on Yom Kippur in some synagogues in Origen's time (Eusebius, "Hist. Eccl." vi. 25). Outside of Pharisaic circles the earlier and less rigid conception of the canon maintained itself, as is evident from the extent of the Greek Bible used by Christian apologists for controversial purposes, and a number of works quoted or used as authorities by New Testament writers, not found even in this Bible, such as "Jeremiah the Prophet" (Matt. xxvii. 9), "The Wisdom of God" (Luke xi. 49), Enoch (Jude 14-16), Assumption of Moses (Jude 9), the Apocalypse of Elijah (Eph. v. 14; I Cor. ii. 9), the Martyrdom of Isaiah (Heb. xi. 37).

In B. B. 14b the canon is divided into three parts; viz., (1) the Law, comprising the five books ascribed to Moses; (2) the Prophets, including Joshua, Judges, Samuel, Kings, Jeremiah, Ezekiel, Isaiah, and the Minor Prophets; and (3) the Writings,

Rabbinical Canon.

Ruth, Psalms, Job, Proverbs, Ecclesiastes, Canticles, Lamentations, Daniel, Esther, Ezra, and Chronicles. The passage indicates what was regarded, on the basis of a tradition preserved in the school of Hoshaya b. Ḥama (*c.* 230 C.E.), as the proper manner of arranging the component parts of the canon when larger volumes were prepared.

This tripartition no doubt implied an estimate of relative value. The Law, being the first to acquire authority, remained at all times the highest authority. All non-Mosaic books were called קבלה ("tradition"), whether Prophets or Hagiographa, and considered in the light of a commentary on the Law, as it were, another expression of the oral law (compare Zunz, "G. V." 1832, p. 44). This is suggested also by the use of the term νόμος for the entire canon (II Esdras xiv. 21, iv. 23; I Cor. xiv. 21; John x. 34, xii. 34, xv. 25), by the absence of the Torah in the description of the library of religious books in II Macc. ii. 13, and by the fact that the Samaritans limited their canon to the Torah. The veneration for the Law long antedated the completion of the Pentateuch, naturally increasing with the growth of this work. The so-called Covenant Code, Ex. xx. 23-xxiii. 33, must have enjoyed wide recognition in the eighth and seventh centuries, probably because emanating from some sanctuary whose priesthood traced its descent to Moses, since the Deuteronomic code apparently was intended at the outset to take its place. This law-book was enjoined on the people by Josiah in 621 B.C. (II Kings xxii. 8-xxiii.).

It is an exaggeration to say that Judaism became a book religion, or that the canon was born, in that year. While its humanitarian spirit commended this law to many, and some found in its ordinances a source of knowledge concerning the will of YHWH (Jer. viii. 8), written oracles and royal decrees had existed before; and prophets like Jeremiah were not misled by its Mosaic guise (*l.c.*). During the Chaldean and Persian periods it naturally grew in importance as the common law of the people. Yet it did not suppress the Jahvistic and Elohistic records with their earlier codes and narratives reflecting quite different religious conceptions. These, with the annals of the kings, were subjected to a Deuteronomistic redaction. As theocracy developed, the attention centered upon the cult. Regulations touching sacrifices and other rites, etiological legends, cosmogonic myths, and genealogical traditions were added.

Development of the Pentateuchal Law.

These priestly additions are now generally regarded as a separate work compiled in Babylonia, brought to Palestine by Ezra, and promulgated at the great assembly described in Neh. viii.-x. in 444 B.C. It is more natural, however, to suppose that they gradually grew up at the sanctuary in priestly circles reenforced from time to time by returned exiles. Recent investigations tend to show that the Artaḥshashta under whom Nehemiah lived was Artaxerxes II. Mnemon (404-358), that his governorship extended from 385 to 373, and that Ezra came after him, probably in the seventh year of Artaxerxes III. Ochus (352). The story of Ezra is evidently overlaid with a later tradition. Yet it is possible that his zeal for the law of Moses led this "scribe" to write in one book all the material recognized as Mosaic—leaving out Joshua-Kings—and to inculcate obedience to this law. When Manasse at length secured from Alexander the permission to build a temple to YHWH on Gerizim, which Ochus and Darius had good reasons for refusing, in view of the effect upon Jerusalem of rebuilt walls and a well-regulated cult (Josephus, "Ant." ii. 7, § 8), he had precisely the same interest as his relatives in Jerusalem to possess the law of YHWH in its completest form containing the most explicit directions as regards the cult. At the time when the necessary Aramaic Targum took the form of a version on the Alexandrian model, the same motive was again operative. According to some critics, additions were made to the Law as late as the second century. Then "there arose a certain reluctance to write down the further developments of the law."

The Prophets.

Zech. i. 4-6 shows that the pre-exilic prophets were held in high honor as early as 519. But their words naturally came to be read in the light of contemporaneous prophecy, which was exhortation to observance of religious ceremonies enjoined by the Law. Such exhortations could not have as great authority as the Law itself. Dan. ix. 2 shows that the author was acquainted with works ascribed to Jeremiah in which an exile of seventy years was predicted; the sections Jer. xxv. 1-13, xlvi., xlvii., xlix. and Jer. xxvii.-xxix. were probably known to him. Daniel took his place with the other prophets, as is evident from the Greek versions, and from Matt. xxiv. 15 and Josephus, "Contra Ap." i. 8; Job (Ecclus. [Sirach] xlix. 9), Ezra, and Mordecai were still counted as prophets by Josephus (*l.c.*). In the reaction against the "Genuzim" (Apocrypha), probably occasioned by their use by Essenes and Christians, Daniel had maintained a place among the books that made the hands unclean, and as a prophet. The critical movement, however, had not spent its force at the end of the first century; a hundred years later Daniel was no longer accorded a place among the Prophets (B. B. 14b). On the other hand, the effort to remove Ezekiel had proved unsuccessful. The limitation of the prophetic canon to eight books was consequently later than the redaction of the canon as a whole to twenty-two or twenty-four books. How many books were counted as prophets by the grandson of Sirach, who wrote his preface after 132 B.C., by the author of II Macc. ii. 13 *et seq.*, or by the New Testament writers, can not be determined. Josephus numbered thirteen. That Sirach had before him a volume of twelve prophets is not certain. The presence of xlix. 10 in the Hebrew text does not prove that he wrote this verse. Between 180 and 132 the manuscript may have been retouched, as is suggested by the descriptions of Phinehas and Simon. No conclusions can, therefore, be drawn from this passage as to the date of Jonah or of Zech. ix.-xiv., or the title "Malachi."

Sirach's grandson speaks of "other books" in addition to the Law and the Prophets. II Macc. ii. 13 mentions the Psalter (τὰ τοῦ Δαυίδ) and "letters of kings concerning temple gifts." Philo, if he is the

The Hagiographa.

author of "De Vita Contemplativa," refers to "hymns" as well as "laws" and "inspired words of the prophets" (ii. 475, ed. Mangey). Josephus adds to the thirteen Prophets four books containing "hymns to God and precepts for the conduct of human life" ("Contra Ap." i. 8). In Luke xxiv. 44 "the Psalms" are mentioned as also furnishing predictions of the resurrection. These passages, while indicating a special class of books, containing hymns, moral precepts, and temple history, do not suggest either a completed prophetic canon or a definite number of additional works. The finally prevailing number and estimate of the "writings" can only have been the result of the critical process by which the extent of the canon and the number of the prophets were determined. The attempts to make such books as Ezekiel (Shab. 13b; Men. 45a, b; Ḥag. 13a), Proverbs (Shab. 30b), Canticles (Yad. iii. 5; Meg. 7a), Ecclesiastes (Yad. *l.c.*; 'Eduy. v. 3; Shab. 30a, b), Esther (Meg. 7a; Sanh. 100a), and probably the books of Daniel, Job, and Ezra, share the fate of the Genuzim, were only temporary. The use of Canticles, Ecclesiastes, and Esther on certain feast days gave needed support to their canonicity. In the course of the second century of the common era a fixed group of hagiographa, to which relatively less importance was ascribed than to the Prophets, was constituted. The earliest testimony as to the contents of this group is B. B. 14b.

The order of the Prophets and the Hagiographa in this Baraita presents neither the original sequence nor the finally adopted arrangement. In earlier times the reader no doubt was quite free in the choice of his selections. As long as each book formed a separate roll the order could not have been regarded as of much consequence. This apparently was still the case in the year 100 (compare Luke iv. 17; B. B. 13b). It was when larger volumes were produced that the question would arise as to the order in which their constituent parts should be copied. Practical considerations no doubt counteracted the more obvious chronological principle that seems to have been followed in Alexandria. A valuable intimation of this is found in the Baraita quoted. It declares that Isaiah was placed after Jeremiah and Ezekiel because "the Book of Kings ends in desolation, Jeremiah is all desolation, Ezekiel begins with desolation and ends with consolation, and Isaiah is all consolation." This is not to be set aside as a mere rabbinic fancy. For the principle of making the beginning of a book attractive and the end encouraging is even characteristic of editorial activity in the arrangement of the smaller collections out of which the larger volumes grew, and is based on a due regard for the effect upon the reader. The transfer of Isaiah to the first place may have been due to external considerations of size. The idea that the twelve Minor Prophets were written by "the men of the Great Synagogue" (אנשי כנסת הגדולה) was determining. Kuenen asserts that "the Great Synagogue" is only an unhistorical reflection of the assembly described in Neh. viii.-x. Even if it could be proved that the name was used in the Persian period to denote a regularly constituted authority, the functions ascribed to it would still remain projections into the past of much later conditions. When it is said that "the men of Hezekiah" or "the men of the Great Synagogue" wrote certain books, it is probably meant that by divine inspiration they produced authoritative texts from material already extant in oral or written form.

The Psalter furnished the natural starting-point for the differentiated group of Hagiographa. But when Ruth was detached from Judges, and Lamentations from Jeremiah, the former was recognized as an auspicious and suitable introduction to the Psalms, and the latter was assigned to its chronological position between the three Solomonic writings and Daniel (B. B. 15b). As the custom developed of arranging the five Megillot by themselves (Masorah and Spanish MSS.), and subsequently in the order of the feasts—viz., Canticles, Ruth, Lamentations, Ecclesiastes, Esther (German and French MSS.), Chronicles was transferred from the end to take the place of Ruth (Masorah and Spanish MSS.).

That Chronicles concluded the collection in the time of Jesus can not be proved from Matt. xxiii. 35 (Luke xi. 51); for this passage drawn from "The Wisdom of God" contains no word of Jesus, and does not refer to Zechariah b. Jehoiada mentioned in II Chron. xxiv. 20, but to Zechariah, the son of Baruch, mentioned in Josephus ("B. J." iv. 6, § 4). The connection of Chronicles with Ezra was original and ultimately prevailed; as did also the chronological order of the erstwhile prophetic books, Daniel, Esther, and Ezra.

Two tendencies are visible in the history of the canon: the one, critical, inclining to reduce the number of sacred books by applying rigid standards of doctrinal consistency; the other, conservative of an earlier and truer estimate, and on this account more liberal to new works of the same general character. Both have rendered great service. The former has issued in a recognition of divergent types of teaching and different degrees of credibility in the canon, and of the rights of private judgment to appraise its contents; while the latter has resulted in the preservation of many precious monuments of man's religious life, and the sense of historic continuity and collective growth.

BIBLE DICTIONARY. See Dictionaries.

BIBLE EDITIONS: The advantages of the newly discovered art of printing were quickly recognized by the Jews. While for the synagogue service written scrolls only were (and are still) used, the printing-press was very soon called into service to provide copies of the Bible for private use. All the editions published before the Complutensian Polyglot were edited by Jews; but afterward, and because of the increased interest excited in the Hebrew Bible by the Reformation, the work was taken up by Christian scholars and printers; and the editions published by Jews after this time were largely influenced by these Christian publications. It is not possible in the present article to enumerate all the editions, whole or partial, of the Hebrew text. This account is devoted mainly to the incunabula (many of which were used as manuscripts by Kennicott in gathering his variants; see his Report for 1766, p. 103).

The first to establish a Hebrew printing-press and to cut Hebrew type (according to Ginsburg, in the Chwolson Memorial Volume, p. 62) was Abraham b. Ḥayyim dei Tintori, or Dei Pinti, in 1473. He printed the first Hebrew book in 1474 (Ṭur Yoreh De'ah). In 1477 there appeared the first printed part of the Bible in an edition of 300 copies. It is not really an edition of a Biblical book, but a reprint of Ḳimḥi's commentary on Psalms, to which the Biblical text of each verse is added; the text being in square, the commentary in Rabbinic, characters. Each verse is divided off by a "sof-pasuḳ." The first four Psalms have the vowel-points; but the difficulty of printing them seems to have been too great, and they were discontinued. The "ketib" is replaced by the "ḳeri"; but the text is badly printed and contains many errors. The Psalms are not numbered, but simply divided, as in the manuscripts, into five books. From the type used it is conjectured that the printing was done at Bologna. The printers were Maestro Joseph, Baria, Ḥayyim Mordecai, and Hezekiah of Ventura. A facsimile of a page is given in Simonsen, "Hebraisk Bogtryk," p. 9 (see also De Rossi, "De Hebr. Typ." p. 10; *idem*, "Annales Hebræo-Typographici," p. 14). The Psalms alone seem to have been reprinted before 1480, in Rabbinic characters similar to those used in the 1477 edition; and a third time together with an index of the Psalms and the text of the Birkat ha-Mazon. It is supposed that these two reprints were issued at Rome (Simonsen, in "Steinschneider Fest-schrift," p. 166; compare De Rossi, "Annales," p. 128).

First Edition of Pentateuch.

The first edition of the Pentateuch appeared at Bologna Jan. 26, 1482, with vowel-signs and accents. The raphe-sign is liberally employed in the first folios, but later on is discarded. The Targum (along the side) and the commentary of Rashi (at the top and the bottom of the page) are printed with the text. The cost of publication was borne by Joseph ben Abraham Caravita. The publisher was Maestro Abraham b. Ḥayyim dei Tintori (Dei Pinti) of Pesaro; the corrector, Joseph Ḥayyim ben Aaron Strassburg, a Frenchman. According to De Rossi ("Origine," p. 16; "Annales," p. 22), the editor made use of a Spanish manuscript; but Ginsburg ("Introduction," p. 799) believes that German and Franco-German manuscripts were used. A facsimile is given by Simonsen (p. 10). About the same time, and at Bologna, there appeared an edition of the Five Scrolls, with Rashi above and below the text and with the commentary of Ibn Ezra on Esther ("Annales," p. 130). This was followed, Oct. 15, 1485, by an edition of the Former Prophets (without vowels), together with Ḳimḥi's commentary, brought out at Soncino in the duchy of Milan by Joshua Solomon Israel Nathan Soncino. That this edition was very carefully printed is attested upon the fly-leaf. The Divine Name is printed יהוה and אלהים (*ib.* p. 40). In the following year the Later Prophets appeared at the same place; though neither date nor printing-office is mentioned in the book itself. The passages in Ḳimḥi dealing with Christianity are not omitted, as is the case in later editions (*ib.* p. 131). It was this same printing-house that brought out, Feb. 23, 1488, the first complete edition of the Bible, the text provided with vowels and accents, in two columns to the page. The Pentateuch in this edition is followed by the Five Scrolls. Soncino was aided in the printing by Abraham ben Ḥayyim dei Tintori, mentioned above. According to De Rossi (*ib.* p. 56), German codices were at the basis of this edition.

Portions of the Bible.

Prior to this, portions of the Bible were printed at Naples: Proverbs, with a commentary of Immanuel ben Solomon, by Ḥayyim ben Isaac ha-Levi the German (1486); and in the same year (Sept. 8) Job with the commentary of Levi ben Gerson, Lamentations with that of Joseph Kara, and the rest of the Hagiographa with Rashi. The editor of this last edition was Samuel ben Samuel Romano (*ib.* p. 52). This edition was completed with the Psalms (March 28, 1487) with Ḳimḥi's commentary, edited by Joseph ben Jacob the German, and corrected by Jacob Baruch b. Judah Landau (*ib.* p. 48). In 1487 (June 30) an edition of the Pentateuch without commentary appeared at Faro in Portugal, upon the basis of Spanish manuscripts, in Spanish-Hebrew characters, with vowel-points—at times incorrectly applied—and with no accents. The expenses for the edition were paid by Don Samuel Gacon (Stein-

(In the collection of Hon. Mayer Sulzberger.)

schneider, "Cat. Bodl." No. 1072). The only copy known is printed on vellum.

In 1490 an edition of the Pentateuch without vowel-points or accents was published by Abraham ben Isaac b. David at Ixar (Hijar) in Spain, together with the Targum Onkelos in small square type and Rashi in Spanish-Rabbinic type (De Rossi, "Annales," p. 73); and one of the Psalms was issued at Naples (Dec. 12), together with Proverbs and Job (*ib.* p. 79). Another copy of the Pentateuch seems to have been issued at Ixar between 1490 and 1495, together with the Haftarot and the Five Scrolls. It is said by De Rossi to contain the printer's mark of a lion rampant, such as is seen in the other Ixar prints. The printer was Eliezer b. Abraham Alantansi, and it is spoken of as "elegantissima editio" (*ib.* p. 143; "Cat. Bodl." No. 1011a). In the year 1491 two editions of the Pentateuch left the press: one at Naples (Soncino), with vowel-points and accents together with Rashi, the Five Scrolls, and the scroll of Antiochus ("Annales," p. 82); the other at Lisbon (July–Aug.), with Onkelos and Rashi. The Lisbon copy was edited by David b. Joseph ibn Yaḥya and Joseph Calphon. It is declared by Le Long and De Rossi, (*ib.* p. 81) to be the most celebrated and beautiful Hebrew print of the fifteenth century. The elegant characters are provided with vowels and accents even in the Onkelos, and the raphe-signs are used throughout (facsimile in Simonsen, *l.c.* p. 12). It was published in two volumes, probably at the same press from which came the editions of Isaiah and Jeremiah with Ḳimḥi's commentary (1492) and Proverbs with the commentary of David b. Solomon ibn Yaḥya (*c.* 1492; see "Annales," pp. 92, 143). From another press in Portugal, at Leira, were issued, July 25, 1492, Proverbs with Targum and the commentaries of Levi ben Gerson and Menahem Meïri (printed by Samuel d'Ortas), and in 1494 the Former Prophets with Targum and commentaries of Ḳimḥi and Levi b. Gerson (*ib.* pp. 92, 104).

Soncino Bibles.

Gerson b. Moses Soncino established a printing-press also in Brescia, from which there issued a Pentateuch with the Five Scrolls and the Haftarot, Jan. 23, 1492; a second edition of this Pentateuch, Nov. 24, 1493; Psalms, Dec. 16, 1493; and a complete Bible, May 24–31, 1494 (*ib.* pp. 88, 98, 102; Baer-Delitzsch, "Liber Psalmorum," p. iv.). This last edition is in most copies merely a reprint of the 1493 edition as regards the Pentateuch; and it is of especial interest as being the one used by Luther in making his translation into German. Luther's copy is preserved in the Berlin Royal Library (Kennicott, Reports, pp. 81, 85; Bachmann, "Alttestament-Untersuchungen," p. 101, with facsimile). It is interesting to note that Gerson seems to ignore most of the peculiarities of the Masoretic text as laid down; *e.g.*, by Jacob b. Ḥayyim (König, "Einleitung," p. 52).

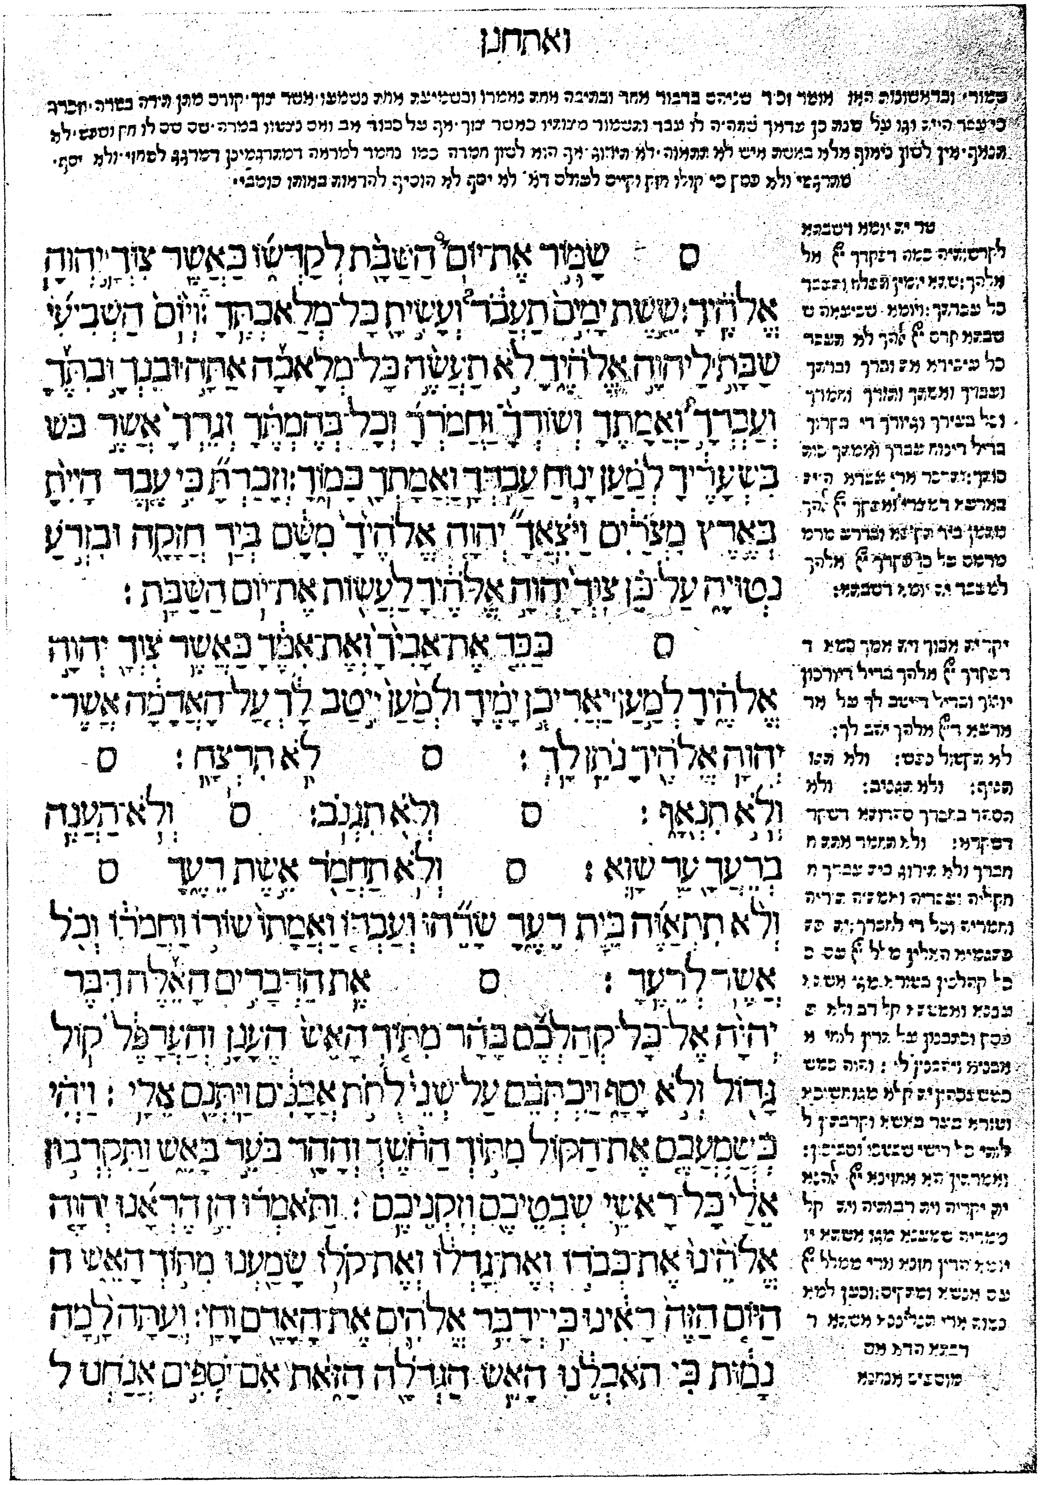
Polyglot Bibles.

As none of the polyglot Bibles were the work of Jewish printers or editors a short account only of them need be given here. The idea seems to have originated with Origen (185[?]–253), who drew up in parallel columns the Hebrew text, its transliteration into Greek, and various other Greek recensions in fifty scrolls or books which were then deposited in the library of Pamphilus at Cæsarea (this Hexapla was preceded by a Tetrapla). The idea was not revived until the sixteenth century, when the first edition of the Hebrew text by Christians appeared in the Complutensian Polyglot (Alcalá de Henares, 1514–17, 6 vols.). Renouard believes that the plan originated with Aldus Manutius, who, in the preface to the Psalter of 1497, speaks of the probability of his publishing a Hebrew-Greek and Latin Bible in one. Only the first sheet, however, of this was printed. The honor of being first in the field belongs to Cardinal Ximenes; though among those who helped him were the Maranos Alfonso of Zamora and Paul Nuñez Coronel. The three columns on each page contain the Hebrew, the Septuagint, and the Vulgate. The Targum of Onkelos is added, of which Alfonso made the Latin translation. Ximenes had to cast his own Hebrew type for this work: "ḥatefs" are sparingly used; of the accents, only "athnaḥ" and "sof-pasuḳ." The Masoretic divisions are discarded; and the text for the first time is arranged after the model of the Vulgate, the chapter-numbering of which is printed in the margin. By means of a letter, reference is made from each Hebrew word to its Latin equivalent; and the Hebrew roots are also placed on the margin.

The Hebrew text of the Complutensian was repeated in the Antwerp Polyglot (1569–72, 8 vols.), the editor of which was Arias Montanus, and the printer Christopher Plantin. It is known also as the "Biblia Regia," because Philip II. defrayed the expenses. In addition to the texts in the Complutensian, it contains an additional Targum and a number of tracts on lexicographical and grammatical subjects. Only 500 copies were printed, most of which were lost at sea on their way to Spain. The polyglot of Elijah Hutter (Nuremberg, 1599–1601), contains, besides the older versions, a number in modern European languages; and it is peculiar from the fact that the radical letters of the Hebrew text are printed in full characters, and the servile letters in hollow ones. A decided advance is made in the Paris Polyglot (1629–45, 10 vols.), done at the expense of Michel le Jay. Here the Complutensian and Antwerp polyglots are repeated; but there are added the Syriac and Arabic as well as the Samaritan, Hebrew, and Aramaic versions, and a Latin translation of all the versions. It is also highly prized for its typographical excellence.

London Polyglot.

Still more ambitious than the Paris was the London Polyglot edited by Brian Walton (1654–57, 6 vols., and "Lexicon Heptaglotton," 1669, 2 vols.). The first four volumes contain the Old Testament, where, in addition to the Hebrew, the following texts are to be found: Samaritan-Hebrew, Samaritan-Aramaic, Septuagint with readings of the Codex Alexandrinus, Old Latin, Vulgate, Syriac, Arabic, Targum Onkelos, Pseudo-Jonathan and Jerusalem Targums, Targum Jonathan and Targum of the Hagiographa, Ethiopic and Persian in varying completeness. All of these were accompanied by Latin translations. This polyglot was the second book in England to be published by subscription. It was originally dedicated to Cromwell; but as he died during the printing, it was finally dedicated to



ואתחנן

(In the New York Public Library.)

Charles II. A few copies, however, left the press before the change was made; and these are called "Republican" copies, to distinguish them from the "Royal" ones.

The polyglot of Christian Reineccius (Leipsic, 1750, 3 vols.), which contains the Hebrew (with Masoretic notes), the Greek, Latin, and Luther's German version; that of E. Hutter (Hamburg, 1599), of which only the Pentateuch, Joshua, Judges, and Ruth were published; and that of S. Bagster (London, 1821), in which the Hebrew text is that of Van der Hooght, the Samaritan that of Kennicott, need no further mention. The Heidelberg or Bertram's polyglot (*ex-officina Sanct-Andreana*, 1586; Commeliana, 1599, 1616, 3 vols.), Hebrew, Greek, and Latin, is based on the Complutensian text. Polyglot Psalters containing the Hebrew text were published at St. Germain des Prés in 1509 and 1513 by the elder Henry Stephen, at Genoa in 1516 by Agostino Justinian, and at Cologne in 1518 by Potken. The only Jewish polyglot issued was the Pentateuch (Constantinople, 1547), which contained, besides the text, the Targum, the Neo-Greek, and the Persian translations in Hebrew characters. The most recent polyglots are those of Stier and Thiele (Leipsic, 1847–63; 3d ed., 1854–64) with Hebrew, Septuagint, and Vulgate, and of R. de Levante (London, 1876, 6 vols.).

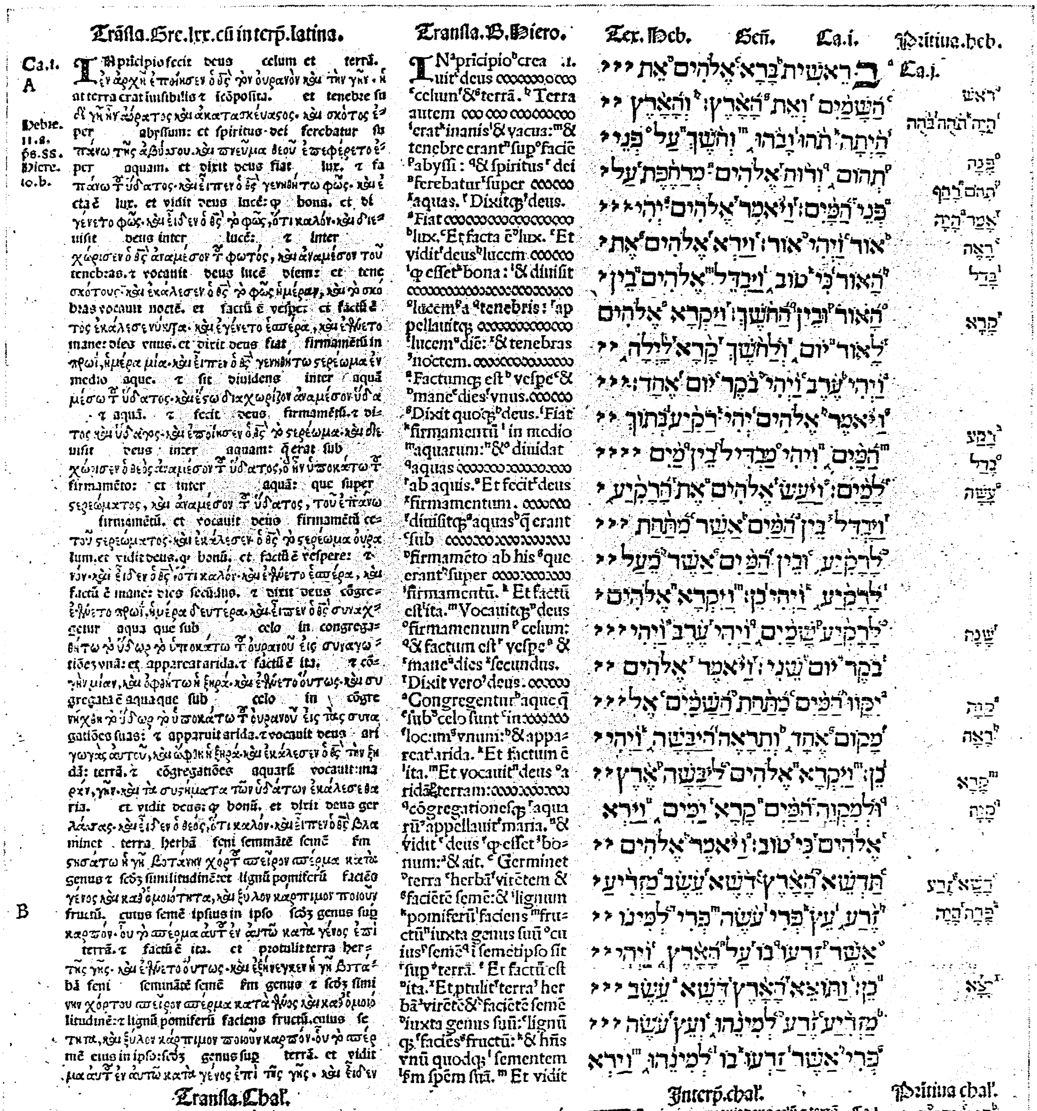
Rabbinic Bibles.

Another class of Bibles, and these distinctively Jewish, are those that are known as Rabbinic Bibles, or Mikra'ot Gedolot. The first of these was published at Venice 1517–18; the editor was Felix Pratensis. It contains the Pentateuch with Onkelos and Rashi, the Former and Later Prophets with Targum Jonathan and Ḳimḥi's comments (the anti-Christian passages omitted); Psalms with Targum and Ḳimḥi; Proverbs with the commentary known as "Ḳaw we-Naḳi"; Job with the commentaries of Naḥmanides and Abraham Farrisol; the Five Scrolls with the commentary of Levi b. Gerson; Ezra and Chronicles with the commentaries of Rashi and Simon ha-Darshan. To these were added the Jerusalem Targum to the Pentateuch; Targum Sheni to Esther; the variant readings of Ben Asher and Ben Naphtali; the thirteen "articles of faith" of Maimonides; the 613 precepts according to Aaron Jacob Ḥasan; and a table of the parashiyot and Haftarot according to the Spanish and German rites. This edition is the first in which Samuel, Kings, and Chronicles are divided into two books, and Nehemiah is separated from Ezra. It is the first also to indicate in the margin the numbers of the chapters in Hebrew letters (Ginsburg, "Introduction," p. 26). The ḳeri consonants are also given in the margin.

The edition was not, however, pleasing to the Jews, perhaps because its editor was a convert. Elijah Levita, in his "Masoret ha-Masoret," severely criticizes the Masoretic notes. This edition was replaced in 1525 by the second Bomberg text, which was edited by Jacob b. Ḥayyim of Tunis under the title שער יהוה הקדש. This text, more than any other, has influenced all later ones; though readings from the Complutensian and from the Soncino edi-



PAGE FROM THE COMPLUTENSIAN POLYGLOT EDITION OF THE BIBLE, 1514.

tion of 1488 have occasionally found their way in. It is peculiar as being the first to insert the letters פ and ס for the purpose of indicating the open and closed sections, and to designate the ḳeri by the letter ק. Here also the first attempt is made, though incompletely, to collect the Masorah, both "Magna" and "Parva." As in the best manuscripts, the larger Masorah is printed above and below the text (Hebrew and Targum in parallel columns); while the lesser Masorah is printed between the columns. Besides the elaborate introduction to the Masorah by Jacob b. Ḥayyim himself, an index to the Masorah, Ibn Ezra's introduction to the Pentateuch, Moses ha-Naḳdan's treatise on accents, the variations between the Easterns and the Westerns and between Ben Asher and Ben Naphtali, it contains the Pentateuch with Targum, Rashi, and Ibn Ezra; the Former Prophets with Rashi, Ḳimḥi, and Levi b. Gerson; Isaiah with Rashi and Ibn Ezra; Jeremiah and Ezekiel with Rashi and Ḳimḥi; the Minor Prophets with Rashi and Ibn Ezra; Psalms with Rashi and Ibn Ezra; Proverbs with Ibn Ezra, Moses Ḳimḥi, and Levi ben Gerson; Job with Ibn Ezra and Levi ben Gerson; Daniel with Ibn Ezra and Saadia; Ezra with Ibn Ezra, Moses Ḳimḥi, and Rashi; Chronicles with Pseudo-Rashi; and the Five Scrolls with Rashi and Ibn Ezra. This Bible was reprinted, with readings inserted from the edition of Felix Pratensis (Venice, 1525–28).

The third edition of the Bomberg Rabbinic Bible (1546–48) was edited by Cornelius Adelkind. It was practically a reprint of the second, except that the commentary of Ibn Ezra on Isaiah was omitted; while that of Jacob ben Asher on the Pentateuch and that of Isaiah di Trani on Judges and Samuel were inserted. This third Bomberg edition was repeated in the fourth edition by Isaac b. Joseph Salam and Isaac ben Gerson (Treves). Part of the Masorah omitted in the third edition has here been reinserted. The fifth edition was a reprint of De Gara's (Venice, 1617–19, by Pietro Lorenzo Bragadini, and revised by Leo di Modena). It was, however, expurgated by the Inquisition. The sixth edition, by Johannes Buxtorf (Basel, 1618–19, 2 vols.), was a reprint of the 1546–48 copy. To this was added the editor's "Tiberias," a Masoretic work. The seventh Biblia Rabbinica was published at Amsterdam, 1724–28 (4 vols., fol. 1), under the title "Ḳehillot Mosheh." It contains, besides the Hebrew text, the Targum on the whole Bible; Rashi, Ibn Ezra, Levi ben Gerson, Obadiah Sforno, Jacob b, Asher, Ḥizkuni, and 'Imre No'am on the Pentateuch; David Ḳimḥi on the Prophets and the Chronicles; Isaiah di Trani on Judges and Samuel; "Keli Yaḳar" on the Former Prophets, and "Keli-Paz," by Samuel Laniado, on the Later Prophets; Meïr Arama on Isaiah, Jeremiah, and the Song of Solomon; Jacob Berab on Isaiah, Jeremiah, Ezekiel, and some other Later Prophets; Samuel Almosnino on the Later Prophets; Isaac Gerson on Malachi; "Torat Ḥesed" by Isaac ben Solomon; Ya'bez on Psalms, Job, Canticles, Ruth, Lamentations, Ecclesiastes, Daniel, Ezra, Nehemiah, and Chronicles; Joseph ibn Yaḥya on the Hagiographa; "Mizmor le-Todah," by Samuel Arepol, on Psalm cxix.; "Ḳaw we-Naḳi" on Proverbs; Menahem Meïri on Proverbs; Moses Ḳimḥi on Proverbs, Ezra, Nehemiah; Naḥmanides, Farissol, and Simon ben Zemaḥ Duran on Job; Saadia Gaon on Daniel; Yalḳut Shim'oni on Chronicles; Moses of Frankfurt's annotations, entitled "Ḳomaz Minḥah," on the Pentateuch; "Minḥah Ḳeṭannah" on the Former Prophets; "Minḥah Gedolah" on the Later Prophets, "Minḥat 'Ereb" on the Hagiographa; the introduction of Jacob b. Ḥayyim of Tunis; and the tract on the accents by Moses ha-Naḳdan.

The Warsaw Rabbinic Bible.

The latest Biblia Rabbinica, with thirty-two commentaries, is that published at Warsaw by Levensohn (1860–68, 12 vols., small fol.). It contains, besides the original Hebrew, the Targums Onkelos and Yerushalmi on the Pentateuch, the Targum Onkelos on the Prophets and Hagiographa, and the Targum Sheni on Esther. Of commentaries it contains that of Rashi on the whole Bible; Aaron Pesaro's "Toledot Aaron"; Asheri's commentary and Norzi's notes on the Bible; Ibn Ezra on the Pentateuch, the Five Megillot, the Minor Prophets, the Psalms, Job, and Daniel; Moses Ḳimḥi on the Proverbs; Naḥmanides on the Pentateuch; Obadiah Sforno on the Pentateuch, the Song of Solomon, and Ecclesiastes; Elijah Wilna on the Pentateuch, Joshua, Isaiah, and Ezekiel; S. E. Lenczyz and S. Edels on the Pentateuch; J. H. Altschuler on the Prophets and Hagiographa; David Ḳimḥi on the Later Prophets; Levi ben Gerson on Joshua, Kings, Proverbs, and Job; Isaiah di Trani on Judges and Samuel; S. Oceda on Ruth and Lamentations; Eliezer ben Elijah Ashkenazi on Esther; Saadia on Daniel. It also contains the Masorah Magna and Parva, tracts on the vowels and accents, the various readings of Ben Asher and Ben Naphtali, and the introduction of Jacob ben Ḥayyim of Tunis.

Various Editions.

Several editions were published at Venice by Daniel Bomberg, 1517, 1521, 1525–28. Of later editions, only a few of the more important can be mentioned here. Joseph Athias (Amsterdam, 1661) edited the text, using Buxtorf's edition and the traditional one, that had come down from Soncino (1488), with a comparison of two manuscripts. This was reprinted by Leusden in 1667. A third edition was brought out by Daniel Ernest Jablonski (Berlin, 1690), but with a comparison of all the earlier editions (other editions 1712, and, without vowels, 1711). Jablonski's, in turn, became the foundation of that of J. H. Michaelis (Halle, 1720), for which the latter compared five Erfurt manuscripts and nineteen printed editions. The Mantuan Bible of 1742–44, edited by Rafael Ḥayyim b. Abiad Shalom Basilea and Felice (Masliaḥ) Marini, was in a measure only a reprint of Michaelis; Raphael in his edition of the excellent text, as corrected by Norzi ("Minḥat Shai," Mantua, 1732–44), tried to unify the text and not simply to reprint the older editions.

Van der Hooght.

The basis of all the modern editions of the Bible is that of E. van der Hooght (Amsterdam and Utrecht, 1705). It is practically a reprint of the Athias-Leusden edition; but at the end it has variants taken from a number of printed editions. It has been much prized because of its excellent and clear type; but no manuscripts were used in its prep-

PEDIGREE OF HEBREW BIBLE.

aration. This text was followed, even when variants were added, by Proops, Houbigant, Simon, Kennicott, Hahn, etc. The text of D. H. Opitz (Kiel, 1709) seems to be a mixed one; three manuscripts, a number of the earlier editions, and the polyglots having been laid under contribution. But still the Van der Hooght was considered to be a sort of "textus receptus," the edition of M. Letteris (Vienna, 1852) showing very few changes. This last edition was reprinted with clear-cut type by the British and Foreign Bible Society (Berlin, 1866, etc.), and in New York by Wiley & Son (1872–75). The first Hebrew Bible in America, published by William Fry at Philadelphia in 1814, was from the text of Van der Hooght, and it was reprinted in Philadelphia by Isaac Lesser in 1849.

Recent Editions.

No serious attempt was made to issue a text of the Bible after the best manuscripts and the Masorah until S. Baer commenced his publications with the help of Franz Delitzsch (1861 *et seq.*). His edition, unfortunately not completed, has become the standard. Based upon a much fuller comparison of manuscripts is the edition of the Masoretic Bible of Chr. D. Ginsburg (London, 1895), which may be considered to represent the truest Masoretic tradition. Of quite a different character is the polychrome edition of the Bible, now (1902) nearly completed, published by Paul Haupt (Leipsic and Baltimore, 1893 *et seq.*) with the aid of the foremost Biblical scholars. Under the title "The Sacred Books of the Old Testament," it endeavors to give a critical edition of the Hebrew text on the basis of the versions and the results of modern critical inquiry. The supposed sources are distinguished by various colors.

T.

BIBLE EXEGESIS.—Jewish: 1. Israel has been called "the People of the Book"; it may as fitly be called "the people of Scripture exegesis," for exegesis in the largest sense of the word is in a way the one indigenous science which Israel has created and developed, after having produced, during the first long period of its history, the actual subject of this science, the Bible itself. During the thousand years following the collection of the different books of the Scripture, the intellectual activity of Judaism was directed almost exclusively to the exegetic treatment of the Bible and the systematic development of the Law derived from it. When, through contact with Hellenic and Arabic learning, the Jewish intellect was led into new channels, Bible exegesis still retained its position of chief interest; it was the first to feel the influence of the new thought; and it gave birth to auxiliary Hebrew philology, the only science which originated in the Judaism of the Middle Ages. That other great production of medieval Judaism, the philosophy of religion, likewise developed into Bible exegesis in order to take on a Jewish character, although it substantially reproduced alien views. Finally, the younger sister of the philosophy of religion, the mysticism of the Cabala, also assumed the form and character of Bible exegesis.

During the centuries of decadence and increasing ignorance the exposition of the Bible in its various aspects still remained the most popular and assiduously cultivated occupation of the Jewish mind. The epoch known as the Mendelssohnian begins with a renaissance in the field of Bible exegesis. And modern Judaism is especially characterized by two reforms founded on the study and exposition of the Bible; viz., the reinstatement of the Bible in its legitimate place in the instruction of the young, where it had long been secondary to the study of the Talmud; and the sermon in the synagogue, based as it is on the Biblical text. Corresponding with this importance of Bible exegesis in the intellectual life of Israel, sketched here in a few words, is the magnitude of the exegetical literature, which will now be briefly reviewed in its chief phases and products.

Beginning of Jewish Exegesis.

2. The beginnings of Jewish Bible exegesis go back to a period when a part of the books collected later on into the Biblical canon did not yet exist. The original designation for the expositor's function, the verb "darash" (דרש), from which the original name of Scriptural exegesis, the noun "midrash" (מדרש), was formed, is used in the well-known reference to Ezra (Ezra vii. 10) that he "prepared his heart to seek the law of the Lord." The verb denotes "to investigate," "to seek," and, in connection with the Bible, meant, therefore, to examine the text, to search into what it means. This reference to Ezra is the earliest mention of Scriptural exegesis, and its history dates from his activity. Ezra, who by his endeavors placed the Pentateuch on the pinnacle of its importance for the new Jewish community of the Second Temple, and hence for the subsequent ages of Judaism, may also be regarded as the founder of Scriptural exegesis, which latter was confined at first to the Pentateuch as representing the entire sacred writings. Two institutions that originated in this period, the synagogue and the academy, assured a lasting home to the intellectual activity concentrated upon the examination and exposition of the Bible. In the synagogue the sacred text of the Pentateuch, and later that of the Prophets, were read and expounded; in the academies and schoolhouses the same texts were used for teaching the young and for investigation and in the instruction of adults. Thus, in harmony with its origin and the character of these two institutions, exegesis became a matter of oral instruction and oral tradition; hence any written exegetical literature of the Bible during those first formative centuries is out of the question.

3. There are no contemporary accounts of the development of the academy and the method of instruction among the Palestinian Jews during the time of the Second Temple: the historic records speak of them only after they had been firmly established and recognized. Frequent references in traditional literature, traceable down to the decades immediately preceding the Christian era, show that the national science, as developed by the Pharisees since the time of the Maccabees, was divided into two groups, Bible and tradition ("Miḳra" and "Mishnah"), and that the latter comprised three branches, in which the work of traditional literature originated. These three branches were: (1) Midrashot (in the singular, "Midrash"); (2) Halakot (or Halakah); (3) Haggadot (or Haggadah). This order of the constituentsof Mishnah in its most comprehensive sense corresponds with the historical development of these branches. First in time was the MIDRASH, *i.e.*, the exposition of the Scripture, especially of the Pentateuch and more particularly of its legal portions. From this branched off, on the one hand, the Halakot—the statutes derived exegetically from the written law, to which were added other statutes, which had been transmitted orally, and which the teachers endeavored to connect exegetically with the Biblical text—and, on the other, the Haggadot, which included the exegesis not connected with the Law, with its manifold material derived from the sacred writings. Through this differentiation the branch designated as "Midrash" was specialized into exposition of the Law or halakic exegesis. The derivation of the Halakah from the Biblical text was also called "Talmud," so that "Talmud" originally meant the same as "Midrash" in the above-mentioned stricter sense.

Midrash, Halakah, and Haggadah.

The Miḳra, the fundamental part of the national science, was the subject of the primary instruction, and was also divided into three parts; namely, the three historic groups of the books of the Bible, the Pentateuch, the Prophets, and the Hagiographa. The intelligent reading and comprehension of the text, arrived at by a correct division of the sentences and words, formed the course of instruction in the Bible. The scribes were also required to know the TARGUM, the Aramaic translation of the text. The Targum made possible an immediate comprehension of the text, but was continuously influenced by the exegesis taught in the schools. The synagogues were preeminently the centers for instruction in the Bible and its exegesis. The reading of the Biblical text, which was combined with that of the Targum, served to widen the knowledge of the scholars learned in the first division of the national science. The scribes found the material for their discourses, which formed a part of the synagogue service, in the second division, the several branches of the tradition; the Haggadah, the third of these branches, especially furnished the material for the sermon.

Miḳra.

4. The tannaitic traditional literature is derived from the three original branches of the traditional science, as taught in the schools of both Palestine and Babylonia. Although part of this literature has been lost, its most important products are still extant. The Mishnah, in its strict sense, and its supplement, the Tosefta, as well as a mass of other Halakic sentences (Baraitas, see BARAITA), preserved in the two Talmuds, are derived from the second of those branches. This part of the tannaitic literature retains many traces of its descent from the Midrash, in the many Biblical exegetical details which it contains. The branch of the Midrash preserved as its documents the Midrashim to the last four books of the Pentateuch; viz., Mekilta, on Exodus; Torat Kohanim, or Sifra, on Leviticus; and Sifre, on Numbers and Deuteronomy. These works, which are running commentaries on the Biblical text, and as such the earliest of their kind, contain also the exegetics belonging to the third branch.

Traditional Literature.

But there are also tannaïtic Haggadah collections, such as were produced in great number in the post-tannaitic period, preserving those haggadic traditions of the tannaitic time which continued in existence. One of these Haggadot, for instance, is the "Seder 'Olam," a chronology of Bible history based on haggadic exegesis. In the period of the Amoraim, beginning with the redaction of the Mishnah, the method of instruction was changed in that the Mishnah became the text-book for lectures and discussions in Palestine as well as in Babylonia. The two Talmuds, which drew their material chiefly from the Halakah and halakic exegesis (the Midrash in the exact sense), but gave a considerable place also to the Haggadah, are the result of these lectures and discussions. The haggadic exegesis was cultivated especially in Palestine, leading to the haggadic Midrash collections on the Pentateuch, the pericopes ("Pesiḳtas"; see PESIḲTA), and other Biblical books, which were based principally on the sermons. The final editing of these collections belongs to the post-amoraic time, though they represent chiefly the exegesis of the Amoraim. Side by side with the writings here sketched, which were always connected in some way with Biblical exegetics, there came to maturity during the time of the Tannaim and Amoraim the Targum literature, originating in the institution of reading the Targum at divine service. This Targum was extended to the whole Bible, as was also the Masorah, which latter is the determination of the rules and principles governing the text of the Bible. These were the two branches of study which transmitted to later generations the knowledge and correct reading of the Bible text.

5. The products of the traditional literature described above have this trait in common, that they are not the exclusive work of certain writers, but are the outcome of a long series of oral traditions, that were finally given a certain form in a written work. Therefore the exegesis found in these works does not belong to one single epoch, but to different epochs extending over a number of centuries. From the days of Hillel (30 B.C.) the names of the compilers of the traditional exegesis were also handed down; so that the originators of a large part of that early Bible exegesis and many of the Tannaim and Amoraim are known as more or less important exegetes. An old tradition reports of Hillel's teachers, Shemaiah and Abtalion, that they were great exegetes ("darshanim"). Hillel himself marks an epoch in halakic exegesis, since he formulated the seven rules according to which the Bible text must be explained. Hillel's pupil, Johanan b. Zakkai, followed a kind of symbolic exegesis.

Tannaitic and Amoraic Exegesis.

The period between the destruction of Jerusalem and the Hadrianic war was the most fruitful and important epoch for early exegesis, and its representatives were Johanan b. Zakkai's pupils and their disciples. Chief among these in the field of halakic exegesis are Ishmael b. Elisha and Akiba ben Joseph, between whose teachings there existed a fundamental opposition which extended to the Haggadah. Ishmael expanded Hillel's rules into the well-known thirteen rules for exegesis, and postulated, besides others, that of the human mode of expression in Scripture, a thesis that was to have an important influence on later Jewish exegesis. Akiba, imbued with the incomparable importance of the Biblical text, successfully defended the opinion he derived from his teacher, Nahum of Gimzo, that not even what might seem to be the most insignificant word of the text was without its especial meaning; hence everything contained in the text must become the subject of interpretation. Akiba's work was continued by his pupils, the leaders in the post-Hadrianic time, who were voluminous exegetes. One of them, Eliezer, son of the Galilean Jose, formulated thirty-two rules for haggadic exegesis. The great teachers of the Law (halakists) of the tannaitic period were also eminent Biblical exegetes, although there were also some tannaites whose preeminence lay solely in the domain of exegesis; as, for instance, Eleazar of Modiim in the pre-Hadrianic period, and the above-mentioned Eliezer b. Jose in the post-Hadrianic period.

The Halakists and Haggadists were more sharply distinguished during the time of the Palestinian Amoraim. Although even then some eminent heads of academies were at the same time masters of the Haggadah, *e.g.*, Johanan, Simeon b. Laḳish, Eleazar b. Pedat. The most important Bible exegetes were mostly haggadists by profession, as Samuel b. Naḥman, Simlai, Isaac, Levi, Judah b. Simon, Huna, Judan, Judah b. Shalom, Tanḥuma. These students of the Haggadah, as they were called, preserved also the old exegetic traditions, and produced in the post-amoraic times the above-mentioned Midrash collections. In Babylonia the haggadic exegesis was cultivated in a less independent spirit, being mostly under the influence of the Palestinian schools. There were, however, eminent haggadists among the great teachers, as Rab in the third and Raba in the fourth century.

The exegetics of the traditional literature that was not transmitted with the names of the authors, especially the anonymous portions of the tannaitic Midrash, originated in part at a very early date. It is a noteworthy fact that the exegetic phraseology of the tannaites, and consequently the earliest terminology of Bible exegetics as a whole, were already in existence when the historic period of Jewish Bible exegesis began with Hillel; that terminology may therefore be considered as a monument of the period before Hillel.

Early Bible Translations.

6. These sources of Jewish Bible exegesis, belonging to the first period, which ended with the final redaction of the Talmud (500 C.E.), were supplemented by others of an entirely different nature. These complete the account that has to be given of the exegesis of that period. First in order are the old translations of the Bible; they, like the Aramaic Targum, were intended to spread the knowledge of the Bible and naturally reflected the exegesis of the school from which they proceeded. The Septuagint demands especial attention, being the earliest literary translation as well as a source for early exegesis. Aquila's translation represents the school of Jabneh, especially Akiba's. But the other Greek versions are also based on Jewish exegesis, and so is, in great part, the Peshiṭta. Jerome in turn endeavored to establish the "Hebrew truth" in his Latin version, on the basis of oral instruction received from Jewish exegetes of Palestine. Philo, the great representative of the Alexandrian exegesis, takes a foremost place; his writings are, in part, comprehensive and explanatory paraphrases of the stories and ordinances of the Pentateuch, and, in part, a running allegorical commentary on the Bible text. Philo's allegorical exegesis was the first and most consistent attempt to prove by means of Biblical exegesis that Greek philosophy underlay the superficial meaning of the words of the Bible.

Philo.

In Palestine, too,—indeed as early as the time of Philo—opinions and speculations on God and the Creation, in part of extraneous origin, were connected with two chapters of the Bible (Gen. i. and Ezek. i.); and their exegesis was the real subject of the esoteric doctrine called after those sections, "Ma'ase Bereshit" and "Ma'ase Merkabah." The chief work of the historian Josephus may also be considered as a source of the Bible exegesis of this time; the first part of his "Antiquities" being a running commentary on the narrative portions of the Scripture. Finally, the Bible exegesis contained in the books of the New Testament must be mentioned. It proceeded from the exegesis current at the time, and belongs to the same class as the other products of the early Haggadah. It became the actual foundation for the new faith, just as the Biblical exegesis, the Midrash of the Palestinian schools, may be considered the basis for the reshaping of Judaism after the destruction of Jerusalem and the Second Temple.

Josephus.

Midrash: Peshaṭ; Masorah.

7. The Bible exegesis of the Tannaim and the Amoraim, which may be best designated as exegesis of the Midrash, was a product of natural growth and of great freedom in the treatment of the words of the Bible. But it proved an obstacle to further development when, endowed with the authority of a sacred tradition in the Talmud and in the Midrash collections edited subsequently to the Talmud, it became the sole source for the interpretation of the Bible among later generations. The traditional literature contains, indeed, an abundance of correct explanations that are in harmony with the wording and the context; and it bears everywhere evidence of a fine linguistic sense, good judgment, and an acute insight into the peculiarities and difficulties of the Bible text. But side by side with these elements of a natural and simple Bible exegesis, of value even to-day, the traditional literature contains an even larger mass of expositions far removed from the actual meaning of the text. In the halakic as well as in the haggadic exegesis the expounder endeavored not so much to seek the original meaning of the text as to find authority in some Bible passage for the concepts and ideas, the rules of conduct and teachings, for which he wished to have a Biblical foundation. To this were added, on the one hand, the belief that the words of the Bible had many meanings, and, on the other, the importance attached to the smallest portion, the slightest peculiarity of the text; hence the exegesis of the Midrash strayed further and further away from a natural and common-sense interpretation.

Again, it must be remembered that the Midrash exegesis was largely in the nature of homiletics, expounding the Bible not in order to investigate its actual meaning and to understand the documents of the past, but in order to find religious edification, moral instruction, and sustenance for the thoughts and feelings of the present. The contrast between the simple natural explanation of the literal sense and the Midrash, that did not feel bound to follow the mere words, was recognized even by the Tannaim and the Amoraim, although their idea of the literal meaning of a Biblical passage may not be allowed by more modern standards. The above-mentioned tanna, Ishmael b. Elisha, even said once, rejecting an exposition of Eliezer b. Hyrcanus: "Truly, you say to Scripture, 'Be silent while I am expounding!'" (Sifra on Lev. xiii. 49). The tannaitic exegesis distinguishes principally between the actual deduction of a thesis from a Bible passage as a means of proving a point, and the use of such a passage as a mere mnemonic device, a distinction that was also made in a different form later in the Babylonian schools. The Babylonian Amoraim were the first to use the expression "Peshaṭ" (פשט) to designate the primary sense, contrasting it with the "Derash," the Midrashic exegesis. These two terms were later on destined to become important features in the history of Jewish Bible exegesis. And, again, in Babylonia was formulated the important principle that the Midrashic exegesis could not annul the primary sense. This principle subsequently became the watchword of the common-sense Bible exegesis; but how little it was known or recognized may be seen from the admission of Kahana, a Babylonian amora of the fourth century, that while at eighteen years of age he had already learned the whole Mishnah, he had only heard of that principle a great many years later (Shab. 63a). Kahana's admission is characteristic of the centuries following the final redaction of the Talmud. The primary meaning is no longer considered, but it becomes more and more the fashion to interpret the text according to the meaning given to it in traditional literature. The ability and even the desire for original investigation of the text succumbed to the overwhelming authority of the Midrash. It was, therefore, providential that, just at the time when the Midrash was paramount, the close study of the text of the Bible, at least in one direction, was pursued with rare energy and perseverance by the careful Masorites, who set themselves the task of preserving and transmitting the pronunciation and correct reading of the text. By introducing punctuation (vowel-points and accents) into the Biblical text, in the seventh century, they supplied that protecting hedge which, according to Akiba's saying, the Masorah was to be for the words of the Bible. Punctuation, on the one hand, protected the tradition from being forgotten, and, on the other, was the precursor of an independent Bible science to be developed in a later age.

Karaite Exegesis.

8. Karaism gave the first impulse toward an independent investigation of the Bible and a denial of the autocratic authority of the Midrash. The "Bene Miḳra" (Sons of the Scripture), as the sect founded by Anan (eighth century) called itself, rejecting the Talmudic tradition, posited as first principles the duty to investigate the Bible itself and to draw from it the foundations for religious knowledge and rules of conduct by means of an exegesis independent of tradition. But Karaism exerted a lasting influence on the further development of Jewish Bible exegesis not so much by its own achievements as by its reaction on the large majority of the Jews who remained faithful to tradition. For undoubtedly Saadia, the great originator of the new Jewish knowledge, was stimulated by the Karaitic movement to enter upon his pioneer activity. He proved his genius as a Bible exegete in the first instance in polemics against the Karaites; and they, in turn, were stimulated by Saadia and his partly polemic, partly positive work, to a richer and more significant activity in their own field than that which obtained before his appearance. The Karaite leaders in exegesis and Hebrew philology were accordingly either Saadia's contemporaries or belonged to the post-Saadian times.

In the century and a half between Anan and Saadia, Karaism produced no exegete of lasting importance. But the numerous exegetes and founders of sects mentioned in clear and unmistakable terms by the Karaites themselves, though they often disapproved of them, demonstrate the vigorous intellectual activity of Eastern Judaism after Anan. Not long after him Benjamin of Nahawendi, one of the fathers of Karaism, applied the allegoric method of exposition in a way reminding one of Philo. Yudghan of Hamadan (Judah the Persian) laid down the principle that the Torah had an exoteric as well as an esoteric significance. Ḥivi of Balkh, of the middle of the ninth century, proposed a rational criticism of the subject-matter of the Bible, at the same time finding two hundred reasons against the authenticity of the Pentateuch, mainly on historical, but also on legal grounds. Most of the Karaite exegetes, either Saadia's contemporaries or following immediately after him, wrote commentaries on the Pentateuch and on other Biblical books, under Saadia's influence and controverting him. Among these may be mentioned Solomon b. Yeroham, Sahal b. Maẓliaḥ, Abu Yusuf Ya'ḳub al-Ḳirḳisani, and the prolific Karaite exegete, Japheth b. Ali, frequently cited by Abraham ibn Ezra.

As the exposition of the sacred text was not possible without philological explanations, the commentaries of the Karaite exegetes contain, of course, many grammatical and lexical explanations. But even here they were not originators, and were only stimulated by Saadia's example and instruction to more penetrating philological research into Hebrew. The earliest Karaite grammarians of whom anything definite is known, as well as David ben Abraham, the earliest Karaite lexicographer, were all subsequent to Saadia. The earlier Karaites contributed to the development neither of Hebrew philology nor of exegesis, which began to flourish about the tenth century among the Eastern and Western Jews still clinging to tradition. But contemporaneously with the later golden age of Rabbinitic exegesis, and influenced by it, exegetic literature flourished among the Karaites, its chief representatives being Abu al-Fara'i Harun (at the beginning of the eleventh century), Jeshua b. Judah (at the end of the eleventh century), Jacob b. Reuben, Levi b. Japheth, Japheth b. Sa'id, and Judah Hadassi (contemporary of Ibn Ezra). At the end of the thirteenth century Aaron b. Joseph wrote a commentary on the Pentateuch ("Sefer ha-Mibḥar"), in imitation of Ibn Ezra and using Naḥmanides; and not long after Aaron b. Elijah, the younger, who was influenced by Maimonides, wrote his commentary on the Pentateuch ("Keter Torah"), a work that worthily ends the exegetic literature of the Karaites.

Period of the Peshaṭ.

Saadia.

9. The new epoch in the history of Jewish Bible exegesis beginning with Saadia may fitly be characterized as "the period of the Peshaṭ." As already mentioned, this phrase signified among the Babylonian Amoraim the primary sense of the Bible text, in contradistinction to its interpretation as found in the Midrash. Now the phrase became the watchword for the exegetes who broke away from the authority of the Midrash and went direct to the Bible text without regard to traditional exegesis. The authors writing in Arabic also use the phrase in this sense; and Ibn Janaḥ calls Saadia the representative of the Peshaṭ. It was a matter of no little importance for the new method of exegesis that its founder held the highest position in the gift of the tradition-loving Jews of his age; for the fact that it was the "Gaon of Sura" who opened up new paths for exegesis facilitated the recognition and further development of this method among the large majority of the Jews who still held by tradition. But the genuine merit of Saadia's labors also assured their success. His most important work in the field of Bible exegesis is his Arabic translation of the Bible, which chiefly aimed to bring about a right understanding of the original text by means of the Arabic reproduction. In his version Saadia leaves nothing obscure. Although he does not paraphrase, he translates freely; disregarding the syntactical character of the original, and connecting the verses and parts of the verses in a way to make them at once comprehensible. Saadia's translation shows the same characteristic as his Bible exegesis, as far as it is known from the extant fragments of his commentaries, and from his chief religio-philosophical work. This characteristic is his rationalism: reason is for him the basis even in Scriptural exegesis; and in accordance with it the exposition of the text must contain nothing that is obscure or that contradicts logical thought. He does not confine himself to reproducing the exact meaning of the single words and sentences, but he takes a general view of the context, the whole chapter, the whole book, and explains their interrelation. Saadia's rationalism, which became the standard for the following centuries, accorded with his belief in the divine origin of the Bible and in the Biblical miracles; these, he thinks, serve as witnesses to the veracity of the Prophets and of Scripture. Saadia's rationalistic exegesis is systematized in his book on religious doctrines and beliefs, "Emunot we-De'ot." This is largely exegetic, and harmonizes the anthropomorphic figures of speech employed in Scripture passages referring to God and His works with philosophic speculation in a way that has become the pattern for later exegetes (see ANTHROPOMORPHISM).

In addition to the authority of reason, Saadia recognizes also the collateral authority of the Scripture itself as a source for exegesis; and as he is familiar with the Bible, he makes copious use of its contents for the purposes of illustration and exposition.

Saadia's third authority is tradition. This he uses in his Bible exegesis as far as he finds necessary and practicable; and he recognizes its influence on exegesis, pioneer of an independent exegesis though he was.

Saadia created Hebrew philology, the most important prerequisite for a sound exegesis. His grammatical and lexical works were as epoch-making for a scientific knowledge of the Hebrew language as his Bible exegesis for the exposition of Scripture, and his religio-philosophic works for all philosophic speculation on the doctrines of Judaism. In these three branches, which all belong in the larger sense to Bible exegesis, Saadia was a pioneer; and his labors were of lasting influence because of the great authority which he rightly enjoyed.

The Geonim.

School of Kairwan.

10. The work of Saadia as the originator of Hebrew philology and of rational Bible exegesis was not carried toward completion in the Orient, where he himself had been active; the leadership in this field passed, soon after Saadia's death, into the hands of Western Judaism, the Diaspora of North Africa and Spain. In the East, as noted above, Saadia's literary activity stimulated in the first instance his Karaite opponents; but he found no successors for his work among the Rabbinite Jews at the academies. It was not until many years after his death that a worthy successor to Saadia was found in Samuel b. Hophni (died 1034), another gaon of Sura, whose Arabic version and commentary on the Pentateuch, as well as his exegesis, closely followed Saadia both in its comprehensiveness and in details. HAI GAON, Samuel b. Hophni's son-in-law (died 1038), the last famous gaon of Pumbedita, devoted himself to Bible exegesis, not only in his lexicon, but also in his commentary on Job. It is characteristic of Hai, who was also a great Talmudist, that he consulted the Koran in order to explain Biblical passages; and once he sent to ask the Syrian Catholicos how a certain difficult passage in the Psalms was explained in the Syriac translation of the Bible. Long before the splendor of the Gaonate faded after Hai's death, Kairwan (in Tunis) had become a seat of Jewish scholarship. The physician and philosopher Isaac ISRAELI, the elder contemporary of Saadia, was active here; he wrote a somewhat diffuse commentary on the first chapter of Genesis. His pupil, Dunash ibn Tamim, was one of the first to introduce the comparative study of Hebrew and Arabic as a fruitful source for Bible exegesis. Already before him another North African, Judah ibn Koreish, had written a work in which he systematically carried out a comparison of Biblical Hebrew with Arabic, Aramaic, and Neo-Hebrew, and warmly recommended, for linguistic reasons, the study of the Targum, that had been neglected. In this curious piece of work, which is still extant, there is also a long excursus on the anthropomorphisms and the anthropopathisms of the Bible, in which for the first time the important tannaite postulate, that the Torah speaks in human language, uses human forms of speech, is applied in a sense which deviated from the postulate's original meaning, but which thereafter became paramount. The oldest representative of Jewish learning in Italy, Shabbethai Donolo, also interpreted this adage (which is not found in Saadia) in the same way; his commentary on the book Yeẓirah (written in 946) was prefaced by an exegetic treatise on the Biblical account of the creation of man. Another eminent exegete, who was honored by posterity as the representative of the Peshaṭ, was the great Talmud commentator Hananeel b. Ḥushiel in Ḳairwan, a contemporary of Hai. Only fragments of his commentary on the Pentateuch and on Ezekiel are extant: he, however, largely admitted Midrashic elements into his exegesis.

11. The most solid foundations of Jewish Bible exegesis were laid in Spain through the development of Hebrew philology, which reached its highest point in this new home of Jewish learning, from the middle of the tenth to the beginning of the twelfth century; although its products belong primarily to the domains of grammar and lexicography, they yet can be included in exegetic literature. It was only after philologic literature had reached its culminating point in the works of Abulwalid ibn Ganaḥ, that the classic literature which marks the golden age of medieval literary activity was enriched by Bible commentaries. In the beginning of this period a commentary on the Psalms by the celebrated Joseph ibn Abitur (Ibn Satanas) is mentioned; but the existing fragments of this commentary show its method to have been that of the Midrash, and reveal nothing else concerning the method of exegesis (see Abitur). The Bible exegesis of the Spanish Jews, which was pursued with unusual ardor, was directed, in the first instance, to the investigation of the Biblical language. From the time of Ḥasdai ibn Shaprut to that of Samuel ibn Nagdela (second half of the tenth to first half of the eleventh century), eminent and gifted scholars vied with one another in placing the science of Hebrew grammar on a firm basis—a basis that has not been overthrown even by the philology of the nineteenth century. They also developed Hebrew lexicography to a point far in advance of all preceding endeavors. Menahem ben Saruḳ's dictionary; Dunash ibn Labraṭ's critical work; the polemics of the pupils of Menahem and Dunash; Judah b. David Ḥayyuj's work, that came like a revelation; Abulwalid's critical work; the literary controversy between him and Samuel ibn Nagdela; and the writings of both as well as of others belonging to their circle; and finally Abulwalid's chief work, composed of a grammatical and a lexical part—all these works mark the development of the philologic literature in Spain. Those of Ḥayyuj and Abulwalid especially furnished a firm basis for a Bible exegesis that, on its linguistic side at least, was free from gross errors and mere guesswork. But all these compositions contain more than simple grammatical and lexicographical contributions to Bible exegesis; and especially Abulwalid's chief work—which is generally designated by its separate parts, "Luma'" (Hebr., "Riḳmah") and the "Book of Roots"—is so rich in multifarious exegetic material that these works may be considered as equivalent to a continuous Bible commentary.

Philology in Spain.

Abulwalid ibn Ganaḥ.

Abulwalid's exegesis draws largely upon rhetoric, and regards the Biblical expressions from the point of view of the metaphors and other tropes familiar to him from Arabic literature. Many textual difficulties he cleared away hermeneutically, being led by his method to the same results as are obtained by modern textual criticism, although he accepted the authority of the Masorah without question. He assumes a sweeping transposition and interchange of letters, and proceeds in many Biblical passages on the theory that the Biblical author himself by mistake put one word for another that he really had intended. He recognizes traditional exegesis as the true and authoritative criterion in much that is unascertainable or doubtful in Scripture: but he does not hesitate to contradict tradition if the natural and literal sense requires it.

12. Nothing has been preserved of Bible exegesis proper in the form of commentaries from the period preceding Abulwalid. His younger contemporary, the poet and philosopher Solomon ibn Gabirol, perhaps embodied in a special work his allegorical exposition of individual Biblical passages; for the examples of his exposition quoted by Abraham ibn Ezra would seem to have been taken from such a work. Ibn Ezra is also the only source of information concerning a curious example of early Pentateuch criticism by one of the grammarians of the eleventh century, Isaac ibn Yashush, who asserted that Gen. xxxvi. 31–43 was written at the time of King Jehoshaphat. Ibn Ezra also controverted another unnamed critic of the same period, who, applying Abulwalid's above-mentioned method, explained almost two hundred Scriptural passages by substituting other words for those that seemed to him incorrect. In the golden age of Jewish culture in Spain two eminent philologists also directed their attention to Bible exegesis proper, parts of whose commentaries, written in Arabic, have been preserved—namely, Moses ibn Gikatilla of Cordova and Judah ibn Balaam of Toledo. Moses ibn Gikatilla endeavored to explain the Biblical miracles rationalistically; while Ibn Balaam attacked these attempts, and otherwise bitterly criticized Ibn Gikatilla's exegesis. Ibn Gikatilla's commentary on Isaiah and on the Psalms, from which Ibn Ezra copi-

Exegetics in Spain.

ously quoted, was the first sustained attempt to explain those books historically. Thus, he refers the predictions of the second part of Isaiah to the time of the Second Temple, and in the same way he assumes that some psalms are exilic. Judah ibn Balaam's commentary on Isaiah is extant in full, and a comparison of this work with Saadia's translation shows the advance made by Bible exegesis during the century lying between them.

Poetry; Philosophy of Religion.

In addition to Hebrew philology, so closely related to exegesis, two special fields of intellectual activity, Hebrew poetry and philosophic speculation, were likewise influenced, and in turn promoted the advance of Bible exegesis during this golden age of Jewish-Spanish culture. Through the introduction of Arabic prosody, poetry had indeed been led into forms foreign to the genius of the old Biblical poetry; but in consequence of the definite knowledge of the forms of speech and the better comprehension of the words of the Bible, the new Hebrew poetry that blossomed into unexpected luxuriance on Spanish soil was marked by a certain classical perfection and finish. Love of poetry and the practise of riming likewise sharpened the perception for the poetic beauties and other literary qualities of Scripture. One of the most renowned poets of this period, Moses ibn Ezra, devoted a long chapter of his work on rhetoric and poetics to Biblical rhetoric; applying to it, in a much more specific way than Abulwalid had done, the terminology and definitions of Arabic rhetoric. As for the relation of the philosophy of religion to Bible exegesis, it is sufficient to mention the names of Baḥya ibn Paḳuda, Solomon ibn Gabirol, Abraham ibn Ḥiyya, Moses ibn Ezra, Joseph ibn Ẓaddiḳ, Judah ha-Levi, and Abraham ibn Daud. The works of these thinkers embody the principle, first logically enunciated by Saadia, that on the supreme questions of religious knowledge the Scriptures teach nothing beyond human reason. Allegory was used only to a limited extent. As a result of this conviction of the necessity for agreement between the postulates of reason and the Bible, a high-handed freedom of treatment of the Biblical word became current, that was often imposing in its daring. In consequence the elements of a new form of Midrash found their way into Bible exegesis, made subservient to philosophic speculation. The Peshaṭ exegesis, which had been freed from the fetters of the early Midrash contained in the traditional literature, found itself now confronted by a new enemy—the philosophic Midrash.

The "Darshanim."

13. While the system of the Peshaṭ was nearing its complete development in the countries influenced by Arabian culture, the Midrashic exegesis had remained paramount among the Jews of Christian countries. The Midrash literature was enriched by new compilations; and the exegetes also, striving for a certain independence, found the material for their commentaries mostly in the traditional literature. These exegetes are called "Darshanim" in the history of Jewish literature. To them belong Moses ha-Darshan in Narbonne (middle of eleventh century), Tobiah b. Eliezer in Castoria, Bulgaria (end of eleventh century), and Menahem b. Solomon in Rome (first half of twelfth century). Here must also be named the compiler of the "Yalḳuṭ Shime'oni," the most complete Midrash compilation on the whole Scripture, dating perhaps from the beginning of the thirteenth century. In this field represented by the Darshanim there arose quite unexpectedly in northern France a school of Bible exegesis, which, in entire independence of the Spanish-Arabian school, endeavored to search into the Peshaṭ, the simple, natural, primary sense, in avowed contrast to the Midrash, without, however, severing its connection with the latter. The founder of this school was Solomon ben Isaac (Rabbi Solomon Yiẓḥaḳi), commonly called Rashi (died 1105); his commentary on the Talmud is for all time an indispensable aid to the study of that work; and his commentary on the Bible, especially on the Pentateuch, has never been surpassed in enduring popularity and large circulation.

Rashi.

Rashi's commentary has in many respects the character of a compilation of Midrash collections; but he takes from the traditional literature chiefly those explanations that he can best harmonize with the wording and the connection of the Biblical text; and he expressly rejects those that he can not bring into such agreement. Besides this, he endeavors to arrive independently at the meaning of the Scriptural words, guided by the Talmudic principle, everywhere emphasized, that no Biblical verse may be deprived of its plain, self-evident meaning, no matter what varied interpretations are put upon it by the Midrash. In addition, he pays constant attention to the linguistic side of exegesis; showing an acute and often intuitive sense of language, and supplementing by these means, as well as by his complete command of diction, the inadequacy of his sources.

Joseph Ḳara and Samuel b. Meïr were still more pronounced representatives of the Peshaṭ. Joseph Ḳara was a nephew of Menahem b. Ḥelbo (an elder contemporary of Rashi, who even before him had followed the same tendency); the title "Ḳara" (compare "Miḳra," Scripture), found already in the Talmud, marks him as a Bible exegete. He was a prolific writer, and more independent in his exegesis than Rashi. He was given to postulating general rules of interpretation, and to explaining the chapters of the Bible as a whole. Nor did he hesitate to differ from tradition in regard to the time of composition of the Biblical books; ascribing, for instance, the Book of Samuel, on account of I Sam. ix. 9, to a later period than that to which it was generally assigned. He posited the principle that Scripture must be interpreted by itself, without the help of the traditional literature. This principle was especially applied by Rashi's learned grandson, Samuel b. Meïr, whose commentary on the Pentateuch may be regarded as the foremost production of the exegetic school of northern France.

Exegesis in Northern France.

His brother, Jacob Tam, wrote no Bible commentary, but showed interest and aptitude for linguistic research in Hebrew in his Responsa, in which he defends Menahem ben Saruk against Dunash ibn Labraṭ. Jacob Tam's pupil, Joseph Bekor Shor, was the last important representative of the Peshaṭ of northern France. His commentary on the Pentateuch is marked by acumen and deep insight into the continuity of its meaning. Anticipating later Biblical criticism, he assumed duplicate accounts in the Pentateuch. The Bible exegesis of the school of northern France, which was supplemented neither by scientific research into the Hebrew language nor by mental training in philosophical or other scientific studies, may be designated as the exegesis of plain, clear common sense; its products are in many ways equal to those of the Spanish-Arabian school.

14. All Biblical lore in the countries of the Mohammedan culture, which developed in such fulness after Saadia, was confined, on account of the language in which it was written, to those circles where Arabic was spoken. Abraham ibn Ezra was the first one to disseminate it on a large scale in the Christian countries of Europe. A mature man, who had absorbed the whole culture and learning of Spanish Judaism in the flower of its intellectual development, he left his home and spent nearly three decades (1140-67) in different cities of Italy, Provence, northern France, and England; everywhere, as he says, "writing books and revealing the secrets of knowledge." The chief products of his astonishing many-sided activity are his exegetic works. His commentaries, although written far away from Spain, are the most important product, in the field of Bible exegesis, of the golden age of Spanish Judaism, not only on account of the opinions of many representatives of this period, which are therein cited and disseminated, but because their whole spirit, import, and material are the outcome of the extraordinary learning and insight that he took from home with him. These commentaries, written in Hebrew, also display throughout Ibn Ezra's originality and his mastery over both subject and material; and they are especially attractive not only on account of their form—combining clearness and vivacity, wit and profundity—but also because of the author's consummate handling of the Hebrew language, which had already been abundantly displayed in his classical poems.

Abraham ibn Ezra.

Ibn Ezra's Pentateuch commentary has always been, side by side with Rashi's, one of the most popular works of Jewish exegetical literature, and both in their turn became the subjects of numerous supercommentaries. Ibn Ezra explained his own exegetical method in his introduction to the Pentateuch commentary by characterizing and criticizing the various methods employed hitherto by the exegetes, such as the exegesis of the Geonim, the exegesis prevalent in Christian countries depending on the Midrash, the exegesis of the Karaites, hostile to tradition, and the typological-allegorical exegesis customary among Christians. As regards Ibn Ezra's conception of the relation between the traditional and the Peshaṭ exegesis, he sees in the traditional exegesis—derived by the oral teaching (Halakah) from the words of the Biblical text, and which so often contradicts the natural literal sense—not an actual exegesis of the Bible text, but only a "suggestion," a "reminder" (mnemonic device). In the same way he distinguishes between the "word of the Derash," the homiletic manner of haggadic exegesis, and the Peshaṭ, by which only the literal signification of the Biblical text is arrived at. He knows nothing of the principle of the multiplicity of meanings of Scriptural words, which the leaders of the exegetic school of northern France acknowledged in order to justify the haggadic Midrash. Through this clear separation of the Peshaṭ from the Derash he accords only a limited place in his exegesis to the new Midrash, which introduces philosophy into the Bible text. He connects his philosophic speculations, either in longer passages or in brief allusions, with the explanation of the names of God (especially the Tetragrammaton), of the divine attributes and the Biblical precepts, and with single suitable passages. Ibn Ezra's endeavors to defend the Biblical text against everything that might injure its integrity, may also find mention here. But he is nevertheless regarded, since Spinoza wrote his "Tractatus Theologico-Politicus," as the precursor of the literary Pentateuch criticism of to-day. To judge from certain allusions, rather than from positive statements, he seems to have held that the Pentateuch, although undoubtedly composed by Moses, received in later times a few minor additions. He also obscurely alludes to the later origin of Isaiah, ch. xl.-lxvi.

His Exegetic Method.

Ibn Ezra's contemporary, Joseph Ḳimḥi, was similarly active in Narbonne as propagator of the Spanish-Jewish science; he also was of Spanish origin and knew Arabic. He wrote a Hebrew grammar in Hebrew, and also commentaries on different Biblical books. His work was continued by his sons Moses and David (see Ḳimḥi, David). The fame of the latter very soon eclipsed that of the father and brother. In the introduction to his chief exegetical work, the commentary on the Prophets, he based the privilege, or rather the duty, of exegetic research on religious motives. The Ḳimḥis do not differ from Ezra in their search for the natural meaning of Scripture; and they, too, consider grammar and rationalism to be essential in exegesis. David Ḳimḥi, whose didactic talents appear in his grammar as well as in his Bible commentary, recognizes also the Midrash exegesis, as well as Maimonides' philosophic opinions; and, like the latter, he does not hesitate to pronounce certain Biblical stories to be visionary accounts. His commentary on the Psalms is especially interesting by reason of its polemics against Christian exegesis.

The Ḳimḥis.

15. It fell to the lot of Moses Maimonides, Ibn Ezra's younger contemporary, to represent, like him, the high intellectual culture of the Spanish Jews outside of Spain, and to bring it to a fuller development than Ibn Ezra. Living in the midst of the Arabian culture in North Africa and in Egypt, his activity was a natural continuation of the Jewish intellectual impulse which was so highly developed in Moorish Spain. But his influence extended far beyond the boundaries of the Arabic language; and he became a teacher for the whole Diaspora, as no one had been since the days of the Geonim. Maimonides' activity marked an epoch not only in the history of Judaism, but also in that of Jewish Bible exegesis. He enriched exegetic literature by no

Moses Maimonides.

commentary, but his chief philosophical work, written in Arabic, the "Moreh Nebukim" (Guide of the Perplexed), contains much exegetic material. The "perplexed" for whom the work was to be a "guide" are those readers of Scripture who are harassed by doubts because of the contradictions between the Biblical text and the postulates of rational speculation. The "Moreh Nebukim" strives to clear away such contradictions by a correct explanation of the text. The author, therefore, places at the head of his work a number of explanations of Biblical expressions to serve as a key for ascertaining the true meaning of Scripture.

A fundamental principle of Maimonides' Bible exegesis is that the Bible makes use of all the resources of language that have been invented by the human mind, in order to reveal or to conceal thought; and in his expositions he almost devotes more space to what the language of the Bible conceals than to what it has undisguisedly made known. He holds that the metaphoric and the figurative modes of speech, as forms of expression, are founded in the very nature of prophecy, and that to this fact is due their important place in Scripture. In regard to the statements of Scripture concerning the Deity, the old postulate of the human mode of speech of the Bible becomes with Maimonides an important canon, by which everything unsatisfactory and obscure is removed from the idea of God. The ruling principle of his exegesis is the assumption of the exoteric and the esoteric sense. The "secrets of the Law" hidden in the Biblical words are found by investigation into the esoteric meaning. But such secrets, as sought by Maimonides, have nothing to do with mysticism; he undertakes the investigation with absolute rationalism, as may be seen particularly in his explanation of certain Bible stories and his exposition of the reasons for the Law. He finds the teachings of the Aristotelian physics and metaphysics in the chapters on Creation (Gen. i.) and in that of the Heavenly Chariot (Ezek. i.). His rationalism, however, halts at the facts of prophecy and of the Bible miracles, though here, too, rational investigation comes into play. One of his most original and daring aids to exegesis is evolved by his doctrine concerning prophecy—namely, the theory of visions—whereby he transfers a number of Bible stories from the realm of fact into the realm of psychic experience. The principle of the exoteric and the esoteric sense of Scripture leads him to allegorical exegesis, with the theory of which he prefaces his "Guide"; but his allegory remains within the bounds prescribed to it by his rationalism on the one hand, and by his faith in tradition on the other. Yet there appear certain traces of that extensive allegorization that not long after him appears among his disciples, as, for instance, in his exposition of Canticles, of the adulterous woman in Proverbs, and of the prologue to Job.

Philosophical Exegesis.

16. Through Maimonides' "Guide of the Perplexed," which, even during his life, was circulated in Hebrew translations, Aristotelian philosophy found an abiding-place in Jewish thought, and became a chief factor also in Bible exegesis. During the following three centuries many Bible commentators were primarily concerned with finding the tenets of philosophy in Scripture. Especially the Biblical Wisdom books—Proverbs, Ecclesiastes, and Job—lent themselves to such study; so also did the Song of Solomon, an ancient and a most fruitful field for allegorization. Philosophic allegory had already been applied to the last-mentioned book, and rejected by Abraham ibn Ezra. Maimonides' pupil, Joseph ibn Aḳnin, now wrote a philosophico-allegoric commentary on it; Samuel ibn Tibbon, the translator of Maimonides' work, commented on Ecclesiastes; his son Moses, on the Song of Solomon. Samuel ibn Tibbon's son-in-law, Jacob b. Abba Mari Anatolio, collected his sermons on the pericopes of the Pentateuch in a work entitled "Malmad ha-Talmidim," which is the most important monument of the philosophic Scriptural exegesis current in Provence in the century following Maimonides—an exegesis that allegorized even Biblical personages in the manner of Philo. This allegorization, which detected abstract philosophic concepts and postulates in the personages and occurrences of the Pentateuch stories, and which even forced itself into the Sabbath sermons of the preachers, led at the beginning of the fourteenth century to the second great controversy between the Maimonists and anti-Maimonists in Provence and northern Spain. This controversy, suddenly terminated by an external event, did not bring philosophic Bible exegesis to an end. Its most eminent representative was Levi ben Gershon (died 1344), a strict Aristotelian, who wrote commentaries on most of the Biblical books. In those on the Pentateuch and the historical books he exhaustively summed up the ethical and other maxims (practical applications) deducible from the Bible narrative. The philosophic commentary on the Pentateuch by Nissim b. Moses of Marseilles, written at the beginning of the fourteenth century, was less well known. A similar commentary was written by Samuel Ẓarẓa of Valencia in the fourteenth century. The last great exegetic work written in Spain before the expulsion was the "'Aḳedat Yiẓḥaḳ" (Offering of Isaac) by Isaac Arama, consisting of sermons in a philosophic setting and partly philosophical in nature. The commentaries of Isaac Abravanel also give a large place to religio-philosophic discussion.

17. Side by side with the philosophical mode of exegesis another was developed, from the beginning of the thirteenth century, that was based, like it, on the fundamental conception that there must be a deeper meaning in the Scriptural word than is implied in the literal sense. This conception, together with the assumption that all truths about God and creation, the universe and man, which are cognizable by the human mind, and which have been so cognized, must be found in Scripture, was most clearly laid down in the introduction prefixed by Moses Naḥmanides to his thoughtful commentary on the Pentateuch (written about 1268). Although the mystical exegesis is here secondary, and confined to a small number of guarded allusions, the new esoteric doctrine is here first openly promulgated, and powerfully supported by the authority of the

Mystic Exegesis.

writer, who was one of the foremost personalities of his time. This doctrine, "Ḥokmah Nistarah" (Secret Wisdom), was first formulated in Gerona, Naḥmanides' home. It was also called "Cabala" (*i.e.*, tradition). In its chief tenets, consisting of originally formulated philosophic theorems, such as the neo-Platonic doctrine of emanation, it connected with the remnants and reminiscences of a much earlier mysticism.

Contemporaneously with these beginnings of the Cabala in northern Spain, another kind of mysticism connected with Scripture arose in Germany, in the writings of Eleazar b. Judah of Worms, his exegetic method consisting in the interchange and combination of the letters of the Scriptural text, and in computing their numerical value (see GEMATRIA). The exegetic method of the Cabala is founded on the foregoing, combined with the allegoric (and also typologic) exegesis. Cabalistic exegesis is given full recognition, together with the other methods of exegesis, in the Pentateuch commentary of Baḥya ben Asher of Saragossa (1291), which became one of the most popular exegetic works. Four methods of exegesis are enumerated in the introduction to this commentary, each of which is to be applied to Scriptural passages: (1) the way of the Peshaṭ, (2) the way of the Midrash, (3) the way of Reason (*i.e.*, philosophic exegesis), and (4) the way of the Cabala, "on which the light dwells—a path for the soul that refuses to be illumined by the light of life." Contemporaneously with Baḥya's Pentateuch commentary there also appeared in Spain a book which was destined to become the basic work of the Cabala, and which owed its unprecedented success to the fact that it purported to be a relic of the earliest mysticism and a work of the same school of sages that had produced the old traditional works, the Mishnah, the Talmud, and the Midrash. This book is the ZOHAR, in its form a running Midrashic commentary on the Pentateuch, but interrupted by many and various digressions, and supplemented by original additions. Like Baḥya b. Asher's book, but on a different basis, the Zohar also assumes four kinds of exegesis, or rather a fourfold meaning: Peshaṭ, Remez (allusion, typological sense, allegory), Derash, and Sod (secret, mystical sense). In formulating this doctrine of a fourfold meaning, the Christian mode of exegesis (which was well known to the Spanish Jews) probably served as a model; in this the fourfold sense (historical or literal, tropological or moral, allegorical, and anagogical) had long since been formulated (by the Venerable Bede in the eighth, and by Rhabanus Maurus in the ninth century). The initial letters of the words Peshaṭ, Remez, Derash, Sod, forming together the word "Pardes" (פ׳ר׳ד׳ס), became the designation for the fourfold meaning, in which the mystical sense given in the Cabala was the highest point. The tenet of the fourfold meaning and its designation, "Pardes," have been erroneously ascribed to the beginning of the Jewish Bible exegesis, the Tannaite time, on account of the expression "Pardes" (pleasure garden), which is used metaphorically in an account of the mysticism of the Tannaites (Ḥag. 14b); but in point of fact the designation "Pardes" marks the arrest, for a long time, of the development of the Jewish Bible exegesis.

"Pardes."

From the Thirteenth to the Fifteenth Century.

18. The four methods of Scriptural exposition, as applied side by side by Baḥya b. Asher in his Pentateuch commentary, characterize all the numerous works in the field of Jewish Bible exegesis during the three centuries following Maimonides. The Peshaṭ was more or less recognized and appreciated above the other methods, and even the Zohar borrowed much from Rashi and Ibn Ezra, both of whom were more and more regarded as the greatest exegetes, their Pentateuch commentaries being frequently commented upon. But new commentaries in harmony with the Peshaṭ were also written. The Peshaṭ did not supplant the Midrash; and side by side with it the ancient sources of the traditional exegesis were held in high estimation and employed. The extent to which the philosophic mode of exegesis was used has already been stated; henceforward the mystical exegesis also gained in favor. An Italian, Menahem of Recanate (beginning of the fourteenth century), wrote a cabalistic commentary on the Pentateuch, in which the Zohar was freely drawn upon. The chief personalities of the exegetic literature of this period (which ended with the expulsion of the Jews from the Pyrenean peninsula), that have not been mentioned above, are as follows: In the East, Tanḥum Yerushalmi (thirteenth century) wrote a commentary in Arabic on the greater part of the Scripture, prefixing to it a general and pithy introduction. Eleazar Ashkenazi, otherwise unknown, who calls himself a son of the Babylonian ("Bagdados") Nathan, wrote in 1364 a commentary in Hebrew on the Pentateuch, that contains original views, and rationalistically explains away many miracles. Exegetic writings of this period, both from southern Arabia and by the Persian Jews of Central Asia, have recently come to light. Simon b. Ẓemaḥ Duran (1361–1444) of North Africa wrote a commentary on Job. Jacob b. Asher (1280–1340) of Spain wrote a commentary on the Pentateuch, of which the interpretations of letters and numbers are well known. Samuel b. Nissim wrote at the same time in Toledo commentaries on Job and on other books, which he himself called "Midrash." The prolific and many-sided Joseph Caspi (d. 1340) of southern France must also be mentioned, who explained many of the Hagiographa, as also Isaac Nathan b. Kalonymus, author of the first Hebrew Bible concordance (*c.* 1440). In northern France a lively interest in Bible exegesis was sustained, especially by the polemics against the Christian manner of exegesis. The TOSAFISTS, so-called, who continued the labors of Rashi and his grandsons in the field of Talmudic study, contributed isolated remarks also to Bible exegesis, especially to the Pentateuch, which were collected in different compilations. Hezekiah b. Manoah and Eliezer of Beaugency wrote special commentaries. In Germany may be mentioned Menahem b. Meïr of Speyer, author of a cabalistic commentary on the Pentateuch (fifteenth century), and Lipmann of Mühlhausen in Prague (about 1400), author of the "Niẓẓaḥon." In

Italy a voluminous exegetic literature was developed in the second half of the thirteenth and the early decades of the fourteenth century, its representatives being Isaiah of Trani the Younger, Benjamin b. Judah, Zerahiah b. Isaac b. Shealtiel, and especially the poet Immanuel b. Solomon of Rome. The last-named wrote commentaries on the greater part of the Scriptures, mostly of a grammatical and rationalistic nature, but also philosophic or mystico-allegoric. He also wrote an interesting text-book on Biblical hermeneutics. From the fifteenth century may be mentioned: Aaron b. Gerson Abulrabi of Catania in Sicily, who, in a supercommentary on Rashi, propounded very original and often daring expositions; Johanan Alemanno, author of a philosophic-cabalistic commentary on the Song of Solomon; and Judah Messer Leon, who applied Cicero's and Quintilian's rhetoric to the Bible.

Sixteenth Century to Middle of Eighteenth Century.

Moses Alsheik of Safed.

19. The days of the Epigoni, as the centuries after Maimonides may be called, were followed by an epoch of stagnation and degeneracy which ended with the appearance of Moses Mendelssohn (middle of the eighteenth century). This epoch was characterized by a decline in general culture and science, by a one-sided study of the Talmud that became more and more involved in an extravagant dialectic, by a minute and servile development of the ritual law, and by the increasing authority of the Cabala. Although many Bible commentaries were added to the exegetic literature, nothing of real importance and lasting influence was produced. Isaac Abravanel, standing on the threshold of this epoch, still belonged to the preceding period. He was a Bible exegete on an extensive scale, who prefaced his commentaries on the several books with introductory remarks, made use of his experience as a statesman in explaining the historical books, and also drew upon Christian exegesis. In Italy, where Abravanel completed his commentary, Elijah Levita also wrote his epoch-making work on the Masorah, "Masoret ha-Masoret." There, too, Solomon Norzi wrote his important Masoretic commentary on the Bible, and Menahem Lonsano also displayed activity in the same direction. Italy was the home of Azariah dei Rossi, who treated of questions of Biblical chronology in his critical work, "Me'or 'Enayim," and of Abraham de Portaleone, the first Biblical archeologist in Jewish literature. Commentaries were written in Italy by Obadiah Sforno; Reuchlin's teacher; Joseph b. David ibn Yaḥya; and Moses Ḥefeẓ (Gentile), whose interesting Pentateuch commentary draws also upon the principles of secular science. New centers of Jewish learning were formed in the East through the numerous settlements of the exiles from Spain: Solomon b. Melek of Constantinople was here the representative of the Peshaṭ, though his work, "Miklal Yofi" (Perfection of Beauty), contains mostly extracts from Ḳimḥi. Moses Alsheik of Safed (sixteenth century) was the most prolific exegetical author, writing exhaustive commentaries—partly homiletic in character—on most of the Biblical books. Other Eastern Bible commentators of the sixteenth century are: Joseph Taitaẓak, Isaac b. Solomon Kohen, Baruch ibn Yaish, Samuel Laniado. In Holland in the seventeenth century Manasseh ben Israel wrote a work in Spanish, "El Conciliador," to reconcile the contradictions in the Scriptures. Isaac Aboab wrote a Spanish commentary on the Torah, Isaac Akosta (1722) one on the Former Prophets. Baruch Spinoza had already passed beyond the pale of Judaism when he laid down in his "Tractatus Theologico-Politicus" his opinions on prophecy and on the origin of the Biblical books, opinions that became momentous in Biblical learning (see BIBLE EXEGESIS, MODERN AND NON-JEWISH).

Hiddushim and Peshatim.

Among Jews using the German language those of Poland were the leaders during this period. The study of the Talmud was pursued by them with renewed ardor, and gradually supplanted the study of the Bible itself. Abraham b. Judah Kremnitz (end of sixteenth century) wrote a commentary on the Prophets and the Hagiographa. The physician Eliezer Ashkenasi (died 1586 in Cracow), a man of philosophic attainments, explained the Pentateuch narrative in a special work ("Ma'ase Adonai"). The extravagant attempts to find a multiplicity of interpretations for one Biblical passage are characteristic of this Polish exegesis. Nathan Spira (1630) explained the words of Deut. iii. 24 *et seq.* in two hundred and fifty ways; Elijah Oettinger, in three hundred and forty-five ways. The mania for finding the new and unexpected, fostered by the pilpulistic methods of Talmudic study, thus dominated Bible exegesis and produced the literature of the "ḥiddushim" (novellæ) and "peshaṭim" (explanations) on the Pentateuch, that flourished especially in the eighteenth century.

The picture of the exegetic literature of this period would be incomplete without a reference to the Bible translations that it produced. Mention may be accordingly made of Abraham Usque's Spanish version (Ferrara, 1553), Jekuthiel Blitz's Judæo-German version (1676–78), revised by Josel Witzenhausen. The picture is completed in another direction by the literature of the "derashot" (sermon), that flourished especially in this period. The chief material for them was taken from the haggadic or cabalistic literature, the Bible text being used only in connection with it.

20. The new intellectual epoch in the history of Judaism inaugurated by Moses Mendelssohn marks also an epoch for Jewish Bible exegesis. Mendelssohn exerted his great and reshaping influence on his German coreligionists and on the German-speaking Jews of other countries in the first instance through his translation of the Pentateuch, that acted as a mighty and enduring leaven for culture. But this influence was equaled by his importance as an exegete. The Hebrew commentaries on the Pentateuch written by him and his collaborators mark the return to the simple, natural Bible exposition, the restitution of the Peshaṭ to its rights. Mendelssohn himself referred to the classic writers of the Peshaṭ, Rashi, Samuel b. Meïr, Ibn Ezra, and Naḥmanides, as models for true Bible exegesis. Hand in hand with this exegesis went the renewed study of Hebrew grammar and the formulation of a new Hebrew style aiming at correctness and simplicity. Mendelssohn, who combined in his person Judaism and Jewish scholarship with the intellectual culture—the literary, esthetic, and philosophic learning—of his time, combined in his Bible interpretation the traditions of Jewish exegesis with the elements of that developing in new directions outside of Jewish circles. The Biblical science of Protestant Germany that became paramount in the second half of the eighteenth century strongly influenced this reawakening Jewish exegesis even in Mendelssohn; and subsequent generations could not escape its influence.

Mendelssohn and His School.

The work of Mendelssohn, who had issued (1773) a Hebrew commentary on Ecclesiastes even before the appearance of his version of the Pentateuch (1783), and who had published also a German version of the Psalms, was sedulously continued after his death. His collaborators on his Pentateuch commentary (written in Hebrew) were the eminent grammarian Solomon Dubno, the linguist and poet Naphtali Hartwig Wessely, Aaron Jaroslaw, and Herz Homberg. From its name, "Bi'ur" (exposition), the authors who similarly translated and annotated the other books of the Bible were called BIURISTS. These men were in a way the rediscoverers and reconquerors of the Bible; for large sections of European Judaism that had become estranged from the Bible, through a one-sided study of the Talmud and through the decline of culture, had lost the perception for its simple meaning and its literary beauties. The first Biurists were, like the above-mentioned collaborators on the Pentateuch commentary, pupils and personal followers of Mendelssohn, and they were joined by other enthusiastic disciples in the early decades of the nineteenth century. Next to Germany, Austria was the home of the Biurists' activity. The most complete editions of the whole Bible, with German translation printed in Hebrew characters, and Hebrew commentary by different Biurists, appeared in Vienna and (in a different arrangement) in Prague, and were frequently reprinted with new additions by later authors. These Biurist Bibles, that perpetuated Mendelssohn's work on the Pentateuch, were important factors in the process of intellectual transformation taking place among a large section of European Judaism in the first half of the nineteenth century. The activity of the Biurists prepared the soil for the new science of Judaism as the most important fruit of that transformation.

The Biurists.

21. Moses Mendelssohn and the Biurists had provided for students and teachers, as means for the revived study of the Bible, translations printed in Hebrew characters, and commentaries, written in Hebrew, on the Biblical books; to these were added in the course of the nineteenth century similar works on the Bible, with the substitution, however, of German type in the translations, and with German annotations in conformity with the progressing conditions of the time. These works, consisting of the mere translation, or sometimes offering longer or shorter comments, were primarily intended not for specialists, but for general students of the Bible, for the school, and for the congregation. But they were compiled chiefly by specialists, who continued the activity of the Biurists, while paying due regard to the advances in Biblical science. One of these translations is known by the name of Leopold Zunz, who edited the versions of the several books by H. Arnheim, Michael Sachs, and J. Fürst; translating himself one book only, that of Chronicles. Besides this, similar works by Herxheimer, Philippson, and J. Fürst were widely circulated. Aside from these works, dealing with the entire Scriptures, single portions also were thus treated; and commentaries were also written in Hebrew after the manner of the Biurists, the latter especially in eastern Europe.

Nineteenth Century.

Similar aims were pursued outside of Germany; and translations of the Bible by Jews and for Jews were produced in the different European languages. The French, English, Italian, Dutch, Hungarian, Polish, and Russian Jews thus received their own translations of the Bible; the necessity for these increasing toward the middle of the nineteenth century with the growing number of the Jews unable to read the Bible in the original text. Among the non-German versions the Italian one by S. D. Luzzatto deserves especial mention, as well as the French work of Samuel Cahen, which contains, in addition to the translation, a commentary and valuable literary notes.

Although the endeavors sketched above were intended primarily for the unlettered, Bible exegesis as a scientific study was included in the science of Judaism, which rapidly advanced from the second decade of the nineteenth century. It reached, however, no important independent development. The leaders of Jewish science contributed little to that great progress in Bible exegesis and its auxiliary studies which was one of the signal achievements of the last century. Various causes contributed to this. In the first place, the history and literature of the Judaism of the post-Biblical and ensuing periods engaged the creative and pioneer activity of Jewish scholars; since in this department there was little collaboration to be expected from other quarters. Moreover, during the last period Jewish science suffered from the lack of that organization which the universities and learned societies offered to the development and steady pursuit of the various branches of human knowledge, and by means of which Biblical science attained to its eminent position and flourished so richly in German Protestantism. The founding of the rabbinical seminaries was an insufficient substitute; and the lack of organization referred to above was acutely felt in the whole field of Jewish science, and stood in the way of a methodical and continuous cultivation of the correlated branches of Bible study. At the same time the number of Jewish scholars who devoted themselves to study voluntarily dwindled, for well-known reasons; while the rabbis of the communities, who by virtue of their position were naturally students, were increasingly diverted from Jewish studies by the changing conditions and the various duties imposed by their office.

Finally, many Jewish scholars hesitated to apply ruthlessly the higher criticism to the Scriptures, especially to the Pentateuch, lest they should offend the traditions that formed part and parcel of the whole religious life of Judaism. Although the Jewish contributions to Bible study during the nineteenth century were limited in number, for the reasons mentioned above, yet some of the founders and leaders of the new Jewish science turned their attention also to Bible exegesis and to the multiform Biblical problems. Zunz, Rapoport, and Nachman Krochmal dealt with various questions of Biblical criticism with much acumen. Geiger, in his chief work, "Urschrift und Uebersetzungen der Bibel," is extremely radical. In his lectures he left an introduction to the Scriptures, which, however, is but a sketch. Graetz, after finishing his history, which included also Biblical times, devoted himself entirely to Bible exegesis, especially to textual criticism. Luzzatto was a highly gifted Bible exegete, with a rare insight into the niceties of the Hebrew language. Many other scholars could be mentioned who contributed important works to Biblical isagogics, Biblical archeology, textual explanations, and criticisms. It is primarily due to Jewish scholars that the works of the early Bible exegetes were recovered from obscurity and appreciated as aids to modern exegesis. Indications are not lacking that Jewish scholars increasingly devote their attention to Biblical science; leading to the hope that the sons of Jacob will duly take part in the researches into the sacred documents of Israel.

——**Modern and Non-Jewish:** The history of modern Bible interpretation divides itself best into: (1) the Reformation period, to the end of the sixteenth century; (2) the Confessional or Dogmatic period, to the middle of the eighteenth century; and (3) the Critical period, to the present time.

Impulses, Principles, and Results.

The influences that have chiefly promoted modern exegesis are: broadening culture; the art of printing; theological discussion; philological progress; historical research; discoveries in Bible lands; philosophical conceptions of the order of revelation; the doctrine of human development, or evolution. The chief notes of the progress of modern exegesis are: changes in methods of Biblical study, in principles of interpretation, and in theories of the degree and nature of Scriptural authority. The main practical results are seen in: a redivision of the contents of the Bible; changed opinions as to the authorship of many of the books; altered views as to their unity or literary form; a rearrangement of the books or their contents in the true order of their composition; and a comparative treatment of the Biblical institutions in the order given by the rearranged texts.

1. Period of the Reformation: The chief pre-requisite to a progressive study of the Old Testament was a general knowledge of the language in which it was written. The impulse to the study of Hebrew in the influential centers in Europe came in part from a deeper interest in religious questions. The study of Greek, as the classical idiom of science and philosophy, seemed to involve the study of Hebrew as the ancient language of the true religion, in which, moreover, the greater portion of the current Christian Scriptures was originally written. It was naturally from Jewish scholars that most help could be obtained: Reuchlin (1455-1522), the founder of modern Hebrew science, though not the earliest Christian Hebraist, was as a humanist second only to Erasmus in influence. He obtained nearly all his knowledge of the language from his Jewish teachers, and the grammar contained in his epoch-making "Rudimenta Linguæ Hebraicæ" (1506) was based chiefly on David Ḳimḥi. His friend and (in these matters) his disciple, Martin Luther, was the first great Christian exegete: his University of Wittenberg had been founded in 1502 partly for the purpose of promoting the new learning.

Exegetical Merits of the Reformers.

What distinguished Luther, Melanchthon, Calvin, and the other reformed expositors was their fundamental exegetical principle that Scripture is to be taken in its literal sense. Thus, Luther's "Observationes in Psalmos" (1519) has, on this ground, been called the first scientifically exegetical book of the Reformation. In his comments on Gen. iii., xv., and xxx. he deals severely with the time-honored allegorizing method. In Calvin's commentaries on Isaiah (1551) and the Psalms (1564) the high-water mark of the exegesis of the sixteenth century is reached; the advance being shown chiefly in an increased regard for philological accuracy and for the historical setting of the sacred writings. Thus, though the Reformers were themselves no great Hebraists, their expositions are the most enduring mark of the revival of Hebrew and Biblical learning in their time.

A surer grammatical and historical exegesis was made possible in this age by the publication of the original texts of Scripture. From the earliest days of the art of printing the text of the Old Testament had been circulated under Jewish auspices; and soon the current Vulgate version was compared with the original, the first simple step in that process of textual criticism which has been the surest foundation of modern interpretation. Two great undertakings are the monuments of this era of text publication. One was the Complutensian Polyglot of Cardinal Ximenes (1514-17) in six volumes, four of them devoted to the Old Testament, the Septuagint, the Targums, and the Vulgate appearing side by side with the original. The other was the Hebrew and Rabbinical Bibles of Bomberg (Venice, 1518-26), in which the chief help was given by R. Jacob ben

Ḥayyim of Tunis. Finally, the publication of texts facilitated the translation of the Bible into the vernaculars of the various countries of western Europe, upon the basis of the Hebrew and not of the long dominant Latin Vulgate—a process which was itself an exercise in the exegetical art.

Effect of Dogmatics.

2. Period of Confessionalism or Dogmatism: It can not be said that any great advance was made in the understanding of the Bible during the following century and a half. It is true that neither the study of Hebrew nor that of the sacred text was neglected; but the ends sought were mainly theological, or rather confessional, in the narrowest sense. There is only here and there a trace of any desire to find out the inner connection of the parts of Scripture and the progress of its teaching from step to step in the development of revelation. In Germany, especially, little advance is to be noted until the middle of the eighteenth century. There theological controversy and the framing of sectarian symbols were most assiduously practised; and it is a melancholy indication of the barrenness of such pursuits that there is no evidence in the whole history of exegesis that the larger understanding of the Bible has ever been promoted by dogmatic discussion.

Probably the most valuable work of these later "Middle Ages" of Christianity was the labor that went to the making of the great polyglots. That of Cardinal Ximenes, referred to above, had already in the sixteenth century been followed by the Antwerp Polyglot (1569–72), four of whose eight volumes were devoted to the Old Testament. This work, executed under the auspices of Philip II. of Spain, was superintended by the learned Spaniard Arias Montanus. Its improvement upon the Complutensian is shown partly in its greater accuracy and partly in its fuller reproduction of the Targums.

The Polyglots.

An essential advance is shown in the Paris Polyglot (1629–45), published under the auspices of the advocate Le Jay, in which were given the Syriac and Arabic versions and the Samaritan Pentateuch and Targum. The London Polyglot (1654–57) was further enriched by the Ethiopic version and valuable prolegomena by the chief editor, Brian Walton.

Many of the contributors to these monumental works were among the foremost scholars of their time. Thus, Edmund Castell (Castellus), who wrote the "Lexicon Heptaglotton" (1669), was the chief linguistic authority in the making of the last-named polyglot, and his dictionary has scarcely ever been surpassed as an effort of independent scholarship. It served as the basis of most of the lexicons of the individual languages until the nineteenth century. The Buxtorfs, father and son (died 1629 and 1664, respectively), in Basel, by their lexicons and handbooks, were largely instrumental in bringing the treasures of rabbinical and Talmudical literature within the reach of the Christian world. It was also no slight service that was performed by the Arabists of the seventeenth and eighteenth centuries. Edward Pocock (1604–91), another contributor to the London Polyglot, and Albert Schultens (1686–1750) employed their Arabic erudition in the work of Scripture exposition and illustration. Nor must the achievements of Job Ludolf (1624–1704) in the more remote sphere of the Ethiopic be overlooked. All study of the Semitic languages and literatures in the days before the rise of comparative linguistic and historical science was made directly in the interest of the Bible and Biblical literature.

Semitic Scholars and Archeologists.

Help scarcely less important was afforded by those scholars who devoted themselves to Biblical and Oriental archeology. The works of Samuel Bochart (1599–1667) on sacred geography and zoology ("Phaleg et Canaan," 1646, and "Hierozoicon," 1675) are replete with knowledge not yet antiquated. John Selden (1584–1654), "the Coryphæus of antiquaries," left in his "Syntagmata de Dis Syris" (1617) a work of enduring value, as did John Spencer of Cambridge in his great work, "De Legibus Hebræorum Ritualibus" (1685), and Adrian Reland also in his "Palestina" (1716). These proved to be basic works in their respective spheres of research.

Obstructive Dogmatism.

But in the more specific work of interpreting the sacred text in detail the Christian Church, taken as a whole, had forgotten the spirit and maxims of Luther and Calvin, and was hopelessly fettered by the dogma of the plenary inspiration of the Scriptures. Inasmuch as this doctrine necessarily implies the absence of any inner development in the Bible, it paralyzed the search for historic truth. Stagnation reached its climax when the "Formula Ecclesiarum Helveticarum" (1675) declared, as the doctrine of the Church, that the Masoretic vowel-points and accents were divinely inspired. Elias Levita (1472–1549) had made it plain to intelligent Jews and Christians alike that the points were introduced about the sixth century of the common era; and when Louis Cappel (Cappellus), "Reformed" professor at Saumur (1585–1658), vindicated the same opinion in his "Critica Sacra" (1650), the orthodoxy of the time was left without excuse or defense, and the error gradually died out of itself. This book was the real beginning of textual criticism in the Christian Church. Moreover, the mysticism of Böhme (1575–1624) and the pietism of Spener (1635–1705) had an effect far beyond the spheres of religious sentiment and of philosophy, in liberating the minds of many from the tyranny of formalism.

Harbingers of Progress.

Also, the original and independent John Koch (Cocceius, 1603–69), in pointing out the progressiveness of the divine revelation, gave, notwithstanding his extravagances as a typologist, a lasting impulse to earnest inquiry into the essential meaning of the Bible. His legitimate successor was Vitringa (1659–1722), the famous commentator on Isaiah, a striking combination of the grammarian and the allegorist, whose diligence in seeking first of all the primary sense of the text was stimulated by the example of the common-sense literalist Grotius (1583–1645) and of the ingenious but cautious philologist De Dieu (1590–1642). All of these were of the Reformed Church in Holland, where almost the only great commentators of the seventeenth and eighteenth centuries were trained and labored.

3. Period of Criticism: The ideas that were most germinal and potential in interpretation came, however, not from Holland (concerning Spinoza, see later on), but from England and, above all, from Germany. They can be traced succinctly along the lines of esthetic appreciation, literary criticism, philological research, and philosophical constructiveness. It is with the middle of the eighteenth century that the unbroken advance begins. Up to that time the theologians, by their unsympathetic treatment, had done their best to consign the Bible to the rubbish-heap of creeds and confessions; and they seem to have almost succeeded.

Esthetic Appreciation.

The first essential to a correct estimate was to observe the form and structure of the sacred writings. Robert Lowth (1710–87), an Englishman, has the distinction of having pointed this out. His "De Sacra Poesi Hebræorum" (1753) and his translation of Isaiah (1778) set forth and illustrated the several forms of Parallelism in Hebrew poetry, and showed how they could be traced out in the original, and how they could be reproduced in any properly made version. In this exposition he rightly professes to have applied largely the principles of Azariah dei Rossi (1513–77). This was the opening of a new world to Christian readers, who were now enabled to discern the poetic structure of a large part of the Old Testament. Lowth's esthetic taste and spirit were more than matched by the German Herder (1744–1803), whose enthusiasm for Oriental antiquity had been in large measure kindled by Hamann (1730–88). Herder's "Geist der Hebräischen Poesie" (1782) did most to imbue his age with admiration for Hebrew literature. But the Bible was the main inspiration of his literary and philosophical writings, in all of which he strove mightily for the uplifting and enlarging of the spirit of humanity. What has been gained since Herder's time in the literary appreciation of the Bible is due in the main to a more accurate knowledge of details.

Lowth and Herder.

Beginnings of Higher Criticism.

Bible exegesis came to its rights when scientific literary criticism was combined with accurate philological methods and more complete historical and archeological knowledge. The year 1753 is the natal year of what, in distinction from textual criticism, is called "higher criticism." Then appeared along with Lowth's "Sacred Poetry of the Hebrews" a still more epoch-making book by Jean Astruc (1684–1766), physician to Louis XIV. of France, entitled "Conjectures sur les Mémoires Originaux dont il Paroît que Moyse s'est Servi pour Composer le Livre de la Génèse." The book was published with an apologetic aim—to save the consistency of the sacred writers—and nobly has this purpose been justified in the final result of the critical inquiry thus begun. It had long been maintained by some of the more daring spirits, as by Abraham ibn Ezra (1093–1168) and the philosophers Hobbes (1588–1679) and Spinoza (1632–77), that there were many portions of the Pentateuch which could not have been written by Moses, on the ground that their statements refer to events which occurred after his time. Of these Spinoza advanced furthest, following up the dicta of Ibn Ezra and Isaac de la Peyrère (1592–1676). In his "Tractatus Theologico-Politicus" (1670) Spinoza not only disputed the Mosaic origin of the Pentateuch, but asserted that in the historical books as far as Kings much of the contents pointed to a late authorship. His sagacity was further shown by his putting Chronicles long after the time of Ezra and in perceiving the composite character of several of the prophetical books. Richard Simon, a father of the Oratory in Paris (1638–1712), the most acute critic of his day, while denying that the Pentateuch in its final form could have come from Moses, propounded the theory that the Old Testament was compiled with considerable freedom from the works of inspired historiographers.

Precursors of the Higher Criticism.

Chief Points in the Line of Progress.

Astruc made the beginning of progressive criticism by observing the distinction in usage of the two names for God, Elohim and Yhwh. It had already been conjectured by Vitringa and others that Moses made use of earlier documents. Astruc hit upon the thought that these two names, running through separate sections of Genesis, marked a distinction of authorship. He assumed also nine smaller documents distinguished by other marks. J. G. Eichhorn, along with other hypotheses, showed in 1779 that this distinction was further justified by peculiarities of linguistic usage. In 1798 K. D. Ilgen declared his belief that the Elohim sections in Genesis were not the productions of a single author. De Wette demonstrated in 1805 that Deuteronomy differed in essential character from the other books of the Pentateuch. Friedrich Bleek in 1822 pointed out that the Book of Joshua was a direct continuation of the Pentateuchal narrative, and therefore must have been included in the same historical framework now known as the Hexateuch, including the Pentateuch and Joshua. Ewald in 1831 showed that the Elohim document and the Jehovah document were separately traceable throughout the Pentateuch. In 1853 Hupfeld developed the happy conjecture of Ilgen, made more than half a century before, into a demonstration that there were two independent Elohistic sources, one of which was very closely related to the Jahvistic.

Summary of Theories.

Thus, in a round century after 1753, the fundamental analysis of the first six books of the Old Testament was completed. The few facts just given indicate merely the general line of assured progress, leading to the establishment of the hypothesis that the Hexateuch was made up of a series of independent documents. Other theories, such as that the Pentateuch was a late composition made up of a collection of fragments (the "Fragmentary" hypothesis), or that it consisted of one fundamental (Elohistic) work, others having been attached for the purpose of completing it (the "Supplementary" hypothesis), grew out of the original impulse toward analysis and construction. They were long defended by able scholars, but have now practically disappeared from the arena of discussion.

Meanwhile a great awakening of what may be summarily called the historic interest had taken place in the world of criticism, and Bible study has been perhaps the principal gainer by the whole movement to which that awakening has given vitality and permanence. The dominant influences are, moreover, still operative a century and a half after the date of Lowth and Astruc.

Comparative Philology.

Comparative philology has been influential in two main directions. It has called attention to the contrasts as well as to the resemblances of distinct families of mankind, and has compelled men to find out characteristic types of thought and modes of expression in their literary monuments. It has also provoked a rational and scientific study of words and sentences, so that the modifications of their usages from age to age are made a key to unlock the meaning, or shades of meaning, which they have expressed. Hence, on the one hand, the impulse to the literary study of the Bible given by Lowth and Herder was continued by highly endowed men of various schools, of whom it may suffice to name Eichhorn, De Wette, Goethe, Ewald, Coleridge, and Matthew Arnold. On the other hand, the grammatical and lexical study of Hebrew was placed upon a new and ascending grade. Witness the successive productions of Gesenius (whose practical linguistic work is the most vital and persistent known to modern times), Ewald, Olshausen, Stade, and Koenig.

Textual Emendation.

To the demand for verbal accuracy, as well as to the search after the form of the original text, are due the many attempts that have been made to amend the Masoretic text. That emendation is often needed was long ago felt by independent inquirers. But no great advance was made in method from the days of Cappellus and Lowth to those of Ewald and Hitzig, except in connection with a critical study of the ancient versions and a wider collation of manuscripts. This was resumed with better efforts in the monumental works of Holmes and Parsons, of Field and Lagarde, who enforced stricter principles of textual correction.

New Vitalizing Conceptions.

But all these influences combined will not account for the tremendous revolution which Bible criticism and exegesis have undergone since the middle of the eighteenth century. Two new forces have been applied to Biblical study which may fairly be called vitalizing and regenerative. The one has come from the now ruling conceptions of the history of human thought and experience; the other, from the prevalent views as to the actual growth of human society. The one is chiefly philosophical; the other, mainly empirical. The practical result of the cooperant workings of the two conceptions is a rearrangement of the Old Testament books in the order of the natural development of their ideas, and in accordance with the growing capacity of ancient Israel for apprehending or receiving them.

Results of the New Exegesis.

The chief points on which the representatives of modern Biblical exegesis are agreed are:

1. In the Hexateuch four authors at least were concerned, besides a redactor or redactors. Of these Moses is not one, though it is not proved that he contributed no materials. One of the sources appears in Deuteronomy (D); another (P) in Leviticus and in large portions of the other books; while two others (J and E) often inseparably combined (J E) form the remainder. J (Jahvist) and E (formerly called the second Elohist) give a sort of historical résumé of the early history of Israel from the standpoints of southern and northern Israel respectively, and are dominated by the prophetic movement. They were completed in the ninth and eighth centuries B.C. The groundwork of D was the "Book of Instructions" found by Hilkiah in the Temple in 621 B.C. It ministered both to the prophetic spirit and to the cultus, and served as directive for the reformation of Josiah. P was composed for the promotion of the ceremonial code which it contains, and treats besides of the early history from the point of view of the priesthood. While including earlier elements, it was essentially the work of writers that were concerned with the ritual of the Second Temple, being substantially the law-book of Ezra. J E therefore precedes D, and D precedes P. The mode and time of the redaction are not so clear.

2. The aims or tendencies of these several productions—prophetic, deuteronomic, and priestly—do not stop with the Book of Joshua, but run through all the historical literature. In brief, while Judges, Samuel, and Kings are mostly of the prophetic or deuteronomic spirit, Chronicles, Ezra, and Nehemiah, all of which three came from one hand near the close of the canon, are controlled by the priestly tendency, so prominent in P of the Hexateuch.

3. The prophetical books have also been rearranged and readjusted in accordance with their ascertained historical order. Moreover, many of them have been found to contain prophecies which did not proceed from the principal authors. The portions thus separated are usually later than the genuine prophecies. Isaiah and Zechariah, for example, have each been credited with more than one important work in addition to their own proper utterances.

4. The titles of the Psalms are not original or reliable. Psalm-composition with a high spiritual intent and content began after the time of David, and, like hymn-writing in every age, flourished chiefly in times of religious and social stress and trial.

5. The writings ascribed to Solomon are, in their present form, of very late date. Ecclesiastes is wholly, and Proverbs largely, the product of the Persian or Grecian period. The Book of Daniel belongs to the time of the Maccabees.

6. Not only have the history of Israel and its historical records been arranged anew, but the whole career of Israel in Palestine now appears, in the light of the archeological disclosures of the last half-century, to have been, in its external incidents, but an incident in North-semitic history, which began several thousand years before the Hebrews became a nation.

7. The development of the religious conceptions and institutions of ancient Israel can be traced in a rational order and illustrated by similar phenomena elsewhere.

BIBLE INSPIRATION. See INSPIRATION.

BIBLE MANUSCRIPTS: By this term are designated handwritten copies and codices of the Hebrew Bible as a whole, or of several books arranged in groups according to a certain order (see BIBLE CANON), or of single books. Sometimes, though not often, they contain collections of detached prophetic selections (see HAFṬARAH), generally in connection with the Pentateuch (see Strack, "Zeitschrift für die Gesammte Lutherische Theologie und Kirche," 1875, p. 594). A distinction is made between manuscripts intended for use in the synagogue and in public reading and those for private purposes. Originally both the sacred or public copies and the private or profane were in the shape of scrolls, this being the only style of book-making known to antiquity. After the leaved form of books came into vogue (from the fourth century of the common era), adherence to the ancestral model was insisted on in the case of those reserved for holy uses at public worship. While demanded only for the Pentateuch and the Book of Esther, this conformity must, as the name indicates, have been at one time exacted also for the four remaining Megillot, read as lessons on certain festivals. Why they and the collections of the Hafṭarot ceased to conform to the historical model can not be ascertained.

Rules for Writing.

The Pentateuch and Esther, when designated for synagogal use, are required to be written with scrupulous attention to rules laid down in the Law (see SOFERIM). They must be written in square characters (כתב מרבע, also known as כתב אשורי; see ALPHABET), without vowel-points and accents, on parchment made from the hides of "clean" animals, which, when duly prepared, are sewn together by threads of the same origin. If four mistakes are found in one column, or a single error is discovered in the "open" and "closed" sections of the Law, or in the arrangements of the metrical portions, the whole copy is rendered unfit for use (פסול) and must be buried. Great age—through long use, and exposure to climatic and other influences involving decay and other imperfections—is among the causes which render a copy unserviceable; and this circumstance explains why very old copies are not found.

The manuscripts intended for private use vary considerably in size, material, and character. They are in rolls, and in book form—folio, quarto, octavo, and duodecimo. Some are written on parchment, some on leather, others on paper; some in square characters, others in rabbinical (the latter only in modern times). They are usually provided with vowel-points, written in a different color from the consonants, which are always in black. Initial words or letters are often in gold and silver; some, indeed, are artistically illuminated. Sometimes on the inner margins of the columns are given Masoretic notes; the outer ones are reserved for scholia and, in more modern manuscripts, for rabbinical commentaries. Yemenite manuscripts have usually no columns; and each verse is accompanied by the corresponding verse from the Targum Onkelos and the Arabic translation by Saadia. The space at the bottom of the pages is sometimes occupied by the commentary of Rashi.

Colophons and Inscriptions.

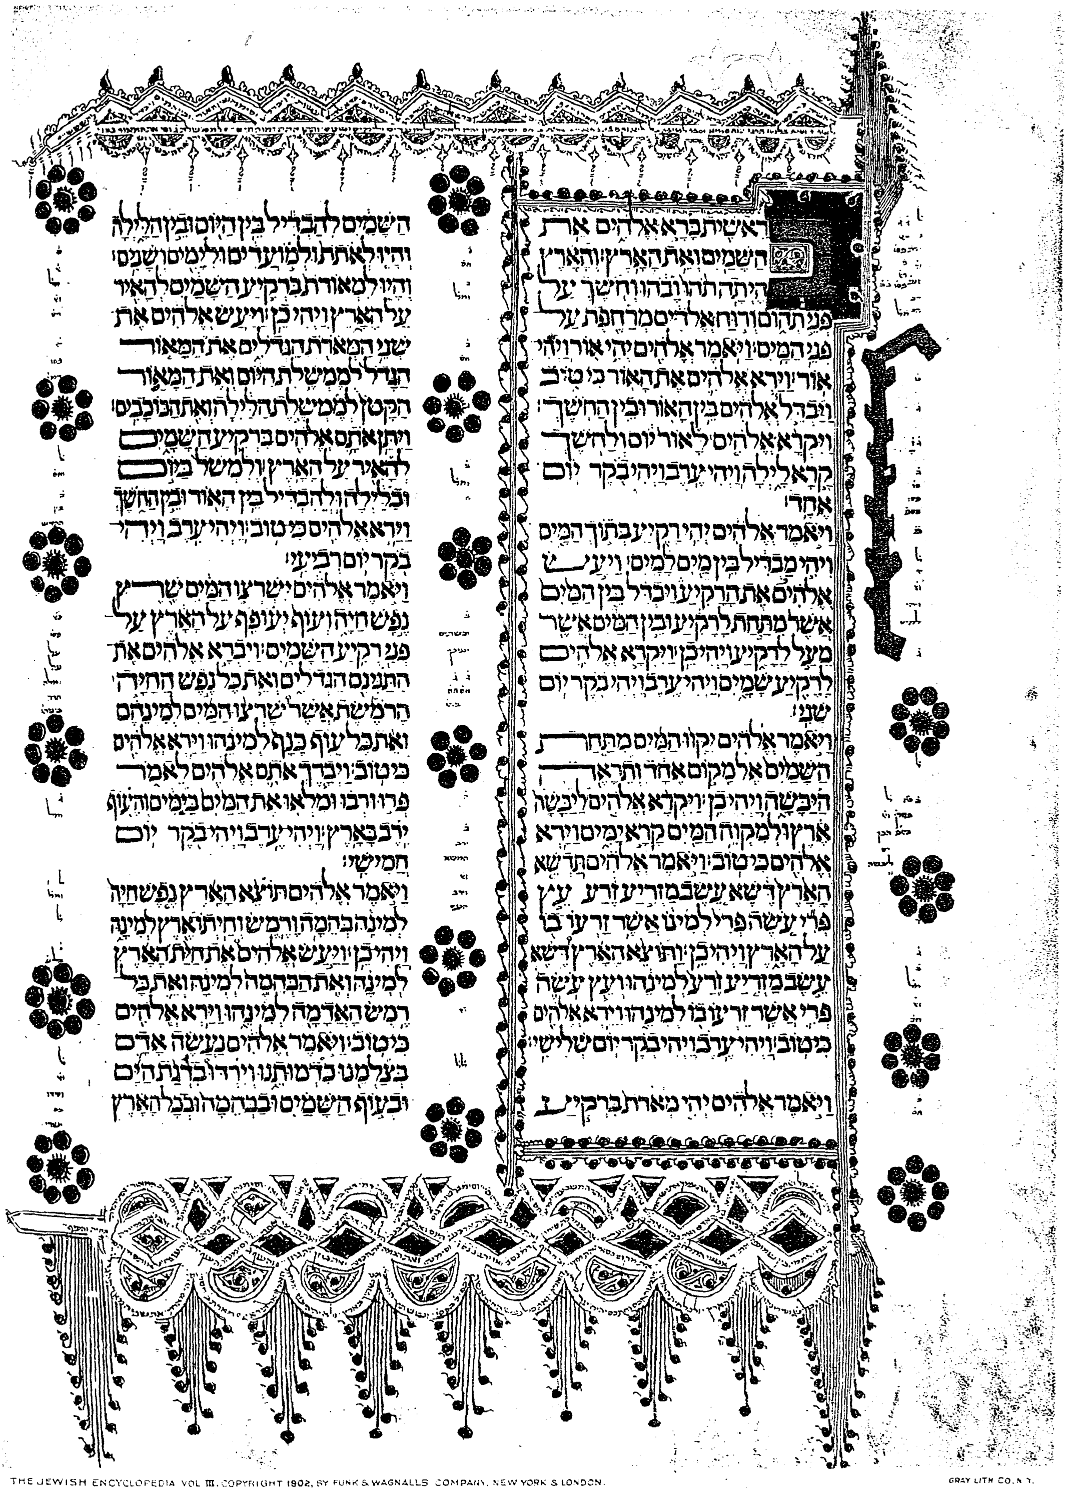
Generally, the manuscripts are provided with inscriptions giving the name of the copyist and the dates of writing. Several eras are used in the computation of these dates: that of the creation of the world; that of the Seleucids; that of the destruction of the Temple; and, finally, that of the Babylonian exile (see ERA). The age of undated manuscripts is approximatively determined by the ink, the quality of the parchment, the presence or absence of Masoretic notes, and by paleographic signs (see PALEOGRAPHY).

As indicated above, extant manuscripts are not of very great antiquity. In addition to the explanation already given, this phenomenon, all the more curious because, according to Jewish law, every Jew ought to have at least one copy in his house, is very plausibly accounted for on the theory advanced by Brian Walton; namely, that with the definitive settlement of the Masorah in the seventh century, many copies must have been discarded because of their infractions of the established Masoretic rules.

If Talmud Yerushalmi (Ta'anit lxviii. 1) is to be credited, while the Temple was still standing, standard codices of the Pentateuch were officially recognized. These were deposited in the court of the Temple and served as models for accuracy. According to the passage quoted, three were known by the following names respectively: "Sefer Me'on," so called on account of its reading מעון instead of מעונה (Deut. xxxiii. 27); "Sefer Za'aṭuṭe," because of its reading זעטוטי instead of נערי (Ex. xxiv. 5); and "Sefer Hi," because of its reading היא with a yod in nine passages instead of eleven. The Masorites, too, seem to have consulted standard manuscripts celebrated for their accuracy in the redaction of the text and in the compilation of the Masoretic glosses. Though none of these has been preserved, the following are referred to as authorities in almost every manuscript of importance:

Codex Muggeh, *i.e.*, the corrected Codex: Quoted by the Masorites either by its full title (בספר מוגה) or simply as "Muggeh" (מוגה).

Codex Hilleli (ספר הללי): The origin of its name



בראשית ברא אלהים את
השמים ואת הארץ והארץ
היתה תהו ובהו וחשך על
פני תהום ורוח אלהים מרחפת על
פני המים ויאמר אלהים יהי אור ויהי
אור וירא אלהים את האור כי טוב
ויבדל אלהים בין האור ובין החשך
ויקרא אלהים לאור יום ולחשך
קרא לילה ויהי ערב ויהי בקר יום
אחד
ויאמר אלהים יהי רקיע בתוך המים
ויהי מבדיל בין מים למים ויעש
אלהים את הרקיע ויבדל בין המים
אשר מתחת לרקיע ובין המים אשר
מעל לרקיע ויהי כן ויקרא אלהים
לרקיע שמים ויהי ערב ויהי בקר יום
שני
ויאמר אלהים יקוו המים מתחת
השמים אל מקום אחד ותראה
היבשה ויהי כן ויקרא אלהים ליבשה
ארץ ולמקוה המים קרא ימים וירא
אלהים כי טוב ויאמר אלהים תדשא
הארץ דשא עשב מזריע זרע עץ
פרי עשה פרי למינו אשר זרעו בו
על הארץ ויהי כן ותוצא הארץ דשא
עשב מזריע זרע למינהו ועץ עשה
פרי אשר זרעו בו למינהו וירא אלהים
כי טוב ויהי ערב ויהי בקר יום שלישי

ויאמר אלהים יהי מארת ברקיע
השמים להבדיל בין היום ובין הלילה
והיו לאתת ולמועדים ולימים ושנים
והיו למאורת ברקיע השמים להאיר
על הארץ ויהי כן ויעש אלהים את
שני המארת הגדלים את המאור
הגדל לממשלת היום ואת המאור
הקטן לממשלת הלילה ואת הכוכבים
ויתן אתם אלהים ברקיע השמים
להאיר על הארץ ולמשל ביום
ובלילה ולהבדיל בין האור ובין החשך
וירא אלהים כי טוב ויהי ערב ויהי
בקר יום רביעי
ויאמר אלהים ישרצו המים שרץ
נפש חיה ועוף יעופף על הארץ על
פני רקיע השמים ויברא אלהים את
התנינם הגדלים ואת כל נפש החיה
הרמשת אשר שרצו המים למינהם
ואת כל עוף כנף למינהו וירא אלהים
כי טוב ויברך אתם אלהים לאמר
פרו ורבו ומלאו את המים בימים והעוף
ירב בארץ ויהי ערב ויהי בקר יום
חמישי
ויאמר אלהים תוצא הארץ נפש חיה
למינה בהמה ורמש וחיתו ארץ למינה
ויהי כן ויעש אלהים את חית הארץ
למינה ואת הבהמה למינה ואת כל
רמש האדמה למינהו וירא אלהים
כי טוב ויאמר אלהים נעשה אדם
בצלמנו כדמותנו וירדו בדגת הים
ובעוף השמים ובבהמה ובכל הארץ

THE JEWISH ENCYCLOPEDIA VOL III. COPYRIGHT 1902, BY FUNK & WAGNALLS COMPANY, NEW YORK & LONDON.

GRAY LITH CO. N.Y.

ILLUMINATED HEBREW BIBLE (GEN. I.)

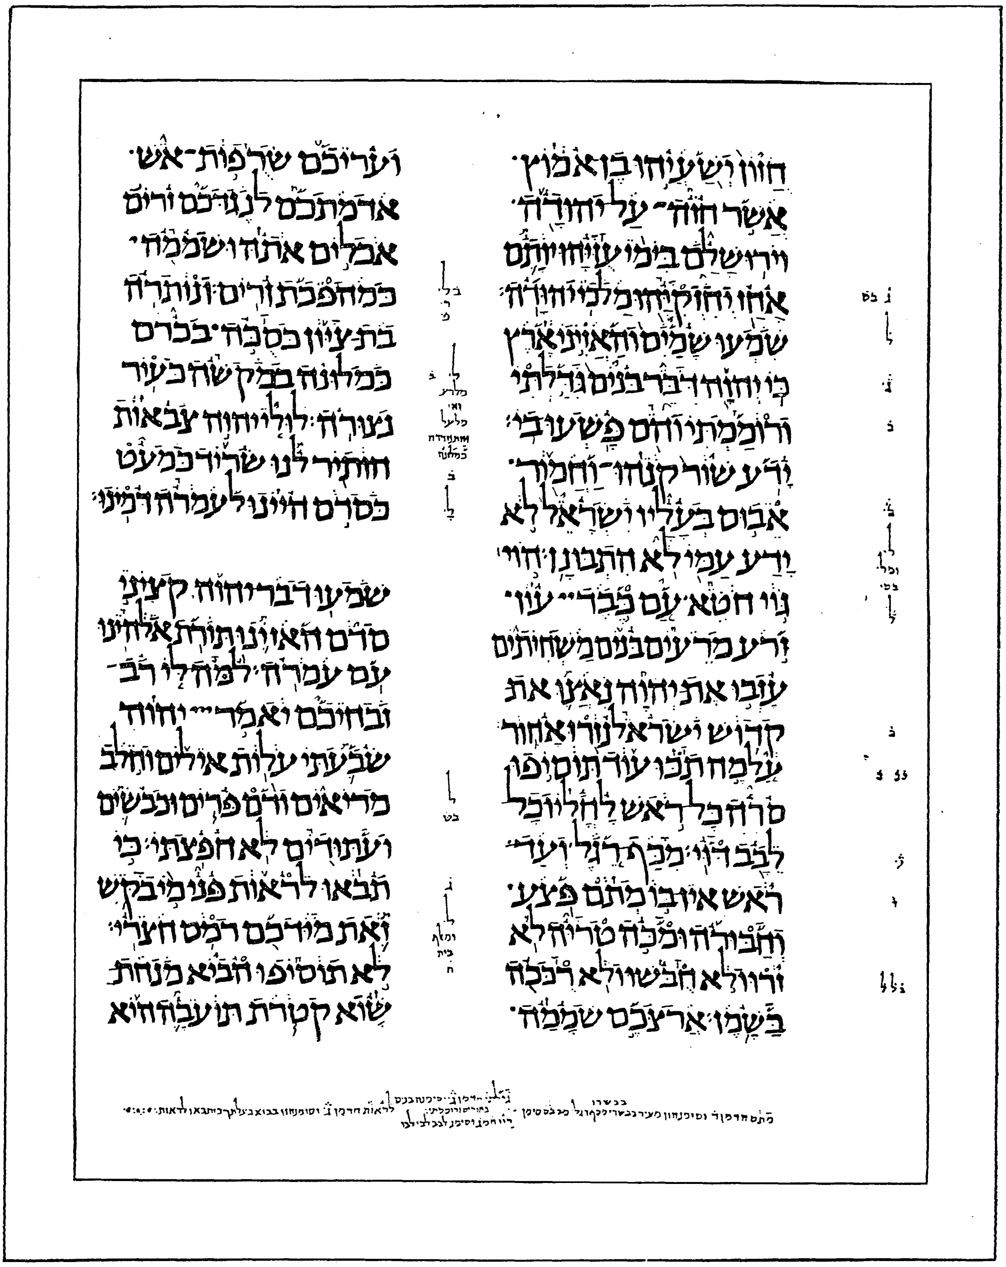
WRITTEN IN SPAIN 1476.

(FROM THE BODLEIAN LIBRARY, OXFORD.)

is not known. According to Zacuto, this codex was written by a certain Hillel at about 600 of the common era. In his Chronicle, compiled about 1500, Zacuto expresses himself as follows:

> "In the year 4957, on the twenty-eighth of Ab (Aug. 14, 1197), there was a great persecution of the Jews in the kingdom of Leon at the hand of the two kingdoms that came to besiege it. At that time they removed thence the twenty-four sacred books which were written about 600 years before. They were written by R. Hillel ben Moses ben Hillel, and hence his name was given to the codex, which was called 'Hilleli.' It was exceedingly correct; and all other codices were revised after it. I saw the remaining two parts of it, containing the Former and Latter Prophets, written in large and beautiful characters; these had been brought by the exiles to Portugal and sold at Bugia in Africa, where they still are, having been written about 900 years ago. Kimhi in his grammar on Num. x. 4 says that the Pentateuch of the Hillel Codex was extant in Toledo."

Codex Sanbuki: Frequently quoted in the Masorah Parva, and highly praised for its accuracy by Menahem de Lonzano in his "Or Torah." According to Christian D. Ginsburg, the name of this codex is derived from "Zambuki" on the Tigris, to which community it belonged.



חזון ישעיהו בן אמוץ
אשר חזה על יהודה
וירושלם בימי עזיהו יותם
אחז יחזקיהו מלכי יהודה
שמעו שמים והאזיני ארץ
כי יהוה דבר בנים גדלתי
ורוממתי והם פשעו בי
ידע שור קנהו וחמור
אבוס בעליו ישראל לא
ידע עמי לא התבונן הוי
גוי חטא עם כבד עון
זרע מרעים בנים משחיתים
עזבו את יהוה נאצו את
קדוש ישראל נזרו אחור
על מה תכו עוד תוסיפו
סרה כל ראש לחלי וכל
לבב דוי מכף רגל ועד
ראש אין בו מתם פצע
וחבורה ומכה טריה לא
זרו ולא חבשו ולא רככה
בשמן ארצכם שממה

ועריכם שרפות אש
אדמתכם לנגדכם זרים
אכלים אתה ושממה
כמהפכת זרים ונותרה
בת ציון כסכה בכרם
כמלונה במקשה כעיר
נצורה לולי יהוה צבאות
הותיר לנו שריד כמעט
כסדם היינו לעמרה דמינו

שמעו דבר יהוה קציני
סדם האזינו תורת אלהינו
עם עמרה למה לי רב
זבחיכם יאמר יהוה
שבעתי עלות אילים וחלב
מריאים ודם פרים וכבשים
ועתודים לא חפצתי כי
תבאו לראות פני מי בקש
זאת מידכם רמס חצרי
לא תוסיפו הביא מנחת
שוא קטרת תועבה היא

PAGE OF THE HEBREW BIBLE, WITH SUPERLINEAR PUNCTUATION, FROM THE ST. PETERSBURG CODEX.

Codex Yerushalmi: As attested by Kimḥi ("Miklol," ed. Fürth, 1793, p. 184b), the codex was for many years in Saragossa, and was extensively used by the grammarian and lexicographer Ibn Ganaḥ. It is often quoted in the Masorah as exhibiting a different orthography from that of the Codex Hilleli.

Codex Jericho, also called **Jericho Pentateuch** (**חומש יריחו**): The name seems to imply that the manuscript embraced only the Pentateuch. It is mentioned by Elijah Levita, in "Shibre Luḥot," as most reliable for the accents.

Codex Sinai (**ספר סיני**): Many opinions exist as to the derivation of its name. The most plausible is that it was derived from "Mount Sinai," just as the codices Jericho and Yerushalmi denote the places of their origin. It is mentioned in the Masorah, and is also cited by Elijah Levita in his work quoted above.

Codex Great Maḥzor (**מחזורא רבה**): This probably contained the annual or triennial cycle ("Maḥzor") of lessons to be read on week-days, Sabbaths, feasts, and fasts; hence its name.

Codex Ezra: Quoted in the Masorah Parva. A manuscript professing to be a copy of this codex is in the possession of Christian D. Ginsburg.

Codex Babylon (**ספר בבלי**): Differences (**חלופים**, "ḥillufin") existed between the Western schools (**מערבאי**), the chief seat of which was Tiberias, and the Eastern (**מדינחאי**), the principal centers of which were Nehardea and Sura, in the reading of many passages; this codex gives the Eastern recension (see Masorah).

Another standard codex which served as a model at the time of Maimonides was that written in the tenth century by the renowned Masorite Aaron ben Moses ben Asher of Tiberias (compare Maimonides, "Yad," Sefer Torah, viii. 4). This codex was for a long time believed to be identical with that preserved in the synagogue at Aleppo (Jacob Saphir, אבן ספיר, i. 12b; Grätz, in "Monatsschrift," 1871, p. 6; 1887, p. 30; Strack, "Prolegomena Critica," pp. 44–46). [E. N. Adler ("Kaufmann Gedenkbuch," p. 130) argues that the Aleppo Codex is a copy, not the original; but Wickes ("Hebrew Accentuation," Preface, p. vii., Oxford, 1887) makes it clear that "the statement assigning the codex to (Aaron ben Moses) Ben-Asher is a fabrication."—E. G. H.]

Two celebrated manuscripts *believed* to be very ancient are still extant in Syria. One of these, the Damascus Codex, which, according to the inscription on its title-page (added, however, by a later hand), was written in the third century of the common era, belongs to a Jewish family of Damascus named Parḥi, and is exhibited to the inhabitants on feast-days. The other is kept in a grotto by the inhabitants of Guber, near Damascus.

Number of MSS.

The number of Hebrew Bible manuscripts found in European libraries is very considerable. The oldest collection is that in the Imperial Library, St. Petersburg, and formerly at the Biblical Society of Odessa. A description of some of these manuscripts was given by Ephraim Moses Pinner in a pamphlet entitled "Prospectus der Alten Hebräischen und Rabbinischen Manuscripte," etc., Odessa, 1845. A full description by Strack and Harkavy is given in their catalogue. The oldest manuscript of this valuable collection is a Pentateuch brought from Derband (Daghestan), written before 604 of the common era. It consists of forty-five skins having 226 columns, and is composed of six pieces: (1) Gen. i.-xlvi. 25, end (9 skins, 52 columns, 51 lines; Taggin by a later hand). (2) Gen. xlvi. 26-Numbers (24 skins, 134 columns, 50 lines, without Taggin). (3) Deut. i.-xvii. (4 skins, 21 columns, 51 lines, without Taggin). (4) Deut. xvii.-xxi. 4 (1 skin, 3 columns, 51 lines). (5) Deut. xxi. 5-xxiii. 23 (1 skin, 3 columns, 51 lines). (6) Deut. xxiii. 24-end of Deut. (4 skins, 13 columns, 51 lines).

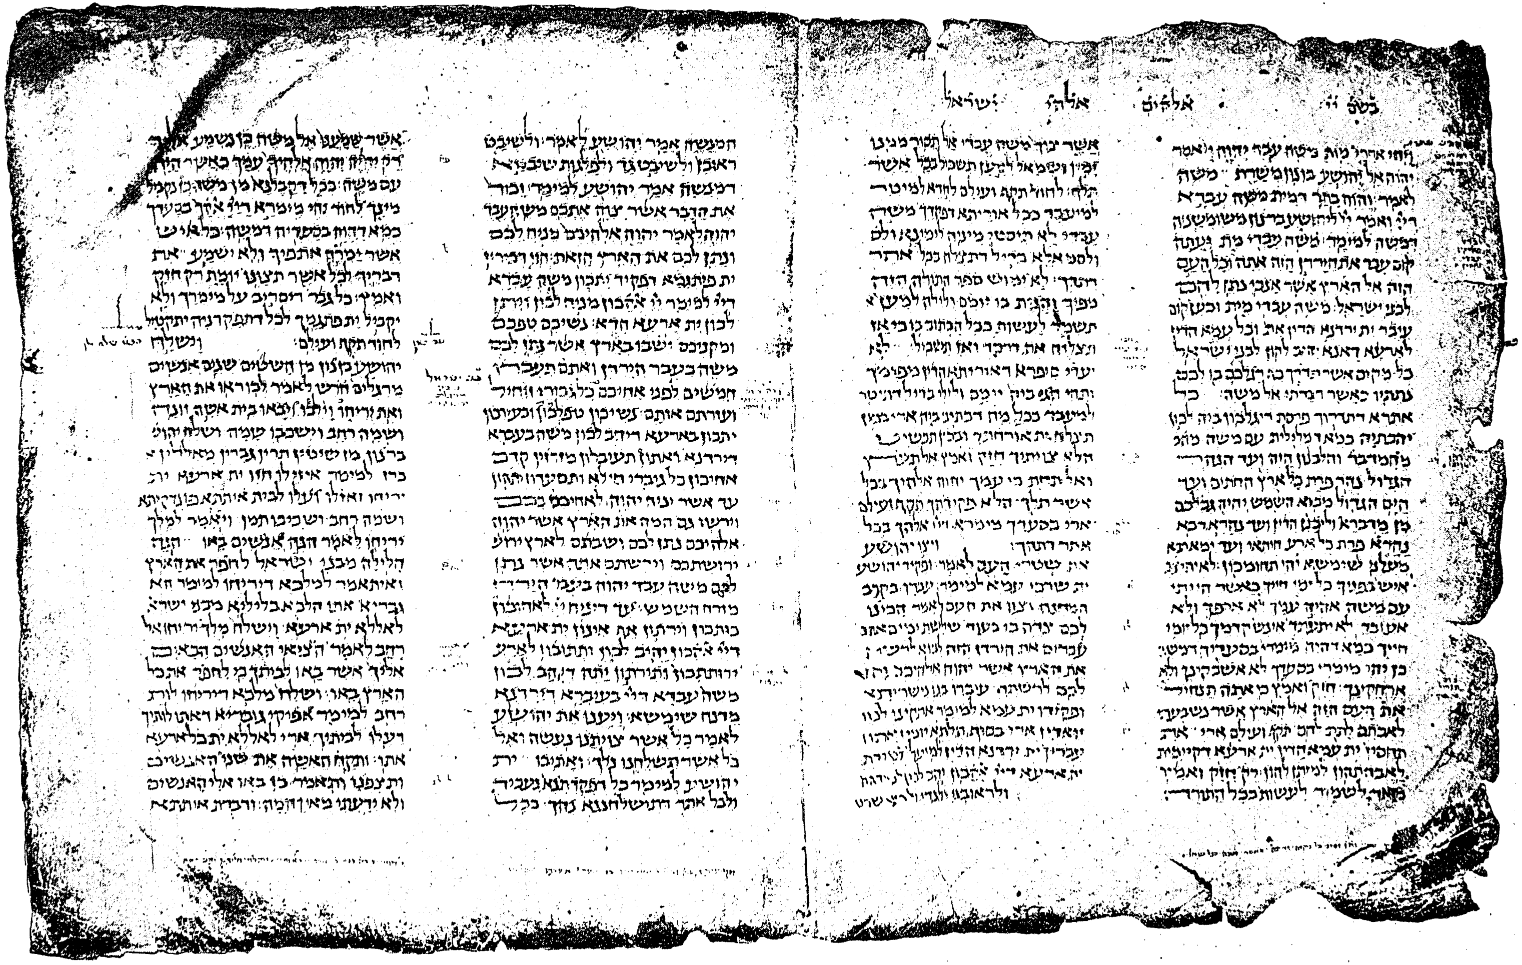
The oldest manuscript in book form at the library of St. Petersburg dates from 916. It consists of 225 folios, each folio divided lengthwise into two columns with 21 lines to the column, with the exception of folio 1a and folio 224a-b, which exhibit epigraphs. It contains the Latter Prophets. Two lines of Masorah Magna appear in the lower margin of each page; while the Masorah Parva occupies the center space between the columns. The vowel-points are superlinear in the so-called Babylonian system. The total number of the Bible manuscripts in the St. Petersburg library is 146.

In Libraries.

The British Museum possesses 165 Bible manuscripts, the oldest of which is the Masoretic Bible written about 820–850. This contains the Pentateuch and consists of 186 folios, 55 of which were at one time missing, but have been added by a later hand. The Bodleian Library, Oxford, possesses 146 Bible manuscripts, the oldest of which dates from 1104. Cambridge counts 32, the oldest believed to be of the tenth century. Bible manuscripts in goodly numbers are also to be found in private libraries in England, the most important collection being that of E. N. Adler. This contains about 100 codices, the oldest dating from the ninth century. The Bibliothèque Nationale, Paris, has 132 Bible manuscripts, the oldest with the date 1286. The number of Bible manuscripts in the Vienna Library is 24. The oldest (given by Kennicott under No. 126) contains the Latter Prophets and the Hagiographa, written in the tenth century. Steinschneider describes 14 Bible manuscripts in the Royal library of Berlin; none of them is very old. De Rossi describes 848 manuscripts (now at Parma), the oldest of which is No. 634, containing Lev. xxi. 19-Num. i. 50, written in the eighth century. The Vatican Library possesses 39 Bible manuscripts, which have been described by Joseph Simon Assemani and Stephen Ephodius Assemani. Several Bible manuscripts are in the libraries of Leipsic, Munich, and Leyden.

Some Bible manuscripts have been brought from China. They are partly synagogue rolls, partly private copies, whose text does not differ from the Masoretic Bibles. A Pentateuch of the Malabar Jews is now in England. It resembles, on the whole, the usual synagogue rolls, except that it is written on red skin.

Samaritan manuscripts of the Pentateuch are to be found in the British Museum, the Bodleian, St. Petersburg, Parma, and the Vatican libraries; for a



FROM THE ERFURT MANUSCRIPT OF THE HEBREW BIBLE (JOSHUA I.-II. 5), SHOWING TARGUM IN ALTERNATE VERSES; FORMERLY THE PROPERTY OF JOHANN REUCHLIN.

description of them, the respective catalogues may be consulted.

As curiosities may be mentioned a Hebrew Pentateuch in Arabic characters, now in the British Museum; the Pentateuch in Latin characters in the Bodleian Library; and, finally, the fragments of the Pentateuch written in inverted alphabet discovered lately in the Cairo genizah.

E. G. H. I. Br.

BIBLE IN MOHAMMEDAN LITERATURE: Through intercourse at Mecca, at Medina, and on his various journeys in the seething, germinant Arabia of his day, Mohammed learned to distinguish between idol-worshipers and such people as he termed "the People of the Book": holders and followers of a written revelation. Most prominent among these were the Jews and Christians; thrice mention is made in the Koran of the Sabeans as being in the same class as, and once of, the Magi. As to the nature and contents of their books, Mohammed had only one fixed idea: These taught the same doctrine exactly as he taught; could, in fact, teach no other, as all doctrines came from the one Lord.

Mohammed's View of Jewish Scriptures.

There are vague references to certain "leaves" being delivered to Abraham; but what eventually became of them Mohammed does not say. The later Moslem theory is that they were taken back into heaven, and that whatever light the Sabeans and Magi enjoy is derived from them. One practical result is that Islam does not reckon Zoroastrians and worshipers of the host of heaven as idolaters, but consents to enter into treaty with them. But the books of the Jews and Christians were clearly there; they had remained unto Mohammed's day. To Moses, the "Tawrat" had been revealed; to David, the "Zubur" (Psalms); and to Jesus, the "Injil" (Evangelium). Thus, the Torah, the Psalms, and the "Gospel" represented for Mohammed the Scriptures of the Old and New Testaments. How vague his idea was and how both Jews and Christians must for him have melted together into one is evident from his belief that Miriam, the sister of Moses, was the same as Mary, the mother of Jesus.

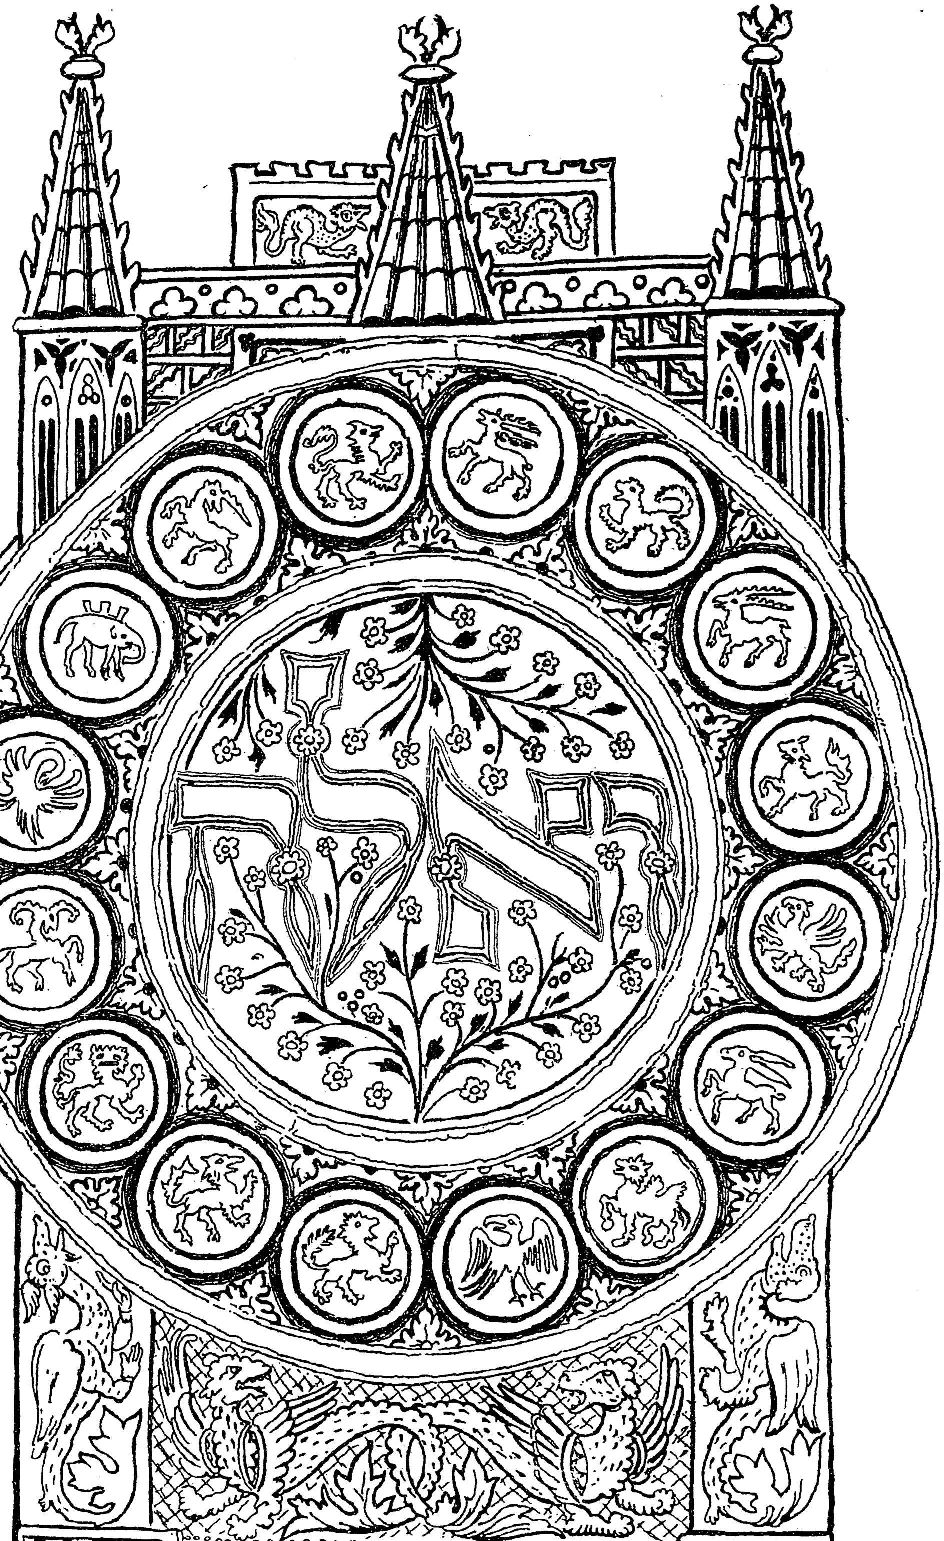
To the series of prophets involved in this scheme of religious history Mohammed claimed to be heir. In the providence of God the time had now come when the Arabs, in their turn, were to have a prophet sent to them, speaking in their tongue, sprung from their blood, and calling them to repentance and to the acceptance of the one God and His doctrine as the other prophets had done with their respective peoples. Mohammed seems to have been quite satisfied that what he taught stood clearly written already in the Tawrat, the Zubur, and the Injil. The Jews and Christians, he felt, must recognize that he was exactly such a prophet as those who had come before; that he fulfilled all the conditions called for in the Books. This, evidently, was rooted in his self-consciousness, and, with his scheme of religious policy, was all the basis he had. Of direct knowledge of the sacred books, as then in the hands of the Jews and Christians, he appears to have had none. He felt no need of it. When, therefore, the Jews and Christians refused to recognize his doctrine and to accept his prophethood, he could only ascribe their conduct to perverse obstinacy. They concealed passages in their books; they misinterpreted others, "twisting their tongues in them" (Koran iii. 72).

In time he gave up the attempt to secure such support, and fell back on the simple weight of his own authority. Traditions, which may have taken form later, indicate, in their substance at least, the attitude to which he came. "Have nothing to do," he is reported to have said, "with the People of the Book and their books; say unto them, 'We believe in that which has been revealed to both of us; your God and our God is the same.'" Essentially he meant, "My revelation is the same as that which stands in your books. You misinterpret, conceal, and pervert; my revelation is certain and is enough." Such, apparently, was the attitude of Mohammed himself to the Scriptures. In illustration, reference may be made to the following passages in the Koran, suras ii. 85, 129, 209; iii. 60, 72, 179, 184; iv. 161, 169; v. 47, 85, 109; xix. 28; xxvi. 192; xxix. 45; xlii. 11; lvii. 25; lxi. 6; lxii. 5; lxvi. 10.

The God of Islam and Yhwh Identical.

But such a position could only be maintained by Mohammed himself with his intense consciousness of the truth of his mission. After his death came rapid changes which were natural in themselves, but the definite origin of which is mostly obscure to us. The only means of access which the earliest Moslems had to the sacred books of the Jews and Christians was through proselytes; and these proselytes, from a variety of causes, misled much more than they instructed their new coreligionists. For one thing, the Moslems regarded them as authorities on the history of the past. They asked innumerable questions, and expected answers. The more marvelous the answer, the better they seem to have been pleased. Only on one point these converts had to be wary: Their replies must square generally with the Moslem scheme of thought and theology; otherwise their heads were in danger. Under these conditions of risk, marvelous tales sprouted freely. The Midrashimun doubtedly helped; but the imaginations of the converts, thus stimulated, probably accomplished more. Of the latter, two names are worthy of mention as romancers of quite astonishing capacity; viz., Wahb ibn Munabbih (d. 728) and Ka'ab al-Aḥbar (d. 652).

To the labors of these men, then, to the Oriental horror of a vacuum, and to the Oriental indifference as to how a vacuum is filled, is due the overwhelming mass of misinformation on the Old and New Testaments that still oppresses the Moslem world. First, the Torah is confused with the Tables of the Law, and the latter are increased in number. Again, the Torah is enormously increased in bulk: it is alleged to contain a varying number of parts, up to 1,000, and to make seventy camel-loads. Each single part takes a year to read through. Only four



First Page of Exodus.

(From an illuminated manuscript, formerly in the possession of the Duke of Sussex.)

False Citations from Torah.

men—Moses, Joshua, Ezra, and Jesus—have studied it all. Clear statements, all imaginative, are given as to how it begins and ends. Quotations of the wildest character are introduced as from it; and the quoter will say calmly, "I have read them in the Torah." The same exactly holds good in regard to the Gospel and the Psalter. As to the Psalter, there exists in Arabic one of one hundred and fifty chapters, only the first two of which agree with the Psalms; the rest being a free imitation of the Koran. Possibly the Torah and the Gospel may at one time have been similarly perverted, but of such corruptions no traces now exist. The Torah was said to begin like sura vi. of the Koran and to end like sura xi. In it was an exact description of Mohammed and of some other persons associated with the beginning of Islam. For the Gospel, the following statement by an early authority will probably suffice: "I found in the Gospel that the keys of the treasure of Ḳarun [Korah] were a load for sixty mules; no one of them was larger than a finger, and each key served for a separate treasury."

Besides these three books which Mohammed recognized, there are also given references to the Wisdom literature; and in this case a much closer approximation is made to the truth. There are quotations from the Wisdom of Solomon, the Testament of Solomon (apparently part of Proverbs), and the Wisdom of the Family of David, and these have usually at least a possible source. Further, it must not be thought that all this characterized only the earliest times and the most ignorant and careless minds. Al-Gazzali (d. 1111), the greatest theologian of Islam, and a man of the intellectual rank of Augustine or Thomas Aquinas, quotes almost as credulously and rashly as any. Nor does he ever dream of verifying a quotation. Fakhr al-Din al-Razi (d. 1209), another theologian of eminence, boasted that he knew the Torah and the Gospel by heart; and yet in his commentary on the Koran the most incredible things are cited as being contained in these. The best we can say for him is that either there were a pseudo-Torah and a pseudo-Gospel, which deceived him, or else that he lied. Such were the results of the mendacity of the early proselytes to Islam and of the credulity and carelessness of the Moslems. As some excuse for the last may serve the feeling which grew up that there was sin as well as danger in reading the books of Jews or Christians. Even Ibn Khaldun (d. 1405), the first philosophical historian of Islam, disapproved of such study: Mohammedans had certainty in the Koran, he held, and should be content with that.

Among the various general statements in the Koran that Mohammed had been foretold in the earlier books, only one gives the impression that Mohammed had had a specific passage in mind. It is in sura lxi. 6, where Jesus says, "O Sons of Israel, lo, I am a messenger of God to you . . . giving you good tidings of a messenger who will come after me, whose name will be Aḥmad." This seems a tolerably clear reference to the promise of the paraclete in John's Gospel, ch. xiv. *et seq.*, and a very early Moslem tradition so takes it, quoting an Arabized form of the Greek παράκλητος. Another passage is Deut. xviii. 18 *et seq.*: "I will raise them up a Prophet from among their brethren, like unto thee." This, it is explained, could only refer to a prophet of the line of Ishmael; for he was the brother of Isaac, and there was no prophet of the line of Esau; and "their brethren" excludes the line of Jacob. In Isa. xxi. 6–9 the rider on the ass is Jesus and the rider on the camel is Mohammed. The details in Isa. lx. 4–7 are regarded as applying very exactly to Mohammed. Also, in Deut. xxxiii. 2 "Sinai" refers to the Mosaic revelation; "Seir" is a mountain in Syria where Jesus served his Lord; and "Paran" is either a mountain of the Banu Hashim, where Mohammed similarly worshiped, or Mecca itself. These are accepted as good proofs by the great scientist Al-Beruni (d. 1048).

Islamic Study of Original Sources.

But meanwhile, and alongside of this mass of traditional ignorance, a beginning had been made in Islam of the direct study of the older sacred books. It belonged to the brief period of scientific life and liberty under the first Abbassids and especially under Al-Mamun. Through the Persian Aristotelians and physicians, the Syrian monasteries, and the heathen of Harran, Greek civilization and its methods began to affect Islam. So the historians of the time show a commendable desire to go back to original sources and to test and examine for themselves. Ibn Waḍah, who wrote about 880, had an excellent knowledge of the Scriptures, as also, of parts at least, had Ibn Ḳutaibah, who died in 889. Yet in the works of both of these writers are included wild legends that had come down from the earlier times, which the Moslem "ḳuṣṣaṣ" or story-tellers had delighted to retouch and expand, side by side with sober translations from the Hebrew and Greek. And, just as the flourishing time of science under the Abbassids was short, so, too, with this branch of it. Ṭabari (d. 921) is already less affected by it; and Mas'udi (d. 957), although a free-thinking theologian, seems to have gone back to traditionalism. The result was simply that another set of assertions, much more trustworthy, was added to the contradictory jumble which was being passed on from writer to writer.

With Ibn Ḥazm, the Zahirite (d. 1064), however, a new development was reached, with results lasting to the present day. Ibn Ḥazm is distinguished in Moslem history for having applied to theology the principles of literal interpretation already used by the Zahirites in canon law, and for the remorseless vigor and rigor with which he carried on his polemics. He now marked a similar era in treating the doctrine of the older Scriptures, declaring them to be forgeries. Modern education in India and elsewhere has spread a more exact knowledge of the Jewish and Christian Scriptures.

For the present-day position of more orthodox Islam, reference may be made to Pfander's "Mizan al-Ḥaḳ," a translation of which appeared in London in 1867, and to the reply to it by Raḥmat Allah, "Iẓhar al-Ḥaḳ," a translation of which by Carletti was published in Paris in 1880.

Bibliography: Hughes, *Dictionary of Islam*, pp. 61, 211, 433, 439, 629, and elsewhere; this must, however, be used with

caution. The principal monograph is by Goldziher, in *Z. D. M. G.* xxxii. 341 *et seq.*; Steinschneider, *Polemische und Apologetische Litteratur in Arabischer Sprache*, 1877; Schreiner, in *Z. D. M. BIBLE, POLYGLOT. See BIBLE EDITIONS.

BIBLE TEXTS. See MASORAH.

BIBLE TRANSLATIONS: Jewish translations of the Old Testament were made from time to time by Jews, in order to satisfy the needs, both in public service and in private life, of those that had gradually lost the knowledge of the ancient national tongue. In Palestine itself, Hebrew was driven out first by Aramaic, then by Greek, and finally by Arabic. Portions of the Bible itself (in Daniel and Ezra) are written in Aramaic; and there is no consensus of opinion among scholars as to whether these parts were originally written in that tongue or were translated from the Hebrew. Though Hebrew remained the sacred and the literary language, the knowledge of it must have faded to such a degree in the second century preceding the common era that it became necessary for a "meturgeman" to translate the weekly Pentateuch and prophetic lessons as read in the synagogue (Berliner, "Onkelos," p. 7; Friedmann, "Akylos und Onkelos," p. 58). The assertion made by the two scholars just cited, that the Targums date from the time of Ezra, is unwarranted; since they are written in a West-Aramaic dialect. The authorities of the synagogue did not willingly allow such translations to be written down. They felt that this would be putting a premium upon ignorance of the text, and that the Biblical word would be in danger of being badly interpreted or even misunderstood. They sought to minimize the danger by permitting only one verse to be read and translated at a time in the case of the Law, and three in the case of the Prophets (Meg. iv. 4). Certain passages were never to be translated publicly; *e.g.*, Gen. xxxv. 22; Ex. xxxii. 21–25; Num. vi. 23–26; Lev. xviii. 21 (Meg. iv. 10; see Berliner, *l.c.* p. 217; Ginsburger, "Monatsschrift," xliv. 1). These passages are to be found in Pseudo-Jonathan and in the Midrashim for private use. It is distinctly stated that no written copy of the Targum was to be used in the public service (Yer. Meg. iv. 1); though for private purposes copies were allowed to be made. The Talmud, it is true, mentions a written Targum to the Book of Job which was in the possession of Rabban Gamaliel I. during the Second Temple, about 20–40 C. E. (Tosef., Shab. xiv. 2; Bab. Shab. 115a; Soferim xv. 2; compare Berliner, *l.c.* p. 90), and which was then buried by order of Gamaliel. In Yer. Shab. xvi. 1 a variant tradition tells of such a Targum having been in the hands of both the elder and the younger Gamaliel. Though this tradition is accepted even by Bacher (see ARAMAIC LANGUAGE), there are no means of verifying this statement, the existing Targum to that book being of a much later date. The tradition certainly can not refer to a Greek translation, as Grätz ("Monatsschrift," xxvi. 87) holds. According to Blau ("Einleitung," p. 79) the reference is to a copy written in the Old Hebrew script. The Targum is largely a paraphrase, reproducing the rabbinical tradition as regards the meaning of the text. For a history of this Targum see TARGUMS.

The Targums.

In passing a word should be said about the Samaritan version of the Pentateuch in the West-Aramaic dialect, which the Samaritans at one time spoke. It is as yet not possible to say in which century this version was made. Even though the citations under the caption *τὸ Σαμαρειτικόν*, which are found in the scholia to Origen's Hexapla, refer to it, Kohn believes that they are drawn from a Greek translation of the Samaritan made in Egypt. The text has been edited in Samaritan characters by H. Petermann and K. Vollers (Berlin, 1872–91), and in Hebrew characters by A. Brüll (1873–75), from the London Polyglot. M. Heidenheim's edition in Hebrew characters, of which Genesis only has appeared ("Bibliotheca Samaritana," i., Leipsic, 1884), has been very severely criticized (see Nestle, "Uebersetzungen der Bibel," p. 205).

Influence of Hellenism.

The settlement of large numbers of Jews in various parts of the Greek world, the Hellenization of Palestine, and the presence in Jerusalem of Jews from all countries, especially from those under Greek influence, in course of time forced the Rabbis to treat the question more liberally. According to Meg. ii. 1, it was forbidden to read the Megillah in Aramaic or in any other non-Hebrew language, except for the foreign Jews (לעוזות) in Jerusalem (compare the Baraita in Bab. Meg. 18a; Shab. 115b); and that such foreign Jews were in the city in large numbers is seen from Acts ii. 5–11. So, also, it is found, according to another tradition (Meg. i. 8), that it was permitted to write the Biblical books in any language (לשון); though R. Simon ben Gamaliel would restrict this permission to Greek (Yer. Meg. i. 1): "After careful examination it was found that the Pentateuch could be adequately translated only into Greek"). Evidence exists of the fact that in the synagogue of the לעוזות Greek was freely used (Tosef., Meg. iv. 13). There is even a tradition that Greek letters were engraven upon the chest in the Temple in which the shekels were kept (Sheḳ. iii. 2); and there is also Christian testimony to this effect (Justin, "Cohortatio ad Græcos," xiii.; Tertullian, "Apologia," xviii.; Frankel, "Vorstudien," p. 56). It is reported that in Asia Minor R. Meïr was unable to find a Megillah written in Hebrew (Tosef., Meg. ii. 4); and the weekly lessons both from the Law and the Prophets were at an early date read in Greek in Alexandria ("Jew. Quart. Rev." ix. 730). This makes comprehensible the statement that "the Law can be read in any language" (Soṭah 33a; Meg. 17b). The well-known passage in the Mishnah (Yad. iv. 5) which mentions the Levitical impurity occasioned by touching Biblical books, and which especially excepts the Targum from these provisions, has been very properly explained by Blau as referring to different degrees of sanctity only: no translation could, of course, be put upon the same level with the original Hebrew.

At a later time—perhaps in the second century of the present era—a different view seems to have prevailed; and it was said that the day on which the Law was translated into Greek was as unfortunate for the Jews as that on which the Golden Calf was made (Soferim i. 8, 9). Even to teach children Greek was forbidden (Soṭah ix. 14); though it was still permitted to teach a girl Greek, as a knowledge of that language was considered to be an accomplishment. Evidently this change of view was occasioned by the rise of the Christian Church, which used the Bible only in the Septuagint Version. It will be seen that in the Middle Ages the desire to please the women during the service and to instruct them led to the introduction of the vernacular, especially for the prophetical lessons. The treatise Soferim even makes it a duty "to translate, for the women, the weekly readings from the Pentateuch and the Prophets before the close of the service. The translation was not read verse by verse after the Hebrew, but as one continuous passage" (Abrahams, "Jewish Life in the Middle Ages," p. 345).

The Septuagint.

The oldest and most important of all the versions made by Jews is that called "The Septuagint" ("Interpretatio septuaginta virorum" or "seniorum"). It is a monument of the Greek spoken by the large and important Jewish community of Alexandria; not of classic Greek, nor even of the Hellenistic style affected by Alexandrian writers. If the account given by Aristeas be true, some traces of Palestinian influence should be found; but a study of the Egyptian papyri, which are abundant for this particular period, is said by both Mahaffy and Deissmann to show a very close similarity between the language they represent and that of the Septuagint, not to mention the Egyptian words already recognized by both Hody and Eichhorn. These papyri have in a measure reinstated Aristeas (about 200 B.C.) in the opinion of scholars. Upon his "Letter to Philocrates" the tradition as to the origin of the Septuagint rests. It is now believed that even though he may have been mistaken in some points, his facts in general are worthy of credence (Abrahams, in "Jew. Quart. Rev." xiv. 321). According to Aristeas, the Pentateuch was translated at the time of Philadelphus, the second Ptolemy (285–247 B.C.), which translation was encouraged by the king and welcomed by the Jews of Alexandria. Grätz ("Gesch. der Juden," 3d ed., iii. 615) stands alone in assigning it to the reign of Philometor (181–146 B.C.). Whatever share the king may have had in the work, it evidently satisfied a pressing need felt by the Jewish community, among whom a knowledge of Hebrew was rapidly waning before the demands of every-day life.

It is not known when the other books of the Bible were rendered into Greek. The grandson of Ben Sira (132 B.C.), in the prologue to his translation of his grandfather's work, speaks of the "Law, Prophets, and the rest of the books" as being already current in his day. A Greek Chronicles is mentioned by Eupolemus (middle of second century B.C.); Aristeas, the historian, quotes Job; a foot-note to the Greek Esther seems to show that that book was in circulation before the end of the second century B.C.; and the Septuagint Psalter is quoted in I Macc. vii. 17. It is therefore more than probable that the whole of the Bible was translated into Greek before the beginning of the Christian era (Swete, "An Introduction to the O. T. in Greek," ch. i.). The large number of Greek-speaking Jewish communities in Palestine, Syria, Mesopotamia, Asia Minor, and northern Africa must have facilitated its spread in all these regions. The quotations from the Old Testament found in the New are in the main taken from the Septuagint; and even where the citation is indirect the influence of this version is clearly seen. This will also explain in a measure the undoubted influence of the Septuagint upon the Syriac translation called the "Peshiṭta."

Being a composite work, the translation varies in the different books. In the Pentateuch, naturally, it adheres most closely to the original; in Job it varies therefrom most widely. In some books (*e.g.*, Daniel) the influence of the Jewish Midrash is more apparent than in others. Where it is literal it is "intolerable as a literary work" (Swete, *ib.* p. 22). The translation, which shows at times a peculiar ignorance of Hebrew usage, was evidently made from a codex which differed widely in places from the text crystallized by the Masorah. Its influence upon the Greek-speaking Jews must have been great. In course of time it came to be the canonical Greek Bible, as Luther's translation became the German, and the Authorized Version the English. It is the version used by the Jewish Hellenistic writers, Demetrius, Eupolemus, Artabanus, Aristeas, Ezekiel, and Aristobulus, as well as in the Book of Wisdom, the translation of Ben Sira, and the Jewish Sibyllines. Hornemann, Siegfried, and Ryle have shown that Philo bases his citations from the Bible on the Septuagint Version, though he has no scruple about modifying them or citing them with much freedom. Josephus follows this translation closely (Freudenthal, "Hellenistische Studien," ii. 171; Siegfried, in Stade's "Zeitschrift," iii. 32). It became part of the Bible of the Christian Church.

Aquila.

Two things, however, rendered the Septuagint unwelcome in the long run to the Jews. Its divergence from the accepted text (afterward called the Masoretic) was too evident; and it therefore could not serve as a basis for theological discussion or for homiletic interpretation. This distrust was accentuated by the fact that it had been adopted as Sacred Scripture by the new faith. A revision in the sense of the canonical Jewish text was necessary. This revision was made by a proselyte, AQUILA, who lived during the reign of Hadrian (117–138). He is reported to have been a pupil of R. Akiba and to have embodied in his revision the principles of the strictest literal interpretation of the text; certainly his translation is pedantic, and its Greek is uncouth. It strove only to reproduce the text word for word, and for this reason it grew rapidly in favor in strictly Jewish circles where Hebrew was yet understood. Not only in the days of Origen was it thus popular, but, according to the testimony of Jerome and Augustine, down to the fourth and fifth centuries. Of this translation a few fragments have come down to us, together with many citations made by Christian writers from Origen's Hexapla. In the middle of the sixth century a certain section of the Jews in Byzantium wished to read the Sabbath lections in Greek as well as in Hebrew; but the Rabbis and authorities desired that only Hebrew should be read. The discussion came before the emperor, Justinian, who in the year 553 issued a novella in which it was expressly stated that "the Hebrews are allowed to read the Holy Writ in their synagogues in the Greek language"; and the emperor advised them to use words. Strange to say, his version of Daniel entirely displaced that of the Septuagint; and in other portions his translations are occasionally found in ordinary Septuagint manuscripts. For this fact no sufficient reason has yet been given. Fragments of his work are also found in the remains of Origen's Hexapla. A third translator, Symmachus, whose date is not known, tried to smooth down Aquila's un-Grecian Greek by the use of both the Septuagint

PAGE FROM THE VATICAN MANUSCRIPT OF THE SEPTUAGINT VERSION OF EXODUS XIX. 14-XX. 17.

either the Septuagint or the version of Aquila (Grätz, "Gesch. der Juden," v. 435).

A second revision of the Septuagint was made by one Theodotion, perhaps a native of Ephesus, who may have lived toward the end of the second century. He is sometimes said to have been a convert to Judaism. His revision, also, is in the nature of a recurrence to the Hebrew text, but he avoids entirely the pedantry of Aquila, and his Greek gives a readable text; the only evidences of pedantry are his transliterations of a number of Hebrew and Theodotion. He seems to be the best stylist of all. According to Epiphanius, he was a Samaritan convert to Judaism; but Eusebius and Jerome make him out an Ebionite. Of the three other fragmentary translations into Greek used by Origen in compiling his Hexapla, very little is known. It is not even certain that they are the work of Jews.

Theodotion and Symmachus.

Toward the end of the fourteenth century or at the beginning of the fifteenth another translation of the Bible into Greek was made, of which the portion covering the Pentateuch, Ruth, Proverbs, Canticles, Ecclesiastes, Lamentations, and Daniel is still preserved in manuscript (MS. Gr., No. vii.) in the library of St. Mark's, Venice. It has been edited in a final form by Oscar von Gebhardt ("Græcus Venetus," Leipsic, 1875), with a preface by Franz Delitzsch. According to Von Gebhardt, Delitzsch, and Freudenthal ("Hellenistische Studien," p. 129), the author was a Jew, who for some reason or other preferred the commentary of David Ḳimḥi to that of Rashi. The author has also used the former Greek versions. The body of the work is done into Attic Greek; the Aramaic portions of Daniel are rendered into Doric. Delitzsch has tried to identify the author with a certain Eliseus, a learned Jew at the court of Murad I. (see "Theol. Lit. Zeit." i. 107; Swete, *l.c.* p. 56; Nestle, *l.c.* p. 84). On the other hand, P. Frankl has tried to show that the translator was a Christian and not a Jew ("Monatsschrift," xxiv. 372). According to Grätz ("Gesch. der Juden," vii. 318), Shemariah of Negroponte (1328-46) rendered the Book of Genesis into Greek, in an attempt to bridge over the cleft separating Karaites from Rabbinites. But Shemariah's work was a commentary and not a translation (Steinschneider, "Hebr. Bibl." xv. 39). On translations of the Hafṭarot into Greek see "Magazin," ii. 5.

Modern Greek.

The first attempt to translate the Bible into modern Greek was made by a monk of the island of Crete, Agapiou by name. In 1543 he published a rendering of the Psalms which followed closely the Septuagint translation. This preceded the first Jewish translation by only a few years. One column of the Polyglot Pentateuch (Constantinople, 1547) contained a Neo-Greek version in Hebrew characters. The dialect used is that of Epirus; and no single word of Turkish is to be found in it. Though full of Hebraisms, it is said to be of importance for the study of Greek linguistics. The few copies of this edition which are now known to exist do not agree; and it has been suggested that corrections were made in the text during printing. In the "Revue des Etudes Grecques" (iii. 288 *et seq.*) Belleli has reprinted the first four chapters of Genesis; and a facsimile of the whole has been published by D. C. Hesseling, "Les Cinq Livres de la Loi" (Leyden, 1897; compare the discussion in "Rev. Etudes Juives," xxxv. 132, 314). A translation of Jonah into modern Greek is found in a manuscript volume of prayers in the library of the University of Bologna; and it is known, from R. Meïr Katzenellenbogen, that in his day (1470-1565) it was customary in Padua to read the Hafṭarah of the Atonement Day in the vernacular; this was also the case in Candia (Kapsali, ed. Lattes, p. 22). L. Modena has shown ("Cataloghi dei Codici Orientali," p. 335, Florence, 1876) that this thirteenth-century manuscript, which came originally from Canea, is similar to MS. No. 1144 in the Bodleian collection (Neubauer, "Cat. Bodl. Hebr. MSS." col. 333; "Rev. Etudes Juives," xxiii. 135). In 1576 Moses ben Elijah Phobian, or Popian, published at Constantinople a Neo-Greek translation of Job for the express purpose of facilitating the teaching of Hebrew (Belleli, in "Rev. Etudes Juives," xxii. 250; compare *ib.* xxiii. 136, xxiv. 160, and Güdemann, "Quellen," pp. 239-289).

The Peshiṭta.

The Syriac translation of the Old Testament was undoubtedly made directly from the Hebrew; though at Antioch, during the third century of the present era and at later periods, it was revised so as to make it conform to the Septuagint. The history of its origin is obscure; but it was probably made in Mesopotamia during the first century. As with most of the older translations, various hands have been at work here. Perles ("Meletemata Peschittoniana," Breslau, 1859), Prager ("De Veteris Testamenti Versione Peschitto," Göttingen, 1875), and Bacher (see Aramaic Language) believe it is the work of Jews: but this has not yet been proved; and the view of Dathe, Eichhorn, Hitzig, Nöldeke, and Renan, that it owes its origin to Judæo-Christians, seems more probable. Perles, however, has shown that there are unmistakable evidences in the Peshiṭta of the influence of the Targum, especially in Genesis. This has been confirmed for Ezekiel by Cornill ("Das Buch Ezekiel," p. 154), for Chronicles by S. Fränkel (in "Jahrb. für Protestantische Theologie," 1879), and for Job by Stenig ("De Syriaca Libri Jobi Interp." Helsingfors, 1887), Mandl ("Peschitto zu Hiob," Leipsic, 1892), and Hauman (in Stade's "Zeitschrift," xix. 29). The closest agreement between the two versions is found in the Book of Proverbs; but it is now generally held that in this case the Targum reflects the Peshiṭta and not vice versa, as Maybaum contends (Merx, "Archiv," vol. ii.). This view is upheld by a consideration of the general character of the translation (Pinkuss, in Stade's "Zeitschrift," xiv. 101; see also Duval, "Littérature Syriaque," 1899, pp. 31 *et seq.*).

Arabic Versions.

It is impossible to tell at how early a time the Jews commenced to translate the Bible into Arabic. After the early victories of the Mohammedans, Arabic civilization and Arabic surroundings brought the Jews into very close connection with the Arabic language. Even where Hebrew was still kept up, the Hebrew alphabet must at times have gone out of fashion; for there exist some Karaite manuscripts of the tenth century, giving the Hebrew text in Arabic characters and with the letters used as vowel-signs (R. Hörning, "British Museum Karaite MSS." London, 1889; Margoliouth, "Cat. Hebr. and Samaritan MSS. Brit. Mus." i., Nos. 103, 104). That the Jews had little scruple in reading the Bible in Arabic may be seen from Judah ibn Tibbon's advice to his son to read the Sabbath lections in that tongue ("Jew. Quart. Rev." xii. 484). There are no facts, however, which prove that the early Jews of Arabia possessed any Arabic translation of the Bible. There is a tradition, going back to Abu Huraya, a contemporary of Mohammed, that "The People of the Book used to read the Taurah [Torah] in Hebrew and interpret it in Arabic to the followers of Islam"; which tradition is the basis of the polemics of Abu Mohammed ibn Ḥazm (d. 1064). Another tradition says that "Ka'ab the rabbi brought a book ["sifr"] to Omar the calif and said, 'Here is the Torah, read it'" (Goldziher, in "Z. D. M. G." xxxii. 344). The evidence is insufficient; and there is even less warrant for Sprenger's idea that apocryphal writings were current in Arabia during Mohammed's days (see Kuenen, "Volksreligion," p. 297). At a later time, however, such translations must have existed, even though little credence can be placed upon the assurances of the polemical writers that they had "read this in the Torah" or "in the Zabur [Psalms]" (*ib.* p. 351; compare Stade's "Zeitschrift," xiii. 315). The Fihrist (ed. Flügel, i. 22) of Al-Nadim mentions an Aḥmad ibn Abd Allah ibn Salam who translated the Bible into Arabic, at the time of Harun al-Rashid. Faḥr al-Din al-Razi mentions a translation of Habbakuk by the son of Rabban al-Ṭabari ("Z. D. M. G." xlii. 645). Many of the Arabic historians, as Al-Ṭabari, Mas'udi, Ḥamza, and Biruni, cite passages and recount the early history of the Jews in a most circumstantial manner. Ibn Ḳutaibah, the historian (d. 889), says that he read the Bible; and he even made a collection of Biblical passages in a work which has been preserved by Ibn Jauzi of the twelfth century (see Haupt and Delitzsch, "Beiträge zur Assyriologie," iii. 46; Stade's "Zeitschrift," xv. 138).

Saadia Gaon.

The first important Arabic translation is that of Saadia Gaon (892–942). The influence of this translation was in its way as great as that of the gaon's philosophical work. It has remained to this day *the* version for the Jews in Arabic-speaking countries: it is dignified by the name "Targum"; and in many of the South Arabian Bible manuscripts it follows the Aramaic verse by verse, as the Aramaic follows the Hebrew. Saadia in the main takes the Targum as his guide, especially in doing away with all anthropomorphisms. His chief thought, however, is to produce a readable and intelligible translation. In this sense his translation may be called free; he was evidently working for a general reading public, both Jewish and Mohammedan, and not for scholars. Ibn Ezra blames him for the apparent ease with which he passes over difficulties. But, in calling this translation a "tafsir" (explanation), he meant to indicate that he aimed to present the simple sense ("basiṭ" = "peshaṭ") of the Biblical text; and Abu al-Walid looks upon him as the chief representative of this method. His fervent belief in the verbal inspiration of the Biblical text kept him free, on the one hand, from the influence of his rationalistic philosophy and, on the other, from the allegorical method of the Talmud (Editio Derenbourg, v. x.; Bacher in Winter and Wünsche, "Jüdische Litteratur," iii. 244). When no word in Arabic will exactly express his meaning, he uses the Hebrew word or adopts the Hebrew construction. In addition, he attempts to reproduce Hebrew words by Arabic words with a similar sound (Munk, in Cahen's "Bible," ix. 127). Saadia, in the introduction to the commentary on the Pentateuch, states that he translated it twice: once with a diffuse commentary; the second time without the commentary. Of the first translation only a few fragments and citations by Abraham ibn Ezra, Baḥya ben Asher, Abraham Maimonides, etc., have been preserved (Derenbourg's ed. of the Pentateuch, Hebrew part, p. vii.; "Monatsschrift," xli. 205; "Jew. Quart. Rev." xii. 536). Of this work, at one time complete, only the Pentateuch, Isaiah, Minor Prophets, portions of Judges, Psalms, Job, Proverbs, and Daniel are now extant.

Saadia's translation was first printed in the Polyglot Pentateuch, Constantinople, 1546. It was reproduced in Arabic characters in the Paris and London Polyglots (1645–57). From time to time more or less critical editions of various portions have been published; a complete list of these editions as well as of the extant manuscripts is given by Steinschneider in the "Kaufmann Gedenkbuch," pp. 153 *et seq.* (see also "Monatsschrift," xli. 124, and Engelkemper, "De Saadiæ Gaonis Vita, Bibliorum Versione, etc.," Münster, 1897). A definite edition of the translation and commentaries was commenced by the late Joseph Derenbourg, "Œuvres Complètes de R. Saadia," Paris, 1893 *et seq.*, and is being carried on by Hartwig Derenbourg and Mayer Lambert; the Pentateuch, Isaiah, Proverbs, and Job have appeared (1902).

Other Arabic Versions.

A number of other translations into Arabic must have existed. Abu al-Walid mentions some of them, though it can hardly be determined to-day to which translations he refers (Bacher, "Leben und Werke des Abulwalid," p. 99). Some of them, though bearing no direct relation to that of Saadia, show evident traces of his influence. This is true at least of a translation of the Minor Prophets, Isaiah, Jeremiah, and Ezekiel, found in Codex Huntington (No. 206 in the Bodleian Library, Oxford). From this manuscript Hosea was published by R. Schröter in Merx, "Archiv," i. 28 *et seq.* M. Peritz has edited "Zwei Alte Uebersetzungen des Buches Ruth," Berlin, 1900 ("Monatsschrift," 1899, pp. 49 *et seq.*). The second of these, from a manuscript in the British Museum, though it shows most of the peculiarities of Saadia's translation, is not by him (see also Poznanski, in "Zeit. für Hebr. Bibl." iv. 167). Nothing is known of the fragments of the Arabic version of the Pentateuch found in the twelfth-century manuscript, St. Petersburg, Nos. 137 and 138 (Harkavy-Strack, "Catalog," p. 164). Another translation of the Five Scrolls is found in British Museum MSS., Nos. 146, 147 (Poznanski, in "Rev. Etudes Juives," xli. 302). A rimed version of the Psalms was made by one Ḥafẓ al-Ḳuṭi (tenth century), which is contained in a manuscript of the Ambrosian Library in Milan (Hammer-Purgstall in "Bibl. Ital. di Letteratura," civ. 36), copied in 1625 from a manuscript in the Escurial, which has since been lost. It is cited by Moses ibn Ezra in his "Poetics"; but it is evident that this translation was made by one who was not even, as has been supposed, a baptized Jew ("Hebr. Bibl." x. 26). Neubauer has pointed out ("Rev. Etudes Juives," xxx. 65) that it contains Christian quotations; and the term "the Goth" (*ib.* p. 318) would sufficiently indicate that the author was a Christian. A version of Ecclesiastes by Judah ibn Ghayyat has been published by J. Löwy, Leyden, 1884 (see Rahmer's "Jüdisches Litteratur-Blatt," May 29, 1884, p. 88). In the thirteenth century a translation of the Pentateuch was made by an African Jew, who also based his work on that of Saadia. It is known as the "Arabs Erpenii" ("Pent. Mosis Arabice," Lug.-Bat. MS., No. 1622). (On a supposed translation of the Psalms by Saadia ben Levi Azankot see Steinschneider, "Cat. Bodl." col. 2227.) In modern times several Arabic translations of the Bible have been published in India; *e.g.*, by Ezekiel Shem-Ṭob David, Bombay, 1889, and the Apocrypha by Joseph David, Bombay, 1895.

Karaite Versions.

It was natural that the Karaites should refuse to make use of the version in Arabic made by their arch-enemy, Saadia. Only two or three of their attempts to replace it have come down; and even these have been preserved in a most fragmentary form only. One of the earliest of these attempts was that made by Joshua b. Ari, or, to give him the name by which he is better known, Abu al-Faraj Furḳan ibn Asad, a learned Jerusalem Karaite of the middle of the eleventh century. A portion of his Arabic translation of the Pentateuch is to be found in MS. Or. 2491 of the British Museum. It shows occasionally a decided rationalistic tendency, explanatory glosses being introduced here and there into the text (G. Margoliouth, in "Jew. Quart. Rev." xi. 190). Whether Japheth ha-Levi (Ibn Ali al-Basri) really translated any parts of the Bible (Margoliouth, "Descriptive List," pp. 25 *et seq.*), is undetermined; but it is known that he had the ambitious desire to write an extensive commentary upon the whole Bible (Steinschneider, "Hebr. Uebers." p. 941). According to Margoliouth ("Cat. Hebr. and Samaritan MSS. Brit. Mus." p. 71), MS. Brit. Mus. 101 (Or. 2481) contains an Arabic translation of the Pentateuch based upon that of Japheth.

Samaritan Revision of Saadia.

The translation of Saadia, as is said above, had become a standard work in Egypt, Palestine, and Syria. But to the Samaritans it was as distasteful (Harkavy, "Ḥadashim," No. 7, p. 22) as it no doubt had been to the Karaites, because of the rabbinical interpretations which it represented. At some time, perhaps during the thirteenth century, it was revised by a Samaritan with the express purpose of adapting it to the use of his coreligionists. This revision is usually held to have been made by Abu Sa'id ibn abu al-Ḥusain ibn abu Sa'id, and has claimed the attention of European scholars such as De Sacy ("Mémoires de l'Académie," 1808, xlix. 1 *et seq.*), Gesenius ("De Pentateuchi Samaritani Origine, Indole et Auctoritate," p. 120, Halle, 1815), and Juynboll ("Commentatio de Versione Arabico-Samaritana," Amsterdam, 1846). Of it Genesis, Exodus, and Leviticus have been edited by A. Kuenen (Leyden, 1851–54; see Kohn, "Zur Sprache der Samaritaner," p. 134; Nestle, *l.c.* p. 153). Abu Sa'id was supposed to have lived about the year 1070; but Wreschner ("Samaritanische Tradition," 1888, p. xix.) has shown that he flourished in the thirteenth century. According to Joseph Bloch, "Die Samaritanisch-Arabische Pentateuch Uebersetzung," p. 16, Berlin, 1901, the real translator is perhaps the Tyrian, Abu al-Ḥasan, and Abu Sa'id is only a scholiast. If this be true, it was not the first translation; for one was made in the twelfth century by Ṣadaḳa ibn Munajja of Damascus, a physician in the service of Sultan Malik al-Ashraf (Haji Khalifah, ii. 402; Neubauer, "Chronique Samaritaine," p. 112).

Persian Versions.

It is not known at what time the first translations of the Bible were made into Persian. From quotations in the "Dinkard" and the "Shikand Gumanik Viyar" (theological works of the Sassanian period), James Darmesteter has supposed that one existed in Pahlavi ("Rev. Etudes Juives," xviii. 5); but the supposition is unsupported by any real evidence. Blau also ("Einleitung," p. 95) seems to incline to this opinion, because Bab. Meg. 18a speaks of a scroll of Esther in the Elamite and Median languages. According to Maimonides, the Pentateuch was translated into Persian many hundred years previous to Mohammed (Zunz, "G. V." 2d ed., p. 9). This statement also can not be further substantiated. The earliest version of which we have any knowledge is that made by Jacob ben Joseph Tawus, and printed in Hebrew characters in the Polyglot Pentateuch, Constantinople, 1546. This was transcribed into Persian characters and translated into Latin by Thomas Hyde, in which form it was published in the London Polyglot. Kohut ("Beleuchtung der Persischen Pentateuch-Uebersetzung," 1871) places Tawus in the first half of the sixteenth century (compare also Zunz, "G. S." iii. 136). According to Steinschneider ("Jewish Literature," p. 321), Tawus made use of an earlier translation made in the thirteenth century (see Munk, in Cahen's "Bible," vol. ix.), which followed the Targum and the commentary of David Ḳimḥi. A number of translations into Persian are to be found in the various collections of manuscript, of which the following is a partial list:

Pentateuch: Vatican MS. 61 (Guidi, in "Rendiconti . . . dei Lincei," 1885, p. 347).
    Codex Adler B. 63, written in 1776 ("Jew. Quart. Rev." x. 596).
    Codex St. Petersburg 141 (not by Tawus; Harkavy-Strack, "Cat." p. 166).
Psalms: Vatican MS. 37; Bodleian MS. 1830.
    Vatican MS. 42; Bodleian MS. 1827 (Jewish? Horn, in "Z. D. M. G." ii. 7).
    Codex Adler B. 27 ("Jew. Quart. Rev." x. 592).
    Brit. Mus. MSS. 159, 160 (transl. about 1470 by Baba b. Muriel of Ispahan; Margoliouth, "Cat. of Hebr. and Samaritan MSS. Brit. Mus." p. 120).
    Brit. Mus. MS. Or. 4729 (dated 1822; "Jew. Quart. Rev." vii. 119).
Proverbs, Canticles, Ruth, Ecclesiastes: Paris MS. 116 ("Cat. des MSS. Héb. de la Bibl. Nat.").
Proverbs, Canticles, Ecclesiastes: Codex Adler B. 46 ("Jew. Quart. Rev." x. 595).
    Paris MS. 117 ("Cat. des MSS. Héb. de la Bibl. Nat.").
Proverbs: On a translation now lost, see Lagarde, "Symmicta," ii. 14.
Job and Lamentations: Codex de Rossi 1093 (Zunz, "G. S." iii. 135).
    Paris MS. 118 ("Cat. des MSS. Hébreux de la Bibl. Nat.").
Job: Codex St. Petersburg 142 (Harkavy-Strack, p. 167).
    Paris MSS. 120, 121 ("Catalogue," etc.).
Song of Songs: Codex Adler B. 12 ("Jew. Quart. Rev." x. 589).
Daniel: Paris MSS. 128, 129 ("Catalogue," etc.).
Esther: Codex Adler T. 16 and 27 ("Jew. Quart. Rev." x. 598, 599).
    Paris MS. 127 ("Catalogue," etc.).
Tobit, Judith, Bel and Dragon, Antiochus: Codex Bodleian 130.
Minor Prophets: Codex St. Petersburg 139 and Codex B. 18 (Harkavy-Strack, pp. 165, 262).
Haftarot: Codex St. Petersburg 140 (Harkavy-Strack, p. 166).

There are also some quite modern translations into Persian, as ס' תהלים עם תרגום פרסי, Vienna, 1883 (transl. by Benjamin Cohen of Bokhara; see "Lit.-Blatt für Or. Phil." i. 186); משלי עם תרגום

פארסי יהודית, Jerusalem, 1885; Job, *ib.*; the latter two also translated by Benjamin Cohen.

Tatar Versions.

For the use of the Karaites in the Crimea and Turkey, a translation has been made into the Tshagatai-Tatar dialect. The Pentateuch was printed (text and Tshagatai in Hebrew characters) by 'Irab Ozlu & Sons, Constantinople, 1836, with the title ספר בראשית עם פרוש המלות בלשון ישמעאל וגו'; on the margin are the מנין המצות; and acrostic poems are added by Abraham ben Samuel, Simḥah ben Joseph אגין (Chages?), Isaac Cohen, and Isaac ben Samuel Cohen of Jerusalem. The whole Bible was printed in Tshagatai by Mordecai Trishkin (4 vols., Goslov, 1841–42; see "Jew. Quart. Rev." xii. 686). Extracts are also to be found in the זכר רב of Musafia, printed at Ortaköi (Constantinople), 1825, and published by the same firm that edited the Pentateuch of 1836 ("Jew. Quart. Rev." xiii. 549). Manuscripts of such translations exist also in the Imperial Library at St. Petersburg (Nos. 143–146; Harkavy-Strack, "Cat." pp. 167–170).

Coptic and Hungarian.

Talmud tradition expressly speaks of a Coptic translation of the Bible (Meg. 18a; Shabbat 115a). Cornill, in his examination of the Coptic text of Ezekiel, finds the one published by Tattam to be of composite character and not simply a translation of the Septuagint. Blau believes that it was made directly from the Hebrew text ("Einleitung," p. 91; "Jew. Quart. Rev." ix. 728).

No Jewish translation into Hungarian was made until quite recently, the Jews of Hungary making use of the Catholic and Protestant versions of the sixteenth and seventeenth centuries. About the middle of the nineteenth century M. Bloch (Ballaghi) attempted such a rendering; but he was not successful. His plan has recently (1902) been carried out; and the Pentateuch (by M. Bernstein and M. Blau), Joshua, Judges, Samuel, and Kings (by Julius Fischer, Bánóczi, Bacher, and Krauss) have appeared (see "Rev. Etudes Juives," xliii. 158).

Judæo-German.

The translation of the Bible into the German dialect spoken by the Jews of middle Europe was commenced at an early date. A manuscript in the collection of De Rossi, dated Mantua, 1421, contains a Judæo-German translation of Joshua, Judges, Jonah, and four of the Megillot. De Rossi supposed them to be written in Polish because they were brought to Italy by Polish Jews (Neubauer, in "Jew. Quart. Rev." iv. 703). Such translations were technically known as "Teutsch-Ḥummash." A printer had innocently placed the words צאינה וראינה (Cant. iii. 11) on the title-page of such a translation made by Jacob ben Isaac of Janow (Lublin, 17th century?), from which they became familiarly called "Ze'enah U-re'ennah"; and down to the time of Mendelssohn's translation they were popular reading-books, especially for women on Saturdays. They were embellished with all manner of explanations, legends, and moral sayings, which were inserted into the text (Steinschneider, "Volkslitteratur der Juden," p. 17). The first rendering of this kind was made by a convert, Michael Adam, the translator of Yosippon into Judæo-German. It was published by Paulus Fagius, Constance, 1543–44 (Steinschneider, "Cat. Bodl." Nos. 1187, 4333; Perles, in "Monatsschrift," xxv. 361; *id.* "Aramäische Studien," p. 167; "Rev. Etudes Juives," v. 143, 315), and was reprinted at Basel in 1583 and 1607. It has nothing in common with Luther's translation, as Wolf ("Bibl. Hebr." iv. 198) supposes. This Pentateuch was reprinted at Cremona, 1560 (ed. Judah ben Moses Naphtali); Basel, 1583; *ib.* 1603; Prague, 1608, 1610; Frankfort-on-the-Main, 1687. A rimed version of it appeared at Fürth, 1692, and Wilmersdorf, 1718; and a second rimed version of Genesis was made by a certain Aaron of Prague during the seventeenth century. In 1543–44 Paulus Æmilius published a similar translation of the Pentateuch (Augsburg, 1544). It is uncertain whether Æmilius simply copied the edition of Adam or not (Steinschneider, in "Zeit. für Gesch. der Juden in Deutschland," i. 286). Æmilius also edited at Ingolstadt (1562) the Judæo-German rimed translation of Samuel in German characters. This was a mere copy of the edition in Hebrew characters by Ḥayyim ben David Schwartz, Augsburg, 1544 (*ib.* i. 285). It was called the שמואל בוך ("Samuel Book"). This was reprinted at Mantua about 1562; Cracow, 1593; Prague, 1609; Basel, 1612. Schwartz also published a rimed translation of Kings, דש ספר מלכים אין טוייטשר שפראך, Augsburg, 1543; Prague, 1607. A translation of Judges (rimed) appeared at Mantua in 1561; one of Joshua, "derneut in teutscher Sprach, wol gereimt . . . hübsch mit Midraschim," at Cracow in 1588 or 1594; one of Canticles, by Isaac Sulkes, at Cracow in 1579; another by Moses Särtels, Prague, 1604; one of Jeremiah, *ib.* 1602; one of Ezekiel (rimed), *ib.* 1602; and one of Jonah, "ספר יונה mit viel חדושים und alle Midraschim" (rimed), Prague, before 1686.

The first Judæo-German translation of the Psalms was that of Elijah Levita (Venice, 1545; Zurich, 1558, etc.); it was arranged in the order of the psalms said on each day of the week. A rimed תהלים בוך by Moses Stendal appeared at Cracow in 1586. Proverbs was translated by Mordecai ben (Isaac) Jacob Töplitz, Cracow, 1582 (a version also appeared at Amsterdam, 1735); and Job by the same (?), Prague, 1597. A translation of Kings appeared at Cracow in 1583 (Neubauer, in "Rev. Etudes Juives," v. 144); one of Esther, *ib.* 1596; and one of Daniel, "דניאל בוך in teutscher Sprach hübsch und bescheidlich, gar kurzweilig darin zu leien Weiber und Meidlich," Cracow, 1588. These editions of Cracow came from the press of Isaac ben Aaron Prossnitz, whose intention it was to publish the whole Bible in Judæo-German in order that "women and children might be able to read without the help of a teacher" (Perles, in "Monatsschrift," xxv. 353).

Isaac Blitz's Bible.

The first complete Bible in Judæo-German was that of Isaac Blitz, Amsterdam, 1676–78. It was for the use of the Polish Jews who had fled thither a few years previously because of the Chmielnicki persecutions. It must have been the intention of the translator to push its sale in Poland also; for letters patent were granted for it by John Sobieski III. This translation exercised very little influence, as the Judæo-German in which it was written contained many Dutch words and expressions (Wiener, "Yiddish Literature," p. 19). A second translation, in opposition to that of Blitz, was published in Amsterdam in 1679 by Joseph Witzenhausen, formerly a compositor in the employ of Uri Phoebus, the printer of the former edition. Witzenhausen was able to secure the approbation of the Council of the Four Lands, and his attempt to make the Athias edition supersede that of Phoebus occasioned much bad blood (see Joseph ATHIAS). A second edition of this last translation was published at Amsterdam in 1687, and a third, in German characters, at Wandsbeck in 1711. A third translation, by Süssman Rödelheim and Menahem Man Levi, under the title מגישי מנחה, appeared at Amsterdam in 1725–29. At the same place in 1735 there was published an edition of Proverbs ("Cat. Rosenthal. Bibl." i. 207). It was more than one hundred years before another complete German translation was published, namely, at Prague, 1833–37; but this was of a composite character, as its editor, W. Meyer, made use of various translations (in general, compare Grünbaum, "Jüdisch-Deutsche Chrestomathie," Leipsic, 1882).

The growing acquaintance of the Jews with German literature soon produced a marked discontent with these Judæo-German translations. This discontent was voiced by the rabbis of Berlin, Mecklenburg, and Courland (Zunz, "G. V." 2d ed., p. 467). To meet this want Mendelssohn stepped into the breach; and his translation of the Pentateuch is worthy of more than a passing notice. It had a special importance in that it not only aroused an esthetic interest in literature on the part of those who read it, but also paved the way for a more general use of High German among the Jews of Germany, among whom it may be said to have introduced a new literary era (Kayserling, "Moses Mendelssohn," p. 286; "Literaturblatt des Orients," 1840, p. 320; Auerbach, in "Zeitschrift für Gesch. der Juden in Deutschland," i. 25; Wogue, "Hist. de la Bible et de l'Exegèse," p. 329). Mendelssohn undertook the work for the instruction of his own children; but upon the advice of Solomon Dubno, consented to its publication on condition that Dubno should write a commentary explaining the reason why Mendelssohn chose his various renderings. A specimen, "'Allim Litrufah," was edited by Dubno (Amsterdam, 1778), and aroused the liveliest interest on the part of Christians as well as of Jews. It was natural that it should also evoke strenuous opposition, especially on the part of those Jews who feared that the reading of High German would cause the Jewish youth to neglect their Hebrew studies. Foremost in this opposition were the rabbis Ezekiel Landau (d. 1793) of Prague, Raphael ha-Kohen (1722–1803), of Hamburg, Altona, and Wandsbeck, Hirsch Janow (1750–85) of Fürth, and Phineas Levi Horwitz (1740–1803) of Frankfort-on-the-Main.

German Translation—Mendelssohn.

In June, 1779, the proposed translation was put under the ban at Fürth. It was also forbidden in some cities of Poland, and is said even to have been publicly burned. An additional ban was laid upon it by Raphael ha-Kohen (July 17, 1781; see Grätz, "Gesch. der Juden," xi. 585, note 1). Work on it was, however, continued with the assistance of Solomon Dubno, Hertz Homberg, and Aaron Jaroslav. Dubno became frightened at the continued opposition, and retired, forcing Mendelssohn himself to do an additional share of the work. Though the translation was in High German, it was printed in Hebrew characters under the title ס' נתיבות השלום, with a Hebrew commentary or "biur," the commentaries of Rashi, etc., and an introduction by Naphtali Hertz Wessely. It appeared in parts—Genesis, Berlin, 1780; Exodus, *ib.* 1781; Leviticus, *ib.* 1782; Numbers and Deuteronomy, *ib.* 1783—and has often been republished both in German and in Hebrew characters.

An attempt was made in Mendelssohn's time to issue an edition in German characters; but the German Jews at that time looked upon the work as so exceptionally strange that its publication had to be suspended (Bernfeld, "Juden im 19 Jahrhundert," p. 9). Mendelssohn also published (Berlin, 1783) a translation of the Psalms (which, however, follows closely that of Luther; "Literaturblatt des Orients," 1840, p. 320) and one of the Song of Solomon (*ib.* 1788). These translations attempted a conscientious reproduction of the text, and sought to make the pathos of the original felt in the German; and they were followed by a large school of translators (see BIURISTS). C. E. J. Bunsen ("Vollständiges Bibelwerk," I. xvii.) calls these and similar translations "Synagogenbibeln." He says "they do not speak in the historical German language, but in the Hebræo-rabbinical Judæo-German"; a verdict which is wholly one-sided, if one excepts the proper names, where an attempt was made to reproduce the Hebrew originals ("Monatsschrift," ix. 156).

Only a few of Mendelssohn's followers can be mentioned here. His translation of the Song of Solomon was published after his death by Joel Löwe and Aaron Wolfson. The first of these also published a translation of Jonah (Berlin, 1788); while the second translated Lamentations, Esther, and Ruth (Berlin, 1788), Job (*ib.* 1788; Prague, 1791; Vienna, 1806), and Kings (Breslau, 1809). Isaac Euchel translated Proverbs (Berlin, 1790; Dessau, 1804), introducing, however, philosophical expressions into the text, thereby often clouding the meaning. David Friedländer, who translated Ecclesiastes (in German characters, Berlin, 1788), wrote in a belletristic style. Meïr Obernik translated Joshua, Judges, and Samuel, and, together with Samuel Detmold, the Second Book of Samuel (מנחה חדשה, Vienna, 1792). M. Philippson, Joseph Wolf, Gotthold Salomon, Israel Neumann, and J. Löwe were the translators of the Minor Prophets published in Dessau, 1805, under the title מנחה טהורה (stereotyped as early as 1837). Wolf also published a translation of Daniel (Dessau, 1808); David Ottensosser one of Job (Offenbach, 1807), Isaiah (Fürth, 1807), and Lamentations (*ib.* 1811), and together with S. J. Kohn, of Jeremiah (*ib.* 1810). A translation of Isaiah, Jeremiah, Ezekiel, Daniel, Ezra, Nehemiah, and Chronicles by Ottensosser, Kohn, and Schwabacher appeared at Fürth, 1807–23. Isaiah was also translated by Isaiah Hochstetter (Winter and Wünsche, "Die Jüdische Litteratur," iii. 744), Jeremiah by Heinemann (Berlin, 1842), Job by Beer Blumenfeld (Vienna, 1826), and Psalms by Shalom Kohn (Hamburg, 1827). The period of the Mendelssohnian biurists may be fittingly said to end with the Bible published by Moses Landau (20 parts, Prague, 1833–37, mentioned above. Of this work the translations of the Pentateuch, Psalms, and Five Scrolls were those of Mendelssohn; the translations of the other books were contributed by Moses Landau, J. Weisse, S. Sachs, A. Benisch, and W. Mayer; and the Minor Prophets were reprinted from the edition of Dessau, 1805 (Steinschneider, "Cat. Bodl." No. 972). It may also be added here that an edition of Proverbs, Job, and the Five Scrolls, with translations by Obernik, Euchel, Wolfson, Mendelssohn, and Friedländer, had already appeared at Vienna in 1817–18; and in Hebrew characters at Basel in 1822–27.

Other German Versions.

The translation of Mendelssohn threatened to become canonical: but the German Jews had tasted of modern learning; and toward the latter end of the first half of the nineteenth century various individual attempts were made to provide better translations for the general public, which should reflect the progress then already made in Biblical science. The first in the field was Joseph Johlson (Asher ben Joseph of Fulda), whose attempt, though worthy of notice here, was not successful, notwithstanding the fact that the text was accompanied by learned philological notes (Minor Prophets, Carlsruhe, 1827; Pentateuch, *ib.* 1831; the historical books, *ib.* 1836). Bunsen (*l.c.* p. xvii.) even declares his work to be "geistreich und scharfsinnig" (compare Geiger's "Zeitschrift," 1836, p. 442; 1837, p. 121). Mention may also be made of A. A. Wolff's double translation (word for word and metrical) of Habakkuk; Phœbus Philippsohn's "Hosea, Joel, Jonah, Obadiah und Nahum in Metrisch-Deutscher Uebersetzung," Halle, 1827; A. Rebenstein's (Bernstein's) sentimental translation of the Song of Solomon (Berlin, 1834; compare "Literaturblatt des Orients," 1840, p. 324); S. H. Auerbach's Ecclesiastes (Breslau, 1837), into which he reads his own philosophy; and Michael Sachs's Psalms (Berlin, 1835). The last was a clear protest against previous attempts, which reflected too much the individuality of the translators. Sachs tried to give "a purely scientific and philological" rendering of the original, taking Rückert as his guide, whose translation of Ps. lxviii. he inserted bodily (see Zunz, in Geiger's "Wiss. Zeit. Jüd. Theol." ii. 499, and in "G. S." iii. 116, who characterizes the work as "somewhat stiff and awkward"). It was reprinted in the edition of the Prophets and the Hagiographa דרך מסילה, Fürth, 1842–47 (Zedner, "Cat. Hebr. Books Brit. Mus." p. 119), and was revised for Zunz's Bible ("Monatsschrift," xxxviii. 507). This protest was carried to excess by Gotthold Salomon, who, in addition to his work on the Dessau edition of the Minor Prophets (see above), translated the Pentateuch (Krotoschin, 1848–49: see the criticism of Hess in "Allg. Zeit. des Jud." 1839. p. 80, and of L. Skreinka in "Literaturblatt des Orients," 1840, pp. 468 *et seq.*). The translations of Job (Glogau, 1836) and of the Pentateuch (*ib.* 1840) by Heimann Arnheim, though in Hebrew characters and intended chiefly for use as part of the ritual, show good judgment and philological schooling ("Literaturblatt des Orients," 1840, p. 641). Only a mere mention can be made of L. Herzberg's Ecclesiastes (Brunswick, 1838; see Zunz, in Jost's "Annalen," 1839, p. 102) and of L. H. Löwenstein's metrical translation of Proverbs and Lamentations (Frankfort-on-the-Main, 1837–38). Gotthold Salomon's "Deutsche Volks- und Schul-Bibel" (Altona, 1837) was the first translation of the entire Old Testament in German characters made by a Jew. It was stereotyped and was intended to be sold so cheaply that every one could afford to buy it (see the correspondence in Jost's "Annalen," 1839, Nos. 12 *et seq.*).

Zunz's Bible.

More important was the attempt made by L. Zunz to provide a Bible for school and home. As editor, he translated only the books of Chronicles, the rest of the work being done by H. Arnheim, Julius Fürst, and M. Sachs (Berlin, 1838). Zunz succeeded in a large measure in producing a translation which, while it kept strictly to the Masoretic text, was abreast of the scholarship of his day and free from the circumlocutions and idiotisms of previous translators, though it still preserved the transliteration of the Hebrew names (Nestle, "Bibel-Uebersetzungen," p. 142). Mendelssohn had translated neither Prophets nor Hagiographa; and it is therefore no wonder that the Zunz Bible passed through at least six editions up to 1855 and twelve up to 1889 (see Rosin, in "Monatsschrift," xxxviii. 512). Only a few years later another popular translation was produced by Solomon Herxheimer (Berlin, 1841–48; 3d ed. of the Pentateuch, 1865), to which an explanatory and homiletic commentary was added. Though evidently meant to take the place of Mendelssohn's biur, Herxheimer expressly states that his work was done "for Jews and Christians" (Jost's "Annalen," 1839, pp. 312 *et seq.*; "Literaturblatt des Orients," 1840, p. 513).

A still more ambitious attempt was that of Ludwig Philippson. He translated the text anew, aiming to include the latest assured results of criticism and to produce what in every sense might be called a family Bible. For this reason for the first time illustrations were added, together with introductions and an extensive commentary intended for the intelligent layman. This work occupied Philippson for eighteen years, and was published at Leipsic, 1839–56; 2d ed., 1858–59; 3d ed., 1862. His translation was then published, together with the Doré illustrations, by the Israelitische Bibel-Anstalt, revised by W. Landau and S. I. Kämpf (Stuttgart, 1875). Of this translation separate editions of the Pentateuch, the Psalms, and of the Pentateuch together with Isaiah, were published (see M. Philippson, in "Rev. Etudes Juives," xlii. 30). But even the slight concessions made in these translations to the modern exegetical spirit gave offense in some quarters; a rival Bible-house, the Orthodoxe Israelitische Bibel-Anstalt, was established, which, on the basis of J. Z. Mecklenburg's "Ha-Ketab we-ha-Ḳabbalah" (Leipsic, 1839), produced a translation of the Bible strictly on the lines of Jewish traditional exegesis (*ib.* 1865). The Pentateuch translation by

J. Kosmann (Königsberg, 1847–52) had a similar end in view. Still further in this direction, and in evident protest against modern Christian radical exegesis, which he entirely ignores, went Samuel Raphael Hirsch. In his translation of the Pentateuch (Frankfort-on-the-Main, 1867; 3d ed., 1899) and of the Psalms (1882), as well as in the translation of the Minor Prophets by his son, M. Hirsch (*ib.* 1900), a return is seen to the "derash," from which the whole school of Mendelssohn and his followers had tried to free themselves (see "Zeit. für Heb. Bibl." v. 78). Of L. J. Mandelstamm's "Die Bibel Neu Uebersetzt," partly with the assistance of M. Kirchstein, only Genesis and the Song of Solomon seem to have appeared (Berlin, 1862–64). In 1901 a new translation by S. Bernfeld was commenced. It keeps strictly to the Masorah and preserves the Hebrew form of the proper names.

During all this time many translations of individual books appeared, of which the following is a partial list, cited under the names of their respective authors:

Israel ben Abraham, Job, in Hebrew characters, Prague, 1791.

Shalom Kohn, Psalms, Hamburg, 1827.

Mendel Stern, Proverbs, in Hebrew characters, Presburg, 1833.

J. Wolfson, "Das Buch Hiob. . . . Neu Uebersetzt . . .," Breslau-Leipsic, 1843.

E. J. Blücher, "Ruth, mit Deutscher Uebersetzung," Lemberg, 1843.

M. Löwenthal, "איוב . . . Nebst Uebersetzung . . .," Frankfort-on-the-Main, 1846.

"Das Hohe Lied . . . Neue Deutsche Uebersetzung," Vienna, 1847.

Samuel Aschkenazi, ס' מראה הלבנון (Song of Solomon, in Hebrew characters), Presburg, 1847.

תרגומא דבי רב (A new translation of the Pentateuch, in Hebrew characters), Königsberg, 1856.

"Odiosus," "Das Buch Ijob im Engeren Anschluss an den Mass. Urtext" (see "Hebr. Bibl." vi. 101).

S. Horwitz, "Das Hohe-Lied, das Aelteste Dramatische Gedicht," Vienna, 1863 (see *ib.* vi. 62).

Adolph Brecher, "Die Psalmen Nebst Uebersetzung," Vienna, 1864.

Israel Schwarz, "Tikwat Enosh" (Job, in German characters), Berlin, 1868.

Sänger, Maleachi, 1868.

Benjamin Holländer, Das Hohelied, Budapest, 1871.

Hermann Tietz, Das Hohelied, 1871.

M. Levin, ס' קהלת (with Judæo-German translation), Odessa, 1873.

H. Grätz, "Krit. Commentar zu den Psalmen, Nebst . . . Uebersetzung," Breslau, 1882 (compare his Kohelet, 1871, and Song of Songs, 1871).

S. I. Kämpf, Das Hohelied, Prague, 1877; 3d ed., 1884.

K. Kohler, Das Hohelied, Chicago, 1878.

Hermann Tietz, "Das Buch der Elegien Metrisch Uebersetzt," Schrimm, 1881.

J. Landsberger, Das Buch Hiob, Darmstadt, 1882.

D. Leimdörfer, "Kohelet . . . Nebst Uebersetzung," Hamburg, 1892.

Herman Rosenthal, "Worte des Sammlers (Kohelet) . . . in Deutsche Reime Gebracht," New York, 1885; 2d ed., 1893. *Idem*, "Das Lied der Lieder, in Neue Deutsche Reime Gebracht," New York, 1893.

M. Jastrow, "Der Neunzigste Psalm; Uebersetzt," Leipsic, 1893.

Salomon Plessner (transl. of Nahum, in his "Biblisches und Rabbinisches," pp. 29 *et seq.*), Frankfort-on-the-Main, 1897.

It was not before the forties of the nineteenth century that the desire made itself really felt among the English Jews for a Bible translation of their own in the vernacular, though David Levi had in 1787 (London) produced an English version of the Pentateuch (Steinschneider, "Cat. Bodl." No. 926). Wherever an English Bible was needed by them, they had freely used the King James Version; as is seen in the Pentateuch (including Hafṭarot and Scrolls) which was published in London, 1824, under the title תקון סופרים. But the impropriety of the use of this version, with its Christian headings and its Messianic interpretations, did in the end impress itself upon the English Jews (see, for example, S. Bennett, "Critical Remarks on the Authorized Version," London, 1834; Seelig Newman, "Emendations of the Authorized Version of the O. T." London, 1839; Benjamin Marcus, "מקור חיים (Fountain of Life): Mistranslations and Difficult Passages of the O. T. Corrected and Explained," Dublin, 1854).

English Translation.

The veneration for this masterpiece of English literature had impressed itself upon the Jews also. When the Revised Version was published (May 17, 1881) it was eagerly seized upon as being much more suitable for Jewish readers, since in it the headings had been removed and the Christology of many passages toned down. The Revised Version is used as a basis for such books as C. G. Montefiore's "Bible for Home Reading," London, 1896, 1901. That the revision is not complete from the Jewish point of view can be seen from the leaflet issued by the Jewish Religious Education Board, "Appendix to the Revised Version" (London, 1896), which sets forth the "alterations deemed necessary with a view to placing the Revised Version in the hands of members of the Jewish faith." These alterations were limited to the following sets of cases: viz., "where the R. V. departs from the Masoretic text," and "where the R. V. is opposed to Jewish traditional interpretation or dogmatic teaching." Isa. lii. 13–liii. 12 is there reprinted in full.

The first to attempt to produce an independent Jewish translation was D. A. de Sola of London, who in 1840 issued a "Prospectus of a New Edition of the Sacred Scriptures, with Notes Critical and Explanatory." Morris J. Raphall and J. L. Lindenthal were associated with him in the work. Only one volume, Genesis, appeared (London, 1841; 2d ed., 1843). Of a similar attempt by S. Bennett, "The Hebrew and English Holy Bible," only Gen. i.-xli. appeared (1841); though in the same year Francis Barham published "The Hebrew and English Holy Bible," which contained Bennett's revision of the English and a revision of the Hebrew by H. A. Henry. Another translation was published by A. Benisch, "Jewish School and Family Bible" (1851–56); and still another by M. Friedländer, "כתבי הקדש, The Jewish Family Bible" (1884). This last has had the sanction of the chief rabbi of the British Jews. A. Elzas has published translations of Proverbs (Leeds and London, 1871), Job (1872), Hosea and Joel (1873), in an attempt "to put the English reader, at least in some degree, in the position of one able to read the Hebrew text." None of these versions, however, can be said to have replaced either the Authorized or the Revised Version in the esteem of the Jewish Bible-reading public.

In the United States the same feeling as in England had been engendered against the headings of the Authorized Version. Isaac Leeser attempted to rectify this and at the same time so to translate

The United States.

the Bible as to make it represent the best results of modern study. The Prophets, Psalms, and Job are practically new versions. In the other parts, the Authorized Version is very closely followed; and though in most cases the changes Leeser made bring the translation nearer to the Masoretic text, the beauty of the English was often sacrificed. A quarto edition was published in 1854, and a duodecimo edition in 1856. Despite its insufficiencies, the smaller edition has had a wide circulation, due especially to the development of Jewish religious school instruction in the United States. The inadequacy of Leeser's translation has, however, been felt; and the Jewish Publication Society of America in 1898 took in hand the preparation of a complete revision. This is now (1902) being made by a number of scholars, with M. Jastrow, Sr., as editor-in-chief, and K. Kohler and F. de Sola Mendes as associate editors (see Reports of the Jewish Publication Society of America, 1898 *et seq.*).

Spanish Versions.

Nowhere in Europe is the history of the translation of the Bible into the vernacular so interesting as it is in Spain. Translations were here made as early as the thirteenth century, despite the fact that in 1234 Jaime I., by means of secular legislation, prohibited their use (Lea, "History of the Inquisition in the Middle Ages," i. 324). As Berger has shown, the earliest Castilian renderings, even when made by Christians, stand much closer to the Hebrew original than do those of any other country. This seems to have been due to the early and intense influence of the Jews in the peninsula and to the Oriental coloring of its whole culture. This similarity is seen even in the outward form. The Spanish translations follow the Hebrew division of the Bible into three great parts; and it is significant that the first polyglot (Complutensian) saw the light of day in Spain. In the production of these translations both Jews and converts took a laudable part. One of the earliest of such Castilian translations is found in the Aragonese MS. i. j, 8 in the Escurial Library, Madrid. The Psalms in this manuscript are distinctly said to be the translation "que fizo Herman el Aleman, segund cuemo esta en el ebraygo." Herman must undoubtedly have known Hebrew, though Berger thinks that he made use of Jerome's "Psalterium Hebraicum" and not of the "Psalterium Gallicum." This Herman the German is the well-known Latin translator of Aristotle, and lived between 1240 and 1256.

In the fifteenth century several revisions of these older translations were made, but always according to the Hebrew text. Such a revision is represented by MSS. i. j, 5 and i. j, 3 in the Escurial and MS. cxxiv. 1, 2 (dated 1429) in the Library of Evora. In a number of places these translations ostentatiously follow the Hebrew original and run counter to the usual Church tradition. MS. i. j. 3 of the Escurial is richly illuminated with miniatures, which may perhaps have been the work of Hebrew miniaturists. In this manuscript not only is the order of the books in the Canon the same as in the Hebrew, but the Pentateuch is divided into sections which agree with the parashiyot and sedarim. The proper names also follow the Hebrew and not the ordinary Latin version. Berger thinks that this manuscript may be the work of the baptized Jew, Juan Alfonso de Buena, who was in the service of Jaime II. (1416-54). An additional interest attaches to these revisions, as they formed the basis for the Spanish of the Constantinople Pentateuch of 1547 and for the Ferrara Bible; the Ferrara Bible, in its turn, was the basis for the Protestant Bible translation by Cassidoro de Reina (1569); for the revision by Cyprian de Valera (1602), the "Psalterio de David Conforme a la Verdad Hebraica" (Lyons, 1550), and the Psalter of Juan Perez (Venice, 1557; see Samuel Berger, in "Romania," xxviii.).

A still further revision, again upon the basis of the Hebrew, was made by Rabbi Moses Arragel (1430) for Don Luis de Guzman, master of the Order of Calatrava. According to Berger, this revision was made on MS. Escurial i. j, 3. It is provided with a commentary, and profusely illustrated, perhaps by Jewish artists. A manuscript of the Prophets, in two languages, in the library of the Academy of History in Lisbon follows Arragel's translation so closely that it may possibly represent the first attempt of Arragel.

This Castilian translation (or revision) was carried by the Spanish exiles into Italy and Turkey. It also became the Bible of the Spanish Jews in the Netherlands. It appears first in Hebrew characters in the Polyglot Pentateuch (Hebrew, Onkelos, Rashi, Neo-Greek, and Spanish), published at Constantinople by Eliezer Bekor Gerson Soncino (see Belleli, in "Rev. Etudes Juives," xxii. 250; Grünbaum, "Jüd.-Span. Chrestomathie," p. 6). The Neo-Greek represents a different translation from that of the Spanish. From this polyglot it found its way into the celebrated Ferrara Bible of 1553, which bears the title "Biblia en Lengua Española, Traduzida Palabra por Palabra de la Verdad Hebrayca por Muy Excelentes Letrados, Vista y Examinada por el Oficio de la Inquisicion. Con Privilegio del Ylustrissimo Señor Duque de Ferrara." Two editions seem to have been published: one, for Jews, signed by Abraham Usque; the other, for Christians, signed by Jerome of Vargas (De los Rios, "Juifs d'Espagne," p. 432).

De los Rios (*l.c.* p. 436) thinks that the author of "Retratos o Tablas de las Historias del Testamento Viejo," Lyons, 1543, a popular exposition of the Bible, was a Marano; but this does not seem to have been proved.

The Ferrara Bible of 1553 became the basis for the Spanish and Ladino translations which were published at Salonica and Amsterdam. This is seen also in the title, which usually runs "Biblia en Lengua Española, Traduzida Palabra por Palabra de la Verdad Hebrayca." This is also true of the "חלק השלישי מהארבעה ועשרים con Ladino y Agora Nos a Parecedo Comenzar de los נביאים אחרנים." etc., published by Joseph b. Isaac b. Joseph Jabez in 1568, as Kayserling (*l.c.* p. 28) has clearly shown. In Amsterdam the translation remained substantially the same, though it was often revised ("reformada"): 1611; 1630 and 1646, Gillis Joost; corrected by Samuel de Caceres and printed by Joseph Athias (1661);

corrected by Isaac de Abraham Dias and printed by David Fernandes (1726); "con las annotaciones de Or Torah," Proops, 1762. This translation also appeared in Venice, 1730; Constantinople, 1739–43; *idem*, 1745; Vienna (ed. by Israel Bahor Haim and Aaron Pollak), 1813–16; and Smyrna, 1838. A Ladino translation, in Rashi script, was published at Vienna, 1841 (2d ed., 1853), by W. S. Schauffler for the American Bible Society (see Twenty-sixth Annual Report of the society, 1842, p. 120). According to Grünbaum, it bears many points of resemblance to the Pentateuch of 1547 and to the Ferrara Bible.

Various portions of this translation appeared separately, an edition of the Pentateuch appearing in the same year (1553) and at Ferrara. To this may be added the following:

"Humas de Parasioth y Aftharoth," ed. Manasseh ben Israel, Amsterdam, 1627; ed. Ymanuel Benveniste, *ib.* 1643; another edition was published by Manasseh himself, *ib.* 1655 (though he says of it, "Obra nueva y de mucha utilidad"); "Parafrasis Comentada sobre el Pentateucho," ed. Isaac da Fonseca Aboab, *ib.* 1681; "Cinco Libros de la Ley Divina . . . de Nuevo Corrigidos," by David Tartas, *ib.* 1691; "Los Cinco Libros . . . Interpretados en Lengua Española," ed. Joseph Franco Serrano, *ib.* 1695; 1705 and 1724 (Isaac de Cordova); "Cinco Libros," corrected by David de Elisha Pereyra, *ib.* 1733; "El Libro de la Ley," published in Constantinople in 1873, is, according to Grünbaum (*l.c.* 12), a different translation.

The Psalms were reprinted: Ferrara, 1553; Salonica, 1582; Amsterdam, 1628, 1730; Vienna, 1822; Constantinople, 1836. Several other translations of the Psalms were produced during the seventeenth and eighteenth centuries. David Abenatar Melo, a Marano who escaped the Inquisition at Madrid and became a Jew again in 1611, published in 1626 ("En Franquaforte") "Los CL Psalmos de David, en Lengua Española, en Varias Rimas." In these Psalms he has inserted, when appropriate, an account of his own and his people's sufferings (De los Rios, *l.c.* pp. 468 *et seq.*; Kayserling, "Bibl. Esp.-Port.-Jud." pp. 67, 68). A prose translation was made by Ephraim Bueno and Jonah Abravanel (Amsterdam, 1650; 2d edition, 1723; see De los Rios, *l.c.* p. 498). A third translation was made by Jacob Judah Leon Templo (קדש הלולים, "Las Alabanças de Santidad," Amsterdam, 1671)—a verbatim prose translation of the original (De los Rios, *l.c.* p. 570; Kayserling, *l.c.* p. 58).

Of all the Biblical books, Canticles was most frequently reprinted. A translation was published in Hamburg, 1631, by David Cohen Carlos "de lengua Caldayca"; but the favorite rendering was that of Abraham de Isaac Lañado, published in Hebrew characters at Venice, 1619, 1654, 1655, 1672, 1716, 1721, 1739, 1805; Leghorn, 1769, 1787; Vienna, 1820. The Venice edition was published in Roman characters by Moses Belmonte, Amsterdam, 1644, and was reprinted at Amsterdam, 1664, 1683, 1701, 1712, 1724, and 1766. An edition of the Megillot appeared at Constantinople in 1813 (see Kayserling, *l.c.* p. 30); a Megillah in Spanish, dating from the early part of the eighteenth century, exists in the British Museum ("Jewish Chron." March 21, 1902, p. 24); but the provenience of the translation is unknown (on such Megillot see Abrahams, "Jewish Life in the Middle Ages," p. 345). A Portuguese translation of the Psalms, under the title "Espejo Fiel de Vidas," by Daniel Israel Lopez Laguna, appeared in London, 1720 (Kayserling, *l.c.* p. 55).

Italian Versions.

Both Zunz ("G. V." 2d ed., p. 457) and Güdemann ("Erziehungswesen in Italien," p. 206) refer to early translations of the Bible into Italian; the latter even speaks of their existence in the thirteenth and fourteenth centuries. Steinschneider has shown ("Monatsschrift," xlii. 117) that this is an error. It is true that some of the authorities (such as Zedekiah ben Abraham and Isaiah de Trani, the younger) laid stress upon the necessity of translating the Bible into the speech of the country; but Judah 'Azahel del Bene (Ferrara, *c.* 1650) advised against the practise of teaching girls Italian, as he feared they would conceive a love for amorous poetry (Vogelstein and Rieger, "Juden in Rom," ii. 300). It was not before the sixteenth century that attempts were made to produce versions of portions of the Bible in Italian. Steinschneider (*l.c.* p. 318) has given a list of the existing manuscript translations. It was toward the end of that century that the first translations were published. David de Pomis (died after 1593) brought out an edition of Ecclesiastes with Italian translation at Venice in 1571. It was dedicated to Cardinal Grimani of Aquileja (Steinschneider, "Cat. Bodl." No. 218). He also translated Job and Psalms, but never published them ("Monatsschrift," xliii. 32). Hezekiah Rieti published (Venice, 1617) the text of Proverbs with Italian translation ("Cat. Bodl." No. 418); but no reliable account can be found of a translation of Job (Rome, 1773) mentioned by Zunz.

The translations made in the nineteenth century were all more or less under the influence of Mendelssohn's biur. In 1818 I. S. Reggio published at Vienna, as a specimen, ten verses of Genesis. He then brought out the whole Pentateuch (ס׳ תורת אלהים "colla Traduzione Italiana"), Vienna, 1821; and ten years later "Il Libro d'Isaia, Versione Poetica" (Udine, 1831). Severe criticism was passed upon this version, because it seemed to weaken the force of many of the Messianic prophecies (see Fürst, "Bibl. Jud." iii. 140). In 1844 there appeared at Leghorn (חמש תעניות) an Italian translation of Job (Fürst, "Bibl. Jud." ii. 282, says it is by Luzzatto); and in 1872 a "Pentateuch, rev. von Letteris, mit Ital. Uebersetzung von Diodati" (Vienna; perhaps also London, 1836, 1864). Lelio della Torre of Padua translated the Psalms (Vienna, 1845). But these were completely overshadowed by the exact and careful versions of S. D. Luzzatto, whose poetical and literary judgment made him an excellent stylist (see "Hebr. Bibl." vi. 99; Elbogen, in "Monatsschrift," xliv. 460). He translated the greater part of the Old Testament: Isaiah ("Il Profeta Isaia Volgarizzato"), Padua, 1855–63; Pentateuch, Rovigo, 1860, Padua, 1876; Prophets, Rovigo, 1868; Isaiah, Padua, 1867; Job, Triest, 1853; generally with a valuable Hebrew commentary. Other Italian translations were produced: by Giuseppe Barzilai, "El Cantico dei Cantici" (Triest, 1865) in dramatic form, following Mandelstamm's and Horowitz's German translations; Lamentations (Trieste, 1867); by David Castelli, Ecclesiastes (Pisa, 1866); by Benjamin Consolo, Lamentations, Job, and Psalms (Florence?); by Gino Morpurgo, Ecclesiastes (Padua, 1898), and Esther (1899).

French Translations.

Translations of the Old Testament into French were not made by Jews prior to the first half of the nineteenth century. In 1831 Samuel Cahen began a monumental work, "La Bible, Traduction Nouvelle" (Paris, 1833–46, in 18 volumes), to which were added many essays by Munk, Zunz, Dukes, and others, and also a somewhat rationalistic commentary. This work was somewhat severely criticized (Abbé B. M. B., "Quelques Mots sur la Traduction Nouvelle," etc., Paris, 1835; "Allg. Zeit. des Jud." 1839, p. 30; "Literaturblatt des Orients," 1840, pp. 368 *et seq.*; Wogue, "Hist. de la Bible," p. 342); but it held the field for many years. A more faithful version of the Pentateuch was published in 1860 by Lazare Wogue. Among other translators may be mentioned A. ben Baruch Créhange (Psalms), and B. Mossé of Avignon (Psalms). But a popular and cheap Bible in French was sorely needed by the French Jews. Such a work has been taken in hand by the present chief rabbi of France, Zadok Kahn, and the other members of the French rabbinate. Wogue's translation was employed as the basis for the Pentateuch. The author himself made the necessary corrections; and before his death he was able to finish the translation of the prophetical books down to the First Book of Kings (vol. i., Paris, 1899). At the same time and under the same auspices, a children's Bible ("Bible de la Jeunesse") is being brought out.

Dutch Translations.

Few translations have been attempted by the Dutch Jews into their vernacular: the Spanish and Portuguese Jews in Holland made use of Spanish; the Ashkenazic Jews, of the Judæo-German version. The version of the Psalms in Dutch printed by Joseph Athias was made by Johann Leusden. During the nineteenth century translations were made by Samuel J. Mulder (see his "Tets over de Vertalingen der Heilige Schrift," Amsterdam, 1859): Pentateuch, 1826–42; Major Prophets, 1827; Five Scrolls, 1835, 3d ed. 1859; Proverbs, 1836; Psalms, 1838; all published in Amsterdam. He also published a "Bijbel voor de Israel. Jeugd," Leyden, 1843–54. In 1844 Gabriel J. and M. S. Polak published a Dutch translation of Job, which was to have been followed by a translation of the Prophets and the Hagiographa. This seems never to have been completed. A translation of Isaiah by G. A. Parsen also exists; while a new translation of the Pentateuch, together with Targum and Rashi, was brought out by A. S. Ondervijser in 1901.

Jewish translations into Russian are of very recent date. The writer knows only of L. I. Mandelstamm's Psalms (Berlin, 1864; 3d ed. 1872), Pentateuch (תורה עם תרגום רוסי, 3d ed., Berlin, 1872); Aaron Pumpiansky's Psalms (Warsaw, 1871); J. Cylkow's Psalms (1883); and a version of Esther in German (Hebrew characters) and Russian (Warsaw, 1889). A Polish translation has been published by D. Neufeld.

BIBLEITZY (BIBLISTS), called also **Bibleiskoe Bratstvo (Bible Brotherhood)**: Name given to a body of religious reformers, organized in the spring of 1882 among the Jewish working classes of Elizabethgrad, South Russia, subsequent to the riots against the Jews. The founders of the brotherhood, believing that Talmudism in that region was chiefly to blame for the false accusations of the anti-Semitic press, decided to do away with dogmatic theology and all religious ceremonies, including even prayer. As one of their leaders, E. Ben Sion, expressed their views: "Our morality is our religion. . . . God, the acme of highest reason, of surest truth, and of the most sublime justice, does not demand any useless external forms and ceremonies."

Several of the members of the new brotherhood were among the first of the Russian Jewish immigrants who came to the United States in 1882, and who were incorporated into the "First Jewish Agricultural Colony," established by H. Rosenthal at Sicily Island, near Bayou Louis, Catahoula parish, Louisiana. The air of freedom and cosmopolitanism that they found on reaching the United States has left them without a legitimate ground for their propaganda.

H. R.

BIBLICAL ETHNOLOGY: The view of race-relationship expressed in the Bible. It is customary to designate the tenth chapter of Genesis as the oldest ethnological division of mankind. Earlier than this, however, the Egyptians, as known from their pictorial representations, distinguished between four principal types (races) of mankind; viz., the brown Egyptians, the negroes (in the south), the light-complexioned Libyans (in the west), and the light-brown Asiatics (in the east). These races were distinguished from one another also by their hair-dressing and their costume.

Ethnology in Genesis.

It is natural that as soon as a people has a history and has, through intercourse with other nations, become conscious of its individuality, it should reflect whether it be related to these nations. In the earliest times the Hebrews occupied themselves with such questions. A great part of the tales of primeval and patriarchal history recorded in Genesis is ethnological in its bearing; that is, these stories were given to elucidate the question of interracial relationship. Therefore the more clearly the people of Israel became conscious of their independent position among the nations, the livelier became their interest in Israel's special position among the nations, and in the questions regarding the origin of neighboring peoples. The consciousness of an especial relation to God must necessarily have reacted to strengthen the conviction that their position among the nations must be a very distinguished one when regarded also in the light of descent.

In order to understand what is narrated in these accounts of Genesis and of other sources, regarding the relation of the several nations and tribes to Israel, it is necessary to consider for a moment the form in which these statements are always made. The relations between the peoples are invariably represented in the form of genealogical tables showing the descent from remote progenitors. The Edomites and the Israelites are the most closely related. This is expressed in the form of a statement that Esau and Jacob, the progenitors of the two peoples, are brothers. The genealogical tables of the nations, in Gen. x., reveal at a glance that a great number of the names are not used to designate persons, but peoples, and even whole lands; as, for instance, Cush, Mizraim, Asshur, Aram, etc. The relations between these persons must therefore be understood as explaining the relations between the peoples in question.

Early Attempts at Ethnology.

This mode of representing the international relation is by no means, however, based upon a poetic personification of the tribes. The Hebrew writer does not interpret such a form of expression figuratively; on the contrary, it is based by him upon a definite conception regarding the origin of nations, a conception which assumes that the tribes and peoples are in reality a development of the family, and may thus be traced to one progenitor. By means of marriages and births the family grows to the clan, and the clan to the tribe; this again ramifies into various tribes, which, under certain conditions, unite to form a people, as in the case of the twelve tribes of Israel; or they may separate, as did Moab and Ammon, constituting two distinct tribes. This theory, again, goes back to the view shared by all Semites, according to which blood-relationship alone can constitute a strong and permanent bond in a group of people, and impose binding obligations.

The ancient form of genealogy is well adapted for the representation not only of purely ethnological, but also of ethnographical, geographical, and historical relations. In this regard antiquity makes no close discrimination. When, for example, one nation is to be characterized as more powerful than another, the former is represented as a first-born son, the other as a younger brother; or the former is the son of a favorite wife, the other the son of a concubine. Esau is a hunter; Jacob, a herdsman, a distinction serving to characterize the respective peoples. Similarly, geographical proximity converts Sidon and Heth into sons of Canaan.

Based on Sympathies and Antipathies.

The interest of antiquity was naturally directed more closely to the neighboring nations with which Israel, from the beginning, cultivated close relations. To Ammon, Moab, Edom, and the Arabian tribes, Israel felt closely related; hence, Edom (Esau) is the brother of Jacob; Ishmael, the brother of Isaac; and Ammon and Moab are sons of Abraham's nephew, Lot. Their relationship to the Arameans is also close: Jacob's wives are daughters of the Aramean Laban. The reverse, however, is true of the inhabitants of the land west of the Jordan, the Canaanites, with whom Israel will have nothing in common; for which reason, according to the old accounts of Noah, these tribes are held to belong to an entirely different branch of the human family. This is comprehensible in view of the mutual hatred growing out of the historical situation, the conflicts for the land, and other opposing elements. The conception, however, can not endure before modern investigation. It has been shown beyond a doubt that the Canaanites, both as regards language and descent, were very closely related to the Hebrews, and that they are to be classed, not among the Hamites, but among the Semites.

With the extension of the political horizon of the Israelites, and the continual absorption of new peoples, these ethnological views were inevitably extended. Based upon the ancient accounts of the patriarchs, a theory gradually developed, assuming a homogeneity and relation between the several peoples; and it is this theory which has been perpetuated in Gen. x., the so-called genealogy of the nations. In connection with the accounts of Noah (Gen. ix. 18 *et seq.*), the whole race of man, which is descended from his sons, is divided into three great classes: Shem, Ham, and Japheth. In the original narrative of Noah the three sons are named Shem, Canaan (not Ham), and Japheth. The reason for this division into three sons, or three races, is not known. The Egyptians, as already stated, distinguished four races; nor can a parallel to the Hebrew classification be found among the Babylonians. According to Winckler, the ternary division is probably associated with the great importance attached to the figure "3" in the old system of cosmography (compare Stade, "Geschichte Israels," ii. 275 *et seq.*). Others (*e.g.*, Stade, *ib.* i. 109 *et seq.*), basing their assumption upon the above statement that Ham was originally called "Canaan," believe that a purely Palestinian triad was meant, consisting of the Hebrews, Philistines, and Canaanites (Shem, Japheth, and Ham), and that this triad was afterward extended to include all mankind. The most recent commentary by Gunkel declares that the ternary division indicates the conditions of a very ancient pre-Israelitish period, when Canaan, in the widest sense of the name—that is, the land between the Taurus and Egypt—was subjugated from the east by nomad Semitic tribes, while at the same time the Hittite migrations brought down Japheth from the north to spread over the land of Canaan. But this is uncertain; and no definite reason has hitherto been assigned for the tripartite ethnological division.

The scope of this genealogical table of the nations is, of course, narrow from the modern point of view. The nations mentioned in it are the peoples known to the Israelites, either through actual contact or by report, and grouped principally about the Mediterranean in Asia Minor and eastern Palestine. In the ethnological phraseology of the present they would be classed among the Caucasian nations. Even from the standpoint of the Israelites, the ethnological list given in Genesis has no claim to completeness, inasmuch as not only the negroes, who were undoubtedly known to the Israelites of a later period, but also the Persians are omitted from it. As the last-mentioned people were well known to the post-exilic

Jews, their omission from the genealogical table is perhaps to be explained by the fact that they were not numbered among those ancient nations whose origin dates from the Flood.

As regards the division of the individual peoples into these three great classes, the considerations of complexion, linguistic differences, historical conditions, etc., obtaining at the present day were certainly not determinative at that time. Indeed, it appears that the fundamental distinction was purely geographical. To the Japhetic race belonged the peoples of the northern zone, of Asia Minor, and of the islands and coastlands of the northern Mediterranean. The Semites dwelt in the middle zone, and included the Hebrews and the nations to the east of Palestine. The nations in the south were the sons of Ham, who lived in northern Africa and southern Arabia, and who, as represented by the ancients, constituted a homogeneous people. There is only one exception to this genealogical arrangement: Canaan with his sons, the Phenicians, Hittites, and others, dwelt in the middle zone, but were considered as belonging to Ham. The reasons for this have been given above.

For details bearing on the foregoing explanation of the genealogical tables, see the commentaries on Genesis, particularly those of Dillmann. For the other data, compare the articles on Ham, Japheth, Races of the Old Testament, and Shem.

G. I. Be.

BIBLIOGRAPHY: The science that deals with the description and classification of books. As applied to books of Jewish interest, it includes (*a*) **Hebraica,** or books written or printed in Hebrew characters; and (*b*) **Judaica,** or books in other languages, written by or about Jews. Strictly speaking, the whole of Biblical and Apocryphal literature and the vast array of commentaries thereon would belong to Jewish bibliography; but this is so fully treated elsewhere, that Jewish bibliographers as a rule have not paid so much attention to it. Even with this limitation, the extent of the subject is wide enough, a conservative estimate giving 30,000 as the number of Hebrew works in existence; and the same number of works in modern languages on Jewish topics have been published during the past forty years alone in the special journals devoted to this subject. Any person desiring to keep himself fully acquainted with Jewish literature in its wider sense would probably have to take account of over 3,000 (800 Biblical) publications per annum. Many of these still remain undescribed; and for others search must be made in various quarters.

Materials.

The materials from which a description of the extent of Jewish literature can be set forth consist, in the first instance, of the collections of books and manuscripts made by various Book-Collectors in the past, especially of those collections of collections which go to make up public Libraries. The earliest accounts of Jewish literature were based in large measure upon such collections; as Bartolocci's on that of the Vatican, and Wolf's on the Oppenheimer collection. Later, with the growth of knowledge about the extent of the literature, any description of it would depend in large measure upon published accounts, or Catalogues, which have naturally been devoted largely to manuscripts. With the growth of interest in the history of printing in general, special attention began to be paid to the earliest Hebrew printed books, especially those printed before 1540, and known as Incunabula.

Earliest Bibliographies.

Having in view the fact that the majority of early Hebrew printed books were produced in Italy, it is not surprising that the earliest account of Hebrew literature in its rabbinic phases should have been made by an Italian; though it is a matter for some surprise to find that he was a Christian. Bartolocci, in his "Bibliotheca Magna Rabbinica" (Rome, 1675-94), arranged the books under the names of 1,960 rabbis; and his work was supplemented by Imbonato, whose "Bibliotheca Latino-Hebraica" gives, under 1,319 numbers, 2,166 works written in Latin on rabbinic subjects. These were followed by the first Jewish bibliographer, Shabbethai Bass, who, in his "Sifte Yeshenim" (Amsterdam, 1680), mainly used the books of the Bet ha-Midrash and the library of Aguilar. Bass adopted the method of arranging the books according to their titles, giving an index of authors and subjects at the end. This plan is specially applicable to Hebrew books, the titles of which rarely indicate their contents (see Titles of Books). Bass's work forms the main foundation of Jewish bibliography of Hebrew books; his method having been continued and supplemented by J. Heilprin and Benjacob, whose "Oẓar ha-Sefarim" is the most complete title-list of Hebrew books in existence. S. Wiener, in his elaborate catalogue of the Friedland collection at the Asiatic Museum, St. Petersburg, also adopts the title-list as the most suitable in dealing with Hebrew books.

J. C. Wolf.

These attempts of Bartolocci and Bass were, however, entirely superseded by the great work of John Christian Wolf, who in his "Bibliotheca Hebræa" (4 parts, Hamburg, 1715-33) brought together almost all the accessible information relating to Jewish authors and their works, as well as to the writings of Christians on Jewish subjects. The first part gives a catalogue of authors with the names in Hebrew, which leads at times to somewhat curious results; the second is more of a subject classification of the whole of early Jewish literature, including a fair account of the Talmud and of the Targumim, from which later writers have frequently drawn; and the remaining two parts are supplements containing the additional knowledge acquired by Wolf in the later years of his life. In the main, Wolf's materials consisted of the remarkable Oppenheimer collection, which ultimately went to the Bodleian Library, Oxford; and for this reason Steinschneider's great catalogue of the Bodleian collection repeats in improved form much of Wolf's information. Considering his opportunities, Wolf shows remarkable acumen and accuracy; and in some respects his work still remains of value. A sort of supplement was provided by Köcher in his "Nova Bibliotheca Hebraica" (Jena, 1783-84).

The next name of importance is that of Ḥayyim Joseph David Azulai, whose "Shem ha-Gedolim" (Leghorn, 1786-96) added considerably to Shabbethai

Bass, mainly from works printed at Leghorn. He was supplemented by the joint labors of Nepi and Ghirondi (Triest, 1853), who gave an account of the Italian rabbis and their voluminous but not very important productions. Azulai's work was consolidated and rearranged by Benjacob in the Wilna edition, 1852.

Incunabula.

By a fortunate chance the attention of an Italian professor, J. B. de Rossi, was drawn to the subject of early Hebrew printing in Italy; and in a number of monographs on that subject ("De Typographia Hebr.-Ferrar. Comment. Historicus," Parma, 1780; "Annali Ebreo-Tipografici di Sabionetta," Erlangen, 1783; "Annales Hebræo-Typographici," sec. xv., 1795; "Annales Hebræo-Typographici ab Anno 1501 ad 1540," Parma, 1799) he laid a firm foundation for a description of all Hebrew books printed up to 1540. The few additions that have been made in similar lists by Cassel and Steinschneider, Schwab and Chwolson, have only served to show the comparative completeness with which De Rossi did his work. Renewed attention has been paid to the subject of early Hebrew printed books during the last decade.

With the rise of Jewish science under Rapoport and Zunz, bibliography entered upon a new era. The same accuracy, thoroughness, and critical acumen which were being devoted to the contents of books were also exercised in the description of their external characteristics. Zunz himself devoted considerable attention to the subject, especially to an enumeration of the productions of the printing-presses of Mantua and Prague; and he also gave a summary account of the Italian libraries. Among the workers in the field of Jewish bibliography in the early part of the nineteenth century may be mentioned Dukes and Carmoly; while Michael offered all the treasures of his library—full of the rarest books—to anybody interested in the subject, though an account of them appeared only after his death. The "Literaturblatt des Orients," founded by Julius Fürst, also helped to revive the study of Jewish literature; while its review columns kept Jewish scholars acquainted with contemporary productions.

Julius Furst.

All these various activities were summed up in the ambitious attempt of Julius Fürst in his "Bibliotheca Judaica," Leipsic, 1848-63. This work gave short titles of about 13,500 (Fürst says 18,000) Hebrew books, and of perhaps twice that number of Judaica. The latter contained many, if not most, of Wolf's useless Latin dissertations by Christian writers, as well as a considerable amount of merely Biblical exegesis and criticism by Christian theologians. Notwithstanding its errors of omission and commission, Fürst's work still retains considerable value as the first attempt to cover the whole field of Jewish bibliography. The names of many writers and books are to be found only in its pages; and the clearness of print and the shortened form of titles make it easy to consult. On the other hand, its dates, and indeed data generally, are far from trustworthy; and more than four-fifths of his information was confessedly from second-hand sources.

Catalogues.

The only possibility of improvement in regard to accuracy was seen to be in more careful cataloguing; and the epoch after Fürst is characterized by a succession of masterpieces in this direction, mainly executed by Moritz Steinschneider (b. 1816), by whose gigantic labors Jewish bibliography has been organized and made an adequate instrument for the study of Jewish literature and history. As the result of thirteen years' continuous labor, he produced his colossal catalogue of the Hebrew books in the Bodleian Library ("Catalogus Librorum Hebræorum in Bibliotheca Bodleiana"), including all works not in the library, but published up to 1732. Besides accurate descriptions of each book from personal examination, Steinschneider generally gives notes upon the author and his works. In addition to this, he has described the manuscripts in the libraries at Hamburg, Leyden, Munich, and Berlin, besides some private collections, and in every way has given a model of conciseness and accuracy in the description of Hebrew works. The same qualities are shown, perhaps in an even higher degree, in the "Catalogue of the Hebrew Books in the Library of the British Museum," by J. Zedner (London, 1867), whose punctilious accuracy and painstaking determination of names and dates leave nothing to be desired. The example of the latter authority has been followed by Roest in his catalogue of the Rosenthal collection at Amsterdam ("Catalog der Hebraica und Judaica aus der L. Rosenthal'schen Bibliothek," Amsterdam, 1875). Steinschneider's work with regard to manuscripts has been supplemented by the careful but somewhat sparse account of the Hebrew manuscripts in the Bodleian Library by A. Neubauer (Oxford, 1886).

Periodical Literature.

Besides devoting so much attention to the bibliography of the past, Steinschneider founded an organ, "Hebräische Bibliographie," in 1858 for the actual description of the Jewish literature of the present. The "Literaturblatt des Orients," and even the general Jewish press, had sporadically reviewed publications of Jewish interest as they appeared; but Steinschneider was the first to attempt a systematic, continuous, and complete account of Judaica and Hebraica, accompanied by short critical notices by himself and friends. This has been continued in the "Zeitschrift für Hebräische Bibliographie" (1898, in progress). In addition to these may be mentioned N. Brüll's elaborate reviews in his "Jahrbücher" (1874-89); the lists given in the "Orientalische Bibliographie"; the periodical bibliographical notices which appeared in the "Revue Etudes Juives" (especially the careful ones of the late I. Loeb); besides the series of special bibliographies such as the Biblical ones in Stade's "Zeitschrift" and the "Theologischer Jahresbericht," and the historical in the "Jahresberichte für Gesch. Wissenschaft." Mr. Israel Abrahams gives in the "Jewish Chronicle" a summary account of current Jewish bibliography which is at once up-to-date and trustworthy. M. Schwab has compiled (1899-1900) a useful author and subject-index to Jewish periodical literature. The only subject-index that has hitherto been published, including both books and periodicals, is the careful one, compiled by Rev. A. Löwy, of the small collection of Hebraica and Judaica in the Guildhall Library, London. A much more ambitious attempt is being made by A. S. Freidus to compile a card catalogue (author, subject, and title) of the 12,000 volumes and pamphlets of the New York Public Library, which already (1902) runs to about 25,000 entries, including articles in periodicals, and even references to Jewish topics found in the works of the general library. That collection has been minutely arranged on the shelves according to a comprehensive plan containing about 500 subdivisions, which may be considered the first elaborate scheme for classifying Jewish literature for library purposes (see Library Classification). No attempt has been made since Fürst to compile a complete author bibliography; but his work has been supplemented by a bookseller, C. D. Lippe of Vienna, who, in three successive issues of a “Bibliographisches Lexicon” (1881–99), gives a tolerably full but inaccurate account of contemporary Jewish writers (mainly contributed by themselves); while William Zeitlin has made an attempt to enumerate modern Hebrew works (1789–1890) in his “Bibliotheca Hebraica Post-Mendelssohniana” (Leipsic, 1891–95).

Subject Bibliographies.

The present phase of Jewish bibliography is tending toward the compilation of lists of works relating to special subjects. Here, again, Steinschneider has been the pioneer. Most of his works, while professedly dealing with special topics, concentrate attention upon the bibliography of the subject; and among other topics which he has thus bibliographized may be mentioned the polemical literature of Jews and Mohammedans, mathematical writers among the Jews, Hebrew translations, chess, etc. Besides these, his treatises on Jewish literature in Ersch and Gruber's “Allg. Encyc. der Wissenschaft und Künste” (English translation, London, 1857, and on Italian Jewish literature in the “Monatsschrift,” 1898–99) are in large measure bibliographical guides. While an immense debt of gratitude is due to Steinschneider for the facilities he has thus afforded, it must be confessed that the style in which he has presented his results is sometimes unclear owing to excessive conciseness; and he has the unfortunate habit of piling up notices which turn out, on inquiry, to be perfectly useless.

Having in view the present tendency of Jewish bibliography, it may be suitable and useful to conclude this rough account with a short bibliography of the special bibliographies that have more recently been made. Lists made by Wolf and repeated by Fürst are of no value for practical purposes.

L. G. J.

BIBLIOMANCY:* The use of the Bible for magic or superstitious purposes. The practise of employing sacred books, or words and verses thereof, for divination or for magic cures is universal alike among pagans and believers in God. What the Vedas were to the Hindus (Stenzler, "Abhandlungen für die Kunde des Morgenlandes," vol. vi., Leipsic, 1878), Homer to the Greeks (Heim, pp. 496, 514), and Ovid and Virgil to the Romans (Lampridius, "Alexander Severus," p. 14; "Sortes Virgilianæ"), the Old Testament was to the Jews, the Old and New Testaments to the Christians (Kraus, *s.v.* "Loos," ii. 344; "Sortes Sanctorum"; compare i. 153, "Evangeliorum"), and the Koran and Hafiz to the Mohammedans (Lane, "An Account of the Manners and Customs of the Modern Egyptians," vol. xi.). The desire of man to discern the hidden future, or to obtain the mastery over nature in hours of great anxiety, by some superstitious resort to superhuman forces, is never altogether extinct in the multitude. Deut. vi. 8, 9; xi. 18; and Prov. iii. 22–26, vii. 3, admonishing the people to bind them (the words of God) as a sign upon the hand, and have them as frontlets between the eyes, and to write them upon the posts of the house and upon the gate, certainly induced the Jews to use the Bible, or parts of it, for protective or talismanic purposes (Targ. to Cant. viii. 3; Ber. 23b; Yer. Peah i. 15d). Likewise are the sixty letters of the Priestly Blessing (Num. vi. 24–26) called sixty guardian powers of Israel against the terrors of the night (Cant. R. to iii. 7; Tan. Num. 16; compare Pesiḳ. R. 5 and Num. R. xii.), "a talisman against the evil eye." So was Ps. xci., perhaps originally composed as an incantation psalm (see Psalms) and known in rabbinical literature as "Shir shel Pega'im," or "Song against Demons," employed as a protective (Midr. Teh. to Ps. xci.; Yer. Shab. vi. 8b), found also in a tomb at Kertch, Crimea (Blau, "Das Alt. Jüdische Zauberwesen," p. 95). Ps. iii. was employed for that purpose (Shebu. 15b); Ex. xv. 26 was used for healing purposes, according to Mishnah Sanh. x. 1; as was also Lev. i. 1, according to Sanh. 101a. To ward off evil dreams, the Rabbis prescribe the recitation of corresponding Bible verses (Ber. 55b, 56b); in order to escape the danger befalling one who drinks uncovered water on Wednesday and Saturday nights, the recitation of Ps. xxix. is prescribed (Pes. 112a). Tos., Shab. xiii. 4; Shab. 115b, writings containing Biblical matter used for amulets, are mentioned, which Blau (*l.c.* p. 96) compares with two magic papyri of the second or third century showing a Jewish origin; the one published by Deissmann (pp. 21–48), the other by Dieterich, "Abraxas," pp. 138 *et seq.*, both of which prove the use of Biblical passages for magic purposes.

For Protective Purposes.

Good or Bad Omens.

It was common in Talmudical times to accept the verse selected at random and recited by the school-children as a good or a bad omen (Ḥag. 15a, b; Giṭ. 58a; Ḥul. 95b), and this was observed through the Middle Ages (Ṭur Yoreh De'ah, 179). This same custom was observed by the Christians at the close of the seventh century (Kayser, "Die Canones Jacob's von Edessa," 1886, pp. 22, 126, 136; and "Gebrauch von Psalmen zur Zauberei," in "Z. D. M. G." xlii. 456–462). In the last-named article a prescription of the use of the various Psalms for magic purposes, written in Syriac and taken from Sachau's collection of Syriac manuscripts, No. 218, is published and translated. Whether this served as a model for Jewish writers or followers of the "Shimmush Tehillim" (the magic use of the Psalms), or originated with the Jews, is rather difficult to say. Certain it is that both the authorities of the synagogue (Maimonides, "Yad," 'Akkum, xi. 12; Ṭur Yoreh De'ah, 179, according to Shebu. 15b) and of the Church prohibited the use of the Bible either as a whole or in part for magical cures (Kayser, *l.c.*, p. 126; Hefele, "Conciliengeschichte," ii. 274); yet both failed to eradicate the custom. According to "Sefer Ḥasidim" (ed. Lemberg, 1870; Jitomir, 1879, §1140; not in the Berlin edition), the Book of Leviticus was placed under the head of a child when first put into the cradle. Sometimes the Torah-scroll was brought into the lying-in room in order to facilitate the birth ("Pithe Teshubah" on Yoreh De'ah, 179), or laid upon the sick babe ("Yad," *l.c.*; Ṭur Yoreh De'ah, *l.c.*), or on the head of the new-born child, or during the eight days following the circumcision ("Mitteilungen," i. 83, 85). Also in the curious womb-blessing, the Torah-scroll was used for protection, the words spelled being: "Baermutter [womb], lie down: with these words I adjure thee; with nine Torahs, with nine pure Sefer Torahs!" (Güdemann, in "Monatsschrift," v. 57). When a person was dangerously ill, the Pentateuch was opened, and the name which first met the eye was added to the patient's name, in order to avert the evil destiny (see SHINNUY HA-SHEM). The words found at the beginning of a page of the Bible when it was opened at random, or touched by the thumb at the opening, were also frequently used as an oracle (Berliner, "Aus dem Leben," p. 24). The Pentateuch in the form of a book, not a scroll, was employed also in the FATE BOOKS ("Loos Bücher"). Genesis was opened as a protection against thunder- and hail-storms (Kayser, *l.c.*).

---

* For the titles of works cited under abbreviations, see bibliography at the end of the article.

Use of the Pentateuch.

Use of Bible Verses.

The following single verses may be mentioned as having been used both in the original Hebrew and in translation (pronounced over wounds, Rashi on Sanh. 101a; Shulḥan 'Aruk, Yoreh De'ah, 179, 8):

Gen. i. 1: To make oneself invisible (S.Z. 32a).
i. 1-5: (The last letters only.) To confuse a person's mind (M.V. 25); as preservative against pollution (S.Z. 11b); and for other purposes ("Cat. Anglo-Jew. Hist. Exh." No. 1874; Schwab).
xxi. 1: To lighten childbirth (M.V. 59).
xxiv. 2: On using a divining-rod (M.V. 80).
xxv. 14: Against the crying of children (M.V. 64).
xxxii. 31: Against danger on a journey (M.V. 34).
xlix. 18: To shorten one's way on a journey (M.V. 23); in the lying-in room (M. V. 80).
Ex. xi. 7: For protection against a fierce dog. (For greater security, the traveler is advised to carry a stout stick as well, which gave rise to the saying, "He has both a verse ['posuk'] and a stick ['stecken'] with him," applied to one well fortified on every side.)
xi. 8: To lighten childbirth (M.V. 59).
xv. 2: To shorten one's way (M.V. 24).
xv. 16: To shorten the way (M.V. 23); to insure safety in a court of law (M.V. 32); against fear (M.V. 65).
xvii. 16: Against bleeding (M.V. 45).
xxii. 17: In the lying-in room (M.V. 91).
xxxiii. 23: Against witchcraft (M.V. 41).
xxxiv. 6: To shorten the way (M.V. 23).
Lev. i. 1: The same (M.V. 23).
Num. xi. 2: Against fire (M.V. 10, 11; S.Z. 27).
xi. 12: Against the evil eye (M.V. 41).
xxiii. 23: In lying-in rooms (M.V. 91).
Deut. vi. 4-9: Against fever (M.V. 50).
xxxiii. 4: On taking children to school (S.Z. 30b).

In addition to verses from the Pentateuch, the following from other books are cited as being efficient in the cases indicated:

Josh. i. 4: To awaken understanding: "Shimmush Tehillim," cxix.
Isa. xxvi. 1: To strengthen memory (S Z. 30b).
xlii. 5; xliii. 2: Against a storm at sea (M.V. 35).
xliii. 14: At sea (S.Z. 31b).
l. 4: On taking children to school (S.Z. 30b).
Jer. xxxi. 15: Against the crying of children (M.V. 64).
Ezek. iii. 3: On taking children to school (compare Berliner, "Aus dem Leben," p. 27).
Prov. xvi. 1: To strengthen one's memory (S.Z. 30b).
xviii. 10: To gain favor (M.V. 28).
Job xxxii. 9: To strengthen one's memory (S.Z. 30b).

Use of Psalms.

The Psalter especially was employed, an entire chapter at a time, for all manner of incidents, serious or trivial. An extract may here be given from the above-mentioned "Shimmush Tehillim" (frequently reprinted), which indicates the various uses made:

Ps. i.: Against miscarriage. Verse 3, against trees shedding their fruit (Heim, 520).
ii.: Against a storm at sea.
iii.: Against headache and pain in the shoulders (Grünw., to drive out demons).
iv.: To find favor.
v.: Against evil spirits (Kayser, on appearing before a judge). Verse 8 may be said to have been used in a certain sense to avert the evil eye: for in the time of the Geonim, the ten words of this verse were employed to ascertain if the requisite quorum, called "minyan," were present before beginning divine service; thus avoiding the necessity of pointing with the finger, or using numerals, both of which were considered harmful (Harkavy, "Responsen der Geonim," p. 157). In the same way the ten words of Ps. xviii. 51 are employed to-day; so that when the tenth man arrives, it is said not "The tenth man is here," but "The ''Olam' [the tenth word of the Hebrew verse] is here."
vi.: Against diseases of the eye and danger on land or water.
vii.: Against enemies; in a law-court (against robbers, M.V. 36).
viii.: Against crying children.
ix.: Against the same and enemies.
x.: Against obsession by evil spirits.
xi.: Against evil spirits and wicked men; against various perils (Grünw., to drive out demons).
xii.: Against temptation and evil counsel.
xiii.: Against unnatural death and diseases of the eye (Grünw., to drive out demons).
xiv.: Against defamation, and when one's veracity is doubted.
xv.: Against obsession.
xvi.: To discover a thief, and against enemies, and to awaken intelligence. Employed by Christians to discover thieves; Männling, "Denkw. Kuriositäten," in Rubin, "Gesch. des Aberglaubens," p. 111.
xvii.: On a journey.
xviii.: Against robbers and all manner of sickness.
xix.: Against evil spirits; difficult labor; and to awaken intelligence.
xx.: In a court of law.
xxi.: To maintain oneself before a spiritual or temporal authority.
xxii.: To ford a river, against wild animals, and to sharpen intelligence.
xxiii.: In interpretation of dreams.
xxiv.: In a storm at sea.
xxv.: In distress.
xxvi.: In distress and imprisonment.
xxvii.: To conquer a city; as a vermifuge.
xxviii.: To appease an enemy.
xxix.: Against an evil spirit.
xxx.: Against every evil.
xxxi.: Against the evil eye.
xxxii.: The same.
xxxiii.: For a woman whose children die young, and against epidemics (Kayser, in time of war).
xxxiv.: To secure the favor of princes and governments (Kayser, against witchcraft. Heim, xxxiv. 9, to preserve wine until the ensuing autumn).
xxxv.: Against mischievous busybodies (Grünw., to expel demons).
xxxvi.: Against evil tidings.
xxxvii.: Against drunkenness.

Ps. xxxviii.: Against defamation.
xxxix.: Against evil design on the part of the king.
xl.: Against evil spirits.
xli.: When one's position has been given to another.
xlii.: In interpretation of dreams.
xliii.: In a storm at sea (M.V. 35).
xliv.: To escape from an enemy.
xlv.: Against a wicked woman.
xlvi.: When one tires of his wife.
xlvii.: To win favor.
xlviii.: To frighten one's enemies.
xlix.: Against fever. Verse 6, against pollution (M.V. 62).
l.: Against enemies and robbers (Grünw., against noxious animals).
li.: When one feels guilty. Verse 3, against loss of blood (Heim, 520).
lii.: To keep off slander.
liii.: To frighten one's foes.
liv. and lv.: To be avenged on one's foes.
lvi.: When in chains; also against evil inclination.
lvii.: To have good fortune.
lviii.: Against vicious dogs.
lix.: Against evil inclination.
lx.: Before a battle.
lxi.: Upon entering a house where one has cause for apprehension.
lxii.: For forgiveness of sins.
lxiii.: On accounting with one's business partner, and to have good fortune in trade.
lxiv.: On fording a river.
lxv.: To exert influence over anybody.
lxvi.: Against evil spirits.
lxvii.: Against continuous fever; also for a prisoner. This psalm, written upon parchment in the form of a "menorah" (branched candlestick), and surrounded by moral sentences, is frequently found printed in prayer-books. It is claimed that the psalm was engraved upon David's shield in this form. Without the superscription, it contains seven verses and forty-nine words; the fifth verse, counting the dageshed כ as two, contains forty-nine letters. It is owing to the first fact that this psalm is used together with Ps. cxliv. in the ritual at the departure of the Sabbath. For the connection of David with the departure of Sabbath, see "Mitteilungen der Gesellschaft für Jüdische Volkskunde," i. 76. On the second fact is based the reading of this psalm in the forty-nine days of 'Omer (see 'OMER), between Passover and Pentecost. The Catholic Church also designates a special psalm for daily recital between Easter and Pentecost (see Grünw. 109).
lxviii.: Against evil spirits (Grünw., as an exorcism for travelers' use).
lxix.: Against evil longing.
lxx.: Before a battle (Grünw., to appease an enemy).
lxxi.: In prison.
lxxii.: To win grace and favor.
lxxiii.: Against compulsory baptism.
lxxiv.: Against a mob, whether of men or spirits.
lxxv.: For forgiveness of sins.
lxxvi.: Against flood and fire.
lxxvii.: Against all manner of distress.
lxxviii.: To win grace and favor at court.
lxxix.: To be rid of one's foes.
lxxx.-lxxxi.: Against idolatry.
lxxxii.: When on an important mission.
lxxxiii.: In time of war. Grünw. connects the expression in verse 14 (A.V. 13), "make them like a wheel," with the Jews' badge, which was sometimes in the form of a wheel.
lxxxiv.: Against sickness.
lxxxv.: To win favor.
lxxxvi.: Against an evil spirit.
lxxxvii.: To deliver one from prison.
lxxxviii.: To save a city or a community.
lxxxix.: Against the effects of sickness.
xc.: Against lions or evil spirits. Verse 17, against fever (M.V. 50); shortening a journey (M.V. 23); general protection (M.V. 31).

Ps. xci.: The same; and against all kinds of evil; to make oneself invisible (M.V. 36); verses 5 and 10, against epilepsy (M.V. 52); molding wax for a sick child, see Rubin, *l.c.* p. 134. For the connection between traveling and archangels, and the employment of this psalm by both Jews and Christians, see Grünw. 99.
xcii.: Before waiting upon high dignitaries.
xciii.: For support in a lawsuit.
xciv.: Against enemies.
xcv.: Against being betrayed into baptism.
xcvi.: To give happiness to one's family.
xcvii.: The same. Verse 2, against theft (M.V. 16).
xcviii.: To make peace between enemies.
xcix.: To become pious.
c.: To gain a victory.
ci.: Against an evil spirit.
cii.-ciii.: Against childlessness.
civ.: To be rid of one's enemies.
cv.: Against a quartan ague.
cvi.: Against a tertian ague.
cvii.: Against continuous fever.
cviii.: To have happiness in one's house.
cix.: Against enemies.
cx.: To make peace. Verse 6, against an evil spirit (M.V. 31); verse 7, at sea (S.Z. 31b).
cxi.: To gain new friends.
cxii.: To increase one's strength.
cxiii.: To secure the removal of idolatry.
cxiv.: To be fortunate in business.
cxv.: To be victorious in debate.
cxvi.: Against an unnatural or sudden death.
cxvii.: Against slander.
cxviii.: In medicine (Grünw. 118); against scoffers to answer (an epikores), and to maintain oneself in law.
cxix.: On the performance of a religious precept; to sharpen the intellect; for disease of the eye; when one is in deep perplexity; valuable for preachers; against sin; wholesome for the spleen and kidneys; against temptation; to win favor; against weakness in the hands; upon a journey; against catarrh; against weakness in the feet; against earache; against dizziness; on taking children to school (Berliner, *l.c.* p. 7). Verse 49, before study (S.Z. 30b); verses 33-40, against temptation (M.V. 65).
cxx.: On seeing a snake or a scorpion; in the lying-in room (M.V. 91).
cxx.-cxxxiv.: On the dedication of a house which has been inhabited by evil spirits (Grünw.).
cxxi.: When traveling alone at night.
cxxii.: On appearing before a high potentate.
cxxiii.: When a slave has run away.
cxxiv.: On fording a river.
cxxv.: Against enemies; on a journey (M.V. 34; S.Z. 31a).
cxxvi.: For a woman whose children die.
cxxvii.: For protection.
cxxviii.: For an expectant mother.
cxxix.: On the performance of a religious act; at sea (S.Z. 31b).
cxxx.: To escape arrest by the night watchman.
cxxxi.: Against undue presumption.
cxxxii.: On fulfilling a rash vow.
cxxxiii.: For friendship and love.
cxxxiv.: Before studying.
cxxxv.: For repentance and amendment.
cxxxvi.: To confess one's sin.
cxxxvii.: To remove enmity.
cxxxviii.: For love.
cxxxix.-cxl.: To awaken love between a man and a woman.
cxli.: Against heart-disease.
cxlii.: Against lumbago.
cxliii.: Against pain in the arm.
cxliv.: To heal a fractured or dislocated hand; against demons. Verse 2, at sea (M.V. 35); by Christians against fever (Grünw. in M.A.).
cxlv.: Against sudden fright.
cxlvi.: Against sword wounds.
cxlvii.: Against the bite of serpents.
cxlviii.-cxlix.: Against a fire.
cxlix. 6: Against pollution (M.V. 62).
cl.: Thanking God for all His works.

For single words or names taken from the Bible and used for mantic purposes, see NAMES OF GOD and ANGELOLOGY.

Use of Biblical Names.

The names of the following individual personages of the Bible have been employed in bibliomancy:

Adam and Eve: For use in amulets, see AMULETS.
The Serpent: Ofiel, Samael in Schwab. Concerning the human figure with serpentine feet, see "Sefer Ḥasidim," ed. Lemberg, § 1166, "the serpent went upon two feet and had partly a human form." On Samael together with Serafiel, M.V. 21; Targ. Yer. on Gen. iii. 6 interprets the serpent as Samael, and "Yalḳut Ḥadash" makes the serpent identical with Samael and Satan; see also ABRAXAS.
Enoch: To influence trade, S.Z. 22. See Steinschneider, "Zur Pseudepigraphischen Literatur," pp. 53 *et seq.*; Harkavy, "Responsen der Gaonim," p. 344.
Abraham, Isaac, and Jacob: In amulets for the lying-in room, M. V. 91.
Sarah, Rebekah, Rachel, and Leah: The same.
Joseph: Against pollution, M.V. 62; against the evil eye, compare Berakot 55b; see Blau, p. 155; in the ceremony of "Tashliḥ," with reference to Gen. xlix. 22.
Moses: Against fire (after Ex. ii. 8), M.V. 58; for hard labor, M.V. 10; to awaken intellect ("Pseudepigrapha"), M.V. 66; against gangrene, M.V. 48.
Korah: Korḥin=evil spirits, M.V. 17.
Joshua: To arouse intelligence ("Pseudepigrapha"), M.V. 66.
David: See DAVID, SHIELD OF.
Doeg: See under Ahithophel (compare Mishnah, Sanh. x. 2).
Ahithophel: Name of the author of a fate-book (Steinschneider, "Hebr. Bibl." vi. 120). Regarded as a colleague, as it were, of Balaam, and as a species of Mephistopheles (*idem*, "Zur Pseudepigraphischen Literatur," p. 80).
Absalom: In the preparation of divining-rods, M.V. 80.
Solomon: In conjunction with Ashmedai, M.V. 56; concerning his shield and seal-rings, see M.V. 39.
Queen of Sheba: See below, under Lilith, M.V. 11, 17, 29.
Elijah: See MS. 1863, pp. 286, 288, 293; also S.Z. 22; M.V. 47.
Job: Against tooth-ache ("Pseudepigrapha"), M.V. 47.
Satan: For amulets in lying-in room, M. 71.
Boaz: Against pollution, M.V. 62.
Daniel: Against wild beasts, M.V. 33; Hananiah, Mishael, and Azariah; in a conjuration against fever, Shab. 67a.
Lilith: Identical with the Queen of Sheba, MS. 1870, 187; also Kelifa, MS. 1880, p. 556; Klippe, M.V. 62. For a masculine Lili, and a plural Liliyot, see M.V. 62.
The creatures around the throne (Ezek. i. 15): To shorten one's journey, M.V. 24.
Names of rivers: The rivers of Eden, M.V. 69; Kidron, Wohlstein, 17.

Other single names or words are rarely employed. Only the following can be mentioned: סנה ("the bush"), Ex. iii. 2 *et seq.* For a magical cure of a burning fever, the bush is mentioned in Shab. 67a, and is addressed as the tree "upon which God allowed His Shekinah to dwell."

Single Biblical Words.

The words מגן ("shield") and אמן ("so may it be") are sometimes found interwoven with other words or with each other so that each of their three letters is made the initial of a magic word: thus מקדש, גקדש, נקדש (M. V. 50), אנן, מגן, נגן, (*ib.*; compare 38). The last letter, "N," serves as the last letter in the name of the good angels (M. V. 61). "Ezel" (אזל = "the stone Ezel"), I Sam. xx. 19, is interpreted as consisting of the initials of the words אור זרוע לצדיק ("light is sown for the righteous," Ps. xcvii. 11) and is sometimes found; see M. V. 55.

Concerning the mode of application of these Bible passages and words, it is only necessary to state here that they were written in various places and on numerous objects: *e.g.*, paper (M. V. 40, 64); clean ("kosher") parchment (M. V. 28, 31, 35, 57, 60 *et seq.*); stag parchment (S. i.); the wall (M. V. 30); walking-cane (B. B. 73a); on bread (M. V. 43); a human skull (M. V. 49); cheese (M. V. 28); an apple (M. V. 25); clay (Sh. 2 M. V. 56, 60); [see "Sefer Raziel," in Wohlstein, 132]); especially on new clay vessels (M. V. 24, 25); an egg (Sh. 119, S. Z. 30b, M. V. 43); and on a cake (S. Z. 30b).

In addition, they were pronounced or whispered (Sh. 10, 29, 31; compare M. V. 56, 59) over olive-oil (Sh. 3, 5, 33, 45, 89), dust (Sh. 7 *et seq.*), especially over well-water (Sh. 7, 10, 20, 37, 69, 119), water upon which the sun had never shone (Sh. 29, 84), on plucking vegetables or herbs (Sh. 13), over oil of sesame (Sh. 51), oil of roses (Sh. 20, 21), salt (*ib.*), willow branches (Sh. 29), leaves of a palm-tree that had not yet blossomed (Sh. 29), wine (Sh. 111); and over all of these only at certain fixed times (Sh. 29, 62, 119; M. V. 80). Sometimes they were not uttered at all, but were dwelt on in thought (M. V. 37).

The formulas are recited once only, or several times in succession (M. V. 23, 31, 32, 34, 65, 80); at times backward, at times forward (M. V. 65, 68); in combinations or in permutations (M. V. 30); sometimes in gematria (compare Kircher, "Arithmologia," Rome, 1665; M. V. 628); sometimes abbreviated (M. V. 23); on other occasions with one letter left off at a time.

BIBLIOPHILES, JEWISH.

See BOOK COLLECTORS.

BIBLIOTHÈQUE NATIONALE, PARIS:

National library of France, founded in 1354. The Hebrew manuscripts in this library have always stood at the head of the Oriental collections, their number now amounting to 1,390. In importance and number of volumes, this library is second only to the Bodleian at Oxford.

The foundation of the Bibliothèque Nationale dates from the time of Charles V. of France, about the middle of the fourteenth century; though it is not known whether any Hebrew manuscripts were contained in the libraries of Charles V. and Charles VI. It is not even certain that manuscript No. 715, said to be "written in the letters of the Jews," was really a Hebrew book (Delisle, "Le Cabinet des Manuscrits," i. 48, note 1). A number of Hebrew books might have been expected to be found in these two collections. Charles V. ordered a selection to be made among the Hebrew manuscripts at the Trésor des Chartes, and in 1372 these manuscripts were brought to the Louvre. A second collection of Hebrew books was delivered to Gilles Mallet about 1397. It comprised 44 volumes, 4 rolls, and portions of the Bible and the Talmud which had been found in the house of a Jew living in the Faubourg St. Denis after the Jews were expelled from Paris (V. H. Sauval, "Histoire et Récherche des Antiquités de la Ville de Paris," ii. 520). From this source have probably come the two French rituals confiscated during the reign of Philippe-le-Bel, and formerly preserved in the treasury (now Hebrew MSS. 634, 637). The Renaissance largely enriched the Hebrew stores of the library. Guillaume Pellicier, bishop of Montpellier and ambassador of France to Venice, says in a letter addressed to King Francis I., Aug. 29, 1540, "Sire, it will please you to learn that since I have been in this city by your command, I have, up to the present time, kept a force of copyists at work, and now I still have eight of them, including the Hebrew, who write for me the rarest works I am able to find in this language" (Delisle, *ib.* i. 155). These are, without doubt, the books in the library the bindings of which bear the arms of Henry II.

In an inventory of the library of Blois, which in 1544 was united with that of Fontainebleau, there are only 3 Hebrew volumes. Henry II. had in all only 30 Hebrew manuscripts, to which 20 volumes were added in 1599 from the library of Catherine de Médici. These volumes came originally from the collection of Gilles de Viterbe (see the report of M. Taschereau, published at the head of the catalogue of this collection). On Jan. 12, 1668, Louis XIV. ordered an exchange of printed books and manuscripts between the library of the College Mazarin and that of the king. In this way 200 manuscripts were added to the king's collection.

On May 18, 1673, Dupont, consul of France at Aleppo, announced to Minister Colbert that Father Besson had procured about 50 volumes from private libraries in the country, and from some of the synagogues. Under the librarianship of Baluze no less than 60 Hebrew manuscripts were added (Delisle, *ib.* p. 446). One hundred and twenty-seven Hebrew manuscripts were in the collection of Gilbert Gaulmin, 14 in that of the archbishop of Reims (1700), and 12 in that of Thevenot. The Colbert collection enriched the library by 171, so that in 1739 the total number of manuscripts was 516.

It is worthy of note that the general centralization of books by the French republic has brought to the library a considerable number of Hebrew manuscripts: 207 from the Paris churches of the Oratory, 34 from the churches of St. Germain. At the same period as many as 258 came to the library from the Sorbonne, Hebrew books having been a part of the library there as early as 1414 (Delisle, *ib.* iii. 41, note), and the collection of Oriental manuscripts having been enriched by those of the Marquis de Brières, which came into the Sorbonne collection with the library of Cardinal Richelieu. These can be recognized by the cardinal's arms on their covers. In modern times important gifts have enriched the collection. In 1862, 8 Hebrew manuscripts were added from the Trésor des Chartes, and in 1867 the Empress Eugénie presented to the library a Bible, for which, because of its illustrations and supposed antiquity, she had paid 25,000 francs ("Rev. Et. Juives," xxxvi. 112). About 1872 two further additions were made by Baron James Edouard de Rothschild (Nos. 1322, 1323). All departments of Jewish literature are represented in this collection, besides works in Aramaic, in Arabic (Hebrew characters), and in Judæo-Spanish.

Bibles.

The most ancient Bible is dated 1286; others are of the fourteenth century ("Archives Israélites," 1894, lv. 397). A number of these volumes coming from Italy and the Orient are of the fifteenth or sixteenth century. Others are of more recent date. A few volumes contain miniatures: *e.g.*, No. 584, Sefer ha-Mizwot, in Arabic; No. 586, Minhagim in Judæo-German; Nos. 592, 593, 617, Catalan and Italian rituals; Nos. 643, 644, 646, and especially No. 1,333, containing a curious Passover Haggadah according to the Oriental rite, and dating from the beginning of the fifteenth century ("Jour. Asiatique," 1892, i. 172–185).

In addition to the manuscripts already mentioned, fragments of others have been found bound within printed volumes, among these being an elegy on Joseph Caro ("Rev. Et. Juives," ix. 304); and Hebrew manuscripts found in non-Hebrew books, such as the three autograph letters of David Cohen de Lara, incorporated in the French manuscript 19,213 (*ib.* xi. 95); or some business memoranda in semicursive Hebrew of the twelfth and thirteenth centuries, found in Latin manuscript No. 5097.

Cataloguing of the Collection.

As regards the cataloguing of this collection, the beginnings were made by a converted Jew, Louis de Compiègne, in 1689, by order of Louis XIV. (Franklin, "Les Anciennes Bibliothèques de Paris," ii. 190). This work, revised by the Abbé Renaudot, served as a basis for the Hebrew part of the catalogue of Oriental manuscripts, printed in 1739. The deficiencies of this latter work were soon noticed; and a Jew of the Comtat Venaissin, Bernard de Valabrègue, examined the manuscripts, while Richard Simon gave an account of the Hebrew manuscripts of the Oratory (at this period this latter collection was not yet incorporated with the Bibliothèque Nationale). It was, however, found necessary to have the catalogue completely revised. From 1838 to 1850 this work was done by S. Munk. When in 1850 his eyesight failed, he was superseded by Joseph Derenbourg. The catalogue published in 1865 contained 1,313 manuscripts and 16 Samaritan works. Since that time the collection has been increased by about 75 manuscripts ("Rev. Et. Juives," xxxvii. 249). The work of cataloguing the collection was completed by M. Zotenberg, who added a description of the Samaritan manuscripts.

In regard to the printed books a different system of grouping has been followed. In the Bibliothèque Nationale printed books are distributed according to subject-matter. The number of books in the Bibliothèque Nationale in 1897 was 2,048,893; and as the Hebrew works are distributed among these, it is no easy task to ascertain their existence in the library. Thus almost all the incunabula enumerated by De Rossi may, it is true, be found there, but in order to discover them, they must be laboriously sought in the numerous subject-divisions.

Cabinet des Médailles et Antiques.

From a collection of valuable objects of ancient, medieval, and modern times, Louis XIV. constituted the Cabinet de France, or, as it is called, the "Cabinet des Médailles et Antiques." The Hebraica in this collection are to be found in the three main sections denominated: (*a*) ancient medals; (*b*) early Middle Ages; (*c*) modern specimens. The series of ancient Jewish coins includes 28 from Galilee, 204 from Samaria, and 417 from Judea. The last number, the greater part of which are Greek or Roman coins, includes also the coins of Simon Maccabee (9 in silver and 11 in bronze), as well as the coins minted during the insurrection of Bar Kokba. S. Munk, in his "Palestine," has reproduced, on plate 21, 6 of these Maccabean coins (Reinach, in "Rev. Et. Juives," xv. 56, xvii. 42, xviii. 304).

After the medals come in chronological order the cups with magic inscriptions in Judæo-Aramean. Of these the Cabinet contains several specimens (see Bowls, Magic).

In addition to these, there are specimens with texts in square characters of comparatively modern date. Some are in the shape of coins, upon which are Hebrew inscriptions. These date from the sixteenth or seventeenth century ("Rev. Et. Juives," xxv. 132, xxvii. 317). There are about forty specimens in this class. They comprise: (*a*) inscriptions with historic names recalling the rabbinical traditions of coins referring to Abraham and Sarah, to Isaac and Rebekah (B. Ḳ. 97b); some of these referring to Moses, others to Aaron, David, and Solomon; (*b*) amulets and talismans; (*c*) magic squares and astrological symbols; (*d*) Christian documents with Hebrew and Latin words taken from the Bible. There is also a medal said to have come from Lyons (J. Derenbourg, in "Revue Israélite," i. 4–8), a cameo with the name of Gracia Nassi ("L'Officiel," Nov. 7, 1877), and a Jewish seal of the fourteenth century (A. Blanchet, in "Revue Numismatique," 1889, p. 483). Finally, there are a number of talismans called Abraxas ("Rev. Et. Juives," xxxi. 149; Catalogue by E. Babelon, No. 27).

Department of Engravings.

The department of engravings in the Bibliothèque Nationale comprises 2,300,000 pieces, preserved in 145,000 volumes and 4,000 portfolios (Delaborde, "Le Departement des Estampes à la Bibliothèque Nationale," p. 6). This collection was originally made by the Abbé de Marolles in 1667. The Jewish subjects can be found by means of the catalogues and alphabetical lists of engravings. Among these may be mentioned the engraving of a medieval anti-Jewish statue, called the "Truie de Wittenberg" (Kaufmann, in "Rev. Et. Juives," xx. 269, xxiii. 313), and an engraving of the so-called martyrdom of St. Simon of Trent in 1472, a xylograph of some interest and one frequently described.

G. M. S.

BICK, JACOB SAMUEL: Austrian author; born in the eighteenth century; died in Brody, 1831. He was a satirical writer of force and ability, and one of the ablest pioneers of the "haskalah" (culture) movement among the Jews of Galicia. His contributions to the "Bikkure ha-'Ittim," "Kerem Ḥemed," and other Hebrew publications of his time contain strong pleas for the spread of secular knowledge and industry among the Galician Hebrews; and, like all his contemporaries among the Maskilim or progressionists, he was strongly in favor of agricultural pursuits by Jews. He died of cholera in 1831 and left several manuscript works, both in prose and poetry, which were burned in the great conflagration in Brody in the spring of 1835, when the house of his son-in-law, Isaac Rothenberg, was totally destroyed. Bick was highly respected for his piety, learning, and ability; and the destruction of his literary remains was at the time deplored as a great loss.

Bibliography: *Kerem Ḥemed*, i., Vienna, 1833, note to Letter 22; *ib.* ii. 131.

S. P. Wi.

BICKELL, GUSTAV WILHELM HUGO: Christian Hebraist and professor in the University of Vienna; born July 7, 1838, at Cassel. After graduating at Marburg, where he studied Semitic languages, he renounced Protestantism and entered the Roman Catholic Church, becoming two years later (1867) professor of Christian archeology and Semitic languages in the University of Innsbruck. In 1892 he was called to the University of Vienna. Bickell's works include the following on Hebrew subjects: "Grundriss der Hebräischen Grammatik," in two vols., Leipsic, 1869–70 (English translation by S. I. Curtiss, Leipsic, 1877); "Dichtungen der Hebräer," in three vols., according to the versification of the original text, Innsbruck, 1882–84; "Kohelet's Untersuchung über den Wert des Daseins," *ib.*, 1886; "Kalilag und Damnag," Leipsic, 1876; "Der Prediger," 1884; "Krit. Bearbeitung der Proverbien," in "W. Z. K. M." 1891; "Kritische Bearbeitung des Jobdialogs," in "W. Z. K. M." 1893, and "Das Buch Job" (metrical translation), 1894. His construction of Job and Kohelet is given in popular form in Dillon's "Sceptics of the Old Test." 1895. He has published also the "Carmina Nisibena" of Ephraem Syrus, 1866, and, from Syrian Fathers, "Ausgewählte Gedichte," 1872, and "Ausgewählte Schriften," 1874. For his critical studies of Ben Sira, see "Zeitschrift für Theologie und Kirche," 1882, and "W. Z. K. M." vol. xiii.

Bibliography: Meyer, *Konversations-Lexikon*, ii. 986.

T. I. Br.

BIDKAR: A captain under Jehu, by whom he was ordered to cast the body of Jehoram into the field of Naboth (II Kings ix. 25).

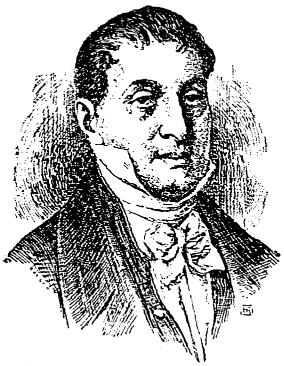
BIDPAI FABLES IN HEBREW. See Kalila we-Dimna.

BIE, OSKAR: German archeologist and professor at the Technische Hochschule at Charlottenburg, near Berlin; born at Breslau Feb. 9, 1864. He studied at the gymnasium and university of his native town. Besides his position at the Technische Hochschule, he occupies at present (1902) that of editor-in-chief of the "Neue Deutsche Rundschau." Bie is the author of the following works: "Die Musen in der Antiken Kunst," 1886; "Kampfgruppe und Kämpfertypen in der Antike," 1890; "Zwischen den Künsten," 1895; and "Das Klavier," 1898. He is a convert to Christianity.

S.

BIEDERMANN, MICHAEL LAZAR: Austrian jeweler and merchant; born at Presburg, Hungary, Aug. 13, 1769; died at Vienna Aug. 24, 1843. When fifteen years old he went to Vienna and was apprenticed to an engraver. In 1787 he gained a prize for modeling in wax, and in 1789 one for engraving. Prior to 1792 he was known as Michael Lazar, but in that year he received permission to live in Vienna as a seal-engraver, and to adopt the name Biedermann. He was entrusted with the engraving of the imperial seals. Thus he at once became prominent in his trade, and by 1800 was enabled to open a jeweler's store.

Visiting the fair at Leipsic, Biedermann became interested in the wool trade, and in 1802 commenced business as a wool merchant. Here, as in the jewelry business, he was eminently successful. In 1807 an English firm bought wool from him at the Leipsic fair to the amount of $300,000. In 1808 he received from the Austro-Hungarian government a permit to trade as a wholesale merchant, and through his energy a wide field was opened to Austrian agriculture, and to the manufacture of woolen goods, the methods of which he greatly improved. He succeeded in making his firm one of the leading houses of Austria.



Michael Lazar Biedermann.

Biedermann took great interest in the welfare of the Jewish community of Vienna, of which he was the representative from 1806 till his death. In 1807 he instituted a fund for the sick, and in 1839 a pension fund for officers of the community.

In 1830 Biedermann received the title of "Jeweler to the Emperor of Austria."

Jahrhunderts, Zunächst aus Oesterreich-Ungarn*, part i., p. 9. Vienna, 1882; Kohut, *Berühmte Israelitische Männer und Frauen*, p. 377, Leipsic, 1900.

S. F. T. H.

BIEGELEISEN, HENRY: Polish critic and author; born 1855 in Galicia. He studied at the universities of Lemberg, Munich, and Leipsic, receiving from the last named the degree of doctor of philology for his treatise, "Characteristik Trembecki's, ein Beitrag zur Slavischen Litteratur-Geschichte" (Leipsic, 1882). He is now (1902) director of the Hebrew school at Lemberg.

Biegeleisen has published: "Franciszek Bohomolnik," 1879; "Tymon Zalorowsky," in the "Atheneum," 1883; "Pan Tadeush Mickiewicz," a study of literary esthetics, Warsaw, 1884; "Julius Slomatzky," 2 vols., Lemberg, 1895; and "Posthumous Letters of Slomatzky" ("Genezis z Ducha"), etc., 1886. He has also contributed to various periodicals, among other articles, the following: "Karol Dickens"; "Fiziognomika w Smietle Nojnomszych Badan"; "Ewolucia Piskno Przyroda"; and "Henry Ibsen."

H. R. L. E.

BIEL (BIENNE): Town in the canton of Bern, Switzerland. It had Jewish inhabitants as early as the city of Bern itself. In 1305 a few Jewish families were naturalized in consideration of a yearly tax of fifty pfennigs each. According to the patent or "Jew-letter" granted them (see Ulrich, "Sammlung Jüdischer Geschichten in der Schweiz," p. 482, Basel, 1768), they were not to be hindered in any way in their trade or traffic. A pledge left in pawn by a Christian could be sold by them after the lapse of a year and forty days. Curiously enough, weapons were allowed to be taken in pawn. In case of emergency these had to be delivered, even on the Sabbath, against adequate security, to the mayor in presence of two or three councilors; when the danger was past, they were to be returned as quickly as possible to the Jews. Nothing further is known concerning the Jews of Biel; even the date of their expulsion is unnoted. At present (1902) there are at Biel about forty-five Jewish families, who hire their synagogue, maintain a teacher, and provide a fund for the poor and the sick.

D. M. K.

BIELGORAJ: A district town in the government of Lublin, Russian Poland. According to the "Ẓuk ha-'Ittim," during the uprising of the Cossacks under Chmielnicki (1648–49), all the Jews of Bielgoraj were killed, among them Rabbi Hirsch, brother-in-law of the author of that work, and his brother Rabbi David. Its Jewish population in 1890 was 3,430, in a total population of 7,812. In the district there were 6,811 Jews in a total population of 88,667. The Jews possess one synagogue and three prayer-houses, a Hebrew school, and a hospital. A large number of the Jews of Bielgoraj are artisans.

BIBLIOGRAPHY: *Ẓuk ha-'Ittim*, Venice, 1556; *Regesty i Nadpisi*, No. 924, St. Petersburg, 1899; *Entziklopedicheski Slovar*, v., St. Petersburg, 1896.

H. R.

BIELTZY: District town of the government of Bessarabia, Russia. At the census of 1897 the population was 18,526, including over ten thousand Jews, most of them engaged in handicrafts, but some in agriculture and commerce. There were at the same date 1,188 Jewish artisans (25 per cent of them tailors or tailoresses). In the neighborhood of Bieltzy there are many Jewish farmers, cultivating their own or rented land: 50 of them raise tobacco on rented farms covering about 405 acres of land. The economic condition of the Jews has grown worse since the government monopolized the liquor trade (1896), in which 300 Jewish families were engaged.

In 1898, 200 Jewish families petitioned for charity at Passover, and also for coal during the winter. There is a Jewish hospital, a poor-house (maintained at an annual expense of 3,700 rubles), and a Talmud Torah, attended by 135 pupils. The statistical information given here was supplied by the Jewish Colonization Association of St. Petersburg, Russia.

H. R. S. J.

BIEN, JULIUS: American lithographer; son of Emanuel M., ḥazan, lecturer, and lithographer; born at Naumburg, near Cassel, Hesse-Nassau, Sept. 27, 1826. He was educated at the Academy of Fine Arts, Cassel, and at Städel's Institute, Frankfort-on-the-Main, and studied under Prof. M. Oppenheim of the latter place. Bien came to New York, established a lithographic business there in 1850, and was successful in scientific production, issuing many geographical and scientific works, such as atlases and geological and hydrographic charts. He received medals and diplomas at various exhibitions: Philadelphia, 1876; Paris, 1878; Chicago, 1893; and Paris, 1900. He was president of the National Lithographers' Association from 1886 to 1896, and is a member of numerous scientific societies. Bien was president of the order B'NAI B'RITH (1854–57 and 1868–1900), and instrumental in giving it an international character.

BIBLIOGRAPHY: *Who's Who in America*, 1901–02.

A.

BIENSTOK, LEV MOISEIEVICH: Russian writer, educationist, and communal worker; born April 6, 1836, at Lukachi, government of Volhynia; died Oct. 22, 1894, at Jaffa, Palestine. He received his first education in the ḥeder and in the Russian public school at Turin, district of Kovel; in 1847 entered the gymnasium at Jitomir, and in 1848 the Hebrew Theological Seminary at the same place, graduating from the latter in 1858. He was appointed teacher at the Jewish school of Starokonstantinov, and acted as rabbi of the Jitomir community from 1859 to 1862. From 1863 to 1867 he was instructor in the Jewish religion at various gymnasia in Jitomir.

In 1867 Bienstok was appointed assistant editor of the "Volynskiya Gubernskiya Vyedomosty," the official newspaper of the government of Volhynia, and from 1867 to 1882 was adviser on Jewish matters ("uchony yevrei") to the governor of Volhynia. In 1880 Bienstok settled at St. Petersburg as secretary of the Jewish community there; but after the anti-Jewish riots he returned to Jitomir, and in 1892 the Russian-Jewish Aid Society for Agriculturists and Artisans of Odessa appointed him as its representative in Jaffa. There he brought order into the affairs of the society, and reported on the condition of the agricultural colonies of Palestine.

Bienstok was one of the pioneer collaborators of the first Russian-Jewish periodicals, "Razsvyet" and "Sion." He also contributed to the Russian periodicals: "Moskovskiya Vyedomosti," "Russki Vyestnik," "Sovremennaya Lyetopis," and others.

Bienstok was the author of: (1) "Otzy i Dyety" (Fathers and Sons), a translation of the Hebrew novel, "Abot u-Banim," by S. Abramovich; (2) "Yevreiskiya Zemledyelcheskiya Kolonii Yekaterinoslavskoi Gubernii 1890" (On the Jewish Agricultural Colonies of the Province of Yekaterinoslav in 1890, (St. Petersburg, 1890). Among his magazine articles on Jewish topics were: "Vopros ob Yevreiskikh Uchilishchach," a paper on Jewish schools, in "Russki Vyestnik" for 1866, Nos. 11, 12; "Yevrei Volynskoi Gubernii," a series of articles on the Jews of the government of Volhynia, and containing valuable information on the ethnography of the Russian Jews (published in the "Volhynskiya Gubernskiya Vyedomosti" for 1867; "Iz Nedavnavo Proshlavo," in the same periodical 1867; "Otkrytoe Pismo U. Aksakovu" in "Voskhod," 1882, No. 4; "Vtoroe Otkrytoe Pismo Aksakovu," in "Russki Kurier," 1883, No. 251, and "Vospominanie o Finlyandii," reminiscences of Finland, in "Odesski Listok" for 1883, Nos. 187, 189, 201, 202.

H. R.

BIESENTHAL, JOACHIM HEINRICH (RAPHAEL HIRSCH; pseudonym, Karl Ignaz Corvé): Theologian and author; born at Lobsens, Posen, 1800; died in Berlin, 1886. He was destined for the rabbinate; but while attending the University of Berlin (1827–35) he made the acquaintance of the Oriental scholar Wilhelm Vatke, with whom he studied Christian theology. In 1837 he published "Auszüge aus dem Buche Sohar, mit Deutscher Uebersetzung," in which he tried to prove from Jewish literature the doctrine of the Trinity and other Christian dogmas.

The following year he was converted to Christianity, joined the Evangelical Church, and entered the service of the Jewish Mission of Berlin. In 1844 he became a member of the London Missionary Society, and engaged in missionary work among the Jews. His literary activity continued unabated.

Biesenthal's works, which give evidence of an extensive knowledge of rabbinical literature, and a thorough command of the Hebrew language, include: "Hebräisches und Chaldäisches Schulwörterbuch über das A. T." (1836–37); David Ḳimḥi's ספר השרשים (in conjunction with F. S. Lebrecht), Berlin, 1838; "The Book of Psalms; Hebrew Text, with a Commentary," Berlin, 1841; "The Book of Isaiah; Hebrew Text and Commentary," Berlin, 1841; "Chrestomathia Rabbinica sive Libri Quatuor, Complectens Analecta e Rerum Scriptoribus, Cosmographis, Grammaticis, Exegetis, Philosophis, Cabalistis et Poetis, Partim e Codicibus Sumta, cum Versione Latina et Vitis Scriptorum," part i., Berlin, 1844; "Zur Geschichte der Christlichen Kirche in Ihrer Ersten Entwickelungsperiode bis zum Anfange des 4ten Jahrhunderts," in which he makes much use of Talmudical material, and endeavors to prove that the Jews stood in close connection with the early Christian Church; and a Hebrew translation of the Epistles to the Hebrews and the Romans, with a commentary based on rabbinical lore, and a biography of Paul, 1857–58.

In 1840, at the time of the blood accusation at Damascus, Biesenthal, under the name "Karl Ignaz Corvé," defended the Jews in his interesting work, "Ueber den Ursprung der Wider die Juden Erhobenen Beschuldigung bei der Feier Ihrer Ostern sich des Blutes zu Bedienen, Nebst Kurzer Darstellung des Jüdischen Rituals in Beziehung auf den Genuss des Blutes," Berlin, 1840. Biesenthal received the degree of doctor of theology from the University of Giessen.

T. S. R.

BIGAMY.—Biblical Data. See Polygamy.

——In Rabbinical Literature: According to Merrill's "Encyclopedia of Law," ii. 192, bigamy consists in "going through the ceremony of marriage with another while a former husband or wife is still alive and not divorced." This definition finds no place in rabbinical law, according to which, in order to constitute bigamy, the second marriage must be a lawful union. Hence it follows that bigamy can be committed only by a man, since a woman who is neither divorced nor widowed can not enter at all into marriage with another, and any cohabitation is considered adultery.

Rabbinical Prohibition.

In Biblical as in Talmudical times polygamy was a recognized institution; hence there could be no question of bigamy. The singular opinion in the Talmud, that a wife can compel a divorce from her husband if he take a second wife, seems to have remained without following. So long as a man could support them, he was free to have as many wives as he chose, even against the wish of his first wife (Yeb. 65a, below; Maimonides, "Yad," Ishut, xiv. 3). The rabbinical prohibition against bigamy dates from the beginning of the eleventh century; Rabbi Gershon b. Judah of Metz forbade it under penalty of excommunication. His decree was accepted without opposition by the French and German Jews; though not in the Orient and in Spain and Portugal, where his authority was questioned. Polygamy is still actually to be found among the Jews in Oriental countries where it is permitted by the law of the land.

Among the Jews of Europe, bigamy is now a crime in the eyes of religion, because of the prohibition of Rabbi Gershon, and because custom sanctions monogamy; he who transgresses is excommunicated. A curious suggestion that R. Gershon's prohibition was intended to hold only until the year 1240, the beginning of the fifth millennium of the Jewish calendar (Joseph Colon, Responsa, No. 101), was never recognized; the great majority of the "Posḳim" agree that the prohibition is in perpetuity.

Permissible Exceptions.

The following cases are not to be considered as constituting bigamy. In localities where the levirate marriage (see Levirate Marriage) is practised, a married man is allowed to marry his brother's widow under certain circumstances as prescribed. But this view is steadily opposed by the majority of German rabbis (Shulḥan 'Aruk, Eben ha-'Ezer, 1. 10). The same difference of opinion rules also in the case of a barren marriage; many authorities permit the husband to take a second wife when a union has continued childless for ten years. When a wife becomes hopelessly insane, the husband may take a second wife only when the case has been investigated by 100 rabbis from three different countries, and permission given by them. According to most authorities a man may take a second wife when his first one, of openly immoral character, or one who has without reason abandoned her husband, refuses to go through the usual form of divorce. When a Jewish wife embraces another religion, thus, according to rabbinical sentiment, making it impossible for her husband to live happily with her, the latter may marry again without formality in some localities. In other places, however, the bet din appoints some person to receive a letter of divorce on behalf of the wife (Shulḥan 'Aruk, *l.c.*). If a Jew commit bigamy, all the resources of Jewish justice are invoked to compel him to divorce his second wife, and the first wife can not be compelled to live with a bigamist. Compare Divorce, Polygamy.

Bibliography: *Shulḥan 'Aruk*, *l.c.*; compare especially the commentaries *Bet Shemuel* by Samuel b. Uri Phoebus, *Beër Heṭeb* by Judah Ashkenazi, and *Pitḥe Teshubah* by Z. H. Eisenstadt, on the passage; Abrahams, *Jewish Life in the Middle Ages*, pp. 116–120.

BIGTHAN: A eunuch of Ahasuerus, who, with Teresh, conspired against the king (Esther ii. 21, vi. 2). The conspiracy was discovered by Mordecai, and on his information the eunuchs were put to death (Esther ii. 23). In vi. 2 the name is given as **Bigthana.**

J. JR. G. B. L.

BIKAYIM, MEÏR BEN ḤALIFAH: Cabalist; lived in Turkey in the eighteenth century. He is the author of the following works: (1) "Golel Or" (Who Evolved Light), on metempsychosis, according to the teachings of Isaac Luria, Ḥayyim Vital, and Azariah of Fano (Smyrna, 1737); (2) "Meore Or" (The Illuminators), a cabalistic commentary on the Pentateuch (Salonica, 1751); (3) "Meïr Bat 'Ayin" (Who Gives Light to the Apple of the Eye), explanations of the first volume of the "'En Ya'aḳob" (Smyrna, 1755); (4) "Meïr la-Arez wela-Dorim" (Who Illuminates the Earth and Its Inhabitants), on the order of the Sabbatic sections (Salonica, 1747); (5) "Magen Abot" (The Shield of the Fathers), a cabalistic commentary on Pirḳe Abot (Salonica, 1748); (6) "Ḳarah Miḳrah" (An Accident Happened), on atonement for sexual impurities (Salonica, 1752).

BIKHAKHANIM: Reigning princess of the Taman peninsula, Crimea. She was married in 1419 to the Genoese Jew Simeone de Guizolfi, who through this marriage became possessor of that country, where one of his heirs, Zacharias de Guizolfi, was still reigning in 1482. The Russian historian F. K. Brun, in "Trudy Pervavo Archeologickeskavo Syezda v Moskvye," 1869, ii. 386, suggests that the name of the princess might not have been "Bikhakhanim," but "Bikhakhatun," and that, if so, she was the daughter of the Georgian prince Bek II. (d. 1391), the ruler of Samtzke and Clarzhet (Brosset, "Hist. de la Géorgie," ii. 206). See Guizolfi, Simeone de.

BIKKURE HA-'ITTIM ("First-Fruits of the Times"): An annual edited and published in Vienna, 1820–31, by S. J. Cohen. It first appeared as a supplement to the Hebrew calendar עתים מזמנים, and was intended for young people only. In 1822 it ceased to be a mere supplement, and became an independent magazine. It was adopted by the Galician Maskilim as their organ for the purpose of fostering culture and education among the Galician Jews. According to Delitzsch, the "Bikkure ha-'Ittim" became the organ of the New-German school of poetry in Austria, the influence of Schiller being as apparent in this magazine as was that of Lessing in the "Meassef" (see Ha-Meassef).

The influence of the "Bikkure ha-'Ittim" on the European Jews of the first half of the nineteenth century was inestimable. The magazine became a kind of college of Jewish learning for the Israelites of those days. Its success was largely due to the energy and indefatigable labor of its editor, who was a man of considerable literary ability and an ardent lover of Jewish literature. The first numbers, with their curious mixture of Hebrew and German articles (the latter being in Hebrew characters), and with their many reprints of articles from the "Meassef"—which had ceased to exist—proved to be rather inferior literary fare. Gradually, however, the magazine improved both in style and in matter, and finally became the literary resort of the greatest Hebrew scholars of the age, men like S. D. Luzzatto, S. L. Rapoport, and I. S. Reggio contributing to it for many years. The "Bikkure ha-'Ittim," in fact, stimulated the powers of many promising young Hebrew writers. Thus the great Hebrew stylist, Isaac Erter, published therein some of those papers which are now so greatly admired for their elegant composition and stinging wit (see Erter, Isaac).

As the name of the magazine signifies, it was one of the forerunners of modern Hebrew journalism; and it was undoubtedly one of the factors in the revival of modern Hebrew.

G. M. Ra.

BIKKURIM ("First-Fruits"): Name of the last treatise of Seder Zera'im. It treats of the way of carrying out the commandment concerning first-fruits mentioned in Deut. xxvi. 1–11. The commandment includes two things: (1) the bringing of the first-fruit, and (2) a declaration to be made by him who brings it, that he owes everything to the kindness of God toward the Israelites, from the times of the Patriarchs up to the present day. The treatise deals with this subject in three chapters.

Chapter i. deals with the conditions that necessitate the bringing of the first-fruits. The Mishnah enumerates three classes of landowners: (*a*) Those that can not bring the first-fruits, either because the fruit is not entirely the product of their land, *e.g.*, when part of the root is outside their land; or because they are not the real or the legitimate owners of the land; or because the produce of their land includes none of the seven kinds enumerated in Deut. viii. 8, or is only of inferior quality unfit for bikkurim. (*b*) Those that bring the first-fruits but do not make the declaration; viz., proselytes, freed slaves, guardians who manage the property of orphans, delegates, females, half-males, and undeveloped persons (Androgynos and Ṭumṭum). (*c*) Those that bring the first-fruit and make the declaration; viz., the owners of land (including those who have bought three trees growing in another man's land) producing some of the seven kinds, of average or superior quality; provided they bring the first-fruit between the Feast of Weeks and the Feast of Tabernacles. When brought after the festival, the declaration must not be made.

In chapter ii. a comparison, as to legal classification; is made between "terumah" (given to the priest), "ma'aser" (the second tithe, which had to be brought to Jerusalem and consumed there), and "bikkurim" (to be brought to the Temple and given there to the priests). Other similar legal comparisons are given: between citron, trees, and vegetables; between the blood of human beings and that of cattle and creeping things; and between beast, cattle, and "koy" (כוי), an intermediate between cattle and beast.

Chapter iii. contains a full account of the way the first-fruits were brought to the Temple.

A fourth chapter, containing a comparison between the laws referring to man, woman, and androgynos (intermediate between man and woman), has been added by some of the editors of the Mishnayot. It is part of the Tosefta Bikkurim. The Tosefta by this name contains two chapters on a line with the Mishnah.

There is no Gemara in the Babylonian Talmud. The Palestinian Talmud has Gemara on Bikkurim, in which the laws of the Mishnah are discussed in the usual way, with a few digressions, noteworthy among which is that on Lev. xix. 32, "Thou shalt rise before the hoary head and honor the face of an old man," and on the value of the title "zaḳen" (elder) conferred on scholars in Palestine and outside Palestine (Yer. iii. 65c).

J. Sr. M. F.

BIKKURIM: A Hebrew annual that appeared in Vienna for two years (1864, 1865), Naphtali Keller being its editor and publisher. The greatest Hebrew scholars of the age, as J. H. Weiss, Jellinek, Reifmann, Lewisohn, Gottlober, Meyer Friedmann, Letteris, and others. were among its contributors. Before Keller had time to prepare the second volume for publication, he died, and Jellinek, together with Meyer Friedmann, took up the work of arranging all the material Keller had amassed; and with the publication of this volume the issue was discontinued. The two volumes published contain little poetry or fiction, and are almost exclusively devoted to questions of Jewish scholarship. history, and literature.

G. M. Ra.

BILDAD (LXX., Βαλδάδ): One of the three friends of Job (Job ii. 11). The meaning of the name is not clear; opinions of scholars vacillate between rendering "Bel has loved" (compare "Eldad," Num. xi. 26 *et seq.*, and "Elidad," Num. xxxiv. 21; Nöldeke, "Z. D. M. G." xlii. 479) and regarding it as a softened pronunciation of "Birdad," which would then be identical with "Bir-dadda" that appears in

Assyrian inscriptions. Delitzsch ("Wo Lag das Paradies?" p. 298) mentions also Bedad, the father of the Idumean king Hadad. Bildad was descended from Shuah, a son of Abraham and Keturah, mentioned in Gen. xxv. 2, and now generally associated with the place Sûhu on the Euphrates, south of Carchemish (compare Delitzsch, *l.c.* pp. 297 *et seq.*; "Zeitschrift für Keilinschriften," ii. 91 *et seq.*; Glaser, "Skizze," ii. 446). Bildad appears three times in the dialogue with Job; in the first speech (Job viii.) he dwells chiefly on the wisdom of the fathers, who preach the destruction of the wicked; in the second speech (*ib.* xviii.) he pictures this destruction; and in the third speech (*ib.* xxv.) he confines himself to a few words, because he has in reality nothing more to say. He speaks of God's "dominion and fear . . . in His high places" only to emphasize man's impurities and imperfections, and leaves it to Job to apply the doctrine to his own case. All attempts to lengthen this last short speech by additions from other parts of the book have proved failures, and are indeed unnecessary (compare Budde, "Das Buch Hiob," pp. 142 *et seq.*).

J. JR. W. N.

BILEAM. See BALAAM.

BILGAH.—Biblical Data: One of the twenty-four divisions of the priests who officiated in the Temple. According to I Chron. xxiv. 14, Bilgah is the fifteenth in order, and is immediately preceded by that of Jeshebeab. Among the Babylonian exiles who returned, there was also a priest, Bilgai (Neh. x. 9 [A. V. 10]) or Bilgah (*ib.* xii. 5) by 'name, whose descendant, Shammua, became the head of a priestly house (*ib.* xii. 18). In the Septuagint the names read Βελγά, Βελγαί, and Βαλγάς; and Josephus mentions a certain Meïrus as a son of Belgas ("B. J." vi. 5, § 1). The traditional meaning given the name is "rejuvenation." Modern lexicographers explain it as "cheerfulness."

——**In Rabbinical Literature:** According to a Talmudic tradition preserved in "Halakot Gedolot" (ed. Hildesheimer, p. 631), Bilgah was assigned to the group which officiated on the second and sixth days of the Feast of Tabernacles. The priests, when entering upon their duties, received their share in the northern part of the Tabernacle, because this was near the seat of their activity. The section assigned to each division of the priesthood was furnished with an iron ring fastened to the floor, for the purpose of securing the animal designed for slaughter, and there were accordingly twenty-four openings in the wall where the knives used for slaughtering were kept. Bilgah alone received his share in the south, his ring being nailed down, and his wall-closet tightly sealed, as a punishment for the apostasy of a woman of that house by the name of Miriam, who, during the Greek dominion under Antiochus Epiphanes, had denied her faith and married a hipparch (Tos., Suk. iv. 28; Suk. 56b; Yer. Suk., end; "Rev. Et. Juives," xxxix. 54). It is further related that when the Greeks forced their way into the Temple, this woman beat her sandals upon the altar, crying: "Wolf, wolf [Λύκος, λύκος], thou hast swallowed the substance of Israel, but hast deserted us in the day of our need!"

According to another opinion, the priests of Bilgah delayed too long in entering upon the performance of their functions; so that those of the division Jeshebeab were compelled to act in their place, and consequently received the prerogatives of Bilgah (Tos., *l.c.*; Yer. Suk., end); to which the Jerusalem Talmud adds that in this instance the division Bilgah was neither abolished nor amalgamated with the other twenty-three divisions, because this would have interfered with the ancient institution. The opinion of Buxtorf, that Miriam, daughter of Bilgah, was a member of a sacred order of virgins, deserves mention only as a curiosity. Kalir's dirge, איכה ישבה, which, on the basis of the Midrash, mentions the divisions of the priesthood, contains no reference to Bilgah; see art. BENJAMIN.

K. S. KR.

BILHAH: A locality in southern Judea (I Chron. iv. 29), evidently the same as "Balah" (בלה, Josh. xix. 3) and "Ba'alah" (בעלה, Josh. xv. 29).

G. W. N.

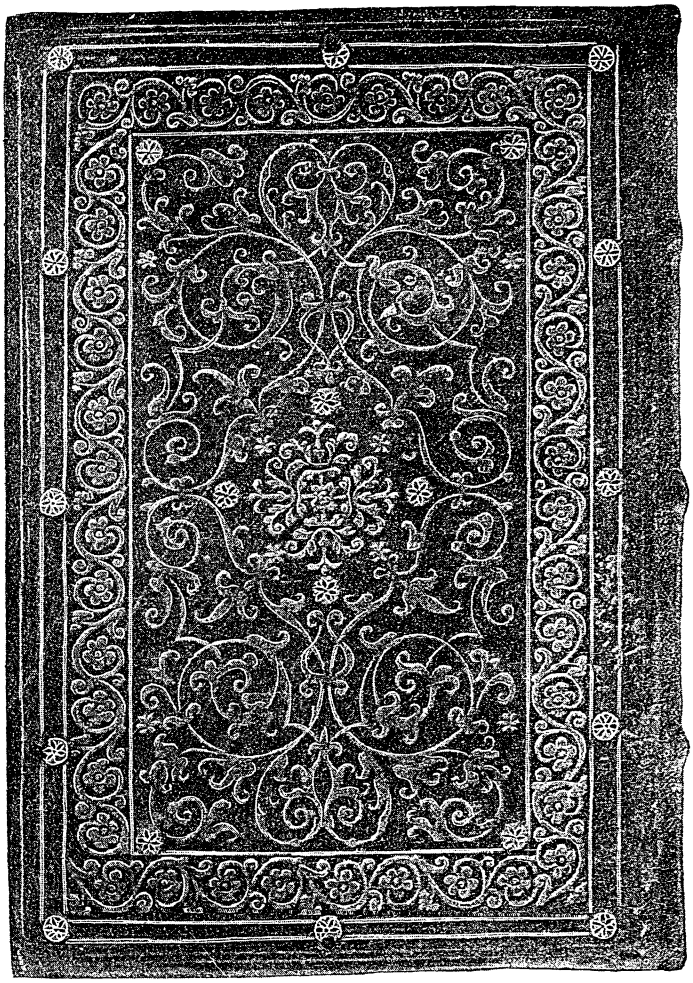
BILHAH (בלהה; LXX. Βαλλά; but in I Chron. vii. 13 Βαλάμ or Βαλαάμ).—**Biblical Data:** Rachel's handmaid, given by Rachel as a concubine to Jacob, to whom, according to Gen. xxx. 3 (compare Gen. xxix. 29, xxxvii. 2), she bore Dan and Naphtali upon Rachel's knees. The expression signifies that Rachel, who is also represented as choosing the names "Dan" and "Naphtali," regarded them as her own children or actually adopted them. In Gen. xxxv. 22 (I Chron. v. 1) there is a reference to an incestuous intercourse between Bilhah and Reuben.

J. JR. W. N.

——**In Rabbinical Literature:** According to Gen. R. lxxiv. 14, Bilhah was one of the daughters of Laban. When Rachel died she was replaced by Bilhah in Jacob's affections, and he took up his residence in her tent. This displeased Reuben, who saw in Bilhah a new and favored rival of his mother Leah; he therefore removed Jacob's couch from Bilhah's tent. It was to this episode that the Rabbis considered Jacob to allude in the farewell to his children (Gen. xlix. 4): "Because thou wentest up to thy father's bed" (Gen. R. xcviii. 4; somewhat different in Shab. 55b). After Jacob's death Bilhah was the "messenger" sent by the brothers to Joseph to crave his mercy (Gen. l. 16). They told her she had been deputed to relate to Joseph all the words of the parting blessing conferred by Jacob upon his favorite son; which untruth was regarded by them as permissible for the sake of peace (Tan., ed. Buber, iii. 18). This legend seems to have been contained in the passage, Gen. R. l. 16, as read by the ancients, Rashi, and Yalḳut, although not found in modern editions.

K. L. G.

——**Critical View:** It is no longer disputed that in this and in every other genealogical account, tribal and not personal relations are designated. Marriage symbolizes in these early traditions the fusion of two tribes originally distinct. The husband represented the stronger tribe and gave his name to both; and the wife represented the weaker which merged in the stronger. If the weaker tribe was greatly the inferior of the stronger in authority and power, it was represented as a concubine (compare Stade, "Gesch. des Volkes Israel," 2d ed., i. 30). Consequently Bilhah (like Hagar, Keturah, and others) is to be regarded as the name of a tribe; even though there are no further indications of the fact, and the meaning of the name has not been determined. There is no proof of the accuracy of Ball's conjecture ("S. B. O. T." on Gen. xxx. 3) that "Bilhah" is connected with the Arabic "baliha" (simple, artless, easily misled).



Leather Binding of "Or Amim," 1537, Tooled in Gold.
(In the collection of Hon. Mayer Sulzberger.)

Since Dan and Naphtali appear as the sons of the handmaid of Rachel, the mother of the tribe of Joseph, they are thus characterized as tribes of the second rank subordinate to Joseph. This is confirmed by such historic evidence concerning the tribes as has been preserved. It has not been determined whether Naphtali was always joined to Dan or was added at the period when the latter was driven from its settlement and forced to move to the north. It is possible that at first Dan was only a clan of the tribe of Joseph, like Benjamin, unsuccessfully trying to establish itself outside the original tribe; and it is not improbable that the portion of Dan which settled in the north came into intimate relations with the adjacent tribe of Naphtali. Such circumstances as these are reflected in the genealogical accounts.

According to Gen. xxxv. 22a, Reuben committed adultery with Bilhah; and according to Gen. xlix. 4, his downfall was due to his defiling his father's couch. The meaning of this story is doubtful. Dillmann, in his commentary on the passage, and Stade, *ib.* i. 151, think that reproach is attached to Reuben for adhering to the old custom by which the son inherits his father's concubines, at a time when the other Israelitish tribes had adopted different customs. A point against this assumption is that there are proofs of the existence of the custom in the land west of the Jordan as late as the time of the kings (compare II Sam. xvi. 21; I Kings ii. 13–25). The following explanation, suggested by Holzinger in his commentary on Gen. xxxv. 22, seems more likely: Reuben's position as first-born designates his greater power, which, however, was soon lost in one way or another. In the time of his strength he had tried to extend his power westward through the tribes descended from Bilhah; and later generations regarded this as a sin against Jacob. An analogy to this interpretation is to be found in the disapproval expressed in Gen. xxxiv. 30 of the treacherous attack on Shechem made by Simeon and Levi.

BILL OF DIVORCE. See Divorce.

BILL OF EXCHANGE. See Exchange.

BILL OF MANUMISSION. See Slavery.

BILSHAN.—Biblical Data: One of the important men who came to Jerusalem from Babylon with Zerubbabel (Ezra ii 2; Neh. vii. 7). In I Esd. v. 8 he is called "Beelsarus," which points to the form Belshar (= "Belshar-uṣṣur" = O Bel, protect the king); while "Bilshan" points to "Belshunu" (His Lord). J. Halévy ("Revue Etudes Juives," x 3) translates the name "père de la langue" (אב לשון).

G. G. B. L.

——**In Rabbinical Literature:** According to the Rabbis, Bilshan is not a proper name, but a surname to the preceding name, Mordecai. The latter was given this epithet because of his linguistic attainments, Bilshan meaning "man of language" (בעל לשון). He not only spoke many languages—the seventy corresponding to the number of nations according to the Rabbis—but also understood the language of the dumb (Men. 64b, 65a). L. G.

BINA BEN DAVID: Cabalist, and rabbi at Lockacze, Poland, in the middle of the seventeenth century. Bina was the author of "Zer Zahab" (Crown of Gold), Cracow, 1647, an alphabetical index to, and extracts and explanations from, the Zohar and Midrash. At the end are novellæ on many Talmudical passages. A considerable portion of the work was translated into Latin by Knorr von Rosenroth in "Cabbala Denudata." Steinschneider ("Cat. Bodl." col. 545) incorrectly cites Bina as "Baruch" (see Zedner, "Cat. Hebr. Books Brit. Mus." p. 152).

Silver Binding of a Hebrew Prayer-Book.
(In the collection of J. Kauffmann of Frankfort-on-the-Main.)

BINDING: The art of fastening together sheets of paper, leaves of parchment, or folios, and of covering them with parchment, leather, linen, or pasteboards. It was originally practised by the writer of the book. When books were written on scrolls, these were connected together by bands and protected from dust by mantles (see Scrolls of Law). The earliest extant book-covers—those of the Cairo Genizah—are of parchment on both sides, long enough to overlap each other. The back ends in a point, a kind of three-cornered flap, to which ribbons or straps are sewed to tie the volume together. Such bindings are still largely used among the Jews of Yemen. Another kind of binding with overlapping parchment or leather was intended to protect the free edge, and on it the name of the book or the titles of parts of it were often marked. The stitching-thread often goes entirely through the book, making it difficult to open.

After the invention of printing rich owners frequently ornamented Bibles and prayer-books with clasps and mountings of gold and silver, this being especially the case with the prayer-books given by the bridegroom to the bride. To-day the book takes the place of the medieval Siblonos-girdle, presented by the bride to the bridegroom. Pressed leather bindings are often decorated with flowers and garlands. The entire issue of a book is usually in the same binding, but occasionally it is issued in two different kinds of binding, as in the case of Simon Duran's Responsa, Amsterdam, 1738. Clasps of precious metal are found, often finely chased, and in the shape of a hand or representing the figures of Moses and Aaron. Bindings entirely of silver, intended as gifts for eminent persons, were used chiefly in Italy. Jewish binders were to be found at Prague and in almost every ghetto.

J. A. F.

BINDING AND LOOSING (Hebrew, "asar we-hittir"; Aramean, "asar we-shera"): Rabbinical term for "forbidding and permitting." The expression "asar" (to bind herself by a bond) is used in the Bible (Num. xxx. 3 *et seq.*) for a vow which prevents one from using a thing. It implies binding an object by a powerful spell in order to prevent its use (see Targ. to Ps. lviii. 6; Shab. 81b, for "magic spell"). The corresponding Aramean "shera" and Hebrew "hittir" (for loosing the prohibitive spell) have no parallel in the Bible.

The power of binding and loosing was always claimed by the Pharisees. Under Queen Alexandra, the Pharisees, says Josephus ("B J." i. 5, § 2), "became the administrators of all public affairs so as to be empowered to banish and readmit whom they pleased, as well as to loose and to bind." This does not mean that, as the learned men, they merely decided what, according to the Law, was forbidden or allowed, but that they possessed and exercised the power of tying or untying a thing by the spell of their divine authority, just as they could, by the power vested in them, pronounce and revoke an anathema upon a person. The various schools had the power "to bind and to loose"; that is, to forbid and to permit (Ḥag. 3b); and they could bind any day by declaring it a fast-day (Meg. Ta'an. xxii.; Ta'an. 12a; Yer. Ned. i. 36c, d). This power and authority, vested in the rabbinical body of each age or in the Sanhedrin (see AUTHORITY), received its ratification and final sanction from the celestial court of justice (Sifra, Emor, ix.; Mak. 23b).

In the New Testament.

In this sense Jesus, when appointing his disciples to be his successors, used the familiar formula (Matt. xvi. 19, xviii. 18). By these words he virtually invested them with the same authority as that which he found belonging to the scribes and Pharisees who "bind heavy burdens and lay them on men's shoulders, but will not move them with one of their fingers"; that is, "loose them," as they have the power to do (Matt. xxiii. 2-4). In the same sense, in the second epistle of Clement to James II. ("Clementine Homilies," Introduction), Peter is represented as having appointed Clement as his successor, saying: "I communicate to him the power of binding and loosing so that, with respect to everything which he shall ordain in the earth, it shall be decreed in the heavens; for he shall bind what ought to be bound and loose what ought to be loosed as knowing the rule of the church." Quite different from this Judaic and ancient view of the apostolic power of binding and loosing is the one expressed in John xx. 23, where Jesus is represented as having said to his disciples after they had received the Holy Spirit: "Whosesoever sins ye remit, they are remitted unto them; and whosesoever sins ye retain, they are retained." It is this view which, adopted by Tertullian and all the church fathers, invested the head of the Christian Church with the power to forgive sins, the "clavis ordinis," "the key-power of the Church."

K.

BING, ABRAHAM: German rabbi and Talmudist; born in 1752 at Frankfort-on-the-Main; died in 1841 at Würzburg, Bavaria, where he had been chief rabbi until his resignation at the beginning of 1839. Before officiating at Würzburg, he was rabbi at Heidingsfeld, Bavaria. Bing was a pupil of Nathan Adler of Frankfort, and belonged to the old orthodox school which admitted no innovations in religious matters, even in externals. A decided opponent of the reform movement, he declared it to be the duty of every orthodox Jew to refuse to go to the temples of the reformers. He was director of a large yeshibah and had a great reputation as a Talmudist. Among the Talmudic works which he left at his death, only the glosses on the Shulḥan 'Aruk, Oraḥ Ḥayyim, have been printed, these bearing the title, "Zikron Abraham" (Presburg, 1892, edited by Isaac Bamberger).

L. G. I. BER.

BING, ALBERT: Austrian physician; born at Nikolsburg, Moravia, Sept. 20, 1844. He attended the gymnasium in his native city, and studied medicine at the University of Vienna, where he completed his course in 1870. The following year he received the degree of doctor of medicine, and one year later that of doctor of surgery, both conferred by the University of Vienna. In 1871 he was appointed on the staff of the Vienna General Hospital with the title of adjunct physician. Bing held this position until 1873, when he became assistant to the famous otologists Politzer and Gruber in the newly erected clinic for diseases of the ear, remaining in this position three years. After a lapse of five years he was made privat-docent of otology at the University of Vienna. Bing has held clinics for the diseases of the ear since 1878, at the hospital of the sisters of charity at Gumpendorf, near Vienna, and has been otologist to the royal guard. He has been a frequent contributor to a number of medical papers, and is the author of over twenty-four monographs on otology, which he published in that "Allgemeine Wiener Medizinische Zeitung"; "Monatsschrift für Ohrenheilkunde"; "Wiener Medizinische Blätter"; "Wiener Medizinische Wochenschrift"; "Zeitschrift für Diagnostik und Therapie"; "Centralblatt für die Ohrenheilkunde"; "Centralblatt für die Gesammte Therapie"; "Wiener Medizinische Presse"; and the transactions of various scientific bodies. His writings treat chiefly of the pathology, symptoms, and treatment of the diseases of the ear; a few papers, however, being devoted to the technique of the examination of the ear. The most important of Bing's publications include: "Vorlesungen über Ohrenheilkunde," with twenty-seven wood-cuts and one double plate, Vienna, 1890; "Die Entotische Anwendung des Hörrohres. Ein Neues Diagnostisches Hilfsmittel bei der Untersuchung Schwerhöriger," in "Monatsschrift für Ohrenheilkunde," 1876; "Neue Behandlungsweise der Sclerosirenden Mittelohrentzündung," in "Wiener Medizinische Blätter," 1879; "Ein Neuer Stimmgabelversuch: Beitrag zur Differential Diagnostik der Krankheiten des Mechanischen Schallleitungs und des Nervösen Hörapparates," in "Wiener Medizinische Blätter," 1891, iv. 41; "Zur Analyse des Weberischen Versuches," in "Wiener Medizinische Presse," 1891, Nos. 9 and 10.

S. W. S.

BING, MEYER HERMANN: Danish art publisher and manufacturer; born at Copenhagen June 4, 1807; died there Sept. 15, 1883. As a boy he was employed in his father's book- and stationery-store, assuming charge of it with his younger brother at their father's death. In 1846 he set up for himself and became the publisher of many important art periodicals and books, and founded, together with the engraver W. Terslev, a lithographic establishment. Bing also founded a china factory in company with his brother and Frederick Gröndahl, which gained a reputation almost as great as the Royal Danish china factory. In 1863 he transferred his publishing-house to his son and son-in-law. Bing was elected president of the first congress of Scandinavian booksellers in 1856. From 1858 to 1871 he was town councilor in Copenhagen; in 1868–71 president of "Industriforeningen"; and up to his death director of the two Jewish free schools in Copenhagen.

S. A. M.

BING, SOLOMON: German physician; son of Dr. Abraham Bing of Bingen, and son-in-law of the well-known physician and scholar Joseph Solomon del Medigo; born about the year 1615. In his boyhood he attended the colleges of the Jesuits in Mayence and Prague to learn Latin and other languages; and then devoted himself to the study of medicine, first under the tutorship of Del Medigo, and finally in the University of Padua, where he received the degrees of doctor of philosophy and of medicine. Upon the departure of his father-in-law, Del Medigo, from Frankfort-on-the-Main for Prague, in 1645, Bing applied to the authorities of Frankfort for permission to succeed him as physician of the Jewish quarters. After considerable trouble—being a graduate from the University of Padua he refused to be reexamined as requested by the authorities—he obtained the necessary permission, and practised medicine among both Jews and Christians. But, like the other Jewish physicians, he suffered from the ill will of his rivals. In 1653 he was accused of having caused the death of one of his Christian patients by injurious drugs. In consequence of this accusation the practise of Jewish physicians was limited to the Jewish quarter.

G. A. R.

BINGEN: City of Hesse, situated on the Rhine. Jews lived there from the earliest times, for they are mentioned by the traveler Benjamin of Tudela, who visited Bingen toward the middle of the twelfth century. In May, 1254, Bingen joined the union of Rhenish cities which, for financial reasons, protected the Jews. But this favorable condition of things was soon changed, for at the time of the Black Death (1348–49) the Jews of Bingen, in common with the other Jews in Germany, suffered severe persecutions. The community, however, was never quite extinguished. In the first half of the fifteenth century a rabbinical synod assembled there. During the time of the Reuchlin and Pfefferkorn controversy, Pfefferkorn went to Bingen, where, with the help of the authorities, he confiscated a number of Hebrew books. The celebrated rabbi of medieval times, Seligman Bing Oppenheim, was a native of Bingen.

At the present day the Jewish community numbers 685, of whom 122 are house-owners. There are a number of charitable societies for the dowering of Jewish brides and the care of the poor, sick, and dead. Bingen is a grand-ducal rabbinate, Dr. R. Grünfeld being the rabbi. His predecessor was M. Lebrecht. For further particulars see Hesse.

BIRAH. See Acra.

BIRCH-HIRSCHFELD, FELIX VICTOR: German pathologist and medical author; born at Kluvensiek, near Rendsburg, in the province of Holstein, Prussia, May 2, 1842; died at Leipsic Nov. 19, 1899. He received his education at Kiel and Leipsic, graduating from the latter university as doctor of medicine. He was then appointed assistant at the pathological laboratory, and later at the university hospital. In 1869 he filled the position of assistant physician at the asylums for the insane at Sonnenstein and Kolditz, Saxony, successively.

During the Franco-German war, in 1870, he was surgeon at the Reservelazareth at Uebigau, near Dresden. At the close of the war, in 1871, he became prosector at the municipal hospital in Dresden, of which institution he was appointed chief physician in 1882. From 1871 to 1875 Birch-Hirschfeld was lecturer on pathology at the postgraduate courses for military surgeons at Dresden. In 1875 he was appointed a member of the Sächsische Medicinische Kollegium. In 1885, when but forty-three years old, Birch-Hirschfeld succeeded Cohnheim as professor of pathology at the University of Leipsic, one of the leading medical institutes of Germany, and in 1891 he represented the university in the upper house of the Sächsische Ständekammer.

Among his prominent works are: "Lehrbuch der Pathologischen Anatomie," Leipsic, 1877; "Die

Bedeutung der Muskelübung für die Gesundheit, Besonders der Deutschen Jugend," Leipsic, 1883; "Grundriss der Allgemeinen Pathologie," Leipsic, 1892; and of his numerous essays the following are the more important:

"Hoden-Krebs," "Geschwulstembolie," "Cylindromfrage," "Ueber Akuten Milztumor," "Pyämie," "Syphilis Neugeborener," in "Archiv für Hygiene," vols. ix.-xvi.; "Die Entstehung der Gelbsucht Neugeborener Kinder," in "Virchow's Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin," vol. lxxxviii.; "Uebergang von Tuberkelbazillen aus dem Mütterlichen Blut auf den Fötus," in Ziegler's "Beiträge zur Allgemeinen Pathologie und zur Pathologischen Anatomie," Jena, 1890; "Ueber Sarkomatöse Drüsengeschwulst der Niere im Kindesalter," *ib.* 1898; "Skrofulose und Krankheiten der Lymphdrüsen," in Ziemssen's "Handbuch der Speciellen Pathologie," xiii., part 2; "Ueber die Krankheiten der Leber und Milz," in Gerhardt's "Handbuch der Kinder-Krankheiten," iv., part 2.

Birch-Hirschfeld's knowledge in his special branch of medicine was very extensive; and he was self-sacrificing in the practise of his profession.

S. F. T. H.

BIRDS.—Biblical Data: The general designation for winged animals is "'of" (עוף, Hosea ix. 11; Isa. xvi. 2) or "'of kanaf" (עוף כנף, Gen. i. 21), "ẓippor" (צפור, Gen. xv. 10), or "ẓippor kanaf" (צפור כנף, Deut. iv. 17; Ps. cxlviii. 10), or "ba'al kanaf" (בעל כנף, Prov. i. 17). The expression "ẓippor," however, denotes an individual bird in distinction from "'of," the generic term. "'Ayiṭ" (עיט, Isa. xviii. 6; Gen. xv. 11) denotes birds of prey; compare "ayyah" (איה, Lev. xi. 14; Deut. xiv. 13).

Domesticated Birds.

The frequent mention of birds in the Bible shows that they abounded in Palestine, in which country many birds are found at the present time. The only domesticated birds among the Israelites were the dove ("yonah," יונה) and the turtle-dove ("tor," תור). Endeavors were probably made to lure the shy rock-pigeon to the neighborhood of dwellings and tame it by providing suitable nesting-places. Neither the Hebrews nor the Egyptians knew of poultry until the contact with the Medes and Persians, who in their advance toward the west introduced the breeding of chickens. At the time of Jesus chicken-breeding was quite common in Palestine (compare Matt. xxiii. 37, xxvi. 75; Luke xiii. 34).

Though representations of ducks are found on Egyptian monuments, it is doubtful whether the Israelites knew of them; and the meaning of "barburim abusim" (ברברים אבוסים, I Kings v. 3 [A. V. iv. 23]), "fatted fowl," which is sometimes explained as "ducks," may be questioned. Sparrows evidently were as numerous in olden times as today, although the term "ẓippor," by which they were designated, also means small birds in general (compare *στρουθίον*, Tobit ii. 10). Then, as now, the sparrow was used as food (Matt. x. 29; Luke xii. 6). The partridge ("ḳore" [קורא], I Sam. xxvi. 20; Jer. xvii. 11) also abounded, or, to be more exact, the ptarmigan, a species of the red-legged partridge which lives in mountains and waste places.

The following migratory birds are mentioned: (1) The swallow ("sus," סוס, perhaps סוס עגור, Isa. xxxviii. 14, for which Jer. viii. 7 has סוס ועגור. Since in the Septuagint עגור is missing in both passages, the word is perhaps only an explanatory gloss. It may also be questioned whether "deror" (דרור, Ps. lxxxiv. 4; Prov. xxvi. 2) means the swallow. Whenever the latter is mentioned as a migratory bird, the swift is probably meant. (2) The quail ("selaw," שלו), which in September and October gathered in immense flocks on the shores of the Mediterranean, in order to migrate to the warmer regions of Asia and Africa. In early spring it returned northward, flying mostly with the wind (Ex. xvi. 13; Num. xi. 31; Ps. cv. 40). (3) The stork ("ḥasidah," חסידה), mentioned as a migratory bird (Jer. viii. 7) which nests on the cypress-tree (Ps. civ. 17; compare Job xxxix. 13 *et seq.*; Zech. v. 9). (4) "Anafa" (אנפה, Lev. xi. 19; Deut. xiv. 18), which means perhaps a heron, or is a generic name for the different species of heron.

Birds of Prey.

The following birds of prey ("'ayit") are mentioned: (1) "Shaḥaf" (שחף, Deut. xiv. 15), according to the Septuagint and the Vulgate, the gull (*larus*), which abounded in different species. But perhaps a kind of hawk or falcon is meant, which the Arabians call "sa'af." (2) The eagle ("nesher," נשר), which is often mentioned because of the lightning-like rapidity with which it pounces upon its prey (Hosea viii. 1; Hab. i. 8). Sometimes the word "nesher" includes also the vulture, which is as large as an eagle, and which in the East is found much oftener than the eagle. Micah i. 16 refers probably to the vulture, perhaps to the carrion-kite (*Vultur percnopterus*; compare Matt. xxiv. 28; Luke xvii. 37), distinguished from the eagle by its bald head and neck. The lammergeier is perhaps meant by (3) "peres" (פרס, Deut. xiv. 12; compare Tristram, "The Fauna and Flora of Palestine," p. 94). Some take it to signify the sea-eagle, which the Septuagint and the Vulgate identify with (4) "'azniyyah (עזניה, *ib.* 12), also a species of eagle or vulture. (5) "Raḥam" (רחם, Lev. xi. 18), "raḥamah" (רחמה, Deut. xiv. 17), which is certainly the carrion-kite (*Vultur percnopterus*). (6) "Da'ah "(דאה, Lev. xi. 14) or "dayyah (דיה), which is possibly the kite, chiefly the black kite (*Milvus migrans*). (7) "Ayyah" (איה, Job xxviii. 7), which denotes probably the falcon. (8) "Neẓ" (נץ, Lev. xi. 16), perhaps a name for a hawk, including probably some species of falcon (compare Job xxxix. 26). (9) "'Oreb" (ערב, Gen. viii. 7), the raven or birds of that order, as the hooded crow, roller, daw, magpie, etc. (10) "Yanshuf" (ינשוף, Lev. xi. 17; Deut. xiv. 16), probably a species of owl, perhaps the eagle-owl. (11) "Tinshemet" (תנשמת, Lev. xi. 18; Deut. xiv. 16), probably also a species of owl. (12) "Kus" (כוס, Lev. xi. 17; Deut. xiv. 16), which likewise belongs to the owl order; it is perhaps the wood-owl or the little owl, which lives among ruins. (13) "Shalak" (שלך, Lev. xi. 17; Deut. xiv. 17), probably the cormorant, which pounces upon its prey from cliffs or rocks or from a height in air. (14) "Ḳat" (קאת, Lev. xi. 18; Deut. xiv. 17), which, according to the translators, is the pelican; but this is doubtful (see Isa. xxxiv. 11; Zeph. ii. 14). Among the birds was also included the "'atalef" (עטלף), the bat, of which several species are found in Palestine, where it abounds, as it does generally in the south.

Since some of these birds were eaten, the Law naturally separated them into clean and unclean (compare Lev. xi. 13 *et seq.*; Deut. xiv. 20 *et seq.*). For the sacrifice the dove ("yonah" or "tor") only was used (compare Lev. v. 7; xii. 8; xv. 14, 29). Whether, however, the Israelites, like the Chaldeans, practised Augury, we have no means of knowing.

Mode of Capture.

Birds were caught in two ways: either by (1) a spring-trap ("paḥ") or by (2) a sling with a wooden or stone projectile, by which the bird was brought down (compare Amos iii. 5; Hosea vii. 12, ix. 8). Seven different kinds of bird-snares are referred to in the Old Testament, the chief of which are the throw-stick, springe, clap-net, the trap, and the decoy-bird. All are used at the present day.

The people had a genuine fellow-feeling for birds as well as for the domestic quadrupeds (Deut. xxii. 6 *et seq.*); and the many references to bird-life testify to the interest taken in it. The eagle that "stirreth up her nest . . . fluttereth over her young," becomes the prototype of Yhwh's protecting love of Israel (Deut. xxxii. 11; Ex. xix. 4; compare Isa. xxxi. 5). In Prov. xxvii. 8 the homeless wanderer is compared to the "bird that wandereth from her nest" (compare Isa. xvi. 2). In Hosea xi. 11, people returning from Egypt and Assyria are compared to the doves returning to their dove-cotes. Jeremiah viii. 7 contrasts the people that "know not the judgment of the Lord" with the birds that "observe the time of their coming." Proverbs xxvi. 2 compares the unjust curse to the birds flying away. Israel's enemies are often compared to the birds pouncing upon their prey with lightning-like rapidity (Deut. xxviii. 49; Isa. xlvi. 11; Hosea viii. 1; compare Jer. xii. 9). The complete annihilation of man is often metaphorically expressed by the idea of giving his flesh up to the birds; compare Gen. xl. 19; Deut. xxviii. 26; I Sam. xvii. 44, 46; I Kings xiv. 11, xvi. 4, xxi. 24; Jer. vii. 33, xvi. 4, etc. These and similar references show how numerous and manifest the birds must have been; in fact, passages like Job xli. 5 and Bar. iii. 17 display their intimate connection with the life of the people.

J. JR. W. N.

——**In Rabbinical Literature:** The general name for birds in rabbinical literature is עופות. They are said to have been created from water mixed with sand, being thus intermediate between mammalia (בהמות), created from earth, and fishes, created from water (Ḥul. 27b). The eagle (Ḥag. 13b) is the king of birds, while the rooster is the most obstinate (Beẓah 25b).

The numerous species are divided into the clean and the unclean, both minutely described by the Talmud (compare Clean and Unclean); but it should be noticed that while there are only twenty-nine classes of unclean birds, the number of the clean is unlimited (Ḥul. 63a, b). It happens, however, that the unclean birds sometimes hatch the eggs of the clean, and vice versa. Among partridges the male sometimes sets on the nest (Ḥul. xii. 2, 138b). Some of the eggs are not fertile; such are those produced by the hen when she sits in the warm sun, these being, however, better for food (Beẓah 7a). The formation of the chick begins at the broad, flat end of the egg (Ḥul. 64b; compare Rashi on the passage). In addition to their production of eggs (referring only to those of the clean species, Ḥul. *l.c.*), birds are useful for other purposes. The meat, though less desirable than beef (Me'i. 20b), is esteemed as a delicacy among the rich, while the poor seldom eat it (Bek. 10a; Ket. 5a), the flesh of poultry being considered particularly good for old people (Yer. Peah viii. 21a).

The wings (Kelim xvi. 19), claws (Ḥul. 25b; compare Rashi on the passage), and eggs of birds are put to various uses, the last being sometimes covered with a glaze (Kelim *l.c.*). Blown egg-shells are used to hold oil for lamps (Shab. ii. 11, 29b); and even as early as Talmudic times the strength of an egg-shell placed on end was recognized, for sometimes an egg is placed under the foot of a bedstead to make the latter stand even (Beẓah 4a). The use of quills for writing was unknown in Talmudic times, and in the twelfth century the casuists questioned whether it was lawful to use them for the writing of Torah scrolls (Löw, "Ha-Mafteah," p. 349; Lewysohn, "Die Zoologie des Talmuds," p. 161).

Classes of Birds.

The Talmud names about one hundred classes and varieties of birds, but it is extremely difficult to identify them. For example, it mentions two varieties of the bird פטא אנדר (probably a Persian term; Kohut, "Aruch Completum," *s.v.*, suggests "darpash" = finch), one of which bears the royal by-name "Shapur" and was clean, while the other, also called after a Persian king, the "Firuz," is unclean (Ḥul. 62b). Mention is also made of a bird כרום (= *χρῶμα*, color), found in the neighborhood of Babylonia, which becomes iridescent at sunrise (Ber. 6b; Lewysohn [*ib.* p. 183] refers to the pajaro del sol, "sunbird"). A similar many-colored bird is the צבוע ("many-colored"), which shows not less than three hundred and sixty-five hues (Gen. R. vii. 4), "ẓabua'" being the Hebrew name for peacock, which in rabbinical literature is usually designated by its Greek name טווס, Τάως, as shown from a parallel passage in the Midrash cited (Tan., Tazria', ed. Buber, iii. 33).

The Talmud describes many birds, giving details of their natures and uses. The falcon (בר חידיא) is used in the chase. The hunter, seated on his horse, has the falcon at his side, releasing it at sight of another bird (Shab. 94a; Sanh. 95a). The keen sight of the vulture (דיה) is indicated in the following passage: "It can be in Babylon and see a corpse in Palestine" (Ḥul. 63b). The strong, piercing cry of the crane (כרוכיה) originated the saying: "Cry like a crane" (Ḳid. 49a). The heron (אנפה, "quarreler") in the Bible is a cruel bird that quarrels (אנף) constantly with its companions, as its name suggests. It belongs to the family of vultures, its real name being דיה רגזנית ("angry dayah"). Another member of this family is the stork, or white dayah, called also "the pious one" ("ḥasidah"), because it shares its food with its mates (Ḥul. 63a, b). The stork's gall is an antidote for the sting of the scorpion (Ket. 50a). In addition to the dayah family, of which there are said to be no less than one hundred varieties (Ḥul. *l.c.*), the Talmud mentions the numerous varieties of the raven family (see Raven in Rabbinical Literature). Hens, geese, and doves are considered domestic poultry, and the wild varieties are also named. Some birds, particularly song-birds, and those of beautiful plumage, are kept as pets by the wealthy, and there is an allegory about a free bird which envies a friend in a cage its rich food, forgetting that the friend has paid for the food with its freedom (Pesiḳ., ed. Buber, xxv. 164a, b). The social life of birds originated the proverb: "Every bird dwelleth according to his kind, and so doth man according to his like" (B. B. 92b; the passage quotes verses from Ecclus. [Sirach] xiii. 16, xxvii. 9, as if they were from the Scripture).

In Jewish Folk-Lore.

Among Jews, as among most nations (Gubernatis, "Zoological Mythology," on Birds), birds were thought to possess supernatural knowledge, because they soared in the air. Thus in rabbinical literature, both Babylonian and Palestinian, there are numerous references to the folk-lore on birds (see Augury; Zohar, "Balak," iii. 148b *et seq.*). In Noah's Ark only the clean ones dwelt in the part with Noah and his family; the others were in another part (Sanh. 108b). King Solomon knew the bird language (see Solomon in Legend).

Parts of the body of some birds were used as remedies (Joel Heilprin, "Mifa'lut Elohim"; David Tevel Ashkenazi, "Bet David"). Compare Bar Yokni, Cock, Dove, Eagle, Goose, Pigeon, Raven.

Bibliography: Lewysohn, *Die Zoologie des Talmuds*, pp. 15–16, 159–218.

L. G.

Birds as Souls: In Psalm xi. 1 the soul is compared to a bird: "Flee as a bird to your mountain." As living beings which move and fly through the air, birds have suggested themselves at all times and in all lands to primitive man as images of the soul, the name for which in most languages is taken from breathing ("nefesh," "neshamah," = "anima," or "psyche"); the soul was represented in the form of a butterfly, as illustrated by the tombs of the early Christians (Aringhi, "Roma Subterranea Novissima," ii. 324). The soul of the king of Egypt was pictured on the monuments as a bird; and the genius ("frawashi") of the kings of Assyria and Persia retained the wings of the bird (Rawlinson, "Herodotus," ii. 105, note 1; *idem*, "Ancient Monarchies," ii. 28, iii. 353; compare also Simrock, "Handbuch der Deutschen Mythologie," p. 461).

The Arabs also regarded the soul as a bird, and believed that after death it hovered at times around the body, screeching like an owl (Mas'udi, "Les Prairies d'Or," iii. 310, Paris, 1864; Sprenger, "Das Leben Mohammeds," i. 358, note; Kremer, "Gesch. der Herrschenden Ideen des Islams," 1868, pp. 166 *et seq.*). This view was shared by the Jews. They believed that all souls are gathered in a great cage or treasure-house in heaven, a columbarium, called "Guf"; and so Rabbi Assi teaches that the Messiah, the son of David, can not come until all the souls have been taken out of the Guf, and have gone through human bodies (Yeb. 62a, 63b; Niddah 13b; and elsewhere). In the Greek Baruch Apocalypse (ch. x.), Baruch sees in the fourth heaven a lake full of birds, and is told that these are the souls of the righteous, who continually sing the praise of God. These stories are repeated by Christian saints who affirm having seen the souls of the righteous in the shape of doves in paradise (M. R. James, in "Texts and Studies," v., lxix.; *idem*, in "Anecdota Græco-Byzantina," p. 181, quoted in Kautzsch, "Die Apokryphen und Pseudepigraphen des Alten Testaments," p. 455).

The souls of the righteous which dwell in the Acherusian lake were consulted as God's counselors at the creation of man, according to Gen. R. 8, having their parallel in the Zendavesta ("Bundahish," ii. 10; Mihir Yast xxv. in "Sacred Books of the East," xxiii. 145).

In the Zohar the sparrow and the swallow, spoken of in Ps. lxxxiv. 3, are compared to the souls of the righteous which dwell in paradise, exactly as are those mentioned in the Baruch Apocalypse. Three times a year, in Nisan and Tishri, they rise upon the walls of paradise and sing the praise of the Master of the universe; whereupon they are ushered into the palace where the Messiah is hidden, called the great "Souls' Nest." They are adorned with crowns in his honor when he appears to them, and from beneath the altar of heaven, where dwell the souls of the righteous, they prepare the erection of the Temple of the future (Zohar ii. 7b, iii. 196b). Grätz ("Gesch. der Juden," vii. 9) failed to see that this rests on an old tradition.

It is customary among German Jews, when a death occurs, to open a window in order that the soul may fly away like a bird (compare Liebrecht, "Zur Volkskunde," 1879, p. 371). On birds around God's throne see Merkabah.

BIRMINGHAM, ALA.: Capital of Jefferson county, Alabama, founded in 1871. The first congregation, Emanu-El, was organized in 1882; the corner-stone of its building being laid in July, 1886, and the building dedicated in 1889. The rabbis of the congregation have been: Alexander Rosenspitz, 1885; Maurice Eisenberg, 1886–90; Samuel Ullman, 1891–94; David Marx, 1894–95; Morris Newfield, 1895–. A second congregation, Knesses Israel, was founded in 1899. Birmingham has a Hebrew Ladies' Benevolent Relief Association, founded 1883; a social club, the Phœnix, established in the same year; and a Hebrew Aid Association, founded 1898. A lodge of the B'nai B'rith was organized 1884; a Youths' Auxiliary, 1897; a branch of the Council of Jewish Women, 1898; and a lodge of the B'rith Abraham, 1900.

Among the prominent citizens of Birmingham are: Samuel Ullman, alderman of the city, 1895–97, member of the board of education since 1884, and its president since 1893; Benjamin M. Mayer, editor of the "Age Herald"; Emil Leeser, police commissioner, 1897–99, and editor of the Birmingham "Courier" (German); and Simon Klotz, French consul.

Birmingham has about 1,400 Jews in a total population of 38,415.

A.

BIRMINGHAM, ENGLAND: Chief town of Warwickshire. The Jewish community consists (1902) of a population of about 4,000, having grown to this number from 140 families (700 souls) in 1851. The first Jewish settlement is believed to have taken place about the year 1700; but the earliest records of the community are lost. Jews were probably attracted to Birmingham by the facilities which the chief productions of the town, hardware and jewelry, afforded for peddling and hawking. It was their custom to leave the town every Monday with a box of cheap jewelry and hardware, and to return on Friday for the Sabbath.

The first synagogue of which any record exists was erected as early as 1780 in a part of the town called "The Froggery," which has since been demolished. A Jewish cemetery existed in the same quarter of the town in 1730; but meetings for prayer were at that time held in a private residence. The present cemetery, in the suburb of Witton, was consecrated Feb. 14, 1871, prior to which, in addition to the burial-place in Granville street, there was another in a thoroughfare turning out of Bath row, which came to be known as Betholom row.

It was at Birmingham that Lord George Gordon was circumcised and received into the synagogue. In 1791 the synagogue in the Froggery was succeeded by one in Hurst street; and in 1810 another synagogue was established in Severn street, which is now used as a Masonic hall. A Hebrew philanthropic society was established on a modest scale as early as 1838, and it still exists. The present synagogue on Singer's Hill was consecrated in 1856; it accommodates upward of 600 seat-holders in the body of the building. The more modern Board of Guardians was founded in connection with this in 1870, after the model of the London body.

The earliest name of any official connected with the synagogue is that of Rabbi Isaiah Phillips, who was minister between 1785 and 1835. Other ministers have been Dr. M. J. Raphall and the Rev. A. P. Mendes, 1851–58. The present minister, the Rev. G. J. Emanuel, was appointed in 1864.

Schools connected with the synagogue have been in existence since 1840; and in 1843 Sir Moses Montefiore laid the foundation-stone of a new school in Hurst street. Of recent years a considerable number of societies and associations have been formed in Birmingham to meet the influx of Russian Jews, such as the Naturalization Society and Workingmen's Club.

Zionism is in considerable favor among the Birmingham Jews, a branch of the Chovevei Zion and a B'nai Zion Association having been recently founded among them.

J. L. J. G.—J.

BIRTH, NEW: Renewal of a man's nature by casting aside the impurity of sin which cleaves to him from his former life, thus turning him into a pious and righteous child of God. The idea of man's regeneration was first expressed by the prophet Ezekiel (xxxvi. 25 *et seq.*; compare xi. 19, xviii. 31; Ps. li. 12): "I will sprinkle clean water upon you: from all your filthiness and from all your idols will I cleanse you, and I will give you a new heart, and a new spirit will I put within you." It was probably suggested by the rite of ablution, which was connected with every conversion (see Zech. xiii. 1 *et seq.* and Isa. iv. 4; compare "Shibbole ha-Leḳeṭ," p. 145a, quoted by Schechter, in "Jew. Quart. Rev." xii. 421) and signified a change of the whole man; exactly as Naaman the proselyte, after bathing in the Jordan seven times, became clean "and his flesh like that of a little child" (II Kings v. 14). The expression used by the Rabbis for the person who underwent a change of heart through repentance and conversion is, therefore, "beriah ḥadashah" (a new creature). The verse, "The people which shall be created shall praise the Lord" (Ps. cii. 19 [18]), is explained in Midr. Teh. on the passage (compare Pesiḳ. d. R.K. xxviii. 181) thus: "The people who shall be reborn through repentance of their sins shall praise the Lord"; and it is either referred to the Messianic future, "the generation to come," or to the annual regeneration on the Day of Atonement, which, by blotting out the old year's sins, renders Sukkot "the first day" "of the reckoning of sins" (Tan. and Lev. R. to Lev. xxiii. 40).

The Proselyte.

The proselyte who casts off the impurity of idolatry and turns to the God of life becomes a "new creature" (Gen. R. xxxix.; Soṭah 12b; compare ASENATH, PRAYER OF). "He who turns away from uncircumcision and becomes a Jew is like one who turns away from the grave and requires cleansing," was the maxim of the Hillelites (Pes. viii. 8). Hence arose the halakic rule that "a proselyte is like a newborn child whose family relations are no longer the same as before his conversion" (Yeb. 22a, 48b, 97b; Maimonides, "Yad," Issure Biah, xiv. 11). It is therefore more than improbable that NICODEMUS, a member of the Sanhedrin (John vii. 50) and a leader in the synagogue (iii. 10), should not have understood the words of Jesus: "Except a man be born again he can not see the kingdom of God" (John iii. 3–10). On the contrary, this idea of a new birth and the term, "a new creature," used by Paul (Gal. vi. 15; II Cor. v. 17; I Peter i. 3, 23; ii. 2; Clementine "Homilies," xi. 26; "Recognitiones," vi. 9; Barnabas xv. 7) with reference to Christian baptism, are directly borrowed from the rabbinical schools, as is also the expression, "Except ye be converted and become as little children ye shall not enter into the kingdom of heaven" (Matt. xviii. 3), which has the same meaning as the saying in John iii. 3 (compare Yer. Bik. iii. 65d; Midr. Sam. xvii. 1). Accordingly the fundamental doctrine of Paul's preaching, that

A Rabbinical Notion.

in baptizing in the name of Jesus, the sinful man should die through the death of Jesus and rise again to a new life through the resurrection of Jesus (Rom. vi. 3-10, vii. 6, xii. 3; Titus iii. 5; and elsewhere), is not original with him. Paul merely gave to the Jewish idea of the new birth an antinomian character. The original story in the New Testament of Jesus' baptism was regarded as signifying his rebirth as the Son of God; the heavenly voice is said to have cried in the words of Ps. ii. 7: "Thou art my son; to-day have I begotten thee" (compare Heb. i. 5, v. 5; Acts xiii. 33, with Matt. iii. 17; Mark i. 11; Usener, "Religionsgeschichtliche Untersuchungen," 1889, i. 47 *et seq.*).

The new birth through the water and the spirit, of which Jesus speaks (John iii. 5), has its parallel in the passage Mek., Yitro 5: "Israel received the law in the desert amid fire and water" (compare Sanh. 39a: "True baptism is by fire"). James i. 18 speaks of rebirth through the word of truth: "Of his own will begat he us by his word of truth that we should be the firstlings of his creatures."

K.

BIRTHDAY: There are no positive data in the Bible or in rabbinical literature concerning birthday festivals among the ancient Jews. This silence on the subject is, however, no warrant for the conclusion that the Jews altogether abstained from following a custom which was general among the Egyptians (Gen. xl. 20), Persians (Herodotus i. 133), Syrians, and Greeks. Even if not common among the people, yet kings and princes probably practised it, following the custom of their heathen contemporaries. Birthday festivals were not considered by the Rabbis as "ḥukkot ha-goyim" (customs of the heathen; see Maimonides, Yad ha-Ḥazaḳah, 'Akkum we-Ḥuḳotehem, xi. 12), although Lightfoot held a contrary opinion ("Horæ Hebr." on Matt. xiv. 6).

Biblical References.

A close study of the Biblical text shows that the Bible is not altogether wanting in references to the subject; for, while it lacks positive accounts, it contains passages from which it may be inferred that the custom of remembering birthday anniversaries was not wholly unknown among the Jews. "The day of our king" (Hosea vii. 5), on which the princes made the king sick with bottles of wine, and the king himself "stretched out his hand with scorners," alludes more probably to a birthday festival than to a solemn occasion, such as the anniversary of his installation, which would have been observed with more decorum (see Josephus, "Ant." xv. 9, § 6).

Birthdays might not have been celebrated by the common people with great solemnity, yet they did not pass wholly unnoticed, and were remembered by congratulations, as in modern times. Jeremiah not only cursed the day of his birth, but wished that it should not be blessed (Jer. xx. 14), as though such had been the custom.

It is said of Job, "and he cursed his day" (Job iii. 1). The emphatic and determining expression "his day" implies the idea that he, like everybody else, had a certain day of the year singled out for a certain purpose, which we learn further was the anniversary of his birth.

Weaning on Second Birthday.

The second or third birthday of a child whose coming into the world was very much desired by his parents was usually made the occasion of a feast, because the child was then weaned, and had consequently passed the dangerous and uncertain stage of infancy. Abraham made a great feast on the day Isaac was weaned (Gen. xxi. 8). This occurred, according to Rashi, at the expiration of twenty-four months. Bishop Ely ("Holy Bible Com." *l.c.* on the passage) says: "By comparing I Sam. it would seem that this was very probably a religious feast." Hannah postponed the yearly family feast at Shiloh until she had weaned Samuel, in order to celebrate his birthday at the same time (I Sam. i. 23, 24). According to Rashi and Midr. R. Samuel, *l.c.*, this also occurred at the end of twenty-four months. Yet from II Chron. xxxi. 16 it may be inferred that Samuel was weaned at the end of his third year; for only from that age were children admitted to the service of the Temple.

In Post-Biblical Times.

Two instances of birthday celebrations are mentioned in post-Biblical literature, from which it may be assumed that this was customary in the Herodian family. They used to celebrate birthdays with great pomp, and in the same manner as the Egyptian kings had done more than 2,000 years earlier (Gen. xl. 20), by extensive public entertainments, which were made the occasions of granting favors to friends and pardons to those in disgrace. Agrippa I. solemnized his birthday anniversary by entertaining his subjects with a festival, and decreed the recall of his banished general Silas, which recall, by the way, the latter stubbornly declined (Josephus, "Ant." xix. 7, § 1). Herod the Tetrarch celebrated his birthday with a great feast, at which the daughter of Herodias danced before the guests, the king promising "to give her whatsoever she would ask" (Matt. xiv. 6).

The Bar Miẓwah.

The Jewish people in general may have had reasons to avoid feasting on birthdays in the times of the Tannaim and Amoraim: first, because they had been at one time grievously offended on such festivals (according to II Macc. vi. 7, the Jews were forced, in the time of Antiochus, to eat of the sacrifices which were offered "in the day of the king's birth every month"); secondly, because no "Talmid ḥakam" would attend as a guest at such a feast, since the Rabbis condemn the Talmid ḥakam who partakes of a meal or feast which is not a "se'udat miẓwah" (commendable meal). And to the son of him who frequented feasts were applied opprobrious epithets, such as "son of an oven-heater," "son of a market-dancer," etc. Since the fifteenth century (Löw, "Lebensalter," p. 210) the thirteenth birthday of a boy has been made the occasion of a family feast because it coincides with his religious majority (Bar Miẓwah).

In modern times the widely spread custom of celebrating some particular birthday of a great man by a banquet or by some literary production has enriched Jewish literature with many gems of Hebrew learning and poetry. Jewish scholars of great renown have become the recipients of marks of deference and homage on the part of their friends and admirers on their seventieth or eightieth or ninetieth birthday by the publication of a jubilee-book, to which scholars from far and near have contributed some of their best work. Of these publications are: (1) "Jubelschrift zum Neunzigsten Geburtstag des Dr. L. Zunz," Berlin, 1884, produced on the occasion of Dr. Zunz's ninetieth birthday; (2) "Jubelschrift zum Siebenzigsten Geburtstag des Prof. Dr. H. Graetz," Breslau, 1887, in celebration of Graetz's seventieth anniversary; (3) "Festschrift zum Achtzigsten Geburtstag des Dr. Moritz Steinschneider," Leipsic, 1890, on the eightieth birthday of Dr. Steinschneider; and (4) "Shay la-Moreh" (A Present to the Teacher), Berlin, 1890, dedicated to Dr. Israel Hildesheimer by his friends and students on his seventieth birthday.

Special Birthdays of Scholars.

Some have confined themselves to the sending of a letter of homage or a poem. Smolenskin remembered Dr. Zunz on his ninetieth birthday with a letter of congratulation, "Miktab Shalom" ("Ha-Shaḥar," xii. 327). H. S. Slonimski was greeted on his seventieth birthday by a letter of homage, "Iggeret Ḥen," signed by twenty-eight of his friends, all poets and "maskilim" ("Ha-Ẓefirah," vii.). S. Scherschewski wrote a magnificent poem on the same occasion (*ib.*). There is a poem by A. Gottlober dedicated to the famous ḥazan and musical composer, Solomon Sulzer, on his seventieth birthday ("Ḳol Shire Mahallal," vii. 29). Gottlober also wrote six poems on several birthdays of his own (*ib.* pp. 31–40). There are several birthday poems in the "Shire Sefat Ḳodesh," by A. Lebensohn ha-Kohen, most of them dedicated to his son Michael Joseph (*ib.* i. 220; ii. 162, 163–184).

The birthday anniversaries of heathen kings, יום גינוסיא, are considered by the rabbis of the Talmud as legal heathen holidays, which count among those holidays on the three days preceding which Jews are by Talmudic law required to abstain from concluding any business with a heathen (Mishnah 'Ab. Zarah i. 3).

About the meaning of יום גינוסיא of the Mishnah, which seems to correspond with *ἡμέρα γενεσεώς* (LXX., Gen. xl. 20), some doubts have been raised because, by the side of יום גינוסיא של מלכים ("birthday of the king") mention is also made of יום הלידה ויום המיתה ("the day of birth and the day of death"). In the Babylonian Talmud ('Ab. Zarah 10a) the decision is reached in favor of יום גינוסיא as meaning "the day of coronation." It is accepted by Maimonides (see Commentary to the Mishnah, and Yad ha-Ḥazaḳah, 'Akkum we-Ḥukotehem, ix. 5). The glossary "Kesef Mishneh," *ad loc.*, thinks that Maimonides may have read כינוסיא ("assembly") for גינוסיא. Rashi explains גינוסיא as equivalent to "the birthday of the king"; while the Talmud Yerushalmi ('Ab. Zarah i. 39) explains גינוסיא as "birthday." This agrees with the use made of the word in many instances (Gen. R. lxxxviii.; Ex. R. xv.; Yer. R. H. iii. 8; Yalḳ., Job. 584; Compare Rashi, Gen. xl. 20). Graetz (in "M. G. Y." 230) is of the opinion that גינוסיא means the day of death of the king.

All these difficulties and differences may be obviated if יום המיתה ויום הלידה be explained as indicating Christian festivals of the early Church. By יום הלידה may be understood the Nativity, or Christmas, and by יום המיתה Easter, or the Resurrection. Cave (in "Primitive Christianity," part 1, vii. 194, cited in McClintock and Strong's "Cyclopedia," *s.v.* "Christmas") traces the observance of Christmas to the second century, about the time of the emperor Commodus. According to David Ganz ("Ẓemaḥ David," i., year 3881), Commodus reigned 183–185, at the time of Rabbi Meïr of the Mishnah, who counted those days as legal holidays.

A. S. R.

BIRTHRIGHT.—Biblical Data: The right of possession into which the eldest son is born. The first son born to the father occupied a prominent place in the Hebrew family (Gen. xxvii. 19, xxxv. 23, xli. 51, xlix. 3; II Sam. iii. 2). Such a one is the "first-born" in the proper sense, and is to be distinguished from sons who are "first-born" merely in the sense of being the first child born to one of the several wives that men might have (Ex. xiii. 2, 12, xxii. 28; xxxiv. 19; Num. xviii. 15).

The first-born son took rank before his brothers and sisters (Gen. xxvi. 31, 32; xliii. 33). Usually the father bequeathed to him the greater part of the inheritance, except when a favored wife succeeded in obtaining it for one of her sons (Gen. xxvii.; I Kings xi. 11–13). In early days the will of the father fixed the part of the chief heir, but the law of Deuteronomy demands for him a double portion of all the possessions and forbids favor being shown to a younger son (Deut. xxi. 15–17). After the death of the father the first-born son was the head of the family; he had to provide for the widows of his father and for his unmarried sisters, since they ordinarily did not have any hereditary rights. The later rabbinical law (Ket. 68a) obliges him to give a dowry when one of them was to be married. The old law claims all the first-born sons (in the larger sense, "whatever opens the womb") for YHWH (Ex. xiii. 2, xxii. 29). Some explain this by ascribing a certain sacredness to the first-born (Benzinger, "Arch." p. 470); others suppose that the elders were obliged to consecrate them as "nazir" (Smend, "A.-T. Religionsgesch." p. 276). But from Ex. xiii. 12, xxii. 29; Ezek. xx. 25, 26, it is evident that they were to be set aside as an offering for the Deity. It is possible that such offerings were brought in the oldest times, but very soon it became customary to offer an animal instead of the child (Gen. xxii.); and the later law obliges the father to redeem the child (Ex. xiii. 13; xxxiv. 20) for five shekels (Num. iii. 47; xviii. 15). See FAMILY; FIRST-BORN, REDEMPTION OF; JUNIOR RIGHT; PRIMOGENITURE.

J. JR. B. E.

——In Rabbinical Literature: The Talmud recommends, as a rule of education, that a father should never show any preference for one of his children over the others, and points to the unhappy relations between Joseph and his brothers as illustrating the disastrous consequences that may follow if one child is privileged (Shab. 10b). The prerogatives of the first-born, as the real head of the family after the father's death, were, however, so deeply rooted in the domestic life of the Jews that the Rabbis could not attempt to make any changes here. In connection with inheritance the expression "first-born" refers only to the בכור מאב ("the first-born son of the father"), and not to the בכור מאם ("the first-born of the mother"); although the latter had many advantages in ritual matters (compare First-Born) which the former could not claim (Bek. viii. 1; B. B. 126b). The בכור מאב always had the rights of the first-born, whether he were a legitimate or an illegitimate son, and even if he were a Bastard (Yeb. ii. 5; Gem. *ib.* 23a; Sifre, Deut. 215), although the Roman law, on the contrary, distinguished between legitimate and illegitimate children in connection with the law of inheritance (Köppen, "System des Heutigen Römischen Erbrechts," p. 171). The right of the first-born was also possessed by the child that was preceded by a miscarriage, either of a fully developed but still-born infant or one dying just after birth (Bek. viii. 1; Gem. 46b), whereas a child born under such conditions could not be considered a "mother's first-born" (Bek. *l.c.*). In order to enjoy the primogeniture, the first-born had to be born naturally; hence, that child was excluded at whose birth artificial means were employed; *e.g.*, the Cæsarean operation (Bek. viii. 2). A son, however, whose father had previously had children by a slave or a non-Jewess, had the full rights of the first-born; for, according to Talmudic law, these children were in no wise related to their father (Bek. viii. 1; compare "Maggid Mishnah" on Maimonides, "Yad," Naḥalot, ii. 12).

Identification of the First-Born.

In doubtful cases, especially with twins, where the primogeniture was not certain, the three following persons were entitled to determine it; viz., the midwife, the mother, and the father, who, however, were not equally privileged as regards the term of the availability of their testimony. The midwife could testify only immediately after the delivery; the mother, only during the first seven days after the birth; while the father was entitled to do so from the eighth day after the birth—*i.e.*, the day of the circumcision—onward (Ḳid. 74a).

The father's identification of the first-born was most important; for, in case there were no witnesses, only he was the first-born whom the father recognized as such, even should it be contrary to the general presumption (חזקה) (B. B. 127b; Sifre, Deut. 216). Even if the father merely by an incidental remark indicated that such a one was his first-born, the latter had the primogeniture (B. B. 126b). Any doubt as to priority of birth debarred from rights of primogeniture, the rule ממון המוטל בספק חולקין ("moneys of doubtful ownership must be divided between the claimants") *not* being observed here (B. B. 127a). The birthright belonged not only to the first-born, but also to his descendants; so that if A, the first-born of B, died during B's lifetime leaving a daughter, C, this daughter entered upon the full rights of A at B's death (B. B. 117a). A posthumous child, however, is excluded from the primogeniture, although a son so born has a part in the heritage. Thus, if two sons of the same mother or of two wives were born after the father's death, the estate is divided between them in equal shares. If there are five sons besides the posthumous one, the first-born receives as his birthright חלק בכורה, $\frac{1}{6}$, and for his ordinary share חלק פשוט—like the other brothers—$\frac{5}{36}$, making $\frac{11}{36}$ of the property (B. B. 142).

Division of Property.

The first-born receives a double share of the real and personal estate (B. B. 122b, below; Sifre, Deut. 217). In the division of the real estate by lots, the first-born has the right to claim as the second share the lot adjoining the first share that fell to him (Ḥoshen Mishpaṭ, 277, 2; 174, 2; compare B. B. 12b). The birthright includes only the property the father had in his possession at his death, and not that added later to the estate, either by inheritance or by the collection of debts (B. B. 124a, b; Tosef., Bek. vi. 15).

In recent times the question has often been raised as to whether government bonds should be considered as outstanding debts in regard to the birthright. Ezekiel Landau regarded stocks and bonds as ordinary promissory notes, since they were subject to the fluctuations in the market; but compare Isaac Elhanan Spector's responsum in M. Horwitz, "Maṭṭeh Lewi," p. 48, Frankfort-on-the Main, 1891. It is also a matter of discussion whether, in case a father left assets and liabilities and also ready money sufficient to cover his debts, these should be paid out of his assets or out of the ready money; in the first case, the eldest son would receive a double share of the ready money; in the second, he would receive none of the assets. Most of the authorities have decided this case against the first-born (Lampronti, 'Paḥad Yiẓḥaḳ," letter א, p. 25e).

Nor does the first-born receive a double share of any improvements (שבח) of the estate if the heirs have contributed to it with their own labor or cost (B. B. 124a). (If the father stipulated before his death that the heritage should remain intact for a certain period, then the "bekor" receives also a double share of the profits that have accrued in the business, because he has been obliged to assist in maintaining it (Lampronti, *l.c.*). The birthright extends only to the estate of the father, and not to that of the mother or of the brothers or sisters (B. B. viii. 4).

Although the father can not directly deprive his first son of the right of primogeniture, he is at liberty to divide his whole property during his lifetime; thus making the share of the first-born equal to that of the other sons, or passing him over entirely (B. B. viii. 5; Gem. *ib.* 126b). According to Naḥmanides on Deut. xxi. 16, a father violates a religious law if he does not make provision for his first-born to come into his rights. In accordance with this opinion in countries where the law does not recognize the rights of primogeniture, it is a father's religious duty to make special provision on this point (see Spector, in M. Horwitz, *ib.*). When the first-born enters upon his inheritance, it is his duty to contribute a double share to the payment of his father's private debts; he may, however, renounce his birthright, and thus be free of the obligation (B. B. 124a). Compare First-Born, Inheritance.

This result is surprising in view of the fact that the increase of the Jewish population is almost everywhere greater than that of the general population. It is probably due to the smaller number of deaths under five years among Jews, in consequence of which the non-nubile portion of the population is greater among them than among Christians, and any percentage is less when reckoned on the whole population than it would be if reckoned upon the number of adults only. Thus, according to Körösi ("Die Hauptstadt Budapest im Jahre 1881"), the percentage of Budapest's Jewish population under twenty years was 45, while that of the Christian population was about 34; and it was approximately the same in 1871. Now, if the same proportion held good in 1873, the birth-rate, instead of being 38 per 1,000 for Jews and 43 for Christians, reckoned on the whole population, would be 69 for Jews and 65 for Christians, reckoned on the adult population only. Hence, it is probable that the birth-rate of Jews is only apparently lower, and would actually be higher, if applied only to adults. Ruppin, however, in a recent study of Prussian Jews in Conrad's "Jahrbücher," March, 1902, shows that for Prussia the lower rate is justified, and is due to a change in the social condition and marital habits of the Jews.

Fecundity: Statisticians ascertain the average number of children to a marriage by dividing the number of births in a year by that of the marriages. As is evident from the following table, investigation shows that a Jewish marriage is almost invariably more fruitful than a Christian one:

BIRTHS TO A MARRIAGE.

According to Professor Tait, who has deduced the law that the younger the age at marriage the greater the number of children, this fertility is due to the indisputable fact that Jewesses marry earlier than others. A striking confirmation of this explanation is given by the case of Russia, which forms an exception as regards both the earlier age of Jewish marriages and their greater productivity. Other causes of this fertility may be the lower rate of still-births among Jewesses, and the greater proportion of first-cousin marriages among the race. Joseph Jacobs ("Studies in Jewish Statistics," London, 1891) states that in investigating forty-five such marriages, he found an average of 4.7 children living per family.

Mixed marriages, however, are very infertile.

CHILDREN TO A MIXED MARRIAGE.

Place.	Epoch.	Pure.	Mixed.	Authority.
Bavaria ..	1876-80	4.7	1.1	"Zeit. Bayr. Stat." 1881, pp. 118, 213
Berlin....	1898	2.5	0.9	"Statist. Jahrb." 1900, pp. 29, 73
Hungary.	1896	4.6	0.3	"Magyar Stat. Évkön." iv. 57, 65
Prussia ..	1875-83	4.4	1.7	"Zeit. Preuss. Stat." 1883, p. 239

But Ruppin points out that mixed marriages are increasing, and the usual method of reckoning fecundity by dividing marriages by births is delusive, since there are fewer marriages of early date to contribute their quota.

Plural Births: So far as the scanty materials that are obtainable go, there appear to be fewer twins among Jews than among the general population. Thus, while in Russia in 1867 there were 2.5 per cent of twins to all births, the percentage of Jewish twins was only 1.1 ("Mouvement de la Population en Russie," p. 11), and only 25 out of 100,000 would earn "the czar's bounty" for triplets as against 35 of the general population. In Galicia between the years 1870-75, Jewish twins showed 0.9 per cent, Christian 1.2 per cent, of all births ("Statist. Monatschrift," 1877, p. 178). In Wieselburg (Mosony), Hungary, 1833-55, there was one case of

Jewish twin-birth in 174 births; while among the Hungarians the proportion was 1 in 102, and among the Croats 1 in 75 (Glatter "Lebenschancen," p. 13). In Budapest during 1897 40 Jewish twins were born, and this number was less than 1 per cent of the total number, 4,514 ("Stat. Evkönyv," pp. 98, 110, Budapest, 1901).

Sex: The following table, giving the proportion of boys to 100 girls born alive in the places cited, shows a remarkable predominance of boys among Jewish children:

Preponderance of Boys.

The fact was noticed by Burdach at the commencement of the nineteenth century, by Hofacker ("Eigenschaften," 1838), and by Darwin ("Descent of Man," 2d ed., p. 243); but while numerous suggestions have been made, the cause of the predominance has not been determined. The best-known suggestion is that of Sadler and Hofacker, according to which boys are peculiarly the offspring of early marriages. This is to some extent confirmed by Jewish statistics; but the predominance of boys among the Jews is equally marked in Russia, where early marriage is the custom with the general population.

It is established that boys are more likely to be born in towns than in the country; and Jews live mostly in towns. Lagneau suggests that the greater number of boys is due to the observance of the laws of Niddah (Lev. xv. 19); while E. Nagel ("Der Hohe Knabenüberschuss der Neugeborenen der Jüdinnen," in "Stat. Monatsschrift," 1884, pp. 183-186) attributes it to (1) the greater care which Jewish wives take of their health, and (2) the smaller number of illegitimate births. The suggestion is that fewer boys die in still-birth among Jews because there are fewer illegitimate births among them.

It is probable, however, that the predominance is not so great as it would seem from the table; and, as Lagneau suggests, the abnormal figures for Austria, Russia, and St. Petersburg are probably due to some error in the registration of Jewish female children. The later and presumably more accurate statistics for Hungary and Vienna do not show any marked Jewish superiority.

Illegitimacy: The rate of illegitimate births is lower among the Jews than almost any other sect or nation. This is evident from the following table, giving the percentage of illegitimate births to total births at the places cited:

PERCENTAGE OF ILLEGITIMATE TO TOTAL BIRTHS.

The high figure for Austria is almost certainly due to the practise of omitting civil registration of marriage among the poorer class of Jews; thus causing their offspring to be reckoned as illegitimate. Thus, at Storozynee, the percentage of Jewish illegitimate children is put at the absurd figure of 99.61, which simply means that the Storozynee Jews never register their marriages.

It should be noted, however, that where the isolation of the Jews is being modified, their illegitimacy rate is increasing. Bergmann ("Beiträge," pp. 129-130) shows that there has been a perceptible rise in this rate in most of the eastern districts of Prussia; and where a diminution has occurred as in Westphalia, it has been less than that in the general population.

The few facts available do not confirm Nagel's theory that the low rate of illegitimacy (where male births are rarer) causes a more decisive predominance of the male sex among Jewish births in general; for the following table—based on the same authorities as before—giving the number of viable boys to 100 girls in illegitimate births, shows the same predominance:

NUMBER OF VIABLE BOYS TO 100 GIRLS IN ILLEGITIMATE BIRTHS.

	Pesth.	Prague.	Prussia.	Vienna.
Jews................	106	114	101	110
Christians..........	104	104	103	104

Still-Births: It is usually asserted that there is a lower rate of still-births among the Jews than among non-Jews; and this might be expected, considering their lower infant mortality in general. The following table, giving the percentage of still-born to viable children, makes the percentage quite evenly balanced; but the trustworthiness of the Prussian statistics confirms the general impression:

PERCENTAGE OF VIABLE TO STILL-BORN CHILDREN.

The difference is attributed to the more favorable age at which Jewesses marry, or to the greater care the latter take of themselves. This superiority, however, is by no means proved. And though Nagel maintains that the smaller number of still-births is the cause of the preponderance of Jewish boys, Jacobs (*l.c.*) points out that in Budapest, 1876–78, the proportion of boys in still-births was 122 to 100 girls among Jews, and 116 to 100 girls among Christians; while the figures for St. Petersburg would seem to indicate 185 for the former against 126 for the latter, but this is probably due to some fault of enumeration.

J.

BIRZHI (Polish, *Birze*): District of Poniwiezh, government of Kovno. The population of 1,500 includes 600 Jews, the majority of whom are engaged in handicrafts. The traditional Jewish charity is here developed in the highest degree; the philanthropic institutions including a hospital, and the following societies: Malbish 'Arummim (for distributing clothes among the poor), Po'ale-Ẓedeḳ (for mutual help), Gemilat Ḥesed (for advancing loans without interest), and a Talmud Torah, attended by eighty-eight children. The Jews in the neighborhood of Birzhi are engaged in agriculture on rented land, either cultivating it themselves, or with the help of others. For the history of the Jewish community of Birzhi, see KOVNO, LITHUANIA, RADZIWILL.

H. R. S. J.

BISCHITZ DE HEVES, JOHANNA (*née* **Fischer**): Hungarian philanthropist; born in Tata in 1827; died in Budapest March 28, 1898; daughter of a porcelain manufacturer and wife of David Bischitz. She was the founder and president of the Jewish Women's Association, and the Jewish People's Kitchen, of Budapest; vice-president of the Christian "Maria Dorothea Charitable Union"; member of the committee of the Red Cross Society; and honorary member and honorary president of more than 100 philanthropic societies of the province. In 1867 Baron Moritz de Hirsch founded at her instance and gave into her charge a relief bureau in Budapest, as a center for Hungary, placing at her disposal a yearly sum of 120,000 gulden for distribution among the poor. During her presidency more than 3,000,000 gulden were distributed. Her philanthropic labors were not only recognized by Emperor Francis Joseph I., who twice decorated her, but were acknowledged by King Leopold I. of Belgium.

Johanna Bischitz de Heves.

S. L. V.

BISCHOFFSHEIM, LOUIS RAPHAEL: French banker and philanthropist; born in Mayence, Germany, in 1800; died in Paris, Nov. 14, 1873. His father's sudden death, combined with the general upheaval of public affairs that followed the events of 1815, compelled Bischoffsheim to abandon the studies he was pursuing at the gymnasium of his native city and to enter commerce. He found employment as clerk in a banking-house at Frankfort-on-the-Main, and mastered his business so rapidly that at the age of twenty he was director of a bank which he himself had founded in Amsterdam. Ten years later, on the separation of Belgium from Holland, he was appointed consul-general of the former state at Amsterdam.

His business grew so rapidly that he established branch houses in Antwerp (1827), London (1836), and Paris (1846). In 1850 he left Holland, and settled in the French metropolis, where his son Raphael Louis was pursuing his studies at the Ecole Centrale (see Raphael Louis BISCHOFFSHEIM). Paris thus became the headquarters of his large banking firm, Bischoffsheim himself undertaking the personal direction of the business.

Interested in every commercial enterprise of importance, and taking part in all the great financial operations of his time, Bischoffsheim soon acquired immense wealth. He financed the great southern railway company, the Compagnie du Chemin de Fer du Midi, and became director of the Société Générale de la Banque des Pays-Bas, of the Crédit Foncier Colonial, of the Franco-Egyptian Bank, and of the Société du Prince Impérial.

A large portion of Bischoffsheim's fortune was devoted to charitable and educational purposes. He was president of the Association Philotechnique and founder of the Athénée. At the latter it was his intention to have entertainments for charitable objects; but the enterprise failed, and the Athénée finally became an ordinary theater.

S. A. S. C.

BISCHOFFSHEIM, RAPHAEL JONATHAN: Belgian financier and philanthropist; born at Mayence in 1808; died at Brussels Feb. 6, 1883. He left his native town when quite young and went to Belgium. Endowed with good judgment, being a tireless worker, and having early become familiar with business operations, he was soon engaged in important financial transactions, in which his mere name and his experience inspired the public with confidence. He opened a bank at Antwerp and another at Brussels, both of which rapidly succeeded. Bischoffsheim was one of the most active founders of the Union du Crédit, instituted in the hard times of 1848, and which since then has been specially serviceable to small traders; of the Comptoir de Prêts sur Marchandises at Antwerp; of the Union du Crédit at Liége; and of the National Bank, of which he was successively examiner and director, and which he saved from imminent failure in 1841, receiving for his services on that occasion the Cross of the Order of Leopold. Bischoffsheim had a high standing in political as well as in financial circles. He was a member of the communal council of Brussels, and for twenty years represented the arrondissement of that name in the Senate, often advising the ministers of finance.

Bischoffsheim founded several philanthropic institutions; among them, at Brussels, two professional schools for girls, two normal schools, a model school, courses of lectures for women, an association for encouraging study among women, the Educational League, and committees for supplying food and clothing to needy school-children, and a chair of Arabic at the university. He was also actively interested in Jewish philanthropy, and for many years was a member of the Central Consistory.

GENEALOGY OF THE BISCHOFFSHEIM FAMILY.

He received special naturalization papers in 1859 for exceptional services rendered to the state, and he was decorated with many foreign orders. His funeral was attended by all classes of the whole city; the name of the Boulevard de l'Observatoire, where he had lived, was changed to that of "Boulevard Bischoffsheim"; and the community of Watermael-Boitfort placed his bust in the hall where the sessions of the Communal Council were held.

S. M. BL.

BISCHOFFSHEIM, RAPHAEL LOUIS: French banker; member of the Institute of France; son of Louis Raphael Bischoffsheim; born July 22, 1823, in Amsterdam. He received his early education in his native city, and was then sent by his father to Paris to take a special course preparatory to entering the Ecole Centrale des Arts et Manufactures, where he was admitted in 1842. On graduating from that school he was appointed inspector of one of the southern railway lines belonging to the system controlled by his father, and remained in that position until 1873, when he succeeded his father in the banking firm.

Bischoffsheim in a short time acquired the reputation of a public-spirited man; and his munificent gifts to charitable and scientific institutions won for him the exceptional honor of "grande naturalization," by which, on April 24, 1880, he became a citizen of the French republic.

Attracted by the marvelous advance of astronomy, and deeply interested in that science, Bischoffsheim spared no expense in aiding astronomical institutions and enterprises. The observatories of Paris and of Montsouris owe to him in great measure the excellency of their modern equipment. He has also given his financial support to the observatory established by General Nansouty on the summit of the Pic du Midi.

Bischoffsheim's most valuable contribution to the progress of astronomy, however, was the observatory of Mont-Gras near Nice, one of the largest and best-equipped institutions of the kind in Europe, which he founded with an endowment of 1,500.000 francs. This observatory was formally inaugurated Oct., 1887, and was selected for the meeting-place of the international geodetic congress of that year. The Académie des Sciences sent its most illustrious representatives on the occasion, and later recognized the valuable nature of Bischoffsheim's services to astronomy by electing him member (*membre libre*) of the Institut de France; while the French government bestowed upon him the Cross of the Legion of

Honor. He received two gold medals at the Paris Universal Exposition of 1889: one for his observatory at Nice, the other for his professional school on the Boulevard Bourdon, Paris.

In 1881 Bischoffsheim was chosen to represent the electoral district of Nice in the Chamber of Deputies; but he insisted upon preserving the independence of his political opinions, and as he would attach himself permanently to no political faction, he was not reelected in 1885.

BISCHOFFSHEIM, RAPHAEL (NATHAN): Merchant and prominent philanthropist; born at Bischofsheim-on-the-Tauber, 1773; died at Mayence Jan. 22, 1814. He went to Mayence during the French Revolution, and from a small merchant became a purveyor to the army. Bischoffsheim was president of the Jewish community of Mayence. In a list dated April 21, 1808, he is included in the twenty-five foremost Jews of that city, from among whom the authorities were to choose notables for the great Sanhedrin of Paris.

BISCHOFSHEIM-ON-THE-TAUBER: City in the district of Mosbach, Baden. At Landa and the neighboring Tauber-Bischofsheim seven prominent Jews were tortured and burned, Jan. 1 and 2, 1235, on the accusation of having murdered a Christian. Nearly the whole community was annihilated by the hordes under Rindfleisch July 24, 1298, and again by those under Armleder's leadership June 10, 1337. Another persecution took place in 1343; and on the appearance of the Black Death in 1348 many Jews were martyred. Jacob of Bischofsheim, with his wife and son, is mentioned at Nuremberg in 1329. In 1336 the brothers Johann and Eberhard Voyte ratified an agreement that of the yearly tax on the Jews of Bischofsheim one-half should thenceforth go to Otto, bishop of Würzburg, and the other half to themselves until the chapter should have bought back the city from them. On Dec. 23 of the same year they agreed to turn over their share to the town council. In 1338 Archbishop Heinrich of Mayence released the knight Johann von Rieden and his family from all the claims of the Jews of Bischofsheim on account of the Jews that had been slain in that city. In 1343 Archbishop Adolf of Mayence promised to cease taxing the Jews in the nine cities of the archbishopric to which Bischofsheim belonged. On June 27, 1400, the burgrave Friedrich addressed a letter to Isaac of Bischofsheim. In 1710 the houses of two Jews, near the church, were exchanged for others. In 1731 and 1746 the electoral government issued decrees forbidding the desecration of Sundays and holidays by Jews. The poll-tax of the Jews amounted to 20 kreutzer in 1724. From early times the city belonged to the electorate of Mayence, and the Jews were included in the rabbinate of Aschaffenburg, or Mayence; representatives of Bischofsheim are mentioned in all transactions of the electorate. When Baden became independent Bischofsheim came under the rabbinical jurisdiction of Wertheim. The first and the last rabbi of Bischofsheim-on-the-Tauber was Jacob Löwenstein (1851–69); while his learned son, Leopold Löwenstein, rabbi at Morbach, had charge of the rabbinate in 1870–71. At present (1902) the community numbers 40 families, and is included in the rabbinate of Morbach.

Jacob ben Eliezer Brandeis, who died in 1768, is mentioned as rabbi of Neckar-Bischofsheim. A Rabbi Hellmann, of the family of Chief Rabbi Löb of Prague, was the author of a commentary on the Shulḥan 'Aruk, Eben ha-'Ezer. He died at an early age, and was succeeded by Rabbi Moses Bamberger, who died in old age in 1820. The latter's only son, Koppel Bamberger, rabbi of Worms, died in 1864. The Jew Joseph, baptized in 1705, was a native of this place.

Jews are also mentioned as living at Rhein-Bischofsheim.

G. A. F.

BISENZ: Town in Moravia, Austria. About the earliest history of its Jews nothing is known. Pesina, whose "Mars Moravicus" was published in 1677, calls it "nidus Judæorum."

In the time of the margraves (up to the fifteenth century) the Bisenz Jews must have enjoyed great privileges; for, according to the oldest "mountain-laws," they were permitted to own vineyards, it being a matter of great importance to the margraves to market their wine through the agency of Jewish traders. In the wars between George Podiebrad of Bohemia and Matthias of Hungary (*c.* 1458), Bisenz, and with it the Jewish quarter, was entirely devastated and came under constantly changing feudal proprietors.

According to the feudal "Urbarium" of 1604, the Jews even then possessed thirty-two houses, a hospital, and seventeen smaller buildings, called "Hoferi Zidovisti." But only a year later (May 2, 1605) the Jewish community was totally destroyed by Stephen Bocskai; so that in 1655, when the new edition of the land-register was made out, twenty-five Jewish holdings still lay in ruins.

In the first Silesian war (Feb., 1742) the Jewish community suffered severely from the Prussian invasion, especially as its inhabitants had to bear their share of the general levies. At the close of this war the empress Maria Theresa in 1753 issued the so-called "Familien-Verordnung" (Family Ordinance), according to which only 5,442 Jewish families were allowed to live in Moravia; and of these 137 were allotted to Bisenz. On May 17, 1777, almost the entire Jewish ghetto, in which there were ninety-three houses, was burned. Up to 1782 the Jewish community was subject to the feudal lord; but in criminal matters they were under the jurisdiction of the city authorities.

Of recent events may be mentioned the organization of the Jewish congregation into a political community in 1852, and the building of a new synagogue in 1863.

D. J. Hf.

BISHKA, NAHMAN BEN BENJAMIN COHEN ẒEDEK: Russian Talmudist; lived in the second half of the eighteenth century. Together with his brother, **Shabbetai Bishka,** he wrote the "Shebet Aḥim" (The Brothers' Sitting), essays on different passages of the Talmud, with an appendix entitled "Shem 'Olam" (Eternal Name), being comments on different passages of the Haggadah and the Bible. The work was published (Wilna-Grodno, 1833) by his grandson, Joshua ben Kalonymus Cohen Ẓedek, who added an appendix of his own Talmudic essays under the title "Naḥal Yabboḳ."

Bibliography: Fürst, *Bibliotheca Judaica*, i. 120; Benjacob, *Oẓar ha-Sefarim*, p. 567.

L. G. I. Ber.

BISHOP OF THE JEWS (Episcopus Judæorum): Title given to an official of the Jews in the Rhine country and in England in the twelfth and thirteenth centuries. At Cologne it appears to have been used as an equivalent to "parnas," or warden of the synagogue. In England the parnas is mentioned under that name, and there appear to have been in each large community three, and three only, of these "episcopi" (for example, in the communities of London and Lincoln); and it has therefore been inferred that they were equivalent to the three dayyanim or ecclesiastical assessors who constitute the bet din in the Jewish community, known in the English records as a "chapter of the Jews" (*capitulum Judæorum*). Originally an official title, the name became afterward a cognomen; and in French-speaking countries several Jews are found with the name "Evesque" or "Levesc." Some Tallies of the English Exchequer have lately been discovered in which the Latin name is given as "Levesc," but is signed in Hebrew as "Cohen"; and it has been suggested that the name when used as a family name is simply equivalent to "Cohen."

Besides the bishops, there was in England a Presbyter, who appears to have been a kind of chief rabbi, associated chiefly with the treasury: he would correspond to the ab bet din.

J.

BISLICHES or BISSELICHES, MORDECAI LOEB: Editor of some valuable Hebrew works of medieval authors; born at Brody, Austria, at the end of the eighteenth century; died about 1851. He was married at the age of thirteen (a fact of which he bitterly complains), ultimately divorced his wife, and, after the death of his children, went to Paris. There he was very prosperous in business, devoting his leisure to the study and publication of Hebrew manuscripts in the Paris Library. Later he went to Holland and Italy, where he collected a number of Hebrew manuscripts. Returning to his birthplace, he prepared for publication, with the aid of his brother Ephraim, the following works:

(1) "Yeshu'ot Meshiḥo," of Isaac b. Judah Abravanel, Carlsruhe, 1828; (2) "Sefer ha-Nefesh," of Shem-Ṭob Palquera, Lemberg, 1835; (3) "Moreh ha-Moreh," of Shem-Ṭob Palquera, Presburg, 1837; (4) "Ma'amar Yiḳḳavu ha-Mayim," of Samuel b. Judah Tibbon, Presburg, 1837; (5) Moses Naḥmanides' Ḥiddushim on "Shabbat," under the title, "Oẓar Neḥmad," Presburg, 1837; (6) "Minḥat Ḳena'ot," of Abba Mari b. Moses of Lunel, Presburg, 1838; (7) "Sefat Yeter," of Abraham ibn Ezra (edited with preface by Meïr Letteris), Presburg, 1838; (8) "Ha-Paliṭ," a catalogue of eighty valuable Hebrew manuscripts in the possession of Bisliches (described by L. Zunz, with additional critical remarks by Senior Sachs), Berlin, 1850.

Bibliography: His prefaces to the books *Ma'amar Yiḳḳavu ha-Mayim*, and *Ha-Paliṭ*; Steinschneider, *Cat. Bodl.* cols. 800, 992, 1959; Fürst, *Bibl. Jud.* i. 129; Zedner, *Cat. Hebr. Books Brit. Mus.* s.v.; Geiger, *Jüd. Zeit.* iii. 282.

D. H. M.

BISMARCK, PRINCE OTTO EDUARD LEOPOLD: Prussian statesman; born at Schönhausen April 1, 1815; died at Friedrichsruh July 30, 1898; member of the Prussian Diet (Vereinigter Landtag), 1847–51; representative of Prussia at the Bundestag at Frankfort-on-the-Main, 1851–59; Prussian ambassador at St. Petersburg from March, 1859, to May, 1862, and at Paris from May to Sept., 1862; secretary of state and premier from Sept., 1862, to Aug., 1866; then chancellor of the North German Federation until 1870, and of the German empire from Dec., 1870, to March 20, 1890.

As a delegate to the first Prussian Diet, convened in 1847, Bismarck, a strong adherent of the feudal party ("Junkerpartei"), opposed the new law which favored the emancipation of the Jews. He eloquently advocated the idea of a Christian state in which Jews might have all personal liberties, but should not be accorded the right of serving as magistrates. He evinced the same spirit of religious or, rather, racial prejudice when Eduard Simson was elected speaker of the Erfurt parliament and himself one of the secretaries: "My late father," he said, "would thrice turn in his grave should he hear that I had become the secretary of a Jewish savant" (Simson had been baptized). In 1881 Bismarck praised Simson as one of the most distinguished and patriotic representatives of the national idea.

Time and experience wrought a change in Bismarck's views. Many years later (1870), at Versailles, he confessed that he had heard and had delivered "many a stupid speech at this Diet."

As Prussian minister of state, he acquiesced in the full emancipation which had come to the Jews through the revolution of 1848; and under his chancellorship the North German Federation passed the law of July 3, 1869: "All existing restrictions of civil and political rights, restrictions derived from the difference of religion, are hereby abolished. Especially the right of participating in the representation of the municipality and of the state, and of holding public office, shall be independent of the religious creed." In words and deeds Bismarck proved himself a stanch defender of these principles, which were embodied in article 3 of the constitution of the empire. "I shall never consent to any attempt at curtailing the constitutional rights of the Jews" (Poschinger, "Fürst Bismarck," p. 227). With the same emphasis he declared his opposition to the anti-Semitic movement: "I decidedly disapprove of this agitation against the Jews, be it on religious or on racial grounds."

In 1868, when the agitation began against the Jews in Rumania, he took the part of the persecuted, and tried to influence Prince (afterward King) Karl in their favor, as is seen from a letter addressed to Crémieux by Count von der Goltz, Prussian ambassador to the French court (April 2): "From the letter of the president of the cabinet of Feb. 22 you may have learned already of the deep interest which the royal government takes in this affair. The readiness with which Count Bismarck has complied with your wish expressed in your letter of March 26 is a new proof thereof. His Excellency authorizes me to inform you that the Prussian consul-general at Bucharest has been ordered by telegraph to remonstrate with Prince Karl against the proposed law concerning the Israelites, which has just been submitted to the Rumanian legislature."

At the Berlin Congress of 1878, Bismarck, pleading for the rights of the Rumanian Jews, remarked to Prince Gortschakoff that perhaps the sad condition of the Jews in Russia was due to the fact that they were deprived of civil and political equality. That no political considerations but the sentiments of justice and humanity dictated his actions is shown in the answer made by his coadjutor, Von Bülow, secretary of state for foreign affairs, to the representatives of the Alliance Israélite Universelle, who, desiring the chancellor's intercession in behalf of the Jews of the Balkan districts, had pleaded for toleration: "Gentlemen," said Von Bülow, "'toleration' is an incorrect word; not toleration, but unrestricted exercise of all their rights shall we demand, at the congress, for your coreligionists."

And yet the "iron chancellor," who had it in his power to crush the anti-Semitic movement at its beginning, was led by political reasons to foster it for some time. Having changed the liberal policy which he had followed since 1867, and in which he had had the support of the prominent Jewish statesmen Lasker and Bamberger, he sought the alliance of the Conservative party, which in 1878 had gained the ascendency in the Reichstag. The court chaplain, Adolf Stöcker, founder of the Christian-Socialist party and of its offspring, anti-Semitism, was not hampered in his reactionary agitations. Bismarck considered this new movement an efficient auxiliary in combating liberalism and democracy. But this strange fellowship, which, especially in Berlin, had pernicious consequences, was not of long duration. Bismarck never yielded to the demands of the agitators, and strenuously checked their attempts to deprive the Jews of the rights guaranteed to them by the fundamental laws of the empire.

D. S. MAN.

BISNA, BISINAH, BISNI (BIZNA): Palestinian scholar of the fourth amoraic generation (fourth century); contemporary of BERECHIAH II., with whom he appears in a halakic discussion (Yer. Ma'as. v. 52a—"Bisinah"; Yer. Ned. iii. 37d; Yer. Shebu. iii. 34d, where "Yosnah" is to be corrected). His name is connected with several Halakot, for the most part, however, as transmitting opinions of his predecessors and contemporaries (Yer. Pes. iv. 31a; Yer. M. Ḳ. i. 80a; Yer. Yeb. iii. 5a). In homiletic literature he also transmitted remarks in the names of others (Tan., Shemini, 8 [ed. Buber, xii.]; Gen. R. xiv. 9, "Bisni"; Deut. R. iv. 6).

In his own name but few Haggadot are preserved; of these, the following interpretation of a Biblical verse may serve as a specimen:

> "Blessed is the man whom thou chastenest, O Lord, and teachest out of thy law" (Ps. xciv. 12). "No man on earth is entirely exempt from pain. If his eye hurts him, he can not sleep; a toothache keeps him wakeful all night. But here is a scholar engaged in the study of the Law, and he spends a whole night in thoughtful meditations. The former is awake through pain, the latter voluntarily; blessed is he who chasteneth himself with wakefulness over the study of the Law" (Tan., Miḳḳeẓ, ed. Buber, xvi.; Yalḳuṭ 850 reads "Bizna").

BISTRITZ, ḲALMAN KOHN: Hungarian Neo-Hebraic poet; lived at the beginning of the nineteenth century. He was the author of the Purim drama "Goral ha-Ẓaddiḳim" (The Lot of the Righteous), which appeared in Vienna, 1821. He belonged to the same family as Meïr Kohn Bistritz, and is considered a good epigrammatist.

BIBLIOGRAPHY: Fürst, *Bibliotheca Judaica*, i. 120; Kayserling, in Winter and Wünsche, *Jüdische Litteratur*, iii. 896 (both mistakenly cite Bistritz's work as *Gemul ha-Ẓaddiḳim* [The Reward of the Righteous]); Berliner, *Beiträge zur Gesch. des Jüdischen Drama*, appended to his edition of R. Moses Zacuto's *Yesod 'Olam*, p. xviii., Berlin, 1874.

L. G. P. WI.

BISTRITZ, MEÏR KOHN: Hungarian Neo-Hebraic poet and author; born in Vag-Bistritz, Hungary, 1820; died in Vienna Sept. 7, 1892. He lived the greater part of his life in Vienna, where he published most of his works. The first of these was his notes and German translation of Mordecai b. Meïr Kalman's didactic poem, "Tabnit ha-Bayit" (The Shape of the House) (1858). In the following year he published "Ḳol Rinnah" (The Voice of Rejoicing), a Hebrew poem with a German translation, both composed by him on the occasion of the dedication of the new temple in Budapest. In 1863 he produced a new and improved edition of the anonymous "'Aruk ha-Ḳaẓer" (Abridged Dictionary). A year later he edited and published "Ẓiyyun le-Zikron 'Olam" (Sign of Eternal Remembrance), a work in honor of the seventieth birthday of Isaac Noah Mannheimer, containing addresses, songs, essays, etc., in Hebrew and German. He wrote other minor poems, and a humorous essay on the proverb "Wenn die Chassidim reisen, regnet es" ["Jüdisch-Deutsches oder Deutsch Jüdisches Sprichwort," Vienna, 1880]. He was also the author of a lengthy article in the Hebrew periodical "Bet Talmud" (iv. 140, 177, 206), to explain the difficult passages in Midrash Tanḥuma, which were pointed out by Jacob Reifman.

Bistritz's last and largest work was the "Bi'ur Ṭiṭ ha-Yawen" (The Cleaning up of the Mire; Presburg, 1888), a vindictive attack on the radical criticism of Osias H. Schorr in explaining the Talmud.

The book is full of diatribes against Schorr's personality, and is written in abusive and bombastic style. Schorr's pupils or followers, and all Polish Jews who have adopted modern dress or modern views, come in for their share of abuse. The work, which is, however, not without merit as a contribution to the lexicography of the Talmud, closes with sixteen epigrams aimed at another alleged follower of the liberal editor of "He-Ḥaluẓ," Asher Simḥa WEISSMAN, author of "Ḳedushat ha-Tanak."

BITHIAH.—Biblical Data: Daughter of Pharaoh, whom Mered of the tribe of Judah married (I Chron. iv. 18). In the Midrash (Lev. R. § 1) she is called the foster-mother of Moses.

G. B. L.

J. JR.

——In Rabbinical Literature: Daughter of Pharaoh; identified in the Midrash with Moses' foster-mother. The name is explained as follows: God said to her, "You have called Moses your son, although he was not your son, therefore I will call you my daughter ["Bithiah" = "bat," daughter; "Yah," God], although you are not my daughter" (Lev. R. i. 3; Meg. 13a; and elsewhere). Bithiah is also identified with "his wife Jehudijah," mentioned in the same verse (I Chron. iv. 18), and the name is interpreted as signifying that she became a Jewess, giving up the idolatry of her father. The names of the men whom "she bare," which are enumerated in that verse, are taken to be different designations for Moses (compare MOSES IN RABBINICAL LITERATURE), Bithiah being represented as Moses' mother in the passage, because the person who rears an orphan is regarded as the veritable parent. Mered, whom Bithiah subsequently "took," was Caleb, who was called Mered ("rebellion") because, as she rebelled against her father and her family, so did Caleb "rebel" when he refused to follow the evil counsels of the spies (*l.c.*; Sanh. p. 19b; Targ. on the passage; compare also the pseudo-Jerome commentary on the passage).

Bithiah bathed in the Nile, because, having a skin-disease, she could bathe only in cold water; yet she had hardly touched the casket in which Moses lay, when her disease left her, and she then knew that the boy was destined for great things (Pirḳe R. El. xlviii.; Ex. R. i. 23). When her attendants suggested to her that it was unseemly that Pharaoh's daughter should act against her father's commands, the angel Gabriel appeared and slew them; and Bithiah herself took the casket out of the water. As it was a considerable distance from the bank, her arm was miraculously lengthened so as to enable her to reach it (Soṭah, p. 12b; Meg. p. 15b). Bithiah was the first-born of her parents, but, through Moses' prayer, was spared at the time of the death of the first-born (Pesiḳ., ed. Buber, vii. 65a). She is numbered among the persons who entered paradise alive; having saved Moses, she was forever freed from death ("Derek Ereẓ Zuṭṭa," i.; Yalḳ. i. 42, ii. 367). Compare MOSES IN RABBINICAL LITERATURE.

L. G.

K.

BITHYNIA: A province in the northwest of Asia Minor, adjoining the Propontis, the Thracian Bosporus, and the Euxine. A Jewish colony existed there as early as the first century of the common era. In his address to Caius, the Judean Agrippa speaks of the Jews of Bithynia (Philo, "Legatio ad Cajum," § 36; ed. Mangey, 587). A Greek tumulary inscription bearing all the characteristics of its Jewish origin was discovered in 1891 at Arnaut-Keni in Bithynia. It runs as follows: *'Ενθάδε κατάκεῖται Σανβάτις, υἱὸς Γεροντίου πρ[εσβυτερου], γραμματεύς καὶ ἐπιστάτης τῶν παλαιῶν* *Εἰρήνη* ("Here lies Sanbatis [= Shabbethai], son of Gerontios, presbyter, scribe, and president of the elders. Peace!"). It is thus evident that organized Jewish communities existed not only in the important cities, like Nicæa and Nicomedia, but also in the small towns. These communities, like all those of the Byzantine empire, underwent many persecutions during the Middle Ages. In 1326 Bithynia was conquered by the sultan Orkhan, and the condition of the Jews was greatly improved.

At present Bithynia forms a part of the vilayet of Brusa, which contains about 5,800 Jews. They are chiefly engaged in the sale of textile materials and undressed silk, in brokerage, money-changing, and various handicrafts. The Alliance Israélite Universelle has established several schools for children.

BITTER HERBS. See PASSOVER.

BITTERN ("ḳippod"): From an examination of the passages in which "ḳippod" occurs it would seem that a bird is meant by the word. In Isa. xxxiv. 11, "But the cormorant and the ḳippod shall possess it; the owl also, and the raven shall dwell in it," any meaning for "ḳippod" other than the name of a bird would be decidedly out of place. In Zeph. ii. 14 it is again mentioned by the side of the cormorant, and is spoken of as singing "in the upper lintels." From Isa. xiv. 23 it is clear that the ḳippod was one of the wading birds. Hence there seems to be good ground for translating the term by "bittern," as the bittern is a nocturnal bird, dwells alone, and belongs to the wading class. The ancient versions have "porcupine" instead of "bittern," and the later usage of Hebrew and the Arabic "ḳunfud" support this translation; but the difficulties aroused by the reading "porcupine" in the Biblical passages are formidable.

G. B. L.

J. JR.

BITTOON, ISAAC (sometimes called **Pittoon**): English pugilist, fencing master, and teacher of "the noble art of self-defense"; born in 1778; died in Feb., 1838. His first encounter was with Tom Jones of Paddington, whom he met and defeated at Wimbledon, Surrey, July 31, 1801. This victory was followed by a drawn battle with George Maddox, which took place Dec. 13, 1802, on the same spot, and was called off after seventy-four rounds. On July 16, 1804, on Willesden Green, near London, Bittoon fought a drawn battle with William Wood, a London coachman, interrupted in the thirty-sixth round by the appearance of officers from Bow street.

Subsequently he appeared in the ring only as a second; and on Nov. 16, 1812, assisted Jack Carter in his match against Jack Power.

Soon after his last appearance as a principal, Bittoon retired from the prize-ring, and established an athletic school in Goulston street, Whitechapel, London, where he gave instruction in boxing and fencing. He was buried in the Jewish cemetery near Bethnal Green.

J. F. H. V.

BITUMEN: A substance said (in Gen. xi. 3) to have been used for mortar. It belongs to the class of hydrocarbons, and is a resultant from petroleum, after having gradually undergone evaporation and oxidation. The continuation of this process upon this mineral tar produces the asphalt so abundant at the southern end of the Dead Sea. Indeed, this material gave that sea the name of the asphaltic lake (Asphaltites Lacus). Deposits of this substance are found in many parts of the world, and almost always in close proximity to bitumen springs. The best known among those in the East to-day are at Hit, not far from the site of ancient Babylon. This bitumen was used in coating and thus in increasing the durability of sun-dried bricks, and for various other useful purposes. Hull thinks that the bitumen in the basin of the Dead Sea is probably derived from the bituminous limestones of the Cretaceous series, and that it reaches the surface through fissures in the rock. Of slight commercial importance, the springs of Hit are still used by the native boat-builders.

J. JR. I. M. P.

BIURISTS (from בּיאור, "commentary"): A class of exegetes of the school of Mendelssohn. Not content with giving a simple meaning, most of the Biblical commentators immediately preceding Mendelssohn had interpreted the Biblical passages from an individual point of view, and had so distorted the literal sense of the words that they failed completely to make clear the actual meaning. Mendelssohn compiled for his children a literal German translation of the Pentateuch; and to this Solomon Dubno, a grammarian and excellent Hebraist, undertook to write a "biur" or commentary. As soon, however, as a portion of the translation was published, it was criticized by rabbis of the old school, including Raphael ha-Kohen of Hamburg, Ezekiel Landau of Prague, Hirsch Janow of Posen, and Phineas Levi Horwitz of Frankfort-on-the-Main. Fearing that the charm of the German language would lead the Jewish youth to study the translation rather than the Torah itself, and believing that they would thus be led away from orthodox Judaism, the rabbis united forces, and in June, 1779, issued a ban against "the German Pentateuch of Moses of Dessau." This act led Solomon Dubno to give up his work after having finished Genesis: but, in order that the undertaking might be completed, Mendelssohn himself undertook the commentary. Finding, however, that the work was beyond his strength, he committed to Naphtali Herz Wesel (Hartwig Wessely) the biur to Leviticus, to Aaron Jaroslav that to Numbers, and to Hertz Homberg that to twenty-two of the middle chapters of Deuteronomy.

Translation of the Pentateuch.

Mendelssohn's Works.

Thus the work that was to revolutionize Bible-study among the Jews was completed in March, 1783, under the title "Netibot ha-Shalom" (The Paths of Peace). It is preceded by an introduction in Hebrew, written by Mendelssohn, in which he discusses the history of the work and the rules of idiom and syntax followed in his translation. Mendelssohn wrote, also, a German translation of the Psalms, with a Hebrew introduction ("mebo") on Biblical poetry, for which Joel Löwe (Joel Bril, בריל = the initials of בן ר' יהודה ליב), conjointly with Aaron Wolfsohn (Aaron of Halle, a translator of the Song of Solomon), wrote the biur. The biur to Kaplan Rabe's translation of Ecclesiastes was written by Mendelssohn. The work begun by Mendelssohn was continued by his followers, the Biurists, whose writings are given in the following columns:

Author.	Biur to	Author.	Biur to
Aaron Wolfsohn	Esther	Moses Philippson (Moses Arnswalde)	Daniel Hosea Joel Habakkuk
M. Obernik	Joshua Judges		
M. Obernik and Samuel Detmold	Samuel	Israel Neumann	Amos Nahum Haggai Malachi
Isaac Euchel	Proverbs	Joseph Wolf	Micah Obadiah Zephaniah Minhah Tehorah (12 minor prophets)
David Ottensosser of Fürth	Isaiah Job		
David Ottensosser, Heiman Schwabacher (Fürth), S. J. Kohn (Wollstein)	Jeremiah Ezekiel Hagiographa	Joel Löwe	Jonah
		Solomon Levy of Sandersleben	Zechariah

In the nature of the biurist movement was the undertaking of Moses Landau, who in 1806 published a biuristic Bible, in which the above-mentioned biurim were superseded as follows:

Author.	Biurim.	Author.	Biurim.
Wolf Mayer	Joshua I Kings Samuel	Ben Ze'eb	Minor Prophets and introduction to the prophetical books.
Solomon Sachs	Isaiah Jeremiah		
Abraham Benisch Marcus Goldman	Ezekiel		

Mendelssohn's biuristic school extended from Poland to Alsace, from Italy to Amsterdam, London, and Copenhagen; and it called forth many imitators, such as Samuel J. Mulder, who translated into Dutch the Pentateuch, five Megillot, and the former Prophets; G. A. Parsen, who translated and commented in Hebrew on the Book of Isaiah; I. Neufeld, who translated the Bible into Polish; and J. L. Mandelstamm, who translated the Bible into Russian. Isaac Samuel Reggio also followed in the footsteps of the Biurists with an Italian translation and Hebrew commentary to the Pentateuch, and an

Italian translation of Isaiah; Samuel David Luzzatto translated the Bible into Italian, and wrote biurim to Job, Isaiah, and the Pentateuch, and some glosses to Jeremiah, Ezekiel, Proverbs, and Job; and M. Rosenthal, J. Mannheimer, and M. Stern translated the Psalms into Hungarian. The movement later crossed the Atlantic, and Isaac Leeser of Philadelphia translated the Bible into English according to the interpretations of the Biurists; while in Europe steps were taken toward the perpetuation of the movement, in the foundation of the Ḥebra Doreshe Leshon 'Eber (Society of Investigators of the Hebrew Language) by Isaac Abraham Euchel and Mendel Breslau, and in the establishment of the periodical "Ha-Meassef" (The Gleaner).

The Biurists laid the foundation of a critical historical study of the Bible among the modern Jews, the first-fruits of which may be seen in Philippson's German Commentary, 1827. The commentator groups and examines critically the most important exegetical explanations of the Bible expounders; penetrating into the actual import of the Holy Scripture and searching the spiritual context, so as to explain the Bible by the Bible itself. As regards grammar and lexicography, Philippson touches these only in so far as is necessary to the comprehension of the text.

Myth of Well-Poisoning.

BLACK DEATH: A violent pestilence which ravaged Europe between March, 1348, and the spring of 1351, and is said to have carried off nearly half the population. It was brought by sailors to Genoa from south Russia, whither it had come from central Asia. During March and April, 1348, it spread through Italy, Spain, and southern France; and by May of that year it had reached southwest England. Though the Jews appear to have suffered quite as much as their Christian neighbors (Höniger, "Der Schwarze Tod in Deutschland," 1882; Häser, "Lehrbuch der Gesch. der Medizin," iii. 156), a myth arose, especially in Germany, that the spread of the disease was due to a plot of the Jews to destroy Christians by poisoning the wells from which they obtained water for drinking purposes. This absurd theory had been started in 1319 in Franconia (Pertz, "Monumenta Germaniæ," xii. 416). On that occasion punishment had fallen upon the lepers, by whose means the Jews, it was alleged, had poisoned the wells. Two years later, in the Dauphiné, the same charge had been brought against the Jews.

In 1348, once the accusation was raised, it was spread with amazing rapidity from town to town; and official reports were sent by the mayors of various cities containing alleged confessions of Jews who had been seized under the accusation and put to torture (see Schilter, in "Königshoven Chronik," pp. 1021 *et seq.*).

The first outbreak seems to have occurred in northern Spain, in Barcelona, Cervera, and Tarrega, in the months of June and July; but the actual myth of well-poisoning in connection with the Black Death seems to have arisen in Switzerland in the autumn of that year, though Clement VI. had issued in July a bull declaring its falsity (Baronius, "Annales," 1348, No. xxxiii.). When the pestilence reached Chillon, Jews of that place were arrested and put to the torture. A certain Balavignus "confessed" that an elaborate plot had been concocted by some Jews in a town in the south of France—Jacob à Paskate from Toledo, Peyret of Chambéry, and one Aboget. These had compounded a poison the ingredients of which were Christians' hearts, spiders, frogs, lizards, human flesh, and sacred hosts, and had distributed the powder made out of this concoction to be deposited in the wells whence Christians drew water. The report spread to Chatel, Chatelard, and Bern; and from the last-named place special messengers were sent to all the Swiss and Upper Rhine towns, which soon produced the natural effect. At Zurich, where the new charge was combined with the old blood accusation, several Jews were burned (Sept. 21, 1348), while the rest were expelled (Schudt, "Jüdische Merkwürdigkeiten," i. 323). During the month of November the rumor reached Augsburg (Nov. 22), Würzburg, and Munich, and spread through eighty towns of Bavaria, where massacres of the Jews occurred. In the following month the great epidemic reached the Upper Rhine with the same results. At Freiburg in Breisgau, Jan. 30, 1349, all of the Jews, except twelve of the richest, were slain, the latter being reserved solely that their riches might be appropriated. Here it was reported that four Jews of Breisach had been sent to Freiburg with the poison, which they had obtained at Basel, and that all of the Jews of Strasburg, Basel, Freiburg, and Breisach were in the conspiracy. On Jan. 22 the Jews of Speyer fell victims, several being slain, and several killing themselves to escape baptism, while others, less firm-spirited, accepted baptism as the sole refuge from death.

Outbreak at Strasburg.

Meanwhile correspondence had been carried on between the town councils of Basel, Cologne, Chillon, and Strasburg, containing the substance of the so-called confessions. At Strasburg the mayor refused credence to the rumors, and declared his intention of sustaining the Jews; whereupon he was removed from his post, and more than 2,000 Jews of the city were put to death (Feb. 16, 1349). The deeds belonging to the latter were seized and destroyed (showing the real motive of the act); and the debtors of the Jews gave assurances to the citizens of protection from the consequences of the massacre (Stobbe, "Juden in Deutschland," p. 189). The Jews of Worms were the next victims, and no less than 400 of them were burned March 1; while on July 24 the Jews of Frankfort preferred to offer themselves up as a holocaust, and in so doing burned part of the city. The largest number of victims is recorded at Mayence, where no less than 6,000 are said to have been slain Aug. 22, 1349. Here the Jews for the first time took active measures against their oppressors, and killed 200 of the populace; but finding the task of freeing themselves hopeless, they barricaded themselves in their dwellings, and when the alternative of starvation or baptism faced them, set fire to their houses and perished in the flames. Two days afterward the same fate befell the Jews of Cologne; and, seemingly in the same month (though other records assign March 21 as the date), the Jewish inhabitants of Erfurt, 3,000 in number, fell victims to the popular superstition and hatred.

Punishment of Rioters.

Meanwhile the protection of the duke of Austria had prevented the madness from reaching his dominions; but at last, on Sept. 29, the passions of the mob at Krems overcame the authority of the soldiery, and all the Jews of that town were burned. The last month of the year 1349 saw attacks at Nuremberg (Dec. 6), Hanover, and Brussels. With this the popular fury died out; and the rulers of German principalities and cities had to determine what punishment was to be meted out to the slayers of the Jews, and what disposal should be made of the rich possessions the Jews had left behind them. Very little was done in the former direction: the whole social fabric had been overturned by the terrible pestilence; and even with the best will, if they had possessed it, the rulers could not have increased the devastation by adequate punishment of the murderers. The emperor, however, claimed the huge fine of 20,000 marks in silver from the inhabitants of Frankfort for the loss he had sustained by the killing of the Jews; and other fines were inflicted by the officers of the imperial treasury. But the chief punishment took the form of claiming the inheritance of the Jews' debts, which, by the imperial law, belonged to the emperor; so that, except in cases where the records of their debts had disappeared, the debtors of the Jews gained little by these murders.

In the preceding account, only the chief outbursts have been specially referred to. The following list contains the names of all towns where the Jews were attacked on account of the Black Death, according to the records given in the Nuremberg "Memorbuch." It is of importance not alone for its testimony to the wide area of the attacks upon the Jews, but also as recording almost every town in Germany, outside the Austrian dominions, in which Jews dwelt in the middle of the fourteenth century:

Results.

It is somewhat difficult to account for the complete helplessness of the authorities against these outbursts of popular fury. It was fully recognized at the time—as, for example, by the town council of Cologne—that an outbreak against the Jews might imperil the social order generally. The loss to the imperial and princely treasuries was immense. Yet, so far from taking any steps to prevent the outbreaks, the emperor in several instances gave beforehand practical immunity to the perpetrators of the crime, by making arrangements as to what should be done with the houses and goods of the Jews in the event of a riot. This happened at Nuremberg, Regensburg, Augsburg, and Frankfort, and, doubtless, in other towns. There can be little doubt that the authorities shared the prejudices of the mob, and, with few exceptions, believed in the dread rumor of well-poisoning.

The effects on the Jews of Germany were little less than disastrous. The loss of life resulting from the massacres was terrible. Many of the Jews' debtors died from the pestilence; while others refused acknowledgment of their debts. The Jews of Bavaria, for example, were so impoverished, owing to their losses, that the margrave granted them freedom from all taxes for two years (Scherer, "Rechtsverhältnisse," p. 577).

From this time onward the Jews in all German towns lived in perpetual dread of similar attacks; and the civil authorities adopted the plan of expulsion as the only means of getting rid of the Jewish question in the towns. By the end of the fifteenth century there were only three considerable communities left in the whole of Germany.

G. J.

BLANC, PIOTR: Polish financier of the eighteenth century; court banker under King Stanislaus Augustus Poniatowski (1764-95); date and place of birth unknown; died at Warsaw in 1797. Together with the bankers Dekert and Rafalowitch he formed the tobacco monopoly in 1776 and the government lottery in 1781. With Tepper he negotiated the Holland loan. In 1790 he was raised to the nobility, and in the following year became the owner of a palace near Senatorska street, Warsaw, and of a villa in the suburb of Fawory. When Ignacy Potozky and Piatoli in 1792 worked out a plan to improve the condition of the Polish Jews, Blanc and his influential friends guaranteed the payment of five million rubles, which the Jews of Poland pledged themselves to contribute, instead of the usual taxes, for the amortization of the king's debts.

BLAND (*née* **Romanzini**), **MARIA THERESA:** English actress and singer; born in 1769 of Italian-Jewish parents; died at London Jan. 15, 1838. When only four years old she took a part in a performance at Hughes' Riding School, London. After studying for some years she made her reentry at Drury Lane Oct. 24, 1786, where she was so successful that she became leading lady in succession to Mrs. Wrighten. Her best rôle at this time was that of *Antonio* in Grétry's "Richard Cœur-de-Lion." In 1789 Maria Theresa played in Liverpool, returning to London a year later, when (Oct. 21, 1790) she was married to Mr. Bland, brother of Mrs. Jordan of Drury Lane. The following year she sang at the Haymarket in "Inkle and Yarico." Subsequently she appeared as *Miss Notable* in "Lady's Last Stake"; *Nina* in "The Prisoner"; *Mary Ann* in "School for Guardians"; *Madelon* in "Surrender of Calais," and *Sally* in "The Shipwreck." Her mind began to fail in 1824, and she was forced to retire, her last appearance being at her benefit at Drury Lane July 5, 1824.

BLASER, ISAAC B. SOLOMON: Russian rabbi and educator; born in Wilna about 1840. Educated to be a rabbi, he is recognized as the foremost pupil of Israel Lipkin and the best exponent of his moral teachings and methods of study. Blaser became the rabbi of the Jewish community of St. Petersburg about 1864, and held the position for sixteen years. He left the Russian capital and settled in Kovno, where he still resides as head of the so-called Perushim (men who separate themselves for study) of Kovno. A considerable sum (about 100,000 marks) was donated in aid of the Perushim by Caspar Lachman of Berlin, an ardent admirer of the above-mentioned Lipkin. The income from this endowment being insufficient, Blaser sends out emissaries or "meshullahim" to all Orthodox Jews to collect money for these zealous students, to whom the Russian Jewry now looks for its rabbis, just as it formerly looked to the graduates of yeshibot. Blaser, or, as he is familiarly called, "Reb Itzele Peterburger," is known and trusted among Russian Jews everywhere, and the emissaries from Kovno, who frequently visit the United States, are always well received and generously assisted.

Blaser is also identified with another movement, in which he continues the work of his teacher Lipkin. He is the head of the so-called Mussar'nikes ("Moralists"). The Jewish world is not so much interested in the "mussar" movement—which seeks no publicity and no outside financial assistance—as in the Perushim, but the personality and the position of

Blaser have influenced many of the latter to join the Mussar'nikes.

Blaser is the author of "Peri Yiẓḥaḳ" (The Fruit of Isaac), responsa, and various rabbinic researches (Wilna, 1881).

BLASOM, VIDAL. See Moses Narboni.

BLASPHEMY: Evil or profane speaking of God. The essence of the crime consists in the impious purpose in using the words, and does not necessarily include the performance of any desecrating act.

The Jewish law is based on the case of the blasphemer, one of the mixed multitude that went out of Egypt with the children of Israel (Lev. xxiv. 10-23). He blasphemed the name of the Lord and cursed; was sentenced to be taken without the camp; and it was decreed that all who heard him should lay their hands upon his head, and that all the congregation should stone him. The judgment in his case was formulated in a general law in verses 15 and 16.

The term "we-noḳeb shem Yhwh," used in verse 16 ("And he that blasphemeth the name of the Lord," A. V.), does not seem to signify that the mere pronunciation of the Ineffable Name was considered blasphemy, but that it was blasphemous to curse or revile the same. The later law, however, took the word "noḳeb" in the sense of "pronouncing," and declared that the Ineffable Name must have been pronounced before the offender could be subjected to the punishment provided by the Law.

Both the lawgiver and the prophets speak of the blasphemer of God and of the king. To revile the king, who was God's representative, was apparently considered a species of blasphemy (Ex. xxii. 27; Isa. viii. 21). This is furthermore shown in the case of Naboth, the indictment against him being: "Thou didst blaspheme God and the king" (I Kings xxi. 10). Beyond the reference to cursing in the text of Leviticus, there is nothing in the Biblical laws to indicate what constitutes the crime, and nothing to show that, to prove blasphemy, it was required to prove that the blasphemer had uttered the name of God. The Mishnah, however, laying stress on the term "noḳeb," declares that the blasphemer is not guilty unless he pronounce the name of God (Mishnah Sanh. vii. 5). The Gemara goes further and extends the crime to an impious use of any words which indicate the sacred attributes of God, such as "The Holy One" or "The Merciful One." As long as the Jewish courts exercised criminal jurisdiction, the death penalty was inflicted only upon the blasphemer who used the Ineffable Name; but the blasphemer of God's attributes was subjected to corporal punishment (Sanh. 56a). According to Talmudic tradition, the Sacred Name was in early times known to all; but later its use was restricted (Ḳid. 71a; see Adonai; Name of God).

Even in taking testimony during the trial of a blasphemer, the witnesses who heard the blasphemy were not permitted to repeat the very words, but an arbitrary phrase was adopted to indicate the blasphemy. Thus, R. Joshua ben Ḳarḥah said: "Throughout the examination of the witnesses, 'Yosé' should be used for Yhwh, and they should say, 'Yosé shall strike Yosé,' to indicate the blasphemy" (Mishnah Sanh. *ib.*). At the conclusion of the trial sentence of death could not be passed by such testimony only, and it thus became necessary for one of the witnesses to use once the very words which they had heard. The court directed all persons not immediately concerned in the trial to be removed, and the chief witness was then addressed thus: "State literally what you heard"; and when he repeated the blasphemous words the judges stood up and rent their garments, that being the common sign of mourning. And the rents were not sewed up again, indicating the profound degree of the mourning. After the first witness had thus testified, the second and the following witnesses were not called on to repeat the identical words; but were obliged to say, "I also heard it thus" (Mishnah Sanh. *ib.*).

The text of the law in Leviticus provides that the stranger, as well as the native born, is liable to punishment for blasphemy. Talmudic tradition states that blasphemy was one of the seven crimes prohibited to the Noahides (Sanh. 56a), *i.e.*, according to natural law. Although, according to Jewish law, a Jew who blasphemed a heathen deity was not guilty of the crime of blasphemy, Josephus ("Ant." iv. 8, § 10, after Philo, "Vita Mosis," 26; ed. Mangey, ii. 166) to the contrary notwithstanding, yet a heathen might be guilty if he blasphemed the name of the Lord (Baraita Sanh. 56a). The crime of the heathen blasphemer, though subjecting him to the penalty of death, did not oblige the Jewish bystanders to rend their garments. The Talmud bases the custom of rending the garments in such cases upon the Biblical precedent in II Kings xviii. 37), where Eliakim and others rent their garments when they heard the blasphemy of Rab-shakeh; and in order to bring this view into harmony with the practise requiring the rending of garments only on hearing a blasphemy by a Jew, the Talmud states that Rab-shakeh was an apostate Jew (Sanh. 60a).

According to R. Ḥiyya, the rending of garments was no longer required after the fall of the Temple ("He who hears blasphemy nowadays is not obliged to rend his garments, because otherwise his garments would be nothing but tatters," Sanh. *ib.*); for the criminal jurisdiction of the Jewish courts had ceased, and the fear of death no longer deterred the blasphemers. The later law, however, restored the practise of rending the garments. In an opinion rendered by Gaon Rab Amram ("Teshubot Geone Mizraḥ Uma'arab," collected by Joel Müller, No. 103) he says, "He who hears his neighbor blaspheme must excommunicate him in these days, no matter what language was used. This is the practise of the pious. It is not necessary that the blasphemy be in Hebrew, and it makes no difference whether the Ineffable Name or the attributes of God be mentioned, whether the offender be a Jew or a non-Jew, whether the language be Hebrew or any other. These distinctions were made to distinguish the capital crime from the lesser offense; but for purposes of excommunication, it makes no difference whether the blasphemer be a heathen or a Jew, whether he use the Sacred Name or the attributes, nor what language he uses; he must be excommunicated." And this opinion is, with slight modification, repeated in the Yoreh De'ah (340, 37) as follows: "He who hears the Name blasphemed, or even an attribute of God, such as 'The Forgiving One,' 'The Merciful One,' etc., even if pronounced in a foreign language, must rend his garments, provided he hear it from an Israelite (and an apostate is in these days considered a heathen); and even if he hear it from the mouth of the witness stating how the blasphemer blasphemed. But the witnesses testifying in court need not rend their garments again, having once done so when they first heard the blasphemy."

The excommunication of the blasphemer was substituted as a punishment for the death penalty (see Excommunication), rendering it unnecessary for the witnesses to repeat the identical words of the blasphemy, as this was required only when the death penalty was inflicted (Pitḥe Teshubah to Yoreh De'ah, 340, 37). Abba Saul was of the opinion that, in addition to the punishment inflicted by human power, the blasphemer is also excluded from the life in the world to come ('Ab. Zarah 18a). See Sacrilege, Infidelity, Scoffing; Shem ha-Meforash.

K. D. W. A.

BLAU, FRITZ: Austrian chemist; born at Vienna April 5, 1865. He received his education at the gymnasium and university of his native city, and was graduated as doctor of philosophy in 1886, becoming a member of the university of the Austrian capital as privat-docent in chemistry in 1890.

Blau has contributed essays to the "Monatshefte für Chemie der Kaiserlichen Akademie der Wissenschaften" ("Studien über Pyridinabkömmlinge," "Neuerungen beim Gebräuchlichen Verbrennungs-Verfahren"); the "Berichte der Deutschen Chemischen Gesellschaft in Berlin" ("Zur Constitution des Nicotin "), etc.

Bibliography: Eisenberg, *Das Geistige Wien*, s.v., Vienna, 1893.

S. F. T. H.

BLAU, HEINRICH: German journalist and playwright; born in Neu-Stettin, Pomerania, Sept. 21, 1858. He received his education at the Jewish school and the Sophien Realschule in Berlin, whither his parents had removed when he was a small child. When only thirteen years of age he wrote a metric translation of the Psalms. Blau in 1878 went to London, where he found employment on the "Londoner Journal," a German paper, whose chief editor he became later. Since then he has been engaged on the staffs of various German publications in the English capital.

Blau soon became a proficient journalist, writing both in English and in German; acting as correspondent of papers in Germany, and contributing to such English reviews as the "Nineteenth Century" and the "Contemporary." He also translated literary works from and into English and German, besides writing feuilletons. During all this time he studied Sanskrit and Oriental literature; and the result was shown in "Gautama," a dramatic poem in German in four acts.

Blau is the author of a drama in German blank verse, "Thomas Chatterton," and of "Some Notes on the Stage and Its Influence upon the Education of the Masses," and "Some More Notes" on the same subject, for which essays he received a gold medal from a London society. He also wrote libretti for light operas—"San Lin" and others—and the texts of the opera "Das Erbe Judas" and the oratorio "Samuel," as well as the dramas "Scherben," "Bianca Capello," "Die Prophezeiung," and "Götzen."

In 1893 Blau came on a visit to the United States, but remained only a short time.

S. F. T. H.

BLAU, LUDWIG: Hungarian scholar and publicist; born April 29, 1861, at Putnok, Hungary; educated at three different yeshibot, among them that of Presburg, and at the Landesrabbinerschule in Budapest (1880–88); studied philosophy and Orientalia at the Budapest University; received there the degree of Ph.D. *cum laude* in 1887, and the rabbinical diploma in 1888.

In 1887 Blau became teacher of the Talmud at the Landesrabbinerschule, in 1888 substitute, and in 1889 professor of the Bible, the Hebrew and Aramaic languages, and the Talmud. Since 1899 he has also been librarian and tutor in Jewish history. He is (1902) president of the folk-lore section of the Jewish-Hungarian Literary Society, and (since 1891) editor of the "Magyar Zsido Szemle." Blau's scientific publications have dealt chiefly with the literature and life of the Jews in the Talmudic and early post-Talmudic periods (*e.g.*, "Beiträge zur Erklärung der Mechilta und des Sifre," in the Steinschneider "Festschrift," 1896; "Quelques Notes sur Jésus ben Sirach," in "Revue Etudes Juives," xxxv. 19–47; "Das Altjüdische Zauberwesen," Strasburg, 1898), with the Jewish traditions regarding the Masorah ("Massoretische Untersuchungen," Strasburg, 1891; "Masoretic Studies," in "Jewish Quarterly Review," viii., ix.), and the canon of Scripture ("Zur Einleitung in die Heilige Schrift," Strasburg, 1894). This latter work is especially valuable for the light it throws upon the history of the Bible text in the early synagogue. Blau has also published "Der Concursus Vitiorum nach Talmudischem Recht," Budapest, 1887; and "Die Erwählung Israel's" (in Hungarian), *ib.* 1890; and has contributed to the "Monatsschrift," "Zeitschrift für Hebräische Bibliographie," "Jahrbuch des Ungarischen Litteraturvereines," "Jahrbuch der Deutschen Litteraturvereines," etc.

S. G.

BLAUSTEIN, DAVID: Educator; born May 5, 1866, at Lida, near Wilna, Russia. He received his first education in Hebrew in the ḥeder and yeshibah of his native town; went at the age of eighteen to Prussia, where he studied Hebrew and rabbinical literature under Israel Lipkin; subsequently, on his removal to Mecklenburg-Schwerin, he studied Jewish history and philosophy under Dr. Feilchenfeld. Being still a Russian subject, he was ordered to leave Germany, and in 1886 came to the United States and settled in Boston, where he opened a private school. He actively engaged in educational and communal work, being one of the founders of the Sheltering Home for Immigrants. About 1890 he entered Harvard University, but left it after three years to devote himself entirely to congregational work at Providence, R. I., where from 1892 to 1896 he acted as rabbi, and became a member of the executive board of the Society for Organizing Charity. In 1896 he was appointed lecturer on Semitic languages at Brown University, and in 1898 became connected with the Educational Alliance of New York, where he fills the office of superintendent. Blaustein went to study the conditions of the Rumanian Jews in the summer of 1900, visiting for this purpose Bucharest and other cities, accompanying Mr. Wachthorn, delegated by the United States government to study the Jewish question.

Bibliography: *Jew. Chron.* Sept. 21, 1900.

A. B. B.

BLAUSTEIN, OZER: Russian teacher, and writer in Russian and Judæo-German; born at Dünaburg in 1840; died in Warsaw April 27, 1899. His Russian grammar was recommended for Jewish public schools by the Ministry of Public Instruction. He is the author also of a "German Method" and a "Manual for the Study of Hebrew"; and has translated into Russian the Hebrew prayer-book and the Maḥzor. Of his numerous novels, published in the Judæo-German dialect, may be mentioned: "Der Armer Gvir," Wilna, 1893; "Die Gvald-Shiduchim," Wilna, 1880; "Der Suhn als Schadḥan," 2d ed., Wilna, 1893; "Der Bitterer Tropfen," Wilna, 1894; "Die Waisse mit die Schwarze," Wilna, 1894; "Der Baal Tove," Wilna, 1895.

Bibliography: *Aḥiasaf*, 1900, p. 378.

H. R.

BLAYNEY, BENJAMIN: English divine and Hebraist; born 1728; died Sept. 20, 1801. He was educated at Oxford, took the master's degree in 1735, and became fellow and vice-principal of Hertford College in 1768. He was employed by the Clarendon Press to prepare a corrected edition of the Authorized Version. This appeared in 1769, but most of it was destroyed by fire in the Bible warehouse, Paternoster Row, London. Blayney then studied Hebrew, and in 1787 took his degree as doctor of divinity.

His principal works are: "A Dissertation by Way of Inquiry into the True Import . . . of Dan. ix. 24 to the End," etc., 1775–97, which was translated into German by J. D. Michaelis; a new translation of Jeremiah and Lamentations, 1784; an edition of the Samaritan Pentateuch in Hebrew characters, 1790; a new translation of Zechariah, 1797. He was a good scholar and a useful writer.

Bibliography: *Gentleman's Magazine*, lxxi. 1054; lxxiii. 1108; *Dict. Nat. Biog.* v. 208.

BLAZON. See Coat of Arms.

BLEEDING: In accordance with the pathology of its epoch, the Talmud declares, "At the head of the list of human ailments stands plethora (B. B. 58b). The Rabbis say elsewhere (Bek. 44b), "Where there is an abundance of blood, there is also an abundance of eczema." Bloodletting is therefore considered of great importance; and the scholar is forbidden to reside at a place where no bloodletter ("uman," surgeon) is at hand (Sanh. 17b; Maimonides, "Yad," De'ot, iv. 23). The following are the rules, partly pathological and partly astrological or demonological, which the Rabbis recommend for the operation.

Necessity and Time of Operation.

A man ought to be bled once every month, but with advancing years the intervals must be extended. The first, fourth, and sixth days of the week are the most appropriate for the operation. On the fourth day of the week, which falls on the fourth, fourteenth, or twenty-fourth of the month, or after which remain less than four days till the new moon, there must be no bloodletting, since at such times it is dangerous. On the first and second days of the month the operation is enervating, and on the third day dangerous. The operation is not permitted on the eve of a Biblical festival; neither must it be performed on a cloudy or a stormy day, or soon after eating a hearty meal, after partaking of cress, or while suffering with fever, while having sore eyes, or while exposed to a draft (Shab. 129a; Yeb. 72a; Ned. 54b; 'Ab. Zarah 29a). On entering the operating-room, the patient must offer the following prayer: "May it please Thee, O Lord my God! that this my project effect healing unto me; and do Thou heal me, for Thou, O God! art the true Physician, and Thy healing is true." After the operation one should say, "Blessed be the gratuitous Healer" (Ber. 60a; Maimonides, "Yad," Ber. x. 21; Oraḥ Ḥayyim, 230, 4).

Dietary Rules After Operation.

Immediately after the operation one should drink one-fourth of a log of red wine, as a substitute for the red blood lost. This is of so much importance that the very poor patient who can not buy the wine is permitted to obtain the prescribed quantity by calling at shops and tasting the wine, on pretense of intending to purchase a large supply. Or, failing in this, he must eat seven black dates, anoint his temples with oil, and then sun himself, in order to become thoroughly heated. Under ordinary circumstances, however, eating is to be deferred until such time has elapsed after which one can walk half a mile. A little rest after the operation is heartily recommended. Washing the hands is considered to be of almost equal importance, the omission of which will render the patient nervous for seven days (Shab. 129a; Pes. 112a; Oraḥ Ḥayyim, 4, 19). One must eat a good meal after the operation. So urgent are the Rabbis concerning this particular injunction that, although they have laid down the rule that a man should sell the roof of his house to buy himself shoes in case of necessity, they also prescribe that, if necessary, a man should sell his shoes in order to procure a good meal after bloodletting. Furthermore, they assert that the one who makes light of the meal on such an occasion will receive but slight sustenance from Heaven; if he does not prize his life, why should Heaven prize it? For this meal meat is recommended, or a dish of milt; but the flesh of fowls will produce palpitation of the heart. Fish is said to be beneficial when eaten a day before or a day after bleeding; but on the third day it is to be avoided as dangerous. Milk, cheese, onions, and cress are dangerous after the operation, and he who is imprudent enough to partake of them must drink a mixture made of one-fourth of a log of wine and the same quantity of vinegar (Shab. 129a; Ned. 54a; 'Ab. Zarah 29a).

Nearly all of these rules emanate from Rab and Samuel, who were among the earliest and most prominent Babylonian amoraim (third century). But not all of them met with general approval. A century later it was said of them, "Now that many trample these precepts under foot, and yet escape serious hurt, one can realize the truth of the psalmist's saying (Ps. cxvi. 6), 'The Lord preserveth the simple'" (Shab. 129b; Yeb. 72a). See Brecher, "Das Transcendentale im Talmud," § 57, and ABBA THE SURGEON (UMANA).

G. S. M.

BLEEK, FRIEDRICH: Christian theologian; born July 4, 1793, at Ahrensböck, Holstein; died at Bonn in 1859. After a preparatory course at the gymnasium of Lübeck and two years of philosophical study at Kiel, he entered the University of Berlin, where he studied under Schleiermacher, De Wette, and Neander; becoming tutor at the university in 1818, and assistant professor in 1823. In 1829 he was appointed professor of theology at Bonn, which position he held until his death.

The researches of Bleek were devoted principally to the Old and New Testaments. His work in the former field only will be considered here. Bleek first became known through his series of investigations on the origin and compilation of the Sibylline Books ("Ueber die Entstehung und Zusammensetzung der Sibyllinischen Orakel," in "Berliner Theologische Zeitschrift," 1819–20), which work, as the first systematic endeavor to illuminate this obscure field, must be regarded as epoch-making. Next followed the two treatises, "Ueber Verfasser und Zweck des Buches Daniel" ("Berliner Theologische Zeitschrift," 1822) and "Einige Aphoristische Beiträge zu den Untersuchungen über den Pentateuch" (Rosenmüller, "Repertorium," 1822). In 1831 appeared in the "Theologische Studien und Kritiken" his "Beiträge zu den Forschungen über den Pentateuch," an endeavor to point out such portions of the Pentateuchal legislation as may be traced to the authorship of Moses.

Bleek also made an important contribution to the history of the criticism of the Pentateuch in his program for the University of Bonn (1836), entitled "De Libri Geneseos Origine atque Indole Historica Observationes Quædam contra Bohlenium," in which he vigorously defends the supplementary hypothesis of Von Bohlen, although sharply controverting the late epoch assigned by the latter to the various portions. In 1852 he published in the "Studien und Kritiken" the dissertation "Ueber das Zeitalter von Sacharja Cap. 9–14, Nebst Gelegentlichen Beiträgen zur Auslegung Dieser Aussprüche."

In 1860, shortly after the death of Bleek, his son Johannes, and his foremost pupil and subsequent successor, Adolf Kamphausen, edited, from the manuscript of his class-room lectures, the "Einleitung in das Alte Testament" (4th ed., 1878; edited by Wellhausen). The lucidity, thoroughness, and thoughtfulness with which all the results of the so-called "Vermittlungstheologie" are combined in this work, have served to make it highly popular and useful. The eminently reliable scientific works of Bleek are characterized by extensive learning, thoroughness, ingenuity, and incorruptible veracity.

K. I. BR.

BLEICHRÖDER, GERSON, BARON VON: German banker; born Dec. 22, 1822; died Feb. 19, 1893, in Berlin. At the age of sixteen he entered the banking firm founded by his father, and on the death of the latter, in 1855, assumed its management. It was due to his large experience and practical ability that the firm acquired a world-wide reputation.

Bleichröder enjoyed the full confidence of Prince Bismarck, and is said to have been a close friend of the emperor William I., who often consulted him on important financial operations. In 1865 he went, at the invitation of King William, to Carlsbad, and, to extricate the government from a financial embarrassment, proposed the cessation of its participation in the Köln-Minden railroad interests. In 1867 he was made commercial privy councilor (*Geheimer Commerzienrath*). It was owing to these circumstances and to his connections with the Rothschilds that after the Franco-Prussian war (1870–71) Bleichröder was summoned to Versailles as financial adviser on the question of the war indemnity. For the services thus rendered in the peace negotiations the Prussian government conferred upon him the Iron Cross. In 1872 he was created a hereditary nobleman in recognition of his financial services to Rumania, which helped to consolidate the Hohenzollern dynasty in that country.

Bleichröder took much interest in the fortunes of his coreligionists, and his high position in the financial and political world was of great value to the representatives delegated by the Alliance Israélite Universelle to follow, in the interests of the persecuted Jews of the eastern states, the proceedings of the Berlin Congress. Many decorations were conferred upon him by various European governments; and for nearly a quarter of a century he filled the position of British consul-general in Berlin. He left a fortune estimated at 70,000,000 to 100,000,000 marks.

S. B. B.

BLEMISH: The Hebrew term for "blemish" (מום or מאום) seems to have originally meant a "black spot" (compare Gesenius-Buhl, "Handwörterbuch," *s.v.*). It denotes anything abnormal or deviating from a given standard, whether physical, moral, or ritualistic. Biblical legislation makes certain kinds of blemishes a ground of disqualification of animals for sacrifice, and of priests for the performance of the priestly functions. It moreover prescribes qualifications for certain inanimate things that come upon the altar, the absence of which qualifications constitutes a blemish, or disqualification. Some of the blemishes are constitutional; others are transitory. All the physical blemishes in animals and priests are external bodily defects.

Blemishes Disqualify for Sacrifice.

The later Halakah, however, considers blemishes in priests with regard also to the priestly blessing pronounced in temple and synagogue; in Levites with regard to their service in the Temple; in persons in general with regard to the vitiating effect of such blemishes on the marriage-contract; and, finally, internal ones in animals.

Blemishes in Animals. (*a*) **Bodily Blemishes:** The bodily defects disqualifying an animal from being offered as sacrifice are enumerated in Lev. xxii. 20-25. The Halakah has extended them to seventy-three, of which number fifty are blemishes also in priests (Bek. v.; Maimonides, "Yad," Issure ha-Mizbeaḥ, ii.). In addition to these external defects the Halakah adds such internal defects as cause the animal to be unlawful for food (see Ṭerefah); and the absence of any internal organ. The reason for the requirement of faultlessness in sacrificial animals is given in Mal. i. 8: "If ye offer the blind for sacrifice, is it not evil? and if ye offer the lame and sick, is it not evil? offer it now unto thy governor: will he be pleased with thee, or accept thy person? saith the Lord of hosts."

The laws of "ṭerefah" are also applicable to fowl; but the seventy-three blemishes are not. If, however, the fowl have a marked defect—as a blind eye, an atrophied wing, the loss of a leg—it is disqualified on the general principle that a sacrifice must be "perfect" (Maimonides, *ib.* iii.).

Laws of Ṭerefah.

(*b*) **Ritualistic Blemishes:** The disqualifications under this head are: unnatural birth; hybridity, actual or suspected; indefinability of sex; carnal use by man or woman; having been worshiped as a deity, or set aside for idolatrous practises; if acquired as harlot's wages, or in exchange for a dog (Deut. xxiii. 19 is taken by the Halakah in its literal sense), or by stealth or robbery; if it have killed a man; if it be younger than seven full days; if it be not of the best kind obtainable (Maimonides, *ib.*).

(*c*) In the case of first-born animals, all the blemishes that disqualify sacrifices are also disqualifications in first-born, with this difference, that the blemishes in the latter must be constitutional, and the fact of its being first-born must be established beyond a doubt ("Yad," Bekorot, ii.).

The disqualifications in meal-offerings, oblations, incense, and altar-wood are: Levitical uncleanness, which in this case extends even to incense and wood; spoiled condition, or change from natural state; lack of prescribed ingredients, or presence of leaven and honey; lack of required fineness in materials; wine left uncovered; produce of the first three years (ערלה), or of the new harvest before the first fruits are offered; produce grown in a field with mixed seed (כלאים), or untithed ("Yad," Issure ha-Mizbeaḥ, v., vi.).

Blemishes in Sacrificial Materials.

Expert examiners were appointed to investigate blemishes, who were paid out of the Temple funds (Ket. 106a), but for the inspection of first-born animals they took a fee also from their owners ("Yad," Bekorot).

Blemishes in Priests. (*a*) **Bodily Blemishes:** The twelve blemishes enumerated in the Bible (Lev. xxi. 17-23) were extended by the Halakah to 142 (Bek. vii.; "Yad," Biat ha-Miḳdash, vii., viii.). Besides, persons suffering from mental debility (שוטה) were not tolerated as priests.

In the Second Temple a special chamber was set apart in the court in which the Great Sanhedrin examined all priests. Those who were declared to be unfit for the sacred office put on black garments, wrapped themselves in a black cloak, and went away in silence, to be subsequently employed for such services as selecting wood for the altar. Those found perfectly qualified put on white garments and a white cloak, and at once joined their brethren to assist in the sacred functions. They gave to their friends a feast, which they opened with this benediction: "Blessed be the Lord because no blemish has been found in the seed of Aaron the priest, and blessed be He because He has chosen Aaron and his sons to stand and to serve before the Lord in His most holy sanctuary" (Mid. ii. 5, v. 4).

In the Second Temple.

(*b*) **Ritualistic Blemishes:** The disqualifications under this head are: Levitical uncleanness; birth in unlawful wedlock (חלל), or in an unnatural way (יוצא דופן); uncertainty as to sex (אנדרגינוס = טומטום, see Androgynos); state of mourning; or of inebriety; disheveled hair, and rent garments ("Yad," Biat ha-Miḳdash).

In this connection may be mentioned the incident with King John Hyrcanus, to whom a Pharisee remarked that he should be satisfied with royal power and give the high-priesthood to some one else, since, as rumor had it, his mother had been once a captive in Modin; the purity of his birth, therefore, was not beyond cavil, and he was not entitled to hold the sacred office (Ḳid. 66a).

(*c*) **Moral Blemishes:** The Pentateuch makes no mention of moral blemishes; but it is known that priests convicted of idolatry, homicide, or any other great offense were not permitted to officiate (see II Kings xxiii. 20; Ezek. xliv. 13).

(*d*) **Blemishes in Regard to Priestly Blessing:** The following six blemishes disqualify a priest from pronouncing the blessing in temple or synagogue: Defective articulation of speech; malformation of face, hands or feet, or unusual appearance of hands (when, for instance, they are discolored with dye, for thus they attract the attention of the audience); moral delinquency, as idolatry or murder: insufficiency of age (his beard must be fully grown); state of inebriety; and not having washed his hands. A חלל, an offspring of an unlawful marriage, is debarred from the pronunciation of the blessing, because he is not considered a priest at all (Maimonides, "Nesiat Kappayim," xv.).

(*e*) **Reason for Disqualification:** According to Philo ("De Monarchia," ii. 5) and others, the faultlessness of the body was meant to be a symbol of the perfection of the soul. Maimonides ("Moreh," iii. 45) explained it as being designed to make the Temple honored and respected by all: for the multitude does not appreciate a man for his true worth, but for the perfection of his limbs and the beauty of his garments. The correctness of such views has been disproved by Bähr ("Symbolik des Mosaischen Cultus," ii. 55) and Kalisch (commentary on Lev. ii. 465; compare also Philippson, "Der Pentateuch," p. 639). According to Kalisch, everything associated with the perfect God was to be perfect, and above all His ministers, who approached His altars to present faultless offerings, and "came near" the curtain which shrouded His mysterious presence. They were to be perfect not only in their lives, but also in their persons, which were to be the fit abodes of pure souls, and reflect the divine similitude and holiness. They were to be distinguished by health and harmony, vigor and freshness.

Other Blemishes.

Blemishes in Levites. The blemishes disqualifying Levites from performing their official functions were only two: transgression of the prescribed age limits and loss of voice (Ḥul. 24a).

With reference to blemishes invalidating the marriage-contract, or yielding a sufficient ground for divorce, man and woman are treated unequally. In regard to woman, all the bodily defects considered blemishes in priests apply also to her, and, besides, several other blemishes are added, such as make intercourse with her unbearable to the husband. In the case of man, however, only a few blemishes are mentioned (Ket. vii. 7-10, 75a-77; "Yad," Ishut, vii.; compare "Eben ha-'Ezer," 39).

K. C. L.

[Blemish, or "mum," in rabbinical literature assumed also a spiritual meaning. "Whosoever is proud has a blemish," says R. Ashi with reference to Bar Kappara's homily on Ps. lxviii. 17 [16]. He explains the passage, "Why leap ye, ye high hills?" as follows: "Why do you enter into a dispute with the hill God desireth to dwell on? Since you are all swollen with pride" (the word "gabnunim" being taken as identical with "gibben" ["crookbacked," Lev. xxi. 20]), "that is, since you have a blemish which unfits you to be God's mount, while Mount Sinai is humble and has therefore been chosen by God as His seat of revelation" (Meg. 29a). Abraham before his circumcision was not altogether without blemish. Circumcision fitted him for his high mission as father of the priest-people (Gen. R. xlvi.).

Hence the ethical maxim (B. M. 59b), "Mum shebak al tomar le-ḥabrak" (Do not accuse thy fellowmen of the blemish that you have). Another maxim is, "Do not cast a blemish on thyself" (Pes. 112b).

The court of justice must be free from physical as well as from moral blemish, for it is said (Song of Songs iv. 7): "Thou art fair, my love; there is no blemish ["spot," A. V.] in thee" (Yeb. 101b). A common Hebrew adage is: "Kol haposel bemumo posel" (He who finds faults in others is influenced by the blemish in himself, Ḳid. 70b).—K.]

BLES, DAVID S.: Communal worker at Manchester; born at The Hague, Holland, in 1834; died at Vienna on Oct. 14, 1899. He was senior partner in the firm of Messrs. S. D. Bles & Sons, merchants and shippers of Manchester; from which firm he retired in 1897 in order to devote himself to philanthropic pursuits. Bles was a city magistrate for thirteen years, being elected in 1886; and for many years he held the office of vice-consul of the Netherlands.

In the year 1897 the queen of Holland conferred on Bles the Order of Orange and Nassau. He was president of the Manchester Jewish Board of Guardians; manager of the Manchester Jews' School; a trustee and member of the Council of Founders of the Manchester Reform Synagogue; a member of the Hospital Sunday Committee and of many other charitable organizations. He founded at the Victoria University a Bles Hebrew scholarship.

J. G. L.

BLESSING OF CHILDREN: In the domestic life of the ancient Hebrews the mutual respect existing between parents and children was a marked feature. While prominent among other Semitic peoples (Smith, "Rel. of Sem." p. 60), it was of first importance with the Hebrews, as is evident from the frequent mention of the duties toward parents (Ex. xx. 12, xxi. 15; Lev. xix. 3, xx. 9; Num. xxvii. 4; Deut. xxvii. 16; I Sam. ii. 25; II Sam. xix. 20; Jer. xxxv. 18; Mal. i. 6; Prov. i. 8, iii. 12, x. 1, xxix. 3, xxx. 11; I. Chron. xvii. 13). The natural accompaniment of this was the value placed on the favor of parents, and notably on their blessing pronounced upon the children. The words spoken by parents were supposed to be fraught with power to bring good or ill, blessing or curse. Happy was he who was so fortunate as to receive the father's blessing; wretched he upon whom rested the father's curse. These statements are based particularly upon incidents in the lives of the Patriarchs, as set forth in the Book of Genesis. Noah (Gen. ix. 26) blesses Shem and Japheth, the sons who had covered his nakedness, and curses Ham, the disrespectful son; and that blessing and curse were looked upon as determining the future superiority of the descendants of the two first-mentioned sons and the eternal servitude of the offspring of Ham. In the story of the blessing of Isaac (*ib.* xxvii. 7 *et seq.*), Rebekah makes every effort to secure the paternal benediction for her favorite (*ib.* xxiv. 60). The importance attached to the blessing appears also from Esau's heartrending cry, "Hast thou but one blessing, my father? bless me, even me, also, O my father" (Gen. xxvii. 38). The blessing, even though obtained by deceit, could not be recalled. The father's voice was the instrument through which God spoke; and the words, once pronounced, were regarded as the declaration of the Deity.

Among the Ancient Hebrews.

High Value of Paternal Blessing.

The paternal blessing was the most valuable heritage that parents could bequeath to children. In recognition of all the good that he had enjoyed at Joseph's hands and of all the honors received during his sojourn in Egypt, Jacob bestowed a particular blessing upon Joseph's sons: "Bring them, I pray thee, unto me, and I will bless them" (Gen. xlviii. 9). Especial importance attaches to this blessing of Ephraim and Manasseh by Jacob, because it became the formula by which, in later days throughout Israel, the children were blessed by their parents, in accordance with the word of the patriarch, "In thee shall Israel bless, saying, God make thee as Ephraim and as Manasseh" (*ib.* 20). And the favorite son Joseph was given the assurance, "The blessings of thy father have prevailed above the blessings of my progenitors unto the utmost bound of the everlasting hills; they shall be on the head of Joseph, and on the crown of the head of him that was separate from his brethren" (Gen. xlix. 26). It is thus evident from the whole spirit of Biblical ethics that the parents' good-will and blessing were regarded as the greatest happiness that could come to children, and it is well known to those who are at all familiar with Jewish domestic life that this sentiment continues to the present day.

In Later Jewish Literature.

The customs of a people do not always find expression in its literature. The very prevalent sentiments are frequently not set down in words, for the very reason that, being so commonly held, they do not call for comment. Fortunately, however, there are several expressions in later Jewish literature showing the value attached to the parents' blessing. The author of Ecclesiasticus undoubtedly voices the belief of his generation when he declares, "The blessing of the father builds houses to the sons, the curse of the mother destroys them" (Ecclus. [Sirach] iii. 9); and the Rabbis indicate their attitude by the remarkable statement, "Scripture ranks the cursing of father and mother with the cursing of God" (Ḳid. 30b). The feeling of reverence and awe for the parental benediction well expresses the sentiment that has always prevailed in most Jewish communities. One of the most beautiful of Jewish customs is the blessing of the children by the father on all important occasions, notably on the Sabbath eve, on the holidays, on the setting forth on a journey, etc. Ludwig Philippson's memoirs (in "Allg. Zeit. des Jud." 1887, p. 750) mentions that his grandfather blessed him on Sabbath morning after divine service. This blessing as pronounced upon the boys is, "May God make thee like Ephraim and Manasseh" (Gen. xlviii. 20), and upon the girls, "May God make thee like Sarah, Rebekah, Rachel, and Leah" (compare Ruth iv. 12); and, in addition to this regular formula, any special blessing may be added according to the desire of the one bestowing the benediction.

There is no means of knowing how old this beautiful custom may be. The earliest mention of it is found in a passage in the "Brautspiegel," a popular treatise on morals, written by Moses Henochs; the book appeared in Basel in 1602. In the forty-third chapter, which is devoted to advice on the training of children, the writer says, "Before the children can walk they should be carried on Sabbath and holidays to the father and mother to be blessed; after they are able to walk they shall go of their own accord with bowed body and shall incline their heads and receive the blessing (Güdemann, "Quellenschriften zur Geschichte des Unterrichts und der Erziehung bei den Deutschen Juden," p. 167). Buxtorf, in "Synagoga Judaica," which was first published in 1604, writes in the fifteenth chapter of the book entitled "How the Jews Prepare for the Sabbath and Begin It," the following:

Occasions for the Blessing.

"After the service [on Sabbath eve in the synagogue] is finished, they seek their home; in parting from one another they wish each other not good-day nor good-night, but a happy Sabbath: the parents bless their children, the teachers their pupils." At the beginning of the seventeenth century the custom was general. Another mention of it, at a much later date, occurs in the prayer-book of Rabbi Jacob Emden, printed first in Altona, 1748. A long passage in this book begins with the words: "It is the custom in Israel to bless the children on Sabbath eve after service or upon entering the house." He says further that this blessing brings God's spirit upon the children who are not yet old enough to secure it by their own deeds. This indicates that as in early Biblical days, so in later times, the parental blessing was believed to be invested with a certain higher power, and to be efficacious for good. To this day this blessing is prized highly by the children.

The value thus laid upon the benediction spoken by the father and mother represents the constancy in Jewish life of the working of forces that make for righteousness; and it is one of the constituent factors of what Lazarus has so well termed the "continuity of the Jewish spirit" ("Ethics of Judaism," pt. ii., p. 213).

K. D. P.

BLESSING AND CURSING: The Hebrew verb for "bless" is "berek" (בֵּרֵךְ). Since in Assyrian and Minæan the corresponding verb appears to be "karabu," it is not likely that the Hebrew is connected with its homonym "berek" (בֶּרֶךְ), which means "knee." The substantive "blessing" is "berakah" (ברכה). "To curse" is "arar" (ארר); substantives are "ḳelalah" (קללה), "me'erah" (מארה). Synonyms are קבב, קלל, אלה; and it is noteworthy that the word "curse" should have numerous synonyms, whereas for "bless" we have only one word. Both "blessing" and "cursing" were founded upon the belief that the individual, the tribe, or the nation could use its relation to the Deity or to the supernatural world for the benefit or the injury of others.

Efficacy of Blessing and Cursing.

It is readily understood that special efficacy attached to the blessing and cursing by sacred persons in close relations with the Deity—by the Patriarchs, by Moses, and by Aaron, by the priests and the Prophets in general, and also by a father; for not only was the father the priest of the family, but it was he who introduced his son to the Deity; and naturally it was supposed that he could influence the Deity to his son's benefit or injury.

Such blessing or cursing did not involve the use of empty words, but implied the exercise of a real power; the word once pronounced was no more under the control of the speaker (Gen. xxvii. 35), and must perforce accomplish its mission. On this conception is founded not only the possibility but also the whole structure of Jacob's deceit, as well as the story of Balaam. Even in later times the possibility seemed dreadful that Balaam, instead of blessing, might have cursed (Micah vi. 5; Neh. xiii. 2). At the same time the story of Jacob proves that blessing and cursing did not always rest on moral grounds. Noah (Gen. ix. 22 *et seq.*) and Jacob (Gen. xlix. 2 *et seq.*), it is true, were guided by the moral conduct of their sons; but Isaac was governed by caprice in his blessings. He was moved by the venison which Esau was to bring him and by his son's affectionate manner (Gen. xxvii. 26 *et seq.*).

Since cursing was considered a material power the unknown thief was cursed; and the mother of the Ephraimite Micah hastened to render the curse ineffective by a blessing after her son had confessed his sin (Judges xvii. 2). For this reason every alliance and every oath was accompanied by a curse directed against the person who should break the alliance or violate the oath; and the laws of Israel, and the treaties of the Assyrian and the Babylonians (compare Schrader, "K. B." vols. ii. and iii. *passim*), derived particular strength from the addition of a blessing and a curse (Lev. xxvi.; Deut. xi. 29 [compare 28]; Josh. viii. 34). Goliath cursed David "by his gods" (Sam. xvii. 43), and Balak desired Balaam to curse the Israelites, the enemies of Moab (Num. xxii. 6), because cursing was supposed to move the divine power for the injury of the enemy. Hence severe punishment was inflicted on those who cursed their parents (Ex. xxi. 17; Lev. xx. 9; compare Deut. xxvii. 16) or the authorities (Ex. xxii. 28).

However, with the gradual development of pure monotheism the conception of blessing and cursing came to be modified. While in early times it was the belief that a father by his blessings or his curses determined the fate of his son (Gen. xlix. 4, 7; Prov. xxx. 11), in later times the father became a seer (Gen. xlix. 1, xlviii. 17 *et seq.*). In fact, Prov. xxvi. 2, distinctly declares that "the causeless curse" will not be fulfilled.

BLESSING, JACOB'S. See JACOB, BLESSING OF.

BLESSING, MOSES'. See MOSES, BLESSING OF.

BLESSING, PRIESTLY (called, R. H. iv. 5, **Birkat Kohanim**; now **Dukan**): One of the most impressive and characteristic features of the service both in the Temple of Jerusalem and in the synagogue, having its origin in the blessing pronounced by the Aaronites in accordance with the command and the formula ordained in Num. vi. 22-27: "And God spake unto Moses saying, Speak unto Aaron and unto his sons, saying, On this wise shall ye bless the children of Israel, saying unto them: The Lord bless thee and keep thee: the Lord make his face shine upon thee and be gracious unto thee: the Lord lift up his countenance upon thee, and give thee peace! And they shall put my name upon the children of Israel; and I will bless them." Thrice in the Pentateuch the priestly blessing is mentioned: once in speaking of Aaron (Lev. ix. 22; compare Sifra, Shemini, and Soṭah 38a), and twice in referring to the priests (Deut. x. 8, xxi. 5). In the historical books of the Bible there are two references to the blessing of the people by the priests (Josh. viii. 33; II Chron. xxx. 27).

In Temple and Synagogue.

Many rules were observed by the priests when pronouncing the blessing. These rules made some distinctions between the service in the Temple of Jerusalem and the services elsewhere. Thus, in the Temple the blessing was spoken after the sacrifice of the daily offering (Soṭah vii. 6; Tamid v. 1, vii. 2; Meg. 18a); elsewhere it was pronounced during the daily morning service and on Sabbath and holidays at every service, with the exception of that in the afternoon, because this followed shortly after the midday meal, at which the priests were permitted to drink wine; and it was feared that this might unfit them to perform the function properly. On fast-days, however, the blessing was pronounced also at the afternoon service (Ta'anit 26a, b; Maimonides, "Yad," Tefillah, xiv. 14; Shulḥan 'Aruk, Oraḥ Ḥayyim, 39, 1). In the Temple the priests used the Tetragrammaton, YHWH, pronouncing it distinctly in uttering the blessing; elsewhere the pronunciation ADONAI was substituted (Soṭah, 38a; Num. R. xi. 4; Sifre, Naso, 39; "Yad," *l.c.* 10). According to one report, the priests discontinued using the Tetragrammaton, even in the Temple, after the death of Simon the Just, in order that no man who was not respected and worthy might learn it (Yoma 39b). In the Temple the three portions of the blessing were spoken without pause, and at the close the people responded: "Blessed be the Lord God, the God of Israel from eternity to eternity" (see DOXOLOGY). Elsewhere the priests paused after each sentence, and the people responded with an "Amen."

Restrictions and Regulations.

The blessing was given with uplifted hands. In the Temple service the priests raised their hands above their heads, while in other places they lifted them only to their shoulders. Any Aaronite who had attained manhood's estate was enjoined to perform the function; there were, however, certain disqualifications due to physical, moral, or ritualistic defects (Meg. 24b; Ber. 32b; "Yad," Tefillah, xv. 1-6; Shulḥan 'Aruk, Oraḥ Ḥayyim, 128, 30-41; see BLEMISH); viz., if a priest had ever killed a human being (even though unintentionally), committed idolatry, violated any of the Levitical purity or marriage laws pertaining to the priests, committed any crime without having repented, or had indulged unduly in drinking wine (this is based upon the juxtaposition of the chapter on the Nazarite, Num. vi. 1-21, and the priestly blessing, Ta'anit 26b, 22-27); if he were crippled, a hunchback, or blind even in one eye, or had any defect on his hands, or if his speech were not distinct; and, finally, without ablution of the hands, he was disqualified. (Compare Blemish.) Should any priests who were thus incapacitated, or who considered themselves unworthy, be present at the service, they were compelled to leave before the reader in his prayer gave the signal to the priests; for otherwise they would violate the command, "Thus shall ye bless the children of Israel."

The blessing was to be spoken standing, as were the blessings in Deut. xxvii. (Soṭah 38a; Sifre, *l.c.*; Num. R. *l.c.*). The priests faced the congregation out of respect for the people; but the latter were not allowed to look at the priests while the blessing was spoken, lest their attention should be distracted and their devotions disturbed ("Yad," *l.c.* xiv. 7). In all motions connected with the blessing, such as advancing to the platform, or turning toward the Ark or the congregation, the priest was always to go to the right ("Yad," *l.c.* xiv. 13 after Soṭah 15b).

The blessing was to be spoken in Hebrew because of the command "thus"; that is, only in the prescribed words and language. It was to be pronounced in a loud voice so that all the congregation could hear. The priests were required to discard their leather foot-wear (sandals) when they ascended the platform to pronounce the blessing (Soṭah 40a). They were required to wash their hands before proceeding to the performance of the function (Soṭah 39a).

Its Place in the Liturgy.

Originally the priestly blessing was a function performed every morning at the regular service, provided the necessary number of ten persons were present (Shulḥan 'Aruk, Oraḥ Ḥayyim, 128, 1). But in the course of time, as the daily business became too pressing to allow the people to spend so much time on their devotion, the blessing was merely recited by the reader and introduced by a brief prayer such as is inserted in the common daily ritual; and the priestly blessing was reserved for Sabbath and holy days (Ḳol Bo, 128). Finally, in view of the fact that on the festival days people are better disposed, both in body and in soul, for the reception of the divine blessing, owing to the purifying ablutions of the previous day and to their greater cheerfulness of spirit, the festival day alone was retained for the imparting of the priestly blessing, and not the "Shaharit," but the "Musaf" service was selected, on which occasion the attendance is large (see Bet Josef, Ṭur Oraḥ Ḥayyim, *l.c.*; Moses Isserles, to Shulḥan 'Aruk, Oraḥ Ḥayyim, i. 44, and the commentators; also Magen Abraham, for the reason why the blessing is not imparted when the holy day falls on the Sabbath). In Amsterdam and other places the blessing is recited every Sabbath.

The main idea pervading the whole function of the priestly blessing rests upon the Name of God (Shem ha-Meforash), which is to be "put upon the children of Israel." While originally every greeting or blessing was accompanied by the pronunciation of the Name to make it efficient (see Ber. ix. 4; compare Ps. cxviii. 26), it became later only the privilege of the priests to use the Name in blessing the people; and the reverential sanctity attached to the Name lent to the priestly function a mystical and almost magical power. Hence the belief prevailed that during the lifting up of the hands by the priests, the Shekinah was hovering over their heads and its rays streamed through their open fingers, the people not being allowed to look on lest, like those who gazed at the sacred Ark in ancient times, they might be hurt, struck with dimness of the eyes and other misfortunes (Ḥag. 16a; Soṭah 39b; Yer. Meg. iv. 75c; Cant. R. ii. 9; Num. R. xi.; "'Aruk," *s.v.* חלון; see, however, Tosef., Ḥag. 16a; and Yer. Meg. *l.c.*, for more rationalistic views regarding the time when the Name was no longer pronounced). That great magical powers were long afterward ascribed to the priestly blessing may be learned from the advice given in the time of Rab Ashi to those troubled by bad dreams; viz., to offer a prayer that God might turn every curse into blessing (Ber. 55b)—a prayer which has been embodied in the common ritual, and is still recited during the singing of the blessing; the medieval mystics having added strange, fantastic, angelic conjurations to make it still more efficacious.

Another opinion (Cant. R. on iii. 7; Num. R. xi. 9) is that the mere listening to the priestly blessing is a charm against every malign influence, the sixty letters of the blessing being "the threescore valiant men, each his sword upon his thigh because of the fear in the night" (Song of Songs iii. 8).

Even the haggadic comments and the Scripture parallels given in Soṭah 39b–40a, Sifre and Num. R. *l.c.*, to the priestly blessing have been embodied in the ritual; and they are, partly on the recommendation and partly with the disapproval of the Rabbis, recited during the singing of the blessing by the priests (see Tos. Soṭah 40a; Ḳol Bo, *l.c.*, and Abudarham).

After the "Modim," the reader introduces the priestly blessing with the words: "Our God and God of our fathers, bless us with the threefold blessing which is in the Torah, written by Moses, Thy servant, spoken by Aaron and his sons, the priests, Thy holy people." Then the Aaronites proceed to the platform and offer the following invocation silently: "May it be Thy will, O Eternal our God, that this blessing wherewith Thou hast commanded us to bless Thy people Israel may be a perfect blessing; may it be imparted without stumbling and error now and ever" (Soṭah 39a). The benediction is also prescribed which the priests recite before giving the blessing.

In the Reform ritual the priestly blessing is usually recited by the rabbi at the close of each service before the dismissal of the congregation; the assumption being that the Aaronites have ceased to possess special claims and obligations as priests, since with the destruction of the Temple the people of Israel became the priest-nation (see Conferences, Rabbinical).

The great danger in all blessings by priests lies in the possibility that the people may believe such blessings to have mediatorial power. This idea has always been foreign to the spirit of Judaism. The priest is not a mediator. The blessing which he utters has no magical power for good or ill. It is merely a portion of the prescribed ritual. Not the priest, but God, blesses (see Sifre, *l.c.*): "I (God) will bless them." These words are used so that the Israelites may not say that their welfare depends upon the blessing by the priests; God alone can bless. Furthermore, these words are used that the priests may not say, "We will bless Israel." From God alone do blessings flow: no man has power to bestow them (Sifre, *l.c.*; Ḥul. 49a, where, in opposition to R. Ishmael (the priest), R. Akiba interprets the words "And I will bless them" as referring to Israel and not to the priests, since these could merely pronounce the blessing, while the real blessing comes from God).

Each word of the priestly blessing was a fruitful theme of comment and interpretation.

"May God bless thee" with wealth, and "keep thee" in health.

"May He let His countenance shine toward thee"; *i.e.*, "May He give thee the light of the eyes"; or, according to Rabbi Nathan, "the light of the Shekinah."

"May He be gracious to thee" with knowledge and understanding, with learning, instruction, and wisdom.

"May He lift up His countenance toward thee"; *i.e.*, "May His anger pass away from thee."

"May He grant thee peace" in thy going out and in thy coming in, with all men, in thy house, and without end.

"Great is peace, for through it alone is blessing secured."

"Great is peace, because it seals all the blessings" (Num. R. xi. 7; Sifre, Naso, 40-42).

K. D. P.—K.

——**Music:** The ceremony of pronouncing the benediction is termed in the Talmud (Ḥul. 132b; Meg. 24b *et passim*) "nesiat kappayim" (raising of the hands), from Lev. ix. 22. It is also familiarly called "dukan" (platform), from the position of the priests during the ceremony. These stand on a dais or platform, such as that upon which the Levitical choir in the Temple was placed. Hence the Judæo-German verb in common usage, "duchanen."

The hands as upraised during the priestly blessing, with the thumb and first finger and the middle and ring-fingers so separated as to form little spaces through which the rays of the Shekinah streamed upon the assembled worshipers, in accordance with Cant. ii. 9 (see Soṭah 39b; Num. R. xi.; 'Aruk, *s.v.* חלון), were adopted as the family badge of a Cohen. It is found thus on gravestones, objects of ecclesiastical art, imprints of books, etc., and is still so used, being frequently surmounted by a crown ("keter kehunah") (see Kohanim). The fear that the people might gaze at the priest during the blessing, which was regarded as a perilous irreverence, gave rise to the custom of covering the head (and usually the hands as well) with the ṭallit during the recital of the benedictions. As the reader commences to intone the first of the three passages which form the conclusion of every "'Amidah," those Aaronites who desire to be released from the performance of the Biblical command withdraw from the synagogue, in order that they may not hear the reader call upon the Kohanim to carry out their duty. With them withdraw any Aaronites who may be mourners, or under the age of puberty, defective in person or speech, accidental manslayers, or married to divorced women—all these being excluded from participation. Those remaining remove their leather boots, after which water is poured over their hands by the Levites. The priests then assemble on the steps of the Ark with their faces toward it, each covering his head with his ṭallit; and when, during the service, the reader calls out to them, "Kohanim," they face right about, spread their hands horizontally above their heads, palms downward, in the manner indicated, and chant together: "Blessed be Thou, Lord our God, king of the universe, who hast sanctified us with the holiness appertaining to Aaron, and commanded us to bless Thy people Israel in love." Word by word the three verses are then dictated by the reader, the priests swinging north and south at suitable words in order to include the congregants standing right and left as well as those in front of them. At the close of each verse the response "amen" is given; and after the third verse they face about again, remaining before the Ark until the reader concludes the 'Amidah with the next paragraph.

From the first the benedictions appear to have been uttered with the singing rather than the speaking voice (compare Maimonides, "Yad," Tefillah, xiv. 14). Even in Talmudical times the singing seems to have been so protracted that Biblical texts suitable to each word were suggested to the congregation to meditate upon during the chanting. But the recital of these verses by the worshipers, or the introduction of more than one melody by the Kohanim, was rather deprecated by the Rabbis. The tunes of the chanting on each of the holy days differ

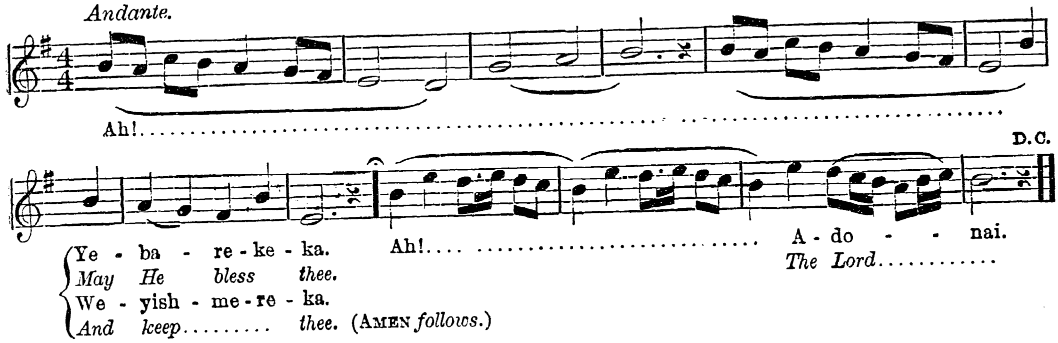
The Spanish Chant.

from one another, some appearing to be of very ancient origin. One of these is preserved in the traditions of the Sephardim, to which each of the fifteen words of the benediction is sung at length; and this has been seriously claimed to be the identical melody sung by the priests in the Temple. But while obviously antique, being practically melismatic psalmody in the sixth ecclesiastical mode, yet its structure, particularly its coda, is so close a reproduction of many another strain in the music of the southern Jews, of acknowledged peninsular origin by them, that no claim could be allowed to an origin more remote than Moresque Spain, even were not the resemblance to some of the later Mozarabic intonations so unmistakable. (See p. 246.)

"The Chant of the Dead."

The Ashkenazim have a large number of melodies to which the words of the benediction are sung. Almost every congregation, indeed every family of Kohanim, has its own tradition. Often, however, these airs are but distinctive melodies of a particular festival, or echoes of seventeenth- and eighteenth-century German folk-song. Only two have any claim to antiquity like that of the Spanish chant. The older is a medieval German melody, which exists in several variants, and is in most instances reserved for the concluding days of the festivals ("Hazkarat Neshamot, Matnat Yad"), when departed relatives are called to mind. From this it has come to be widely known as "Niggun Metim" or "The Chant of the Dead." Its recent history is of particular interest. Developed with insight and feeling by Cantor NAUMBOURG of Paris, an instrumental arrangement was published in E. Pauer and F. L. Cohen's "Traditional Hebrew Melodies," London, 1896, which attracted the attention of the late Queen Victoria, and was played as the introductory voluntary at several memorial services of the British royal family. In its original simple form this chant is as follows:

BIRKAT KOHANIM



Andante.
Ah!..
D.C.
Ye - ba - re - ke - ka.
May He bless thee.
We - yish - me - re - ka.
And keep........ thee. (AMEN follows.)
Ah!.... ....
A - do - - nai.
The Lord............

The Polish Melody.

The other old northern chant is of Polish origin, probably of the seventeenth century, and is perhaps even more extensively known. At once beautiful in itself and very characteristic, it is to many lovers of music a typical example of Hebrew melody. In most British synagogues the whole ceremony is performed to its melodious phrases.

BLIN D'ELBŒUF: French manufacturer who introduced into France woolen cloth for ladies' use. It was soon considered the best in Europe, and obtained the prize at the Vienna Exhibition of 1870. Blin in presenting a sample of his cloth to President Carnot said: "We are all the more proud of it, for it reminds us of a victory gained by French industry over foreign."

BIBLIOGRAPHY: Bloch, in *Revue Etudes Juives*, xxxviii. 23.

S. I. Br.

BLIND, THE, IN LAW AND LITERATURE: The ancient nations regarded blindness as the lowest degradation that could be inflicted upon man; hence gouging out the eyes of an enemy was a form of national retaliation. The Philistines bored out the eyes of Samson, and the king of Babylon blinded Zedekiah. Nahash the Ammonite demanded as a condition of surrender that he should thrust out the right eye of every man of Jabesh-gilead, as a reproach upon all Israel (I Sam. xi. 2).

In the Bible.

The blind, together with cripples and lepers, were outcasts of society and kept quarantined outside the town limits; they became paupers and a menace to passers-by. When David besieged the Jebusites at Jerusalem, the blind and crippled mendicants were so numerous that he was compelled to take stringent measures against them (II Sam. v. 6). In the eyes of the ancient Hebrews the maimed, and especially the blind, were thought to possess a debased character. Balaam, the prophet of the Gentiles, according to Talmudic tradition, was lame and blind of one eye (Sanh. 105a). The blindness of Isaac is said to have been the cause of Rebekah's action in transferring the blessing from Esau to Jacob, as she considered herself better able to judge the merits and demerits of her two sons (Yalk.). Jacob would not marry Leah because she had "tender eyes." On this account the Talmud says that a bride whose eyes are beautiful needs no further examination (Ta'an. 24a).

To counteract the prevailing notion that bodily ailments and defects are the punishment of sin, special legislation was provided for the protection of the blind and afflicted: "Thou shalt not . . . put a stumblingblock before the blind" (Lev. xix. 14). "Cursed be he that maketh the blind to wander out of the way" (Deut. xxvii. 17).

The Talmud compares the blind, the leper, the childless, and the pauper to the dead (Ned. 64b), quoting from Lamentations (iii. 6): "He hath set me in dark places as they that be dead of old."

Respect for the Blind.

Judah ha-Nasi is the first person mentioned in rabbinic literature who helped to remove the stigma of the blind. It is related that he and R. Ḥiyya, while traveling, came to a certain town and inquired whether there were any learned man whom they could honor by a visit. The townsmen directed them to a blind scholar. R. Ḥiyya said to the prince, "Do not disgrace thy excellence. Let me visit him." Judah insisted, however, and went with him. When they were about to leave, the blind man gratefully acknowledged the visit, saying: "Ye have honored by your audience one who is seen but sees not. Ye shall be blessed and acceptable before One who sees but is invisible" (Ḥag. 5b). R. Abba b. Jacob offered a high seat in his house to a blind visitor, which action caused the people to believe the latter a great man and secured for him an honorable position. He bestowed the above-mentioned blessing upon R. Abba (Yer. Peah, end, ch. viii.). R. Hoshaiah the Great, engaged for his son a blind teacher with whom he dined daily. On one occasion, when visitors were at the house, the teacher was not invited to the table. R. Hoshaiah apologized afterward for the omission, saying he did not wish to embarrass or disgrace him before the assembly; whereupon the blind teacher rejoined, "May thy apology be acceptable before the Invisible" (*ib.*). For euphemistic reasons the Talmud calls a blind man סגי נהור ("a man of abundant light").

The blind are exempt from all religious duties. They may perform any religious service for themselves, but can not be a proxy for others. Thus a blind man when saying the eighteen benedictions need not face the Temple of Jerusalem (the east), being unable to distinguish the points of the compass, but he shall direct his heart toward his Father in heaven (Ber. 29a). Yet he must not utter His name in vain. R. Judah would not permit him to say the benediction before the Shema': "Blessed be the Lord who formed light and created darkness," inasmuch as the blind derives no benefit from light. The "wise men" differ, however, claiming that the light indirectly benefits the blind. R. Yosé (the tannaite) could not understand an apparently illogical passage in Deuteronomy: "And thou shalt grope at noon-day as the blind gropeth in *darkness*" (xxviii. 29); until he chanced to meet a blind man who was walking at night with a lantern in hand, and who explained that the lantern was of great service to him, to enable passers-by to guide and protect him from obstacles and pitfalls (Meg. 24b).

R. Joseph, who was blind, said that at one time he would have welcomed one who could assure him that R. Judah was right in the statement that the blind were exempt from the performance of religious duties; for in that case he (R. Joseph), who, although blind, performed these duties, would deserve a greater recompense than one who was not blind. Hearing R. Johanan, however, assert that "one who performs his prescribed duties is greater than a volunteer," Joseph said that he would offer a banquet to the rabbis if they could assure him that R. Judah was wrong in his statement.

R. Joseph, and R. Sheshet, another blind Talmudist, hold the opinion that the blind are under obligations to perform all religious duties, and accordingly they recited the Haggadah on Passover eve before the assembled family (Pes. 116b), which was contrary to the decision of R. Aḥa b. Jacob, who excused a blind man from saying the Haggadah (*ib.*).

Interesting stories are related of the totally blind R. Sheshet, showing his exquisite and instinctive knowledge of his surroundings while the guest of the Chief of the Captivity (Giṭ. 67b), and his remarkable discernment of the approaching Persian king among many legions (Ber. 58a). A blind rabbi was accustomed to cite Mishnaic traditions before Mar Samuel, and on one occasion forgot to provide for the cooking of food on a holiday preceding Saturday (Beẓah 16b), an instance showing that the blind were not entirely free from religious duties.

Obligations and Exemptions.

The authorities differ as to the extent of the exemption, whether from a Mosaic or rabbinic point of view, whether from mandates, or even from prohibitions ("not to do"). The development of customs and laws regulating the blind has abrogated many distinctions, and the tendency of the recent authorities is to remove all disabilities and to give the blind equal religious and civil rights. The gradual emancipation or, rather, the participation of the blind in all matters of religion and law, is shown by the following quotations ranging from the Mosaic law to the latest codes and responsa: A blind priest was not permitted to offer sacrifices on the altar (Lev. xxi. 17), and he was exempt from a pilgrimage to Jerusalem on holidays, this applying even if he were blind only of one eye, for R. Johanan says: "One must see as he is seen" (Mishnah Ḥag. ch. 1, § 1). A blind man who committed unpremeditated homicide was exempt from banishment to a city of refuge, according to R. Judah, who interprets literally the verse, "Seeing him not" (Num. xxxv. 23; see Mak. 9b). Maimonides concurs in this decision, holding that homicide was in this case an unavoidable accident ("Yad," Roẓeaḥ, vi. 14).

The Mishnah prohibits the ordination of a blind justice, although a blind witness is permitted to testify. An exception is noted of a blind justice who was allowed to practise without protest (Sanh. 34b). The Shulḥan 'Aruk prohibits the appointment and practise of a totally blind man as a judge, but tolerates one who is blind only of one eye (Ḥoshen Mishpaṭ, 7, 2). R. Jerucham permits even a totally blind judge to render decisions (Bet Yos. *ib.*). R. Isaac Lampronti rules that the defendant can claim the right to submit his case before a resident blind justice, on the ground that some authorities raise no objection to such a proceeding. R. Ben Sasson and R. Ben Nehemiah, two blind justices, practised at Venice ("Paḥad Yiẓḥaḳ," Letter Samek, 24b, ed. Lyck, 1866). Lampronti gives as his reason for this decision that nowadays the judge merely follows the precedents established in the various books, and does not render new decisions.

Reciting the Scriptures.

The public reading of the Pentateuch by a blind man is prohibited, as the "words of Holy Writ may not be recited orally" (Meg. 24a). This decision in Shulḥan 'Aruk, Oraḥ Ḥayyim, 53, 14, is reversed by later authorities (Magen Abraham, *ib.* 139, 104) on the ground that to-day the person who is called up to read the Torah merely repeats mentally the words dictated by the reader. R. Moses Zacuto relates that the rabbis of Poland did not permit a blind man to read the Scriptures. Nevertheless he agreed with other rabbis at Mantua (1678) to allow the blind R. Benjamin Ashkenazi of Prague to read; while at Ferrara such permission was refused to a blind man named Norzi, though an exception was allowed in the case of R. Jacob Lianna, on account of his superior Biblical and Talmudic learning ("Paḥad Yiẓḥaḳ," *ib.*).

Among blind scholars after Talmudic times may be mentioned R. Judah gaon, of Pumbedita (Sherira's letter in Neubauer, "Med. Jewish Chronicles," ii. 3), the accredited author of "Halakot Gedolot"; Isaac Sagi Nahor ben David, ראב"ד, "the father of the cabala" (end of twelfth century); and R. Abraham Judah Zafig, born blind at Tunis and lived at Jerusalem, author of עיני אברהם ("The Eyes of Abraham"), Amsterdam, 1784. The blind R. Joseph b. Azriel ha-Levi Schnitzler is the author of an illustrated commentary on the last nine chapters of Ezekiel explaining the whole plan of the Temple, courts, gates, etc., which he dictated to R. Zarah ha-Levi, the reader of the Hamburg congregation in London (London, 1825). Of modern authors who lost their sight are Salomon Munk, Adolph Neubauer, Joseph Derenbourg, and Abraham M. Luncz.

G. J. D. E.

BLIND-COHEN, FERDINAND: German student who made an attempt on the life of Prince Bismarck May 7, 1866, and on the following day committed suicide in prison. He was a stepson of the well-known radical Karl Blind, whose name he assumed. Blind-Cohen left a letter in which he stated that he had no accomplices. He declared Bismarck to be the worst enemy of German liberty, and expressed the hope that his own self-sacrifice might promote the welfare of Germany, as Orsini's attempt on the life of Napoleon III. had led to the liberation of Italy. Blind-Cohen was known as a young man of considerable talent. He spent the last few years of his life at an agricultural academy in Hohenheim, Württemberg. He was buried at the expense of his stepfather.

BLINDNESS: Statistics, wherever obtainable, show that the proportion of blindness is greater among modern Jews than among their non-Jewish neighbors. Thus, according to Dr. Georg Mayr ("Die Verbreitung der Blindheit, der Taubstummen, des Blödsinns, und des Irrsinns in Bayern," p. 11), in Bavaria the proportion of blindness was as follows: among Protestants (per 10,000), 7.84; among Catholics, 8.27, among Jews, 13.81, the Jews thus showing a rate of blindness about double that of the Protestants. In Bavaria at the censuses of 1840 and 1858 the Protestants also showed relatively the least number of blind, and the Jews again the largest proportion.

For Prussia, Dr. Cohn (in Eulenburg, "Real-Encyc. der Gesammt. Heilkunde," iii. 139) presents the following figures for 1880: Among 10,000 Protestants, 8.2; among 10,000 Catholics, 8.4; among 10,000 Jews, 11.0: showing a considerable excess of blindness among the Jews. The same census showed that there was also a larger proportion of congenital blindness among Jews (about 8 per cent) than among non-Jews (only 4.7 per cent). The absolute numbers are given in "Zeit. des Statist. Bureaus für

Preussen," 1882, pp. 190 *et seq.*, and the percentages in a special article by A. Guttstadt in the following year.

Blindness is not found very frequently among the Jews of the United States of America, probably because the stringent immigration laws prevent the entrance of defective classes, including the blind.

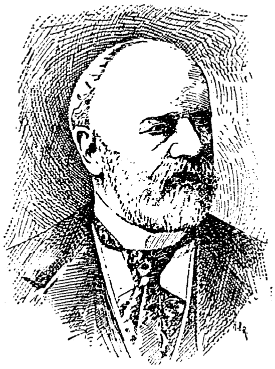
Judging from the etiology of blindness, it might have been expected that the number of blind should be less among Jews than among non-Jews. The most important cause of blindness in the new-born is in from 30 to 50 per cent of cases due to gonorrheal infection from the mother. It is a well-known fact that gonorrhea is comparatively infrequent in Jewish women. This granted, it would be reasonable to expect that Jews would have at least 25 per cent less blindness than non-Jews.

To account for the great prevalence of blindness among the Jews, some authors have adduced the greater frequency of consanguineous marriages among them. But all those who have carefully investigated the subject, as G. Darwin Lancry, Huth, Trousseau, and many others, have reached the conclusion that, apart from heredity, consanguinity is not a factor in the production of blindness.

Any explanation of the frequency of blindness among the Jews must also account for the great frequency of eye-diseases among them. Trachoma, glaucoma, and various diseases of the cornea and of the uveal tract are found among the Jews in a greater proportion than among non-Jews. All these diseases often lead to blindness. Heredity, again, shows itself in eye-disease with great frequency; and in this manner the disease is perpetuated.

J. M. Fr.

BLIOCH (BLOCH), IVAN STANISLAVOVICH: Russo-Polish financier, economist, and railway contractor; distinguished as an advocate of universal peace; born at Radom, Poland, July 24, 1836; died at Warsaw Dec. 25, 1901. He attended the Industrial High School of Warsaw, and then entered upon a few years of commercial activity, first with the banking house of Teplitz at Warsaw, and later under the patronage of General Tiesenhaus at St. Petersburg. There he adopted Christianity in the form of Calvinism. With the banker Kronenberg of Warsaw, whose sister he married, Blioch participated in the construction of the railroads of the Great Russian Company; and, observing the faults of foreign methods, he published a monograph in 1864, showing how these could be improved, making particular application to Russian conditions. With the view of putting on a precise scientific basis the general system of railroad management, he wrote a voluminous work, published in 1875 at St. Petersburg, with double text in Russian and French, under the title "Russkiya Zhelyeznyya Dorogi, Otnositelno Dokhodov, Raskhodov Eksploatatzii, Stoimosti Provoza i Dvizheniya Gruzov"—treating Russian railroads with respect to their revenues and running expenses, freight rates, and the movement of freight. For this work he was awarded a medal of the first class at the geographical exhibition of Paris, and was heartily indorsed by the Imperial Russian Geographical Society.



Ivan S. Blioch.

Receives Public Recognition.

Pension and Cattle Problems.

Another problem of considerable importance which attracted Blioch's attention was the question of pensions for railroad employees. The subject was in a chaotic state, there being no general rules or regulations. At his suggestion a committee was appointed by the general assembly of representatives of the Russian railroads to draw up, under Blioch's supervision, a plan for the establishment of a system of pension funds. In 1875 Blioch, conjointly with Vishnegradski, published the results of the committee's labors, in a treatise that was received as an authoritative statement of the pension problem. On the same question he wrote in French "Calculs Servants des Bases pour des Caisses des Retraites" (Warsaw, 1875), and published an edition of the same in Polish. At the request of the Ministry of the Interior, he wrote a detailed monograph, published in 1876 under the title "Izslyedovanie po Voprosam Otnosyashchimsya k Proizvodstvu, Torgovlye i Peredvizheniyu Skota i Skotskikh Produktov v Rossii i Zagranitzei"—an inquiry into the subject of the breeding, sale, and transportation of cattle and cattle-produce in Russia and abroad.

Results of Railroad Enterprise.

In 1877 Blioch published, in "Vyestnik Yevropy" (Sept.-Dec.), a series of essays on the economic condition of Russia, past and present, under the title "Ekonomicheskoe Sostoyanie Rossii v Proshlom i Nastoyashchem." The object of these essays was to calm the public apprehensions with regard to the financial embarrassments of Russia at that time. The rapid construction of railroads had absorbed enormous capital; and the public at large was inclined to see in this the chief cause of all financial trouble. Blioch endeavored to show that these enterprises were an absolute necessity, and that, although they made the financial crisis more acute for the time being, they would ultimately raise the productive power of the country, increase profits, and revive trade. The same subject is more extensively treated by Blioch in a massive five-volume work, published at St. Petersburg in 1878, entitled "Vliyanie Zhelyeznykh Dorog na Ekonomicheskoe Sostoyanie Rossii," which states more particularly the effect of railroads upon the economic conditions of Russia. This work, translated into French and Polish, was awarded a gold medal at the Paris Exposition of 1878. The above-named writings gained for him a membership in the so-called "committee of scholars" (Uchony Komitet) of the Ministry of Finances.

With the view of refuting the unjust attacks upon the financial policy of the government in the seventies, Blioch published in 1882 a work on the finances of Russia in the nineteenth century, entitled "Finansy Rossii xix Stolyetiya," in which he demonstrated the improvement in the condition of the country's finances as compared with those of the epoch of Nicholas I. This treatise contains interesting memoirs of the former ministers of finance, Reutern and Greigh. It has been translated into German, Polish, and French. In Polish, Blioch published "Przemysl Fabryczny Krolestwa Polskiego," on the industries of the kingdom of Poland; "Statistics of the Kingdom of Poland"; and, on financial and railroad topics, a series of articles in the periodicals "Biblioteka Warzawska" and "Ateneum." At the invitation of the president of the commission on agriculture, he composed a treatise on the policy, adopted by Russia and other countries, of giving governmental aid to agriculture by means of loans. It was published at St. Petersburg in 1892 under the title "O Selskokhozaistvennom Melioratzionnom Kredityе v Rossii i Inostrannykh Gosudarstvakh."

Other Economic Works.

When the Russian press took up the discussion of the rights of the Jews, Blioch published a work presenting a comparison of the material and moral welfare of the Western Great Russian and the Vistula provinces. This was entitled "Sravnenie Materialnavo i Nravstvennavo. Blagosostoyaniya Guberni Zapadnykh, Veliko Rossiskikh i Privislyanskikh," and in its five volumes (with an atlas) are presented the results of an investigation into the conditions of life and industry of the divers regions. It contains a historical view of the fortunes of the Jews in Europe, as well as a sketch of the origin of anti-Semitism. In this painstaking publication (an abstract of which is given in his pamphlet: "Les Ouvrages Statistico-Economiques," pp. 22–41) the author adduces a mass of statistical evidence exposing the hollowness of the charges that had been brought against the Jews of Russia for the purpose of justifying the atrocities perpetrated upon them in the early part of the reign of Alexander III. The cruel measures adopted by the imperial government —measures that formed a sequel to the other atrocities—are also adduced. He sets forth the manner in which the cause of the Jews was invariably prejudged in the numerous official investigations that were conducted with the ostensible purpose of ascertaining the conditions and motives leading to the outbreaks. The modus operandi of these inquiries, Blioch contends, was regularly so framed as to invite testimony hostile to the Jews, and the very fact that such massacres had occurred was taken as evidence that the provocation for the measures existed. The notion, sedulously propagated, that the atrocities represented an uprising of the people against Jewish exploitation, is pronounced baseless, in view of the fact that the worst outbreaks originated not in the rural districts but in the cities. The charge that in those provinces where the Jews have resided in numbers, they have impoverished and brutalized the peasantry through liquor traffic, is met by Blioch with statistical evidence to the effect that the provinces closed to the Jews are in a worse condition as regards the evil effects of drink. He points out the gross manner in which the criminal statistics of the empire have been manipulated to arouse prejudice against the Jews in order to justify their expulsion from the villages. In like manner he exposes the unfairness of the statistical data adduced to show that the Russian Jew had shirked his military duties. Blioch arraigns the supineness, amounting to connivance, of the imperial government in the matter of the anti-Semitic massacres of 1881–82; and argues that a resolute attitude against them would soon have put an end to the outbreaks, as was evinced by their speedy suppression when Count Dmitri Tolstoi was entrusted with the Ministry of the Interior.

Exposure of Anti-Semitic Charges.

Concerning the Jews, Blioch makes the following statements: The value of land in the Pale of Settlement is 19 per cent higher than in the governments where Jews are not allowed to reside. Prostitution and crime are far less prevalent, there being 1 Jew criminal to 2,170 individuals, whereas among non-Jews the proportion is 1 to 715. In the Pale the arrears of taxes are less than in governments which have no Jews; and in the 25 governments of the Pale 8,000,000 rubles less are spent every year in drink, a saving which enables the peasants to improve their land and pay their taxes. The Jews in the Pale who carry on business form more than half of the trading population, but the total value of their income is 436 million rubles, against that of 489 million rubles of the Christian minority. The great majority of Jews are small retail dealers and artisans, who earn from 20 to 60 copecks a day; and in order to make even this small profit they must carry on their business from 12 to 16 hours daily.

War and Its Solution.

In 1898 Blioch produced his famous work, in six volumes with atlas, on war in the future, "Budushchaya Voina," which has been translated into German and French and also into English. This is said to have inspired Czar Nicholas II. to issue his famous "peace" declaration, which resulted in The Hague Conference in 1899. The leading idea of the book is that the development and improvement of military art practically tend to make war altogether impossible or at least improbable. The destructive power of modern firearms and the radical dislocation of the economic and political fabric produced by war on a large scale are certain to make it such a calamity for the nations concerned that even the greatest success would not in the least compensate them for the desolation caused. Blioch then sets forth a scheme for the solution of all international conflicts by arbitration. Considered from a scientific standpoint, the work is not without grave faults. It represents a collection of uncritical, not always well-digested, material, striking in the manner of its presentation, but abounding in details that obscure the paramount problem. It contains a great mass of facts concerning the art of war, as well as political, economic, and financial reflections, and a discussion of means for preventing war. Unfortunately, in Blioch's consideration of the great problem he does not possess that tempered regard for expediency which is indispensable to the real efficacy of any reform. However, the work must not be underrated by applying to it a scientifically exacting criterion.

Blioch, who participated, as stated above, in the construction of the lines laid by the Great Company of Russian Railroads, built also the Landvarovo-Romny and Ivangorod-Dombrova roads, and organized the Company of the Southwestern Railroads. He has been president of various railroads, and has taken part in the work of railroad legislation. Shortly before his death he retired from business life and devoted himself exclusively to science and literature. The family testament left by Blioch begins with the words: "I was my whole life a Jew and I die as a Jew."

H. R.

BLITZ, JEKUTHIEL BEN ISAAC: Corrector of the press in the Hebrew printing-office of Uri Phoebus at Amsterdam; lived there in the second half of the seventeenth century. He translated the Bible into Judæo-German (Amsterdam, 1679). The translation, which was the first of its kind of the entire Old Testament, has three introductions, one in Hebrew and one in German, written by Blitz, and the third in Judæo-German by the printer, together with a letter-patent of the king of Poland, Johann III. Sobieski, and approbations by various rabbis. [On the opposition translation of Witzenhausen, which was printed by Joseph Athias, see vol. ii., p. 268]. Blitz also translated into Judæo-German Levi ben Gerson's "To‘aliyyot" on Joshua, Judges, and Samuel, published together with the preceding work.

Bibliography: Fürst, *Bibl. Jud.* i. 120; Steinschneider, *Cat. Bodl.* cols. 175, 1381; Grünbaum, *Jüdisch-Deutsche Chrestomathie*, pp. 18, 102.

G. I. Br.

BLOCH, ANDRÉ: French musician; son of a rabbi at Wissembourg, Alsace; born in that city in 1873. At the age of seven Bloch began to compose music, writing a waltz for the piano, for four hands, which pleased a publisher so much that he printed it. In order to procure for their gifted son the best musical advantages, the parents removed to Paris and entered him at the Conservatory.

The young musician made rapid progress. In 1884 he received the first prize for solfeggio; in 1889, the first prize for piano; in 1890, the first prize for harmony; finally, in 1893, by a unanimous vote, the first prize of Rome. He was trained by Massenet and André Gedalge.

Bloch's work is full of charm, originality, and distinction. Besides the cantata that obtained for him the "prix de Rome," his best works are: "Poëme Nomade," for chorus and orchestra, words by J. Richepin; and several pleasing songs and pieces for the piano, for two and for four hands. Bloch is not merely a musician, being interested also in astronomy and magnetism, which he studies with his friend Camille Flammarion.

s. A. A. G.

BLOCH [ISSACHAR] BAER B. SIMSON ḤASID: Austrian rabbi of the eighteenth century; a native of Hamburg, and son of the author of the Tosafot Ḥadashim on the Mishnah. Bloch was rabbi of Eiwanowitz, Moravia, when, in 1767, he was called to the rabbinate of Kojetein, in the same province, to succeed Ephraim Zülz. About 1787 he became rabbi of Semnitz, Hungary, and later occupied a similar position in Boscowitch, Moravia. He was also for some time rabbi of Dolitschau. He was the author of "Binat Yissakar" (Issachar's Wisdom), a collection of sermons, published in Prague, 1785.

L. G. P. Wi.

BLOCH, BIANCA (pseudonym, **B. Waldow**): German authoress; born at Lauban, Silesia, Jan. 19, 1848, where her father was attendant at a local court. Owing to the reduced circumstances of the family, she was restricted to merely a rudimentary education, but subsequently made up for the deficiency by extensive reading. In this, as in her literary work, she was encouraged by Dr. Bernhard Stavenow of Görlitz, who recognized her talent and developed it. In collaboration with C. von Breckheyde (Aline Neumann) she wrote two plays, "Ein Heisser Tag"—a farce, 1881; and "Vor dem Fest"—a comedy, 1889. Her other works are: "Blaue Augen"—a farce, 1891; "In Ernster Zeit"—a drama; "Lieutenant und Assessor, oder Maiwein"—a comedy; and "Strohwittwer"—a farce, 1892.

Bibliography: *Lexikon Deutscher Frauen der Feder*, i. 77, ii. 406; Kürschner, *Deutscher Litteratur-Kalender*, 1898, p. 114.

s. E. Ms.

BLOCH, ELISA: French sculptress; born at Breslau Jan. 25, 1848. After receiving a thorough education at Paris, whither her parents had removed, Elisa Bloch devoted herself to sculpture. In 1878 she first exhibited in the Salon. Encouraged by the praises of the critics and the exhortations of the great sculptor Chapu, she persevered in her efforts, and continued to exhibit numerous productions in subsequent Salons, among which may be mentioned: "The Golden Age" (Salon, 1885); "The Tribune Virginius Swearing to Avenge His Daughter Virginia" (Salon, 1889); and "Moses." The last-named work obtained honorable mention in the Salon of 1896, and was reproduced in bronze and exhibited at the centenary of French art (French Exhibition, 1900). Many monuments erected in various French towns by national subscription are the product of the chisel of Elisa Bloch. She distinguished herself also as a statuary, having reproduced busts of a great number of modern celebrities, among whom were Jules Oppert and Zadoc Kahn.

s. E. A.

BLOCH, EMIL: German otologist; born at Emmendingen, Baden, Dec. 11, 1847. He was educated at the universities of Heidelberg, Würzburg, Vienna, and Freiburg in Baden; being graduated from the last-named as doctor of medicine in 1871. After a postgraduate course at the University of Berlin and in hospitals in London, he established himself as a physician in Freiburg. In 1886 he took up the study of laryngology and rhinology under Hack, and of otology under Thiry at the University of Freiburg. In the following year he became assistant to Thiry, which position he held till 1892, when, on the death of the latter, he became his successor as chief physician at the otological dispensary and privat-docent at the university. In 1894 Bloch was appointed assistant professor of otology; and under his supervision the clinic for this branch of medicine was opened in 1899.

Bloch is the author of the following works and papers: "Untersuchungen zur Physiologie der Nasenatmung," Wiesbaden, 1888; "Pathologie und Therapie der Mundatmung," *ib.* 1889; "Sprachgebrechen," *ib.* 1891; "Ueber das Biaurale Hören," in "Zeitschrift für Ohrenheilkunde," 1893; "Die Methode der Centripetalen Pressionen und die Diagnose der Stapesfixation," *ib.* 1894; "Einheitliche Bezeichnung der Otologischen Punktionsprüfungsmethode und Ihre Ergebnisse," Wiesbaden, 1898.

BIBLIOGRAPHY: Pagel, *Biographisches Lexikon*, s.v., Vienna, 1901.

S. F. T. H.

BLOCH, GUSTAVE: French historian and archeologist; born at Fegersheim, Alsace, July 21, 1848. After passing through the Ecole Normale Supérieure he became professor of rhetoric at the lycée of Besançon. Subsequently he was a member of the French schools at Rome and Athens, and professor of Greek and Roman archeology at the University of Lyons. He is now (1902) in charge of the courses in ancient history at the Ecole Normale Supérieure.

Bloch's works include: "Les Origines du Sénat Romain," 1883; "De Decretis Functorum Magistratuum Ornamentis," 1883; "La Gaule Celtique et Romaine," being the first volume of the "History of France," published under the direction of M. Lavisse (1900). He has also contributed to the "Dictionnaire des Antiquités" of Daremberg and Saglio, as well as to many critical and historical reviews.

S.

BLOCH, HEINRICH: Austrian philologist; born Feb. 4, 1854, at Herman-Mestec, Bohemia; son of Moses Bloch; president of the Jewish Theological Seminary in Budapest. He received his education at the gymnasium at Teschen, Silesia, and at the University of Vienna, whence he was graduated as doctor of philosophy in 1878. In 1881 he was appointed professor of history and classical philology at the Jewish Theological Seminary in Budapest, where he has since lived.

Bloch is the author of: "Die Quellen des Flavius Josephus in Seiner Archaeologie," Leipsic, 1879, and is a contributor to many European newspapers and journals; *e.g.*, "Mittheilungen aus der Historischen Litteratur," Berlin, vols. xi.-xxx., 1883-1901 (historical essays); "Vom Fels zum Meer," Stuttgart; "Le Moyen Age," Paris; "Allgemeine Zeitung" of Munich, 1884-96; "Frankfurter Zeitung," 1884-1901; "Pester Lloyd," 1885-1901; "Vienna Fremdenblatt," 1894-99; "Breslauer Zeitung"; "Jüdisches Litteraturblatt"; "Allgemeine Zeitung des Judenthums"; "Magyar Zsidó Szemle"; "Evkönejo," etc.

S. F. T. H.

BLOCH, HERMANN (ḤAYYIM): German author; born at Breslau April 26, 1826; died Nov. 19, 1896. He was a grandson on his mother's side of the learned Abraham Tiktin, chief rabbi in Breslau and author of numerous learned works, and in his early years received halakic instruction from his uncle Solomon Tiktin, also chief rabbi in that city. His studies were completed in Hamburg, and at the age of twenty-seven he issued the first part of his "Mebo ha-Talmud" (Introduction to the Talmud), in which he endeavored with astonishing learning to trace a new theory of the development of the Halakah. But to perfect this new theory—a consummation which was never vouchsafed to him—he found it necessary to accumulate vast stores of learned material; thus he devoted extraordinary industry and acumen to the endeavor to formulate the principles upon which the 613 precepts of Judaism reposed. He gave samples of his work to the world in the shape of four parts of his book "Hirhure Torah" (The Torah's Thoughts), published 1887 to 1893, which treated of the "law of the majority" (Ex. xxiii. 2) according to Mosaic and Talmudic conceptions, and consisted of 519 quarto pages. Connected with these studies was also an attempt to reproduce the plan of the Temple of Herod ("Ẓurat ha-Bayyit") (The Form of the House), published in 1883, a book which was supplemented with a model. Private misfortunes bore heavily upon him, and he found consolation in the Wisdom literature of the Bible and Talmud, publishing a poetical elaboration of 107 Oriental proverbs and maxims under the title of "Omri Inshi" (Men Say) (1884). He lived as a merchant in Rawitsch and Breslau, and ended his days as resident scholar in the Mora Leipziger Bet ha-Midrash in Breslau, leaving voluminous literary material awaiting publication.

BLOCH, ISAAC: French rabbi; born at Sultz, Alsace, July 17, 1848. He received his education at the lyceum at Strasburg and at the Jewish Seminary in Paris. During the Prussian siege of Paris (1870-71) he served as assistant chaplain. In 1873 he was employed in the office of the Alliance Israélite Universelle. Two years later he was elected rabbi at Remiremont; in 1878 he was appointed chief rabbi of Oran; in 1882 he became chief rabbi of Algiers; and in 1890 was appointed to the chief rabbinate of Nancy, which position he still (1902) holds.

Besides a great number of sermons, Bloch has published a novel, "Les Fils de Samson," 1887; and "Inscriptions Tumulaires des Anciens Cimetières Israélites d'Alger," 1888. In 1877 he translated from the German into French S. Kohn's novel entitled "Gabriel." He has been a frequent contributor, both in prose and in verse, to "L'Univers Israélite," "Archives Israélites," "Revue des Etudes Juives," etc.

S. F. T. H.

BLOCH, IVAN. See BLIOCH, IVAN STANISLAVOVICH.

BLOCH, JOSEF: Violin virtuoso and composer; born at Budapest Jan. 5, 1862. He made his first appearance in public at the age of twelve, and attended the National Academy of Music and the National Conservatory. His teachers were R. Volkmann (composition), A. Gobbi, and K. Huber. Bloch is said to have been one of the most distinguished pupils of Huber. When barely sixteen years old he became assistant teacher at the National Conservatory; but his eagerness to learn more impelled him to attend the Paris Conservatoire, where for seven years he participated in public concerts. On his return to Budapest he became a member of the Hubay-Popper String Quartet until its dissolution in 1892. In 1889 he became professor at the National Conservatory at Budapest and also at the National Academy of Music, but since 1899 has been connected solely with the latter institution. Bloch composed short pieces for the violin, two orchestral suites, exercises for the violin—all of which are published in three volumes.

S. M. W.

BLOCH, JOSEF SAMUEL: Austrian rabbi and deputy; born at Dukla, a small city in Galicia, Nov. 20, 1850. His parents, who were poor, destined him for the rabbinical career, and he devoted himself to the exclusive study of the Talmud. He frequented the yeshibot, especially that of the celebrated Rabbi Josef Saul Nathanson at Lemberg, who, in his responsa, mentions Bloch, when he was only fifteen years old, as one of his most intelligent pupils. After having finished his studies at the colleges (gymnasia) of Magdeburg and Liegnitz, he went to the University of Munich. Thence he went to the University of Zurich, where he obtained his degree of doctor of philosophy. He was appointed rabbi in Rendsburg, Holstein, afterward in Kobylin, Posen, and Brüx, Bohemia; and finally he ended his rabbinical career in Floridsdorf, near Vienna. The anti-Semitic movement had at that time (about 1880) almost reached its climax in Austria.

Leaves Rabbinical for Political Career.

During the Tisza-Eszlár trial Professor Rohling, of the Catholic theological faculty of the Prague University, made a written offer to substantiate under oath the blood-ritual of the Jews. Bloch then came to the front with a series of articles in which he openly accused Rohling of having offered to commit wilful perjury; denouncing him, moreover, as a person utterly ignorant in Talmudic learning. After several successful attempts to delay the proceedings, Rohling preferred to withdraw, thus tacitly acknowledging defeat (see Blood Accusation).

At this time, 1883, Bloch founded a periodical, "Oesterreichische Wochenschrift," with the aim to defend the political rights of the Jews, to refute unjust attacks, and to inspire its readers with courage and faith in the conflict that had been forced upon them. Bloch also attended several meetings held by workingmen, and lectured with some success on the Talmudic principles of labor and on the laboring classes in the Old Testament.

After the death, at Cracow, in 1884, of the chief rabbi S. Schreiber, who had been deputy for Kolomea in parliament, Bloch was elected as his successor; in 1885 he was reelected, and after a hard struggle with Dr. Byk, in 1891 he was elected for the third time. As a member of the Chamber of Deputies he withdrew from his rabbinical post in order to devote himself entirely to his public functions and journalistic labors.

Becomes Deputy.

In 1893, instigated by one Deckert, an anti-Semitic pastor in Vienna, a baptized Jew named Paulus Meyer declared in the "Vaterland" of May 11 that a number of Russian rabbis from Lentschna had performed a ritual murder in his presence. In the name of the children of these rabbis, Bloch at once instituted criminal proceedings against Deckert, Meyer, and the publisher of the paper, and on trial, Sept. 15, a conspiracy was unmasked and the three defendants were sentenced to heavy punishment.

When in 1896 Christian socialism had gained a strong footing in parliament, and the government had commenced to recognize the Socialist party, Bloch was sacrificed and everything imaginable was done to prevent his reelection. Through the combined efforts of the government, the Christian-Socialist party, and the Polish club (party of Polish deputies), all of whom supported the election of the Jewish burgomaster of Kolomea, Bloch failed of reelection. Since that time he has devoted himself exclusively to journalism. Bloch published the following works: "Ursprung und Entstehung des Buches Kohelet," Bamberg, 1872; "Studien zur Geschichte der Sammlung der Alt-Testamentlichen Litteratur," Leipsic, 1875; "Die Juden in Spanien," Leipsic, 1876; "Hellenistische Bestandtheile im Biblischen Kanon," 2d ed., Vienna, 1880; "Quellen und Parallelen zu Lessing's Nathan," 2d ed., Vienna, 1881; "Jean Bodin, ein Vorläufer Lessing's," Vienna, 1882; "Drei Streitschriften Gegen Prof. Rohling," Vienna, 1882–83; "Die Arbeiter bei Griechen, Römern, und Palestinensern," Vienna, 1882; "Elementarschule, oder Erziehungswesen bei den Alten Völkern," Vienna, 1883; "Armenpflege und Heimatsrecht, eine Social-Talmud. Studie," Vienna, 1884; "Einblicke in die Geschichte der Entstehung der Talmudischen Literatur," Vienna, 1884; "Aus der Vergangenheit für die Gegenwart," Vienna, 1886; "Acten und Gutachten im Processe Rohling-Bloch," Vienna, 1892; "Open Letter to My Esteemed Colleagues of the Italian Parliament," London, 1895 (published also in Italian and German); "Talmud und Judenthum in der Oesterreichischen Volksvertrebung," Vienna, 1900 (parliamentary speeches).

His Works.

S. W. Rei.

BLOCH, JULIENNE: French educator and writer; died Nov. 12, 1868. She was the eldest and most distinguished daughter of Simon Bloch, founder and director of the journal "L'Univers Israélite"; the other three daughters being **Pauline, Jenny,** and **Hélène.** When only sixteen years of age Julienne received a license to teach, and having a natural gift for instructing, she devoted herself to the education of her young coreligionists. For two years, when she was about twenty-five years of age, she directed the institution for young girls at Lyons, founded in 1857 by the Jewish community of that city. Afterward she taught in the establishment of her sister, Mme. Pereira, at Passy.

Under the title "Lettres Parisiennes," Mlle. Bloch published, from June, 1854, to Aug., 1861, a series of articles in her father's paper ("L'Univers," vols. ix.-xvii.). "Nothing could be more suitable," says her panegyrist, M. Maurice Bloch (*ib.* 1895, part i., li. 32), "than the title of these letters, for they show true French wit, and, moreover, wit of the best quality. They remind me of the letters of Mme. Emile de Girardin."

s. M. S.

BLOCH, LOUIS, or **LEO:** Swiss educator; born in 1864; since 1896 privat-docent in archeology and mythology at the University of Zurich. Bloch has written extensively on classical life and literature, Latin and Greek mythology, archeology, and on religious customs. His more important works are: "Der Kult und die Mysterien von Eleusis," Hamburg, 1896, and "Römische Altertumskunde," Leipsic, 1898. The latter manual presents a complete history of the ancient Roman political institutions and customs of the people, and an account of the private life, religion, and culture of the Romans.

BLOCH, LUDWIG: German dramatist; born at Berlin Dec. 6, 1859; son of the theatrical publisher Eduard. Bloch was educated at the Friedrich-Wilhelm Gymnasium, entering his father's business in 1875. Six years later he traveled through Great Britain, France, and the United States, resuming work with his father in 1883. He is the author of: (1) "Dekorirt," a comedy; (2) "Am Stammtisch," a farce under the pseudonym R. Elbe; (3) "Frisch Durch die Welt," a musical composition; (4) "Am Wickeltisch," a musical composition; (5) "Werther und Lotte," for piano. In his capacity as editor of his father's publications, Bloch has produced various popular works relating to the stage.

BLOCH, MARCUS ELIEZER: German ichthyologist and physician; born at Ansbach in 1723; died in Carlsbad Aug. 6, 1799. His parents, being very poor, gave him hardly any education, so that on arriving at manhood he was almost illiterate, and till the age of nineteen could not even read German. Some knowledge of Hebrew and rabbinical literature enabled him, however, to obtain a teacher's position in the house of a Jewish surgeon in Hamburg. Here he learned German thoroughly and mastered some Latin, taking up also the study of anatomy. Scientific enthusiasm being thus aroused, Bloch went to Berlin, where, with remarkable zeal, he devoted himself to the study of all branches of natural science and medicine, being supported by some relatives. After taking the degree of M.D. at Frankfort-on-the-Oder in 1747, he settled in Berlin and practised his profession for many years.

In 1774 Bloch published a volume of medical treatises, "Medicinische Bemerkungen, Nebst einer Abhandlung vom Pyrmonter Sauerbrunnen," Berlin, 1774; but after that he devoted himself almost exclusively to research in natural science, especially in ichthyology. Travel increased his knowledge, and he made a fine collection of specimens of fishes, which, upon his death, was acquired by the Prussian government and presented to the Academy of Science, now to be seen in the Berlin Zoological Museum. In 1781 Bloch published "Die Oekonomische Naturgeschichte der Fische Deutschlands, Besonders des Preussischen Staates," followed in 1782-84 by "Oekonomische Naturgeschichte der Fische Deutschlands"; and during 1785-95 these works were completed by his "Naturgeschichte Ausländischer Fische." These series of publications, under the general title "Allgemeine Naturgeschichte der Fische," Berlin, 1781-95, 12 vols., provided with 432 excellent plate-illustrations, formed the principal work on ichthyology in the eighteenth century. But this great work, which Bloch began to publish at his own expense, would not have been finished were it not for the enthusiasm that the enterprise roused throughout Germany, it being regarded as almost a national affair; so much so indeed that all the princes and patrons of science participated in the publication expenses of the last six volumes, each plate bearing the name of the person at whose cost it had been prepared. Notwithstanding the fact that the science of ichthyology has since been altogether modified, and that, although splendidly characterizing the fishes of Germany, the work is not always precise in the description of fishes inhabiting waters outside that country, it still possesses great value, particularly on account of the illustrations. The "Allgemeine Naturgeschichte der Fische" was translated by Lavaux into French, Berlin, 1785. In a prize-essay on the generation of intestinal worms and the means of their extermination, entitled "Abhandlung von der Erzeugung der Eingeweidewürmer und den Mitteln Wider Dieselben," published in Berlin, 1782, and in Strasburg, 1788—a problem proposed by the Copenhagen Royal Academy of Sciences—Bloch proved that these worms were hereditary. He left an incomplete scheme of an ichthyological system, published after his death by I. G. Schneider under the title "Systema Ichthyologiæ Iconibus CX. Illustratum," Berlin, 1801.

K. I. BR.

BLOCH, MAURICE: French educator and writer; born at Colmar, Alsace, Aug. 5, 1853. He received his first education at the Jewish communal school of his native city, of which his father, **Joseph Bloch,** was director. Thence he passed to the lyceum, and after the Franco-Prussian war finished his studies at Paris. He became "agrégé des lettres" in 1881. After teaching at the Ecole Monge, he became director of the Ecole Bischoffsheim in 1883. He has acted as director and juror at several international expositions. He is a laureate of the Académie des Sciences Morales et Politiques, and an officer of public instruction.

Bloch has written numerous reports, and lectured especially for the Société des Etudes Juives, which has published his addresses, including "La Femme Juive dans le Roman et dans le Théâtre"; "L'Œuvre Scolaire des Juifs Français"; "Les Vertus Militaires des Juifs"; "Les Juifs et la Prospérité Publique." Among his books for young people are "Les Mères des Grands Hommes" and "Epouses et Sœurs," which have been very well received and have passed through several editions (Paris, Delagrave). He is also the author of "Femmes d'Alsace" (Paris, Fischbacher), and has contributed to various Jewish and non-Jewish journals and reviews.

Bloch has been a member of a number of bodies interested in the education of the young. S.

BLOCH (BALLAGI), MORITZ: Hungarian Christian theologian and lexicographer; born March 18, 1815, at Inócz, Zemplén, Hungary; died Sept. 1, 1891, at Budapest. He was the son of a tenant-farmer, from whom he received his first instruction in the Bible and the Talmud. After continuing his Talmudic studies at Nagyvárad and Pápa, Bloch taught at Moór and Surány, where he became acquainted with the Greek and Roman classics. During 1837 and 1838 he attended lectures in geometry and higher mathematics at the University of Pest, and at the same time began his literary activity by contributing articles to the "Pester Tageblatt" and by his "Hasznos Mulatságok" (Useful Talks), which were favorably received. The talented author was recognized as a new champion of the Hungarian national cause. Bloch as Jew could, however, not obtain a diploma; he therefore, in the fall of 1839, went to Paris, to continue his studies. In his absence a memorable agitation in favor of the emancipation of the Jews was brought forward in the Hungarian Parliament (1840), and Bloch was by men in authority considered as the man fit to awaken interest for the cause in Jewish circles. Thereupon he wrote his pamphlet, "A Zsidókról" (On the Jews), and, at the instance of Baron Joseph Eötvös, returned to Hungary in order to devote himself to religious literature and the Magyarizing of the Jews. In 1840-41 Bloch published his Hungarian translation of the Pentateuch with philological and explaantory notes. After the appearance of the first book of the Pentateuch, Sept. 5, 1840, he was appointed corresponding member of the Hungarian Academy of Science in recognition of his patriotic and scientific endeavors. His "Nyelvészeti Nyomozások" (Philologic Investigations) appeared in 1841, and was followed in quick succession by "Ungarischer Unterricht in der Kleinkinderschule," Ofen, 1841; "Jiszrael Könyörgései Egész Evre," i. Rész (Israel's Prayers for the Whole Year, 1st part), Buda, 1841; "Elsö Jósok" (The First Prophets); the Book of Joshua, Hungarian translation with commentary, Buda, 1842; "Ausführliche Theoretisch-Praktische Grammatik der Ungarischen Sprache," Pest, 1842.

In addition to his literary work, Bloch devoted his attention to the establishment of a Hungarian rabbinical seminary, in which he interested, among others, Count Stefan Széchenyi, and which he advocated in the "Pesti Hirlap," the then most influential organ of liberal Hungary. As the plan miscarried, Bloch again left Hungary; going to Tübingen to study theology under Ewald, Baur, and others. He was baptized in Notzingen May 11, 1843, and from that time to the end of his life associated with Josef Szekács and others. Bloch worked for the cause of Protestantism. In 1844 he accepted a call to the Protestant college of Szarvas. He remained in this position until the Revolution of 1848, when he became secretary to Görgei; later on he occupied a similar post in the Ministry of War.

Bloch's literary activity embraced religion, theology, politics, and philology. In 1851 he became professor of theology in Budapest; in 1858 he founded in that city the "Protestantische Kirchen- und Schulzeitung," which soon became the principal organ of liberal Protestantism in Hungary. His books, "Die Protestantenfrage in Ungarn und die Politik Oesterreichs," Hamburg, 1860; "Tájékozás" (Expositor), 1863; and "The Struggle of Protestantism Against Ultramontanism" (in Hungarian, 1869), advocated the same liberal policy. He founded many institutions of Hungarian Protestantism, and as professor, writer, and editor contributed largely to the material and intellectual growth of that Church, which regarded him as one of its most eminent supporters and representatives. Bloch's chief services, however, were rendered to the Hungarian language, which he cultivated throughout his life. His grammars, readers, and lexicons were for a long time important factors of Hungarian culture, and have materially aided the Magyarizing of Hungary. Although superseded in part by more recent works, his "Ausführliche Theoretisch-Praktische Grammatik der Ungarischen und Deutschen Sprache" (8th ed., Budapest, 1880); "Vollständiges Wörterbuch der Ungarischen und Deutschen Sprache" (5th ed., *ib.* 1882); "Collection of Hungarian Proverbs and Sayings" (Hungarian, 2 vols., 2 ed., *ib.* 1855) are still of value.

BLOCH, MOSES: French rabbi; born at Wintzenheim, Upper Alsace, Jan. 2, 1854; died Nov., 1901; educated at the Lycée Colmar, the Paris Rabbinical Seminary, and the Ecole des Hautes-Etudes, where he studied Arabic. He was rabbi of Remiremont (Vosges) from 1878 to 1883; assistant secretary of the Alliance Israélite Universelle; assistant professor of Arabic at the Paris Rabbinical Seminary from 1886 to 1888. In that year he was appointed rabbi at Versailles, which position he held until his death. He prepared a French translation in four volumes of the Maḥzor ("Traduction Française du Maḥzor Selon le Rite du Temple de la Rue de la Victoire à Paris, pour Toute l'Année"). Bloch also translated into French the third, fourth, and fifth volumes of the "History of the Jews" by Graetz, 1888–97, as well as Gross's "Gallia Judaica," 1897. In 1888 he published the Arabic text, with Hebrew annotations, of Maimonides' "Sefer ha-Miẓwot"; and he was a contributor to the "Revue des Etudes Juives" (vols. i. and v.) and to "L'Univers Israélite." S.

BLOCH, MOSES: German rabbi; born at Gailingen, Baden, in 1805; died at Buchau March 3, 1841. He pursued his Talmudical studies at Endingen, Manheim, and Carlsruhe, and then entered the University of Heidelberg. After passing his examination for the rabbinate, he first became assistant rabbi at Oberdorf, Württemberg (1829), and then rabbi at Buchau (1834). Bloch belonged to the liberal religious party. In addition to a few sermons, he published an essay upon Jewish fasts in Geiger's "Jüdische Zeitschrift" (iv. 176 *et seq.*).

S. M. K.

BLOCH, MOSES LÖB: Rector of the rabbinical seminary at Budapest; born at Ronsperg (Bohemia) Feb. 15, 1815. Among his ancestors were Isaac, rabbi at Cracow; the grandson of the latter, Phinehas Selig, author of the "'Aṭeret Paz"; and the latter's son, Aryeh Löw, a well-known Talmudist, who was the father of Eleazar Löw, the author of "Shemen Roḳeaḥ."

After studying under Philipp Kohner, a pupil of Ezekiel Landau, district rabbi of Pilsen, Bloch was entrusted to the care of his uncle, Wolf Löw, author of the "Sha'are Torah." Löw, who guided the boy's studies for seven years (1827–34) in his house at Gross-Tapolcsány (Hungary), is often quoted in his nephew's lectures. On graduating from the gymnasium at Pilsen, he went in 1840 to the University of Prague, and was appointed a rabbi at Wotitz in 1841, when he married Anna Weishut (died 1886). He was called as rabbi to Hermanmiestec, Bohemia, in 1852, and to Leipnik, Moravia, in 1856, where he remained until Oct., 1877. In that year he was called as professor and rector to the Rabbinical Seminary at Budapest.

Bloch published the following works: (1) "Sha'are Torat ha-Teḳanot" ("Die Institutionen des Judenthums nach der in den Quellen Angegebenen Geschichtlichen Reihenfolge Geordnet und Entwikkelt"), 4 vols., Vienna and Cracow, 1879–1902, 3 vols., Budapest, 1902; (2) "Das Mosaisch-Talmudische Polizeirecht" (special print from the "Annual Report" of the Rabbinical Seminary), Budapest, 1879; (3) "Die Ethik in der Halacha" (also in Hungarian; appeared in the "Annual Report" of the Seminary for 1885), Leipsic, 1886; (4) "Das Mosaisch-Talmudische Erbrecht" (in the "Annual Report" for 1889); (5) "Sefer Sha'are Teshubot Maharam" ("Die Bisher Unedirten Responsa des R. Meïr von Rothenburg"), Berlin, 1891 ("Mekiẓe Nirdamim" publications); (6) "Der Vertrag nach Mosaisch-Talmudischem Rechte" (from the "Annual Report" for 1893), Budapest, 1893; (7) "Das Mosaisch-Talmudische Besitzrecht" (from the "Annual Report" for 1897). The works published in the reports of the Landes-Rabbinerschule (National Rabbinical School) have all appeared also in the Hungarian language.

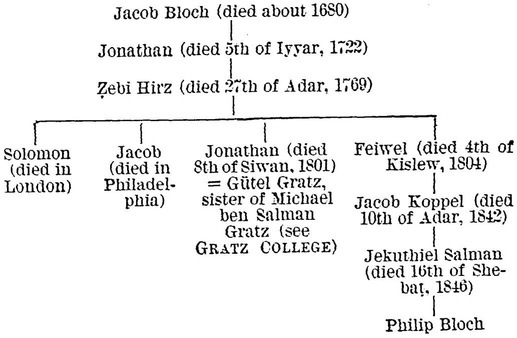
S. A. F.-G.

BLOCH, PHILIP: Rabbi and author; born in Prussia May 30, 1841. He studied at the University of Breslau, and under Frankel, Grätz, and Jacob Bernays at the Jewish Theological Seminary; graduated as Ph.D. in 1864; and received his rabbinical degree in 1867. He organized a Jewish congregational school at Munich in 1869; and became rabbi of the Israelitische Brüdergemeinde at Posen in 1871. Interested at first in religio-philosophic and haggadic studies, he devoted himself later to historic researches on the Jews of Poland.

Bloch is the author of the following works: "Glauben und Wissen," a translation of the introduction and first book of Saadia's "Emunot we-De'ot," 1879; "Die Willensfreiheit von Chasdai Kreskas," which is chap. v. of the second treatise of the "Or Adonai" translated and explained, 1879; "Die Generalprivilegien der Polnischen Judenschaft," 1892; "Geschichte der Entwickelung der Kabbalah und der Jüdischen Religionsphilosophie," 1894; "Heinrich Grätz, a Memoir," 1898—prefatory to the index volume (vi.) of the American edition of Grätz's history. Among the numerous essays which he contributed to the various magazines may be mentioned: "Studien zur Haggadah," contributed to "Monatsschrift," 1885, pp. 166 *et seq.*; "Die Piskoth für die Drei Trauersabbathe, ד̇ש̇א̇, Uebersetzt und Erläutert," in "Festschrift zum Achtzigsten Geburtstage Moritz Steinschneider's," 1896, pp. 41 *et seq.*; "Die Sage von Saul Wahl, dem Eintagskönig von Polen," in "Zeitschrift der Historischen Gesellschaft für die Provinz Posen," 1889, p. 233; "Judenwesen, Jahr 1793," in "Das Urkunden und Aktenstücke zur Organisation Südpreussens," 1895, p. 591.

The following sketch-pedigree gives the descent of Dr. Philip Bloch:



Jacob Bloch (died about 1680)
Jonathan (died 5th of Iyyar, 1722)
Ẓebi Hirz (died 27th of Adar, 1769)
Solomon (died in London)
Jacob (died in Philadelphia)
Jonathan (died 8th of Siwan, 1801) = Gütel Gratz, sister of Michael ben Salman Gratz (see GRATZ COLLEGE)
Feiwel (died 4th of Kislew, 1804)
Jacob Koppel (died 10th of Adar, 1842)
Jekuthiel Salman (died 16th of Shebaṭ, 1846)
Philip Bloch

All of these were Talmudists, but the most important was

Jonathan Bloch: Founder of the Congregation Langendorf in Russia; bought a cemetery, and had a Talmudic school from which were graduated some well-known rabbis.

S. P. B.

BLOCH, ROSINE: French singer; born in Paris in 1844; daughter of a merchant. She was very beautiful and had a magnificent mezzo-soprano voice. She studied at the Conservatoire, and received in 1865 the first prize for singing and the first prize for opera. Finding an engagement soon after at the Opera in Paris, she made a brilliant début in the rôle of *Azucena* in "Il Trovatore." In 1867 she created the rôle of *Chloris,* in "La Fiancée de Corinthe," by Duprato; and in 1873 that of *Claribel* in "La Coupe du Roi de Thule," by Diaz. When, in 1880, "Aïda" was put on the stage, Bloch undertook with great success the rôle of *Amneris.* For fifteen years she was a member of the Opera at Paris.

She might have attained to the foremost rank in grand opera had her magnificent voice been supplemented by a temperament less cold and by a more pronounced dramatic instinct.

S. A. A. G.

BLOCH, SAMSON (SIMSON) B. ISAAC HA-LEVI: Galician author; born in Kulikow, near Lemberg, 1782; died there Oct. 7, 1845. He received the usual Talmudical education, but was also sufficiently instructed in the Bible and Hebrew grammar, things uncommon in the Galician curriculum of those times. In the house of his uncle, Baruch Ẓebi Neu, Bloch made the acquaintance of his uncle's illustrious pupil, Nachman Krochmal, who was three years his junior, and their friendship, which ripened as the years went on, lasted till Krochmal's death in 1840. Bloch married while very young, and engaged in business without any training or knowledge of the world. Success under such circumstances was almost impossible; and he was thrown or drifted from one occupation into another, remaining poor all his life. But his thirst for knowledge and his firm resolve to make a name for himself in literature helped him to bear with fortitude all the vicissitudes of fortune. He studied in his leisure time and familiarized himself with German and other languages, also with many Jewish and non-Jewish commentaries on the Bible.

Bloch early became an enthusiastic devotee of the "Haskalah." His first literary attempt was the publication of the epistle which Solomon b. Adret wrote against the study of philosophy, especially by young men, and the famous response by the poet Jedaiah Penini or Bedersi, which is known as "Hitnaẓlut ha-Bedarshi" (Bedersi's Defense of Philosophical Studies), Lemberg, 1809. The letters are preceded by a long introduction in which Bloch throws much light on the controversy which shook Judaism to its foundations early in the fourteenth century.

In 1812 Bloch was called to Vienna to fill the place of corrector in the Hebrew printing-establishment of Anton Schmid, made vacant by the death of the grammarian Ben Ze'eb. There he translated into Hebrew Manasseh b. Israel's "Vindiciæ Judæorum" from the German translation of it by Dr. Marcus Herz, and published it with an introduction and a biographical sketch of the author (Vienna, 1813). He was compelled by family affairs to return to Kulikow, and, after several years of continual struggle with poverty, he listened to the advice of his friends Krochmal and Rapoport, and took up the writing of Hebrew books as a profession. In 1822 appeared the first volume of his important work, "Shebile 'Olam" (Paths of the World), a description of the geography and the nations of Asia (Zolkiev). It still has a literary if not a scientific value on account of its incomparable style and of the attacks on the folly and superstition of the Eastern nations contained therein, which were really intended for fools and deluded people nearer home. The second volume (Africa) is even better than the first, and is interspersed with biographies of Alfasi, Maimonides, and other famous Jews who were born or lived in Africa (Zolkiev, 1827).

Bloch made a journey through Hungary, Bohemia, Moravia, and Austria, in order to obtain subscriptions for his work. He was honored and assisted by the enlightened wherever he came; but the treatment accorded to Hebrew authors by the general public, especially by the ignorant among the wealthy classes, so disgusted him that he never finished the volume on Europe, although the divisions containing descriptions of Spain, Portugal, and part of France were already written. His last years were spent in poverty and disappointment, the dreariness and lonesomeness of his native city being rather accentuated than relieved by his occasional visits to the neighboring cities of Lemberg and Zolkiev. He died in Kulikow, leaving his nine-year-old daughter to the guardianship of his intimate friend R. Hirsch Chajes of Zolkiev.

Besides the above-mentioned works, Bloch also translated into Hebrew Zunz's biography of Rashi, to which he wrote an introduction and many notes (Lemberg, 1840). This work bears unmistakable traces of decadence, both in style and virility. He also wrote many letters on literature which appeared in various Hebrew periodicals and collections. The most important of them is probably the one about philosophy and on Kant, in "Kerem Ḥemed," v. 1, letter 34. The unfinished part of his geography of Europe was published under the title "Zehab Sheba" (The Gold of Sheba) (SBH. = Samson Bloch ha-Levi, Lemberg, 1855).

BLOGG or **BLOCH, SOLOMON BEN EPHRAIM:** German author; native of Neuwägen in Hanover; died Feb. 11, 1858. He was a teacher of the Hebrew language, and founded Telgener's printing-press at Hanover in 1827. At the time of his death he was nearly eighty years old, and had been engaged in literary labors for forty-five years.

His printing-press was noted for the scientific accuracy of its productions. Many of his works are important for the history of the Hebrew language and literature. Blogg wrote: "Abrégé de la Grammaire Hebraïque," Berlin, 1810; "Erster Unterricht in der Englischen Sprache," Hanover, 1813; "Moses, der Vertraute der Gottheit," *ib.* 1824; "Hebräische Grammatik für Anfänger," *ib.* 1825; "Gründliche Beweise, wie der Jude bei einer Eidesleistung Gesonnen Ist," *ib.* 1826; "Geschichte der Hebräischen Sprache und Literatur Nebst einem Anhange, die Targumim Betreffend," 2d ed., *ib.* 1826.

He edited "Sammlung Aller Gebräuche, Observanzen und Gebetformeln der Heutigen Polnischen und Deutschen Israeliten für das Ganze Jahr, Ursprünglich Verfasst von Salm. London, aber Bereichert und Vielfach Verdeutscht," *ib.* 1830. This work of London appeared in Hebrew at Amsterdam in 1744, and was published in Jüdisch-Deutsch at Frankfort-on-the-Oder, in 1799. Blogg's "Binyan Shelomoh, Ædificium Salomonis" (*ib.* 1831), treats of the Hebrew language and the Talmud in their historical aspects.

BLOIS (בלויש, בלים, ביבליאש, ביאוליאיש, ביבלואים, בלאייש): Capital of the department of Loir-et-Cher, France. Although of small importance itself, Blois occupies a prominent place in Jewish history through the somber drama of which it was, in 1171, the theater.

On the testimony of a Christian servant of the mayor, a Judæophobe, the Jews of Blois were accused of having crucified a Christian child for the Passover, and of having then thrown the body into the river. Count Theobald thereupon commanded that all the Jews should be cast into prison, with the exception of a woman named Pulcelina, for whom he entertained a particular affection. At first the accused hoped to escape by paying heavy ransom. Indeed, the count sent a Jew of Chartres to negotiate concerning the price of their acquittal. But a priest intervened, beseeching the count to punish the Jews severely should the accusation be well founded. As the accused could not be easily convicted, the authorities determined to submit the witness to the water test. The mayor's servant was conveyed to the river and there placed in a boat filled with water. As he did not sink, the count and the populace were convinced that his statement was true; and consequently all the members of the Jewish congregation were condemned to death by fire. When they were brought to the auto da fé, a priest begged them to embrace Christianity and thus preserve their lives; but, with very few exceptions, they refused, and died (May 26, 1171) in the flames while chanting the prayer "'Alenu," containing the profession of faith in one God (Pulcelina died with the others).

This was the first time in France that the Jews had been accused of using blood in their Passover. The anniversary of this martyrdom was decreed by R. Tam as a fast-day. Four dirges, composed by Hillel ben Jacob, Ephraim ben Jacob of Bonn, Gershom ben Isaac, and Menahem ben Jacob of Worms, and inserted in the seliḥot, perpetuated the memory of this sad event. The "Memorbuch" of Mayence has preserved the names of the martyrs:

Baruch; Baruch ben Menahem; Isaac ben Eliezer; Jehiel ben Isaac ha-Kohen; a pious rabbi, disciple of R. Samuel, probably Rashbam (compare "Gallia Judaica," p. 117); Jekuthiel ben Judah; a rabbi, disciple of R. Samuel; Judah ben Aaron (brother of Isaac of Treves); Judah ben Meïr; Judah ben Samuel; Moses ben Nun; Samuel ben Menahem; the young Panyan; Bona (wife of Samuel the ḥazan); Eiguelina; Hanna (daughter of R. Samuel); Hanna (with her little daughter born in the auto da fé); Leah (wife of R. Samuel), and her two daughters, Miriam and Miriam (wife of R. Judah); Rachel; Sarah; Zephora; Zephora,

The same "Memorbuch" mentions another auto da fé of Blois which took place in 1298, during the Rindfleisch persecutions. It is, however, difficult to believe that Jews ever settled there after this event.

BLOOD.—Biblical Data: The importance of blood for the continuance of life must have been recognized even in most remote antiquity and under the most primitive conditions. Any one could see that the death of wild animals during the chase and of slaughtered domestic animals was due to loss of blood. Almost every one had occasion, more or less frequently, to notice that wounded men became unconscious after having lost a certain amount of blood, and that they died if the bleeding did not cease. "To shed blood" is therefore synonymous with "to kill," "to murder," and guilt for a person's death is expressed by "damim," plural of "dam" (blood). For instance, in Josh. ii. 19 the spies say to Rahab: "And it shall be that whosoever shall go out of the doors of thy house into the street, his blood shall be upon his head [דמו בראשו], and we will be guiltless: and whosoever shall be with thee in the house, his blood shall be on our head [דמו בראשנו], if any hand be upon him." So long as the blood circulates, the man or the animal lives; hence the assertion: "The life [Hebr., "soul"] of the flesh is in the blood [נפש הבשר בדם הוא]" (Lev. xvii. 11), and (verse 14), "it is the life [Hebr., "soul"] of all flesh"; R. V., "the blood thereof is all one with the life thereof." Even of animals it is said, "the life [Hebr., "soul"] of all flesh is the blood thereof [נפש כל בָשר דמו הוא]" (*ib.*), and "the blood is the life [הדם הוא הנפש]" (Deut. xii. 23; compare Gen. ix. 4). The blood, then, is the seat of life or of the soul. All life originates in the breath of a being which God Himself sends forth: "Thou sendest forth thy spirit, they are created" (Ps. civ. 30); "Thou takest away their breath, they die" (*ib.* 29). It is therefore easy to understand how blood became an object of sacred awe; nor is it difficult to explain the origin of the prohibition against the partaking of the blood of beasts or birds, or of meat that is still full of blood—a prohibition repeatedly

Blood an Object of Awe.

and explicitly emphasized in the Old Testament (Gen. ix. 4; Lev. iii. 17, vii. 26, xvii. 10, xix. 26; Deut. xii. 16, 23; xv. 23). That this law was really observed, and that its transgression was regarded as a sin, is proved by I Sam. xiv. 32 *et seq.*; Ezek. xxxiii. 25; Judith xi. 12. The apostle (Acts xv. 29; compare xv. 20, xxi. 25) exhorts the Gentiles to "abstain from meats offered to idols, and from blood, and from things strangled." The ordinances referring to blood, "*ἀπέχεσθαι αἵματος καὶ πνικτῶν*," were obeyed by the Judæo-Christians from the very first (compare Clementine, "Homilies," vii. 4; Sibyllines, ii. 96), but by the Gentiles only after the historic books of the New Testament, and especially the Acts, were declared to be canonical. In J. G. Sommer's "Das Aposteldekret" (ii. 46, 60 *et seq.*, Königsberg, 1889) it is shown how the decree in Acts xv. 29, under the influence of the Torah and of the Jews that were consulted, led to a new ceremonial law, the import of which may be gathered from the penitential ordinances, "Libri Pœnitentiales." It may be incidentally remarked that the Koran also forbids the eating of blood (sura v. 4; compare ii. 175, xvi. 115).

In addition to their natural aversion to the tasting of blood, the Jews had another reason for abstaining from it, which is indicated in Lev. xvii. 11, where God says: "I have given it [the blood] to you upon the altar to make an atonement for your souls." God, in His mercy, ordained that blood should be a means of atonement; for which reason its place is upon the altar, and man shall not taste of it (compare also K. C. W. F. Bähr, "Symbolik des Mosäischen Cultus, "ii. 200 *et seq.*, Heidelberg, 1839).

——**In Rabbinical Literature:** In conformity with the general development of Judaism after Ezra, the Jews of later times multiplied and intensified the commands against partaking of blood (compare especially Shulḥan 'Aruk, Yoreh De'ah, 65-68). There are very explicit directions regarding the elimination of blood from food, such as the soaking and salting of meat to be prepared for the table (compare Eleazar of Worms, in "Roḳeaḥ"; Naphtali Benet, in "Sefer Berit Melaḥ," Prague, 1816; Ludwig Stern, "Die Vorschriften der Thora," § 18, Frankfort-on-the-Main, 1882; compare also Dietary Laws). In the medicine of the Talmud blood plays a purely negative part. Compare the sentence in B. B. 58b: "At the head of death stand I, the blood; at the head of all remedies stand I, the wine." In other words, most diseases arise in the blood. Blood is therefore not considered a remedy; but, on the contrary, bleeding and cupping (that is, the removal of blood) are recommended as modes of treatment (compare Leopold Löw, "Gesammelte Schriften," iii. 375-379, Szegedin, 1893).

——**In Folk-Lore:** The supreme importance of blood for human and animal life explains its prominence in folk-lore, where it is employed for the confirmation of compacts, for remedial, superstitious, and criminal purposes (compare Paulus Cassel, "Die Symbolik des Blutes und 'Der Arme Heinrich,' von Hartmann von Aue," p. 265, Berlin, 1882; H. C. Trumbull, "The Blood Covenant," p. 390, Philadelphia, 1893).

Owing to the command against tasting blood, and also to the Talmudic law forbidding any use to be made of a corpse (מת אסור בהנאה), practises of this kind were abhorred by the Jews at all times. See Blood Accusation.

BLOOD ACCUSATION: A term now usually understood to denote the accusation that the Jews—if not all of them, at all events certain Jewish sects—require and employ Christian blood for purposes which stand in close relation to the ritual, and that, in order to obtain such blood, they commit assault and even murder.

History.

In the polemic of Josephus against the Alexandrian grammarian Apion ("Contra Ap.," ed. Niese, ii. 8, § 95), the latter is charged with having accused the Jews of annually fattening a Greek in the Temple, killing him, offering his body as a sacrifice, eating of his internal organs, and swearing an oath of enmity against all Greeks (according to the ancient Latin translation, "Ejus corpus sacrificare secundum suas solemnitates et gustare ex ejus visceribus et jusjurandum facere in immolatione Græci, ut inimicitias contra Græcos haberent"; the Greek text of the passage is unfortunately lost). Similar in import is the following statement of a certain Democritus, which the Greek lexicographer Suidas (tenth century) has preserved: "Every seven years the Jews catch a stranger, whom they offer as a sacrifice, killing him by tearing his flesh into shreds" (*ὅτι κατὰ ἑπταετίαν ξένον ἀγρεύοντες προσέφερον καὶ κατὰ λεπτὰ τὰς σάρκας διέξαινον καὶ οὕτως ἀνῄρουν*). Nothing further is known of Democritus. Perhaps he drew his information from Apion's book.

In Socrates' "Hist. Eccles." there is an account of some drunken Jews who accidentally killed a Christian lad whom they had hung up in derision of Haman at Purim, but it is doubtful whether this could have given rise to the myth.

During all antiquity and far into medieval times there is no trace of any similar accusation against the Jews, not even in the Occident, although the work of Josephus was, upon the recommendation of Cassiodorius Senator, translated into Latin in the sixth century, and of this translation there are still more than twenty-four copies extant. Neither by that bitter enemy of the Jews, Agobard, bishop of Lyons (ninth century)—the statement to the contrary by August Rohling is a falsehood—nor by the monk Rudolph von Mainz, who inveighed against the Jews in 1146, and called them enemies of the Christian religion, nor by Bernard of Clairvaux (1091-1153), was the accusation repeated.

The first case in which Jews were actually accused of having killed a Christian child for ritual purposes was that of St. William of Norwich in 1144. According to an account recently discovered (Jessopp and James, "St. William of Norwich," Cambridge, 1899), the disappearance of the boy was explained by a Jewish convert, one Theobald of Cambridge, as due to a universal conspiracy of the

European Jews, who every year cast lots where the annual sacrifice of a Christian child at Passover should take place. In the preceding year the lot had been cast at Narbonne and had fallen on Norwich. Absolutely no evidence was adduced that a murder had been committed; it seems indeed that the lad had been merely in a cataleptic fit when found, and was buried alive by his own relatives. None of the Jews were tried or punished for the alleged crime, yet the mere statement of the Cambridge convert led to the bringing of similar charges at Gloucester in 1168, at Bury St. Edmunds in 1181, and at Winchester in 1192. In none of these cases was there any trial; but popular rumor was considered sufficient to establish the martyrdom of the lads, and this proved a considerable source of attraction to the cathedrals and abbeys of these towns.

In Dec., 1235, five children of a miller residing in the vicinity of the city of Fulda, Hesse-Nassau, were murdered, in consequence of which thirty-four Jews and Jewesses were slaughtered by the Crusaders. The Jews were accused of the deed, and those put to the torture are said to have confessed that they murdered the children, in order to procure their blood for purposes of healing ("ut ex eis sanguinem ad suum remedium elicerent"). It is necessary to note here (1) that the reports say nothing of the presence of witnesses; (2) that the confessions were elicited through torture, and were consequently worthless; (3) that these confessions speak only of the intention to procure a remedy ("remedium"), and contain no reference to ritualistic ceremonies; (4) that the German emperor, Frederick II., in order to sift the matter thoroughly, invited a large number of scholars and distinguished Jewish converts to Christianity from all parts of Europe, who, in answer to the question whether the Jews required Christian blood for their Passover ceremonies ("Judei Christianum sanguinem in parasceve necessarium haberent"), replied: "Neither the Old nor the New Testament states that the Jews lust for human blood: on the contrary, it is expressly stated in the Bible, in the laws of Moses, and in the Jewish ordinances designated in Hebrew as the 'Talmud,' that they should not defile themselves with blood. Those to whom even the tasting of animal blood is prohibited surely can not thirst for that of human beings, (1) because of the horror of the thing; (2) because it is forbidden by nature; (3) because of the human tie that also binds the Jews to Christians; and (4) because they would not wilfully imperil their lives and property." The judgment of the emperor reads: "For these reasons we have decided, with the general consent of the governing princes, to exonerate the Jews of the district from the grave crime with which they have been charged, and to declare the remainder of the Jews in Germany free from all suspicion."

This judgment did not suffice to clear the Jews of Germany from the general suspicion aroused by the Fulda incident.

The affair may, however, have been a symptom, not a cause; since the accusation soon after became still more frequent in other countries. As early as 1247 a trial, conducted in the little town of Valréas (Vaucluse, France), showed that the judges of the Inquisition there had heard of the blood accusation against the Jews. On the Wednesday before Easter (March 27) a two-year-old girl was found dead in the town moat, with wounds upon her forehead, hands, and feet. The fact that the child had been previously seen in the ghetto sufficed to fasten the suspicion of guilt upon the Jews. They were brought to trial, and, after being tortured, confessed even to the most absurd charges. One Bendig, for example, declared that the Jews had desired to celebrate communion on Easter Saturday, in accordance with a custom observed annually in large Jewish communities and particularly in Spain, where a Saracen was bought for this purpose whenever a Christian could not be obtained. This confession appears to have been based on the rumor set afloat by the renegade Theobald of Cambridge in connection with St. William of Norwich. Bendig further declared that, fearing detection, the Jews of Valréas had poured the blood of the child into the cesspool. In the same year (1247) the Jews of Germany and France complained to Pope Innocent IV. that they were accused of employing the heart of a Christian child in the celebration of communion during the Passover festival.

Earliest Mention.

According to present information, the blood accusation against the Jews dates from the middle of the thirteenth century. The first literary reference to it is made about this time in the following passage from the writing, "Bonum Universale de Apibus," ii. 29, § 23, by Thomas of Cantimpré (a monastery near Cambray): "It is quite certain that the Jews of every province annually decide by lot which congregation or city is to send Christian blood to the other congregations." Thomas also believes that since the time when the Jews called out to Pilate, "His blood be on us, and on our children" (Matt. xxvii. 25), they have been afflicted with hemorrhages: "A very learned Jew, who in our day has been converted to the [Christian] faith, informs us that one enjoying the reputation of a prophet among them, toward the close of his life, made the following prediction: 'Be assured that relief from this secret ailment, to which you are exposed, can only be obtained through Christian blood ["solo sanguine Christiano"].' This suggestion was followed by the ever-blind and impious Jews, who instituted the custom of annually shedding Christian blood in every province, in order that they might recover from their malady." Upon the basis of the information furnished by this convert, Thomas adds that the Jews had misunderstood the words of their prophet, who by his expression "solo sanguine Christiano" had meant not the blood of any Christian, but that of Jesus—the only true remedy for all physical and spiritual suffering. It is a pity that Thomas does not mention the name of the "very learned" proselyte. Possibly it was Nicholas Donin of La Rochelle, who in 1240 had a disputation on the Talmud with Jehiel of Paris, and who in 1242 caused the burning of numerous Talmudic manuscripts in Paris. It is known that Thomas was personally acquainted with this Nicholas.

Of the alarmingly large number of ritual trials only a few of the more important and instructive can here be mentioned:

The case of Little St. Hugh of Lincoln is mentioned by Chaucer, and has thus become well known. A little lad of eight years, named Hugh, son of a woman named Beatrice, disappeared at Lincoln on the 31st of July, 1255. His body was discovered on the 29th of August, covered with filth, in a pit or well belonging to a Jew named Jopin. On being promised by John of Lexington, a judge, who happened to be present, that his life should be spared, Jopin is said to have confessed that the boy had been crucified by the Jews, who had assembled at Lincoln for that purpose. King Henry III., on reaching Lincoln some five weeks afterward, at the beginning of October, refused to carry out the promise of John of Lexington, and had Jopin executed and ninety-one of the Jews of Lincoln seized and sent up to London, where eighteen of them were executed. The rest were pardoned at the intercession of the Franciscans (Jacobs, "Jewish Ideals," pp. 192–224).

In 1267, at Pforzheim, Baden, the corpse of a seven-year-old girl was found in the river by fishermen. The Jews were suspected, and when they were led to the corpse, blood began to flow from the wounds; led to it a second time, the face of the child became flushed, and both arms were raised. In addition to these miracles, there was the testimony of the daughter of the wicked woman who had sold the child to the Jews. A regular judicial examination did not take place; and it is probable that the above-mentioned "wicked woman" was the murderess. That a judicial murder was then and there committed against the Jews in consequence of the accusation is evident from the manner in which the Nuremberg "Memorbuch" and the synagogal poems refer to the incident (Salfeld, "Martyrologium," pp. 15, 128–130).

At Weissenburg, Alsace, in 1270, a miracle alone decided the charge against the Jews. Although, according to the accusation, the Jews had suspended a child (whose body was found in the Lauter river) by the feet, and had opened every artery in its body *in order to obtain all the blood*, its wounds were said to have bled for five days afterward (!).

Thirteenth Century.

In 1286, at Oberwesel, miracles again constituted the only evidence against the Jews. The corpse of the eleven-year-old Werner is said to have floated up the Rhine (against the current) as far as Bacharach, emitting a radiance, and being invested with healing powers. In consequence, the Jews of Oberwesel and many other adjacent localities were severely persecuted during the years 1286–89. Emperor Rudolph I., to whom the Jews had appealed for protection, issued a public proclamation to the effect that great wrong had been done to the Jews, and that the corpse of Werner was to be burned and the ashes scattered to the winds.

The statement was made, in the "Chronicle" of Conrad Justinger (d. 1426), that at Bern in 1294 the Jews had shockingly tortured and murdered the boy Rudolph. The historical impossibility of this widely credited story was demonstrated by Stammler, the pastor of Bern (see "Katholische Schweizer-Blätter," Lucerne, 1888).

In 1462, at Rinn, near Innsbruck, a boy named Andreas Oxner was said to have been bought by Jewish merchants and cruelly murdered by them in a forest near the city, his blood being carefully collected in vessels. The accusation of drawing off the blood (without murder) was not made until the beginning of the seventeenth century. The older inscription in the church of Rinn, dating from 1575, is distorted by fabulous embellishments; as, for example, that the money which had been paid for the boy to his godfather was found to have turned into leaves, and that a lily blossomed upon his grave.

Fifteenth and Sixteenth Centuries.

In 1475 occurred the case of the boy Simon of Trent. The confessions elicited by torture here themselves preclude the possibility of a ritual murder. The Feast of Passover in 1475 began on the evening of March 22, that is, on Wednesday. According to the charge, however, the boy did not disappear before Thursday, and he was murdered on Friday. The Jews could, therefore, have employed the blood neither for their unleavened bread ("mazzot") nor for the four cups ("arba' kosot"). Nevertheless, they are alleged to have admitted that they required "fresh Christian blood" for this particular year, as being a Jubilee year. But, in truth, the Jews have not counted or celebrated the Jubilee year (Lev. xxv.) since the destruction of the Temple by Nebuchadnezzar. The year 1475, however, was a Jubilee year of the Catholic Church; and the ignorant torturers, believing that the Jews also celebrated it as a jubilee, forced their victims to confess accordingly. The publication of the documents in the case of the boy Simon (collected and copied by Moritz Stern, Berlin) is much to be desired (compare the extracts in Hermann Strack, "Das Blut," pp. 126–131).

At La Guardia, near Toledo, Spain, the accusation recurred in 1490. Here no inquiry was made as to the remains, the clothes of the child, the instruments of the murder, or the time and place of its commission. Modern historians even deny that a child had disappeared at all (Loeb, "Rev. Etudes Juives," xv. 203–232; Lea, in "English Historical Review," iv. 239–250). Nevertheless, Lope de Vega employed this supposititious incident as the plot of a play.

In a case at Tyrnau, Hungary, in 1494, the absurdity, even the impossibility, of the statements forced by torture from women and children shows that the accused preferred death as a means of escape from the torture, and admitted everything that was asked of them. They even said that Jewish men menstruated, and that the latter therefore practised the drinking of Christian blood as a remedy.

At Bazin (= Bösing), Hungary, in 1529, it was charged that a nine-year-old boy had been bled to death, suffering cruel torture; and thirty Jews confessed to the crime and were publicly burned. The true facts of the case were disclosed later, when the child was found alive in Vienna. He had been stolen by the accuser, Count Wolf of Bazin, as an easy but fiendish means of ridding himself of his Jewish creditors at Bazin.

In Feb., 1840, at Damascus, Syria, Father Thomas, a Capuchin, and his servant were murdered. In this instance, also, confessions were obtained only after the infliction of barbarous tortures. A trustworthy witness of the proceedings was the converted Jew G. W. Pieritz, who said of himself that he was no friend or defendant of rabbinism ("Persecution of the Jews at Damascus," London, 1840). See Damascus Affair.

In 1882, at Tisza-Eszlár, the victim was Esther Solymosi (compare Paul Nathan, "Der Prozess von Tisza-Eszlar," Berlin, 1892). See Tisza-Eszlár Affair.

At Corfu, during the night of April 12, 1891, an eight-year-old girl was murdered. It was commonly reported that the child had been a Christian, Maria Desylla by name, and that Jews had murdered her and then taken her blood. Her teacher, however, declared, in a document attested by the French consul at Corfu, that the child's name was Rubina Sarda, and that she was a Jewess.

Nineteenth Century.

In 1891, at Xanten, Rhenish Prussia, a butcher, Adolph Buschhoff, was accused of murdering the boy Johann Hegmann, five and one-half years of age, and of drawing and concealing his blood. The two public prosecutors, after carefully collecting all the evidence, declared that the accused could not have committed the deed, and that there was no evidence showing that blood had been concealed (see Strack, *l.c.* pp. 153-156).

On April 1, 1899, at Polna, Bohemia, there was found in the forest near the town the body of Agnes Hruza, a seamstress, nineteen years old, with a gash in the throat. A Jew, Leopold Hilsner, an idler, twenty-three years of age, was accused of the deed, and in the same year was sentenced to death by the court at Kuttenberg for complicity in the murder. The public prosecutor, Schneider-Swoboda, and the advocate, Dr. Baxa, averred (the former indirectly, the latter openly) that a ritual murder was involved. But the medical faculty of the Czech University of Prague have demonstrated that the obtaining of blood must be excluded as a motive for the deed. No blood was missing: a quantity proportionate to the size of the body was found in the saturated garments, in the hair (which was caked with blood), in the pool of blood near the body, and in the body itself. After the Court of Cassation at Vienna had set aside the first verdict, Hilsner, in Oct., 1900, was condemned a second time by the court at Pisek, and again upon the charge of complicity, although there was no evidence that more than one person had been engaged in the murder. This decision was again attacked, but was upheld, May, 1901, by the Court of Cassation at Vienna. Whether Hilsner is the sole murderer, an accomplice, or entirely innocent, in no case is a ritual murder here involved, or a murder of which the object was the obtaining of blood. See Polna Affair.

Despite the strenuous efforts of the police, the murderer of Ernst Winter, a nineteen-year-old pupil at the gymnasium at Konitz, West Prussia, has not yet been discovered. There is no trace of a ritual murder, or of a desire on the part of the murderer to appropriate any of the blood. The dismemberment of the body is fully explained as having been done for the purpose of safely removing the remains from the scene of the murder.

Origin of Blood Accusation.

Connection with Easter.

The origin of the blood accusation has not yet been discovered. The annals of Erfurt state that the Jews used waxed sacks ("in saccis cera linitis") for collecting the blood of the children killed at Fulda in Dec., 1235. According to the Marbach annals (also contemporaneous with the event) the Jews confessed that they wished to utilize the blood for remedial purposes. The annals also state that the emperor Frederick II. (as mentioned above) consulted a number of distinguished converted Jews in order to ascertain whether the Jews required Christian blood on Parasceve—a term frequently used to designate Good Friday. As early as the twelfth century it was several times reported that the Jews had crucified Christian children during Easter (*e.g.*, William of Norwich, 1144, see above; Gloucester, 1171; Blois, 1179; Richard of Paris, in Pontoise). Whether all or part of these reports agree with the facts, or are alike unworthy of credence, the theory of a ritual murder is in no case justified; and, if the accounts are historical, it can only be assumed that the Jews in one instance or on several occasions put Christians to death. A ritualistic feature was imparted to these real or supposed crucifixions or other murders of Christians, and especially of Christian children, by the suggestions: (1) that the murders involved the acquisition of blood; and (2) that the crimes were related to the Passover festival. The emperor had probably already heard that Christians had been crucified or otherwise murdered by Jews at the period of the Christian Easter; he now heard of the bleeding of the victims, and asked (if the expression "in Parasceve" is correct) whether the Jews did at that time actually require Christian blood. This explains why the Jews of Valréas in 1247 were forced to confess that they wanted the blood of the murdered child in order to celebrate communion on Easter Saturday. The absurdity of such a confession on the part of Jews was so obvious that even the most stupid inquisitors could not afford to have it often repeated. The most dangerous consequences, on the other hand, followed from the establishment of a connection between the blood accusation and the period of the Jewish Passover festival. A statement to this effect appears to have been first made by Richer of Sens in the "Gesta Senoniensis Ecclesiæ," published between 1239 and 1270. He mentions the event at Fulda as occurring on the day before Passover ("quarta decima luna")—that is, March 22, 1236—whereas both the "Memorbuch" of Nuremberg and the annals of Erfurt irrefutably establish the date as Dec. 28, 1235 (Salfeld, "Martyrologium," pp. 13, 122). The false statement of Richer is probably traceable to the fact that he could find no connection between the bleeding and the Christian Easter. The untrustworthiness of Richer's chronology is evident also from the fact that he places the scene of the murder at Hagenau, Alsace, instead of at Fulda, although it is firmly established that the corpses of the children were brought to Hagenau. Reference has already been made to the petition presented by the Jews of Germany and France to Pope Innocent IV., to the effect that they had been accused of celebrating the Feast of Passover with the heart of a murdered Christian boy, in answer to which the pope issued a bull (July 5) decreeing that the Jews should not be persecuted because of this false accusation. Examples of the association of ritual murders with the Feast of Passover are found as follows: at Weissensee, Thuringia, 1303; Savoy, 1329; Trent, 1475; Boleslaw, Galicia, 1829; Tarnow, Galicia, 1844; Ostrovo, in the Russian government of Lublin, 1875; Eisleben, 1892; Bakau, Rumania, 1892 (see Strack, *l.c.* ch. xviii.).

Several circumstances conduced to spread the belief that the use of human blood among the Jews was directly associated with the Feast of Passover. The maẓẓot, for example, were, to secure purity and absolute absence of leaven, prepared with peculiar ceremonies incomprehensible to Christians, and were, therefore, invested with an element of mystery—a circumstance enhanced by the great and somewhat superstitious value then (and even today) placed by many Jewish people upon the Passover bread. It was natural to compare it to the wafers used at the Christian communion, when, by eating the wafer, the pious Christian believed that he partook of the body and blood of Christ; the blood purifying from all sin, and working miracles. "Without blood, no atonement" was both Old Testament and Christian doctrine. Since the destruction of the Second Temple, however, the blood sacrifices of the Jews had, as stated above, ceased; and the assumption would naturally arise that the Jews had endeavored to find a substitute. The blood of Christ was visible neither in the bread nor in the wine of the holy communion; was it not possible that the maẓẓot contained a similar invisible ingredient, operating as a mysterious agency? The Jews also preferably used red wine for the four cups which they were commanded to drink on the first two evenings of the Passover festival; the red color of the wine, according to the legend, being reminiscent not only of the blood of the Israelitish children (Ex. R. ii. 23) shed to prepare a bath for the leprous Pharaoh, but also of the numerous Jews who had died for their faith. This red wine has been interpreted by the enemies of the Jews as being actual blood; and consequently David ha-Levi b. Samuel, in his commentary "Ṭure Zahab" to the Shulḥan 'Aruk, Oraḥ Ḥayyim, 472, 8, has warned against its use. So much for a real or imaginary association between the blood accusation and the Feast of Passover. It but remains to mention one other circumstance. For the healing of the wound caused by circumcision the Jews frequently used the so-called "dragon's blood," a dark or blood-red gum of a species of palm (*Calamus Draco, Pterocarpus Draco, Dracæna Draco*). Whoever held this gum to be blood unjustly accused the Jews of employing blood for ritual purposes.

But all this does not suffice to explain that the accusation of employing blood for ritual purposes has, during six and one-half centuries and throughout a large part of Europe, rested heavily on the Jews. The Christians have never had more than a very imperfect knowledge of the language, religion, and customs of the Jews dwelling among them; whereas the Jews, as a whole, had far better information, at least as regards the language and customs of the nation among which their lot was cast. This circumstance also accounts for the superstitious and distrustful attitude toward the Jews. Just as the Roman Catholic clergyman in specifically Protestant districts was frequently invested with wonder and mystery, the Jews in Christian lands frequently became the subjects of superstitious misconceptions on the part of the Christian population. In the strife, waged at Bern in 1507, between the Dominicans and Franciscans, the assertion was made that the Dominicans had used the blood and eyebrows of a Jewish child for secret purposes (Grönneirus, "Berner Chronik," 1585, p. 622). In 1890 the magician Wawrzek Marut was sentenced in Galicia for stealing the corpses of two Jewish children from the cemetery, in order to fumigate a peasant's hut after typhoid fever. He declared that there were two kinds of typhoid: one a Catholic type, banishable through the Lord's Prayer; the other a Jewish type, removable only by means of Jewish bones (compare A. Wuttke, "Der Deutsche Volksaberglaube der Gegenwart," Berlin, 1869, Index).

Anti-Jewish Prejudice the Real Basis.

Furthermore, the belief in the miraculous properties of blood may be traced far into antiquity, and its high importance to vitality must ever have been obvious (see Blood). A severe loss of blood causes faintness, syncope, and even death: "For the life of the flesh is in the blood" (Lev. xvii. 11). Hence, a sanguinary sacrifice, and particularly a human sacrifice, is regarded by the ignorant as the most precious. Hence, also, the custom of using blood to symbolize important actions; friendship was pledged and alliances were formed by intermingling the blood of both parties. At this very day blood-brotherhood is cemented in this way in Africa, as, for example, in Madagascar and Kamerun. These circumstances, in their turn, account for the belief that blood, human as well as animal, is invested with extraordinary properties. Even in ancient times human blood was considered a remedy for epilepsy (see Pliny, "Naturalis Historia," xxviii. 1, § 2; 4, § 10); and this belief has survived to the present day, the blood of newly executed persons being regarded as a particularly powerful remedial agency. As a specific against leprosy, bathing in human blood was recommended both in ancient and in medieval times. Pliny (*l.c.* xxvi. 1, § 5) relates that when the Egyptian kings were stricken with elephantiasis they took such baths; and this statement is in singular accord with the passage from Exodus Rabbah (i., end), which states that the leprous Pharaohs, upon the advice of their sages, commanded that 150 Jewish children should be slaughtered every morning and every evening, in order that the monarchs might bathe in blood. For other medicinal and folk-lore uses, see Blood.

General Belief in Efficacy of Blood.

Blood has a deep signification in the religion of the Old Testament. God Himself has designated blood as a means of atonement (Lev. xvii. 11). In no other religion is the specific import of blood so clearly enunciated. Hence the oft-repeated and emphatic prohibition (existing among no other nation

Similar Jewish Belief.

in such form) against the partaking of blood as food (Lev. iii. 17, vii. 26, xix. 26; Deut. xii. 16; I Sam. xiv. 32, 33; Ezek. xxxiii. 25; compare also Acts xv. 29). When with the destruction of the Second Temple the sacrifices ceased, the sprinkling of the altar with blood ceased also. But the abhorrence of the tasting of blood remained; indeed, the later Jewish legislation went even further in this respect than that of the Old Testament (see Shulḥan 'Aruk, Yoreh De'ah, 65, 1; 67, 1, 39; Eleazar of Worms, in "Roḳeaḥ"; Naphtali Benedict, in "Sefer Berith Melaḥ," Prague, 1816; S. B. Bamberger, "Amirah Lebet Ya'akob," 2d ed., Fürth, 1864). Another important principle of the Jewish law reads: מת אסור בהנאה (any utilization of a dead body is forbidden; 'Abodah Zarah 29b; compare J. Rabbinowicz, "Der Todtencultus bei den Juden," Frankfort-on-the-Main, 1889, §§ 21-23).

Both these sets of laws have constituted and still constitute a serious impediment to the inception and furtherance among the Jews of those ideas on blood and its applications that are found among other nations. Superstition, it is true, exists among the Jews; and there are also superstitions Jewish in origin. Furthermore, popular conceptions on medicine also were not lacking among the Jews (see the works cited in Hermann Strack, "Das Blut," p. 98; M. Grunwald, "Aus Hausapotheke und Hexenküche," in "Mittheilungen der Gesellschaft für Jüdische Volkskunde," i. 1-87, Hamburg, 1900). But many of these ideas did not originate among them; and references to the blood and its employment are rare. Occasionally a Jew uses his own blood—that is, externally—for the purpose of stopping a hemorrhage (forming a clot). Nowhere, so far as the present writer is aware, is there any reference whatever to the drinking of human or animal blood for medicinal or superstitious purposes, or to the swallowing of it when dried. Finally, there is no instance of a Jew having committed murder in order to drink blood. There is always, of course, the possibility that a Jew—like one of any other race—may commit a murder. But, even if such a murder should be proved against a Jew, the only justifiable conclusion would be that the culprit committed the crime, not as a Jew, but merely as a superstitious person; just as in the case of Hundssattler and Bliefernicht, who devoured the flesh of their victims, the Christian religion could not be held accountable for the crimes committed.

No Jewish Blood-Ritual.

It may be positively asserted that there is no Jewish ritual which prescribes the use of the blood of any human being. Were there such a ritual, or were such a procedure even tolerated, there would certainly be some reference to it in the colossal mass of halakic literature which enters into every detail of ritualistic observance and of domestic life. But neither the well-informed among Christian theologians nor the inimical among converted Jews have ever been able to cite a passage from these sources showing that such prescription exists. The statements to the contrary by the Austrian professor, August Rohling, have served only to demonstrate the ignorance and malice of the man.

In consequence of the undeniable weightiness of these reasons, the assertion is now frequently made that while the traditions concerning a sanguinary rite do not obtain among Judaism as a whole, they are, nevertheless, accepted by one or several sects. But this opinion, also, is untenable; for if the Talmudic Jews, collectively or in individual cases, had cultivated sanguinary rites, the Karaites would certainly not have failed to emphasize that fact again and again. Nor would the Talmudic Jews have been silent had it been possible for them to accuse the Karaites of such a ceremony. Nothing of the kind has ever been asserted by either side.

Connection with the "Slaughterer's Cut."

In order to increase the plausibility of a blood ritual among the Jews, it has become customary to speak of the "slaughterer's cut," and the application of the slaughterer's knife: it is the communal slaughterer ("shoḥet"), too, who is preferably accused of the murder of Christian children. It is noteworthy, therefore, that Joseph Teomim, in his commentary ("Peri Megadim") to the Shulḥan 'Aruk, Yoreh De'ah, 8, should relate the following: "A slaughterer bought, for use in slaughtering, a knife which an executioner had employed. R. Joseph declares this to be prohibited; for human flesh is prohibited, and in consequence of the former close contact of the knife with it, the flesh of the animals slaughtered with it would also be prohibited." Whoever accepts, therefore, the ritual killing of Christian children by Jews, must assume that the slaughterers are equipped with two sets of knives, one set for animals, and the other for Christian children! It is noteworthy, also, in this connection that in the very cases in which the "slaughterer's cut" was most vigorously discussed—as, for example, at Xanten in 1891—a close inspection of the wound demonstrated beyond a doubt that such a cut had not been made. Finally, it should be mentioned that those who charge an intentional secreting of the blood for ritual purposes have an entirely erroneous conception of the actual quantity of blood in the body. The weight of the blood constitutes only one-fourteenth to one-thirteenth (7.17-7.7 per cent) of the total weight of the body. The total quantity of blood lost in the case of death through wounds is only about one-half of this blood-content of the body, or, in the case of decapitation (where the loss of blood is heaviest), about 72 per cent of it. Thus, the quantity of blood that can possibly be found on the spot and on the clothing of the victim is much smaller than most persons suppose (compare "Der Xantener Knabenmord vor dem Schwurgericht zu Cleve," July 4-14, 1892, Berlin, 1893, pp. 54 *et seq.*, 61 *et seq.*, 481 *et seq.*; J. Marcus, "Etude Médico-Légale du Meurtre Rituel," Paris, 1900).

The proselytes who have confirmed the blood accusation against the Jews have always been malicious and ignorant enemies of their people; and upon their testimony, devoid as it is of proof, no reliance can be placed. Among these proselytes were: Samuel Friedrich Brenz, author of the book "Jüdischer Abgestreifter Schlangen-Balg," Nuremberg, 1614; Paul Christian Kirchner, author of "Jüdisches Ceremoniel," Frankfort, 1720; and Paulus Meyer (see

Accusation Pronounced False.

Strack, *l.c.* pp. 105–160 *et seq.*). It is very noteworthy, however, that such pronounced anti-Jewish proselytes as J. Pfefferkorn ("Speculum Adhortationis Judaicæ ad Christum," 1507) and Julius Morosini ("Via della Fede Mostrata agli Ebrei," 1683) have pronounced the accusation false. In recent times August Rohling of Prague has become widely recognized as the principal authority for such anti-Jewish statements; but Strack, in "Das Blut" (ch. xvii.), furnishes unassailable proof that, both from a scientific and from a moral point of view, Rohling's assertions are utterly unreliable.

Among the large number of observant Jews and Christians who have refuted the blood accusation are the following; viz., Jews: Manasseh b. Israel, author of "Vindiciæ Judæorum," London, 1656, who took a solemn oath that the Jews were guiltless of this charge, an oath which was repeated at London June 30, 1840, by the rabbis Solomon Hirschell and David Meldola. Other Jews who protested were Jacob Emden and Jonathan Eybeschütz. Protests have also been expressed in poetry and "Memorbücher" designed only for Jewish readers. Proselytes: Johann Emanuel Veith, the eminent preacher in the Cathedral of St. Stephen, Vienna; and Alexander McCaul, who, in "Reasons for Believing that the Charge Lately Revived Against the Jewish People Is a Baseless Falsehood," London, 1840, published a protest signed by fifty-eight converts, of whom the first was M. S. Alexander, bishop of the Anglican Church at Jerusalem (d. 1845). It runs as follows: "We, the undersigned, by nation Jews, and having lived to years of maturity in the faith and practise of modern Judaism, but now, by the grace of God, members of the Church of Christ, do solemnly protest that we have never directly nor indirectly heard, much less known, among the Jews, of the practise of killing Christians or using Christian blood, and that we believe this charge, so often brought against them formerly, and now lately revived, to be a foul and Satanic falsehood." Popes: See "Die Päpstlichen Bullen über die Blutbeschuldigung," Berlin, 1893, and Munich (Aug. Schupp), 1900, contains the bulls of Innocent IV., Gregory X., Martin V., Paul III., and the opinion of Lorenzo Ganganelli (later Clement XIV.). Many popes have either directly or indirectly condemned the blood accusation; no pope has ever sanctioned it. Monarchs: The German emperors Frederick II. (1236); Rudolph of Habsburg (1275); Frederick III. (1470); Charles V. (1544); the Bohemian kings Ottocar II. (1254), etc.; the Polish kings Boleslaw V. Pius (1264); Casimir III. (1334); Casimir IV. (1453); Stephen Báthori (1576); and others. For Hungary see the constitution of 1791; for Turkey, 'Abd al-Majid (1840). Christian scholars and divines: Johann Christoph Wagenseil (1633–1705); Johann Jakob Schudt, author of "Jüdische Merkwürdigkeiten" (1714); Johann Salomo Semler (1725–91); Alex. McCaul; Franz Delitzsch (1813–90); J. J. I. von Döllinger (1799–1890); and many others.

G. J.

BLOOD-MONEY: Ransom paid by a murderer to the avenging kinsmen of a murdered man, in satisfaction for the crime. Among the Anglo-Saxons and other Germanic peoples blood-money or "wergeld" was commonly paid, and a regular scale of prices fixing the value of lives was established by law (Kemble, "The Anglo-Saxons in England," ii. 276 *et seq.*). Blood-money was unknown in Roman law. All crimes except murder could be satisfied by payment of a fine; but for murder the death penalty was invariably inflicted (see "The Law of the Twelve Tables," Table VIII.).

The Jewish law went further than the Roman law in this respect. The code of the Twelve Tables simply states that for murder the death penalty shall be inflicted, and for lesser crimes the money compensation may be received in satisfaction, thus inferentially prohibiting the taking of blood-money for murder. The Biblical law (Num. xxxv. 31, 32), however, expressly prohibits it. It forbids (1) the taking of blood-money for the life of a murderer, allowing him to escape; and (2) the taking of it for a murderer who has fled to a city of refuge, allowing him to return to his home. The crime of taking human life was the most heinous known to the Jewish law (*ib.* xxxv. 34).

According to another Biblical code (Ex. xxi. 28–32), the owner of a goring ox who, knowing the dangerous nature of the animal, still did not keep it in subjection, was put to death if the ox killed a human being. But as the death in this case was not directly caused by the owner of the ox, a concession was made in his favor, and he was permitted to ransom his life. The Talmud modifies the severity of the law through the following process of reasoning: If the owner of the ox committed the murder, he was forced to die according to the law (Num.

xxxv. 31); but if his ox killed a person, the ox was slain, and the owner paid blood-money. If the ox were not slain, then the owner was put to death; hence R. Ḥizkiyah said, "The law in Num. xxxv. 31 requires only the actual murderer to be killed; and you can not put a man to death because of a death caused by his ox" (Sanh. 15b).

The murderer who had come to the city of refuge, if guilty of wilful murder, was given into the hands of the avenger to be executed; but if guilty of accidental homicide, remained in the city of refuge until the death of the high priest (Num. xxxv. 25). It appears, therefore, that even one guilty of accidental homicide could not expiate the offense by the payment of blood-money, but must serve his full term in the city of refuge (Ket. 37b). The strict application of this law led the rabbinical authorities to the conclusion that the death penalty was an absolute satisfaction for the crime and its consequences, and that therefore the relatives of the murdered person had no claim in damages against the murderer. The law in Ex. xxi. 22 was thus explained: "If there is no danger to life from the injury, the murerer is punished by fine; but if death results, he is not punished by fine, because he is subjected to the death penalty" (Mishnah Ket. iii. 2).

Maimonides states the matter as follows: "The court must take care that no blood-money be taken from the murderer even if he would give all the money in the world, and even if the avenger would be willing to release him; because the life of the murdered man is not the property of the avenger, but the property of God, and God has said, 'Ye shall take no blood-money for the life of a murderer' (Num. xxxv. 31); and 'There is no sin so great as that of murder, for blood defileth the land' (Num. xxxv. 33)"; (Maimonides, "Yad," Roẓeaḥ, i. 4; see articles Damages, Homicide, Ransom).

G. D. W. A.

BLOOD-MONEY IN RUMANIA: According to the common law of Moldavia and Wallachia, the murder of a person entailed not only the execution of the murderer, but also the imposition upon him, or if he were unknown upon the village nearest to the spot where the murder had been committed, of a heavy fine ("prezul sangelui" = blood-money), which fell to the relations of the victim. Villages that could not pay the fine were depopulated.

This legislation applied to Jews in common with the other inhabitants, and the communities were made collectively responsible for the fines. As commercial travelers and pedlers, the Jews journeyed constantly, and while the Rumanians were hospitable to every traveler, they considered it hardly a mortal crime to murder a Turk, a Tatar, or a Jew (Cantemir, "Descriptio Moldaviæ," Rumanian ed., p. 260, Jassy, 1851). The fine imposed for the murder of a Jew was very heavy; a decree of Prince Petrashcu of Wallachia, in 1553, mentions that Mircea the Great (1382–1409) amerced the village of Vianul, beyond the Olt, in the sum of 40,000 aspers, upon the complaint of the wife and the mother of a Jew who had been murdered in that vicinity. The villagers, being unable to raise such a sum, implored the clemency of the prince, who paid the amount out of his own treasury.

In order to evade payment of blood-money, villagers, on finding a corpse, would often throw it into a river or pond, or perhaps inter it, to avoid notice by the authorities. This practise caused great hardship to Jewish wives who, in addition to the loss of their husbands, saw themselves doomed to perpetual widowhood by the Jewish law concerning disappearances (see 'Agunah).

The institution of blood-money was abolished by the law of 1831, but the murders of Jewish travelers and Jewish tavern-keepers (especially numerous on the main highways) continued unabated. A singular consequence of these frequent murders among Rumanian Jews, more especially in Moldavia, is the custom of regarding Jewish tavern-keepers who have thus been foully dealt with, as martyrs in a religious cause, for the reason that they have lost their lives in the endeavor to provide "kosher" food for their traveling coreligionists. The sons of such are called to the Torah by the proud title "Ben ha-Ḳedoshim" (Son of the Saints).

D. E. Sd.

BLOOD-RELATIONSHIP.—Biblical Data: Family connection between persons otherwise than by marriage. To the casual reader of the Old Testament, blood-relationship seems always to have been reckoned by the Hebrews from father to son. The genealogies are all drawn up on this basis (compare Gen. iv., v., x., xxii. 20–24, xlvi.; I Chron. i.-ix., etc.). These genealogies, however, are not uniform. Some of them give the name of the mother (as Gen. xxii. 20, 24), while many of them give the names of father and son merely. Another interesting variation is that one set of passages represents the mother as naming the children (see, for example, Gen. iv. 1, 25; xxix. 32–35), while another set of passages attributes that function to the father (*e.g.*, Gen. xvii. 19; xli. 51, 52). For further light on the ideas of relationship see the Critical View.

Historical Survey.

Blood-relationship was interpreted broadly as a brotherhood which bound together by peculiar ties all who were descended from a common father. In II Sam. v. 1 all the tribes of Israel are said to be bone of David's bone and flesh of his flesh; *i.e.*, to be his brethren. Similarly, in Lev. xxv. 39–46 all Israelites are considered brethren, as opposed to the people of other nations. This idea of brotherhood was founded on a belief that they were all sharers in a common blood. While these broad conceptions of brotherhood prevailed, they did not obscure in the Hebrew mind the fact that in every generation men of one father (*i.e.*, brothers in a narrower sense) were under more peculiar obligations to one another than others of the same nation. Thus, in certain cases restitution had to be made to the nearest of kin (Num. v. 7, 8), and in other cases peculiar duties devolved on the nearest kinsman (compare Ruth ii. 20, iii. and iv. *passim*; see Goel). Other evidence that in the later time degrees of relationship were recognized is shown by Tobit vi. 10 and Luke ii. 36.

Marriage Prohibitions.

The recognition of certain differences in the degrees of kinship belongs to an early period; for marriages within certain degrees of kinship were prohibited from very ancient times. In Lev. xviii. marriage with a father or mother, son or daughter, grandson or granddaughter, or with a consort of any of these, is prohibited, as is the marriage of a man to a woman and her daughter, or to two sisters at the same time. There is involved in some of these prohibitions a recognition of an artificial relationship; but even these are based on the strong feeling of kinship with those of one family. Not all the prohibitions of this law are, however, primitive; for it defines a sister (verse 9) as "the daughter of thy father or the daughter of thy mother"; though in ancient times marriages seem to have been permitted between children of the same father, if they had different mothers; cases in point are the marriages of Abraham and Sarah (Gen. xx. 12), and Amnon and Tamar (II Sam. xiii. 13).

Blood Avenger.

As among the Arabs, it was regarded by the Hebrews a duty to avenge the blood of a murdered relative; and if this were not done, Yhwh was thought to be displeased. Thus Joab avenged his brother Asahel (II Sam. iii. 27); and Yhwh sent a famine because the Gibeonites were not avenged of the house of Saul (II Sam. xxi. 1 *et seq.*). It was in consequence of this custom that the Cities of Refuge were founded. See also Avenger of Blood.

——**Critical View:** It is a feature of primitive culture to form clans artificial in organization though not necessarily of different stocks, which select some totem as their emblem (compare Giddings, "Principles of Sociology," pp. 270–272; and Keasby, in "International Monthly," i. 393 *et seq.*). These clans in the course of time regard all their members as brethren descended from the common totem. In order to account for the growth of the clan it has been supposed by some scholars that clans meeting others who have for some reason chosen the same totem will naturally regard one another as brethren too. In this way an enlarged and artificial brotherhood is formed, which is, however, conceived as real. The existence of "Leah," "Rachel," and "Caleb" (denoting wild cow, ewe, and dog) as clan names among the Hebrews, taken in connection with the evidence from other parts of the Semitic world, makes it probable that relationships originally artificial were by the Hebrews counted as blood-relationships (compare W. R. Smith, "Animal Worship and Animal Tribes Among the Arabs and in the Old Testament," in "Journal of Philology," ix.; *idem*, "Kinship and Marriage in Early Arabia," ch. vii.; Jacobs, "Studies in Biblical Archæology," iv.; and Barton, "Semitic Origins," ii.).

Matriarchate.

Among the Semites also kinship was originally reckoned, as among many other primitive nations, through the mother (see W. R. Smith, "Kinship," etc., pp. 145–165, 246–253; Barton, *op. cit.* ii.). This seems to have been also the case among the Hebrews. In the earlier Jahvistic document the mother names the child, which, as Wellhausen points out, is a relic of maternal kinship (compare "Nachrichten der Königlichen Gesellschaft der Wissenschaften zu Göttingen," 1893, p. 478, note 2). By the time of the production of the Priestly Code, relationship was reckoned through the father; so that the mother's name was then suppressed, and the father named the child. In accordance with the system of maternal kinship, the children of Jacob are said (Gen. xxxi. 43) to belong to their mother's clan. The marriage of Abraham and Sarah and that of Amnon and Tamar—though in each case between children of the same father—are explained by the fact that blood-relationship was counted only through the mother.

Adoption and Blood-Relationship.

Some further instances of the artificial assumption of blood-relationship, which differ in character from the primitive totemic system, remain to be considered. Adoption, in the sense of the legal transfer of filial rights from one person to another, seems not to have been known in Israel as it was among the Romans. There are three possible instances of it in the Old Testament: (1) the adoption of Moses by Pharaoh's daughter (Ex. ii. 10), which does not seem to have made the blood-bond to his own people less binding; (2) the adoption of Genubath by the Egyptian queen (I Kings xi. 20), which seems to have been a survival of kinship through the mother; and (3) the adoption of Esther by Mordecai (Esther ii. 7), which was done under foreign influence. Adoption in the modern sense of the word played no important part in Israel's system of relationship (see Adoption).

Levirate.

Closely related to adoption was the system of the levirate, whereby when a man died without issue his brother or nearest kinsman was required to marry the widow, and the first son born of such levirate marriage was counted as the son of the dead brother (Gen. xxxviii.; Deut. xxv. 5–10; Ruth *passim*; Matt. xxii. 25 *et seq.*). A similar custom prevailed among the Arabs (compare W. R. Smith, "Kinship," etc., p. 87) and among the Abyssinians (compare Letourneau, "Evolution of Marriage," p. 265), as well as among many non-Semitic peoples (compare Starcke, "Primitive Family," pp. 157, 158; "International Journal of Ethics," iii. 465; and Westermarck, "History of Human Marriage," pp. 510–514). (For the origin and meaning of the custom see Levirate.) It is enough to note here that it introduced a system of blood-relationship in part artificial.

In Lev. xviii., where the degrees of kinship in which marriage is prohibited are enumerated (compare also Lev. xx.), the consort of a near kinsman or kinswoman is counted as within the prohibited degrees, thus recognizing a certain artificial kinship. Some writers hold that Lev. xviii. 16 and xx. 21, by prohibiting marriage with a deceased brother's wife, abolished the levirate (so Nowack, "Hebräische Archäologie," i. 346; and Benzinger, "Hebräische Archäologie," p. 346); and a confirmation of this is found in Num. xxvii. 1 *et seq.*, which provides for the succession of daughters in case a man dies without male issue. Others hold that Leviticus gives the general prohibition, while Deut. xxv. 5–10 contains the one exception (so Driver, "Deuteronomy,"

p. 285). At all events, the levirate seems to have survived till the first century of the common era.

In ancient Semitic society, blood-relationship rested not only upon the basis of common blood, but upon the fact that kinsmen constantly ate together and renewed the physical bond (compare W. R. Smith, "Religion of the Semites," 2d ed., pp. 269 *et seq.*). Covenants of brotherhood were made between those who were really not related to one another, by opening the veins of the covenanters and tasting each other's blood, as well as by eating together (compare Trumbull, "Blood Covenant," and W. R. Smith, *op. cit.* pp. 315, 479). Such artificial brotherhoods seem to have been recognized in Israel (compare Amos i. 9).

J. JR. G. A. B.

BLOOMFIELD, MAURICE: Professor of Sanskrit and comparative philology in Johns Hopkins University, Baltimore, Md.; born at Bielitz, Austrian Silesia, February 23, 1855; emigrated to America in 1867. He studied at Chicago and Furman, (S. C.) universities, and at Yale, Berlin, and Leipsic, and received the degree of doctor of philosophy from Johns Hopkins in 1879, while Princeton conferred on him the honorary degree of doctor of laws in 1896.

Bloomfield is one of the most prominent Sanskrit scholars in America, and is recognized as the chief living authority on the Atharva Vêda. Besides Sanskrit, Bloomfield has made contributions to comparative grammar, Greek, Latin, and Balto-Slavic, and has treated various problems of the science of religion, especially in relation to India and its literature. He is a member of the American and German Oriental societies, American Philological Association, Royal Bohemian Society of Prague, and other learned bodies.

Among Bloomfield's chief works are: an edition of the "Kauçika-Sutra," New Haven, 1890; a volume of selected hymns from the Atharva Vêda, with extracts from the ritual and commentary, forming vol. xlii. of Max Müller's "Sacred Books of the East," Oxford, 1897; and "Atharva Vêda," Strasburg, 1899, forming a portion of the "Grundriss der Indo-Arischen Philologie" of Bühler and Kielhorn. His latest contribution, in which he has been assisted by Richard Garbe of Tübingen, is a magnificent photographic edition of the Paippalada recension of the Atharva Vêda, 3 vols., Baltimore, 1901.

A. L. H. G.

BLOOMFIELD-ZEISLER, FANNY: American pianist; sister of Maurice Bloomfield; born at Bielitz, Austrian Silesia, July 16, 1866. In 1868 her parents settled in Chicago, Ill., and there she received her first instruction in piano from Bernhard Ziehn and Carl Wolfsohn. At the age of ten she played at a public concert in Chicago, and two years later went to Vienna to study with Leschetizky. At the expiration of five years she returned to the United States, where, from 1883 to 1893, she repeatedly gave recitals, playing with all the leading orchestras throughout the country.

In 1893 Bloomfield-Zeisler made a tour through Europe; and such was her success at Berlin, Leipsic, Frankfort, Vienna, and elsewhere, that she prolonged her stay abroad until 1895. During the season 1895-96 she gave upward of fifty concerts in America, and in 1897 made a tour of the Pacific states. In 1898 she again went abroad, and gave a series of concerts in Great Britain and France. She now (1902) resides at Chicago.

A. J. So.

BLOSZ, KARL: German painter; born at Mannheim Nov. 24, 1860. He studied at the art school in Carlsruhe from 1880 to 1883, and was a pupil of K. Hoff and of Von Lindenschmid of the Munich Academy from 1883 to 1887. Since 1887 he has worked actively in Munich. One of his paintings, entitled "Vor dem Dîner," is now in the Dresden gallery.

S. A. M. F.

BLOWITZ, HENRI GEORGES STEPHAN ADOLPHE OPPER DE: Special correspondent at Paris of the London "Times"; born at Blowitz, Bohemia, Dec. 28, 1825. At the age of sixteen he left his native country for France, where he was appointed professor of German at the Lyceum of Tours. Upon leaving that institution he visited Limoges, Poitiers, and Marseilles. He then took a course at the university until 1860, and on May 6 of that year received permission to assume the present form of his name. At this time he occupied himself with the invention of a machine for wool-carding by steam, but soon devoted himself to the study of foreign politics, contributing to several periodicals, such as the "Gazette du Midi" and "La Décentralisation" of Lyons. In this capacity of journalist he revealed the history of Ismail Pasha's special train, which caused the defeat of De Lesseps in the election of 1869; he was not prosecuted, however, owing to the efforts of M. Thiers in his behalf.

At the close of the Franco-Prussian war Blowitz rendered valuable assistance to General Espirent de la Villeboisnet in facilitating the suppression of the Commune at Marseilles, by establishing telegraphic communication with M. Thiers at Versailles by means of a private wire when all other means of communication had been destroyed by the insurgents. In recognition of this achievement Blowitz, in June, 1871, received the medal of the Legion of Honor. In the following month he became correspondent of the London "Times," and in 1874 was appointed special Paris correspondent of that paper, in which capacity he, on May 9, 1874, secured permission to communicate with the London office daily from 9 A.M. to 3 P.M. by special wire.

In 1875 he revealed certain plans of the German government which were said to aim at a second invasion of France; and he secured the full text of the Treaty of Berlin for the London "Times" before the signatures of the plenipotentiaries had been affixed to the document.

It is, however, as an interviewer that Blowitz is best known, and among the numerous celebrities interviewed by him may be mentioned: Bismarck, the Sultan of Turkey, Abd al-Hamid, Alfonso XII., Charles, King of Rumania, Pope Leo XIII., Thiers, Gambetta, Prince Lobanoff, Comte de Chambord, Marquis Tseng, Cardinal Jacobini and the French statesmen Duclerc and Jules Ferry. Blowitz is a doctor of philosophy and officier de l'Académie, and on July 30, 1878, he was elevated to the rank of officer of the Legion of Honor. He has been a contributor to the "Contemporary Review," "Harper's Magazine," and "Paris Vivant," and he is the author of the following works: "Feuilles Volantes," 1858; the comedy, "Midi à Quatorze Heures"; "L'Allemagne et la Provence," 1878; "Le Mariage Royal d'Espagne," 1878; "Une Course à Constantinople," 1884. Blowitz, however, is more especially renowned for his journalistic activity, and he is said to have contributed more than 4,000 columns to the London "Times."

S. J. So.

BLÜCHER, EPHRAIM ISRAEL: Austrian rabbi and author; born Oct. 2, 1813, at Glocksdorf, Moravia; died at Budapest April 6, 1882. For some years he was tutor in Hebrew at the University of Lemberg; then officiated as rabbi at Osviecin, Galicia, and Kosten, Moravia; afterward he went to Vienna, where he founded a real-gymnasium, which had but a brief existence. Later he lived for a time at Neuhäusel, Hungary, and finally at Budapest.

Blücher is the author of a Hebrew grammar, "Marpeh Lashon Arami" (Healing of the Aramaic Tongue), treating of the Biblical, Targumic, and Talmudic Aramaic in eighteen sections; preceded by "Maggid me-Reshit," a Hebrew translation of a portion of Julius Fürst's "Lehrgebäude der Aramäischen Sprache" (Vienna, 1839). He also issued "The Book of Ruth," with German translation and Hebrew commentary, Lemberg, 1843; and "Die Synagogenfrage für Deutsche Israeliten," Vienna, 1860. In the last years of his life, driven by stress of circumstances, he issued several periodicals under different titles; but in each case only a few numbers appeared.

C. M. K.

BLUM, ABRAHAM: French major; born in 1823; died at Boulogne, France, in 1894. He distinguished himself in the Crimean war in 1854, having been wounded in the shoulder, and received from the sultan the Order of Medidje. Upon his return to France, where he had been counted among the fallen on the battle-field, he was accorded the cross of the Legion of Honor.

In 1859 Blum left for Italy to participate in the war with Austria; was again wounded at the battle of Solferino, and then promoted on the field to the rank of captain. Having retired in 1870 as chief of battalion, he was appointed, at the outbreak of the Franco-Prussian war, adjutant-major of the National Guard of Paris. In 1875 he received an appointment in the newly organized territorial army.

BIBLIOGRAPHY: *Jewish Chronicle*, Feb. 9, 1894, p. 9.

S. B. B.

BLUM, DAVID: German Talmudist of the middle of the sixteenth century; rabbi at Sulzburg, near Freiburg in Baden [?]. He was classed among the best Talmudic authorities in Germany. Among his pupils Joseph B. Isaac ha-Levi ASHKENAZI was proud to have had Blum for his master (see his epistle against Meïr b. Gedaliah reprinted in Zunz, "'Ir ha-Ẓedeḳ," note 35). Blum copied and compiled various works. The city library of Hamburg contains a copy of the "Niẓẓaḥon" and a collection of "sheṭarot" (documents) marked as copied by him.

It is uncertain whether Blum is identical with David b. Moses Blumes (בלומיש), a friend of Solomon b. Jehiel Luria, in whose collection of responsa (No. 37, ed. Fürth, p. 24a) is included a responsum of Blumes. If he is identical, he was at one time in Palestine, as Luria's friend wrote from that country. Blum is probably identical with David of Sulzburg, whom Joseph b. Gershon ha-Kohen of Cracow in his responsa (No. 31) calls "meḥuttan" (relative by marriage).

L. G.

BLUM, ERNEST: French dramatist; born in Paris Aug. 15, 1836. The son of an actor, he began at an early age to work for the theater. At eighteen he produced his first piece, for the Variétés, entitled "Femme Qui Mord." His subsequent works for various theaters included the following: for the Délassements Comiques: "L'Escarcelle d'Or" (in collaboration with Al. Flan), "Suivez le Monde," "Les Délassements en Vacances" (1860), "L'Almanach Comique" (1860), "A Vos Souhaits" (1860), "Paris Journal," "Le Plat du Jour," "La Tour de Nesle pour Rire" (1861), "En Zigzag" (1861), "Les Jolies Farceurs" (1862), "Les Noces du Diable" (1863), etc.; for the Gaité: "La Petite Pologne" (with Lambert Thiboust, 1861); for the Variétés: "Crockbête et Ses Lions" (with Clairville, 1863), "Montjoie Fait Peur" (with Giraudin, 1863), "La Revue au Cinquième Etage" (with Giraudin and Clairville, 1863); for the Ambigu: "Rocambole" (with Anicet Bourgeois, and Ponson du Terrail, 1864), "Rose Michel" (1875), "L'Espion du Roi" (1876); for the Châtelet: "La Lanterne Magique" (with Clairville and Monnier, 1865), "Cendrillon" (with the same, 1866), "Le Diable Boiteux" (with Clairville and Flan, 1866), "Les Voyages de Gulliver" (with Clairville and Monnier, 1867), "Le Vengeur" (with F. Brisebarre, 1868); for the Renaissance: "La Jolie Parfumeuse" (with H. Crémieux, 1874). He also wrote "Une Avant-Scène" (1876), with Toché, "La Revue des Variétés" (1879), "Belle Lurette" (1880), "La Noce d'Ambroise" (1881), "Le Château de Tire-Larigot" (1884), "Le Petit Chaperon Rouge" (1885), "Mademoiselle Gavroche" (1885), "Le Parfum" (1888), "Les Femmes Nerveuses" (1888), "Le Cadenas" (1889), "Paris Fin de Siècle" (1890), "Madam Mongodin" (with Toché), at the Vaudeville (1890); "Madame l'Amiral" (1892), "Monsieur Coulisset" (1892), "La Maison Tamponin" (1893), "La Rieuse" (1894), "Le Carnet du Diable" (1895), "Le Carillon" (1897).

In book form he has published "Entre Bicêtre et Charenton" (1866), "Journal d'un Vaudevilliste" (1891,) and "Les Mémoires d'un Vieux Beau" (1896). He is also the author of a "Biographie Complète d'Henri Rochefort" (Brussels, 1868.)

Blum was for several years on the editorial staff of the "Charivari," and he has been associated with "Le Rappel" since its establishment in 1869.

S. J. W.

BLUM, ISAAC AUGUST: French mathematician; born at Paris in 1831; died there Jan. 5, 1877. He entered in 1831 the Ecole Polytechnique and was graduated lieutenant of marine, but resigned in 1833 and devoted himself to teaching. Involved in the events of 1848, he was connected editorially with the "Journal des Travailleurs," and was appointed vice-president of the commission of Luxembourg. Blum was arrested for having taken part in the publication of an injurious libel addressed to the president of the Assemblée Constituante, but was soon released. He then took up his scientific occupation.

Blum is the author of: (1) "Résumé d'Algèbre Elémentaire"; (2) "Résumé d'Arithmétique," Paris, 1843, both of which are comprised in the "Collection des Tableaux Polytechniques"; (3) "Cours Complet de Mathématiques," in two volumes, Paris, 1843-45. In 1844 he founded a scientific review, "Bulletin Polytechnique," which, however, he soon discontinued; and in 1855 a daily paper treating of mathematics, "La Science," which is still published as a weekly.

Bibliography: *La Grande Encyclopédie*, s.v.; Larousse, *Dictionnaire*, s.v.

S. I. Br.

BLUM, JULIUS (also known as **Blum Pasha**): Austro-Egyptian financier; born at Budapest, Hungary, in 1843. In 1869 he became director of the Austro-Egyptian bank at Alexandria; in 1877 he was appointed state secretary in the Egyptian Ministry of Finance, by the khedive; and two years later, pasha and minister of finance. He retained this position until 1890, when he accepted the appointment of director of the Austrian Credit-Anstalt at Vienna. Blum has received many decorations: he is K.C.B., C.M.G., commander of the French Legion of Honor, grand officer of the Italian Order of the Crown, knight of the Rother Adler Orden, etc.

S. M. K.

BLUMENBERG, LEOPOLD: American soldier; born in the province of Brandenburg, Prussia, Sept. 28, 1827; died at Baltimore Aug. 12, 1876. He was the son of Abraham and Sophia Blumenberg, and the twenty-first of a family of twenty-two children. Soon after his birth Blumenberg's parents moved to Frankfort-on the-Oder, and at an early age he was graduated from the gymnasium of that city. He served in the Prussian army in the Danish war of 1848, enlisting as a private and being promoted to the rank of first lieutenant. He was decorated for his services, but the anti-Semitism prevalent deprived him of his medal; and, resenting such treatment, he left for America in 1854, settling in Baltimore, where he was engaged in mercantile pursuits until 1861.

When Fort Sumter was attacked Blumenberg assisted in organizing the fifth Maryland infantry regiment, of which he was commissioned major. His efforts for the Union cause won for him the hatred of the Secessionists, forcing him to be guarded constantly to prevent their attacking and hanging him. He first served near Hampton Roads, was later attached to Mansfield's corps in the peninsular campaign, and commanded his regiment as colonel at Antietam, where he was severely wounded in the thigh by a sharpshooter. This ultimately caused his death. He returned home, and was confined to his bed for several months.

President Lincoln appointed Blumenberg provost marshal of the third Maryland district, with headquarters at Baltimore. He held this office from 1863 to 1865, making himself very unpopular by a strict enforcement of the laws. President Johnson appointed him to a position in the revenue department, and commissioned him brigadier-general United States volunteers, by brevet. For a long time resident in Baltimore, he was extremely popular with the German and the Hebrew element of that city. He held the office of president of the National Schuetzen-Verein of America, and was an active member of Har Sinai congregation and of the Hebrew orphan asylum.

A. A. M. F.

BLUMENBERG, MARC A.: American musician and editor; born at Baltimore, Md., May 21, 1861; educated in the public schools of that city, and later at the College of Loyola. After a thorough course in the various branches of music, he became musical critic of the Baltimore "American," and subsequently was associated with the Baltimore "Sun" in a similar capacity. In 1879 he removed to New York, where, in the following year, he established the "Musical Courier," one of the most influential musical weekly papers in existence, with branch offices in Germany, France, England, and Italy. Blumenberg is president of the Blumenberg Press Association, a member of the Social Science Association of New York, and of the Society for Psychical Research, London.

A. J. So.

BLUMENFELD, ARON WOLFF: German composer; born at Kurnik, Posen, Feb. 29, 1828. In 1846 he went to Berlin, where he studied with Rungenhagen, and afterward established himself as a teacher and composer. His more important works are an opera entitled "Künstlerleben," and a cantata first performed in 1851. Among his pianoforte compositions—mostly *morceaux de salon*—are the following: "La Fée Dansante," op. 9; "L'Espérance," waltz, op. 20; "Les Adieux de Berlin," op. 22; "Deutscher Triumphmarsch"; "Hochzeitsmarsch," op. 32; "Aldeutschlands Klage," funeral march, op. 40. An interesting compilation is the "Blumenlese," concert-music for 6 to 20 instruments arranged in a series of 96 separate books, many of them consisting of several numbers, and containing arrangements of German, Russian, Norwegian, American, English, French, and other songs, and transcriptions of dances, marches, operatic pieces, and various other selections from the works of Schumann, Lindblad, Seifert, Blomquist, and many other composers.

Bibliography: Mendel, *Musik-Lexikon*; Schirmer's *Catalogue*.

s. J. So.

BLUMENFELD, BERISH: Galician Hebraist; flourished in the first half of the nineteenth century. He was one of the wealthy Hebrew scholars of that part of Poland who contributed much to the spread of knowledge among their brethren, and whose work in the field of Neo-Hebraic literature was a true labor of love. Blumenfeld is the author of a German translation of the Book of Job, which he published with a Hebrew commentary (Vienna, 1826). His views on the authorship and date of Job were the subject of an interesting correspondence with S. D. Luzzatto, who insisted that Job was one of the oldest books of the canon. Blumenfeld also corresponded with Isaac Beer Levinsohn and assisted in the spread of the latter's works. He was an intimate friend of Simson Bloch ha-Levi, who dedicated to him his Hebrew translation of Manasseh b. Israel's "Vindiciæ Judæorum." A poem, "Motar ha-Adam" (Superiority of Man), by Blumenfeld, is published in "Bikkure ha-'Ittim," iv. 150–158.

Bibliography: *Kerem Ḥemed*, i. 53–58; *ib.* ii. 123–125; *Sefer ha-Zikronot*, pp. 71, 72; Fürst, *Bibl. Jud.* i. 123.

s. P. Wi.

BLUMENFELD, FEITEL (FADEI): Russian rabbi; born in 1826; died at Kherson Dec. 4, 1896. He graduated from the rabbinical college at Jitomir, and for about forty years officiated as rabbi in Kherson and in the Jewish agricultural colonies of Kherson and Bessarabia, in whose development he always took an active part. He introduced many useful reforms in the Jewish community of Kherson, and, being familiar with the Jewish question in Russia, was repeatedly summoned by the government to the conferences of Jewish rabbis at St. Petersburg. He contributed largely to the Jewish-Russian periodicals "Russki Yevrei" and "Razsvyet," especially on the Russian-Jewish agricultural colonies.

Bibliography: *Luaḥ Aḥiasaf*, 1897.

H. R.

BLUMENFELD, HERMANN FADEYEVICH: Russian lawyer, son of Feitel (Fadei): born in Kherson Sept. 2, 1861; received his education at the high school of his birthplace. He was graduated in 1883 from the New-Russian University of Odessa, which awarded him a gold medal and a prize for his treatise on the various kinds of landed property in Old Russia, entitled "O Formakh Zemlevladyeniya v Drevnei Rossii," Odessa, 1883. Blumenfeld has published an article on Crimean-Tatar landed property, entitled "Krimsko-Tatarskoe Zemlevladyenie," Odessa, 1888. He has been an extensive contributor to the Russian-Jewish periodicals "Voskhod," "Yevreiskoe Obozryenie," and others. His articles deal especially with the economic, industrial, and commercial activity of the Jews in South Russia.

Bibliography: Vengerov, *Kritiko-Biograficheski Slovar*, iii., St. Petersburg, 1892.

H. R.

BLUMENFELD, IGNATZ (ISAAC): Austrian publisher and merchant; born March 25, 1812, at Brody, Galicia; died Oct. 2, 1890, at Geneva, Switzerland. He was one of the wealthy Galicians who took delight in encouraging and spreading the new Hebrew literature. He visited Switzerland and Italy on a pleasure trip in the summer of 1834, and in the latter country met S. D. Luzzatto and J. S. Reggio, with both of whom he corresponded on literary subjects. He lived for several years in Odessa, between 1840 and 1850, and afterward returned to Vienna, where he remained until 1885, from which year until his death he lived in Switzerland.

Blumenfeld deserved well of modern Hebrew literature by his publication of four volumes of the "Oẓar Neḥmad," Vienna, 1856–63, a collection of literary letters on various subjects relating to the science of Judaism, which were thus made accessible to the average Hebrew scholar. These publications are to some extent a continuation of Goldenberg's "Kerem Ḥemed" and of the "Bikkure ha-'Ittim"; but they are more scientific and historical, giving less space to translations and to the feeble attempts at belles-lettres which filled so large a part of the former collections. Blumenfeld himself contributed very little to the "Oẓar Neḥmad," but Rapoport, Luzzatto, Geiger, and other learned contributors recognized the great service which he was rendering Jewish science by giving currency to works which, but for his generosity, would have remained unpublished.

Bibliography: *Ozar Neḥmad*, i. 181; ii., Preface and p. 17; Letteris, *Miktebe Bene Ḳedem*, p. 104, Vienna, 1866.

s. P. Wi.

BLUMENFELD, J. C.: Polish litterateur and revolutionist; born about 1810; died before 1840. Blumenfeld was one of the leaders of a band of young Poles concerned in the Polish revolution of 1831. The rising having proved a failure, Blumenfeld fled to London, where he produced a fantastic work, "Ecce Homo im Process mit dem König und dem Priester, oder Die Selbsterlösung der Menschen, ein Evangelium vom Jüngsten Gerichte," 1835. An English edition, under the title "The New Ecce Homo at Issue with King and Priest," appeared in London in 1839. The work contains dialogues in prose alternating with verses, the main subject of which is the scheme of kings and priests to enslave humanity, including a compact between Rome and the Church to degrade Israel. The book shows some power, but is wild and wandering.

Bibliography: Grätz, *Gesch. der Juden*, xi. 468–470; *Cat. British Museum*, s.v.

H. R. J.

BLUMENFELDT, SIMON (called also **Simon Sofer**): Russian calligrapher; born in Mitau, Courland, 1770; died at the same place 1826. He possessed the gift of writing in characters so small that they could be read only by the aid of a microscope. The Lord's Prayer was thus written by him nine times on a piece of paper the size of a square inch. He could write readable letters and words even on the very edge of ordinary vellum paper. He was also a skilful draftsman, and he used to embellish his excellent pencil sketches with all kind of verses and sentences. He traveled extensively through Europe, and received rewards from many sovereigns. Blumenfeldt presented numerous script portraits to Emperor Alexander I. of Russia, and a Pentateuch in Hebrew, of the size of a finger, to Pope Pius VII. He left in manuscript: "Diaries of Travel"; "Pene Shim'on," a commentary on the Bible, published by his son Moses in his work, "Magid Mesharim," Hanover, 1851: "Tenaim u-Ketubah le-Shew'uot we-Purim," a humoristic poem.

BIBLIOGRAPHY: R. Wunderbar, *Gesch. der Juden in Liv- und Courland*, Mitau, 1853; idem, *Gesch. der Juden in Courland*, in *Literaturblatt des Orients*, 1849, No. 38, where the year of his birth is given as 1760; Benjacob, *Ozar ha-Sefarim*, p. 289.

H. R.

BLUMENSTOCK VON HALBAU, LEO: Austrian physician; born at Cracow March 11, 1838; died there Feb. 28, 1897. Educated at the gymnasium and university of his native town and at the university at Vienna, he was graduated as doctor of medicine in 1862. He engaged in practise as a physician in Cracow, and became privat-docent in 1864 and in 1869 assistant professor in the faculty of law in the university of that city. In 1881 he was appointed to the chair of forensic medicine in the same university by the medical faculty. He held also the position of "Landesgerichtsarzt" (medical expert at the judicial court), and was raised to the nobility with the name "von Halbau" in 1891. Blumenstock is the author of: "Zur Lehre von der Vergiftung Durch Cloakengas," in "Vierteljahresschrift für Gerichtliche Medizin," lviii., 2d part; "Die Wreden-Wendtsche Ohrenprobe und Deren Bedeutung in Foro," in "Wiener Medizinische Wochenschrift," 1875; "Tod Durch Dynamit," in Friedreich's "Blätter für Gerichtliche Medizin," 1876, 1877; "Ueber Aphasie," *ib.* 1878. He has also contributed many essays on forensic medicine to the Polish journals of Cracow, Lemberg, and Warsaw. From 1877 until his death he was editor of the Polish medical weekly "Przeglad Lekarski."

S. F. T. H.

BLUMENTHAL, HEINRICH: German manufacturer and philanthropist; born at Darmstadt, Hesse, March 12, 1824; died there March 27, 1901. Even as a boy his love for technical work was noticeable, in consequence of which his father sent him to the technical high school of his native town. On being graduated thence he went to Vienna, Nuremberg, and Paris, working in those cities as an ordinary mechanic, and thus acquiring extensive knowledge.

Returning to Darmstadt, Blumenthal started a factory for the manufacture of agricultural implements, which became one of the largest factories of steam threshing-machines in southern Germany. He took great interest in the improvement of the condition of the farmers, and urged the passage of laws for their benefit. He also organized and took a leading part in agricultural societies. During the Franco-Prussian war he was very active in sending relief to the Hessian troops at the front, and supported from his own means a hospital on his estate in Darmstadt.

Blumenthal did much for the beautifying of his native city and toward ameliorating the condition of the laboring classes. In acknowledgment of his services in this respect, one of the leading thoroughfares in Darmstadt was named after him.

It was his influence with the Grand Duke of Hesse, during the anti-Semitic movement in Germany, which caused the government of Hesse to take a decided stand against the agitators and to protect the Jews. For a quarter of a century Blumenthal was a member of the city council, and for more than two decades the president of the Jewish community of Darmstadt.

Blumenthal was an active philanthropist, supporting many benevolent societies of different creeds, and assisting the worthy poor. In appreciation of his services to city and state he received the title of "Kommerzienrath," and was decorated with the Hessian Ludwig cross, the Prussian Order of the Crown, the Hessian cross for merit, and the medal for non-combatants.

S. F. T. H.

BLUMENTHAL, JOSEPH: American communal worker; born in Munich, Germany, Dec. 1, 1834; died in New York March 2, 1901. In 1839 he went to the United States with his parents, and in 1854 entered business at Mariposa, Cal., remaining there for five years. He then moved to New York, where he remained for the rest of his life.

Soon after his return from California Blumenthal interested himself in military matters, and was for a time a staff officer of the third regiment of cavalry of the National Guard of the State of New York.

Blumenthal soon became deeply interested in political, social, and Jewish communal affairs. He, together with W. M. Evarts and Joseph H. Choate, was a member of the famous Committee of Seventy which was instrumental in the overthrow of the notorious Tweed ring. In 1873-74 and 1888-91 he served as member of the New York Assembly, in which he was appointed to important committees, and he was for several years head of the Bureau of Incumbrances. From 1893 to 1895 he was commissioner of taxes and assessments.

In Jewish communal affairs he displayed the greatest interest. As member, trustee, and president of the Congregation Shearith Israel he labored indefatigably. He was also affiliated with various orders, such as the B'nai B'rith and the Masonic fraternity, attaining to honors in their ranks. But the achievement to which he devoted the last fifteen years of his life was the establishment and maintenance, in conjunction with the Rev. Dr. Sabato Morais and other workers, of the Jewish Theological

Seminary, of which institution he was president from its foundation in 1886 until his death.

A. B. D.

BLUMENTHAL, MARK: American physician; born July 11, 1831, at Altenstadt-on-the-Iller, Bavaria.

He came to America with his parents in Aug., 1839, attended the academy at Chambersburg, Pa., the public and high schools at Philadelphia, Pa., and graduated as doctor of medicine from the College of Physicians and Surgeons at Columbia University, New York, in 1852. He was assistant physician at Blackwell's Island Hospital during 1851–52; deputy coroner of New York city in 1853; and visited Europe in 1854, attending hospitals in London, Paris, and Munich. On his return he was appointed resident and attending physician to Mount Sinai Hospital (then called Jews' Hospital), New York, from 1855 to 1859, organizing its medical administration and formulating its records and monthly reports as in use to this day. From 1862 to 1894 he was president of and physician to the Institution for the Improved Instruction of Deaf Mutes, founded and supported by Jews for the benefit of Jewish and other children.

The special features of the system of teaching adopted by Blumenthal, and which was then almost unknown in this country, were: (1) reading from the lips of the speaker; and (2) the use of articulate speech, instead of the finger and sign language (dactylology) then and still generally employed in most of the state institutions.

During the Civil war Blumenthal was surgeon-major in the Third Regiment, National Guard. Besides many professional offices, such as president of the Medical Union, of the Northwestern Medical and Surgical Society, and of the Medical Board of the United Hebrew Charities, Blumenthal was one of the founders of the Young Men's Hebrew Association, founder and president of the Sabbath Observance Society of New York, and president of the Jewish Chautauqua (1901–02).

J.

BLUMENTHAL, NISSEN: Russian ḥazan; born in Jassy, Rumania, 1805; died in Odessa Feb. 9, 1902. Though educated for the rabbinate, his excellent voice and musical ability fitted him for a ḥazan. He emigrated to Russia, became cantor of Berdychev and also of Yekaterinoslav, and in 1841 was made chief cantor of the Brody congregation of Odessa, which position he held for fifty-five years, when old age forced him to retire. His son Leonhard, a singer in the Kharkov operahouse, died before him. Blumenthal was confined to his home by paralysis for the last six years of his life. His fortune was left to the choir of the temple which he made famous. He was the model "chorḥazan" of Russia, and did much to introduce systematic singing and the use of musical notes in Russian synagogues. P. Minkovsky declares his compositions more characteristically Jewish than those of the great cantors of Western countries.

Bibliography: *Allg. Zeit. des Jud.* 1891, No. 24, and 1902, No. 14; P. Minkovsky, in *Ha-Shiloaḥ*, viii., Nos. 4 and 5; *Ha-Meliẓ*, xl., No. 39; *Ha-Ẓefirah*, xxix., No. 50; *Der Jud*, Supplement, Nos. 13 and 14, Cracow, 1902.

H. R. P. Wi.

BLUMENTHAL, OSKAR: German author and playwright; born at Berlin March 13, 1852. He was educated at the gymnasium and the university of his native town, and at the university at Leipsic, where, in 1872, he received the degree of doctor of philosophy. After having been editor of the "Deutsche Dichterhalle" in Leipsic, he founded in 1873 the "Neuen Monatshefte für Dichtkunst und Kritik." In 1875 Blumenthal moved to Berlin, where he became theatrical critic of the "Berliner Tageblatt," holding this position until 1887, when he opened the Lessing Theater, of which he was director till 1898. From 1894 to 1895 he was also director of the Berliner Theater. Since 1898 he has been engaged exclusively in literary work.

Oskar Blumenthal.

Blumenthal is well-known as a critic and playwright. His critiques in the feuilletons of the newspapers sparkle with humor, at the same time doing justice to authors and actors. His plays have had merited success, and many of them have been well received at the leading German theaters. As a theatrical manager he was very successful.

Blumenthal is the author of many plays and novels, among which may be mentioned: "Allerhand Ungezogenheiten," Leipsic, 1874, 5th ed., 1877; "Für Alle Wagen- und Menschenklassen," *ib.* 1875; "Bummelbriefe," Danzig, 1880; and the comedies "Der Probepfeil," 1882; "Die Grosse Glocke," 1887; "Der Zaungast," 1889; "Grossstadtluft," 1891; "Hans Huckebein," 1897; "Im Weissen Rössl," 1898, the last three together with G. Kadelburg; "Merkzettel," 1898; and "Verbotene Stücke," 1900. He also edited "Grabbe's Werke und Handschriftlicher Nachlass," *ib.* 1878.

Bibliography: Meyers. *Konversations-Lexikon*, s.v.; Brockhaus, *Konversations-Lexikon*, s.v.

S. F. T. H.

B'NAI B'RITH, or **SONS OF THE COVENANT:** The largest and oldest Jewish fraternal organization. It has (1902) a membership of about 30,000, divided into more than 330 lodges and 10 grand lodges, distributed over the United States, Germany, Rumania, Austria-Hungary, Egypt, and Palestine. It was founded at New York in 1843 by a number of German Jews, headed by Henry Jones, for the purpose of instilling the principles of morality among the followers of the Mosaic faith—uniting them on a platform upon which all could stand regardless of dogma and ceremonial custom—and of inculcating charity, benevolence, and brotherly love as the highest virtues. Political and religious discussions were to be barred forever in order that harmony and peace might be preserved in the deliberations of the Order.

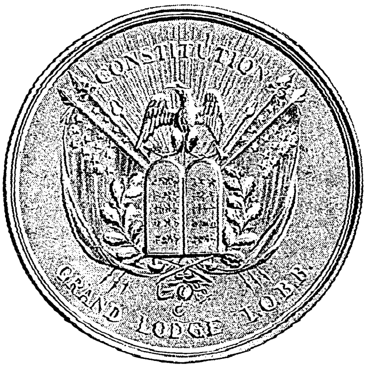
A constitution was adopted for the administration of the affairs of the Order; and in 1851, a sufficient number of lodges having been organized, the first grand lodge was established in the city of New York, and in the same year District Grand Lodge No. 2 was founded in the city of Cincinnati. The Order spread rapidly. Lodges were formed in nearly all of the Eastern and Western states; so that in 1856 District Grand Lodge No. 3 was instituted, with its seat in Philadelphia, Pa. The supreme authority was placed in a central body, which met annually and was composed of one representative from each lodge. At the meeting of the supreme body in 1857 a membership of 2,889, with an accumulated capital of $78,000, was reported. At the same session the constitution was remodeled, giving it a more democratic and representative character. A new ritual, the work of Dr. David Einhorn, was also introduced in keeping with the progressive spirit of the age.

B'nai B'rith Building, New York.
(From a photograph.)

A new era of development began in 1868, when, at a convention held in the city of New York, composed of representatives from each lodge, the present constitution was adopted. Meanwhile, three new grand lodges had been instituted: No. 4 in San Francisco, Cal.; No. 5 in Baltimore, Md.; and No. 6 in Chicago, Ill. The Order at that time numbered more than 20,000 members. Under the new constitution the supreme authority was placed in a president, to hold office for five years, and in an executive committee and a court of appeals, each of which was composed of one representative from each district, elected for five years. The first president was Julius Bien of New York, who had been the mastermind of the new constitution. He held the office until 1900, when he declined reelection on account of his advanced years; and Leo N. Levi of New York was unanimously chosen as his successor.

In 1873 another new grand lodge, No. 7, was added, which held jurisdiction over the Southern states. A new sphere opened for the Order in 1882, when Moritz Ellinger, as the deputy of the executive committee, instituted the first lodge in Berlin, Germany.

Meanwhile a number of institutions had arisen in the United States, founded and supported by the Order, such as the Orphan Asylum in Cleveland, housing nearly 1,000 inmates, supported by Districts 2, 6, and 7. Its erection was due to Benjamin F. Peixotto. Another institution is the Home for the Aged and Infirm at Yonkers, N. Y. The Atlanta Hebrew Orphan Asylum was established by District No. 5, through the influence of Simon Wolf of Washington, D. C. The Jewish Widows' and Orphans' Home of New Orleans and the Touro Infirmary at the same place are supported by District No. 7. Finally, the Denver National Jewish Hospital for Consumptives was established by District No. 2. The Order also established a public library, known as the Maimonides Library, in New York city; the B'nai B'rith Manual Training School at Philadelphia, and other educational institutions throughout the country. The Order presented to the United States a statue of Liberty, chiseled by Moses Ezekiel, a native of Cincinnati. At the suggestion of the Order, Benjamin F. Peixotto was commissioned to represent the United States as consul in Rumania, in order to influence the Rumanian government on the question of affording protection to its Jewish subjects. As there was no provision in the American budget for the maintenance of a consulate in Rumania, the Order provided the necessary funds.



Seal of the B'nai B'rith Order.

Extension to Europe.

When, in 1885, a sufficient number of lodges had been founded to warrant the establishment of a grand lodge for Germany, Julius Bien visited that country to inaugurate it. Meanwhile the growth of the Order in Rumania and Austria-Hungary had led to the institution of grand lodges with seats at Bucharest and Prague, and to the establishment of many useful benevolent institutions.

In America the Order established the Menorah, a monthly magazine, edited first by Benjamin F. Peixotto, afterward by Moritz Ellinger, and for a time by F. de Sola Mendes. In Vienna the Order publishes a quarterly review; in Berlin, a monthly report.

With the spread of the Order its usefulness as an international medium for the relief of the persecuted in various parts of the world has been established, and the principle of self-help has been inculcated in communities which had always looked to others for protection and aid. Of late the Order has established working relations with the great educational and relief associations of Europe, such as the Alliance Israélite Universelle of Paris, the Jewish Colonization Association of London, and the Israelitische Allianz of Vienna. At the Quinquennial Convention of the Order, held in Chicago (April 29 to May 3, 1900), a commission was appointed to invite the cooperation of all European and American kindred associations in instituting measures for the introduction of industries, agricultural employments, and modern education among the Jews of Galicia. The Order has also been active in finding employment for the Rumanian Jews, who through religious intolerance were compelled to leave their native country. This it does through the district lodges, which organize means whereby many individuals may, from time to time, obtain a livelihood by manual labor. Numbers of Rumanian Jews, on arriving in New York, are distributed among the district lodges.

During its existence the Order has expended millions of dollars in aiding the distressed among its members by means of donations to the sick, by loans, and by endowments to widows and orphans.

Immediately after the great storm at Galveston, Texas, Sept. 8, 1900, a fund of over $27,000 was contributed by the various lodges and members, and through the president, Leo N. Levi, it was employed to give a new start in life to Jewish sufferers by the storm. The fund was raised by telegrams in a few days, and the relief was almost immediate.

Following is a list of the district grand lodges, showing the jurisdiction of each, and the number of members:

District Grand Lodges.	Jurisdiction.	Number of Members.
No. 1...........	Massachusetts, New York, Rhode Island, Connecticut, Canada..	5,140
" 2...........	Colorado, Indiana, Kansas, Kentucky, Missouri, New Mexico, Ohio	3,100
" 3...........	Delaware, New Jersey, Pennsylvania, West Virginia.......	1,450
" 4...........	Arizona, California, Idaho, Montana, Nevada, Oregon, Utah, Washington, British Columbia.	2,400
" 5...........	District of Columbia, Georgia, Maryland, North Carolina, South Carolina, Virginia......	753
" 6...........	Illinois, Iowa, Michigan, Minnesota, Nebraska, South Dakota, Wisconsin	1,965
" 7...........	Alabama, Arkansas, Florida, Louisiana, Mississippi, Tennessee, Texas....................	2,950
" 8...........	Germany........................	4,800
" 9...........	Rumania........................	900
" 10...........	Austria........................	1,000

BOAR, WILD (distinguished from the swine merely by the designation as "swine of the forest," חזיר מיער [Hebr., "ḥazir"]): In Psalm lxxx. 14 the wild boar is introduced in a metaphor and described as coming out of the wood to root up the vine. Wild hogs have always been known in Palestine.

Richard Cœur de Lion is said to have had an encounter with a boar when crusading in that country, and the animal is still found in the morasses of the Jordan, around the Sea of Galilee, around Mount Tabor, and on the River 'Aujeh, north of Joppa (compare Thomson, "The Land and the Book," p. 49). See SWINE.

J. JR. G. A. B.

BOAS, EDUARD: German author and traveler; born at Landsberg-on-the-Warthe Jan. 1, 1815; died there June, 1853. He was destined for a commercial career by his parents; and, for the purpose of acquiring a knowledge of international trade methods, was sent through southern Europe. Instead of turning the voyage to this account, Boas utilized the experience and knowledge gained in writing sketches, novels, and other literary productions. His first effort in this direction, "Deutsche Dichter," was published in 1837, followed three years later by "Nachträge zu Schiller's Sämmtlichen Werken." The next year he published a similar work on Goethe, and followed this in a few months by "Des Kriegscommissär Pipitz Reisen nach Italien"—a comic romance revealing considerable talent. In 1842 he wrote "Sprüche und Lieder eines Indischen Brahmanen"; and in 1844 "Pepita," a novel, and "In Skandinavien." His other works are: "Reiseblüthen aus der Oberwelt"; "Reiseblüthen aus der Sternenwelt"; and "Schiller und Goethe im Xenienkampf," 1852.

BOAS, IMAR: German physician and medical author; born at Exin, province of Posen, Prussia, March 28, 1858. After having completed his studies at the gymnasium, he attended the medical courses at the universities of Berlin, Halle, and Leipsic, graduating as doctor of medicine in 1880. In 1882 he established a practise in Berlin, studying especially the diseases of the digestive tract, and opening a dispensary and hospital for the diseases of the abdominal section of the alimentary canal, the first of its kind in Germany. Since then Boas has become a specialist in this branch of medicine.

Boas is the author of numerous essays and of the following works: "Diagnostik und Therapie der Magen-Krankheiten," Leipsic, 1890; "Diagnostik und Therapie der Darmkrankheiten," Leipsic, 1899. Since 1895 he has been editor of the "Archiv für Verdauungs-Krankheiten."

BOAZ.—Biblical Data: One of the relatives of Elimelech, husband of Naomi; a wealthy Judean, living at Bethlehem in Judah (Ruth ii. 1). He was one of the kinsmen of Ruth; as such he had the privilege of redeeming the family estate sold by Naomi after Elimelech's death. Therefore when Ruth appealed to his kinship, he redeemed the property (Ruth iii. 9, iv. 3). In consequence of this he had to marry Ruth, in order "to raise up the name of the dead" (Ruth iv. 5, 10). Their son Obed was, according to tradition, the grandfather of David (Ruth iv. 22).

J. JR. B. E.

——**In Rabbinical Literature:** Boaz is identified by some rabbis with the judge Ibzan of Bethlehem (Judges xii. 8). It is further said that he lost all his sixty children during his lifetime because he did not invite Manoah, Samson's father, to any of the marriage festivities in his house. For, since Manoah was at that time without children, Boaz thought that he need not consider on such occasions a childless man who could not pay him back in kind (B. B. 91a). According to Josephus, "Ant." v. 9, § 1, Boaz lived at the time of Eli. Boaz was a just, pious, and learned judge, and the custom of using the Divine Name in greeting one's fellow-man (Ruth ii. 4) formulated by him and his bet din received the approval of even the heavenly bet din (Mak. 23b; Yer. Ber. ix. 14c; Ruth R. to ii. 4).

His Conduct Approved.

Being a pious man, Boaz on his first meeting with Ruth perceived her conscientiousness in picking up the grain, as she strictly observed the rules prescribed by the Law (compare GLEANING OF THE FIELDS). This, as well as her grace and her chaste conduct during work, induced Boaz to inquire about the stranger, although he was not in the habit of inquiring after women (Ruth R. to ii. 5; Shab. 113b). In the conversation that followed between Boaz and Ruth, the pious proselyte said that, being a Moabite, she was excluded from association with the community of God (Deut. xxiii. 4). Boaz, however, replied that the prohibition in Scripture applied only to the men of Moab, and not to the women. He furthermore told her that he had heard from the Prophets that she was destined to become the ancestress of kings and prophets; and he blessed her with the words: "May God, who rewards the pious, also reward you" (Targ. Ruth ii. 10, 11; Pesik., ed. Buber, xvi. 124a). Boaz was especially friendly toward the poor stranger during the meal, when he indicated to her by various symbolic courtesies that she would become the ancestress of the Davidic royal house, including the Messiah (Ruth R. to ii. 14; Shab. 113b). As toward Ruth, Boaz had also been kind toward his kinsmen, Naomi's sons, on hearing of their death, taking care that they had an honorable burial (Ruth R. to ii. 20).

Boaz and Ruth.

Although Boaz was the prince of the people, he himself supervised the threshing of the grain in his barn, in order to circumvent any immorality or theft, both of which were rife in his days (Tan., Behar, ed. Buber, viii.; Ruth R. to iii. 7). Glad in his heart that the famine was over in Israel, he sought rest after having thanked God and studied for a while in the Torah (Tan., *l.c.*; Targ. Ruth iii. 7; and Ruth R. *ib.*). Aroused out of his first sleep by Ruth, he was greatly frightened, as he thought that she was a devil; and he was convinced of the contrary only after touching the hair of her head, since devils are bald (Tan., *l.c.*). When he perceived the pure and holy intentions of Ruth he not only did not reprove her for her unusual behavior, but he blessed her, and gave her six measures of barley, indicating thereby that six pious men should spring from her, who would be gifted by God with six excellences (compare Isa. xi. 2; Sanh. 93b; Num. R. xiii. 11; Ruth R. and Targ. to Ruth iii. 15; the names of the six men differ in these passages, but David and the Messiah are always among them). Boaz fulfilled the promises he had given to Ruth, and when his kinsman (the sources differ as to the precise relationship existing between them) would not marry her because he did not know the Halakah which decreed that Moabite women were not excluded from the Israelitic community, Boaz himself married her (Ruth R. to iv. 1). Boaz was eighty and Ruth forty years old (*idem* to iii. 10), but their marriage did not remain childless, though Boaz died the day after his wedding (Midrash Zuṭṭa, ed. Buber, 55, below).

J. SR. L. G.

——**Critical View:** The historical value of the genealogy (Ruth iv. 18–22) is denied by Wellhausen, Cornill, and modern critics generally. They suppose it to be the product of a tendency that existed at one period in post-exilic times, of finding a foreign origin for the most renowned families. But others are of the opinion that David's flight into Moab (I Sam. xxii. 3) is a circumstance that lends historical plausibility to the Moabitic origin of RUTH (so Kuenen, "Historisch-Critisch Onderzoek," etc., i., § 36, *g.*; Nowack, "Ruth," p. 184.

BOAZ, ISRAEL MICHAEL. See CRESSON, WARDER.

BOBOVNIA. See MINSK.

BOBRUISK: City in a district of the same name, in the government of Minsk, Russia; situated on the right bank of the River Berezina. It is mentioned the first time in official documents concerning Jews, issued in 1511. The inhabitants of Bobruisk, with those of other towns, petitioned King Sigismund to allow them to pay their taxes directly to the crown instead of the secretary of the treasury, Abraham YESOFOVICH. In a list of duties paid at the custom-house of Brest-Litovsk for the year 1583, a Jew named Ilya Lipshitz is mentioned as having sent merchandise to Bobruisk.

Bobruisk was of little importance until the early part of the nineteenth century, when, under Alexander I., it began to increase rapidly in population, on account of the important fortress he had erected there. It had (1898) 19,125 Jewish inhabitants in a total population of 35,177; and the district (including the city) has 49,858 Jews in a total of 256,095. It is a prosperous city. The commerce, consisting chiefly of dry-goods, grain, and wood, is mainly in Jewish hands.

The community is divided into Ḥasidim and Mitnagdim, who live harmoniously together. The present rabbi (1902) of the Ḥasidim is Shemariah Noah Shneierson, a descendant of the rabbis of Lyubavich. Raphael Shapiro, an excellent Talmudic scholar, is the rabbi of the Mitnagdim. Bobruisk possesses four official synagogues and many charitable and social institutions, among which the most noteworthy is a refuge for old men, which was founded by the philanthropist, Ḥayyim Boaz Rabbinowicz.

BIBLIOGRAPHY: *Semenov*, i. 273; *Regesty*, Nos. 242, 642; *Keneset ha-Gedolah*, ii. 95 *et seq.*

I. BR.

In the district of Bobruisk there are at least 500 persons who depend for their subsistence mainly upon the cultivation of several deciatines of the soil. Most of the dairies are in the hands of Jews (110 families), who have lost all other resources for a livelihood since the introduction of the government monopoly of the liquor trade. In the vicinity of Bobruisk there are plantations, upon which about 100 Jewish girls work in the summer. In the town are 20 small factories which employ 120 Jews. The manufacture of leather goods is considerable, many of the large workshops producing uppers for shoes for export to the neighboring towns and villages. Brick-making is also well developed. There are about 3,139 Jewish artisans, 285 tailoring establishments (employing 367 hands), and 275 shoe- and boot-making establishments (employing 165 hands). There are 444 Jewish laborers, employed chiefly in carting (1902). The following charitable institutions have been established: a Jewish hospital, a cheap kitchen, an institution for the aged, a society for the aid of the sick poor at their homes, and a "Imilat-Khasodim," which lends money without interest. Besides the general schools, attended by comparatively few Jewish children, there are also schools for Jews exclusively: two private schools for girls (300 pupils), a female technical school (160 girls), a primary public school (160 boys), and the Jewish People's Technical School (60 boys).

On May 3, 1902, a fire destroyed the greatest part of the city, and thousands of Jewish families were rendered homeless ("Budushchnost," 1902, No. 17).

BOCARA, ABRAHAM B. MOSES: Rabbi of the community of Leghorn Jews at Tunis, where he died in 1879. He was the author of "Ben Abraham," a work treating of difficult problems in religious law, and published at Leghorn, 1882, by his relative, Jacob Bocara. Several other writings of his are extant in manuscript form.

BOCCACCIO, GIOVANNI, IN JEWISH LITERATURE: Among the translations into Judæo-German of popular books and legends, such as Bevis of Hampton, the Arthur legend, and Till-Eulenspiegel, there is one of seven stories from the "Decameron" of Boccaccio (1313-75). The translator, Joseph (of) Maarsen, published several Judæo-German works. The little volume of 36 folios appeared in Amsterdam in 1710 under the title "Schöne Artliche Geschichten," and contains, according to Steinschneider, the following tales: "Andrew of Perugia," "Beritola," "Gilford," "The Three Brothers," "Landolf," "The Daughter of the Sultan of Babylon," and "The Count of Anguerra." It may have been taken from the Dutch version of Boccaccio published in 1644. On the title-page the translator has printed a rimed account of the merits of the book, and speaks of editing parts ii. to v., in addition to part i. In the preface he says:

> "The book out of which I have copied these Ma'asim was over 100 years old; and at that time the Dutch language was much harsher than it is now. The kind and gentle reader will therefore excuse me, if my language here and there is not quite proper. I have tried to make it so that any one can understand me. I might have translated it into pure German (Sauber Deutsch); but then it would have been unintelligible in Holland. I could also have translated it into Dutch (Hollandsch-Deutsch). But then the 'Hoch-Deutsche Yehudim' would not have understood it. I have, therefore, written it in neither too high nor too low German."

He says, also, that he was careful not to introduce Hebrew words, as he holds it to be a sin to mingle the holy tongue with a strange one.

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 1507; idem, *Jewish Literature*, p. 250. On the influence of Boccaccio, see the remarks of Jost, printed in Brann's *Jahrbuch*, xl. 19, and Steinschneider, in *Monatsschrift*, xlii. 471.

G.

BOCHART, SAMUEL: One of the greatest scholars of the seventeenth century, and an illustrious representative of the science and theology of the French Reformed Church; born at Rouen in 1599; died in Caen, May 16, 1667. His parents were persons of note. After a thorough study of theology and the Oriental languages in France, England, and Holland, he was called as pastor to Caen in Normandy, where he died on the day that his only grandson had made a three hours' brilliant defense of certain philosophical theses at the Academy of Caen. He first attracted general admiration by engaging in a nine-days' debate with the Jesuit Véron, who was deputed by the government to travel through France with a view to the conversion of the Huguenots. The report of this debate was printed in 1630 at Saumur. Out of his scholarly preparation for sermons on Genesis came the two monumental works by which Bochart's name is still known: "Geographia Sacra seu Phaleg et Chanaan," 1646, the first part of which, "Phaleg," treats of the names contained in the Table of Nations in Gen. x., while the second part, "Chanaan," is devoted to the colonies and the language of the Phenicians; and "Hierozoicon sive Bipartitum Opus de Animalibus Sacræ Scripturæ." 1663, a marvelously erudite collection of everything contained in Biblical, classical, and Oriental literature on the animals mentioned in the Bible. [Much of the material of these two works is still of value.—T.]

BOCHIM: Name of a place near Beth-el. The Septuagint reads in Judges ii. 1, "The place of weeping to Beth-el and to all Israel." It may be identical with Beth-el itself (see Moore, Judges, *ad loc.*).

J. JR. G. B. L.

BOCHNER, ḤAYYIM B. BENJAMIN ZE'EB: Cabalist, Talmudist, and grammarian; born at Cracow, Galicia, in the first quarter of the seventeenth century; died at Fürth, Bavaria, Feb. 2, 1684. He was the son of one of the wealthiest Jews of Cracow, who owned a stone mansion and two adjoining stores on Casimir place, a street otherwise uninhabited by Jews.

Bochner received both a rabbinical and a liberal education, and was a pupil of Israel Ganz—whose daughter he afterward married—and of the cabalist and grammarian Jacob Temerls. On the death of his father (1647) Bochner became heir to a portion of his father's business and other properties; but he sold his share to his three brothers and one sister, receiving in lieu a weekly allowance in order to be able to pursue his studies. He established at his own house a free rabbinical school, and enjoyed the friendship of Lipmann Heller and other renowned scholars. Having received a call to Ebenfurth, and afterward to Lackenbach, as rabbi and head of the bet din, he continued to keep up a yeshibah in both places. For reasons he himself gives in the introduction to his book, "Or Ḥadash" (New Light), he removed to Vienna, where he stayed until the expulsion of the Jews from that city in 1670.

Bochner, who combined a spirit of observation with his extensive Talmudical knowledge, and who while traveling had seen a great deal of the world, spent the rest of his life in writing and publishing books and in editing other valuable works. He wrote: (1) The above-mentioned "Or Ḥadash," a compilation of laws concerning the ritualistic benedictions, in which he embodied the "Or Yisrael" of his teacher Israel Ganz, and selections from some works of his own; *e.g.*, "Birkat ha-Nehenin" (Benedictions for Enjoyments), which formed part of another work, "Orḥot Ḥayyim" (The Ways of Life), a commentary on Isaac Tyrnau's "Minhagim." These works he published, first separately with approbations by Lipmann Heller and Isaac Eulenburg in 1659, and then as a whole, Amsterdam, 1671. (2) "Patora di Dahaba" (Table of Gold), a compendium of the Shulḥan 'Aruk, which remained unpublished. (3) "Mayim Ḥayyim" (Living Waters), containing homilies and comments on Bible and Talmud according to the four methods: (פרד"ס) Peshat, Remez, Derush, and Sod. (4) "Ilana di Ḥayye" (The Tree of Life). (5) "Toẓeot Ḥayyim" (The Issues of Life), on grammar, Hamburg, 1710. (6) בית תפלה ("The House of Prayer"), a grammatical and mystical commentary on the prayer-book, together with all the laws concerning prayers; also under the title "Arba'ah Roshim" (Four Divisions), on account of the four different treatises it contains. (7) "Luaḥ Ḥayyim" (Tablet of Life), a work on dietetics, Cracow, 1669, erroneously ascribed to a certain Raphael, and translated into Latin by Wagenseil, 1687.

Bochner also edited the "Midrash Konen," Amsterdam, 1669; the "Sefer ha-Niḳḳud" (Book of Vocalization), on Hebrew grammar, and "Sod ha-Ḥashmal," a cabalistic work, both by Moses Gikatilla, Cracow, 1648; and "'Iyyun Tefillah" (Book on Meditation of Prayer), by Ḥayyim Rashpitz, Amsterdam, 1671.

BOCHNIA, AUSTRIA. See GALICIA.

BOCK, ALFRED: German novelist; born at Giessen, Hesse-Darmstadt, Oct. 14, 1859. He received his education at the gymnasium and the university of his native town, and traveled through Denmark, Italy, Turkey, and Greece. He now (1902) lives in Giessen.

Bock is the author of: "Gedichte," Dresden, 1889; "Aus einer Kleinen Universitätsstadt," Giessen, 1896; "Wo die Strassen Enger Werden," Berlin, 1898; "Die Pflastermeisterin," *ib.* 1899; "Bodo Sikkenberg," *ib.* 1900; "Der Flurschütz," *ib.* 1901; "Kinder des Volkes," *ib.* 1902. He has also written some dramas, of which may be mentioned: "Die Alte Jungfer," "Die Prinzessin von Sestri," and "Der Gymnasialdirektor."

S. F. T. H.

BOCK, M. H.: German educator; born at Magdeburg, 1784; died at Leipsic April 10, 1816, while on a journey. He was one of the ablest modern Jewish teachers in Germany at the beginning of the nineteenth century; and the fashionable private school (Lehr- und Bildungsanstalt) which he founded in 1807 at Berlin, and to which Christian as well as Jewish pupils were admitted, enjoyed a great reputation. He was also for some time tutor at the Köllnisches Gymnasium in Berlin. After his death his school was conducted by I. M. Jost.

He wrote the following essays and works: (1) "Nachrichten von der Lehr- und Bildungsanstalt Jüdischer Familien," Berlin, 1807 (part of this is reprinted in "Sulamith," ii. 2, 39 *et seq.*); (2) "Hebräisches A B C Buch," Berlin, 1812; (3) "Katechismus der Israelitischen Religion," Berlin, 1814; (4) "Moda' l'Yalde B'ne Israel: Israelitischer Kinderfreund," a manual of the rudiments of knowledge, in Hebrew, German, and French, for the instruction of Jewish children at home and at school, 3 vols., Berlin, 1811-12; (5) in collaboration with David Fränkel, "Die Fünf Bücher Mosis, mit Moses Mendelssohn's Uebersetzung in Deutschen Lettern," Berlin, 1815; (6) "Predigt am Sabbath nach der Erscheinung des Königlichen Ediktes: die Bürgerlichen Verhältnisse der Juden in den Preussischen Staaten Betreffend in Erbauungen," ed. by Kley and Günsburg, i. 448 *et seq.*; (7) "Predigten zur Kirchlichen und Häuslichen Erbauung," Berlin, 1824, published by his brother, A. Bock, a convert to Christianity.

BODEḲ. See BEDIḲAH.

BODEK, HERMAN: Galician Hebraist; born in Brody Sept. 27, 1820; died at Leipsic Aug. 19, 1880. He was descended from a highly respected family, and was the son-in-law of S. L. Rapoport. For a long time he lived in Leipsic, where he was translator of Hebrew at the courts of law, and was also engaged in business.

Bodek was well acquainted with rabbinical and Neo-Hebraic literature, and contributed articles on various subjects to the Jewish periodical press of several countries. He was the author of "Eleh Dibre ha-Berit" (These Are the Words of the Covenant), Leipsic, 1880, a catechism of the ritual signs, allegories, and objects of Freemasonry. It was based on the works of O. Marbach and R. Fischer on that subject, and was intended mainly for Jewish Masons in the Orient, or for those in Europe who could not read any language other than Hebrew. Bodek was himself a member of the Apollo Lodge of the Masonic Order in Leipsic.

Bibliography: *Allgemeine Handbuch der Freimaurerei*, p. 18, Brockhaus, Leipsic, 1879; Zeitlin, *Bibliotheca Hebraica*, p. 36; Lippe, *Bibliographisches Lexicon*, i. 577-578.

L. G. P. Wi.

BODEK, JACOB, OF LEMBERG: Galician Hebraist; died at Lemberg 1856. He published "Ha-Ro'eh v-Mebakker Sifre Meḥabre Zemanenu" (Spectator and Critic of Contemporary Works), which contains long articles from his own pen, from that of his brother-in-law, A. M. Mohr, and others, against the works of S. L. Rapoport, S. D. Luzzatto, and S. J. Reggio (part i., Lemberg, 1837; part ii., Ofen, 1839). Later he published, in conjunction with Mohr, a periodical entitled "Jerusalem," which appeared at irregular intervals (vol. i., Zolkiev, 1844; ii., Lemberg, 1845; iii., Prague, 1845). He republished with notes the chronicles of Abraham Trebitsch, "Ḳorot ha-'Ittim," which cover the period from 1741 to 1801, and "Ḳorot Nosafot," a continuation until the year 1850 (Lemberg, 1851). His biography of his friend, R. Ẓebi Hirsch Chajes of Zolkiev, appeared in "Ha-Maggid," i., Nos. 8-11.

Bibliography: Zeitlin, *Bibl. Post-Mendels.* pp. 35-36, Leipsic, 1891.

S. P. Wi.

BODENHEIMER, LEVI: Consistorial rabbi at Krefeld, in the Rhine province; born Dec. 13, 1807, at Carlsruhe; died Aug. 25, 1867, at Krefeld. He occupied the position of rabbi at Hildesheim in 1837. Bodenheimer published: (1) "Das Testament Unter Benennung einer Schenkung, nach Rabbinischen Quellen" (Krefeld, 1848); (2) "Das Paraphrastische der Arabischen Uebersetzung des R. Saadja Gaon"; (3) וזאת הברכה ("The Blessing of Moses"); and (4) האזינו ("The Song of Moses"), the last two being scientific comparisons of the translations contained in Walton's Polyglot, with a special reference to the Greek and Arabic variants.

S. J. D. B.

BODENSCHATZ, JOHANN CHRISTIAN GEORG: German Protestant theologian; born at Hof, Germany, May 25, 1717; died Oct. 4, 1797, at Baiersdorf near Erlangen. In his early education at the gymnasium of Gera he became interested in Oriental and Biblical subjects through his teacher, Schleusner; and later (1733), at the Jena University, he took up Oriental languages as a special study.

Bodenschatz entered the Church, and was vicar of Uttenreuth, ultimately (1780) becoming superintendent at Baiersdorf. He devoted his life to Jewish antiquities, and is said to have made elaborate models of the Ark of Noah and of the Tabernacle in the wilderness. In 1748 he summarized the results of his researches in his "Kirchliche Verfassung der Heutigen Juden, Sonderlich Derer in Deutschland" (in four parts, Erlangen). This important work gives, besides a short history of the Jews, which is derived mainly from Schudt and Basnage, a full account of Jewish ceremonial, drawn by the author from both written and oral sources and illustrated with engravings. Of these engravings some are imitated from Picart, but most of them were especially designed and engraved for the work; several have been reproduced in the Jewish Encyclopedia.

Bodenschatz generally gives an accurate account of Jewish ceremonial and custom, and without bias; his work is consequently an original source for the actual practise of Jewish ceremonial in mid-Germany in the first half of the eighteenth century. A second edition appeared at Frankfort in 1756 under the title "Aufrichtig Deutschredende Hebräer, oder Die Gebräuche und Ceremonien der Juden."

BODENSEE. See Constance, Lake of.

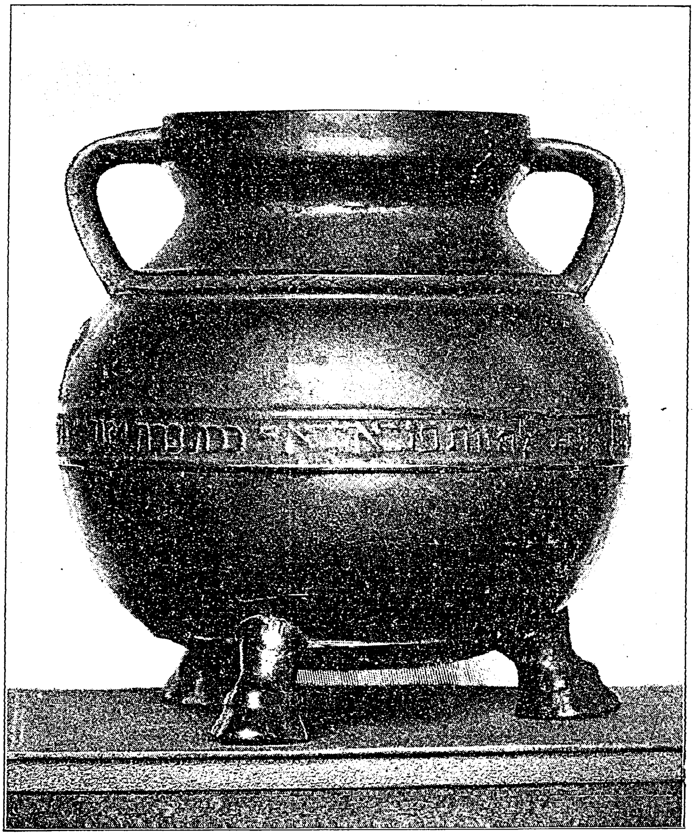
BODENSTEIN, JULIUS: German landscape-painter; born in Berlin Aug. 4, 1847. He studied at the Berlin Academy under Schütze and Hermann Schnee, and in 1873 went to Munich, where he became a pupil of Ad. Lier. He is prominent as a painter of subjects from nature, his "Twenty-five Views in the High Alps" (1879) being very artistic productions. In 1883 he exhibited "Isle of Sylt" at Munich. Among his other works are: "Approaching Storm in the Jura Mountains," "View Near Irafoi with Glaciers," "Oyster-Fishing on the North Sea," and "Twilight on the Isle of Sylt."

Bibliography: *Cyclopedia of Painters and Paintings*, i. 172, New York, 1887; H. A. Müller, *Allgemeines Künstler-Lexikon*, s.v.; Kohut, *Berühmte Israelitische Männer und Frauen*, part vii., 298, Leipsic, 1900.

S. A. M. F.

BODLEIAN LIBRARY: The well-known University Library at Oxford, England. The building which at present forms the reading-room of the Bodleian Library was begun in 1444 by Humfrey, duke of Gloucester, and received continual accessions of books. Its life as a library, however, lasted little more than a century; for in the troubles that followed the Reformation it suffered the same fate as other abodes of religion and learning. Its manuscripts were burned or sold as waste paper, and its fittings treated as so much timber. The history of the present collections, therefore, begins with the refoundation by Sir Thomas Bodley in 1598. Whether any Hebrew works were included among Bodley's own gifts is uncertain. The earliest recorded donation of the kind is a Hebrew lexicon presented by John Savile in 1601, which was followed by Hebrew manuscripts from Dr. John Lhuid in 1602.

Early Donations and Purchases. It was not till 1640 that the Hebrew collection began to assume any importance. In that year about forty-eight manuscripts were received from Sir Kenelm Digby and Archbishop Laud; and in 1654 John Selden bequeathed to the university such of his Talmudical and rabbinical books as were not already to be found in the library. But by far the greatest part of the present treasures of the Bodleian was acquired by purchase. Thus in 1693 Pococke's library of 420 manuscripts (including a number in Hebrew) was bought for £600, and 600 manuscripts of Huntingdon's for £700. In the eighteenth century very few acquisitions were made; but in 1817 the great Canonici collection, including 135 manuscripts on vellum, chiefly in Hebrew, was bought for £5,444, and twelve years later the still more important library of R. David Oppenheimer (of Prague) was acquired at a cost of £2,080. The importance of this addition may be estimated from the fact that it consisted of 780 manuscripts and over 4,000 printed books, embracing every department of Jewish literature and learning. The collection is still called by the name of the original owner, and subsequent acquisitions were till recently referenced as Oppenheimer additions, the whole being housed together in the "Hebrew Room," where an engraved portrait of the rabbi may be seen presiding over this monument of his learned industry.



Ewer with Hebrew Inscription, in the Bodleian Library.
(From a photograph specially taken for the "Jewish Encyclopedia.")

The Bodleian thus rose at once into the front rank of Hebrew libraries. But its value was still further increased soon afterwards. In 1845 about 483 printed volumes from the library of Gesenius were purchased, as well as 320 books from a Berlin bookseller. In 1848 the manuscripts (862 volumes) belonging to H. J. Michael were bought for £1,030, but his large collection of 5,471 printed volumes went to the British Museum. **The Oppenheimer and Michael Collections.** Two years later considerable additions were again made by the purchase of sixty-two manuscripts and numerous printed volumes from various sources. The last two collections bought thus *en bloc* were seventy-two Reggio manuscripts in 1853, and a number of volumes in 1864.

During the last thirty years the Hebrew collection has steadily increased in value, chiefly through the watchfulness and discrimination of the late Oriental sub-librarian, Adolph Neubauer. Besides other manuscripts, he was the means of acquiring a number of Karaite and Yemen manuscripts, as well as a great quantity of fragments from the Cairo "genizah," which are now bound up in about 180 volumes. It is to be feared, however, that the time for startling purchases is past. The important private collections have mostly gravitated to the large libraries; the competition between buyers is keener than ever before; while lack of funds and the serious demands made by other branches of learning on the resources of the Bodleian and of the University alike threaten to hinder further development on any large scale.

Catalogues. In the above account only the more striking acquisitions have been noticed, and these very briefly. Further information will be found in the various catalogues. The Pococke and Huntingdon manuscripts, with others, are described in John Uri's catalogue, published in 1787. For the Oppenheimer manuscripts a catalogue was issued, in Hebrew and Latin, at Hamburg in 1826. For the Michael collection a catalogue was published by Steinschneider and Zunz, Hamburg, 1848. A conspectus of all the Hebrew manuscripts in the library is appended by Steinschneider to his great catalogue, or rather bibliography, of the printed books. All these, however, are now superseded by Neubauer's "Catalogue of Hebrew Manuscripts," published in 1886, containing 2,602 numbers, to which a supplement is in course of preparation, dealing with subsequent additions, about 300 volumes up to the present time. For the printed books the indispensable and only guide is Steinschneider's "Catalogus Librorum Hebræorum in Bibliotheca Bodleiana," published in 1860, of which an interleaved copy in the library is kept up to date by manuscript additions.

Outside the Hebrew manuscripts and books, the chief object of Jewish interest at the Bodleian is a bronze ewer 9¾ inches high, and 30 inches at greatest circumference, found in a Suffolk brook in 1696. It bears a Hebrew inscription showing it to have been presented by "Joseph, son of the martyred Rabbi Yehiel." The precise object for which it was used is doubtful; some think as a "charity box," others as a laver for washing the dead.

J. A. Co.

BODO: Bishop and chaplain of Emperor Louis the Pious. After a dissolute life at court, he made (838) a pilgrimage to Rome, was converted to Judaism, assuming the name of Eleazar, and married a Jewess. He then went into military service at Saragossa. Bodo incited the Moorish government and the people to oppose the Spanish Christians, who asked aid of the king of the Franks. In 840 he corresponded with the knight Pablo Alvaro of Cordova, a baptized Jew; each convert endeavoring in vain to lead the other back to his old faith. Many of their letters have been preserved.

G. H. V.

BODY IN JEWISH THEOLOGY: In Hebrew the idea of "body" is expressed by the term "basar" (Assyrian, "bishru"), which, commonly translated "flesh," originally denoted blood-relation, clan (see Gen. ii. 23, 24), the physical appearance being regarded as the evidence of consanguinity, and only secondarily the "body," and hence the general state or condition of man, or man as a creature of flesh, and finally mankind, "all flesh" (Isa. lxvi. 23). A less frequently employed term is "gewiyāh," which with rare exceptions is used to designate not the living body, but the corpse. The Greek translators employ *σάρξ*, or, rarely, *σῶμα*, the former, in accordance with Greek usage, generally in the plural. In later Hebrew the words "geshem," "gushma," and "guph" were used, or the combination "basar wa dam" (*σάρξ καὶ αἷμα*). This latter phrase implies the distinction between God and man, as, for instance, in contexts contrasting "the Holy One, blessed be He!" with "the king of flesh and blood," which contrast is rooted neither in the thought of man's sinfulness over and against the perfection of the Creator nor in the opposition of the material to the spiritual—the antithesis posited by Philo between the *ψυχή* or the *νοῦς* on the one hand, and the *σῶμα*, the "dead nature of ours," on the other—but in the conception of man as a weak, dependent, and mortal creature.

According to Gen. ii. 7 the body is formed of dust and is, therefore, frail and mortal. It will return to dust, whence it was taken (*ib.* iii. 19). It lives because the spirit of life was breathed into it (*ib.* ii. 7; Ezek. xxxvii. 8).

The defiling character of the dead or the diseased body, which is so prominently referred to in the purity laws in the Levitical code, has, by the modern critical school, been recognized as belonging to a range of ideas universally found in all religions at a certain stage of their development, and as being an adaptation of observances pertaining to an anterior phase of religious thought and practise. Speculations on the nature of sin, and its seat in the body of man, do not lie within the plane of the unreflected religious consciousness which is characteristic of Old Testament literature and life.

The following may be accepted as representing the rabbinical views on the nature, the function, and the destiny of the body.

Rabbinic Conception.

In accordance with the Book of Genesis, man is considered to be created of two originally uncombined elements, soul and body; the former coming from the higher world, and the latter taken from the lower (Gen. R. viii. 14; Ḥag. 16a). The destiny of the latter is to serve the former, and it is organized to fulfil the Torah. The dust of which the body of man (Adam) was formed was composed of contributions from all the regions of the earth (Sanh. 38a; Rashi to Gen. ii. 7).

A shapeless body ("golem") came from the hand of the Creator (Gen. R. xiv.), and filled the whole earth, or, according to another version, reached from earth to the sky. Bisexed, this creature had also two faces until, through the later differentiation according to sex, man found in woman his counterpart. This (ultimate) body of man retains (in the nails) traces of an original coat of light (Rashi on Gen. ii. 21), but as now constructed it consists of 248 members (bones) and 365 nerves (compare Targum Yer. to Gen. i. 27), which numbers are assumed to correspond to the number of the mandatory and prohibitive commandments of the Law (see Anatomy).

The psychology of the times connecting certain functions of the soul with certain organs of the body is recognized in the rabbinical writings; while symbolism in reference to the various purposes of the organs and the processes of physical life also holds a place in the anatomical science of the Talmudical teachers. As to the relation which the body holds to the soul, and the questions when the soul enters the body, whether the soul is preexistent, and whether for every newly created body there is also a newly created soul, opinions differ; though the majority are in favor of the preexistence of the soul.

The body is *not* regarded as impure. The adjective "ṭamé" (impure), used of the body in contrast to the pure soul (Mek., Beshallaḥ, Shirah, 2; compare Sanh. 91a, b), refers rather to the physical process through which the body is produced from a "malodorous" drop (Abot iii. 1). To strain the meaning of the word "saruḥah," used to convey this idea, as does Weber ("Alt-Synagogale Theologie," p. 229), is inadmissible. The body is the seat of the "yeẓer hara'" (evil inclination). This latter is natural and necessary; it is not in itself a manifestation of congenital sinful depravity (Gen. R. ix.).

Body and Soul.

Body and soul are alike responsible for deeds committed (Tan., Wayiḳra, 6) (see Yeẓer Hara'). Aaron ben Elijah, the Karaite ("Eẓ Ḥayyim," cxii.), bases upon this responsibility of the body an argument in favor of resurrection (compare the parable of the blind and the lame in Rabbi Judah ha-Nasi's argument before the emperor Antoninus, Sanh. 91b).

To provide food and drink and dress in proper quantity and becoming style is a religious duty (Maimonides, "Yad," De'ot, v.). Mutilations of the body are prohibited (Lev. xix. 27, 28; Deut. xxiii. 3).

Even after death the body was regarded as demanding respectful treatment. Once the "temple" (tabernacle) of the soul and its servant, the cerement of dust was to be guarded against sacrilegious dissection (Ḥul. 11b). Hence the Levitical laws rendering impure the persons touching the dead body, according to the explanation of R. Johanan ben Zakkai (Yad. iv. 6; Num. R. xix.; see also Einhorn, "Ner Tamid," pp. 83 *et seq.*, Philadelphia, 1866).

The body decays; but it will rise again at the time of the resurrection. The bodies of the risen are reproductions of those which they tenanted while living: cripples and the deformed will rise with the old deformities (Gen. R. xiv., xcv.) (see Luz and Resurrection). Early Talmudic conceits ascribe feeling to the body even after death (Shab. 152b; see Ḥibbuṭ ha-Ḳeber; Wolff, "Muhamed. Eschatologie," p. 62, Leipsic, 1872).

Later Views.

Post-Talmudic Judaism virtually accepts the foregoing views, as does, for instance, Saadia, "Emunot we-De'ot," vi., where he controverts the idea that the soul is abused by being made to reside in the body. The latter is the soul's necessary agent, and this body is the one best suited for the ends of man. The body is not impure. The Law declares certain secretions of the body to be unclean, but only after they have left, not while they are in, the body (Baḥya ben Joseph, "Ḥobot ha-Lebabot"). The human body evidences the Creator's wisdom (see Baḥya ben Joseph).

Like a red thread through the speculations of the medieval Jewish and Arabic thinkers runs the doctrine of the four elements. Man being the microcosm, and the world the macrocosm, the effort is made to establish a correspondence between the body of the former and that of the latter. The four elements are discovered in the four humors of man's body. Israeli's work on the elements, based upon the "Sefer Yeẓirah," influenced all subsequent thinkers in this direction. In Donolo and in Ibn Gabirol there is the theory that the blood in man corresponds to the air; the white humor, to the water; the black humor, to the earth; and the red bile, to the fire. The five senses of man are also very prominent in the symbolic and allegorical interpretation of the Biblical texts. Ethics and poetry as well borrowed instruction and inspiration from the five senses (Kaufmann, "Die Sinne," Leipsic, 1884) (see Adam). The body of man was thus studied from many points of view, but was always regarded as a marvelous construction witnessing to the wisdom of the Creator, whose praise was sung in benediction (Ber. 60a). The latter, after dwelling on the wonderful adaptability of the bodily organs to their functions, names God as "the Healer of all flesh and the wonderful Artificer."

It may be noticed that Reform Judaism has relinquished the belief in the resurrection of the body. The catechisms and prayer-books of the modern synagogues, however, teach that "the body is intended by the Creator to be the servant of the immortal soul, and as such is not congenitally depraved." "This very body—woven of dust—Thou hast dignified to be a dwelling-place of Thine, a minister unto Thy spirit. Even it issued pure from Thine hand. Thou hast implanted in it the capacity for sin, but not sin itself" (David Einhorn's "Prayer-Book," 2d Eng. ed., Chicago, 1896, part ii. 207).

K. E. G. H.

BOESCHENSTAIN, JOHANNES (sometimes spelled **Boeschenstein**): German Hebraist; born at Eslingen in 1472; said to have been of Jewish parentage, this statement, however, being denied by himself. He was among the earliest to revive the study of Hebrew in Germany, having been a pupil of Moses Möllin and a teacher of Hebrew at Ingolstadt in 1505, at Augsburg in 1513, and at Wittenberg in 1518. He produced an elementary grammar at Augsburg in 1514, another at Willenburg, 1518 (second edition, Cologne, 1521), and in 1520 edited Moses Ḳimḥi's מהלך at Augsburg, whither he had returned. During a wandering life he taught Hebrew at Nuremberg, Antwerp, and Zurich; at the last-named place having the reformer Zwingli among his pupils.

Boeschenstain gave particular attention to the Jewish prayers; publishing a German translation of some, in 1525, under the title "תפלות העברים, Vil Guter Mahnungen," and, in the same year, at the end of his edition of Ruth, the prayers for the dead. The Jewish grace before and after meals he translated in 1530.

T. J.

BOETHUSIANS (ביתוסים): A Jewish sect closely related to, if not a development of, the Sadducees. The origin of this schism is recounted as follows by the Midrash: Antigonus of Soko having taught the maxim, "Be not like the servants who serve their masters for the sake of the wages, but be rather like those who serve without thought of receiving wages," his two pupils, Zadok and Boethus, repeated this maxim to their pupils. In the course of time they were understood to express thereby the belief that there was neither a future

Origin of Name.

world nor a resurrection of the dead: and the consequence was that these pupils of Zadok and Boethus renounced the Torah and founded the sects of the Sadducees and the Boethusians. They lived in luxurious splendor; using silver and golden vessels all their lives, not because they were haughty, but because (as they claimed) the Pharisees led a hard life on earth and yet would have nothing in the world to come (Ab. R. N. v., ed. Schechter, p. 26. The text is corrupt. According to one version, Zadok and Boethus were themselves the founders of the sects).

Historical in this story is the statement that these two sects denied the immortality of the soul and resurrection. Again, the Midrash is on the whole correct in saying that the sects found their followers chiefly among the wealthy; but the origin of the sects is legendary. The Mishnah, as well as the Baraita, mentions the Boethusians as opposing the Pharisees in saying that the sheaf due at the Passover (compare 'Omer) must be offered not on the second feast-day, but on the day after the actual Sabbath of the festival week, and, accordingly, that Pentecost, which comes seven weeks and one day later, should always be celebrated on the Sabbath (Men. x. 3; compare also Ḥag. ii. 4). In another passage it is narrated that the Boethusians hired false witnesses in order to lead the Pharisees astray in their calculations of the new moon (Tosef., R. H. i. 15; Bab. *ib.* 22b; Yer. *ib.* ii. 57d, below; compare Geiger, "Urschrift," pp. 137, 138). Another point of dispute between the Boethusians and the Pharisees was whether the high priest should prepare the incense inside or outside the Holy of Holies on the Day of Atonement (Tosef., Yoma, i. 8; Yer. *ib.* i. 39a). The parallel to the last-named passage (Yoma 19b) has "Sadducees" instead of "Boethusians"; and in other passages the Talmud undoubtedly uses these two terms indifferently in designating the same sect. Graetz's assumption, therefore, that the Sadducees were the political and the Boethusians the religious opponents of the Pharisees, is untenable.

A High-Priestly Family.

The prevailing opinion now is that the Boethusians were only a variety of the Sadducees, deriving their name from the priest Boethus. Simon, son of Boethus from Alexandria, or, according to other sources, Boethus himself, was made a high priest about 25 or 24 B.C. by Herod the Great, in order that Boethus' marriage with the latter's daughter Mariamne might not be regarded as a mésalliance (Josephus, "Ant." xv. 9, § 3; xix. 6, § 2. This Mariamne II. must be distinguished from the first of the Hasmonean Mariamnes). Furthermore, to the family of Boethus belonged the following high priests: Joezer, who filled the office twice (*ib.* xviii. 1, § 1); Eleazar (*ib.* xvii. 13, § 1); Simon Cantheras (*ib.* xix. 6, § 2); his son Elioneus (*ib.* xix. 8, § 1); and the high priest Joshua b. Gamla, who must also be included, since his wife Martha (Miriam) belonged to the house (Yeb. vi. 4). The hatred of the Pharisees toward this high-priestly family is shown by the words of the tanna Abba Saul b. Batnit, who lived about the year 40 of the common era at Jerusalem (Pes. 57a; Tosef., Men. xii. 23). It must be especially noticed that "the house of Boethus" heads the list of the wicked and sinful priestly families enumerated by Abba. It is, however, only an assumption—although a highly probable one—that the Boethusians were the followers of this Boethus and members of his family; for the assumption is not proved, as there may have been another Boethus who really was the founder of the sect. As the beginnings of this sect are shrouded in obscurity, so also is the length of its duration. The Talmud mentions a Boethusian in a dispute with a pupil of Akiba (Shab. 108a; Soferim i. 2); yet it is probable that the word here means simply a sectarian, a heretic, just as the term "Sadducee" was used in a much wider sense later on. A Boethus, son of Zonim, and nearly contemporaneous with Akiba (compare Yer. *l.c.* 10b), is mentioned in the Mishnah (B. M. v. 3); he was not, however, a Boethusian, but a pious merchant. A Palestinian amora, *c.* 300 C.E., was also called "Boethus." Compare High Priests, Pharisees and Sadducees.

K. L. G.

BOGNAR, FREDERIKE: German actress; born at Gotha Feb. 16, 1840. Her father was a singer, and Frederike was destined for a musical career. After appearing a few times in children's parts in Budapest, she was sent to Munich to study music under Mme. Behrend-Brandt, who was her aunt. She sang for some time on the concert platform, but finally decided to become an actress. After studying under Denker, and later under Laube, she made her début at Zurich in 1856. In the following year Bognar went to the Hamburg Stadttheater, where she remained until 1858, when she went to the Hofburgtheater, Vienna, with which she was associated until 1870. In that year she began a starring tour that lasted for several years. Bognar then went to the Deutsches Landestheater in Prague, and in 1892 joined the Deutsches Volkstheater in Vienna.

In her younger days Bognar played the parts of *Gretchen*, *Clärchen*, *Thekla*, *Desdemona*, *Emilia Galotti*, *Marie* in "Herz und Welt," *Ophelia*, *Louise Miller*, *Lady Tartuffe*, and *Marguerite* in "La Dame aux Camélias." Later in life she portrayed *Medea*, *Maria Stuart*, *Frau Alving* in "Die Gespenster," *Judith*, and *Pompadour*.

BOGOLYUBSKI, ANDREI: First grand duke of Russia (1169–74). He conquered Kiev after the death of Vladimir Monomakh (1169), but selected the northern city of Vladimir as the capital of the kingdom. At that time Kiev was an important commercial center with a considerable Jewish population, the Jews controlling the trade between western Europe and the Far East. The Jewish travelers

Benjamin of Tudela (1160–73) and Pethahiah of Regensburg (1175–85) visited the city. Admission to service in the prince's militia ("druzhina") of old Russia was not confined to any nationality or creed, and the soldiers enjoyed many liberties. Bogolyubski was the first Russian autocrat, and he curtailed many of these privileges of the druzhina. Besides this, Christianity had made considerable progress in Russia, so that the religious freedom of the militia was also attacked. Bogolyubski, who surrounded himself with foreigners from all countries, both Christian and non-Christian, took pride in showing them the splendid church of the Virgin in Vladimir, in order that those of a different religion might be attracted to the Greek Orthodox Church and be baptized. The chronicler of Kiev praises Bogolyubski especially for his Christian deeds and his conversion of many Bulgars and Jews. It was probably two of these converts, ANBAL THE JASSIN, and Ephraim Moisich, who took part in the successful conspiracy against the life of Bogolyubski. The latter, having banished his brothers and all the boyars who would not implicitly obey him, had become gradually more tyrannical, forgetting that he had been elected by the people. He burdened the latter with heavy taxes, and at his pleasure sentenced them to death. Thus it is not strange that Jews, even though his confidential servants, took part in the conspiracy. The terrible cruelties perpetrated by Bogolyubski's favorite, the bishop Fiodor, cast a deep shadow upon the reign. Nevertheless, he must have had many devoted subjects among the Jews, as is evident from the lamentations of his servant Kuzmishev after the assassination: "Even the Bulgars and the Jews and the pagans weep for you."

H. R. M. R.

BOGROV, GRIGORI ISAACOVICH: Russian writer; born March 13, 1825, in Poltava; died May 10, 1885, at Derevki, government of Minsk. He received his early education from his father, who was a Hebrew scholar and who left in manuscript a Hebrew work on astronomy. Grigori devoted himself exclusively to the study of the Talmud and rabbinical literature until his marriage at the age of seventeen. He then without a teacher studied Russian, German, and French, and also learned to play the violin with a certain amount of skill. Being unhappy in his family life, he separated from his wife.

In his first work, "Zapiski Yevreya" (Memoirs of a Jew), Bogrov portrays the vicissitudes of his life and his surroundings. This was published in the "Ote Chestvennyya Zapiski," 1871–73, and in book form in 1874. Although by reason of its style and its descriptions of Russian and Russo-Jewish life his work is considered a valuable contribution to Russian literature, yet the author's undignified revelations of his family affairs called forth severe criticism.

Having established his reputation as a writer, Bogrov moved from South Russia to St. Petersburg, where he occupied himself entirely with literature. In the last years of his life Bogrov joined the Greek Orthodox Church, and married again.

Besides the above-mentioned work he published: "Yevreiski Manuskript," St. Petersburg, 1876; "Nyezhny Bratetz," St. Petersburg, 1878; "Zhit' ili ne Zhit' Yevreyam Povsemyestno v Rossii," in "Slovo," 1872, No. 2; "Lassall's Tovo Svyeta," in the same journal; and many other novels and sketches from Russo-Jewish life, which appeared in the periodicals "Razvyet," "Yevreiskaya Biblioteka," "Russki Yevrei," and "Voskhod," from 1879 to 1883.

H. R.

BOGUSLAV: Town in the government of Kiev, Russia. It is mentioned in official documents dated 1195. Nothing is known of the date of the Jewish settlement there. Russian and Polish historians record that Boguslav was one of the cities which suffered most severely from the uprising of Chmielnicki; Jewish sources, however, do not mention it among the communities destroyed. The town has a population of about 12,000, of which 10,000 are Jews. In 1809 a Jewish printing-office was established in Boguslav, and the first work published there was "Besamim Rosh," by Joseph Katz.

H. R. I. BR.

BOHEMIA:* Crown land in the northernmost part of the Austro-Hungarian empire. The history of the first settlement of Jews in Bohemia is wrapped in legend. The oldest Jewish sources designate Bohemia as "Ereẓ Kena'an," that is, "Slavonia" (so called because those districts plied a vigorous trade in slaves, in which traffic Jews themselves took part), under which term, however, in a larger sense the countries eastward as far as Kiev are to be understood (Zunz, "Ritus," p. 72; Ar. pp. 54, 131, 989; Salf. p. 151; Vita s. Alberti, in Grätz, "Gesch. der Juden," vi. 68). In Ar. p. 29, an archbishop asks for a Jewish or a Slavonic physician, and in *ib.* p. 50 Ibrahim ibn Ya'ḳub speaks of "ailments of the Slaves" (see "Reisebericht über die Slavischen Länder" published by F. Westberg in the publication of the St. Petersburg Academy, Nov., 1899). Jews resident there are called "Bene Ḥet" (Children of Heth). Inasmuch as intercourse with the East was always very active (Ar. p. 50; M. pp. 31, 363, ["Ereẓ Yawan"]; Güdemann, "Gesch. des Erziehungswesens," i. 114), and in view of the fact that there are Byzantine resemblances in the older ritual of the Prague Altschul, it is supposed that the earliest Jewish settlers in Bohemia came from the East. In the train of the Germans at the time of the Black Death, Jews also found their way into Bohemia from Germany (Pod. pp. 10 *et seq.*), and they were joined by coreligionists from France (Rapoport, "Introduction to Gal 'Ed"), Poland, Austria (Kisch, M. p. 25) and Hungary. Their vernacular was Slavonic, as appears from the explanations of words given by Jewish writers and from proper names current in the Middle Ages (M. pp. 26, 31, 318, 372; Sp. Ur. pp. 24 *et seq.*; Pod. p. 21; Grün, p. 14).

Early Settlements.

The first accredited statement concerning the residence of Jews in Bohemia comes from Leitmeritz, where they, as well as others who brought salt or other goods into the town, had to pay a toll to the Stephan's Church (1067) (Ar. p. 66). But the first actual settlement was in PRAGUE, which is described in Jewish divorce papers as "the city called Mezigrade (מזיגרדא), situated on the river Vltava (וולטווא), and on the Bottich (בוטיך) stream." This specification points to the oldest portion of the city, called Vysehrad, as the scene of the first Jewish settlement. There and in the Prague Vorstadt (probably the present Altstadt), closely adjoining the former ghetto (now the Josephsstadt), lived alongside of other merchants and immigrant Germans (1091) "many Jews very rich in gold and silver" (*ib.* p. 77). They held the same legal standing as the Germans and French (*ib.* p. 78; compare pp. 106, 198, 200, 254). The first Crusade and the attendant persecutions of the Jews found the Israelites of Prague prepared for a brave defense of their lives, supported by Duke Vratislav II., as well as by the bishop Cosmas; but the temporary absence of the duke in 1096 at once caused excesses to break out in Prague, Vyšehrad, and Bubenium (*ib.* p. 92; Salf. p. 151). Jews who had been compulsorily baptized in 1096, sought to emigrate in 1098 to Poland or Hungary with their possessions; but the duke, who had been apprised of their intention, stripped them of their property, leaving them only the barest necessities of life (Ar. p. 95). In spite of these sufferings, the beginnings of scholarship are exhibited in a ritual question addressed by the Jews of Prague to Moses B. Jekuthiel in Mayence (Grün, p. 9).

They seem to have gradually recovered some of their former favor. In 1124 the Jew Jacob, who after his baptism had become a favorite of Vratislav I., and had risen to be vice-dominus at his court, returned to Judaism and removed the Christian altar and holy relics from a synagogue. He was immediately arrested by his royal master and thrown into prison. The Jews are said to have offered three thousand pounds of silver and a hundred pounds of gold for his ransom (Ar. p. 101).

Toleration.

The prohibition against holding Christian slaves was in all probability disregarded in Bohemia as it was in Moravia, and that by the Christian "slaves" themselves, who enjoyed kindly treatment at the hands of their Jewish masters (Fr.-Gr. p. 10). The attitude of the Church toward the Jews was on the whole benevolent (Ar. p. 101). The community, which in 1142 suffered the loss of its synagogue and many houses by fire, probably during the siege of Prague by Conrad II. of Znaim (*ib.* p. 106), displayed a lively interest in theological studies, which led to close relations with the neighboring congregation of Regensburg, and even with the scholars of northern France. In Prague there lived the Tosafist Isaac b. Mordecai, known as R. Isaac of Prague; in Bohemia lived also Moses b. Jacob and Eliezer b. Isaak, mentioned in the Tosafot. Isaac ben Jacob ha-Laban (from "Albis," the Elbe, Bohemian "Laba") was a rabbinical teacher in Prague, and the brother of Pethahiah of Regensburg, who set out on his travels from Prague (*ib.* p. 131; Grün, p. 10).

In the thirteenth century the circumstances of the Jews were even more favorable. On leaving the country for a journey they had to pay a lighter tax even than the Christian clergy (Ar. p. 186). In 1235 they extended their settlements into the plains of Bohemia (Pod. p. 6). Though it is true that in that year the Jews contemplated leaving Bohemia in expectation of the Messiah's coming (Ar. p. 211), this was not due in any way to oppression. All their old privileges were secured to them; the friendly bull of Innocent IV. (1254) was confirmed by Ottocar II., and, in expressed opposition to the hostile resolutions of the Vienna council, was again confirmed in 1267 (*ib.* pp. 255, 257; Wertheimer, p. 172). The following regulations applied to the Jews in Bohemia as well as to the king's other Jewish subjects: a Christian might testify against a Jew only in conjunction with another Christian and a Jew; a Jew was to be tried only in the synagogue (with "coram suis scolis," in Ar. p. 255). In disputes between Jews the decision was not to rest with the municipal judges, but with the lord of the manor or the chief chamberlain; the Jewish judge had jurisdiction in such cases only if the charge had been brought originally before him. Desecration of the Jewish cemetery was punishable with death, the offender's property escheating to the head of the state. A Jew could not be compelled to deliver upon a Jewish festival a pledge upon which he had lent money. In loan transactions with the Church the Jew was advised for his own good—as also by the municipal laws of Iglau, 1249 (*ib.* p. 244)—to exercise especial caution.

Jews were also found in Tachau, among them being Moses ben Ḥisdai, "one of the grays of Bohemia." His contemporaries were Jacob, son of the above-mentioned Isaac ha-Laban, and Abraham ben Azriel called Isaac Or-Zarua, whose history seems to have been intimately associated with Prague, and whose teachers were counted among the scholars of that city. A Pentateuch commentary was written by a disciple of Judah the Pious, who lived probably in Bohemia. In the second half of the thirteenth century, a grammarian, Jekuthiel b. Judah ha-Kohen or Solomon ha-Naḳdan, lived in Prague. Thus Saadia, Ḥayyug, Ibn Ezra, and Maimonides, together with the exegetes of northern France, may be said to have found a new home in Bohemia (M. pp. 31, 316, 360; Grün, ii. 13).

The Fourteenth Century.

A fitting prelude to the horrors of the fourteenth century was afforded by the massacre of the Prague community, which, it would appear, had its own quarter, the "Vicus Judæorum," as early as 1273 (Grün, p. 24). In 1290 (Wertheimer, p. 175) and 1298 Rindfleisch's robber-band (Grün, p. 16), fell upon the ghetto there, to avenge an alleged insult to the host. As early in the century as 1305 the charges of ritual murder which sprang up in so many German towns found victims in Prague (Kohut, "Gesch. der Deutsch. Jud." p. 162). In 1321 seventy-five Jews were burned at the stake there ("Jahrb. Gesch. der Jud." iv. 147). John of Luxemburg in 1336 plundered the synagogues because by the newly introduced customs duty he could not quickly attain his end (Grün, p. 17). In the same year 53 Jews were burned in Prague ("Jahrb. Gesch. der Jud." iv. 147). At the instigation of the Armleders and their like the Jews in Budweis (Wertheimer, p. 177), where there were in 134 three families, had increased considerably in numbers; those in Czaslau, Prichowitz, and Neuhaus were plundered and murdered (Salf. p. 240). The archbishop of Prague, Arnest I., in 1347 made new charges against them (Wertheimer, p. 173); but they were shielded by the utterance of the emperor Charles IV. in that year, who said that the Jews were his "serfs" ("Kammerknechte"), and that his rights in them must be respected (M. 1894, p. 371). His representative in 1339 likewise protected certain Jews, who had been baptized and had reverted to Judaism again, from the vengeance of the Church; for his humane interference he was promptly excommunicated (Wertheimer, p. 175). On the other hand, however, Charles IV. felt himself justified in considering all the property of his "serfs" as quite his own, and at his pleasure released debtors to the Jews from their obligations. He divided with his nobles the possessions of the Jews massacred in the fearful outbreaks of 1348 and 1349 which accompanied the Black Death in Prague and Eger (*ib.* p. 174; Salf. pp. 250, 268; Kohut, *ib.*; concerning the Jews in Eger, see Wertheimer, p. 176; for those in Kolin: M. 1894, p. 220). All these bloody scenes of the century were brought to a fitting close with the repeated massacres excited in 1388 by the charge of ritual murder (Wertheimer, p. 74); in 1389, by the charge of insulting the host (Salf. p. 306; Zunz, "Ritus," p. 127), during which latter outbreak even the gravestones in the Jewish cemetery were broken, the Altschul synagogue burned, and the walls of the Alt-Neuschul synagogue streaked with the blood of Jewish martyrs (Pod. p. 84; see Abigdor Kara's elegy). Finally, in 1391 the charge of poisoning the wells was made, on which occasion Lipmann of Mühlhausen was among the sufferers (Kohut, *ib.* p. 318).

The Fifteenth Century.

Such an unbroken period of suffering could not but result in the most terrible conditions, but the worst feature, particularly in Prague, was a system of shameful espionage and denunciation of the authorities which raged for more than two centuries, and which sometimes involved rabbis and wardens of the congregations. As lords of their "serfs," Wenzel and Sigismund frequently exacted scrupulous compliance with their alleged "rights" over the Jews (Wertheimer, p. 177; "Zeit. für die Gesch. der Juden in Deutschland," ii. 173; on the relations between Wenzel and Abigdor Kara, and between the Jews and Hussites, see Güdemann, "Gesch. des Erziehungswesens," iii. 154, and Berliner, "Aus dem Leben," etc., p. 55). The Jews were no longer, together with the trade-gilds, considered privileged traders. The fifteenth century witnessed a constant succession of massacres and pillagings (Wertheimer, p. 175), 1422, 1448, 1476 (compare "Gal 'Ed," Nos. 5, 50), etc., which, in part, were no doubt to be ascribed to the turmoil of the Hussite wars, but also to the blood accusation in Trient, 1476. The congregation in Eger alone shows satisfactory development; with it, especially with its teacher Nathan, Isserlein b. Pethahiah kept in touch (M. pp. 18, 134; compare pp. 316, 322).

Expulsions.

The pretentious resolution of the imperial Diet in 1501 (Wertheimer, p. 178), never again to expel Jews from Germany, was very quickly belied by the expulsions of 1503, 1504, 1506, 1507, 1512, and 1516. A similar decree of 1520 was revoked in consideration of a very heavy money contribution (*ib.* pp. 175, 177; Pod. p. 40; "Jahrbuch," *l.c.* p. 147). Systematic persecutions took place under the fanatical Ferdinand I.; in 1527 he confirmed that high-sounding resolution which had been agreed to by Ladislaus II., but in 1541 he negotiated with the Bohemian nobles for the expulsion of the Jews. For the first time a charge of high treason was made against them; they were charged with intriguing with the Turks; and Ferdinand was most zealous in the restoration of the almost forgotten regulations concerning the distinctive Jewish garb (1541, 1544, 1551 ["Zeit. für die Gesch. der Juden in Deutschland," i. 251], 1571). In 1540 (Kohut, *ib.* p. 554; formerly every scholar had to pay two pfennig for his writing materials; Wertheimer, p. 181) he imposed a special property tax upon the Jews, compelling each one to swear upon the Decalogue as to the value of his possessions. In 1541 (*ib.* p. 179) the Jews, with the exception of fifteen families, were expelled from Prague, greatly to the satisfaction of Luther (Grätz, "Gesch. der Juden," ix. 313), Ferdinand's bitterest enemy. In 1554 they were welcomed back again, in return for heavy financial considerations; in 1559 they were again expelled, to be readmitted two years later ("Gal 'Ed," p. 22; Pod. p. 42). Again, in 1562-64 the edict of expulsion was launched against them (Wolf, Th. p. 61, note), but the warmth with which the empress (Pod. p. 42) and archdukes pleaded the part of the Jews was at least a gratifying incident of the decree. In 1568 they were expelled from Kolin and Kuttenberg, and in 1571 from Mattersdorf ("Hebr. Bibl." iv. 149).

The internal development of the community meanwhile had progressed satisfactorily. In 1512 the first Hebrew book was printed in Prague; the Jewish printing business founded there by the Gersonides remained the distinguishing feature of the community until the eighteenth century. In 1547 the censorship made itself felt ("Gal 'Ed," p. 20), and in 1559 suspicions professed concerning the Jewish prayer-book led to an examination in Vienna of all Hebrew books that could be seized in Prague. Even matters of internal management were not free from the interference of the authorities; *e.g.*, the confirmation of the rabbi Abraham b. Abigdor, called "Abraham of Prague" (Kohut, *ib.* pp. 361, 582; compare "Gal 'Ed," p. 121). Unfortunate contentions in the congregation resulted in 1567 in the transfer of the superintendence of Jewish affairs to the Bohemian chambers ("Zeit. für die Gesch. der Juden in Deutschland," i. 310).

Mordecai Meisel.

But in the last third of the sixteenth century the circumstances of the congregation changed for the better and were brighter than ever before. Trade with the interior of Austria, and with Bavaria and Saxony, which the Jews controlled, and the financial transactions of the imperial house enriched Mordecai Meisel, the well-known benefactor of the congregation. He built the synagogue named after him, half a century after Aaron Meshullam b. Isaiah Horwitz had established the Pinkus synagogue ("Gal 'Ed," p. 24). Conjoined with Meisel we find as friend and counselor Löw b. Bezaleel, "the chief Rabbi Löw" (founded, in 1654, in conjunction with Eliezer Ashkenazi, the burial society; on his celebrated audience with Rudolph II. see Pod. pp. 1, 2, 3). The historian, geographer, and astronomer, David Gans, and Lipmann Heller of Wallerstein, author of the "Tosafot Yom-Ṭob," were their contemporaries and fellow-countrymen.

Maximilian II. and Rudolph II., in whose time the Prague congregation attained its highest development (in 1609 the first rabbi is recorded in Jung-Buntzlau; see Grünwald, "Jungbunzlauer Rabbiner"), were followed by Ferdinand II., who distributed all manner of favors to the Jews in the hope of securing their conversion. His court-steward, Jacob Bassev (Bathsheba) Schmieles, was raised by him to the nobility as "Von Treuenberg." The first step hereunto was taken by the institution of the Jesuits' sermons, to which the Jews were compelled to listen (1623 and 1630). But the Passau expedition of 1611 (Zunz, "Ritus," p. 129; "Gal 'Ed," p. 13); the Thirty Years' war (Kisch, Pr. pp. 7, 10), in which the Jews of Bohemia remained loyal to the emperor, receiving in return the protection of his generals (for a letter by Torstenson protecting Jung-Buntzlau see "Zeit. für die Gesch. der Juden in Deutschland," i. 288), and being especially rewarded by the emperor for their defense of Prague against the Swedes; the conflagrations ("Jahrbuch," *l.c.* p. 147) of 1654, 1679, and 1689; the invasion by the French in 1680 (Kohut, *ib.* p. 654)—all brought severe sufferings to the Jews of Prague. Their numbers were increased by emigration from Vienna and in 1650 from Poland (at the head of the latter being Ephraim Cohen of Wilna; see K. Of. pp. 14, 18), in compensation, as it were, for those who at the expulsion of 1542 left Bohemia with Jacob Pollack and Solomon Shechna b. Joseph to settle in Poland. In 1636 the congregation contained 7,815 souls, in 1679 only 7,113 ("Zeit. für die Gesch. der Juden in Deutschland," i. 317). The Prague community attended to the assessment and collection of the taxes from the provincial congregations, and the rabbi was appointed upon the city-tax commission, a circumstance which in 1625 subjected Lipmann Heller to the machinations of Jewish informers (Wolf, Ferd. p. 17). The "Prague Purim," on Ḥeshwan 14 (Kisch, Pr. p. 12), and the "Vorhang Purim," on Ṭebet 22, are memorials to-day of events happening in the seventeenth century. In 1627 the Prague Jewish quarter was independent of municipal authority, governing itself. Celebrated teachers at that time were Salomon Ephraim Lenczyz and Isaiah Horwitz, while Joseph Salomon del Medigo ended his checkered career here.

The Eighteenth Century.

The eighteenth century, which in its last quarter was to see the gates of the ghetto flung wide open, was marked by a blot upon the reign of Maria Theresa, which all the formal edicts of toleration could never remove. The confiscation of their books in 1715 had reminded the Jews of their utterly defenseless condition (M. pp. 41, 359). They may have hoped to recover grace by their conspicuous loyalty, shown first in 1741 on the occasion of the birth of Joseph II. and the empress' first visit to the church (Kohut, *ib.* p. 655), and again particularly at the walls of Prague in 1742 and 1743, where with permission of their rabbi, Jonathan Eybeschütz, they stanchly fought against the French even on the Day of Atonement ("Jahrbuch," *l.c.* p. 151). Their loyalty was rewarded by an edict in 1745 which, without any reason, at one stroke banished them, 60,000 souls strong, from Bohemia, after their payment of a fine of 160,000 gulden. Representations by Venice, Holland, England, Hamburg, and other liberal powers were of no avail. Jonathan Eybeschütz wrote to the French congregations, and even to the pope (Kohut, *ib.* p. 658). Embittered to the extreme by the treachery of the nobles, the authorities desired to make an example of the Jews, especially as the opposition emperor, Charles VII., had shown himself well disposed toward them, and as Frederick the Great was considered by the people as a "father of the Jews" (K. Bur. p. 3). That the authorities did not themselves believe in the accusation of treachery made against them is shown by the fact that it is nowhere alleged as the reason for the expulsion, and that later, in 1771, the Bohemians themselves defended the Jews from a similar accusation (Wolf, Th. p. 69); on the excommunication of Jewish traitors, issued in 1756 by Ezekiel Landau, see H., 1894, p. 416; Wolf, Th. p. 64. The sad results of this outrage affecting the whole country, the stagnation of all business, and the outspoken complaints of the people induced the authorities finally to readmit the Jews. From the edict of recall, it appears that before the expulsion the Jews had been permitted to live in Kaurzim, Tabor, Neuhaus, Pisek, Schuettenhofen, Wodnian, Pilsen, Miess, Klattau, Rokizan, and Laun. They were still to be excluded from the following cities where they had formerly lived: Czaslau, Budweis, Eger, and Leitmeritz ("Jahrbuch," *l.c.* p. 188; in memory of the bloody rule of the Croatians in 1745, to which R. Jonah, among others, fell a victim, a fast-day is still observed in Böhmisch Leipa, on Ṭebet 4; see Kohut, *ib.* p. 658). After this expulsion Maria Theresa treated the Jews on the whole more favorably than before (Wolf, Th. p. 60). But such laws as the Familianten Gesetz (Fr. Gr. p. 171), limiting the number of married persons in a community, the restrictions imposed upon Jewish trade (Wolf, Th. p. 77), rigorous insistence upon the wearing of the Jew badge (yellow collar on the coat; abolished in 1781; "Zeit. für die Gesch. der Juden in Deutschland," i. 27), and the limitations imposed upon Jewish physicians (Wolf, Th. pp. 75–77; the first doctor was graduated in 1778), still showed the same intolerance. All of these, however, were wiped away at one stroke by the edict of tolerance issued by Joseph II. in 1782. The Prague Jewish quarter was incorporated (1784); Jewish physicians were allowed to treat Christian patients in 1785 (Lieben, "Gal 'Ed," p. 18), and Jews were drawn for military service (Kohut, *ib.* p. 757). The home conditions of the Prague Jews likewise improved. On the great fire of 1754 see K. Heine, p. 43; Pod. p. 92. David Oppenheimer, the book-collector, laid the foundation for Jewish bibliography. Jonathan Eybeschütz, a living exemplar of the destructive influence wrought by the Shabbethai Ẓebi imposition (Kohut, *ib.* p. 680), and Ezekiel Landau, his opponent, were the chief scholars of this period. Upon the other side, Peter Beer and Herz Homberg sought to introduce reforms in the Jewish ritual, but met with determined resistance, particularly as Joseph II. himself would have nothing to do with Mendelssohn and his "enlightenment."

The Nineteenth Century.

The nineteenth century must be said to evidence retrogression in the condition of the Jews in Bohemia, since, in spite of the example of Joseph II., the Jews were treated throughout in the spirit of his predecessors. The Familianten Gesetz and its evils, and the various imposts levied, were not abolished until the adoption of the constitution, March 4, 1849. The fact that a few individual Jews have occasionally been raised to the ranks of the nobility has exerted no influence upon the general circumstances of the Jews. Nevertheless, Prague has flourished under the inspiriting breath of modern times, and has become a focus of Jewish learning. Zacharias Frankel was born here; Rapoport, Zunz, and Michael Sachs labored here. The Slavonicizing of Bohemia makes itself evident here and there among the Jews in the adoption of the Czech language at general meetings and occasionally in the pulpit.

BIBLIOGRAPHY: Periodical literature is given in the second volume of the *Zeitschrift für die Gesch. der Juden in Deutschland. Copia Eines Schreibens, Welches ein Jude aus Praag an Einen Seiner Guten Freunde in Franckfurt Abgelassen, die Ursache Ihrer Emigration Betreffend*, translated from the Hebrew original into the High German tongue, 1745, signed Mausche Israel. Appended to it is an anti-Jewish poem, *Zufällige Gedanken über die Emigration der Judenschaft in Prag*, two leaves, in the Hamburg Stadt-Bibliothek, *Realcatalog*, Q. ii. 2. G. A. KU.

BÖHM, MOSES: German physician; flourished in the middle of the eighteenth century. In 1740 he was engaged by the Jewish community of Halberstadt to attend to the medical needs of its poor members; and his salary, 175 thalers per annum, was paid to him regularly, according to the communal records, until 1747. He soon became very popular with Gentiles as well as with Jews, and was consulted professionally by the nobility and high dignitaries. It is supposed that Böhm remained in the service of the community after 1747, but his increased prosperity enabled him to dispense with his salary, which was a heavy charge on the community. Various anecdotes of his skill as a physician and his generosity are preserved among the Jews of Halberstadt, from which it is evident that he must have occupied an important position in that city. There are extant Hebrew letters written by him against the use of amulets, and against the early and hurried burials of the dead, which were common among the Jews of his time. In these epistles he proves himself a good Hebraist, an excellent reasoner, and well versed in rabbinical literature.

S. P. WI.

BÖHMER, ISRAEL B. JOSEPH: Russian Neo-Hebraist and lexicographer; born about 1820; died in Slutzk, government of Minsk, April 4, 1860. His father, R. Joseph Böhmer (1796-1864), was a prominent Talmudical authority, one of the first graduates from the yeshibah of R. Ḥayyim of Volozhin, and rabbi of Slutzk for thirty-five years. Israel traveled in western countries and knew several European languages. His works abound with Latin, German, and French quotations, and show a familiarity with scientific methods of investigation. His chief work is "Kitbe Israel Böhmer" (The Writings of Israel Böhmer), part i. or letter i., Warsaw, 1849, a treatise on the Essenes, containing many etymological explanations of Hebrew and Talmudical terms. His "Keẓad Ma'arikin" (How to Arrange) is a contribution to Talmudical or rabbinical lexicography, and was published as a specimen of a large work on the subject (Berlin, 1855). Böhmer edited, in conjunction with G. Polak of Amsterdam, "Eẓba' Elohim" (The Finger of God), a sketch of the life of R. Isaac Tirnau, with notes and appendix (Königsberg, 1857). He also published, together with E. L. Silberman, for whose "Ha-Maggid" he worked about nine months, a new and annotated edition of Samuel Shullam's Hebrew translation of Josephus' work, "Contra Ap." (Lyck, 1858). His lexicographical articles appeared in "Kerem Ḥemed," iii. 13–22, 116–149 (of which the above "Keẓad Ma'arikin" is practically a reprint). There also appeared from his pen "Lexicalische Beiträge zum Talmud," in "Literaturblatt des Orients," 1850, ii., Nos. 25, 27, 39. His Hebrew is far from being pure or classical, and contains many curious Germanisms ("Reformer and Jewish Times," New York, vol. x., No. 20).

BÖHMER (פיימער), JOSEPH B. MEÏR: Lithuanian rabbi and Talmudist; born at Skudy in 1796; died May 7, 1864, at Slutsk. One of the most eminent pupils of R. Ḥayyim of Volozhin, Böhmer attained such a reputation as Talmudist that legal questions were sent to him even from Palestine and Babylon. Following the methods of his teacher, he was especially remarkable for his strictly logical treatment of the Talmud and rabbinical literature, being a decided opponent of the pilpul. Böhmer was greatly beloved and respected in his community for his personal qualities as well as for his scholarship. He officiated as rabbi for thirty-five years, and left a large collection of responsa, and scholia to the Yad ha-Ḥazaḳah and the Shulḥan 'Aruk, which are still extant in manuscript. Böhmer was succeeded in the rabbinate of Slutzk by his son Meïr.

L. G.

BOIL: The rendering, in the English versions of the Scriptures, of the Hebrew word "sheḥin," which comes from a root meaning "to warm," and indicates an inflamed spot. In the Bible it is used to describe two distinct forms of disease, each characterized by a local swelling, exceedingly painful and accompanied by a discharge of pus: (1) the simple boil, limited to one spot and not contagious (Lev. xiii. 23); and (2) the loathsome eruptions characteristic of endemic elephantiasis, a form of leprosy so called because the feet of the victim swell to a great size and resemble the feet of an elephant. This seems to have been the form of disease with which Job was afflicted (Job ii. 7), although the suddenness with which he was "smitten with sore boils from the sole of his foot unto his crown" is more suggestive of plague.

That the Jews distinguished between the first and the second type—which latter seems to have been known as the "botch [or boil] of Egypt" (Deut. xxviii. 27)—is clearly demonstrated by the law set forth in Lev. xiii. 18–23. Doubtful cases were brought before the priests. If the scar left by a boil was lower than the skin, and the hair upon it was white, the case was pronounced one of leprosy. In the absence of these signs the afflicted one was shut up for seven days. If at the end of that time the disease had spread it was a case of leprosy; if not, the scar was recognized as that of a simple boil, and the man was declared clean. See LEPROSY.

J. JR. C. F. K.

BOJANOWO: A town in the district of Ravditsch, province of Posen, Germany. A Jewish community of one hundred and forty-four souls dwelt in Bojanowo as early as 1793. They were under the protection of the Boyanowskis, the lords of the manor, who had founded the town in 1638. They received from the lords the privilege of free trade, the right to buy houses, and the right to pursue all handicrafts, for which they had to pay in per capita taxes twelve full-weight groschen to the king, eight thalers and ten silver groschen to the lord of the manor, and eight silver groschen to the city, for permission to reside in it. In the beginning of the nineteenth century Samuel Samwel Munk, "who knew how to read and write German, and was in the habit of reading German books and even journals in the hours that are neither day nor night," held the position of rabbi at Bojanowo, whence he was called to Wollstein (Graetz, "History of the Jews," index volume, p. 7, Philadelphia, 1898). The synagogue, built as early as 1793, was burned down during the great fire in 1857, but was rebuilt the following year. The Jewish cemetery was opened in 1817. In 1900 Bojanowo counted a Jewish population of only fifty-eight out of a total of 2,200.

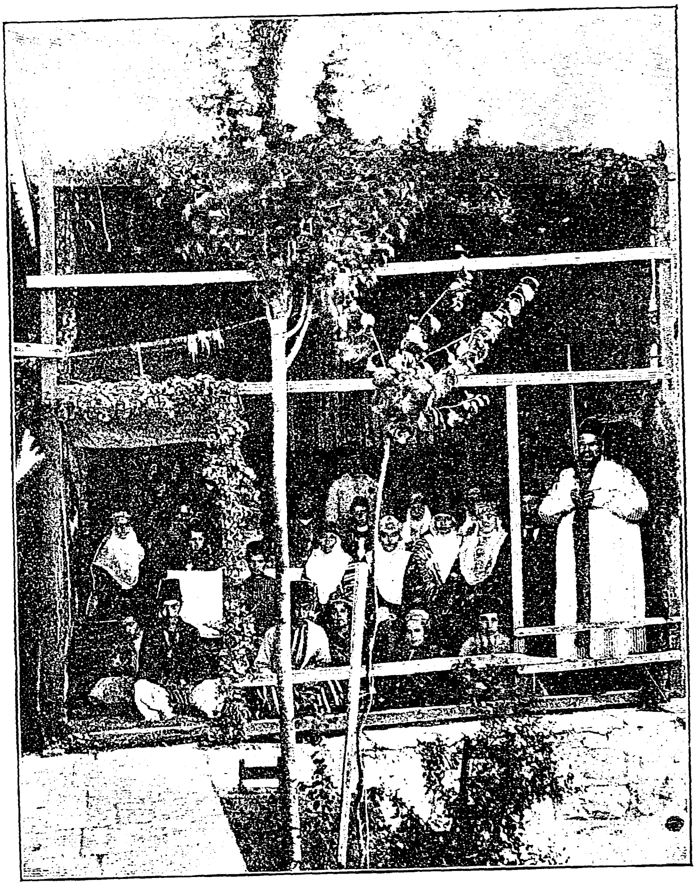
BOKHARA: Capital of the khanate of the same name in Central Asia; a principal seat of Islam and, with Samarcand, a center of Mohammedan culture in Central Asia since early times. The city probably had a Jewish population even at the beginning of the Mohammedan rule. The Jews of Bokhara, whose mother-tongue points to their Persian origin, consider themselves descendants of the Ten Tribes, and identify the Biblical "Habor" (II Kings xvii. 6) with the name "Bokhara." In support of this theory, their chief rabbi in 1832 pointed out the identity of the consonants in the two names to the well-known missionary Wolff ("Narrative of the Mission of Dr. Wolff to Bokhara," p. 30, New York, 1845). According to the same informant, the documents relating to the earliest history of the Jews under Genghis Khan's rule (1218–26) have been lost.

Half a century before the conquest of Bokhara by the Mongols, Benjamin of Tudela, during his sojourn in Persia, gathered information relating to

Under Mongol Rule.

the Jews living on the Oxus, especially concerning one independent Jewish tribe that claimed to derive its descent from the Ten Tribes, and was in friendly relations with the Turkish nomadic tribes of Transoxiana. Benjamin does not mention Bokhara, but he speaks of Samarcand, where, according to his statement, there were 50,000 Jews, among them men eminent for wealth and learning. Bokhara, no doubt, had its Jewish population also at that time (compare Vámbéry, "Gesch. Bocharas," i. 156); but the Jewish historical sources for many centuries mention neither Bokhara nor the other cities of Transoxiana. The only monument of the intellectual activity that may be presupposed among the Jews of that region is the curious dictionary of Solomon b. Samuel (see Bacher, "Ein Hebräisch-Persisches Wörterbuch aus dem 14. Jahrhundert," Strasburg, 1900), a work completed in 1338 in Oorgbenj (Gurgang), hence in the country bordering Bokhara on the west. The conclusions that may be drawn from this work regarding the intellectual status of the Jews in the countries bordering on the Oxus may certainly also be applied to Bokhara.



Jews of Bokhara Celebrating the Feast of Tabernacles.
(From a photograph by the American Colony, Jerusalem.)

Poetical Efforts.

More than three centuries separate Solomon b. Samuel from the next name from Central Asia recorded by Jewish literary history. This was the poet, known in non-Jewish circles under the name of Yusuf Yehudi (Joseph the Jew), who flourished in Bokhara at the end of the seventeenth and in the first half of the eighteenth century. With the exception of the names and a few dates no biographical notices have been preserved, either of him or of the other members of the Judæo-Persian poetic circles that flourished contemporaneously at Bokhara. In 1688 Yusuf Yehudi, whose full name was Mollah Joseph b. Isaac, completed the "Seven Brothers" (referring to the seven martyrs and their mother; see II Maccabees vii. 1), a poem still popular among the Jews of Bokhara. He died in 1755 at an advanced age. Yusuf Yehudi and his fellow-poets, who were generally called "Mollah" (from the Mohammedan word for "scholar"), used Jewish material in their Persian poems, but also assiduously cultivated Persian poetry. As their own poems were written in the Hebrew script, they transcribed the Persian classics, Nizami, Hafiz, etc., into this script for the benefit of the Jews of Bokhara; and also translated Hebrew poems, such as those of Israel Najjara, into Persian verse. The Persian translation of the Pentateuch, which is now used by the Jews of Bokhara, seems to date from a much earlier time, and is probably the earliest literary monument of the Jews of Bokhara (on Yusuf Yehudi and the circle of poets of Bokhara, see Bacher, in "Z. D. M. G." liii. 389–427; *idem*, in "Jew. Quart. Rev." xiv. 116–128).

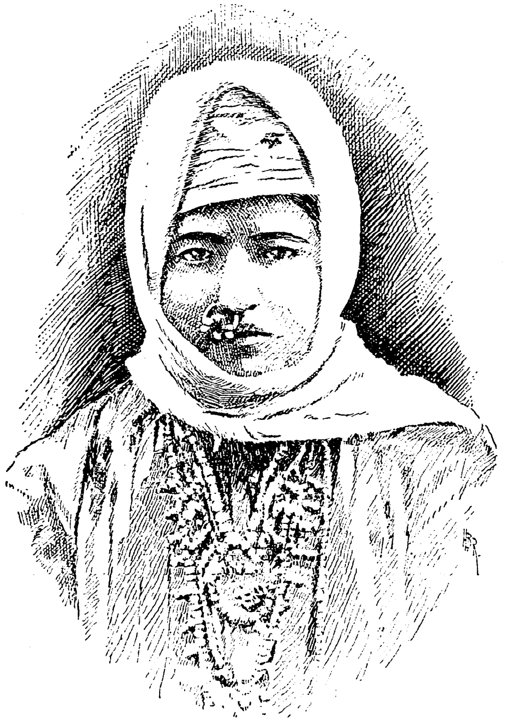
The next name to be mentioned from Bokhara is that of the poet Ibrahim ibn Abu al-Khair in the beginning of the nineteenth century, author of an account of a contemporaneous event; namely, the martyrdom of Khudaidad (*i.e.*, El-Nathan) at Bokhara in the reign of the fanatical Emir Mas'um (d. 1802). In addition to the picture of Mohammedan fanaticism under which the Jews of Bokhara had to suffer, this poem, based on fact (see Bacher, in "Zeit. für Hebr. Bibl." iii. 19–25; *idem*, in "Z. D. M. G." lii. 190–212; Gottheil, in "Amer. Jour. Semit. Lang." xv. 124), gives an insight into their inner life and their domestic and social conditions. Ḥoja of Bokhara, who in 1816 wrote a Book of Daniel in the Persian language, was perhaps a brother of the martyr (see "Jew. Quart. Rev." vii. 119).

Wolff's Visit.

In 1832, some decades after Khudaidad's martyrdom, the first European came to Bokhara, and after having visited the city again in 1844, gave some detailed information concerning the Jews there. This was the missionary Wolff, mentioned above, who recounts the following in his book (*l.c.* ii. 3):

"In Bokhara there are 10,000 Jews, who are mostly dyers and silk merchants; they wear a small cap, and a girdle around the chest, in order to be distinguished from the Mohammedans. Their synagogue is a very old building, although excellently preserved. During my sojourn there the emir [Nasrullah Khan, who reigned 1826-60 (see Vámbéry, *l. c.* ii. 165)] gave them permission to repair but not to enlarge the building."

Wolff says that the same emir frequently went to the house of the rabbi Simhah during the Feast of Tabernacles to witness the celebration and to partake of the feast.



A Jewess of Bokhara.
(After a photograph.)

In 1849 the traveler J. J. Benjamin II. ("Eight Years in Asia and Africa," p. 173, Hanover, 1859) met at Bombay a Bokhara coreligionist, Messias (Mashiah) by name, who gave the following information concerning the Jews of his city:

"He told me that nearly 2,500 Jewish families live at Bokhara and in the neighborhood who support themselves by trade, agricultural labor, and mechanical employment. They are obliged to wear on their garments a piece of old stuff, by which they can be distinguished from the Tatars."

In view of the great oppression that the Jews of Bokhara suffered, it is not strange that, as Wolff recounts, an African Jew, Rabbi Joseph Moghrabi, who came to Bokhara in the first quarter of the nineteenth century, was wont to say: "O Lord! when will the time come that the followers of Jesus shall take possession of this country?" (*l.c.* i. 14).

Under Russian Rule.

Bokhara was opened up to Europeans in 1863. Soon afterward Russian aggression commenced in central Asia. Tashkent was annexed by Russia in 1866; in 1868 Samarcand was seized, and a large part of the khanate of Bokhara was added to the government of Russian Turkestan. Bokhara itself remained the capital of the emir, who, however, became more and more a dependent of Russia. At present he is hardly more than a Russian governor. The Russian occupation of the territory of Bokhara brought comparative freedom to the Jews. In his work entitled "Russia in Central Asia in 1889 and the Anglo-Russian Question," p. 172, London, 1889, Lord Curzon, at present viceroy of India, who visited those regions in 1888, has the following to say concerning the Jews of Bokhara:

"The Jews are here a singularly handsome people, of mild feature and benign aspect. Confined to an Oriental ghetto and for long cruelly persecuted in Bokhara, they still exhibit in their prescribed dress and appearance the stamp of a peculiar people. The head is shaven save for two long locks hanging in a curl on either temple; they wear a square black calico bonnet trimmed with Astrakhan border, and a girdle round the waist. To my astonishment, I met with one who could speak a little French."

Franz von Schwarz, who from 1874 to 1890 was astronomer of the observatory of Tashkent and director of the meteorologic institute of Turkestan, gives valuable information on the Jews of Bokhara in his suggestive book, "Turkestan, die Wiege der Indogermanischen Völker" (Freiburg in Baden, 1900), from which the following passages (pp. 441-445) may be quoted:

Occupations.

"Just as in Turkestan usury is almost exclusively in the hands of the Indians, so the Jews of Bokhara devote themselves to commerce and industry. . . . Nearly all the dyers, especially the dyers of silk, are Jews [compare p. 384: "The dyeing of silk is done chiefly by the Jews, their occupation being easily recognized by their hands, which are always blue"; p. 431: "The Jews of Bokhara have in a way monopolized the commerce with dyed raw silk"]; the native apothecaries and physicians are also Jews. The Bokharian Jews are as cleanly as the Sarts, eminently modest and polite, and produce on the whole a more pleasing impression than the Sarts and Uzbegs. It is impossible to describe how the Jews of Bokhara have hitherto been treated in all the Central Asiatic khanates, and in part even to-day in the independent states. . . . Like lepers, they are obliged to live in their own quarters. In Bokhara no Jew is permitted to wear a turban or belt; he must gird himself instead with a rope, and must wear a fur cap of a prescribed shape [compare Curzon, *l.c.*]. . . . As far as the restrictive regulations will permit them, the Jews prefer to dress like the Sarts, Uzbegs, and Tajiks. They also shave the head like the Mohammedans, leaving, however, two long curls on the temples. . . . They are monogamous, and are remarkable for their large families. Notwithstanding all oppression, they are on the whole wealthy and have already acquired ownership of a number of houses, built in the European style, in the Russian city of

Social Position.

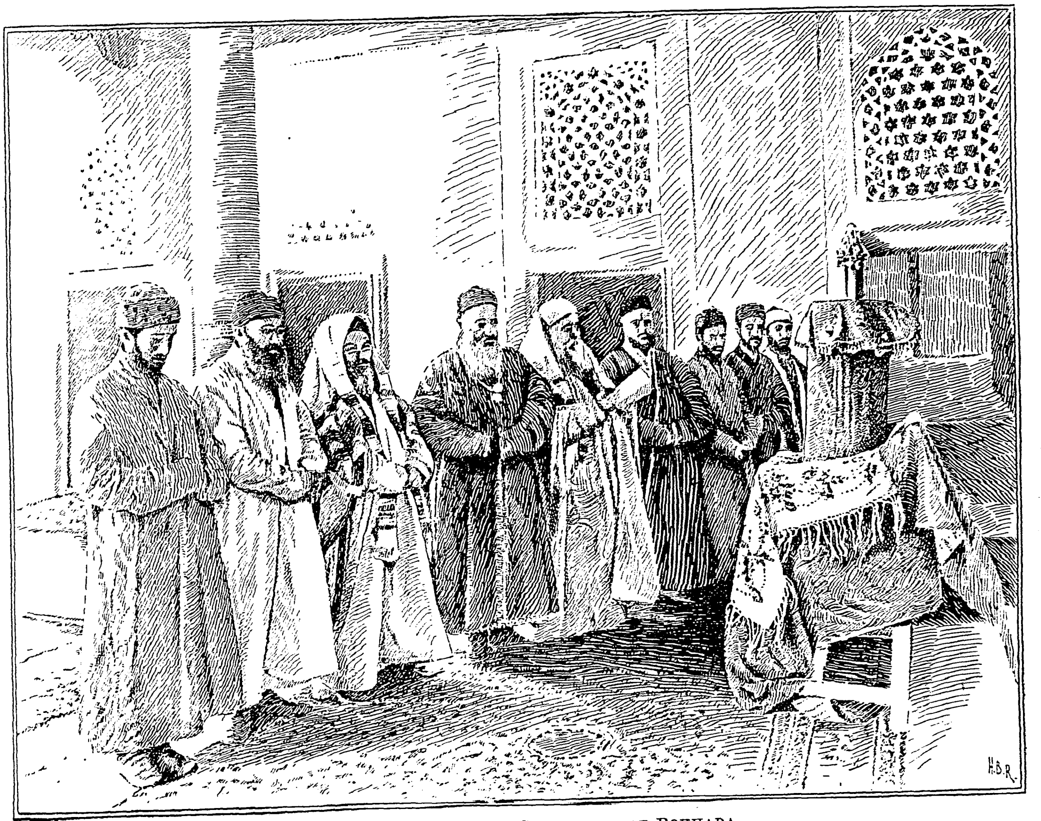
Tashkent. The Jews enjoy full religious liberty in the Russian provinces of Central Asia, and have the same political as well as social status as the other inhabitants. Hence they everywhere look upon the Russians as their rescuers and liberators, and on every occasion assiduously further the Russian advances."

What Schwarz says here of the leaning toward the Russians is substantiated in an interesting way in the Russifying of Jewish names, for apparently they now prefer to add the Russian endings "of," "uf," to their names. Thus, the young interpreter who rendered invaluable services to Elkan N. Adler during his stay at Bokhara, in the summer of 1897, was called Abo Chachmanof ("Jew. Quart. Rev." x. 584). The author of the "Ritual Compendium," the Persian translation of which appeared at Jerusalem in 1901 (see "Zeit. für Hebr. Bibl." v. 147–151), is named Abraham Aminof; and names like Nathanael Davidof, Mattath Suleimanof, Benjamin Abrahamof, are found among the subscribers to the edition of the Pentateuch with Persian translation now appearing in Jerusalem for the benefit of the Jews of Bokhara.

The prosperity mentioned by Schwarz is also substantiated by the settlement that the Jews of Bokhara founded at Jerusalem in 1893. Only five years later this settlement included 179 houses, among them two synagogues and two schools. It became a kind of intellectual center for the Jews that had remained at Bokhara, for in the last few years different works were printed at Jerusalem to supply the religious and literary needs of the Jews of Bokhara. Among these were the above-mentioned Pentateuch edition and Abraham Aminof's "Ritual Compendium," both of which were translated into Persian by Simeon Ḥakam, a man remarkable for his activity, his knowledge of Jewish lore, and his thorough acquaintance with Persian. In his preface to the Pentateuch edition there are interesting remarks on the traditional Persian Pentateuch translation used by the Jews of Bokhara and their pronunciation of Persian. Benjamin Kohen of Bokhara had previously printed a Persian translation of the Psalms (Vienna, 1883) and of the Proverbs (Jerusalem, 1885).

The Persian dialect spoken by the Jews of Bokhara, as may be gathered from the literary documents mentioned and from others, shows many lexical and some grammatical peculiarities; being remarkable for many Turkish, particularly eastern Turkish, words, as appears especially in the above-mentioned "Ritual Compendium" (see Bacher, "Jüdisch-Persisches aus Buchara," in "Z. D. M. G." vols. lv., lvi.; *idem*, "Türkische Lehnwörter und Unbekannte Vokabeln im Persischen Dialekte der Juden Buchara's"; "Kelchi Szemle" in "Rev. Orientale," 1902, iii.). For further information concerning the literary activity of the Jews of Bokhara see Persian-Jewish Literature.

W. B.



Interior of the Great Synagogue at Bokhara.
(After a photograph by E. N. Adler, London.)

G.

Present-Day Conditions. There are perhaps 20,000 Jews in the country, most of whom live in the towns. Jews have for centuries been resident in both country and capital. Like their neighbors, the Afghans, the Bokharians in general, and especially the Turkomans, are by many believed to be descended from the Ten Tribes; but the Jews of Bokhara are Talmud Jews, and are probably descended from the Babylonian Jews who migrated eastward after the conquest of Jerusalem by the Romans. Their family names prove that many came from Persia via Merv and some from Khiva.

The Chinese Jews of Kai-Fung-Fu (see CHINA) are probably originally from Bokhara, the Persian rubrics in their liturgies being in the Bokharian dialect. The Bokhara Jews themselves have a tradition that their ancestors settled in various parts of Persia, and especially at Sabzawar, two days' journey from Meshed; that they were removed thence under the conqueror Genghis Khan (1220) to Balkh and Samarcand; and that when Samarcand fell into ruin, under Babi Mehemet Khan, the conqueror of Shah Abbas (1598), they went to Bokhara, where there was a Jewish colony; and some of them emigrated thence to Tsheen Patsheen (China), but soon ceased to have communication with their mother-country, though they "carried their genealogies with them."

Statistics and Occupations.

The present writer visited Bokhara in 1897, and found four or five thousand Jews there, inhabiting a special quarter and wearing a special badge on their clothing. They seemed intelligent and hospitable. Many of them were great travelers: one man had been to China; while several had visited India by way of Afghanistan and the Khaibar Pass. At least two hundred had made the pilgrimage to Jerusalem; and there are at the present time (1902) at least that number of Bokharians settled in Jerusalem with the pious purpose of living and dying there.

Most of the traveled Jews of Bokhara had been to Moscow, many to Paris, and some to London. One old man had been five times to Moscow. His first journey there, forty years ago, had been by caravan by way of Astrakhan and the Volga, occupying eighty days and costing 500 rubles.

None of the Bokharian Jews were rich, but most of them seemed to earn a livelihood. Some were cotton-growers; some grew grapes, some cultivated tobacco; while many were merchants trading with Moscow, where they exchanged carpets for manufactured goods, and importing Indian tea from Bombay via Batum and Baku. The greater part of the cotton trade of the khanate is in the hands of the Jews, and 500,000 poods (about 18,000,000 lbs.) of cotton are annually exported from Bokhara.

The largest synagogue of Bokhara is some 500 or 600 years old, with modern additions that resemble chapels in a cathedral, divine service being held separately in each. It has a genizah, or hidden chamber, in the roof, for the preservation of disused sacred writings.

The present chief rabbi is Mollah Hezekiah ha-Kohen, whose father was rabbi before him. In 1832, when the missionary Wolff, mentioned above, visited Bokhara, Mollah Pinchas, the elder, was chief rabbi, and there were four synagogues in the city. Wolff estimated the number of Jews at 10,000, and states that they paid only $300 per annum by way of tax to Bahadur Khan. He also states that there were 300 Jewish families, converts to Mohammedanism, who were scorned by the general population, and who intermarried with the Gholoom or slaves of Persia and not with the Uzbegs. Crypto-Jews from Meshed are still found in Bokhara.

Liturgy and Rabbis.

Toward the end of the eighteenth century one Joseph ben Moses Maimon, a native of Tetuan, and therefore called "Mughrebi," came to Bokhara via Jerusalem and Bagdad. He found the Jews ignorant and unobservant, and revolutionized their ritual and practise, sending to Europe for Hebrew books. The Jews have now forgotten their old Persian liturgy and have adopted that of the Sephardim of Italy, in the belief that they are descended, as Maimon was, from the Spanish refugees of 1492. Rabbi Joseph Maimon had an unsuccessful rival in a learned Yemenite Jew, Rabbi Zachariah ben Mazliah.

The present writer brought back with him about seventy Hebrew and Hebrew-Persian manuscripts from Bokhara and its neighborhood, one of which was written in Herat, many of them being transliterations into Hebrew of the great Persian poets, such as Sadi, Jami, and Nizami, and lesser local celebrities, like Tufili, Zeribu of Samarcand, and Musahfiki.

In 1490 there flourished Uzziel Moses ben David, who wrote poems in Hebrew and Persian. Other poets were Yusuf Yehudi ben Isaac (1688–1755), mentioned above, and his friends, Uzbek, Elisha, and Solomon Mollah. Somewhat later were David ben Abraham ben מחגי, Uzziel, Benjamin Siman-Ṭob, and Eleazar ha-Kohen, and, in the beginning of the nineteenth century Ibrahim ibn Abu al-Khair, author of the "Khudaidad" (ed. Salemann, St. Petersburg, 1897).

G. E. N. A.

BOLAFFIO, LEONE: Italian jurist; born at Padua July 5, 1848. He was educated at Padua; attended the public schools, the Talmudic college—where S. D. Luzzatto was his teacher—and the University of Padua. Bolaffio afterward practised law at Venice for fifteen years, at the same time acting as professor in the Istituto Tecnico. Then he became professor in the law department of the University of Parma and that of Bologna. He is a member of the Royal Commission for the Reform of the Commercial Code, commander of the organization known as the Crown of Italy, and a chevalier of the Orders of SS. Maurizio and Lazzaro. Bolaffio was the first to advocate the introduction of Gabelsberger's system of stenography into the public schools of Italy, and he himself wrote a manual for this system. He was also the founder, at Padua and Milan, of the Society for Stenography. Since 1876 he has been the editor of the judicial paper "Temi Veneta," founded by himself. Bolaffio's principal work is his "Commento al Codice di Commercio," 2d ed., 1899. He has also advocated the abolition of bankruptcy proceedings in the case of business men of small means.

S.

BOLAFFIO, LUIGI FILIPPO: Italian journalist and publisher; born in Venice 1846, died at Milan 1901. While he was still a youth his parents moved to Genoa, and there Bolaffio founded "La Favilla," a literary magazine. He returned to Venice in 1866 and became a contributor to the "Rinnovamento" and "Venezia." In 1880 he went to Milan, where he edited the political newspaper "L'Italia." Owing to differences with the publishers, he abandoned this, and founded the "Caffè, Gazzetta Nazionale," which he afterward disposed of to a syndicate holding monarchic but liberal views. The "Gazzetta Nazionale" reflected the opinions of the Lombard aristocracy. Bolaffio's political utterances involved him in many duels, in one of which, with Marin, the socialist and member of the Italian Parliament, he wounded his opponent almost mortally.

On the death of one of his little sons, Bolaffio retired from politics and founded the well-known Milan publishing-house, the Casa Editrice Verri, which issues "Il Mondo Umoristico" and many other popular journals.

During the past twenty years Bolaffio, in conjunction with his wife (Sulamith, the daughter of Baer Jolles of Berlin), wrote sixteen volumes of guidebooks on Italy, Switzerland, and Paris, issued by Treves Brothers, Turin. Many of them have been translated into French, English, and German. Bolaffio was also the author of "Il 14 Giugno, 1859," a historical memoir, Venice, 1867, and "Augusta," a novel, Milan, 1888.

BOLAT. See BULAT, ABRAHAM IBN.

BOLECHOW: Town in the district of Dolina, Galicia, Austria, the population of which in 1890 was 4,402, of whom half were Jews. The Jewish community dates from the day of the foundation of the place in 1612 by Nicholas Giedzinsky. According to the privileges granted the Jews by the founder and confirmed by King Sigismund III. of Poland, they enjoyed equal freedom and rights with the Christians. They were released from all burdensome taxes and from the compulsory supply of relays. They had the right to build in any part of the town, and were granted a plot of ground for a garden to each house. Both were their exclusive property, subject only to the payment of a small tax to the lord of the manor. A place to build a synagogue and land for a cemetery were granted them gratis and were free from taxes forever, as were also the other communal buildings that might be erected on the grounds of the synagogue. Charges by Christians against the Jews were under jurisdiction of the lord of the manor or of the judge appointed by him, in accordance with the existing statutes and the privileges granted the Jews by the king. The Giedzinskys were always favorably disposed toward the Jews, who had the right to be elected as jurymen and even as mayors. When, in 1660, the first city mayor was sworn in, he made oath as follows: "I solemnly swear to live in harmony and to defend the rights of the Roman Catholics, the Greek Catholics, and the Jews; of the rich and of the poor alike."

That the Jews of Bolechow were greatly esteemed by their Christian neighbors is evinced by the fact that when the Cossacks, in 1669, burned down the castle of Zydaczow with all the official documents and privileges, the town of Bolechow elected two Jewish delegates—Leib Ilkowitz and Lipman Lazarowitz—to enter the privileges of the town in the new books of that place. When the Tatars invaded Bolechow in 1670 and destroyed and burned down many houses, and the Jewish population was impoverished, the lord of the manor, George de Giednie Giedzinsky, bishop of Lemberg, furnished many loans to the Jews.

BOLESLAW I. CHROBRY ("the Brave"): King of Poland from 992 to 1025. According to the Polish preacher Matheusz Bembo, a contemporary of Sigismund III. (beginning of the seventeenth century), the first Jews settled in Poland in the reign of Boleslaw Chrobry; and the historian Maciejowski ("Zydzi w Polsce na Rusi i Litwie") states that this king treated the Jews with the utmost kindness. There are traditions, however, to the effect that the Jews had lived in Poland as early as the ninth century, enjoying considerable privileges granted by the earlier Polish princes, and that during the war that Boleslaw waged against the German emperor, Henry II., all their manuscripts were destroyed by fire, among which were the parchments containing records of those privileges. Some historians assert that Boleslaw, fearing that too much reading might enervate his subjects, ordered the burning of the manuscripts.

H. R.

BOLESLAW III. KRZYWOUSTY ("the Wry-Mouthed"): King of Poland from 1102 to 1139. In his time, according to Naruschewicz, the Jews spread through Poland and Lithuania as far as Kiev, where they carried on a lively trade, especially in salt with Holics and Przemysl, and probably also in slaves. Being, as Dlugosc asserts, a brave soldier and a magnanimous ruler and conqueror, it is safe to assume that the Jews during his reign enjoyed considerable freedom.

BIBLIOGRAPHY: A. Kraushar, *Historya Zydow w Polsce*, i. 62.

H. R.

BOLESLAW POBOZNY ("the Pious"): Duke of Kalisz; died 1278. He was distinguished for his courage and administrative ability. Boleslaw aimed at furthering the welfare of his subjects rather than at the enlargement of his domains by wars. Emigration from the neighboring countries had greatly increased the number of Jews in the duchy. This made it imperative to issue special regulations for their government, and in 1264 Boleslaw issued an edict granting them many privileges. This edict consists of thirty-six articles, which display a spirit of toleration far in advance of the age. In 1334 these privileges were extended by Casimir the Great to the Jews of the whole of Poland.

H. R.

BOLESLAW V. WSTYDLIWY ("the Bashful"): King of Poland (1228–79). During his reign (1240) the Mongols under Batu-Khan, the grandson of Genghis Khan, invaded Poland and carried away many thousand Jews as slaves to Asia. His reign is memorable also for the fact that he encouraged the immigration of German artisans into Poland and introduced the Magdeburg law (*Jus Teutonicum*). This influx of Germans evoked against the Jews the hatred that had already taken root in western Europe during the Crusades. This period forms the beginning of the persecutions of the Jews in Poland, which lasted until BOLESLAW POBOZNY inaugurated (in 1264) his beneficial legislation.

BOLESO. See HUNGARY.

BOLOGNA: Capital of the province of Bologna and of the division of Emilia, in northern Italy. As early as the beginning of the fourth century there were Jews in Bologna, but it is difficult to ascertain the exact date of their settlement. In 302 they had a cemetery, where, from malicious motives, two Christian martyrs were buried ("Ambrose," v. 302, ed. Rome, 1579). Nothing further is recorded of the Jews until 1171, when they were expelled from the city for unknown reasons. By the end of the thirteenth century Jews had again settled at Bologna, for they called from Forli the celebrated Rabbi Hillel of Verona. In 1308 they presented to Fra Aymerico, prior of the Dominicans, a Pentateuch written on vellum, and made in the form of a scroll like the copies used in the synagogue. Only the portions of this manuscript containing Numbers and Deuteronomy are now extant, and these are preserved in the university library. In 1700 it was still complete, with a Hebrew inscription erroneously asserting the manuscript to have been written by Ezra.

Early Records.

In 1366 the Jews were enclosed in a ghetto; but by the end of the fourteenth century they owned houses in all parts of the city and also held real estate. The two brothers Moses and Elia, of the Ne'arim family, came in 1394 from Rome to Bologna, bought houses, and founded one of the most beautiful synagogues of Italy. This family claimed to be descended from one of the four noble families carried captive by Titus to Rome. The two brothers were buried in a cemetery bought by themselves; the famous rabbi of Imola, Gedalia Yahia, mentions that he had seen their tombstones. In 1417 Albergati, bishop of Bologna, persecuted the Jews, and ordered them to wear the distinctive yellow badge; this command was withdrawn after a time, but renewed in 1458. In the same year a congress of rabbis was held at Bologna to consider the interests and security of the Jews, and it reassembled in the following year at Forli. (Its conclusions and ordinances, תקנות, have been published by Halberstamm; see the "Grätz Jubelschrift.") In 1419 a delegation was sent to Pope Martin V., who afterward issued a bull favorable to the Jews. Fra Bernardino da Feltre preached against them at Bologna in 1473, but without effect.

Persecutions in the Sixteenth Century.

A series of persecutions began in the second half of the sixteenth century; in Sept., 1553, the Talmud, together with a multitude of other Hebrew books and even copies of the Bible, was publicly burned by order of Pope Julius III. In May, 1556, the Jews were again enclosed in a ghetto by order of Paul IV. A respite came under Pius IV. (1559–66). At that time the community of Bologna had eleven synagogues. In 1569, when Pius V. banished the Jews from the pontifical dominions excepting Rome and Ancona, 800 of them left Bologna. The Jewish cemetery was given to the monks of St. Peter, with the permission to disinter and burn the bodies ("Archivio Domaniale, Monache di S. Pietro," No. xxvi.); consequently some interesting sepulchral stones are preserved in the museum of Bologna. In 1586 Sixtus V. permitted the Jews to return, and in 1593 there were already more than 900 in the city. But in that year Clement VIII. again drove them out, and they departed, carrying with them the bones of their dead, which they buried in the small Jewish settlement of Pieve di Cento.

From 1593 to 1796 the Jews were forbidden to establish themselves at Bologna; a few at a time being allowed to stop in the city for two or three days by special permission. On Sept. 5, 1796, General Salicetti, the commissioner of the French Directory, issued a decree which accorded to Jews the same rights that were given to other citizens. The number of them in Bologna now steadily increased. When the city was restored to the popes in 1814, Pius VII. showed himself very friendly to them. Leo XII. made an effort to revive the oppressive laws, but did not cause much suffering at Bologna. Pius IX., liberal at first, afterward grew intolerant, and the Jews were made painfully conscious of this by the abduction of the boy Edgar MORTARA, who had been secretly baptized by a servant during an illness, and four years later, in 1858, was forcibly taken from his family and carried to Rome. The offense created a great sensation throughout the civilized world. On Aug. 10, 1859, a decree of the governor of the Romagna (which had been united with the kingdom of Italy under Victor Emmanuel) proclaimed the civil and political equality of all citizens. The number of Jews in Bologna now increased rapidly, growing from 229 in 1861 to 350 in 1871. Formerly the dead were buried in the cemetery of the neighboring community, but later the municipality permitted their interment in the communal burying-place.

At the beginning of the twentieth century there were about 1,200 Jews in Bologna, these having come in part from the territory of Mantua, Modena, and other places. They have a synagogue and a chief rabbi. The ritual used in the synagogue is the so-called Roman (Zunz, "Ritus," p. 78).

G. V. C.

The Hebrew printing-press was introduced at a very early time into Bologna, though the exact date is not known. Some bibliographers ascribe the first edition of the Psalms with the commentary of David Ḳimḥi (published Aug. 29, 1477, by Joseph Ḥayyim Mordecai, and Hezekiah of Ventura) to this city (Rabbinowicz in Merzbacher's "Ohel Abraham," No. 4041; compare De Rossi, "Annales," i. 14, and Steinschneider, "Cat. Bodl." col. i.). In 1482 Joseph b. Abraham Caravita (or Çrovetta) set up a printing-press in his own house; and at this press Abraham ben Ḥayyim de Tintori printed the first edition of the Pentateuch, with Onkelos and Rashi, which was finished Jan. 26 of the same year (Zunz, in Geiger's "Wiss. Zeit. für Jüd. Theol." v. 38; Steinschneider, *ib.* col. i.). It is supposed that the edition of the Five Scrolls with Rashi to the whole, and Ibn Ezra to Esther, was issued from Caravita's press, and in the same year (De Rossi, *ib.* i. 130; Steinschneider, *ib.* No. 1031). Again, in the sixteenth century a Hebrew printing-press was active, notably between the years 1537 and 1540, when a company of silk-weavers furnished the means for this work. The following is a partial list of the publications during this period:

In 1537, Joseph ben David ibn Yaḥya's (the younger) "Torah Or" (Steinschneider, *ib.* col. 1477); Obadiah of Sforno's (the elder) "Or 'Ammim" (*ib.* col. 2076); (May 15), "Roman Ritual," together with Elijah Zaken's "Seder Ma'areket" (*ib.* No. 2074); in 1538, Joseph ben David ibn Yaḥya's (the younger) commentary to the Five Scrolls and the Hagiographa (*ib.* col. 1476); Menahem de Recanati's "Piske Halakot" (*ib.* col. 1737); Judah he-Ḥasid's "Sefer ha-Ḥasidim"; ed. Abraham ben Moses Cohen (*ib.* col. 1321); "Tefillot Latini," Italian in Hebrew characters, the text vocalized (*ib.* No. 2436); in 1539, Solomon ben Adret's "Teshubot" (*ib.* col. 2273); in 1540 (Oct.), "Maḥzor," Italian rite, with the commentary of Johanan ben Joseph Trèves to the whole and that of Obadiah Sforno to Pirḳe Abot (*ib.* No. 2579).

BOMBERG, DANIEL: Christian printer and publisher of Hebrew works; born at Antwerp; died at Venice in 1549. After having learned from his father, Cornelius, the art of printing and of type-founding, he went to Venice, where, from 1517 to 1549, he published many editions of Hebrew works, including the following: The editio princeps of the "Biblia Rabbinica" (מקראות גדולות), the Hebrew Bible with commentaries and three Chaldaic versions or Targumim; the first Hebrew Bibles; editions of and commentaries on the Pentateuch and other Biblical books; many grammatical and lexicographical works; philosophical and ethical treatises; rituals; Mekilta; Sifra; Sifre; parts of the Mishnah; several Midrashim; and, under the auspices of Pope Leo X., the first complete editions of the Babylonian Talmud (with the commentaries of Rashi, Tosafot, and R. Asher b. Jehiel) and the Jerusalem Talmud. In the selection and editing of works to be printed he was assisted by Ḥiyya b. Meïr (for Isserlein), Baruch Adelkind (for Colon), and Jacob b. Ḥayyim (for the Talmud), and others. The following is an approxi-

List of Bomberg's Hebrew Works.

mately complete list of the Hebrew works issued by Bomberg, in chronological order:

Biblia Rabbinica, ed. i., 4 parts	1516-17
Haftarot	1516-48
Bible, ed. i	1517
Psalms, ed. i	1518
Prayer-Book of Roman Ritual	1519
Joseph Colon's Responsa	1519
Israel Isserlein, פסקים וכתבים	1519
"Likkute Pardes" (extracts from various authors)	1519
Babylonian Talmud, ed. i., 15 vols. (first complete edition)	1520-23
Kiddushin	1520
Pesahim	between 1520-23
Bible, ed. ii	1521
Alfasi's "Halakot"	1521-22
Psalms, ed. ii	1521
Abot, ed. i	1521
Megillat Setarim (Parody on Purim), ed. i	1522
Pentateuch	1522
Moses de Coucy, "Sefer Mizwot," ed. i	1522
Jacob ben Asher, "Turim"	1522
Proverbs, Song of Songs and Ecclesiastes, ed. i	1522
Moses b. Nahman, Commentary, "Baba Batra"	1523
Isaac Nathan b. Kalonymus, "Meïr Netib"	1523
Aaron ha-Levi of Barcelona, "Sefer ha-Hinnuk"	1523
Mikweh Abraham	1523
Abraham Saba, צרור המור (Novellæ)	1523
Recanati on the Pentateuch	1523
Jerusalem Talmud, ed. pr	1523
Pentateuch, Megillot, Haftarot, ed. i	1523
Baruch b. Isaac of Worms, "Sefer ha-Terumah"	1523
Solomon b. Adret, Novellæ on Berakot and Hullin	1523
Psalms, ed. iii	1524
Proverbs, Song of Songs and Ecclesiastes, ed. ii	1524
Maimonides, "Yad ha-Hazakah" (2 vols.)	1524
Tefillah (Spanish ritual)	1524
Biblia Rabbinica, ed. ii., 4 parts	1524-25
Bible, ed. iii	1525-28
Abot, ed. ii	1526
Mishnah Sukkah	1526
Mishnah Hullin	1526
Babylonian Talmud, 15 parts, second ed	1526-48
Pentateuch, Megillot, Haftarot, ed. ii	1527
Mishnah Shekalim	1527
Job and Daniel, ed. i	1527
Elijah Mizrahi, Commentary on Rashi, i	1527
Mishnah Kodashim and Toharot	1528
Prayer-Book (Karaitic rite)	1528-29
Tefillah (German ritual)	1529
David Kimhi, "Sefer ha-Shorashim"	1529
R. Nathan ben Jehiel, "'Aruk"	1531-32
Pentateuch, ed. ii	1533
Psalms, ed. iv	1537
Job and Daniel, ed. ii	1538
Psalms, ed. v	1538
Proverbs, Song, and Ecclesiastes, ed. iii	1538
Elias Levita, "Masoret ha-Masorah"	1538
Elias Levita, "Tub Ta'am"	1538
Benjamin Ze'eb's Responsa	1539
Mishnah Mo'ed Katan	1539
Pentateuch, Megillot, Haftarot, eds. iii.-v	1543
Bible, ed. iv	1544
Elijah Mizrahi, Commentary on Rashi, ii	1545
Mekilta	1545
Biblia Rabbinica, ed. iii., 4 parts	1546-48
Hai Gaon, שו״ת	1546
Pesikta	1546
Sifre and Sifra	1546
Yelamdenu, i. e., Tanhuma	1546
Shoher Tob on the Psalms	1546
Moses ibn Habib, "Marpe Lashon"	1546
Abraham ibn Ezra, "Zahut"	1546
Abraham ibn Ezra, "Moznayim"	1546
Isaac Arama, Commentary on the Pentateuch	1546
"Sha'are Dura"	1547
Levi b. Gershon, commentary on the Pentateuch	1547
Moses de Coucy, "Sefer Mizwot," ed. ii	1547
Pentateuch, Megillot, Haftarot, ed. v	1548
Bahya, "Hobot ha-Lebabot"	1548
Jacob Weil's Responsa	1549

His Typography.

Though not actually the father of Jewish typography, as he is sometimes called, Bomberg began a new epoch in that art, and during the latter part of his life had many rivals and imitators even at Venice; these including Francesco Brucello, the two Dei Farri brothers, Marco Antonio Giustiniani, the Bragadini, Jean de Gara, and Zanetto. Some of these having won from Bomberg his ablest assistant, Cornelius Adelkind, acquired considerable wealth in their profession; but Bomberg himself expended so much money on the paper, engravings, and types for which his works were noted, that before his death he had lost almost his whole fortune.

BONA SFORZA: Polish queen; born 1493; died 1557; second wife of King Sigismund I. She was remarkable for her beauty and energy, but thoroughly hated in Poland for her intrigues and avarice. She sold high government offices, and her courtiers and "voyevod's" were bribe-takers. Her favorite, the influential crown marshal, Peter Kmita, obtained bribes simultaneously from both Jewish and Christian merchants, promising either party to protect its interests at the Diet or before the king. During the last years of Sigismund's reign Queen Bona not only assumed equal sovereign power with him, but often exercised absolute rule.

There are many documents extant granting privileges to the Jews in Bona's name, which privileges were confirmed by subsequent rulers of Poland (see SIGISMUND I., THE OLD; SIGISMUND AUGUST, and POLAND).

BONAFOS, ASTRUC AZARIAH B. JOSEPH. See AZARIA B. JOSEPH.

BONAFOS, MENAHEM BEN ABRAHAM (called also **Bonafoux, Abraham of Perpignan**): French philosopher; flourished at the end of the fourteenth century and at the beginning of the fifteenth. He was the author of a work entitled "Sefer ha-Gedarim" (Book of the Definitions), or, as it is also called, "Miklal Yofi" (Perfection of Beauty), a dictionary of technical expressions in Hebrew works on philosophy, ethics, and medicine, especially the terms found in the "Guide of Perplexed." The author aimed rather to give a clear explanation of the terms than their etymology, though drawing sometimes upon Arabic and Greek for help in his explanations. The work was published with some notes by Isaac ארוין (probably "Arroyo") at Salonica in 1567, and at Berlin in 1798, with a Hebrew commentary by Isaac Satanow.

(In the Union Theological Seminary, New York.)

to influence his brother, Crescas Vidal of Perpignan, against the study of philosophy. Bonafos' two letters to his brother are printed in the collection "Minḥat Ḳena'ot" (pp. 45, 491, Presburg, 1838). To Moïse-Nathan, author of the ethical poem entitled תוצאות חיים (printed in the שתי ידות of Menahem Lonzano, pp. 142–150, Venice, 1638) (MSS. Paris, No. 1284, 1), were addressed some pieces of verse on the subject of his writing, and one of these was composed by Bonafos Vidal. Neubauer, however, doubts whether this is the same rabbi who was connected with the disputes of Abba Mari. The identity of Bonafos with Bonafos Vidal of Salon, whose name is given as the owner of a manuscript now in Rome (Vatican, No. 107, 7), is not clear. This manuscript contains a prayer for the Feast of Purim, composed by Kalonymus b. Kalonymus.

BONAFOUX, DANIEL ISRAEL: An active adherent of Shabbethai Ẓebi; lived at Smyrna in the seventeenth century. He was not disappointed when the apostasy of the latter was announced. At Shabbethai's death he pretended to have had visions and to have received the gift of prophecy. He maintained that Shabbethai was not dead, but hidden, and that he would reappear after forty-five years.

People at that time were so excited that every charlatan found followers. Realizing the danger of such a state of things, the rabbinate of Smyrna addressed itself to the cadi and obtained the banishment of Bonafoux. He then settled with his followers at the small town of Kasaba, near Smyrna, where he continued his preaching. At the same epoch, Abraham Michael Cardoso, the founder of cabalistic dualism, who had been banished from Tripoli for misconduct, arrived at Smyrna and found in Bonafoux a warm friend. The agitation begun by Bonafoux lasted for several years, until he, like his master, Shabbethai Ẓebi, embraced Islam.

BONALD, LOUIS-GABRIEL-AMBROISE: French philosopher, politician, and anti-Jewish writer; born Oct. 2, 1774; died at Nomma Nov. 23, 1840. Being opposed to the Revolution of 1789, he emigrated in 1791 and settled at Heidelberg, where he wrote his first important work, "Théorie du Pouvoir Politique et Religieux dans la Société Civile," which was condemned by the Directorate. Later he returned to France, and became the leader of the political and ecclesiastical reaction. He endeavored to reduce the Jews to their former degraded position.

In an article, "Sur les Juifs," in the "Mercure de France," Feb. 8, 1806, Bonald repeated the usual anti-Semitic accusations. The burden of his tirade was that the Jews were at war with morality, that they formed an "imperium in imperio," and that the majority of them were parasites. Before Jews could be emancipated they must be uplifted morally and religiously: in other words, they must embrace Catholicism. The French Jews, not realizing the full import of Bonald's attacks, did not defend themselves energetically enough; only Moses Pinado of Bordeaux replying to his diatribes.

After the Restoration, Bonald became a member of the council of public instruction, and from 1815 to 1822 he sat in the Chamber as a deputy. His speeches and votes were invariably on the extreme conservative side. From 1816 onward he was a member of the Academy; and in 1830 he retired to his country seat, where he remained till his death.

BONAN, DAVID: Rabbi of the Livornian community of Tunis; died in that city in 1850. After his death his family defrayed the expenses of the publication of his works, "Nishal David," "Ohel David," both containing responsa (Leghorn, 1857); "Mo'ed David," a commentary on "'Abodat ha-Ḳodesh" of Solomon Adret (Jerusalem, 1887); "Maḥaneh David," and various treatises on ritual divorce (*ib.* 1889). In collaboration with Judah Levy of Gibraltar he wrote "Dai Hashab"—responsa on the command to women not to show their hair (Leghorn, 1846); and "Dai Heshib"—a commentary on the treatise Sanhedrin (*ib.* 1846). He also edited some works of his father and of others.

L. G. M. K.

BONAN, ISAAC: Author; father of David Bonan; lived in Tunis at the end of the eighteenth century. After his death the following works of his were published: "Ohole Yiẓḥaḳ" (Isaac's Tents)—commentaries on several treatises of the Babylonian Talmud and on the Yad ha-Ḥazaḳah, Leghorn, 1821; "Ohel Yesharim" (The Tent of the Righteous)—Talmudic novellæ in alphabetic order, Leghorn, 1846; and, added to this latter work, "Berit Abraham" (Abraham's Covenant)—commentaries on the Pentateuch, the Psalms, the Proverbs, and other books, as well as on the Passover Haggadah.

BONAPARTE, NAPOLEON. See Napoleon I.

BONASTRUC DESMAËSTRE (דסמאשטרי) (called also **Astruc Maestre** or **R. Astrug**): Spanish controversialist at the disputation at Tortosa 1413–14. Bonastruc was a prominent citizen in Gerona. When, under a penalty of 1,000 florins, he was summoned to appear with his fourteen-year-old son and his little granddaughter before the queen dowager of Aragon in order to defend himself against a charge brought against his family, the lawyers of the town interceded in his behalf (April 21, 1411) before the council of the queen dowager, seeking to excuse his absence, and saying that it would be impossible for him to obey the royal summons, since the hostility against the Jews rendered the journey dangerous (see Girbal, "Los Judios en Gerona," p. 35).

In February of the same year Bonastruc wrote to Zerahiah ha-Levi, called Don Ferrer Saladin, concerning a lawsuit which he was prosecuting, in consequence of the betrothal of his son Bonastruc with a young orphan already affianced to another ("Rev. Ét. Juives," xv. 34). Whether the summons to the presence of the queen was in any way connected with the lawsuit, or whether the letter of Bonastruc to Zerahiah ha-Levi was wrongly dated, has not been determined.

On Dec. 8, 1412, at the request of Pope Benedict XIII., Bishop Ramon de Castellar of Gerona, through a notary, invited Bonastruc, Azay (not Azag) Toros (Todros), Nissim Ferrer, Jaffuda (Judah) Alfaquim, and Bonastruc Joseph (the last-named not a physician) members of the Jewish community of Gerona, in order to communicate to them the letter from the pope requesting the city to send four, or at least two, of its most learned men to the disputation at Tortosa, adding, "et quia Bonastruch maestre eruditus in talibus asseritur, ipsum volumus inter ceteros principaliter transmittatis, ministrando eis expensas seu salaria in similibus assueta" (Girbal, *ib.* pp. 35, 83). Hence Bonastruc, together with the rabbis Todros and Ferrer, was sent as a delegate from Gerona. Bonastruc, who disputed with Geronimo de Santa Fé on Feb. 10, 11, and 15, on one occasion aroused the anger of the pope (who was present) to such an extent that his fellow-delegates became frightened, and on their return bitterly reproached him, saying: "We had not agreed among ourselves to speak as you have done." It is noteworthy that Bonastruc, together with the rabbis Todros and Ferrer, the delegates from Gerona, conducted the dispute. The report sent as a circular letter to the community at Gerona was probably not written by Bonastruc.

BONASTRUC, ISAAC: Rabbi at Palma in Majorca at the end of the fourteenth century; probably born in Barcelona. After the loss of his entire fortune during the persecutions of 1391, he went to Algiers and forced his services as rabbi upon the Jewish community there, stipulating for an annual salary of thirty doubloons. Bonastruc had shown himself quarrelsome in Palma; and after his advent in Algiers he opposed Isaac ben Sheshet, who had been installed as rabbi by the Jewish community. Bonastruc even tried through slander to drive the latter from his position. Together with Simon Duran and Isaac ben Sheshet, he officiated for a number of years in the rabbinate.

Bibliography: Isaac b. Sheshet, *Responsa*, Nos. 60, 61.

BONASTRUC DA PORTA. See Moses b. Naḥman.

BONAVENTURA, FORTUNATO DE S.: Member of the Royal Academy of Science of Lisbon about the beginning of the nineteenth century. He attempted a history of the literature of the Jewish authors in Portugal, under the title "Memoria Sobre o Começo, Progresso e Decadencia da Litteratura Hebraica entre os Portuguezes Catholicos Romanos," which appeared in the ninth volume of the Academy's memoirs, but is of little value.

G. M. K.

BONAVOGLIO (ḤEFEZ), MOSES, OF MESSINA: Sicilian physician; born at the end of the fourteenth century; died 1447. Renowned for his learning and eloquence, he was deputed in 1428 by seventeen Jewish communities of Sicily to wait on King Alfonso V. for the purpose of obtaining the abrogation of anti-Jewish laws enacted in that year. Bonavoglio succeeded in his mission, and gained the favor of Alfonso, who appointed him his physician and counselor. At the death of Joseph Nesia, Bonavoglio was elected chief rabbi ("naggid") of Sicily.

BONDAGE. See Slavery.

BONDAVI (EN): Translator; brother of Samuel of Marseilles; lived at Tarascon in the first half of the fourteenth century. Bondavi assisted his brother in revising the Hebrew translation, by Jacob ben Machir, of Abu Mohammed Jabir ibn Aflaḥ's abridgment of Ptolemy's "Almagest." His brother speaks of him in the colophon as well versed in such subjects.

G. M. S.

BONDAVIN, BONJUDES: Physician; lived at the end of the fourteenth century and the beginning of the fifteenth. He practised medicine at Marseilles from 1381 to 1389, and in 1390 went to Sardinia, settling at Alghero. In addition to his medical skill, Bondavin possessed great knowledge of Talmudical literature; and the Jewish community of Cagliari elected him rabbi. The king confirmed this election and extended Bondavin's jurisdiction over all the Jews of Sardinia. This official post gave him much influence, and he was admitted among the high dignitaries who attended King Martin II. when the latter sojourned at Cagliari. Bondavin carried on a scientific correspondence with Isaac ben Sheshet Barfat (Ribash), who answered the question propounded to him in his Responsa, No. 171.

Bibliography: Barthélemy, *Les Médecins à Marseille*, p. 27; Isaac Bloch, in *Rev. Ét. Juives*, viii. 280.

BONDI, ABRAHAM BEN YOM-ṬOB: Bohemian Talmudist; died 1787 at Prague. His posthumous work, "Zera' Abraham" (Seed of Abraham), essays on various treatises of the Talmud and on the post-Talmudic writers who treat of marital questions, was published by his son **Nehemiah Feiwel Bondi,** who added an appendix (Prague, 1808). Another work of Abraham's, "'Iyyun Mishpaṭ" (Investigation of the Law), is still in manuscript.

L. G. I. Ber.

BONDI, ELIJAH BEN SELIG: Austrian preacher; born at Prague at the end of the eighteenth century; died there about 1860. He studied Talmud at Presburg under the direction of Meshullam Tismenitz, and later at Alt-Ofen with Moses Münz. In 1826 he was appointed preacher in his native town, a position which he held until his death.

Bondi was the author of two series of sermons, published at Prague, 1832–56: (1) "Sefer ha-She'arim" (Book of Gates), containing philosophical homilies on various ethical subjects, collected from Baḥya, Judah ha-Levi, Albo, and others; (2) "Tiferet Adam" (The Beauty of Man), forming the second part of "Sefer ha-She'arim," and containing extracts from religious philosophical works.

Bibliography: Introduction to *Sefer ha-She'arim*; Fürst, *Bibl. Jud.* i. 125; Zeitlin, *Bibl. Post-Mendels.* p. 37.

S. I. Br.

BONDI, JONAS: American rabbi; born at Dresden, Saxony, July 9, 1804; died at New York March 11, 1874. He was educated at the University of Prague and in the theological circles of that city. He was president of the synagogue of his native city, and in 1859 came to America, where he accepted the position of rabbi-preacher in the Norfolk street ("Anshe Chesed") congregation of New York city. He served there but one year, when he became the proprietor and editor of a Jewish paper, "The Hebrew Leader," published in English and German. One of his daughters, Selma, became the wife of Isaac M. Wise of Cincinnati.

A.

BONDI, MORDECAI (Marcus): German author; lived at Dresden in the first quarter of the nineteenth century. He wrote, together with his brother Simon Bondi, the "Or Ester," a Hebrew dictionary of the Latin words occurring in the Talmud, Targumim and Midrashim. Some of his essays are also extant in the periodical "Jedidja" (i. 117–125; iii. 72, 196; iv. 35).

Bibliography: Fürst, *Bibl. Jud.* i. 125; Zunz, *Die Monatstage des Kalenderjahres*, p. 67; Karpeles, *Gesch. der. Jüd. Lit.* p. 1083.

BONDI, NEHEMIAH. See Bondi, Abraham b. Yom-Ṭob.

BONDI, PHILIP (Jacob Koppel): Austrian rabbi; born at Jinoschitz, Bohemia, Feb. 26, 1830. After having received a good education at home under the care of his father (Samuel), Bondi entered the gymnasium at Prague in 1844, and studied Talmud and Rabbinica under Raphael Schulhof and Solomon J. Rapoport, who in 1852 conferred upon him the title of Morenu. Continuing his philosophical studies, Bondi in 1857 received his doctor's degree from the University of Prague and his rabbinical diploma from Aaron Kornfeld and Daniel Frank, whose yeshibah he had attended.

In the same year he taught at Budweis, and from 1859 to 1868 at Kassejovic. From 1868 to 1876 he was rabbi at Brandeis. Being a strong partizan in the Bohemian movement, he was appointed preacher in the vernacular by the newly founded Jewish-Bohemian society, Or Tamid (Continual Light), at Prague, after whose collapse he became a teacher of religion at the Bohemian Jewish schools, and rabbi at the synagogue founded by Porges.

In 1886 he published five Bohemian sermons under the title "Ḳol Ya'akob" (Voice of Jacob). He also began to publish a Bohemian translation of the Pentateuch.

BONDI, SIMON: Lexicographer of the Talmud; lived at Dresden; died there Dec. 20, 1816. He wrote, together with his brother Mordecai, the "Or Ester" (Light of Esther), a Hebrew dictionary of the Latin words occurring in the Talmud, Targumim and Midrashim (Dessau, 1812). They also wrote a similar work on the Greek words, which has never been printed. The periodical "Jedidja" (i. 117–125) contains a biography of Simon by his brother Mordecai.

BÔNE (BONA) [Arabic, **Beled el-'Anab**]: Town in the province of Constantine, Algeria, called by the Romans "Hippo Regius." It had many Jewish inhabitants as early as the first centuries of the common era, as is attested by several epitaphs found in the environs of the place. Like the Jews of other communities in Mauritania, those of Bône suffered many vicissitudes. Under the dominion of pagan Rome they enjoyed complete freedom, even making many proselytes among the Kabyles, their neighbors; but in the fourth century, when the city became the see of Augustine, they began to suffer persecution. In 431 Bône was destroyed by the Vandals, and was not rebuilt until the seventh century, this being done by the Arabs.

There are no records concerning the date of settlement of Jews at Bône after its reconstruction; but it may be supposed that the city, which, according to Ibn Ḥaukal, was very prosperous in the tenth century, attracted many of them. The second half of the twelfth century brought disaster to all the Jewish communities in the Maghreb, particularly that of Bône. The fair treatment of the Jews during the dynasties of the Aghlabites and Almoravides was followed by the terrible persecutions by the fanatical Almohades; and many of them were compelled either to immigrate to the East or to embrace Islamism. In 1152 Roger of Sicily led away captive all the inhabitants of Bône. During the fifteenth century, in consequence of the exile of the Jews from Spain, the Jewish community of Bône greatly increased; but at the beginning of the sixteenth century the city fell into the hands of the Spaniards, and the Jews underwent many sufferings. In 1541, however, the defeat of Charles V. before Algiers freed the community of Bône, and during the Turkish domination it enjoyed a fair amount of religious freedom.

Like all Algerian communities, Bône was governed by a "muḳaddam," assisted by a council ("Ṭobe ha-'Ir"). Since the French conquest of Algeria the system of consistories has been introduced, and Bône belongs to that of Constantine, having at its head a rabbi and a president. The Jewish community of the city contains 1,000 souls. It possesses an old synagogue called "Al-Gharibah" (The Wonderful), which is held in great veneration even by the Arabs, on account of a scroll of the Law which is said to have been miraculously preserved there.

BONET, JACOB BEN DAVID BEN YOM-ṬOB (BONJORN): Spanish astronomer; lived probably at Perpignan in the fourteenth century. He was the author of astronomical tables prepared at Perpignan in 1361. These tables, still extant in manuscript (Bibliothèque Nationale, Paris, MS. No. 10,901; Neubauer, "Cat. Bodl. Hebr. MSS." No. 2072, 2), enjoyed a great reputation. They were translated into Latin in the fifteenth century, and were the subject of many Hebrew commentaries, among which was one written by Joseph ben Saul Ḳimḥi (Vatican MSS. Nos. i., v., 1, 7). Many manuscripts of these tables were retranslated from Latin into Hebrew.

G.

BONET DE LATES or **LATTES** (known in Hebrew as **Jacob ben Immanuel Provinciale**): Physician and astrologer; known chiefly as the inventor of an astronomical ring-dial by means of which solar and stellar altitudes can be measured and the time determined with great precision by night as well as by day; lived in the latter part of the fifteenth century and the beginning of the sixteenth. Originally from Provence, and belonging to a family that had its origin in Lattes near Montpellier, he was forced to leave Provence with the rest of his brethren and settled in Carpentras. Thence he went to Rome, where he became physician to Pope Alexander VI. (1430-1503), and later to Pope Leo X. (1503-13). At this time he became rabbi of the Jewish community, to which he was able to render much assistance. He married the daughter of the physician Comprat Mossé of Aix. Bonet described the use of his instrument in a treatise written in Carpentras, the full title of which is: "Boneti de Latis, Medici Provenzalis, Annuli per eum Composti Super Astrologiæ Utilitate." It appeared as a supplement to the "Calculatio Composta in Rima de Juliano de Dati," Rome, 1493, and was dedicated to Pope Alexander VI. At the end Bonet craves pardon for his bad Latin, on the score of being a Hebrew. The treatise was republished by Jacob Faber of Etaples, together with his own commentary on John Sacrobosco's "De Sphæra Mundi" and Euclid's "Geometry," Paris, 1500. Editions were also published in 1507, 1521, and 1534. Two editions appeared later at Marburg, in 1537 and 1557. In bad Latin, Bonet wrote a treatise entitled "Prognosticum," published at Rome in 1498, and dedicated to cardinals Valentiniani and De Borgia, in which he predicted the coming of the Messiah in the year 1505. A full account of the book is to be found in Abraham Farrisol's manuscript, "Magen Abraham," or "Wikuaḥ ha-Dat."

A pupil of the above-mentioned Jacob Faber, Charles Bovillus, 1470-1553, relates in the preface to his "Dialogi de Trinitate" that he met Bonet de Lates in the Roman ghetto in 1507, and went to his house in order to see the ring that he had invented. The top part of the house was a synagogue containing the ark, hidden by a curtain, and books, lamps, and praying-scarfs. Here, also, Bonet's thirty-two-year-old son was discovered deeply immersed in the study of philosophy. Toward the end of the nineteenth century, in dredging the Tiber a long marble slab was found with the inscription הרב מיסיר בוניט יצ'ו, which had probably been affixed to this house of Bonet's. Bovillus refers, also, to a lengthy theological argument that he had with Bonet, and he seems to imply that the son was in the end convinced of the truth of the Christian faith.

It is evidence of the position held by Bonet at the papal court that on Oct. 13, 1513, Reuchlin begged him to use his influence in order that the examination of the "Augenspiegel" should not be given into the hands of a commission made up of strangers, at all events not of Dominicans. Further, Bonet's intercession seems to have been successful.

Bonet is known to have had two sons. One, Joseph, continued to remain in the papal favor; the other, Immanuel, was also in the service of the pope, from whom he received a regular salary.

BONET B. MESHULLAM B. SOLOMON. See ABIGDOR, ABRAHAM.

BONFED, SOLOMON BEN REUBEN: Rabbi at Saragossa, and poet; lived at the end of the fourteenth century and the beginning of the fifteenth. His diwan, still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1984), is interesting intrinsically, as well as for the historical information contained in it. Bonfed was present at the controversy of Tortosa (1413-14); and many of his poems are addressed to those who took part in it.

The diwan contains also an answer, in rimed prose, to a letter of the converted Jew, Astruc Raimuch of Fraga, in which the neophyte enthusiastically propounds the dogmas of Christianity, and endeavors to demonstrate the Trinity, Original Sin, and Redemption, from the Bible. Apologizing for discussing the contents of a letter not addressed to him, Bonfed minutely examines the Christian dogmas, and proceeds to show how irrational and untenable they are. He says: "You twist and distort the Bible text to establish the Trinity. Had you a quaternity to prove, you would demonstrate it quite as strikingly and convincingly from the Old Testament."

BIBLIOGRAPHY: Gross, *Gallia Judaica*, p. 438; Grätz, *Gesch. der Juden*, viii. 79, note 3.

G. I. BR.

BONFILS, IMMANUEL BEN JACOB: Physician, mathematician, and astronomer; lived at Orange, France, and later at Tarascon, in the fourteenth century. He was the contemporary of the astronomer Levi ben Gerson of Bagnols. At one time Bonfils taught astronomy and mathematics at Orange. He was the author of the following works: (1) a treatise on the relation between the diameter and the circumference, followed by rules for extracting the square root, and with an explanation of a passage of the "Book of Creation," dealing with arithmetic (Bibliothèque Nationale, Paris, MS. No. 1290, 5); (2) arithmetical propositions respecting division, and extraction of the square root, and notes on astronomy (*ib.* No. 1081, 1, 2); (3) "Derek Ḥilluḳ" (Way of Division), notes on the decimal numbers (*ib.* No. 1054, 6); (4) "Bi'ur me-Luḥot," treatise on the middle course of the planets (*ib.* No. 1054, 6); (5) table for the calculation of the declination of the sun; (6) "Luaḥ Mattanah Ṭobah" (Table of Good Gift), on the determination of the planet Venus from 1300 to 1357; (7) "Bi'ur Asiyat ha-Istrolab," on the construction of the astrolabe (*ib.* Nos. 1050, 6; 1054, 2); (8) note on the cycles (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1483, 4); (9) "Kanfe Nesharim" (Wings of Eagles), or "Shesh Kenafayim" (Six Wings), a treatise on conjunctions, appositions, eclipses, etc. (this work enjoyed great popularity in the Middle Ages, being translated into Latin in 1406, commented upon by Chrysocca, and the Hebrew text published by Naḥmu Bibowitz, Jitomir, 1872); (10) "Ma'amar 'Erek ha-Ḥilluf" (Treatise on the Value of Inequalities), dealing with the inequalities of the course of the sun and the moon, and the necessity of taking into consideration these inequalities in calculating conjunctions, appositions, eclipses, etc. (Bibliothèque Nationale, Paris, MS. No. 1054, 13); (11) astrological treatise on the seven constellations (*ib.* No. 1048, 4); (12) a commentary on a passage of Ibn Ezra's commentary on Ex. xxx. 2, relative to the Tetragrammaton (*ib.* No. 825, 8; MSS. Munich, Nos. 343, 386); (13) "Bi'ur 'al M'ozene Ḥanok," commentary on the balances of Enoch and Hermes, mentioned in Abraham ibn Ezra's "Sefer ha-Moladot" (*ib.* No. 903, 1); (14) note on the nine comets, attributed to Ptolemy, but believed to belong to Bonfils; (15) "Toledot Alexander," the legend of Alexander, translated from the "Historia de Prœliis" of Leon.

G. I. BR.

BONFILS, JOSEPH B. SAMUEL (Hebrew, **Tob 'Elem** = "Good Child"; called also **ha-Gadol** = "the Great"): French Talmudist, Bible commentator, and "payyeṭan"; lived in the middle of the eleventh century. Of his life nothing is known but that he came from Narbonne, and was rabbi of Limoges in the province of Anjou (see Jacob Tam's "Sefer ha-Yashar," ed. Rosenthal, p. 90, and ed. Vienna, p. 74b; the passage is badly corrupted).

The activity of Bonfils was manysided. A number of his decisions which earned the high esteem of his contemporaries and of posterity are to be found in the "Mordecai." These passages are enumerated in Kohn's "Mordecai b. Hillel," p. 137; in Maḥzor Vitry, and in many other codices and compendiums. Among his numerous legal decisions one deserving mention is that pronouncing money won in play an illegal possession, and compelling the winner to return it ("Haggahot Mordecai," upon Sanh. pp. 722, 723). Another important decision ordered a lighter tax on the Jewish farmer than on the merchant, for the reason that agriculture was less profitable than trade ("Mordecai," B. B. i. 481). Little is known of the collections of his responsa mentioned in Moses Alashkar's Responsa (ed. Sabbionetta, No. 60, p. 121a; No. 100, p. 162a), or of his collection of the responsa of the Geonim. His Bible commentaries, mentioned by some of the old writers, have also disappeared.

Bonfils devoted himself to restoring the correct texts of older works, especially the Masorah—works of the Geonim. His critical notes upon Judah's "Halakot Gedolot" and the "Seder Tannaim we-Amoraim" show marked departures from the current text.

As a Payyeṭan.

The ability and activity of Bonfils are best judged from his contributions to the poetry of the synagogue, no less than sixty-two of his piyyuṭim occupying prominent places in the French, German, and Polish liturgies. These compositions show that he was more than an ordinary poet (Zunz) among the Franco-German payyeṭanim of his time. Few equaled him in beauty of imagery and facility of expression. The poetry of the synagogue is furthermore deeply indebted to Bonfils for the introduction of the piyyuṭim into the prayers, in face of great opposition. Of his many piyyuṭim, the best-known is that written for the "Great Sabbath" (Sabbath before Passover), beginning with the words "Elohei ha-ruḥot," and containing the rules for the Passover-cleaning ("bi'ur") and the narrative service for the evening. The importance of Bonfils is shown by the fact that the Tosafists in many places occupy themselves with the explanation of obscure points in this piyyuṭ. Samuel b. Solomon of Falaise, a French Tosafist, composed a commentary upon it.

Joseph Bonfils must not be confused, as he is by Azulai, with another scholar of the same name, who lived in 1200 and corresponded with Simḥah of Speyer (Responsa of Meïr b. Baruch of Rottenburg, ed. Cremona, No. 148).

Bibliography: Azulai, *Shem ha-Gedolim*, i. 40a: Fuenn, *Keneset Yisrael*, pp. 472, 473; Gross, *Gallia Judaica*, pp. 308, 309; Landshuth, *'Ammude ha-'Abodah*, pp. 96–98; Luzzatto, *Bet ha-Oẓar*, pp. 46b, 55b; Rapoport, Introduction to Cassell's ed. of the *Responsa of the Geonim*, pp. 4b, 6a, 7b; Zunz, *Literaturgesch.* pp. 129–138; idem, *Z. G.* p. 61; idem, *G. V.*, 2d ed., p. 403; idem, *S. P.* pp. 179–180 (translation of a seliḥah); Schorr, in *He-Ḥaluẓ*, viii. 139; Neubauer, *Cat. Bodl. Hebr. MSS.* No. 1208, 3, containing a halakic treatise by Joseph Ṭob-'Elem, who is probably identical with this Bonfils.

L. G.

BONGODAS CASLARI. See Caslari.

BONGODAS COHEN: Provençal physician; flourished in 1353. No details of his life can be ascertained. He was the author of a Latin work on obstetrics, still extant in a Turin manuscript (Pasini, cod. 80, 3). If Steinschneider is right, and "Cohen" (כהן) is a mistake for "Nathan" (נתן), Bongodas may be identical with Judah Nathan, a Provençal writer on medicine and translator, between the years 1352 and 1358.

Bibliography: Steinschneider, *Jewish Literature*, p. 368; idem, *Hebr. Uebers.* p. 306; Neubauer, *Cat. Bodl. Hebr. MSS.* col. 736.

G.

BONGODAS, MEÏR BEN SOLOMON: Provençal poet; lived at the end of the thirteenth century. He is quoted in the diwan of Abraham Bedersi, who was chosen arbitrator between Bongodas and Don Solomon in a controversy on the value of their Aramaic poems. According to Neubauer (in "Zunz Jubelschrift," p. 139), Meïr Bongodas is identical with Meïr ben Solomon Dels-Enfantz, to whom Jedaiah Bedersi dedicated his work, "Oheb Nashim."

Bibliography: Renan-Neubauer, *Les Rabbins Français*, p. 713; Gross, *Gallia Judaica*, p. 159; Zunz, *Z. G.* p. 519.

G. I. Br.

BONGORON or BONJORN, DAVID BEN YOM-ṬOB: Astronomer; lived at Perpignan in the middle of the fourteenth century. The name "Bongorn" or "Bonjorn" is the Provençal equivalent of the Hebrew name "Yom-Ṭob," the Provençal Jews often prefixing to their own names those of their fathers. Judah Mosconi, in his supercommentary on Ibn Ezra, mentions Bongoron as one of the greatest astronomers of that time. Steinschneider connects the name of Bongoron with that of דון בונירון, who was implicated in the divorce case of Bona Dona, daughter of En Astrug Caravida of Gerona, mentioned by Isaac de Lattes (Responsa, pp. 127–139) and by Ḥisdai Crescas ("Zikkaron Yehudah," p. 23b). Steinschneider further supposes that Bongoron is identical with the astrologer and philosopher David ben Yom-Ṭob ibn Bilia, father of the astronomer Jacob Poel.

G. I. Br.

BONIFACE VIII. (BENEDICT GAETAN): One hundred and ninety-eighth pope; born at Anagni, Italy; elected pope Dec. 24, 1294; died 1303. He succeeded Celestin V., who resigned six months after his election. Boniface cherished kindly feelings toward the Jews, and gave them many tokens of his solicitude for their welfare. The Roman Jews owed him much for having delivered them from a threatening danger. The Inquisition issued (Nov. 18, 1297) a bull according to which an accuser or witness could remain unrevealed to the accused when the latter was a person of influence. The Jews were naturally classed among the powerful persons; and a simple denunciation sufficed to condemn them. They appealed to Boniface; and the latter, by a bull dated June 13, 1299, declared all the Jews "unimportant" except those who were of recognized influence.

Boniface had for his physician a Jew named Isaac, to whom he was much attached.

G. I. Br.

BONIFACE IX. (PIETRO TOMACELLI): Two hundred and eighth pope; born at Naples; elected pope Nov. 2, 1389; died at Rome in 1404. His pontificate was very favorable for the Jews in general and for the Roman Jews in particular. At the request of the latter, Boniface issued a bull in which he ordered the senators, the conservators, and all other functionaries of the city of Rome to protect the Jews from every kind of drudgery, overreaching, and violence, under the penalty of excommunication and a fine of 1,000 gold florins. The wearing of the badge by Jews was repealed. No Jew could be molested on a simple writ of an inquisitor, unless by a sealed order of a collateral of the curia; for, according to the bull, "all Jews and Jewesses residing in the city, and sojourning there with their families, must be treated as Roman citizens."

Boniface showed especial favor to the Jewish physicians Angelo di Manuele and Solomone de Sabalduchio of Perugia. The Senate had in 1376 exempted from all taxes the physicians Manuele and his son Angelo, and their families, residents of Rione Trastevere, for services they had rendered as physicians to the Roman citizens, and chiefly to the poor. This favor was enforced on Aug. 8, 1385, by the Senate, which accorded the Jewish community of Rome a yearly reduction of 30 florins for the taxes of Manuele and Angelo. July 1, 1392, Boniface appointed Angelo his "familiaris" and physician, and confirmed, by a bull issued April, 1399, the special diplomas of Roman citizenship delivered by the Senate to Angelo and his father. On Oct. 23, 1392, he appointed the physician Solomone de Sabalduchio his "familiaris," and bestowed upon him many favors.

Bibliography: The bulls are published in Stern, *Urkundl. Beiträge zur Stellung der Päpste*, pp. 17, 18; *Revue Orientale*, ii. 461; Berliner, *Gesch. der Juden in Rom*, i, 62; Vogelstein and Rieger, *Gesch. der Juden in Rom*, i. 317 *et seq.*

BONIHOMINIS, ALPHONSUS. See Alfonsus Bonihominis.

BONIRAC (perhaps = **Bon Isaac**), **SOLOMON:** Spanish translator; lived at Barcelona in the middle of the fourteenth century. He translated from the Arabic into Hebrew Galen's medical work on the crisis, under the title, "Sefer Buḥran" (Book on Vapors). The translator probably possessed no Hebrew expression for "crisis," and so preserved the Arabic word "buḥran" used by the Arabic translator, Ḥonein ibn Isḥaḳ. The "Sefer Buḥran" is still extant in manuscript at Leyden (Scaliger, 2, 15).

Bibliography: Loeb, in *Rev. Ét. Juives*, iv. 64; Steinschneider, *Hebr. Uebers.* p. 652.

G. I. Br.

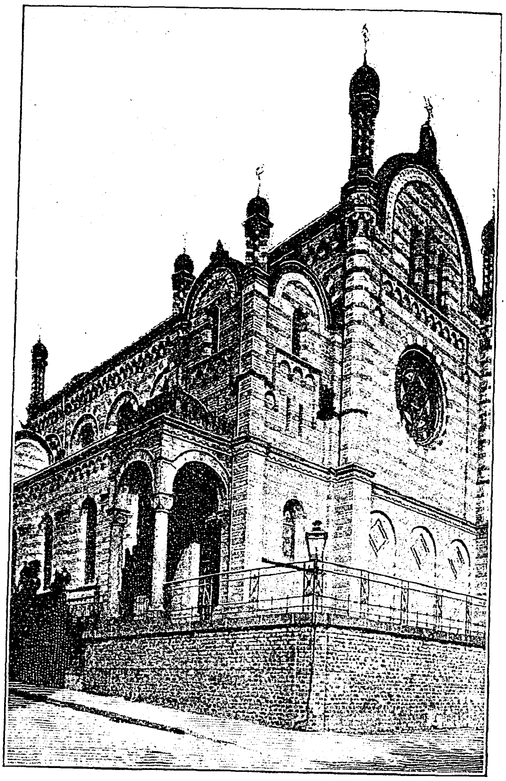
BONN: City in Rhenish Prussia. It had a Jewish community at an early date. Ephraim ben Jacob of Bonn (b. 1133), as a boy of thirteen, was among the Jews who, in September, 1146, sought refuge from the Crusaders in the fortress Wolkenberg near Königswinter. He has left a graphic description of the persecutions under the Crusades. He is also known as a Talmudic and liturgic writer. The Tosafist Joel ben Isaac of Bonn, author of several seliḥot, also lived about this time. Jews of Bonn are often mentioned in the Jewish congregational archives of Cologne during the thirteenth and fourteenth centuries. In June, 1288, calamity fell upon the community, and many Jews, including Rabbi Meïr ben Alexander, who had formerly been rabbi at Cologne, were slain. New sorrows came with the persecutions during the Black Death, Bonn being one of the places of martyrdom in the year 1349. The Jews of Bonn were further oppressed by taxes, as the emperor Frederick I. compelled them to pay 400 marks to the archbishop of Cologne.

The community, which was not an unimportant one in the Middle Ages, was considerably increased by the Jews expelled from Cologne in 1426; it was estimated to number 200 persons, and had to pay a yearly assessment of 1,500 reichsgulden. Documents show that the present "Judenauergasse" was called "Judengasse" in 1578.

In 1587 Martin Schenk, whom Queen Elizabeth of England had sent to aid the party of the lord high steward, took possession of Bonn, murdered and plundered in the Jews' quarter, and made many prisoners, who subsequently had to be ransomed for large sums. Among the prisoners was Rabbi Reuben Fulda, the teacher of the historiographer David Gans. The baptized butcher Kraus, who has become proverbial through his denunciations, was also a native of Bonn. In the first half of the seventeenth century he kept the Jews on the Rhine in a continuous state of terror. Another native of Bonn was Abraham Breitingen, father-in-law of the Frankfort scholar Juspa Hahn; he as syndic successfully opposed Kraus.

Persecutions.

The Jews fared better during the Thirty Years' war. The above-mentioned Hahn narrates that the Protestants of Bonn hid their property in the ghetto. Later, however, the Jews were subjected to many annoyances. In 1651 their cattle trade was restricted, all Jews not under the protection of the government were expelled, and the maximum rate of interest which they were permitted to take was fixed at 12 per cent. In 1747 and 1750 electoral ordinances had to be issued prohibiting Christians from insulting and threatening Jews. In 1755, when severe earthquakes terrified the people of the Lower Rhine and Bonn, Rabbi Samuel Ashkenazi and Mordecai Halberstadt, rabbi at Düsseldorf, designated several psalms for a service of prayer, and wrote a penitential invocation ("teḥinnah") for the occasion. On Feb. 27, 1784, all the Jews fled from the ghetto, which was almost entirely destroyed by an overflow of the Rhine. In this time of distress Moses Wolf (died 1802), physician to the elector, and the president of the community, Baruch ben Simon, were especially conspicuous for their unselfish activity. Simon Kopenhagen of Bonn has described these occurrences in a Hebrew book entitled "Beḳi Naharot," Amsterdam, 1785. The French Revolution saved the Jews of Bonn.



Synagogue at Bonn.
(From a photograph.)

In 1798 the great procession of the "Cisrhenanes," proceeding by way of the Viereckspatz, went to the Judengasse, where they determined upon an especially solemn act, intended as an announcement to the Jews, by a memorable sign, that they would henceforth be citizens with equal rights. For this purpose several carpenters had been included in the procession, who cut down the gate of the Jewry; Jewish girls were then taken into the procession and led triumphantly through the city. In 1808 the Jews were compelled to take personal names and surnames. The city of Bonn became the seat of a consistory founded by Napoleon. In 1865 a Jewish congregation was formed in conformity with the law of 1847: the new synagogue on the banks of the Rhine was dedicated in 1879. In 1902 the community numbered 900 persons.

Scholars and Rabbis.

In the twelfth century the Tosafist Samuel ben Natronai, the halakist and liturgic poet Joel ben Isaac ha-Levi, and his friend Ephraim ben Jacob, also known as liturgic poet, lived at Bonn. In the fifteenth century the scholar Solomon of Bonn, and a teacher, Mordecai Sachs, were there. Reuben Fulda, as stated above, was rabbi there in the sixteenth century, and was succeeded by Ḥayyim Treves, son of Johanan Treves, known as a Maḥzor commentator, who died at Ahrweiler in 1598. Joseph Ashkenazi, who later was rabbi at Metz; Moses Birgel; Naphtali ben Kalonymus; and Judah Ashkenazi, who was buried at Bonn in 1688, were among the rabbis of the seventeenth century. In the eighteenth century several physicians, including Moses ben Abraham Wolf (mentioned above), lived at Bonn. Among the rabbis was Judah Mehler, formerly rabbi at Cleve (born 1661 at Bingen; died at Bonn 1750). He was succeeded by Samuel Ashkenazi (d. 1766), formerly at Peine near Hildesheim; then came Isaac Rapoport, who died 1788. The first rabbi of the consistory was Simḥah Bunem Rapoport, appointed in 1788, died 1816; he was the author of several halakic works. He was followed by Abraham Auerbach, who, in 1837, resigned ostensibly on account of his great age, but really in order that his son might succeed him. In fact, he contrived to have his son elected as soon as he announced his resignation, without giving time to candidates to present themselves. This election caused much agitation in the community, and a protest against its illegality was brought before the president of the province of Cologne. A new election was ordered by the government, and Auerbach's son was elected for the second time. He was succeeded in 1877 by Emanuel Schreiber, and by Falk Cohn (1882–1902).

G. A. F.

BONN, JONAS BEN MOSES: Physician; lived in Frankfort-on-the-Main in the seventeenth century. Though not in the employ of the community, his name is subscribed to the articles of agreement drawn up in 1656 between the congregation of Frankfort and its physicians, Solomon Bing and Abraham Hein. According to these articles, the Jewish physicians pledged themselves not to attend patients who were not members of the congregation without the permission of two elders of the synagogue. They also promised to visit the poor gratis; to respond to calls day and night; not to attend to any patient outside of the Jewish quarters; and not to accept the presidency of the congregation before the age of sixty.

BONNET. See Costume.

BONOSUS. See Antioch.

BONSENIOR GRACIAN. See Gracian.

BONSENIOR, SOLOMON. See Yekutiel b. Solomon.

BONSENIOR, IBN YAHYA: Chess expert. No details of his life can be obtained. The name is probably Provençal, and he lived certainly not later than the fifteenth century. Bonsenior was the author of an interesting work on chess, entitled "Melizat Seḥoḳ ha-Ishḳaḳi" (Essay on Chess-Playing), first published at Mantua in 1557. It was translated into French by Leon Hollaenderski, and published, together with Ibn Ezra's "Ma'adane Melek" on the same subject, under the title "Délices Royales ou le Jeu des Echecs, . . . par Aben Ezra et Aben Ye'ḥia, Rabbins du XIIe Siècle" (Paris, 1864).

G. I. Br.

BONSENYOR, ASTRUC (in Spanish chronicles, **Struch** or **Nastruch** = **En Astruc**): From 1259, if not earlier, dragoman and Arabic secretary to Jaime I. of Aragon; died 1280. He was a native of Barcelona. He accompanied the king on his campaigns, acting as interpreter, and in that capacity rendered valuable services. In 1265 the king sent him as one of a commission to Murcia, to deal with the besieged Saracens.

Bonsenyor stood in special favor with the king, who gave him permission to add doors and windows to his house, which was in the Jewish quarter and adjacent to the Plaza del Rey and the Monastery of San Domingo. He was also allowed to make other architectural changes. He is mentioned in a Barcelona document of the year 1258 (Jacobs, "Sources of Spanish-Jewish History," No. 159).

G. M. K.

BONSENYOR, ASTRUC: Grandson of Astruc Bonsenyor, the dragoman of Jaime I. of Aragon; father of Judah Bonsenyor. He was a physician in Barcelona, and in the year 1334 was accorded the privileges which had been enjoyed by his grandfather.

G. M. K.

BONSENYOR, ISAAC: Son or grandson of Judah Bonsenyor; lived in Barcelona; in 1391 became a Christian, and took the name Ferrario Gracia de Gualbis.

G. M. K.

BONSENYOR, JUDAH (Jaffuda): Notary-general of Aragon, and translator from the Arabic; son of the elder Astruc, and, like his father, interpreter, first to Alfonso III. and then to Jaime II.; died about 1334. In 1287 he accompanied Alfonso III. on his war of conquest against Minorca; and seven years later (1294) Jaime II. appointed him notary-general for the kingdom and the royal dependencies. By virtue of this appointment all merchants doing business in the country who were acquainted only with the Arabic language, and who desired to have documents translated from the Arabic into Spanish, or duplicated, or acknowledged, were forced to appear before Bonsenyor or his representative.

In 1305 Jaime II. granted him a passport to enable him to visit Provence, probably in the interests of Jewish studies, which at that time were proscribed. On Nov. 4, 1310, as a sign of royal favor, and by the influence of the king's body-physician, John Amely, Bonsenyor was exempted from all taxes, whether personal or public, to which the Aljama of Barcelona was subject. The king also ordered that neither Bonsenyor nor his children should be molested on account of unpaid taxes, and that he should be at liberty to enter or leave the "Juderia." or Jewish quarter, at will. Bonsenyor was especially honored when the king ordered him to gather Arabic maxims and translate them into Catalan for the use of the princes. This collection, which for centuries remained in manuscript, was published in part in "Documentos Ineditos de la Corona de Aragon," vol. xiii., and in the "Revista Catalana" (1889). The same year this work, copied from a manuscript in Palma, appeared complete under this title: "Jehuda Bonsenyor, Libre de Paraules e Dits de Savis e Filosofs, Los Proverbis de Salomo, . . . per Gabriel Llabrés y Quintana" ("Biblioteca d'Escriptors Catalans"; Palma, Majorca, 1889). Jacob Zadik de Ucles undertook a Spanish translation of this work in 1402 under the title "Libro de Sabios é Philosophos."

The sayings gathered by Bonsenyor are 753 in number and are divided into 67 chapters. Because of their terseness and their bearing upon local conditions, they are used to this day by the people in Majorca and Catalonia. Some of them are exceedingly pithy and to the point, such as: "Whoever answers quickly, errs easily"; "Whoever hears badly, answers badly"; "Wealth has its own nobility"; "Too many sailors will sink the ship," which corresponds to the English proverb, "Too many cooks spoil the broth." Bonsenyor took most of this collection from Hebrew adaptations of Arabic originals; a part is taken bodily from a similar collection, the "Mibḥar ha-Peninim," by Solomon ibn Gabirol.

Bibliography: Gabr. Llabrés, as quoted, on Introduction and Appendix, with several original documents; Kayserling, *Gesch. der Juden in Spanien*, i. 161; *idem*, in *Jewish Quarterly Review*, viii. 832; Steinschneider, *Hebr. Uebersetzungen*, pp. 977–979; *Revue Etudes Juives*, iv. 58.

G. M. K.

BONVIVA, or French **BONNEVIE** (Hebrew בונביאה), **BEN ISAAC**: French Tosafist; flourished probably early in the thirteenth century at Château-Thierry. He and his father are mentioned in the manuscript Tosafot to the treatise Beẓah 6a, owned by R. N. Rabbinovicz. Since these Tosafot are presumably older than those printed, the Bonnevie father and son are believed to have lived at the beginning of the thirteenth century. "Bonne-Vie" is probably another name for Ḥayyim ben Isaak, one of whose important juristic decisions is cited in "Mordecai" (B. B. ix. 626), "Ḥayyim" being the Hebrew term for the French "Bonne-Vie."

Bibliography: Gross, in *Magazin*, iv. 209; idem, *Gallia Judaica*, pp. 258, 259.

BOOK-CLASPS. See Binding.

BOOK-COLLECTORS: The ideal of learning being so characteristically Jewish, it is natural that many Jews should have collected materials of learning for their own and others' use. The Talmud interprets Ps. cxii. 3 as applying to those who buy books and lend them out, since by this means "their righteousness [charity] endureth always" (Ket. 50a). Judaism is probably the only religion in which it becomes a duty to collect books. Each Jew ought either to write a scroll of the Law himself, or if he does not do so, must have it written for him. This he must not sell except in order to marry, to study the Torah, or to redeem captives (Shulḥan 'Aruk, Yoreh De'ah, 270). References are met with in early ethical wills like that of Judah ibn Tibbon, showing that a great deal of care was taken both to collect and to preserve books. At the same time the continual expulsions of the Jews rendered it difficult to keep libraries together, as they could rarely be transported; accordingly, it is not until the sixteenth century that traces are found of any very considerable collections, the earliest of these occurring, as might have been expected, mainly in Italy, at Mantua and Ferrara. From Italy, after a time, the fashion spread to the Turkish empire, where Jacob ben Isaac Roman and Joseph del Medigo collected valuable manuscripts, many of which can still be traced.

Amsterdam.

But it was with the growth of the community of Amsterdam that the taste for book-collecting among the Jews rose to dimensions worth mentioning. Here only in all Europe had they sufficient wealth and liberty to collect private libraries; those of Manasseh ben Israel, Moses Raphael de Aguilar, Isaac Aboab, and Samuel b. Isaac Abbas being all of the seventeenth century. The Amsterdam Jews have continued their interest in Jewish books up to the present day, the libraries of Isaac da Costa and Salomon de Mesa in the eighteenth and those of Rodrigues de Castro and David Montezinos in the nineteenth century keeping up the tradition; while the great Rosenthal collection, originally founded at Hanover, has reached a final home in the Dutch capital.

The Oppenheimer Collection.

But the book-loving propensities of the Dutch Jews were far exceeded by those of a German Jew, a member of a distinguished Viennese family—the Oppenheimers—who, in the latter part of the seventeenth century, brought together what until recently was the largest collection of Hebrew books ever made by one man, aggregating about 7,000 printed volumes and 1,000 manuscripts, almost entirely Hebraica. It was originally founded by Samuel Oppenheimer with the aid of Prince Eugene, whose court Jew he was. His son, David Oppenheimer, increased the collection; but, although he was stationed in Prague, he dared not have his books there for fear of the censor; he accordingly placed them in the house of his father-in-law, Lipmann Cohen, at Hanover. Hirschl Oppenheimer succeeded to the library, which, however, was pledged for 50,000 marks; and on this account it passed into the possession of Isaac Cohen of Hamburg, nephew of the former holder. After futile attempts at a sale, at which Mendelssohn's help as appraiser was called in, it was sold (1829) to the Bodleian Library, Oxford, for the absurdly small sum of 9,000 thalers.

Russia.

Only second in importance to this was the collection made by H. I. Michael of Hamburg, about six or seven thousand volumes, the printed books of which ultimately came into the possession of the British Museum, and the manuscripts into that of the Bodleian Library. By these accessions, England became the most important center in the world for rare Jewish books and manuscripts during the latter part of the nineteenth century. The recent acquisition of the Halberstamm manuscripts by Jews' College and the private collections of Dr. Gaster and E. N. Adler have further increased the importance of England in this regard. Recently, however, strenuous attempts have been made in Russia, the home of the largest Jewish population of the world, to make collections of the national literature. The collections of Fuenn and Straschun now adorn the communal library of Wilna. Dr. Chazanowicz, a physician of Bialystok, brought together an excellent library which he presented to the Abarbanel Library of Jerusalem. But the greatest collection in Russia is that formed by M. A. L. Friedland (born 1826), who acquired a number of other collections which had been made, such as that of Bampi of Minsk, which formed the foundation of the whole library, and of E. L. Rabbinowicz, also of Minsk, a shoḥet, who had collected a fine library, a thousand books from which were acquired by Friedland. Friedland also gathered into his net the collections of S. Zuckermann of Mohilev, of Joseph Masal of Viazona, and of M. Landsberg. In 1892 Friedland presented the whole collection, then amounting to 300 volumes of manuscripts and 14,000 printed books, to the Asiatic Museum of St. Petersburg. Next in value to his collection is that of Baron David von Günsburg of St. Petersburg; this is very rich in Hebrew MSS.

The United States.

Still more recently, Jewish students in the United States have turned their attention, with gratifying results, to the collection of Hebrew books. The Sutro collection at San Francisco is said to contain 135 manuscripts—some of great rarity—and many thousands of Hebrew books. A. M. Bank of New York has made one collection which he has sold to the New York Public Library, and he is forming another. Of particular distinction is the collection made by Judge Mayer Sulzberger of Philadelphia, which contains over 220 incunabula before 1540—probably the largest number in the possession of any private individual.

The fate of the Oppenheimer and Friedland collections points to the natural history and ultimate destination of large aggregations of books. Comparatively small collections of books are first made. These are often sold intact to larger collectors, forming rills which go to feed the streams, and ultimately these debouch into some great lake, represented by a public library. But it invariably requires the zealous enthusiasm of the book-collector to bring together any special set of works; and this must always be the case with Hebrew literature.

Christian Collectors.

As a rule, collectors of books of Jewish interest have been mainly Jews; but a few Christian Hebraists interested in Jewish learning have also from time to time collected manuscripts and books. The Buxtorfs conducted quite a lively correspondence with booksellers of the east of Europe in order to acquire rare books. Widmanstadt collected the most valuable set of manuscripts now at Munich; while the Bodleian Library contains many valuable manuscripts from the collections of Selden, Pococke, and Hyde. By far the most distinguished of these Christian Hebraists was J. B. de Rossi, whose library of manuscripts, which exceeded 1,000 volumes, is now in the Grand-Ducal Library of Parma. Bishop Kennicott was interested in *variæ lectiones* of the Bible, and brought together a number of Biblical manuscripts.

The following list gives the names of the chief book-collectors that can be traced, either from the catalogues of their works (indicated by a star) or from the accounts given by Zunz ("Z. G." pp. 230–249) and Fürst ("B. J." Preface to vol. iii.). Whenever the place is known to which a library went, in whole or in part, this is given in parentheses at the end of the statement. When the number of books or manuscripts is known, this also is given in parentheses, after the name. The dates are sometimes those of the deaths of the owners, sometimes of publication of catalogues or other year of importance for the library in question. The names of Christian collectors are printed in italics.

BOOK OF LIFE.—Traditional View: The book, or muster-roll, of God in which all the worthy are recorded for life. God has such a book, and to be blotted out of it signifies death (Ex. xxxii. 32, 33).

It is with reference to the Book of Life that the holy remnant is spoken of as being written unto life (A. V., "among the living") in Jerusalem (Isa. iv. 3; compare also Ezek. ix. 4, where one of the six heavenly envoys "who had the scribe's inkhorn upon his loins" is told to mark the righteous for life, while the remainder of the inhabitants of Jerusalem are doomed). The Psalmist likewise speaks of the Book of Life in which only the names of the righteous are written "and from which the unrighteous are blotted out" (Ps. lxix. 28; compare Ps. cxxxix. 16). Even the tears of men are recorded in this Book of God (Ps. lvi. 9 [8]). "Every one that shall be found written in the book . . . shall awake to everlasting life" (Dan. xii. 1 *et seq.*). This book is probably identical with the "Book of Remembrance" in which are recorded the deeds of those that fear the Lord (Mal. iii. 16).

The Book of Jubilees (xxx. 20–22) speaks of two heavenly tablets or books: a Book of Life for the righteous, and a Book of Death for those that walk in the paths of impurity and are written down on the heavenly tablets as adversaries (of God). Also, according to *ib.* xxxvi. 10, one who contrives evil against his neighbor will be blotted out of the Book of Remembrance of men, and will not be written in the Book of Life, but in the Book of Perdition. In Dan. vii. 10 and Enoch xlvii. 3 "the Ancient of days" is described as seated upon His throne of glory with “the Book” or “the Books of Life” (“of the Living”) opened before Him. So are, according to Enoch civ. 1, the righteous “written before the glory of the Great One,” and, according to Enoch cviii. 3, the transgressors “blotted out of the Book of Life and out of the books of the holy ones.” To this Book of Life reference is made also in Hermes (Vision i. 3; Mandate viii.; Similitude ii.); in Rev. iii. 5, xiii. 8, xvii. 8, xx. 12–15, where “two Books” are spoken of as being “opened before the throne, the Book of Life, and the Book of Death, in which latter the unrighteous are recorded together with their evil deeds, in order to be cast into the lake of fire.” It is the Book of Life in which the apostles' names are “written in heaven” (Luke x. 20), or “the fellow-workers” of Paul (Phil. iv. 3), and “the assembly of the first-born” (Heb. xii. 23; compare I Clem. xlv.). To these Books of Records allusion is made also in Enoch lxxxi. 4, lxxxix. 61–77, xc. 17–20, xcviii. 76, civ. 7; Apoc. Baruch, xxiv. 1; Ascensio Isa. ix. 20.

The Eschatological or Annual Roll-Call.

While the prevailing tendency among apocryphal writers of the Hasidean school was to give the Book of Life an eschatological meaning—and to this inclines also Targ. Jon. to Isa. iv. 3 and Ezek. xiii. 9 (compare Targ. Yer. to Ex. xxxii. 32)—the Jewish liturgy and the tradition relating to the New-Year's and Atonement days adhered to the ancient view which took the Book of Life in its natural meaning, preferring, from a sound practical point of view, the this-worldliness of Judaism to the heavenliness of the Essenes. Instead of transferring, as is done in the Book of Enoch, the Testament of Abraham, and elsewhere, the great Judgment Day to the hereafter, the Pharisaic school taught that on the first day of each year (Rosh ha-Shanah) God sits in judgment over His creatures and has the Books of Life and Death opened, together with the books containing the records of the righteous and the unrighteous. And out of the middle state of the future judgment (see Testament of Abraham, A, xiv.) there arose the idea of a third class of men who are held in suspense (“Benonim,” the middle), and of a corresponding third book for this middle class (R. H. 15b). In Tos. Sanh. xiii. 3, however, the annual (Rosh ha-Shanah) judgment (Yom ha-Din) is not yet recognized (compare Tos. R. H. i. 13, R. Jose's opinion in opposition to that of R. Akiba and R. Meïr, which has become the universally accepted one).

The origin of the heavenly Book of Life must be sought in Babylonia, whereas the idea of the annual Judgment Day seems to have been adopted by the Jews under Babylonian influence in post-exilic times. The Babylonian legends (see “Creation Tab.” iv. 121, and the “Zu” legend, ii. 7, quoted in Harper's “Babylonische Legenden,” in “Beitr. z. Assyriologie” by Delitzsch and Haupt, 1892, ii. 2, p. 412) speak of the Tablets of Destiny; also of the tablets of the transgressions, sins, and wrong-doings, of the curses and execrations, of a person which should be “cast into the water”; that is, to be blotted out (compare Micah vii. 19 and the art. Tashlik). As to the resemblance of the Babylonian Zagmuku or New-Year to the Jewish New-Year see the art. Rosh ha-Shanah.

K.

ספר חיים (Ps. lxix. 29, “book of the living”; so LXX., Vulg., R.V. [margin]). The living are the righteous (second half of the verse), who alone are admitted to citizenship in the theocracy. The wicked are denied membership therein: they are blotted out of God's book (Ex. xxxii. 32 *et seq.*). The figure is derived from the citizens' registers (Ezek. xiii. 9; Jer. xxii. 30; and Ex. xxxii. 30–34, accordingly assigned by Holzinger to a late stratum; see his commentary). The life which the righteous participate in is to be understood in a temporal sense. In Dan. xii. 1, however, those who are found written in the book and who shall escape the troubles preparatory to the coming of the Messianic kingdom are they who, together with the risen martyrs, are destined to share in the everlasting life referred to in verse 2. The eternal life is certainly meant in Enoch xlvii. 3, civ. 1, cviii. 3, and frequently in the New Testament (especially in Revelation). The Targum (Isa. iv. 3; Ezek. xiii. 9) speaks of the “Book of Eternal Life.” Temporal life is apparently prayed for in the liturgical formula: “Inscribe us in the Book of Life” (see Atonement, Day of). The Mishnah tells us that the deeds of every human being are recorded in a book (Abot, ii. 1; see iii. 16). The “Sefer Ḥasidim” (xxxiii.) pointedly adds that God is in no need of a book of records; “the Torah speaks the language of man”; *i.e.*, figuratively.

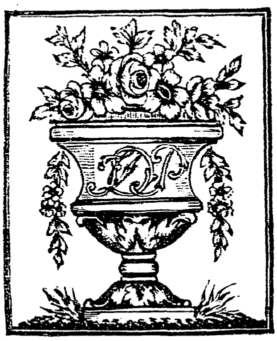
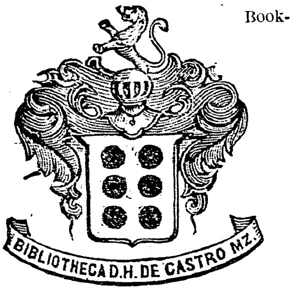
K. M. L. M.

BOOK-PLATES (Ex-Libris): Labels with emblematic designs, with references to the names of the owners of the books in which they are inserted. Book-plates came in almost as soon as the art of printing, but one of the earliest known instances of their adoption by Jews is the book-plate of David Friedländer, given on page 314. So far as is known, none of the great Jewish book-collectors had any special sign by which their books could be identified, as most of them contented themselves with inserting their initials.



Book-Plate of De Pinto Family.



BIBLIOTHECA D.H. DE CASTRO M.Z.

Book-Plate of D. H. de Castro.

With the revival of the fashion of book-plates in recent times many Jews of means adopted the custom, but few of their book-plates have any specific Jewish interest.

Of recent years the artist Lilien has designed book-plates of distinctly Jewish character, two of which are reproduced in this volume. See p. 315).

BOOK-TRADE: The trade in books was carried on by Jews long before the invention of printing. A catalogue of a bookseller of the twelfth century was unearthed a few years ago in the Fostat Genizah ("Jew. Quart. Rev." xiii. 52). The poet Immanuel of Rome (about 1300) relates that a bookseller named Aaron of Toledo traveled to Rome with 180 Hebrew manuscripts, which, however, he sold at Perugia.

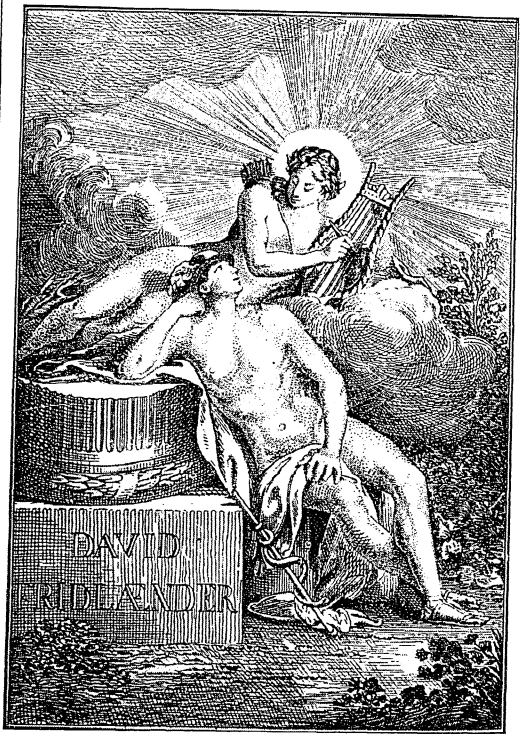
With the introduction of printing, the book-trade centered in Italy, where Hebrew printed books were first produced. Itinerant booksellers, after providing themselves with their merchandise at the depots of Venice, Mantua, Padua, Cremona, etc., traveled from place to place, offering their goods wherever Jews were to be found. Thus, Benjamin Ze'eb of Arta (1500) says that there were many itinerant booksellers who greatly aided the propagation of Jewish books (Responsa, 63a). In the sixteenth century, with the increase of printing-offices in Germany, Bohemia, and Moravia, Italy gradually ceased to be the headquarters of the book-trade; so that in the middle of the seventeenth century De la Grange writes to Buxtorf the elder, who traded in Hebrew books, that he is unable to find a bookstore in Venice ("Rev. Etudes Juives," viii. 75). About this time Frankfort-on-the-Main became the center; all books published in Germany, Bohemia, and Poland being exhibited at the fair in that city. Two booksellers of Frankfort, Gabriel Luria and Jacob Hamel, were in correspondence with Buxtorf in reference to the book-trade (*ib.*).

Frankfort a Center.

Bookselling—the only part of the book-trade with which this article deals—lacked organization in the seventeenth century, and collectors had great difficulty in obtaining Hebrew books, as is attested by the correspondence of Buxtorf and the high prices the latter charged for not very rare books. Thus, the commentary of Naḥmanides on the Pentateuch with the text was sold for 9 reichsthalers; "Obadiah Bartenora" for 9; Shulḥan 'Aruk for 3; "Keli Ḥemdah" for 5; "Ralbag" for 10; Colon and Roḳeaḥ for 6; and Perush on Megillot for 3.

Amsterdam a Center.

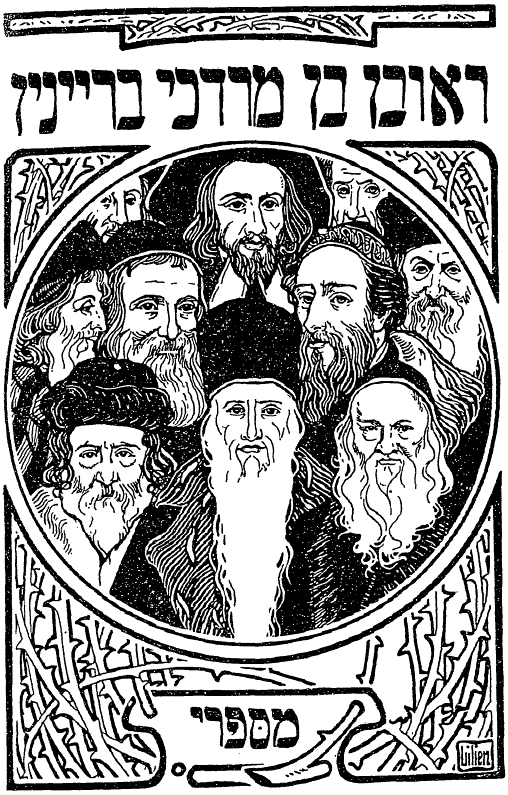
The organization of bookselling as a trade is first met with in Amsterdam, which city was the center of the Hebrew book-trade from the middle of the seventeenth century to the beginning of the nineteenth. The name of Solomon ben Joseph Proops appeared on Hebrew books with the description מוכר ספרים, the technical term for "bookseller." In 1730 he published, under the title "Apiryon Shelomoh," a catalogue of his stock of books. Proops's firm supplied Hebrew books to small booksellers throughout the world. Another important firm in Amsterdam was that of Isaac Fundam, and, at the end of the eighteenth century, that of Johanan Levi Rofe. In the first half of the nineteenth century the Hebrew book-trade of Amsterdam, although it had lost its former importance on account of the relaxation of Hebrew studies in Europe, was still of considerable proportions. Great collections of books were sold through the firms of Herz van Embden, David Proops, Levison, Müller,



Book-Plate of David Friedländer.
(Designed by Daniel Chodowiecki.)

and many others. At present there are only two bookselling firms of any importance in Amsterdam; namely, those of Joachimsthal, and Levison, the successor of Proops.

From the middle of the seventeenth century to the first half of the eighteenth Frankfort-on-the-Main was the center of the Hebrew book-trade in Germany. The leading booksellers of the seventeenth century were: Isaac and Seligmann Reis, Joseph Trier Cohen, Simon Trier, and Solomon Hanau; in the eighteenth, Solomon ben Raphael London, Elijah ben Azriel of Wilna, Löb Schnapper, Simon Wolf ben Abraham Mainz, David ben Nathan Grünhut of Heimerdingen, and Moses ben Kalman Speier. From the middle of the eighteenth century the book-trade in Frankfort gradually declined. At present (1902) there are but three Hebrew booksellers of importance in that city; namely, J. Kauffmann, Joseph Baer, and Hofmann, who deal mainly in second-hand books.



Book-Plate of R. Brainin.
(Designed by E. N. Lilien.)

Among the other places in Germany where the Hebrew book-trade was carried on in the eighteenth century may be mentioned Altona, Dyhernfurth, Frankfort-on-the-Oder, Fürth, and Berlin. The leading booksellers in Germany in the nineteenth century, besides those mentioned above, were: Adolf & Co., Asher & Co., Benzian, Bislicher Brothers, Calvary, and Poppelauer, at Berlin; Jacobsohn at Breslau; J. G. Müller at Gotha; H. W. Schmidt at Halle; Goldschmidt at Hamburg; Baer, Otto Harrasowitz, Köhler, and Richter, at Leipsic; R. N. Rabbinowitz and L. Rosenthal at Münich; J. J. Heckenbauer at Tübingen; and Jollowicz at Posen.

Alsace-Lorraine.

From the second half of the eighteenth century to the middle of the nineteenth the Hebrew book-trade of Alsace-Lorraine was carried on at Strasburg, Metz, and Lunéville by the printers Moses May, Ephraim Hadamar, and Joseph Meïr Samuel. At present the trade there is quite unimportant. France has never been a congenial field for the trade. Only three firms—and these are of no importance—can be found to-day at Paris; namely, those of Durlacher, Lipschütz, and Blum.

In London two important firms, Abrahams and Valentine, have existed for at least a century and a half.

Italy, which, as stated above, was the cradle of the Hebrew book-trade, had in the nineteenth century only a few firms at Leghorn, Turin, and Florence. At the beginning of the sixteenth century Prague and Cracow were important centers; the trade being carried on by the Gersonides family of printers in the former city, and by Wedekind, Kurzins, Isaac ben Aaron of Proctiz, and others in the latter. Later several other places, such as Brody, Lemberg, and Vienna, became conspicuous in the trade. The leading booksellers in the nineteenth century in Austria were: Knoepflmacher, Lippe-Löwy, Schlesinger, Schmid, at Vienna; Landau and Pascheles at Prague; Schönblum at Lemberg; Faust at Cracow.

Small and unimportant as was the book-trade in Poland and Lithuania, it developed in course of the nineteenth century to such an extent that it now practically controls that of all other countries.

Poland and Lithuania.

The voluminous productions of the numerous printing-offices of Wilna and Warsaw reach the remotest parts of the world. Every city of importance in Russia has its Hebrew booksellers; and the smaller towns are frequently visited by itinerant booksellers, who exhibit their goods in the synagogues. The leading bookselling firms in Russia are: Tikaschinsky, Lipschütz, Juditzky, at Byelostok; Sheftel at Berdychev; Jacob Ginzburg at Bobruisk; S. Dezenzel at Brest-Litovsk; J. D. Miller at Grodno; Krassik at Kiev; Hirsch Perlah at Lodz; Dychna, Ulrich, and Nitzsche (Christian firm), at Odessa; H. Shereschewski at Rostov; Sirokin at Pinsk; Achiasaf, A. S. Shapiro, Tushiyah, Zuckermann, at Warsaw; Katzenellenbogen, Matz, Romm, Funk, at Wilna; and Sirkin at Wolozhin.

In the East the Hebrew book-trade was actively carried on in Constantinople, Salonica and Smyrna, in the sixteenth, seventeenth, and eighteenth centuries; but it gradually declined, and at present is insignificant. The only place which shows any revival of activity is Jerusalem, where the following firms are established: Wertheimer, Hirschensohn, Frumkin, and Luncz.

In the United States.

Consequent upon the increasing immigration of Russian Jews to the United States, the Hebrew book-trade in America has developed considerably. There are now many well-known bookselling firms, of which the following may be mentioned: Chinsky, Deinard, Druckermann, Freedman, Germansky, Katzenellenbogen, Rabinowitz, Wasserman, Werbelowski, Jewish Publishing Company, at New York; Shidinsky and W. Schur at Chicago.

BOOKBINDERS. See Binding.

BOOT. See Shoes.

BOOTH: A rendering, in the English versions of the Bible, of the Hebrew word "sukkah"; also occasionally translated "pavilion" or "cottage." The ordinary habitation of the nomad is the tent, a rough textile fabric of goat's hair, stretched on poles (see Tent). This tent is distinguished in the Old Testament from the booths, or habitations formed of branches, foliage, etc., occasionally constructed with the aid of clay, examples of which may still be found among the Arabs of the Sinaitic peninsula. According to the law as given in Lev. xxiii. 42 *et seq.*, the custom of dwelling in booths during the Feast of Tabernacles was instituted for the purpose of reminding the Israelites that, in the journey across the desert, their forefathers had also dwelt in booths. But the term here is undoubtedly employed in a general and not in a specific sense, and probably signifies every species of this form of habitation.

The passage Gen. xxxiii. 17 proves that the nomads also used their tents as shelters for their cattle, and it is probable that the peasant of fixed habitation did likewise. These huts were also erected for the watchmen in the field (Isa. i. 8), as well as for the soldiers encamped before the city (II Sam. xi. 11). But they served above all as a protection against the sun; and the prophet Jonah before Nineveh seeks shade under a booth (Jonah iv. 5). Even to-day it is customary in certain parts of Palestine to erect arbors of leafy branches upon the housetops as a protection against the heat; and during the harvests of the orchards and the vintage, for the villagers to go into their gardens, and dwell there for days in their leafy cottages. The Feast of Tabernacles, therefore, commemorates a very ancient custom; for it is the great harvest and thanksgiving festival. See Tabernacles, Feast of, and Feasts.

BORCHARD, MARC: German physician and author; born in Mecklenburg, 1808; died at Paris June 21, 1872. He graduated as M.D. at Halle, later going to France, where he became hospital and forensic physician at Bordeaux. In that city he was a member of several societies for the promotion of the public good. The last years of his life were spent at Paris. Borchard's published works are: "Commentaires Historiques, Critiques et Pratiques sur la Suette," Paris, 1856; "L'Hygiène Publique chez les Juifs, son Importance et sa Signification dans l'Histoire Générale de la Civilisation," *ib.* 1865; "Etude sur le Mecklenbourg et sur la Question Allemande," *ib.* 1867; "Intolérance et Persécutions Religieuses," *ib.* 1868.

Bibliography: *Archives Israélites*, 33d year, p. 412.

S. M. K.

BORCHARDT, BRUNO: German physicist and author; born at Bromberg Nov. 17, 1859. Educated at Berlin, where he graduated as Ph.D., he was appointed high-school teacher; but on account of his socialistic convictions was compelled to resign his position. He then turned to journalism and became a prolific contributor to the daily press, popularizing physical and chemical problems, and reporting on discoveries, inventions, and the general progress of science. He has published three scientific treatises: "Das Höhenmessen mit der Barometer," "Wahrscheinlichkeitslehre," 1889; "Grundriss der Physik," 1892, second ed., 1900.

Bibliography: Kürschner, *Deutscher Literatur-Kalender*, 1901.

S. M. B.

BORCHARDT, FELIX: German painter; born in Berlin March 7, 1857; studied at the Berlin Academy and with Max Michael; traveled extensively in Italy, France, Holland, and Spain, remaining five years in Spain. He is now (1902) a resident of Dresden in Saxony.

Borchardt has been very successful in portrait-painting and in depicting scenes from nature. His best-known work is "Die These," a painting of colossal size which represents several Neapolitan monks engaged in theological controversy.

Bibliography: *Künstler der Gegenwart*, in Spemann's *Goldenes Buch der Kunst*, No. 1140, Berlin, 1901.

S. A. M. F.

BORCHARDT, KARL WILHELM: German mathematician; born Feb. 22, 1817, at Berlin; died there June 27, 1880. He studied from 1839 to 1843 at Königsberg, where Jacobi exerted a great influence on him. He passed the winter of 1846–47 at Paris, where he continued his mathematical studies under Liouville; and in 1848 he became privat-docent at the University of Berlin. In 1856 the Berlin Academy of Sciences elected him a member. After the death of Crelles, Borchardt became editor of the "Journal für die Reine und Angewandte Mathematik." A complete edition of his works was published by the Berlin Academy of Sciences under the direction of G. Hettner, Berlin, 1888.

Bibliography: Meyer, *Konversations-Lexikon*, 1897.

S.

BORDEAUX: In medieval times capital of Guienne; to-day, of the department of La Gironde, France. It derives its name from Bourdelois, the district in which it is situated.

According to a legend, the Jews settled at Bordeaux shortly after the destruction of the Second Temple, and it is also said that a considerable number of them settled there in the sixth and seventh centuries, because of the commercial advantages of the city. Under Louis le Débonnaire they were allowed to trade freely (828). They had their own administrative and judicial systems and officials. The slave traffic, however, in which many Jews were concerned, was interdicted by royal decree in 829; and from this period the baptismal records contain no entries of conversions to Christianity made among the slaves of the Jews. In 848 the Jews were accused of having delivered Bordeaux to the Normans to be pillaged and destroyed. The Normans were said to have entered the city by means of the "Rue Juifve," a street which was not in the Jewish quarter. Again the bigoted populace opposed the Jews, and accused them of appealing to the Saracens for the purpose of laying waste the cities and lands of the south. There is no proof to sustain either of these charges.

Porta Medoca

Plan of the Northwest Section of the City of Bordeaux, About 1450, Showing the "Rua Judaica" and the Jewish Quarters Outside the City Walls.

(After Leo Drouyn's "Plan de Bordeaux.")

The first definite evidence of Jews in Bordeaux is found in a deed of 1077, where mention is made of the "Montemque Judaïcum," residence of the Jews in the suburb of Saint-Seurin, with the church of Saint Martin as center. There was also a "Porta Judaïca," a "Rue du Petit Judas," or "Puits des Juifs," and a "Rue Judaïque," the last still existing. The dwellings of the Jews were *extra muros* at this period. A chronicle of the year 1273 mentions them as continuing their residence in Saint-Seurin. "Rue Caphernam" was then the main street in the Jewish quarter.

Early Traces.

In this early period the Jews enjoyed comparative freedom, though the practise of usury was on several occasions (1214, 1219) forbidden. The city of Bordeaux was under English (Angevin) dominion; hence the decree of expulsion promulgated by the king of France in 1082, and the permission accorded Christians to repudiate debts due to the Jewish merchants (1182), did not affect the Jews of Bordeaux. Certain taxes were imposed. Thus, about 1150 the Jews paid the archbishop of Bordeaux a poll-tax of eight livres, being considered an estate in mortmain. The English kings sought to confirm the Jews in their ancient privileges; but the persecutions instituted by royal agents were indeed cruel.

Persecution of the Jews was interdicted by Edward I. of England May 23, 1275, but broke out anew under Edward II. The repressive measures of Philip Augustus of France (1198) had, of course, no application to the Jews of Bordeaux. It is claimed that the persecutions attempted in 1316 and 1318 aroused the Pastouraux, who committed outrages all over southern France and northern Spain. Edward III. granted the Jews complete freedom of travel and trade in the beginning of his reign. Several Jewish merchants, however, were banished at this time owing to the jealousy and hatred displayed by Christian merchants toward their Jewish competitors. The Jewish community was recognized as such and had been incorporated as "Communitas Judæorum Vasconiæ." When the edict of Charles VI. was promulgated (Sept. 17, 1394), expelling all Jews from France, the Bordelais were not yet under French dominion; and when these came within the purview of Charles VII.'s enactments (1454), their position remained unchanged, although the Jews completely lost their identity as such. They were legally accepted as residents of Bordeaux, but not as Jews. Louis XI. (1462), recognizing the value of Jewish enterprise, but disregarding what was an open violation of the decree of expulsion, ameliorated the condition of the Jewish merchants.

Secret Jews.

When the Jews were banished from Spain (1492) and Portugal (1496), the Jewish population at Bordeaux increased, for the refugees fled to the cities of southern France. No taxes had been paid by Jews as foreigners for some years, by virtue of their position as "Christian" residents. They continued to reside at Saint-Seurin, and the cemetery was known from early times as "Plantey deus Judius." The Maranos, or New Christians, who came at various times from the Iberian peninsula (1496 to 1525), did not, as at Amsterdam, discard the forms of Christianity at once and return to Judaism. Ancient statutes and more recent decrees forced the Portuguese Jews of Bordeaux into an anomalous position. As strangers, they had the right to settle and reside in the city. They lived as Christians, were baptized, married, and buried in accordance with the rites of the Catholic Church, and were Jewish only within the four walls of their homes. Among the Jewish families ("Portuguese merchants," as they were officially designated) who settled at Bordeaux at this time were those of Granolhas, Ram, Tarrégua, Milanges, Lisana, and Lopès, or Louppes. As physicians, lawyers, and scholars these settlers exerted such an influence on the life of the community that the "jurats" and Parliament advocated enrolling them as residents and often defended them from attack. They also influenced French life and letters; the mother of the celebrated Michel de Montaigne was a member of the Lopès family.

Letters Patent of 1550.

From the beginning of the sixteenth century the Jews of Bordeaux were in reality a Marano community, the leaders of which were the members of the Govea family, so often mentioned in the annals of the city. Until the middle of the century the existence of the colony was dependent on the king's will. The letters patent granted by Henry II. of France Aug., 1550, established the community on a firm basis. The Portuguese of Bordeaux, called "New Christians," were given rights of residence and naturalization, of property and traffic, in line with similar grants to other foreigners in the kingdom. In this connection the rich and learned Goveas rendered eminent services to their coreligionists. However, the Maranos aroused the envy of the Christians, and the populace treated them as secret Jews ("Juifs déguisés"), threatening to procure the withdrawal of their privileges and to have them banished from France.

Despite these manifestations of ill will, the Maranos secured, Nov. 12, 1574, a confirmation of the privileges of 1550 from Henry III. This decree, registered April 19, 1580, was procured through the instrumentality of the Marano merchants Diego Mendes Dias and Simon (Meïr) Lameira. Notwithstanding these safeguards, the Parliament of Bordeaux often came to the assistance of the Maranos, who were accused of Judaizing, to prevent their trading ventures from being restricted and their privileges from being curtailed.

At the beginning of the sixteenth century the well-known Gradis family came to Bordeaux, and within one hundred years from that time the Marano community comprised fifty to sixty families. The merchants, however, continued to molest the Jews, and in 1604 the earlier letters patent were again confirmed and royal protection of Jewish rights and liberties (*i.e.*, of the Spanish and Portuguese settled at Bordeaux) decreed. This measure proved to be of no avail, and by chance only did the Jews at Bordeaux escape the effects of the decree of expulsion of Louis XIII. (May 23, 1615), ordering all Jews to leave France within one month. The Bordelais Parliament came to the rescue of the Jews in 1625, when an embargo had been laid on all vessels in port. The Jews of this period enjoyed not only the protection of the Parliament and "jurats," but the favor of the queen, whose Italian physician, De Montalte, was professedly a Jew and interested particularly in the welfare of the Maranos at Bordeaux.

On Dec. 4, 1636, a census was taken at Bordeaux, which enumerated 36 families and 167 individuals, together with 93 paupers, resident in the Portuguese community and "faithful Catholics at the time." Of the heads of families five had been born in France and six naturalized. By an order of the council, Aug. 9, 1662, many of these were admitted to full rights as citizens of Bordeaux. The most prominent Portuguese families were those of Alvares, Cardozo, De Cisneros, Da Costa, Dias, Lacoste-Furtado, Lopès, Machado, Mendes, De Moura, Oliveira, and Sasportas.

Under Louis XIV.

In 1675, in consequence of the hatred of the other merchants, the Portuguese sought to leave Bordeaux, and Nov. 20, 1684, many poor Jews (comprising twenty-one families, the Lombresso, Campos, and Monsanto, among others) were expelled from Bordeaux on the ground of treason to the king. This decree was annulled Jan. 11, 1686, and from that date the French government tacitly accepted the Jews as residents of Bordeaux. The Jews of Bordeaux could not avoid paying the tax levied by the government of Louis XIV., and hence from 1686 were recognized as Jews. In 1656 there was one family of professing Jews there; in 1666, two; in 1676, nine; and in 1686, seventeen. They continued to live outwardly as Catholics. In 1710 the Jews were interred in the cemetery of the Franciscans. Although numbering one hundred families, they had no public synagogues. The baptism of Jewish children ceased in 1727, as the rabbis openly performed the rite of circumcision, celebrated the Jewish festivals, etc. After 1730, the Jews were not considered as "New Christians," but were permitted to live openly as Jews, to own their cemetery, and to proselytize. In 1734 there were about 350 Jewish (Portuguese and Avignonese) families at Bordeaux, numbering nearly two thousand individuals. In 1731 David Gradis had been made a citizen. Louis XV. granted the Jews new letters patent (June, 1723), and shortly thereafter seven synagogues existed (the public, the Avignonese, and five private; *e.g.*, those of the Gradis and the Peixotto).

Many of the Jews, however, were converted to Christianity, and whenever privileges were granted, a heavy tax had to be paid. On various occasions the patriotic Jews lent large sums to the city. About 1735 Falcon and Attias were rabbis of the community. Jews from Avignon had settled at Bordeaux as early as 1722. The letters patent of 1723 did not apply to them, and the Portuguese Jews looked upon the Avignonese as enemies whom they accordingly felt bound to suppress. They procured a decree of expulsion from the king in 1734, ordering the Jews of Avignon to leave the city within three days. Many procured a respite and were permitted to return. Certain occupations were closed to them; their position and commerce were regulated by enactments in 1739, 1740, and 1749, and the Dalpuget, Astruc, and Lange families were granted rights of residence. In 1752 another census of the Jews of Bordeaux showed that 1,598 Portuguese Jews (327 families with 5 Jewish servants and 147 Catholic servants) and 348 Avignonese Jews (81 families with 11 Catholic servants) had settled there. The Jews from Avignon were simply "tolerated." The Portuguese Jews taxed all the Bordeaux wines used in the ritual, and, in order to extend the sale of wines, established many agencies in foreign cities. In Germany this tax was strenuously resisted, and in 1751 Rabbi Jonathan Eybeschütz, who had come to Hamburg from Metz in 1750, declared the Bordeaux "kosher" wines to be ritually impure. The tax had amounted to four francs per barrel; in consequence of the rabbi's opinion this very profitable source of revenue to the Jews of Bordeaux was cut off, much bitter feeling between Germans and Portuguese was engendered, and the foreign agencies were discontinued.

Avignon Jews Expelled.

Meanwhile the trouble with the Jews from Avignon continued, and the various measures adopted by them to secure their rights and to regulate their commerce were opposed by the Portuguese Jews. The Avignonese Jews sought to gain representation on the council of elders; this was strongly combated by the Portuguese majority; and Isaac Pinto, who replied to Voltaire's anti-Jewish pamphlets and opinions, and Jacob Rodrigues Pereire, the first scientific instructor of deaf-mutes in France, were deputed to lay the grievances of the Portuguese Jews before the king. In 1760 a congregational order decreed the expulsion of the German and Avignonese Jews from Bordeaux, since by the act of 1394 no Jews could settle in France, the Portuguese still being designated as New Christians. The foreign Jews were reduced to beggary and ordered to leave within three days. The royal assent to this measure was obtained by Pereire May 13, 1763, although its provisions were never executed. The control of the community was vested exclusively in the Portuguese, the most prominent of the syndics of this period being members of the Peixotto, Gradis, Brandon, Furtado, and Pereire families.

At various times during the period from 1720 to 1775, the Jews of Bordeaux gave abundant proofs of their loyalty to the ruling house. Whenever the king or queen was sick the Jews publicly prayed for his or her speedy restoration to health. Money was often subscribed for public use. In 1766 the Jews gave 1,000 livres for the rescue of the French Christians enslaved in Morocco, and in 1773 they served as soldiers on the Sabbath, by the special dispensation of two rabbis from Jerusalem, to quell riots in the city. In June, 1776, Jacob Rodrigues Pereire received letters patent from Louis XVI. for the Jews of Bordeaux, giving them the right to settle not only in Guienne, but in any part of France, and to trade throughout the kingdom. Moreover, all previous grants were confirmed. At this time the difficulties existing between the French and the Jewish laws of divorce and inheritance were obliterated by an adjudication reconciling divergent views. On June 9, 1782, the Jews of Bordeaux subscribed 60,140 livres for a ship of the line, which they presented to the king. They also paid 100,000 livres into the royal treasury for each series of letters patent granted them from 1550 to 1776.

Letters Patent of 1776.

At the time of the French Revolution five hundred Portuguese Jews resided at Bordeaux. These sought to be free and equal politically and socially. They asked for the recognition by the state of the Jewish religion, rites, and usages; and their deputies to the National Assembly, Lopès-Dubec, Furtado, Rodrigues, and David Gradis, labored actively in behalf of these petitions. Louis XVI. had repealed (1787) the Edict of Nantes; the National Assembly drew up Aug. 4, 1789, an elaborate program of equal rights for all, which, however, refused to extend social and political equality to Jews, vouchsafing such only to non-Catholics "other than Jews" (Dec. 24, 1789). The Portuguese of Bordeaux protested; they sought to unite all Jews in France in a firm union in order to obtain equal rights and privileges. This concert did not subsist for any length of time, and the Jews of Bordeaux appealed to the Christian deputies of the city to retain the privileges accorded them as New Christians. They pointed to the protracted duration of their residence in France, to the privileges of 1550, etc. Talleyrand, before whom they appeared, reported their cause favorably to the Assembly, which decided that the rights of the Jews as New Christians and as Frenchmen should not be curtailed (Jan. 28, 1790). The Jews of Bordeaux were thus the first to be admitted by law to the rights of French citizenship. From the privileges granted by the decree, the German and other French Jews were particularly excluded.

From this time many Jews were elected to national or municipal positions. David Gradis was a member of the third estate from Bordeaux. During the Reign of Terror the Jews fared well, though many of their number, notably members of the Astruc, Azevedo, Errèra, Lange, Lopès, Pereire,

Under the Revolution and Napoleon.

Perpignan, Peixotto, and Raba families, were heavily fined and amerced of their goods. At Bordeaux only a single Jew, Jean Mendes, was guillotined, and Abraham Furtado was the only one proscribed. In 1806 the number of Jews at Bordeaux was 2,131, and the Bordelais took an active part in the several councils and the Grand Sanhedrin of Napoleon. There were nine synagogues at this time, the chief families of the community being those of Gradis, Furtado, Raba, Fonseca, Peynado, and Cardozo. Abraham Furtado and Isaac Rodrigues represented the Jews of Bordeaux at the Sanhedrin.

Napoleon promulgated several restrictive measures (March 17, 1808), but the Jews of Bordeaux were especially exempted, as there had been no complaints concerning them. In 1809, by the new laws relating to the Jews, Abraham Furtado was made chief rabbi of Bordeaux, and in 1814 Abraham Andrade succeeded him. The new synagogue, consecrated in 1812, was destroyed in 1872, and the present synagogue was erected, being inaugurated Sept. 5, 1882. The community numbered such men of letters as Jacob Rodrigues Monsanto and Furtado among its citizens. Many of its members have been active in public life, in commerce, and in industry. The brothers Emile and Isaac Pereire were well-known financiers during the second empire. David Marx was chief rabbi from 1835 to 1864; he was followed by Simon Lévy and Isaac Lévy, the present incumbent. The following charitable societies are to be found to-day (1902): Société de Guémilhouth-Hassadim, Société de Bienfaisance, Société des Dames de l'Humanité, Société des Dames de la Largesse, and Ecole Consistoriale de Garçons. The community now (1902) numbers about three thousand individuals. Henri Gradis is president of the local consistory, and Baron Alphonse de Rothschild delegate to the central consistory in Paris.

BORDERS: Ornamental designs surrounding printed pages. The first ornaments for title-pages consisted of arabesque borders with white figures. They are found in books printed at Lisbon, 1489–92, the plates of which, together with Eliezer Toledano's types, were subsequently taken to Salonica, where they were used in the printing-establishment of Don Judah Gedaliah, who had previously worked in Lisbon. A border of flowers and animals, similar to the border used in many of the Naples prints, is found as early as the Ṭur Oraḥ Ḥayyim published at Leiria, 1495. The borders in some editions of the Soncino press are artistically executed, as are those produced by the Gersonides at Prague; those of the prayer-book, Prague, 1527, and of the Pentateuch, Prague, 1530, are remarkable for their beauty. On the top of the title-page of the Ṭur Oraḥ Ḥayyim, Prague, 1540, Moses is represented with the tablets of the Law; below are two lions, a crown over a city gate (the coat of arms of Prague), and to the right and left winged men with shields; in addition, a "David's shield" on the right side and a ewer on the left. The same design is found in the Prague editions of the seventeenth century.

The style of printing current at Prague was taken as a model by the wandering printer Ḥayyim Schwarz in his editions made at Augsburg, 1533–43, and Heddernheim, 1546. Thus, the title-page of the Heddernheim Seliḥah is similar to the border of the Prague Haggadah of 1526; Adam and Eve suggest Dürer's female figures, but are not nearly so well modeled. The influence of this Haggadah may also be seen in some editions printed at Cracow by Halicz in 1534. The title-page of Isserlein's "Sha'are Dura" has a white arabesque border, and two angels with flute and drum at the top. Portals are most frequently used, being found on the first Bomberg editions at Venice, and occurring as late as the nineteenth century, sometimes with straight, sometimes with twisted, pillars. Hans Holbein, the younger, cut the title-border for Münster's Chaldean Lexicon, Basel, 1527, which resembles the border of the "Abḳat Rokel," Augsburg, 1540. The border to Boeschenstein's Hebrew grammar, Augsburg, 1514, was formerly erroneously ascribed to Dürer. The title-borders of the Midrash Tanḥuma (Verona, 1595) and of some of Foa's publications at Sabbionetta—for example, "Mirkebet ha-Mishneh"—deserve special mention among those produced in the sixteenth century. Some editions made at Amsterdam, Frankfort-on-the-Oder, and Prague during the seventeenth century have as an ornament on the title-page an eagle, on the wings of which Jacob's entry into Egypt and his meeting with Joseph are represented. The book "Bet Levi" and some others printed at Zolkiev in 1732 have a border surprisingly elaborate for that establishment. Sulzbach editions of the Maḥzor frequently have rich title-page ornaments. Moses and Aaron with two angels above them are seen in the editions of Zolkiev, 1764, and in many from Frankfort-on-the-Oder and Amsterdam.

Borders from non-Hebraic books were frequently borrowed for editions produced at Frankfort-on-the-Main in the eighteenth as well as in the nineteenth century and at the present time.

year 1793, when Prussia took possession of Borek, there were already 448 Jews there, who maintained a synagogue—which was replaced by a new one in 1857—as well as a cemetery. At the present time (1902) the Jewish population of Borek numbers only 150 souls, out of a total population of 2,000.

Borek is the birthplace of Elias Guttmacher, known by the name "Grätzer Raw."

D. M. L. B.

BORERIM: Name of electors of a congregation, and applied particularly to the five distinguished representatives of the community in the old "kahals" (governing boards) of the Jews in Poland and Lithuania. The borerim were chosen by nine sworn mandatories, who were elected by ballot from among the tax-paying members of the community. The function of the borerim was to elect and appoint the aldermen of the kahal.

BORGER or **BURGER, SOLOMON BEN DAVID COHEN:** Cabalist; lived at Zülz, Prussia, in the seventeenth century; corrector of the press in the printing-house of Shabbethai Bass at Dyhernfurth. He published (Amsterdam, 1688), with additions of his own, the cabalistic commentaries on the Pentateuch, "Pa'aneaḥ Raza" (The Revealer of the Secret), compiled in the thirteenth century by Isaac ha-Levi ben Judah.

K. I. Br.

BORIS, MOSES: French colonel; born in the department of Meurthe in 1808; died in Paris June 13, 1884. At the age of twenty-six he entered the military school of Saint-Cyr, and upon his graduation was appointed tutor, gradually rising to the rank of captain. He so distinguished himself in the suppression of the Paris riots, June, 1848, that he was appointed chief of battalion. In the Crimean and Italian wars he took an active part, and was promoted to the rank of colonel in 1861. He later became officer of the Legion of Honor, and was placed on the retired list in 1868. Boris always took a lively interest in everything relating to Judaism.

S. M. K.

BORISOV: Town and district in the government of Minsk, Russia; situated on a peninsula on the left bank of the Beresina, about fifty miles from the capital. The Jewish population (1900) of the town was over 10,000 in a total of 18,348; of the district it was 14,802 in a total of 158,662.

The Jewish community of Borisov dates from the sixteenth century, and was at one time considered one of the important communities of Lithuania. The Jewish merchants of the city carried on a large trade with Riga in grain and lumber by way of the Düna river, and with South Russia by the Dnieper. In 1812, during the disastrous passage of the Beresina by the French army, the Jews showed their patriotism toward the Russian government by voluntarily building a bridge, which was of great service to the Russian army, and by erecting at their own expense a hospital for wounded and sick soldiers. For this they received the grateful acknowledgment of Emperor Alexander I. Since the construction of the Moscow-Brest railroad the business of Borisov has declined rapidly, and the Jewish community is becoming impoverished. The city contains nine houses of prayer, two for Mitnagdim and seven for Ḥasidim; two public and seven private Hebrew schools, a Talmud Torah, a free loan association, a hospital, a home for the poor, and an elementary trade-school.

BORISPOL: A village in the district of Pereyaslav, government of Poltawa. Its population of 10,000 embraces about 1,000 Jews. Of the latter, 157 are artisans. Instruction in the Talmud Torah is imparted to 114 Jewish children, the remainder attending five elementary schools. From 1648 to 1649 many Jewish families were killed in Borispol by the Cossacks under Chmielnicki.

BORKUM, KALMAN BEN PHINEAS SELIGMAN: Court Jew of Duke Peter Biron of Courland; born in the middle of the eighteenth century; died at Mitau in 1828, on the same day that his brother Simson died. Owing to the influence of the Borkum brothers, Jews were permitted to settle permanently in Mitau, to organize themselves into a community, and to engage in trade and handicrafts within the dukedom of Courland. In 1775 the Jews of Mitau were permitted to send their children to a gymnasium called the Academic High School. In 1784 Kalman Borkum erected, at his own expense, a synagogue and all the other buildings necessary for the Jewish community. See Courland; Mitau.

BORN, GUSTAV JACOB: German histologist and medical author; born at Kempen, province of Posen, Prussia, April 22, 1851. He received his education first at the gymnasium of Görlitz, Prussian Silesia—where his father practised as a physician and held the position of *Kreisphysicus* (district physician)—and afterward at the universities of Breslau, Bonn, Strasburg, and Berlin, graduating as physician from Breslau in 1876. In the same year he was appointed assistant prosector and privat-docent at the University of Breslau, and in 1877 prosector. In 1886 he was elected assistant professor, and in 1898 professor of histology and comparative anatomy, at the same university, receiving the Prussian Order of the Red Eagle of the fourth class in the latter year.

Several technical inventions, as well as new methods in the field of microscopy and embryology, have made Born's name prominent. Well known among these is a method for reproducing and plastically enlarging small anatomical and embryological objects, which was described in "Zeitschrift für Wissenschaftliche Mikroscopie," vol. v.

Born has written about fifty essays and works pertaining to his specialty, among which are: "Ueber das Extremitätenskelett der Amphibien und Reptilien"; "Ueber die Nasenhöhle und den Thränennasengang bei Allen Wirbelthieren von den Amphibien Aufwärts" (this series of articles is published in Gegenbauer's "Morphologisches Jahrbuch," vols. i.-vii.); "Beiträge zur Entwicklungsgeschichte des Säugethierherzens," in "Archiv für Mikroscopische Anatomie," vol. xxxii.; "Ueber die Derivate der Embryologischen Schlundbögen und Schlundspalten bei Säugethieren," *ib.* 1883; "Beiträge zur Bastardirung Zwischen den Einheimischen Ameisenarten," in Pflüger's "Archiv für die Gesammte Physiologie," 1883; "Biologische Untersuchungen," part 1: "Ueber den Einfluss der Schwere auf das Froschei," in "Archiv für Mikroscopische Anatomie," 1885; "Biologische Untersuchungen," part 2: "Weitere Beiträge zur Bastardirung Zwischen den Einheimischen Ameisen," *ib.* 1886; "Ueber Druckversuche an Froscheiern," in "Anatomischer Anzeiger," 1893, viii., Nos. 18, 19. His most important work, however, is "Ueber Verwachsungs-Versuche mit Amphibienlarven," Leipsic, 1897.

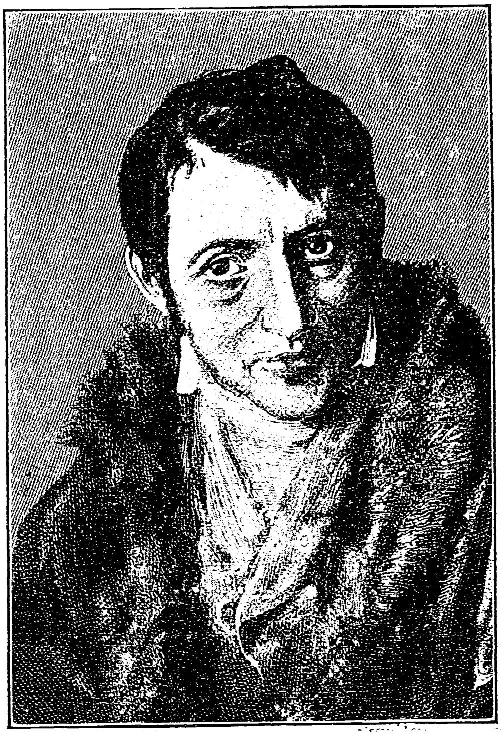
S. F. T. H.

BÖRNE, KARL LUDWIG: German political and literary writer; born May 6, 1786, at Frankfort-on-the-Main; died in Paris Feb. 12, 1837. The family name was Baruch, and he received the name of Loeb, both of which he afterward changed. Both his grandfather and his father, Jacob Baruch, were engaged in business, and employed as fiscal and purchasing agents for the government. Loeb and his two brothers were taught at home by a private tutor, one Jacob Sachs. When Sachs had done what he could for young Börne, the latter came directly under the private tuition of Rector Mosche of the gymnasium.

Early Years.

At fourteen years of age Börne went to the newly established institute of Professor Hetzel in Giessen, with the idea of preparing for a medical course, and remained there about a year. His father arranged with Dr. Marcus Herz, the celebrated physician in Berlin, whose home was an intellectual center that attracted such men as Humboldt and Schlegel, to receive Börne as a resident pupil, and to guide him in his studies at the clinics. The youth of sixteen fell in love with Henriette Herz, then in her thirty-eighth year, in the fulness of her beauty and the ripeness of her intellectual power. When her husband, the doctor, died in 1803, Börne told her the story of his love; but, with the wisdom that was characteristic of her, she quieted his passion and soothed his anguish, and soon after he went to the University of Halle, where she secured for him a home in the household of Professor Reil, whose lectures he attended, as well as those of F. A. Wolf, Steffens, and notably Schleiermacher. The letters which Börne wrote from Halle to Henriette Herz, together with selections from his diary relating to his association with her, were published as "Briefe des Jungen Börne an Henriette Herz," 1861. The insight into the higher intellectual life of Berlin and Halle diverted him from his medical studies, and as the loss of its rights as a free city by Frankfort and its domination by the French had resulted in securing civil rights for the Jews, Börne announced (1807) his intention to follow a public career.

Therefore he entered upon a course of legal, political, financial, and administrative studies at the University of Heidelberg. The result of his labors was that he secured in 1811 a clerical position in the police bureau in his native city, but not before he had gone once again to Giessen to secure his degree as doctor of philosophy (Aug. 8, 1809); his dissertation, "Ueber die Geometrische Vertheilung der Staatsgebiete," being published shortly afterward in Professor Crome's "Germanien" (vol. iii.). In Hart's periodical, "Der Cameral-Correspondent," there appeared in 1809 an article by Börne, entitled "Von dem Gelde."



Dr. Börne

During the period of his service in the ducal police bureau, he delivered a course of lectures in the Jewish lodge of Freemasons at Frankfort, under the title "Zur Aufgehenden Morgenröthe," and began his journalistic career, in its political phase, by contributing a series of short anonymous articles to the "Frankfurter Journal," in which he sought to arouse the Germans to a sense of the ignominy of submitting to the French invasion, and by this means helped in awakening the old Teutonic spirit. In 1815, after the downfall of Napoleon, there set in that long night of political reaction in Germany, which continued until dawn began to break in 1848—that epochal year ushered in by "Young Germany" which was the fruit of the toils of Börne and Heine.

"Young Germany."

These thirty-three years were indeed years of political torpor and of domination of bureaucratic tyranny. Patriots like Moritz Arndt and Otto Jahn were indicted for high treason; those who had most capably labored for the reorganization of Prussia were no longer heeded or needed in the service of the state; university students were imprisoned en masse for the most trivial offenses; all of the writings of Heine were interdicted; scholars like the brothers Grimm, Gervinus, and Dahlmann were dismissed from their chairs in the university; and the censor was the most potent influence in literature.

When the Jews of Frankfort were relegated to the "Judengasse," the difficult problem was presented of what was to be done with Börne, the only Jewish official in the service. Every trick and device was resorted to in order to induce him to resign, but he refused; so at last but one course remained open, and he was dismissed. What Börne felt at this time can be well discerned from a perusal of the satirical sketch "Jews in the Free City of Frankfort" in "Fragmente und Aphorismen" ("Gesammelte Schriften," ed. 1840, vol. iii.). At the request of the Frankfort congregation he prepared a monograph entitled "Aktenmässige Darstellung des Bürgerrechts der Israeliten in Frankfurt," and two pamphlets, "Für die Juden" and "Die Juden und Ihre Gegner," the latter of which was written at the suggestion of his father, by whom, however, it was suppressed on account of its bitterness.

His Baptism.

And yet on June 5, 1818, Loeb Baruch went to Rödelheim and was baptized by Pastor Bertuch as a convert to the Lutheran Church; assuming the name of "Karl Ludwig Börne." That he had become estranged from the ceremonial observance of Judaism was generally known, but nothing of his previous career, nor indeed anything in his life after baptism, would have led any one to believe that he had become a Christian.

In 1816 he began the publication of the periodical "Die Wage," which at once elicited wide-spread attention and admiration. He contributed articles of the most diversified character on literature, art, society, the drama, and, of course, politics. His dramatic criticisms, however, created the greatest sensation. An echo of the consideration given to the magazine by the learned circles is recorded in a letter by Rachel, in which the writer can hardly find adequate terms in which to express her appreciation. She afterward became a contributor to "Die Wage." In 1819 Börne also assumed editorial charge of the "Zeitung der Freien Stadt Frankfurt." His experiences with the censor were, however, of such a constantly unpleasant nature that he gave up the struggle after four months of endurance. He took his revenge, however, on his antagonist by writing his "Denkwürdigkeiten der Frankfurter Censur."

It was about this period that there began the platonic relations of Börne with Madame Wohl, with whom he had become acquainted several years before, which continued until his death. She aided, encouraged, and inspired him in his work; nursed and tended him during the years preceding his death.

Relations with Jeanne Wohl.

In 1840 Heine, in his post-mortem criticism "Ueber Ludwig Börne," referred insinuatingly to the relations that subsisted between the departed and Madame Wohl, who in the mean time had married one Solomon Strauss. The latter challenged the poet, and after the duel Heine sent a letter to Dr. Wertheim, which was published in the "Augsburger Allgemeine Zeitung," in which he retracted the insinuations and declared them to be based on erroneous and groundless assumptions. This letter is to be found as a prefatory note to the Börne monograph in Heine's works.

Before leaving Frankfort for Paris in 1821, Börne wrote his celebrated "Monographie der Deutschen Postschnecke." This is one of the finest specimens of sustained humor in the German language, and with his "Esskünstler" indicates the high-water mark of his work in this direction. The letters which he wrote during this period (1819 to 1822) constitute the bulk of the publication "Nachgelassene Schriften," Mannheim, 1844–50.

It was at about this time that his father, solicitous as ever for his son's welfare, used his influence with the high officials in Vienna to secure for Börne the appointment as imperial councilor, a sinecure without conditions or obligations, but with reasonable emoluments. Börne, however, would not accept the position. It is probable that the unpleasantness occasioned by this refusal led to his trip to Paris, where he remained but a short time, leaving there in the summer of 1822 to go to Heidelberg. At the latter place occurred the first of the hemorrhages that marked the beginning of the disease that was so soon to cut short his career.

His Peregrinations.

It was not until 1826 that he was actively at work again in Frankfort. He was now a regular contributor to Menzel's "Literatur-Blatt" and Berty's "Iris." To this time belongs his splendid eulogium upon Henriette Sontag, the great opera singer, and the magnificent memorial address on Jean Paul Richter, delivered by Börne in the Museum in Frankfort Dec. 2, 1825, and which is considered by many to be his masterpiece: it is certainly the ablest of his contributions to serious literary criticism.

The winter of 1827 was spent in Berlin. In the following year Börne went to Hamburg, and while there arranged with Campe for the publication of a collected edition of his writings, which thereafter appeared in eight volumes (1829–34).

All this time, however, Börne was gradually getting worse in health. Trying one after another of the various resorts, he finally spent the summer of 1830 in Bad Soden, where there came to him the tidings from Paris of the Revolution of July. This fired his heart, and nothing would do but he must go to Paris himself to witness the realization of his dreams of liberty and republicanism.

Here, besides his articles in French contributed to the "Reformateur," edited by Raspail, and editing a periodical of his own, "La Balance," he began the publication of his famous "Briefe aus Paris." Like almost everything that Börne wrote, these letters are still of vital interest, even though they are almost exclusively political. They are dominated, however, by the main object of preaching the doctrine of human liberty, the theory of human equality before the law, and the divine right of the republican form of government. In these letters, though they bristle with wit and teem with humorous touches, his powers of invective, of pathos, of persuasion, are at their very highest. He lays bare with unsparing skill the manifold stupidities and tyrannies of the governing classes in the German fatherland that is so dear to him, and revels in the delights of the freedom to be enjoyed in France. The ideal that he strives for is a united Germany, freed from the bonds and shackles of medieval kingships, princeships, and lordships, living in close bonds of amity with France; and he vindicates violent revolution to secure the rights of the people.

"Briefe aus Paris."

It is easy to understand, considering conditions in Germany even to-day, seventy years later, what a furor these letters created. Periodicals were filled with controversial writings, and pamphlets and works were issued in quick succession controverting or defending the ideas of Börne; the most important being those of Meyer and Wurms of Hamburg, and Willibald Alexis, the novelist of Berlin.

One of the bitterest of Börne's critics, however, was the historian Menzel, who appealed to the baser sentiments of his readers by denouncing Börne as unpatriotic, as being more of a Frenchman than a German, and as loving France better than Germany. To him Börne addressed the last work that he produced, the virulent controversial treatise "Menzel, der Franzosen-Fresser, Paris, 1836."

The long and severe illness of which he was the victim at last overcame him, and he died, as stated, on Feb. 12, 1837. He was buried at Père Lachaise, Wenedey and Raspail pronouncing the last words over his grave. The spot is marked by a statue executed by the sculptor David, which, besides the head of Börne, bears a relief representing France and Germany extending their hands to each other under the blessing of Freedom. The best portrait of him is that by Moritz Oppenheim. The house in which he was born bore, until it was demolished, a memorial tablet. In 1842 there appeared in Paris "Fragments Politiques et Littéraires" from Börne's writings, with a prefatory note by M. de Cormenin. As late as 1862 there was published at Hamburg a new complete edition of his works in twelve volumes.

BORNSTEIN, ARTHUR: German author; born at Breslau March 23, 1867; studied at Breslau, Berlin, and Bern; and passed the state examination in Berlin in 1888. He adopted the profession of dental surgery, but devoted himself as well to literature. A volume of his short stories was published under the title "Klippen," at Berlin in 1894. In the following year appeared his drama, "Der Theaterarzt." He has since published a number of short stories, humorous sketches, learned articles, and poems. His "Vergnügte Geschichten" was published in 1900 (Hinrichs, "Bücher-Verzeichnis"). He is a member of the Deutsche Schriftsteller-Genossenschaft.

Bibliography: *Das Geistige Berlin.*

BORNSTEIN, PAUL: German author; born in Berlin April 8, 1868; educated in and graduated from the university in that city, receiving the degree of doctor of philosophy. He has since lived in the German capital. His first published work was the "Memoiren des Cagliostro," Berlin, 1892, which was one of the volumes of the "Memoiren-Bibliothek" (in 15 vols.). This was reprinted separately in 1894 under the title "Abenteuer des Geistes." In 1896 his novel, "Aus Dämmerung und Nacht," was published. In the same year he founded the "Monatsschrift für Neuere Litteratur und Kunst," which he edited and to which he contributed, besides a number of literary reviews and poems, the following essays: "Vom Weibe," "Boulevard-Hellenismus," "Ein Satirisches Capriccio," "Die Ehe im Modernen Roman," "Maurice Maeterlinck," "Yvette Guilbert." The first number of the "Monatsschrift" appeared in Oct., 1896; and with the issue for Sept., 1898, the publication was discontinued.

In 1899 appeared his critical work, "Die Dichter des Todes in der Modernen Litteratur," and his "Gesammelte Essays"; and in the following year his monograph on Maeterlinck was republished. He has also translated a number of works from the French; among others, from Jeanne Marni: "Pariser Droschken," "So Sind Nun die Kinder," "Grossstadtpflänzchen," and "Die Memoiren des Herzogs von Lauzun."

The most important work with which Bornstein is identified is the encyclopedic review of achievements in every sphere of activity and thought in Germany during the nineteenth century, the publication of which, under the title "Am Ende des Jahrhunderts," was begun in 1898; Bornstein, as editor, being aided by a large staff of young and enthusiastic scholars notable in their respective fields of learning and research. To date (1902) there have appeared twenty-three volumes, the third of which, entitled "Juden und Judentum im Neunzehnten Jahrhundert," is a substantial contribution to Jewish literature and history, by S. Bernfeld.

BORODAVKA, or **BRODAVKA, ISAAC:** Lithuanian farmer of taxes and distillery privileges; lived in the sixteenth century at Brest-Litovsk. He is first mentioned in a grant issued by King Sigismund August, Jan. 1, 1560, to David Shmerlevich of Brest-Litovsk, and his partners, Isaac Borodavka and Abraham Dlugach, entitling them, for the term of seven years, to collect the duties on goods and merchandise passing through Minsk, Wilna, Novgorod, Brest, and Grodno. For this they were required to pay into the royal treasury 6,808 copes annually. During Easter of the following year Borodavka, among others, was granted the salt monopoly for seven years, and several weeks later, on Saint Margaret's day (June 27), the king signed an edict permitting Borodavka and Jacob Dlukgach to build breweries in Byelsk, Narva, and Kleschtscheli. They were to be sole brewers for these towns until Jan. 1, 1566, when the breweries built by them were to be delivered to the king. They were also to pay into the royal treasury 60 copes each year.

Borodavka and his partners were unpopular among their Polish competitors, who were covetous of the same "privileges"; and this enmity, fed and encouraged by race prejudice, was not slow in manifesting itself in acts injurious to the Jews. On Sept. 10, 1565, David Schmerlevich and Isaac Borodavka succeeded in wresting the lease holdings in Volhynia from the Christian farmers Borzobogaty by offering to the crown 600 copes a year in excess of the amount paid by the latter. One of the Borzobogatys and a certain Zagorovski appear as the principal witnesses in a claim preferred by Prince Yanush Andrushovich, bishop of Lutzk and Brest, against Schmerlevich and Borodavka for unlawfully collecting taxes from his subjects, the commoners of Torchin, Volhynia.

Decrees were repeatedly issued by the crown urging the subjects of the king to assist in every way the royal farmers of taxes and their "servants" in the collection of duties on goods and of royalties on distilleries. These decrees, or "universals," were invariably the reply of the crown to the complaints of Isaac Borodavka and other Jewish leaseholders that "goods were carried up and down the rivers Bug, Mukhavetz, Bobyer, and Narew," past the established custom-houses, and no duty paid. This mutual animosity led even to acts of violence. Abraham Dlukgach was mercilessly beaten and robbed by the "servants" of the widow of Ivan Bogovitonovich Kozirutski. David Schlomich, "servant" of Schmerlevich and Borodavka, was cruelly beaten and robbed by the "servants" of Peter Chekhoski, another farmer of taxes.

Very soon there were accusations of shedding innocent Christian blood. In Narva, Byelsk, and Rosokhi, "servants" of the tax-collectors were accused of murder. The most rigid investigation proved these accusations to be groundless; not, however, before one of the accused had paid for them with his life.

In the records for July 13, 1564, it is stated that the royal chamberlain, Andrei Rozhnovski, an eyewitness of the hanging of Bernat Abramovich at Byelsk, deposes that he had heard the doomed man solemnly declare (on the gallows), before the face of his God, that he had not killed any little girl at Narva, nor received any orders for assassination from his master, Isaac Borodavka; and that Yezoph, his comrade and companion in misfortune, then under arrest in the castle, was not guilty of the crime, but had made a confession of guilt to the authorities in the prison because he could not endure the torture of being burned with candles. He furthermore asserted that their accusers desired thus to revenge themselves upon Borodavka. Thereupon King Sigismund August, by special decree (1564), ordered that in the future all such accusations against the Jews should be laid before him for his personal examination, the accused in the mean time to be exempt from torture.

Two years later Nakhim, another "servant" of Isaac Borodavka, and the subcollector of taxes in Rosokhi, or Rososhi, was accused of the murder of a Christian child. A second decree of the king (1566), entered on the records, required that all Jews accused of murdering Christians or of defiling the Eucharist should be brought to him for trial, and the accused were to suffer the penalty of the crime, in the event of their failure to prove the accused guilty, according to the accepted practise of legal procedure. Ten years later (1576) King Stephen Báthori confirmed the Jews, his subjects ("who tarry in our dominions, the great dukedom of Lithuania"), in the rights and privileges granted them by Sigismund August.

BOROFSKY, SAMUEL HYMAN: Born at Wolkovyshki, government of Suvalki, Russian Poland, April, 1865. He was educated in the schools of his native place, and afterward in the Jews' Free School at Manchester, England, to which place he had been taken in 1874. In 1876 he was apprenticed to a cabinet-maker, and in 1879 removed to Boston, Mass., where his mother and the rest of his family had preceded him.

Borofsky has been a justice of the peace since Sept. 15, 1891, a notary public since April 10, 1894, and was a member of the Boston city council in 1898, and captain of the sixth company infantry, Massachusetts provisional militia, in 1898 and 1899. In 1900 he was elected a member of the Massachusetts house of representatives. He drafted and assisted in the enactment of what is known as the "Five-Cent Ice Bill," which compels ice-dealers, under penalty of $100 fine, to sell ice in five-cent pieces to all desiring such, thus conferring a great boon upon the poor in summer.

In 1901 Borofsky presented a bill to exempt persons observing the seventh day of the week as the Sabbath from any penalty for keeping shops open or for performing secular business and labor on the first day of the week. The bill was defeated in the house of representatives on April 12, but three days later it was reconsidered and passed. On being referred to the committee on judiciary of the senate it encountered great opposition, and on May 29 the Senate rejected it by a vote of 21 to 6 (see "Boston Herald," April 15, 1901; "Boston Globe," April 26, 1901; "Jewish Comment," May 10, 1901).

Borofsky in 1899 organized and successfully established The Helping Hand Temporary Home for Destitute Jewish Children. He is a contributor on social and Jewish questions to several Boston newspapers.

A.

BOROWSKI, ISIDOR: Soldier under Bolivar y Ponte, and, later, a Persian general; born at Warsaw, Poland, 1803; killed at the siege of Herat in

1837. This military adventurer in Persia and Afghanistan was a Polish Jew who was reared in the United States, and who sometimes claimed to be the illegitimate son of Prince Radziwill by a Jewish mother, and at other times professed to be simply a Polish nobleman. He served under Bolivar, then under Mehemet Ali in Egypt, where in 1829 he supported himself by giving lessons in mathematics and in English. In 1831 he was in Bushire, Persia; and was afterward recommended by Sir John Campbell, the British minister, to Prince Abbas Mirza, the son of Shah Fatḥ Ali, as a useful and talented man. Borowski developed great military abilities in the service of that warlike prince, and took for him the strong town of Cochan in Khorassan. Later he took the castle of Sarakhs and made prisoner the leader of the Turkomans. After the death of Abbas in 1833, Borowski gave most essential assistance to Abbas' son, Mohamed Mirza, and enabled him to ascend the throne of his grandfather. The English were behind most of the military undertakings of the Persians in those days, and Borowski was looked upon as an English general, and even wore the uniform. But he forsook the interests of the British government and joined the Russian party in Persia, and was shot at the siege of Herat. His wife, a Georgian captive of war, received a pension from Mohamed Shah on account of her husband's distinguished services.

BORROW. See Commerce and Trade.

BORROWER (שואל): One who receives, at his own request, the property of another, for free use, upon the agreement that it shall be returned to the owner (Ḳid. 47b). He is distinguished from the borrower of money, the "loweh" (לוה), in that the latter need not return the property which he has received, but may return it in kind.

Biblical Law.

The Biblical law concerning the liability of the borrower (Ex. xxii. 13, 14; R. V., 14, 15) holds such person to the strictest accountability for the property borrowed. Inasmuch as it is given him at his request for use without pay, the law requires of him not merely the ordinary care that must be given to property in the hands of a bailee, but it holds him absolutely responsible for its return to the owner; and if it is lost by him or stolen from him, or if it consist in cattle which die while in his possession, he is not permitted to offer any defense to the claim of the owner, but must make absolute restitution.

The Biblical law cites one exception to this general rule; namely, if the owner accompanies the property into the possession of the borrower, the latter is not obliged to make restitution. Thus the Mishnah says, "If one borrows a cow and borrows or hires the owner with her, or if he borrows or hires the owner, and then borrows the cow and the latter dies, he is not liable; but if he borrows the cow, afterward either borrowing or hiring the owner, and the cow dies, he is liable" (Mishnah B. M. viii.). In the former case the decision is based on the fact that the owner is with her at the time that she goes into the borrower's possession; in the latter case the owner is not with her at such time.

Talmudic Exceptions.

The Talmudic law established several other exceptions, based upon a proper interpretation of the Biblical text. Inasmuch as the property was borrowed to be used, the borrower ought not to be held responsible for any depreciation in value, or for any damages which result to the property, from the legitimate use for which it was borrowed. Rab therefore decided that the borrower of the cow was not responsible for what in modern law would be called "reasonable wear and tear," or, as the Talmudic phrase more tersely expresses it, מתה מחמת מלאכה, "if she died from work." "Not only if she is wasted in flesh through labor, is he not liable, but if she dies from the labor, he is not liable, for the borrower may say, 'I did not borrow her to seat her on a chair'" (B. M. 96b); and in a case where a man borrowed an ax which was broken while in use, Rab decided that if the borrower could prove that he did not put it to any extraordinary use, he was not liable (B. M. *ib.*).

Other exceptions whereby the borrower is released from making restitution are the following: If he borrows the article for a specific time, he is not liable for a casualty after the time has expired (B. M. 81a), although ordinarily he is responsible for the article until it has actually been returned to the owner (Mishnah B. M. viii. 3). If he borrows an article and at the same time the other borrows an article from him, his responsibility is changed to that of a bailee for hire (B. M. 81b). Finally, he may make a special agreement with the owner of the article, releasing himself from liability (Mishnah B. M. vii. 10). Unless a specific time has been fixed between the borrower and the owner, the borrower must return the article as soon as he has ceased to use it (Maimonides, "Yad," She'elah, i. 5; Ḥoshen Mishpaṭ, 341, 1); and he has no right to loan the borrowed article to another (*ib.* 342, 1).

Beginning and Extent of Liability.

The rights and liabilities of the borrower begin, first, when the object is actually taken into his possession by "drawing" it toward him, according to R. Eleazar: "As they decreed 'drawing' for purchaser, so also they decreed 'drawing' for bailees"; and, second, when he has begun to use it. R. Huna said, "If one borrows an ax and splits wood with it, he has acquired it, and, if he does not split, he does not acquire it" (B. M. 99a). The liability of the borrower is limited only to the value of the injured property (B. M. 94b); hence when a man borrowed an ax and through carelessness broke it, R. Kahana and R. Assi decided that he must return the pieces to the owner after they have been valued, paying an additional sum sufficient to cover the full value of the ax as he received it (B. M. 97a).

As the borrower is one of the four classes of bailees mentioned in Ex. xx. 7-15, the subject will be further elucidated by reference to articles Bailment, Hiring, and Letting. For borrower of money see Loan and Interest. For borrower giving pledge see Pledge and Mortgage.

BOSHETH ("shame," "disgrace"): Used concretely by the Prophets as "the shameful thing" to designate the Baalim and their images. (See Hosea ix. 10 and Jer. iii. 24, xi. 13, where the word is parallel with "the Baal" [compare Jer. iii. 24]). Later usage adopted the epithet to such an extent that "Bosheth" became a sort of euphemism for "Baal," as is learned from the proper names "Ish-bosheth" (with which Jastrow [see Bibliography] compares a Babylonian name, "Mati-bashti") and "Mephibosheth," the former being written "Esh-baal" in I Chron. viii. 33, ix. 39, and the latter occurring as "Meri-baal" in I Chron. viii. 34 and ix. 40. The manuscript of the Septuagint, known as 93 Holmes, has *εισβααλ*, and the old Latin version has "Isbalem" for "Ish-bosheth." So also in II Sam. xi. 21, "Jerubbe[o]sheth" is given for "Jerubbaal."

The opinion now so prevalent that the name of the god Molech was changed from "Melek" in imitation of the vowels of "Bosheth" is not altogether acceptable. It is possible to regard "Molech" as the regularly formed Hebrew equivalent of "Mālik," the name of an Assyro-Babylonian god (Rawlinson, "Cuneiform Inscriptions of Western Asia," iii. 7, 18), which is also a common epithet ("Decider") of several divinities. From this point of view the word is really a survival of the oldest form of "Malk" ("Melek"), king. Another explanation of "Bosheth," proposed by Jastrow, makes the name the distortion of a deity who bore the name "Basht" or "Bashta."

Bibliography: Geiger, *Urschrift*, pp. 259–433; *idem*, in *Z. D. M. G.* xv. 728–732; Wellhausen, *Text der Bücher Samuelis*, 1871, pp. 30 *et seq.*, 153 *et seq.*; Stade, *Geschichte*, i. 260; E. Nestle, *Israelitische Eigennamen*, p. 120; Driver, *Text of Samuel*, pp. 186, 195, 279. The hypothesis as to the form "Molech" is given in W. R. Smith, *Religion of the Semites*, 2d ed., p. 372, note. Compare on the whole subject, Jastrow, *The Element Bosheth in Hebrew Proper Names*, in *Journal of the Soc. of Bibl. Lit.* xi. 30.

BOSKO, AGRON MACHIMOVITSCH. See Lithuania.

BOSKOVITZ, WOLF: The first rabbi of the congregation of Budapest; died 1818. In 1787 the Jewish community at Pest was sufficiently large to rent a hall where divine services could be held, though all religious questions were at this time still submitted to Moses Münz in Buda. As Pest and Buda were not, however, at that time connected by a bridge, and as it became rather irksome, more particularly during the winter, to cross the river to Buda whenever the rabbi there had to be consulted, the announcement that Boskovitz, who was well known as a Talmudist, was to settle in Pest in 1793 as rabbi was eagerly welcomed by the Jewish community of that city. But as Moses Münz vigorously objected to the arrangement, Boskovitz was compelled to leave Budapest in 1796. He also left Hungary, but returned in 1809 to Bonyhád, acting as rabbi there until his death. Boskovitz, who enjoyed great popularity as a rabbi, was the author of the following works, all of which were published posthumously: "Seder Mishnah" (on Maimonides, Yad ha-Ḥazaḳah); "Ma'amar Esther" (sermons); and "Notes on the Talmud" (published in the Vienna edition of the Talmud, 1830). Compare also "Oẓar ha-Sifrut," part 2, iii. 22.

S. L. V.

BOSKOWITZ: Town in Moravia, about 21 miles to the north of Brünn. It has one of the oldest and most important communities in the province, though in numbers it had dwindled to 1,967 Jewish inhabitants in 1880. Even in early times there was at Boskowitz a systematically organized model school, many pupils of which became famous.

The most eminent person of Boskowitz was Samuel Levi Kolin, who wrote a commentary to the ritual codex "Magen Abraham," and is generally known by the name of his work, "Maḥẓit ha-Sheḳel." The cabalist R. Nathan Adler must also be mentioned: he was elected rabbi of Boskowitz in 1783. He was followed, later, by his pupil, Moses Sofer of Frankfort, who subsequently became rabbi at Presburg. Adler introduced the Sephardic ritual, abolished the piyyuṭim, and as a "Cohen" himself pronounced the "priestly benediction" ("birkat kohanim") daily during the service. He was arraigned before the government by a farmer of the excise on account of his undue severity in insisting upon the minutest details of ritual observance in slaughtering animals for food, and had to leave Boskowitz, where his ideals were not acceptable. The scholars trained along the lines of the "Maḥẓit ha-Sheḳel" were too practical to follow his religious extravagances, and they embarrassed him by their acumen. J. B. Bloch of Hamburg, the author of the "Binat Yissakar," was also rabbi in Boskowitz; he likewise came in conflict with them. During a halakic discourse he was once pressed so hard by the turbulent arguments of the laymen that he angrily resigned his office in the midst of his discourse.

Bloch was succeeded by Moses Präger-Karpeles, the great-grandfather of A. Schmiedl and of Gustav Karpeles. He resigned the rabbinate in Kremsier on account of a dispute with Raphael Kohn regarding the pronunciation of the priestly blessing on the Day of Atonement. L. R. Beneth criticizes in a responsum the novella of Moses Karpeles, "Torat Mosheh Emet" (The Law of Moses Is Truth). Karpeles was succeeded by Abraham Placzek, who was appointed provisional district rabbi by the government. Placzek enjoyed universal esteem on account of his kindness and peaceful disposition. He died Dec. 10, 1884. The present incumbent is Dr. S. Funk.

Boskowitz possesses several richly endowed foundations instituted by the family Löw-Beer.

D. A. F.-G.

BOSKOWITZ, ḤAYYIM BEN JACOB: Palestinian author; lived about the middle of the eighteenth century. He wrote the "Toẓe'ot Ḥayyim" (Life's Issues), a commentary on the Pentateuch (Amsterdam, 1764, printed with the text), which deals chiefly with the moral precepts that may be drawn from the Bible stories.

G. I. BER.

BOSLANSKI (or **BASLANSKI), YOM-ṬOB LIPMAN HA-KOHEN (R. Lipele Mirer):** Russian rabbi; born 1824; died in Mir, government of Grodno, Dec. 26, 1892. In his younger days he was rabbi in Khaslavich and other communities; but for the last eighteen years of his life he stood at the head of the Jewish community in Mir, and was recognized as one of the greatest rabbinical authorities in Russia. He visited St. Petersburg several times as representative of the Jews. He was one of the first "Hobebe Zion," and sided with the rabbis who permitted the colonists in Palestine to work in "shemiṭṭah" (fallow year) and who prohibited the use of citrons ("etrogim") from Corfu in Russia for the Sukkot festival. In 1889 Boslanski attempted to organize a society for the purchase of land and the foundation of a new colony in Palestine, and visited Paris to enlist the assistance of Baron Edmund Rothschild in the project.

Boslanski is the author of a collection of responsa entitled "Malbushe Yom-Ṭob," Wilna, 1881, with an appendix on the laws of contracts and of arbitration.

L. G. P. WI.

BOSNIA: Province of the Balkan peninsula, on the frontier of Austria and of Montenegro. Formerly under Turkish rule, it came under the protection of Austria by the Treaty of Berlin, 1878.

According to some historians, the first Jews settled in Bosnia in 1575; Don Joseph Nasi and his aunt, Dona Gracia, using their influence with the sultan Suleiman the Magnificent to that effect. The inscriptions on some tombstones at Sarajevo, however, bear the Jewish date of 5311, or 1551 C.E.; hence Jews were living in Bosnia thirty-five years before the date mentioned above.

From a manuscript in the Mohammedan library at Sarajevo, written in Turkish, it is evident that thirty or forty Jews engaged in business at Bosna-Serai (the present Sarajevo) under the governor, Hadim-Ali-Bey, in the year 958 of the Hegira (1541 C.E.). These merchants entered the country without their families and lived in a sort of caravansary, the majority being natives of Salonica. During the great religious festivals they returned home. When their number increased, the governor, Ghazi-Hassan-Pasha, ordered them to settle definitely in that region or to leave the country. Fearing the fanaticism of the populace, they sought refuge at Ragusa and in Hungary, which latter was then a Turkish province. Thence they sent representatives to Bosnia, with letters to the governor, in order to collect their outstanding credits. In 1614, when the ex-grand vizier of Constantinople, Baltaji-Mehmed-Pasha, was appointed governor, he brought in his suite Naphtali Mandjor (Maggioro?), a rich Jewish banker of Constantinople. The latter successfully interceded for the return of the Jews. Thirty families returned immediately, but these lived scattered in various streets in Sarajevo.

After much trouble the Jews in 1645 obtained permission from the governor, Siavous Pasha (ex-grand vizier), to reside in a special quarter, about 2,000 square meters in extent; and thereupon they erected houses. In the center of this quarter, which was named after the governor, a well was dug. Each Jew received a deed of ownership. A small annual tax of a few aspers (one asper $=\frac{1}{12}$ of a cent) was imposed upon them, to be paid to a neighboring mosque—a custom that still prevails. At the same time Suleiman the Magnificent granted them by firman the permission to establish a cemetery on a hill named Verbania, the Jews being also required to pay for this privilege a tax for the benefit of another mosque of the city. In this way the Jews definitely established themselves in Bosnia; and in time they settled in other localities besides Sarajevo.

In 1901, in a total population of 1,357,000, there were in the province about 7,500 Jews. Of these, 4,000 lived at Sarajevo, 250 at Bosna-Brod, a similar number at Mostar (Herzegovina), and the remainder in small communities. The Jews of Bosnia, to which those of Herzegovina must be added, have an official representative at Sarajevo. They have also an official organ, "La Alborada," written in Judæo-Spanish and in rabbinic characters, published at Sarajevo since 1901 under the direction of a committee of editors. See MOSTAR, SARAJEVO, TURKEY.

BOSORA. See BOZRAH.

BOSPORUS, CIMMERIAN: Name of the ancients for the strait of Yenikale or of Theodosia; on the eastern coast of the Black Sea. The country on both sides of the Cimmerian Bosporus formed in ancient times the kingdom of Bosporus, the latter name being the reading of the Vulgate for Sepharad (ספרד). Jerome adopted it from his Jewish teacher, who considered it to be the place to which Hadrian had transported the captives from Jerusalem. But Jewish communities existed in Bosporus long before the destruction of the Temple. King Agrippa I., in a letter addressed to Caius Caligula, speaks of the Jews established in the Greek colonies of Pontus (Philo, "Legatio ad Cajum"). Among many Greek inscriptions unearthed in 1830 on the banks of the Bosporus, two are of especial interest for the history of the Jewish settlement in that Greek colony. One of these, found at Pantikapæum (the modern Kertch) and dated 377 of the Bosporian (81 of the common) era, is a declaration of the liberation by a Jewess named Creste of her slave Heraclius. The deed is said to have been drawn up in the synagogue of Pantikapæum. The second, unearthed in Gorgippia and dating from 338 of the Bosporian (41 of the common) era, is indeed a pagan inscription; but the Biblical name of God used at the head of it shows the influence exercised by the Jews upon their fellow-citizens.

A quite recent discovery of Jewish Greek inscriptions was announced Jan. 12, 1901, to the Imperial Russian Geographical Society. A young explorer, A. L. Pogodin, discovered and deciphered new inscriptions in Kertch and other places in South Russia, from which it is clearly evident that Jews settled in the Bosporus as early as the fourth century B.C., and were an important section of the Greek colony. They had their cemeteries, synagogues, and other communal institutions. In trade as well as in social life they mingled freely with the Greeks, as is evidenced by the fact that the language of the inscriptions is Greek. Other inscriptions show that, in the first century B.C., the Jews founded in the Bosporus a colony of their own. In the inscriptions of the third century of the common era Jewish religious symbols and sepulchral inscriptions are found. In the same century the Jews even took part in religious persecutions ("Budushchnost," 1901, No. 3, p. 46).

There are no records describing the condition of the Jewish communities before the occupation of Kertch by Russia under Peter the Great in 1771. It may be supposed that they escaped many misfortunes that befell their coreligionists in other European countries where Christianity had established its dominion. At the beginning of the eighth century the Jewish communities in the Bosporus were greatly increased by the arrival of many Jews from the Byzantine empire, who sought refuge from the persecutions of Emperor Leo. Toward the middle of the same century the Jews became practically the rulers of the country by the conversion to Judaism of Bulan, the king of the Chazars. Concerning the history of the Jews of Bosporus from the time of its occupation by the Russians, see CHAZARS, CRIMEA, INSCRIPTIONS, and KERTCH.

H. R. I. BR.—H. R.

BOSTANAI or **BUSTANAI** (בוסתנאי): First exilarch under Arabian rule; flourished about the middle of the seventh century. The name is Aramaized from the Persian "bustan" or "bostan" (as proper name see Justi, "Iranisches Namenbuch," p. 74). Almost the only exilarch of whom anything more than the name is known, he is frequently made the subject of legends. He was the son of the exilarch Hananiah (compare EXILARCH). Hai Gaon, in "Sha'are Ẓedeḳ," p. 3*a*, seems to identify Bostanai with Haninai, and tells that he was given for wife a daughter of the Persian king Chosroes II. (died 628), by the calif Omar (died 644). (See Rapoport, in "Bikkure ha-'Ittim," x. 83; B. Goldberg, in "Ha-Maggid," xiii. 363). Abraham ibn Daud, however, in his "Sefer ha-Ḳabbalah" (Neubauer's "Medieval Jewish Chronicles," i. 64), says that it was the last Sassanid king, Yezdegerd (born 624; died 651–652; see Nöldeke, "Tabari," pp. 397 *et seq.*), who gave his daughter to Bostanai. But in that case it could have been only Calif Ali (656–661), and not Omar, who thus honored the exilarch (see "Ma'aseh Bet David"). It is known also that Ali gave a friendly reception to the contemporary Gaon Isaac (Sherira II.'s "Letter," ed. Neubauer, *ib.* p. 35; Abraham ibn Daud, *ib.* p. 62); and it is highly probable, therefore, that he honored the exilarch in certain ways as the official representative of the Jews. The office of the exilarch, with its duties and privileges, as it existed for some centuries under the Arabian rule, may be considered to begin with Bostanai.

The Dispute Among His Heirs.

The relation of Bostanai to the Persian princess (called "Dara" in "Ma'aseh Bet David," or "Azdadwar" (Nöldeke, "Isdundad"), according to a recently discovered genizah fragment, had an unpleasant sequel. The exilarch lived with her without having married her, and according to the rabbinical law she should previously have received her "letter of freedom," for, being a prisoner of war, she had become an Arabian slave, and as such had been presented to Bostanai. After the death of Bostanai his sons insisted that the princess, as well as her son, was still a slave, and, as such, was their property. The judges were divided in opinion, but finally decided that the legitimate sons of the exilarch should grant letters of manumission to the princess and her son in order to testify to their emancipation. This decision was based on the ground that Bostanai had probably lived in legitimate marriage with this woman, and, although there were no proofs, had presumably first emancipated and then married her. Nevertheless, the descendants of the princess were not recognized as legitimate 300 years afterward (Hai Gaon, *l.c.*). The statement in the genizah specimen (see bibliography below) is doubtless dictated by enmity to the exilarch; Abraham ibn Daud's statement (*l.c.*) is contrariwise prejudiced in favor of the exilarch; but compare genizah fragment published by Schechter in "Jew. Quart. Rev." xiv. 242–246.

Legends.

The name "Bostanai" gave rise to the following legend: The last Persian king (Hormuzd), inimical to the Jews, decided to extinguish the royal house of David, no one being left of that house but a young woman whose husband had been killed shortly after his marriage, and who was about to give birth to a child. Then the king dreamed that he was in a beautiful garden ("bostan"), where he uprooted the trees and broke the branches, and, as he was lifting up his ax against a little root, an old man snatched the ax away from him and gave him a blow that almost killed him, saying: "Are you not satisfied with having destroyed the beautiful trees of my garden, that you now try to destroy also the last root? Truly, you deserve that your memory perish from the earth." The king thereupon promised to guard the last plant of the garden carefully. No one but an old Jewish sage was able to interpret the dream, and he said: "The garden represents the house of David, all of whose descendants you have destroyed except a woman with her unborn boy. The old man whom you saw was David, to whom you promised that you would take care that his house should be renewed by this boy." The Jewish sage, who was the father of the young woman, brought her to the king, and she was assigned to rooms fitted up with princely splendor, where she gave birth to a boy, who received the name "Bostanai," from the garden ("bostan") which the king had seen in his dream.

Bostanai at the Court of the King.

The figure of the wasp in the escutcheon of the exilarch was made the subject of another legend. The king had taken delight in the clever boy, and, spending one day with him, saw, as he stood before him, a wasp sting him on the temple. The blood trickled down the boy's face, yet he made no motion to chase the insect away. The king, upon expressing astonishment at this, was told by the youth that in the house of David, of which he had come, they were taught, since they themselves had lost their throne, neither to laugh nor to lift up the hand before a king, but to stand in motionless respect (Sanh. 93b). The king, moved thereby, showered favors upon him, made him an exilarch, and gave him the power to appoint judges of the Jews and the heads of the three academies, Nehardea, Sura, and Pumbedita. In memory of this Bostanai introduced a wasp into the escutcheon of the exilarchate. The genizah fragment says that the incident with the wasp occurred in the presence of the calif Omar, before whom Bostanai as a youth of sixteen had brought a dispute with a sheikh, who filled his office during the exilarch's minority, and then refused to give it up. Bostanai was exilarch when Persia fell into the hands of the Arabians, and when Ali came to Babylon Bostanai went to meet him with a splendid retinue, whereby the calif was so greatly pleased that he asked for Bostanai's blessing. The calif, on learning that Bostanai was not married, gave him Dara, the daughter of the Persian king, as wife; and the exilarch was permitted to make her a Jewess and to marry her legitimately. She bore him many children, but their legitimacy was assailed after their father's death by the exilarch's other sons ("Ma'aseh Bostanai," several times printed under different titles; see "Benjacob," *s.v.*). This legend was made known only in the sixteenth century (compare Isaac Akrish), but the Seder 'Olam Zuṭṭa, composed in the beginning of the ninth century, drew upon the legends of the garden and the wasp (see Mar Zuṭra II.).

The name "Dara" for the Persian princess in Christian sources occurs also as that of Chosroes' daughter (Richter, "Arsaciden," p. 554, Leipsic, 1804). The legend glorifying Bostanai probably originated in Babylon, while the genizah fragment, branding all the descendants of Bostanai as illegitimate, being descendants of a slave and unworthy to fill high office, comes from Palestine. This latter view is of course erroneous, as may be gathered from Hai's remark, above mentioned, for the post-Bostanaite house of exilarchs was not descended from the princess. It is true, however, that the Bostanaites were hated by the scholars and the pious men, probably in part because Anan, founder of the Karaite sect, was a descendant of Bostanai (see Sherira's "Letter," ed. Neubauer, i. 33). Benjamin of Tudela says that he was shown the grave of Bostanai near Pumbedita.

G. L. G.

BOSTON: Capital and chief city of the state of Massachusetts in the United States.

Nothing definite is known of Jews in Boston prior to 1842. In that year there was established the first congregation, whose founder and first president was William Goldsmith. In 1843 this congregation purchased the first cemetery for Jews in East Boston. The second congregation, now known as the Temple Adath Israel, was organized in 1853.

The first election of any Jew to public office was in 1875 when Godfrey Morse was elected to the school committee of the city of Boston. Leopold Morse was elected a member of the United States House of Representatives in 1876. The first Jew in the common council was Isaac Rosnosky, elected in 1878, who was also the first Jew to be elected (1883) to the Massachusetts legislature. Godfrey Morse was elected president of the common council in 1883.

Bunker Hill Monument, the most notable memorial in Boston, owes its erection in part to the generosity of Judah Touro, who donated for the purpose the sum of $10,000, nearly one-fifth of the entire amount received from private sources ("Pub. Am. Jew. Hist. Soc.," No. 3, pp. 98-100).

The principal congregations are the two mentioned above and Beth Israel, Beth Jacob, and Mishkan Tefilah. The leading charitable associations are the United Hebrew Benevolent Association, founded 1864; the Hebrew Women's Sewing Society, founded 1869; the Leopold Morse Home for Infirm Hebrews and Orphanage, founded 1888; the Free Burial Association; and the Free Employment Bureau, which five societies constitute the Federation of Jewish Charities of Boston. There are also the Benoth Israel Sheltering Home, the B'nai Zion Educational Society, the Hebrew Industrial School, the Helping Hand Temporary Home for Destitute Jewish Children, the Talmud Torah Hebrew Free School, the Young Men's Hebrew Association, the Young Women's Hebrew Charitable Association, and the Louisa Alcott Home.

The principal social organizations are the Elysium Club, Harmony Club, Progress Club, Purim Association, and the Utopian Club.

The principal rabbis have been Revs. Nathan, Aaron Ginsberg, Falk Vidaver, Raphael Lasker, and Samuel Hirschberg of Congregation Ohabei Shalom; the Revs. Joseph Sachs, Joseph Shonninger, Solomon Schindler, and Charles Fleischer of Temple Adath Israel. Other notable rabbis are M. Z. Margolis and Hyman S. Shoher.

In the total population (500,000) there are about 40,000 Jews, mostly Russian, who have made their homes in Boston within the last ten years. There is a small percentage of German, Polish, English, and

Portuguese Jews. There are also many native-born American Jews in the city. Many of the Boston Jews are engaged in mercantile and manufacturing pursuits; there are several physicians, musicians, and lawyers; but the majority are carpenters, painters, builders, masons, plumbers, etc.

A. G. Mo.

Early Classification.

BOTANY: The science that treats of plants. Like grammar and other sciences based on logical thought, scientific botany originated with the Greeks, and from them found its way to the Jews. Agriculture, gardening, and popular medicine naturally led to a knowledge of the plant world and of the most remarkable phenomena of plant life; and the natural impulse toward nomenclature led to naive classifications of the plant world. Biblical language is not poor in designations for plants (נטע, צמח) and their various parts. In illustration may be mentioned the different expressions, שרש, עקר, for "root"; אב, בד, נזע, דלית, זמורה, חוטר, יונק, כפה, נטישה, נצר, סור, סלסלת, סנסנים, סרעף, סעפות, ענף, פארת, צמרת, קציר, שתיל, שריג, שלחות, שבלת, for "stem," "slip," "stalk," "shoot," and "twigs"; as well as טרף, עבות, עלה, עפאים, for "leaves" and "foliage"; נץ, נצה, סמדר, פרח, ציץ, for "bud," "blossom," and "blossom-stalk"; אשכול, בסר, בכורה, גרגר, גרה, זרע, חרצן, ענב, פגה, שבלת, for "fruit," "fruit-stalk," and "seed"; many of which designations were in reality only used by the farmer and gardener as technical terms. The Biblical classification of plants—with which life on earth begins (Delitzsch on Gen. i. 11)—is contained in the passage which tells of their creation: "And God said, Let the earth bring forth grass [דשא], the herb yielding seed [עשב], and the fruit-tree [עץ] yielding fruit . . . whose seed is in itself upon the earth: and it was so" (Gen. i. 11). The term דשא is explained as embracing, besides the grasses, the cryptogamous plants, in contrast to עשב; although the Bible never mentions the cryptogamia elsewhere (Keil on Gen. *l.c.*). But this is a forced use of the word somewhat similar to the limitation of fruit-bearing trees to fruit-trees by Jewish exegetes, according to whom the forest-trees, with "thorns and thistles," were created only after the fall of man and the cursing of the earth. They also claim, according to Gen. R. v. 9, that the earth had previously brought forth only fruits and wood bereft of any fruit-taste, in place of fruit-like wood (in Mishnaic diction עץ had come to mean "wood"; אילן was the word for "tree"). Herewith ended the classification of plants. Language had designated certain groups, like grain-plants (דגן, בר); and only when the study of the Law was taken up in post-Biblical times did it become necessary to establish some uniformity regarding correlated groups, although the method of classification was not a particularly happy one. Herein also Maimonides acted as a systematizer (L. Löw, "Graphische Requisiten," i. 93), deducing the following division from Talmudical writings ("Yad," Kil. i. 8, 9): "Plants are classified as: (1) אילנות ('trees'); (2) זרענם ('vegetables'). The former consist of: אילני מאכל ('fruit-trees') and אילני סרק ('barren trees'). To vegetables belong: (*a*) תבואה ('grain'), comprising the five familiar species; (*b*) קטנית ('small grain') and all seeds that are eaten, with the exception of large grain, as, for instance, the leguminous plants, beans, peas, lentils, rice, sesame, poppy [Maimonides, פרגים]; (*c*) זרעוני גנה ('garden-plants') (Kil. ii. 2; Tosef. i. 74), the seeds of which are not edible, but which bear edible fruits; for example, the onion, garlic, leek, nutmeg, turnip, etc.; flax also belongs to this group. Some of these garden-seeds are grown in fields on a large scale, and are then called מיני זרעים ('seed species'), as, for example, flax and mustard; others, grown only in small beds, as turnips, radishes, beets, onions, coriander, celery, lettuce, are called ירקות ('herbs')."

Later Classifications.

Maimonides' classification is repeated later on by others; for example, in "Kaftor wa-Feraḥ," ed. Berlin, lvi. 119b; Caleb Afendopolo, in "Adderet Eliyahu," Appendix, 14a. Afendopolo adds to the above, "fruits of the ground," as cucumbers, watermelons, the castor-oil plant, and those medicinal plants which are not used for foods.

For purposes of the ritual blessing there is but one classification; namely, fruit of the tree and fruit of the soil, in addition to which mushrooms and truffles form a group by themselves, as, according to Jewish belief, they are nourished by the air (Maimonides, "Yad," Ber. viii. and the ritual codices). As a curiosity of more modern times, the fact may be mentioned that Azulai speaks of fifty-five kinds of "fruits of the soil," for which reason, he says, the Hebrew benediction reads: האדמה ("of the earth"), the numerical value of the letters in this word being 55! ("Birke Yosef, Shiyyure Berakah, Oraḥ Ḥayyim," 203.) This classification was not easily arrived at, as is shown by Ber. 6, as in Tosef., Ber. vi. 8, 27, זרעים, דשאים, and ירקות ("grains," "grasses," and "herbs") are distinguished (Israel Lewy, "Fragmente der Mischna des Abba Saul," p. 10). For the classification תבואה, קטנית, אילנות, ירק, see Sifra 87b and parallels, and compare Rev. viii. 7, ix. 4, where *χόρτος* = דשא, *χλωρός* = ירק, and *δένδρον* = אילן.

From the standpoint of the value of the soil's products, those used for maintaining life (for example, wine, oil, flour, fruit) are distinguished from others less important, as caraway-seeds and spices ('Ab. Zarah iv. 465, 25 *et seq.*; "Sheiltot," No. 32). Israel is compared with wheat, and not with nutmeg or pepper; for the world could well exist without the latter, but could not do so without the former (Pesiḳ. R. 10 [ed. Friedmann, p. 35a] and parallel passages). Separate categories are formed of the seven plants characteristic of Palestine (see PALESTINE, FLORA OF) and of those used for incense, medicine, and dyestuffs (סמנים).

Besides the plants of Palestine and Egypt the Bible only mentions spices and condiments, coming from southern Asia and its groups of islands. These found their way, partly by land, partly by sea, to the peoples of foreign countries, and were used especially in their sacrificial offerings (Gildemeister and Hoffmann, "Die Aetherischen Oele," pp. 4 *et seq.*, Berlin, 1899).

The entire plant world is called in the Mishnah צמחי אדמה (Sifre, Num. 84 [ed. Friedmann, p. 23a];

Post-Biblical Period.

Deut. 11 [ed. Friedmann, p. 67b]); Targum, צמחים מיני, צמחא דארעא (Kil. ii. 5); the young nursery or vineyard is נטיעה (Sheb. i. 8; Tosef. i. 61); נטע is "to plant" (Tosef., Bek. vi. 541; Tosef., B. B. vii. 408; Yer. Meg. i. 70b.); קיצץ נטיעות is "to fell plantations" (Ned. iii. 5; Tosef. ii. 277; B. Ḳ. viii. 6; Tosef. iii. 349; Tosef., Sanh. iv. 423; in an applied sense Tosef., Ḥag. ii. 234). The term נטיעה is opposed to נתישה in Mek., Beshallaḥ, 10 (ed. Friedmann, p. 43b); opposed to זקנה in Tosef., Sheb. i. 61; זמורה לנטיעה is "grapes" (Tosef., Shab. viii. 121; Gen. R. xxxi. 14); but in the Targum נצבה is used also for "plant."

For the different parts of the plant the language of the Mishnah is so rich in synonyms as to make it impossible to reproduce them here. Some of the designations are for particular products, as יחור for "branch of a fig-tree"; גרופית for "branch of the olive and sycamore"; זמוריה for "branch of a vine" (Gen. R. xxxi. 14). All the different parts of the plant are enumerated by the Zohar, which proceeds to mention the seven parts—root, bark, pith, twig, leaf, blossom, and fruit—in order to draw parallels to the seven different ways of interpreting the Bible (iii. 202a).

The rich flora and the fertility of Palestine (see Palestine, Flora of) are lauded as highly by the Talmud and the Bible as in secular literature. "The vegetation of Palestine was always a very rich one; its fruits were the finest and most easily cultivated. But on two occasions its productivity reached the highest pitch: at the time when our fathers took possession of the country, and at the time of their going into exile" (Sifre, Deut. 37 [ed. Friedmann, p. 76b]; 316, 317 [ed. Friedmann, p. 135b]; Pesiḳ. R. 132a; Yalḳ., Yer. 328). Still greater shall be its fertility at the time of the Messiah: "On the day of sowing, the fruit will ripen as at Creation, yea, even the wood of the fruit-trees will become edible." Wonderful was also the harvest at the time of Queen Salome: the wheat-kernels grew to the size of kidneys; barley was as large as olives; peas were as large as golden dinars; and, accordingly, samples of them all were preserved for later generations, to show what would be the deteriorating consequences of sin! (Sifra, Beḥuḳḳotai, ed. Weiss, p. 110d, and parallel passages). "Unseemly, yea, even insolent, it is of the land which has been manured and cultivated by its owners, not to deny its harvest to the conquerors after the destruction of Jerusalem" (Yer. Ta'an. iv. 69b; Lam. R., Introduction, end).

The total number of plant-names found in the Bible (100) does not correspond with the excessively rich vegetation of Palestine. But this will not be a matter for surprise, considering that the legislative part of the Bible is, on account of the food restrictions contained therein, very copious in names of animals, and that there is little occasion to consider plants in such connection, these being only occasionally mentioned in poetical and prophetical writings. The literature of the Mishnah enriches the Biblical list of plant-names to the extent of about 180 good Hebrew words; so that it may be inferred that a very large proportion of the Hebrew botanical vocabulary has been preserved.

Halakah.

Halakic writers often had occasion to mention plants. The establishment of the ritual blessings for the various kinds of vegetable food and for the first-fruits of the season (שהחיינו); agrarian legislation on the rights of the poor to participate in the harvest; the rules for tithes, for the priest's portion, and for the "ḥallah" (offering of dough); the regulations concerning the mixture of heterogeneous plants; the rules for the Sabbatical year; the law forbidding the fruit during the first three years of the tree's growth; the establishment of the particular kinds of grain to be used for the making of unleavened bread; the salads to be used with the Passover roast; the components of the festal garland for Tabernacles; the covering of the Tabernacle itself; the use of botanical words in vows; the proper material on which to write letters of divorce; sacrifices from the plant world; the ingredients for incense; the kinds of hyssop to be used in the sacrifice of the Red Heifer; the laws of Levitical impurity in relation to plants—all these are far from exhaustive of the occasions where plants are concerned. Custom and usage demanded certain vegetable foods on certain days, and created new relations to the plant world, as life constantly raised new halakic botanical questions, of which rabbinical literature treats. The throwing of burs on the fast-day of the Ninth of Ab; the custom of plucking up grass after a funeral, believed to be a symbol of the resurrection ("Shibbole ha-Leḳeṭ," p. 373a; Responsa of MaBIT, i. 250; Lewysohn, "Meḳore Minhagim," p. 134); lotion-plants from which a kind of milk runs (Responsa of RaSHA, No. 248); the chewing of mastic on Passover (RaDBaZ, ed. Fürth, No. 582); beans which may be washed with soap (Responsa of YaBeẒ, No. 156); oats for stuffing geese ("Ẓemaḥ Ẓedeḳ," p. 17); the feeding of silkworms with mulberry-leaves on Sabbath ("Yakin u-Boaz," ii. 18; "Bet Yosef" and Shulḥan 'Aruk, Oraḥ Ḥayyim, 324, 12, and other sources), are only a few topics taken at random from the later casuistic literature, in which reference to new plant products, such as sugar-cane, lemons, coffee, tea, chocolate, Indian meal, eggplant, potatoes, tobacco, camphor, and spices, may be traced.

Foreign Plant-Names.

Europe received most of its cultivated plants from the Orient. Some plant-names, like that of the balsam, it returned to the East later; but the Orient also owes many new terms to the Greeks and Romans. The preponderating culture of the former, and the commerce and luxury of Roman life, led the Jews to adopt the names of many plants long before they were known in Palestine. Through the Greeks podded "grains" (pulse) came to the East: the words θέρμος, λόβια, φάσηλος, πίσον, became familiar to the Jews and other Semites, while many fine sorts of fruit were known by the names which the Roman consumer gave them, as, for example, "plums of Damascus" (Δαμασκηνὰ), two sorts of dates (νικόλαος, καρυωτός), a celebrated brand of figs, called φιβάλεως, the fine eating olive (κολυμβάς), etc. The names of the peach (περσικά), the quince (μελίμηλα), the kind of pear known as *Crustuminum pirum*, the cembra-nut (στρόβιλος), and the fruit of the *Cordia myxa* (Linnæus) indicate the influence of the Greeks on the fruit-trees and fruit-markets of Palestine. The cabbage, kale, and mustard (*λαψάνη*) came from Europe; the turnip, carrot (*γογγυλίδια*), parsnip, leek (*κεφαλωτόν*), parsley, artichoke, and sugar-melon are known by Greek designations. The ash (*μελία*), of which three kinds are now found in Palestine, bears a Greek name; even for the indigenous cedar the word *κέδρος* maintains itself; while the wood of the native box-tree is also designated by the Greek word *πύξινον*.

Passages indicating where various plants were especially cultivated abound in the Mishnaic and Talmudic literature; but these belong rather to a description of the agriculture of Palestine than to botany. R. Simon b. Gamaliel, however, shows an accurate knowledge of the special habitats of plants when he says: "Of mountains, the ash is characteristic; of ravines ["ghor"], the date-palms; of water-courses ["wadis"], the reeds; and of lowlands ["shefelah"], the sycamore" (see Tosef., Sheb. vii.; Yer. ix. 38d; Pes. 13a; Bacher, "Ag. Tan." ii. 327; and "Kaftor wa-Peraḥ," p. 107a; Vogelstein, "Landwirtschaft in Palästina," i. 7; Kaplan, "Ereẓ Ḳedumim," p. 34).

Ritual Mention of Plants.

In other passages also R. Simon b. Gamaliel shows an interest in botanical questions (Frankel, "Darke ha-Mishnah," p. 184); and the interpretation of the Biblical צרי as the resin of the balsam-dropping trees ("kaṭof") is said to have originated with him. He determines the length of time between the leafing of the fig-tree and the ripening of its fruit (Tosef., Sheb. xiv. 67; Yer. *ib.* 35d); describes minutely a certain kind of onion (Tosef., Ma'as. R. iii. 85; Yer. *ib.* 52a); declares that rice is not grain (Tosef., Ḥal. ii. 98); allows only the fruit of the palms of Jericho to be offered in the Temple as first-fruits (Tosef., Bik. i. 100); and maintains that there is nothing square in nature, in opposition to which statement it is pointed out that mint, like all labiate flowers, has a four-edged stem (Löw, "Aramäische Pflanzennamen," p. 260). He mentions also (Tosef., Ṭebul Yom, i. 684) a peculiar kind of bean (*nigella*), the leek, and senna (שנונית?).

R. Johanan ben Nuri, a contemporary of R. Akiba, mentions an otherwise unknown inferior and probably only wild grain, the קרמית; and the "ḳurram" or "ḳurreim," still found in Palestine, makes it probable that this was the *Hordeum bulbosum* (Linnæus) (Post, "Flora of Syria," etc., p. 902: "found in grassy places"). According to Johanan, this קרמית makes a dough which is subject to the law of Ḥallah, and may be leavened; but with this view other teachers disagree, each claiming that his opinion is founded on experience (Tosef., Ḥal. i. 97; Yer. *ib.* i. 57a; Tosef., Pes. i. 157; *ib.* Yer. 29a). Rice, too, he tried, though unsuccessfully, to classify as a grain; and this difference of opinion leads to the inference that Indian rice—which was unknown to the Bible, and appeared only after Alexander the Great—was not naturalized in Palestine much before his time (Pes. 35a, 114b; Ber. 37a; see also Rice). Saffron-seed cakes (חלות חריע), usually taken as delicacies before the meal, Johanan would not class as food; consequently they were not to be bought with money from the second tithe, which was reserved for food. His opposition to Akiba extended to still other kinds of spices (Tosef., Ma'as. Sh. i. 87).

Artistic Appreciation.

Nor was the appreciation of the beauty of nature entirely lacking in the time of the Mishnah teachers; for the latter, although engrossed in study, and probably immersed in the explanation of details of sacrificial rites, were so astounded at the wonders of nature—as, for instance, trees, in all their majesty—that they would exclaim: "How magnificent this tree is!" Such direct appreciation of nature had probably become so foreign to that period and its manner of feeling that it was condemned as an interruption of the study of the Law (Ab. iii. 7).

On the other hand, on reviewing the splendors of creation, the Jew is to praise not creation but the Creator; at sight of beautiful human beings or trees he is to extol God, who permits these creatures to exist in the world (Tosef., Ber. vii. 15; Talmud Bab. *ib.* 58b), and who created them (Yer. ix. 13b).

By R. Judah b. Ezekiel of Pumbedita this thought was condensed into the command: "He who walks abroad in Nisan and sees the blossoming trees shall repeat the blessing: 'Praised be He who allows nothing to be wanting in His world: who created beautiful beings and trees, to delight men'" (Ber. 43b and parallels; Ṭur and Shulḥan 'Aruk, Oraḥ Ḥayyim, 226). Closer casuistic details are given by Azulai, who, with a perfect absence of all feeling for nature, adds that this blessing should be pronounced with especially impressive reverence for the benefit of those souls which may be wandering through trees and plants, and that God's mercy should be begged for them ("Moreh be-Ezba'," Nos. 198, 199; Palaggi, "Mo'ed le-Ḳol Ḥai," i. 6–9).

The same command is extended to flowers ("Leḳaḥ Ṭob," in "Paḥad Yiẓḥaḳ," 1, 58a). Instead of choosing the early-blooming almond-tree as the occasion for saying this blessing, one is commanded to wait until other trees are in bloom. The question as to whether this blessing may be pronounced as early as Adar and as late as Iyyar is the subject of casuistic debate (Alkalai, "Zekor le-Abraham," Oraḥ Ḥayyim, 21a; Responsa of Joel Ẓebi Roth Huszt, "Bet ha-Yoẓer" on Oraḥ Ḥayyim, No. 13).

The miserable condition of the roads of the Holy Land, when pilgrims discontinued their annual journey to Jerusalem, was shown in the briers that overgrew the paths (Lam. R., Introduction, 26; [ed. Buber, p. 30]; Yalḳ., Isa. 302; "Leḳaḥ Ṭob" on Lam. i. 4); and it was a pathetic sight to behold weeds growing in forsaken synagogues (Tosef., Meg. iii. 225; Talmud Yer. and Bab. *l.c.*).

Haggadah.

The Biblical idea that just as man extols God for the wonder of His creation, so, too, creation itself praises its Maker, is not lost even in later times. Thus the month of Shebaṭ is said to boast that during its duration "the trees grow higher, open their mouths, and with their leaves praise the living God" (Targ. Yer. Ex. xii. 31). This same poetical thought is reflected also in the "Pereḳ Shirah," where it is applied to the individual phenomena and parts of the creation: "The trees rejoice over Israel's redemption" (Isa. xliv. 23), applied haggadically in Mek., Beshallah, ed. Friedmann, p. 40b. King Og was rude enough to designate Abraham and Sarah as beautiful trees growing by the waterside but bearing no fruit; therefore he was punished by being conquered by the great nation descended from them (Targ. Yer. on Num. xxi. 34). By fruits are meant the Patriarchs; by blossoms, the tribes of Israel (Lam. R., Introduction, 2 [ed. Buber, p. 3]). David, like Moses, a faithful shepherd, reserved the young and tender pasture for the lambs of his flock; the older growth was given to the older sheep, the roots to the fully grown animals, thereby showing his fitness to be a shepherd of Israel (Midr. Teh. on lxxviii. 21 [ed. Buber, p. 357]). God and the Torah are compared to plants; thus the Torah is likened to the fig, the vine, flax, and wheat, while Israel (Ex. R. xxxvi. 1) is compared to all the nobler trees (the vine, fig, walnut, myrtle, olive, apple, palm, willow, and cedar).

There was a dispute as to which of the trees thus compared with Israel furnished the wood for Haman's gallows (Abba Gorion and "Leḳaḥ Ṭob," on Esth. vii. 10 [ed. Buber, pp. 41, 48]). Just as the entire Song of Solomon is symbolical of God and Israel, so, too, are the individual plants mentioned in it, such as meadow-saffrons and lilies. Israel and the peoples of Canaan suggest a vineyard wherein both cedars and briers grow: the former are uprooted, while the latter remain to protect the vineyard (Yalḳ., Judges xli. 8a).

The significance attributed in Ber. 56–57 to various plants (citron, fig, barley, pomegranate, pumpkin, olive, palm, date, reeds, and vines) in interpreting dreams is made to rest on Biblical verses or on a play upon words. Solomon Almoli's collection in his dream-book, "Pitron Ḥalomot," rests partly on Talmudic passages, partly on foreign folk-lore and his own imagination. Thus to dream of spinach is said to signify happiness, riches, and honor; of ginger, honor and renown (see Steinschneider, "Cat. Bodl." No. 6896, 3).

Figurative Uses of Plant-Names.

In a figurative sense the names of certain plants, or, more specifically, fruit-trees, are used to designate similar objects (טלופחא, עדשה, תפוח, לוז של סדרה); see Löw, *l.c.* p. 375; Steinschneider, "Hebr. Uebers." pp. 319, 395; Gen. R. xxviii. 3; "Monatsschrift," xxxviii. 25; Tan., Ḥayye Sarah, ed. Buber, pp. 7, 51.

Metaphors and comparisons from the plant world appear in Talmudic literature continually, and many pass into the most diverse languages and literatures. In man—as the microcosm—the hair is said to represent the woods, while the bones correspond to the trees (Ab. R. N. xxxi., שער = both "hair" and "foliage"; see also Peah ii. 3; Theocritus, "Idyls," i. 131). According to Naḥmanides ("Terumah," 71b), "the holy language always compares all forms with man. That which is at the top is called the head; that below, the feet." Nevertheless, the words "roots," "branches," "stems," and "fruit" are frequently used metaphorically. The human body is likened to the earth; the bones, to the mountains; the hair, to plants (Dieterici, "Die Anthropologie der Araber," 1871, p. 15). "The roots are the soul, the stem is the body," is a Mishnaic saying (Tosef., Sanh. xiii. 434). On the other hand, Arabic philosophy is reflected in Ibn Ezra's dictum on Ps. i. 3 (see "Monatsschrift," xliii. 239), that the most perfectly formed soul is that fruit of the body which is picked at the time of maturity.

The words עקר ("root") and ענף ("branch"), as designating fundamental law and deduced ordinances, are found in Sherira (Neubauer, "Chronique Samaritaine," i. 19), but earlier also in the Mishnaic usage of עקר, meaning the chief matter, as opposed to טפל, that of secondary nature (Sifre, Num. 89 [ed. Weiss, p. 24b]); עיקרו של דבר opposed to סברא דמלתא (Yer. Ber. ix. 13c). "Man is an inverted tree, and a tree is an inverted man," said Aristotle ("De Part. An." iv. 10), and after him all writers of the Middle Ages—Jews, Mohammedans, and Christians. Judah Muskato ("Nefuẓot Yehudah," sermon 15) and Samuel Yafe Ashkenazi ("Yefeh Mareh" on Ber. i. 4), both of the sixteenth century, were familiar with this comparison; but so also was Gershom b. Solomon (see below). The simile is worked out in detail in "Aggadat 'Olam Ḳaṭon" (Jellinek, "B. H." v. 58; see also "Monatsschrift," xiii. 227). "At the time of the resurrection the bones will be drawn from the earth; the hair from trees; the power of life from fire, as was the case at the time of the original Creation" ("Bundehesh," in Spiegel, "Die Tradit. Literatur der Parsen," p. 116). Joseph ibn Ẓaddiḳ ("'Olam Ḳaṭon," p. 22) and Clément Mullet (Introduction to his translation of Ibn Awwâm, p. 22) also say: "Assyrian agriculture sees in man an inverted tree, while, on the other hand, the tree is an inverted man." Of Mohammedans, Kazwini may be mentioned; of Christians, the following passage: "Physicists say man is an inverted tree" (Migne, "Patrologiæ Cursus Completus," Latin series, p. 185, col. 107; Guerricus Abbas, "Sermo," ii.).

Types.

Steinschneider was the first to collect the Hebrew typology of botany (Kobak, "Jeschurun," German ed., viii. 65). To this belong such statements as that mustard-seed grains (גרגר, חרדל) represent the smallest of things in contrast to the largest (כדור העליון, "Zunz Jubelschrift," p. 107), or to ostriches' eggs (Steinschneider, "Hebr. Uebers." p. 16, note 107; *idem*, in "Jeschurun," *l.c.*), or to the ocean ("Monatsschrift," 1879, p. 354, note). Steinschneider understands sesame-seed as representing something very small. Similar usage to represent "nothing," figuratively, is found in many other languages (Hoefer, "Germania," 1873, xviii. 19). Comparisons of cedars and reeds, and instances of the use of the latter as illustrations of weakness, are also found (see Reed).

Expressions to the effect that the soul is the tree, and wisdom its fruit; that wisdom is the tree, and deeds are its fruit; that intelligence without morality is a tree without fruit (Gabirol), and similar quotations ("Naḥal Ḳedumim," p. 34; see Steinschneider, "Hebr. Uebers." p. 882), all come from the Arabic (concerning the "fruit of wisdom" see Steinschneider, in "Zunz Jubelschrift," p. 1, note, and *idem*, "Hebr. Uebers." p. 156).

Of the scientific expressions of the Arabic period of civilization mention may be made of גולם אלוני for "cone" ("Hebr. Bibl." vii. 90 *et seq.*), צורה

אצטרובלית, Judah Tibbon (Steinschneider, "Hebr. Uebers." p. 445, note, where also *al ṣanubri* = בטנים = אצטרובילין; see Barzillai, "Yeẓirah," pp. 222, 347).

The haggadic pictures drawn from the plant world are chiefly types taken from the Bible, such as cedar and reeds, cedar and hyssops, etc. (see the articles under these respective captions).

Man Compared to Trees.

The tree as an emblem of human life is a favorite metaphor in the Bible, and is frequently so used in later literature (L. Löw, "Gesammelte Schriften," i. 67). The upright man is compared in the Bible to the palm and to trees in general. The just man is likened to a tree in a clean place with a branch overhanging an unclean spot; the wicked man, to the reverse (Ab. R. N. xxxix. 119). "Plant" (צמח) is a Biblical word for the Messiah (Heilprin, "'Erke ha-Kinnuyim," *s.v.*); salvation is a quickening anew of all that is green (Cant. R. on ii. 2; Targ. Yer. on Isa. vi. 13); the plant springing from the seed, a picture of resurrection (Num. R. xviii.). The seed is confided to the earth naked; but the latter returns it to man clothed in fruit (Sanh. 90b; Eccl. R. v.; Pirke R. El. xxxiii.).

Of fables, the following may be mentioned: "The Trees and the Iron" (Gen. R. v., end; Sachs, "Stimmen vom Jordan und Euphrat," ii. 111), and "Hadrian and the Old Man Planting Trees" (Lev. R. xxv. 5).

Scientific Botany.

The beginnings of scientific botany, preserved in the Jewish literature of the Middle Ages, consist chiefly of echoes of Aristotle, with now and then information derived from Theophrastus; all of them transmitted through Arabic channels, and especially either directly or indirectly from Averroes (concerning Dioscorides, on whom Asaf relies, see Steinschneider, "Hebr. Uebers." pp. 239, 650). Any one familiar with the fragments of Aristotelian botany contained in Meyer ("Gesch. der Botanik," i. 94 *et seq.*) will in exceptional cases only find anything new in Jewish botanical treatises. The questions of the relationship between animals and plants, of the life of the plant, its soul, its own heat, its nourishment and propagation, occupied the thought of the entire Middle Ages, and are answered in an Aristotelian style. True, in general botany the Arabs did not greatly surpass Aristotle; but in speaking of the Arabian and late Greco-Roman literature, Meyer (*l.c.* iii. 326) rightly says: "The sum of special knowledge concerning plants considerably decreased among the Greeks and Romans, but increased among the Arabians. The Arabs sought in nature itself the plants commended by the ancients, and expended much energy on the criticism of synonyms." In this, Jewish literature made the Arabic its model (see PLANTS); but the literature of synonymy belongs rather to Jewish pharmacology than to botany. In 1197 Pseudo-Galen's "De Plantis" was translated into Hebrew by an anonymous writer from Orange (Steinschneider, "Hebr. Uebers." pp. 142, 972). The book of Pseudo-Aristoteles, "De Plantis," demonstrated by Meyer to have been written by Nicolaus Damascenus, was translated into Hebrew (Steinschneider, *ib.* p. 141). In 1314 Kalonymus ben Kalonymus translated a book on plants containing undoubtedly the entire text of Pseudo-Aristoteles and the commentary of Averroes, with probably the supercommentary by Levi b. Gerson (Steinschneider, *ib.* p. 142; Renan-Neubauer, "Les Ecrivains Juifs Français," p. 83). According to Steinschneider (*ib.* p. 836), a book on herbs in the Vatican consists of an alphabetical list of remedies. A so-called "Book on Plants" is also mentioned by this scholar (*ib.* pp. 359, 743). Macer Floridus' book on botany (about 1161) was also translated into Hebrew (*ib.* p. 809).

Early Books on Botany.

The article on botany in the encyclopedia "Sha'ar ha-Shamayim," by Gershom b. Solomon of Arles (Gross, in "Monatsschrift," xxviii. 126; *idem*, "Gallia Judaica," p. 82; Renan-Neubauer, "Les Rabbins Français," p. 589; Steinschneider, "Hebr. Uebers." p. 9), is probably taken from Averroes' commentary on the Pseudo-Aristotelian book. It treats of the soul of the plant; passes on to consider its nourishment, growth, blossoming, and fructification; and then takes up the influence upon it of the sun's heat, of exposure, and of climate. The hot spices—pepper, calamus, and ginger—grow only under the "second" climate, that is, where it is hot and dry; the sugar-cane under the "fourth," the moderate climate. In France the tropical fruits—figs, olives, and pomegranates—will not grow toward the limits of the "sixth" climate; only the grape endures, for the coldness of this zone can not overcome this plant's natural heat. In England even the grapevine does not survive the "seventh" climate. The herbs, too, are not everywhere the same, each having its particular locality or habitat. Plants are heavy, light, or medium. The lightest and weakest are those of the pulse family, which, therefore, ripen earliest, just as weaker woman matures before stronger man. Barley ripens later, and wheat later still.

Medieval Conceptions.

According to Aristotle, the plant's development keeps pace with the course of the sun, and reaches its highest point when the sun is in Cancer. Averroes distinguishes between perfect and imperfect plants. Some of the imperfect ones are controlled by one or other of the elements; thus, aquatic plants by water, and sponges by the earth. He says also that most plants live longer than animals, for they are more nearly allied to the minerals, and their composition does not contain the great antagonisms found in the animal world. According to gardeners the moon, according to "modern" teachers the stars, exercise a great influence over growing plants. Plants consist of the four elements, but principally of air, as is evident from the small quantity of ashes remaining after they are burned. According to Averroes, however, the earthy constituents outweigh the water in some plants which sink in water, such as ebony. Then follow the division of fruits (based upon the edibility of their interiors or exteriors), a passage on evergreen trees, and one on the colors of plants.

Gershom also contends that plants are green either because standing water assumes that color or because water and black earth combine to form green. Like man, plants, except the upright palm, stand inverted. Therefore, the palm dies if its head, its pinnacle, be cut off. Only palm-trees show a distinction in sex, but there are other fruit-trees that bear no fruit unless other trees of their kind are in their vicinity. Some botanical notes to be found in Gershom are: a short description of the balsam-tree ("Sha'ar ha-Shamayim," p. 20b); of the sunflower (*solsega*); the pumpkin is said to cry out as it grows in the moonlight; the growth of cucumbers should be furthered by blowing the shofar at the time of the setting of the fruit (Duran, "Magen Abot," 36a).

Uses of Plants.

Gershom also says that from one tree come cinnamon (the rind), mace (the blossom), and nutmeg (the fruit); cloves also are said to be buds of the same tree.

Only two original botanical remarks are found in Gershom: First, that seedless fruit-trees and grapes may be cultivated, just as "in our city" (Arles) there is a tree called שרביים ("sorbier"), the fruit of which has no seeds. Gershom alludes to either a definite tree in Arles or to the so-called beam-tree (*Sorbus torminalis*). Secondly, he says: "Not far from us there grows a tree the fruit of which is as large as half a bean and as hard when ripe as a stone, so that it can not be softened by cooking. This fruit seems to mark the transition from the plant kingdom to the mineral kingdom, as do corals, mushrooms, and truffles." Mention, of course, is made of the BARNACLE-GOOSE. The work closes with a description of the various savors of plants and of their admixture.

Duran's Botanical Work.

Simon b. Ẓemaḥ Duran (1444) wrote an exhaustive treatise on the relations between plants and animals ("Magen Abot," 35d, Leghorn). In spite of the poetical passages in the Holy Scriptures speaking of the rejoicing, exultation, or sadness of plants, they have no feeling—possessing, according to Aristotle, only a self-nourishing power. Earth, water, sun, and air contribute to their growth. Differences in plants are due to the varying combinations of the four elements, to heat and cold, to dampness and dryness. They grow (1) from seeds; (2) from the decay of other materials (Anatoli, "Malmad," 5a), as the saprophytes; (3) from water; (4) from slips; (5) or parasitically, *i.e.*, on other plants. In addition to the fable that birds grow on trees, Duran states that in India a woman grows on a tree, falls with a loud cry when she is ripe, and dies. Duran also compares the parts of plants to the organs of animal bodies; classifies them as trees, bushes, herbs, and grasses, as wild and cultivated trees, and as fruit- and forest-trees; and treats of their varying longevity, of sex (the artificial fertilization of palm- and fig-trees, sometimes, however, effected by the wind), of the value of plants as means of nourishment and as remedies, poisons, and odors, and of various plant-juices and their different tastes. The only specifically Jewish reference is the statement that, according to Jewish scholars, there are 1,290 kinds of plants, since every herb has its own particular star, and there are 1,290 stars, not 1,022 as the astronomers maintain (Abravanel on Gen. xv. 5). In the commentary on the "Sefer Yeẓirah" the number of the varieties of plants was estimated at 2,100, corresponding to the numerical value of ארץ: א =1,000; ר =200; ץ =900. The statement introduced by Maimonides ("Moreh Nebukim," ii. 10), "There is no herb on earth without a constellation in heaven that governs it, fosters it, and calls to it, 'Grow on,'" comes from R. Simon b. Pazzi (see Gen. R. x. 6; Bacher, "Ag. Pal. Amor." ii. 473; Löw, *l.c.* p. 6). It is found also in the Midrash Konen; but there an angel is substituted for the constellation (Jellinek, "B. H." ii. 27; "Sefer Raziel," ed. Schwarz; "Tikwat Enosh" on Job xxxviii. 31). Chwolson ("Ssabier," ii. 467) also states: "Every plant has its demon." Such opinions resulted in statements that the number of plant varieties equals that of the stars (so Gerson b. Solomon, and Duran with more detail).

Number of Species.

Naḥmanides relies on Simon's statement to establish a better foundation for the Biblical prohibition against mixing heterogeneous plants (commentary on Gen. i. p. 4c; on Lev. xix. p. 100b; see Löw, *l.c.* p. 6). R. Simon's idea was far too welcome to the spirit of the Cabala not to be continued further. Thus, to mention two extremes: the Zohar reproduces it repeatedly, sometimes in combination with the prohibition of mixed seeds (ii. 15b, 171b; iii. 86a); and Azulai interprets it as follows: "Everything in the world is dependent upon things of a higher scale: even a little blade of grass is related to higher leaves, developed roots, stems, seeds, blossoms, and petals, to height, breadth, length, form; in fact, to everything of higher significance. Even its connection with its angel, and the connection of this angel with his own sefirah, and of this sefirah with the Infinite [*En Sof*], illustrate the fact. So that he who partakes of anything without a benediction, wantonly tears it from its ultimate connection with the Deity" ("Midbar Ḳedemot," letter ב, No. 20; compare letter ע, No. 13). The thought has also penetrated into non-Jewish circles. Thus Paracelsus says: "Every star in heaven is a spiritual growth to which some herb on earth corresponds, and by its attractive power, the star draws on the herb on earth corresponding to it; so that every herb is an earthly star, just as every star is a spiritualized herb" (Friedreich, "Die Symbolik und Mythologie der Natur," p. 193, Würzburg, 1859; Meyer, "Gesch. der Botanik," iv. 430). An Oxford manuscript mentions herbs corresponding to single planets (Steinschneider, in "Monatsschrift," pp. 42, 364).

The Vegetative Soul.

Aristotle's idea of the vegetative soul (הנפש הצומחת) governs almost the entire Arabian and Jewish philosophy (Dieterici, "Die Anthropologie der Araber," 1871, pp. 8, 58, 146 *et seq.*). It is met with in Isaac b. Solomon Israeli (middle of the tenth century; Steinschneider, "Hebr. Uebers." p. 388); in the "Book of Definitions" (Steinschneider, "Zunz Jubelschrift," p. 137); in Baṭalyusi, whose influence on Jewish philosophy is pointed out by Kaufmann ("Al-Baṭalyusi," p. 10 and gate iv. 51); and in Gabirol (S. Horovitz, "Die Psychologie ibn Gabirol's," p. 115, Breslau, 1900), who states in his allegorical exegesis: "Adam signifies the reasoning or human soul; Eve, the living or animal soul; the snake, the desiring or vegetative soul, the lowest grade in animated nature." The seed of Eve is to crush the head of the serpent, while the latter is to smite the heel of the former, illustrating the close and unbroken interconnection between the natural and psychical worlds. Where the animal soul ceases, the plant soul begins: the serpent, typifying the plant soul, gets its nourishment from the dust (Kaufmann, "Studien über Salomon ibn Gabirol," p. 70, Budapest, 1899). Abraham ibn Daud's teachings (Steinschneider, "Hebr. Uebers." p. 369) on plant and animal souls have been concisely presented by Rosin ("Die Ethik des Maimonides," p. 48, note, Breslau, 1876), and exhaustively treated by Guttmann ("Monatsschrift," xxvii. 164). "In plants, as in sleeping bodies," says Ibn Daud, "there is life" ("Emunah Ramah," p. 15). "According to Aristotle, the coral shows the transition from plants to animals" (*ib.* p. 31). He makes special mention of opium and the aloe. Similarly Ibn Ezra speaks of the plant's soul as its nourishing principle for growth and propagation (Rosin, in "Monatsschrift," xlii. 448). Ibn Ezra devotes considerable care to elaborating Gabirol's allegory mentioned above (see Rosin and Kaufmann, *l.c.*). Maimonides characterizes the nutrient function of the soul as corresponding to the plant soul, but does not mention the latter in the first of the "Eight Chapters" (Scheyer, "Das Psychologische System des Maimuni," p. 10; Rosin, "Die Ethik des Maimonides," p. 47). Mose de Leon (thirteenth century) knew of the plant soul (Jellinek, "Mose de Leon," p. 18, note), as did Baḥya ben Asher ibn Ḥalawa, who says: "The soul of reason is immortal, but the animal soul is not, and the plant soul is even farther removed from immortality. The latter is the lowest; therefore Holy Scripture says that earth brought forth the plants, while of animals it says that God created them" (commentary on Gen. i. 12; Bernstein, "Die Schrifterklärung des Baḥya," 1891, p. 63; Arama, "Aḳedat Yiẓḥaḳ," iii. 1, 29b). In comparing man and trees, Aaron b. Joseph, the Karaite, says: "All this on account of the plant soul" ("Mibḥar," 18a). See also Shem-Ṭob ibn Falaquera of the thirteenth century (Venetianer, "A Fokozatok Koenyve," p. 58, Szegedin, 1890; *idem*, "Das Buch der Grade von Shem-Ṭob ben Josef ibn Falaquera," Berlin, 1894); Ḥayyim Vital of the seventeenth century ("Sha'are Ḳedushah," i. 2); Steinschneider, in "Z. D. M. G." xxvii. 557, note; and *idem*, "Hebr. Uebers." p. 903, note.

General References.

Among general references to plants may be mentioned those by Baḥya ben Joseph ibn Pakuda: "Plants created for the perfection and use of man are a testimony of divine wisdom. The love of God caused man to come forth from an original nothing composed of the elements; then to become plant-material, then sustenance which is converted into seed and blood, and finally into life and a living man" ("Ḥobot ha-Lebabot," ii. 4 [ed. Baumgarten, p. 7]; *ib.* ii. 5 [ed. Baumgarten, p. 8a]). Jeshua b. Judah, the Karaite, of Jerusalem (middle of eleventh century), has the following: "The Jews said that if it had not been written in the Holy Scriptures: 'And God said: Behold, I have given you every herb that bears seed, as food,' they would not have been allowed to use herbs and plants for food." Jeshua, however, thinks this opinion untenable, since "plants feel no pain" (Schreiner, "Studien über Jeshua b. Jehuda"). Finally, Judah ha-Levi remarks:

> "Since minerals originated solely through commixture, they do not need the God-granted form necessary to plants and animals, to which a soul has been assigned. The finer the commixture is made, the nobler is its form, revealing more and more of divine wisdom, until it becomes a plant, which possesses a certain degree of feeling and perception. Forthwith it penetrates into the earth, and, nourished by good, damp soil and sweet water, and avoiding their opposites, it grows, and remains standing after having brought forth its kind and produced seed. This seed devotes itself to a similar activity, in accordance with its wonderful intuitive wisdom, called by the philosophers Nature itself—meaning the powers that care for the preservation of the species; for a body that is a composite of various substances can not be preserved indefinitely in its individuality. Nothing possessing only the powers of growth, reproduction, and nourishment has any motion. According to philosophers, these powers are directed by Nature; but in reality, whether ascribed to Nature or soul, force or angel, these successive stages are directed by God. If the commixture is still more refined, and capable of divine wisdom, it will be fit to adopt a higher form than one possessing mere natural power. That is to say, it will be able to obtain nourishment from a distance; in other words, it will possess organic limbs, moving according to its own volition. It will command its members more than plants are able to do, which latter can not protect themselves from harm or seek what is useful, and are played with by the wind. Thus, the animal possesses limbs by which he is transported. The form granted him in addition to the natural life is called a soul" ("Cuzari," v. 10 [ed. Hirschfeld p. 246]).

Knowledge of Botany.

On the necessity of a knowledge of botany, Judah ha-Levi (*ib.* ii. 64 [ed. Cassel, p. 169; ed. Hirschfeld, p. 94]) says: "When a member of the Sanhedrin died, another of equal birth could succeed him, for the sciences were familiar among the people." This was necessarily so, since one needed a knowledge of all the sciences for the complete observance of the Law; of the physical ones, for instance, for the agricultural laws, as in distinguishing mixed seeds, in avoiding the products of the Sabbatical year and of new orchards, and in separating various plants from one another, so that each might be kept with its original species, and that one class might not be confused with another. It is extremely difficult to determine whether Greek barley (*χόνδρος*; see Löw, *l.c.* pp. 104, 164; B. Bahlul, 878; according to Ibn Awwâm, a variety of spelt) is a form of barley, or spelt a variety of wheat, or cauliflower (Löw, *l.c.* p. 214) a variety of cabbage. To do so one must know the qualities and the measure of the spread of the roots in the earth, as well as what does and does not remain over for the next year, in order that one may know how much room and interval of time are to be left between one crop and another.

In a list of foods Meïr Aldabi of Toledo mentions sixty-five plants, only one of which, פלפסין ("egg-plant"), has a grammatical interest. None of these lists has more than a slight value. For years they were ascribed to Galen and Avicenna.

Neither Todros nor Cavaillon wrote on botany (Steinschneider, "Jüdische Literatur," p. 446 [p. 305 of Hebrew edition]; *idem*, "Hebr. Uebers." p. 783; Gross, "Gallia Judaica," p. 539). In his medical work, "Ma'aseh Ṭobiyah," printed in 1697, Tobia Cohen of Metz (Zunz, "G. S." i. 193) also touches on cures, and in one appendix treats of forty plants as foods and remedies; while in another he gives a glossary of simple remedies written in several languages. In the first he mentions the following trees and plants: apple, birch, pear, box, citron, cypress, date, oak, ivy, ash, fig, pine, oak-apple, elder, linden, laurel, mulberry, pomegranate, walnut, olive, poplar, brook-willow, peach, plum, rose, rosemary, elm, sandalwood, tamarisk, fir, willow, vine, וואטיליר חאלין ("juniper"), plane, פיינטין בוים (*Pino salvaticum*, pine-tree).

Tobia Cohen also deserves mention among Jewish botanists because he illustrated a variety of the orchid in his work (p. 143a).

Later Developments.

The superficiality of the barren period between Mendelssohn's death and the appearance of Rapoport is shown in the chapter on botany, said to be written, according to some German text-book on natural history, by Baruch Lindau for his encyclopedia "Reshit Limmudim," Berlin, 1788. He gives a short article on botany in forty pages, and, owing to his lack of Jewish learning, makes mistakes in the Hebrew nomenclature of plants.

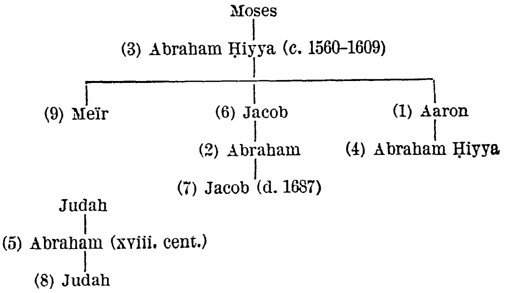
Phineas Elijah b. Meïr of Wilna (Steinschneider, "Cat. Bodl." No. 6753; Zunz, "G. S." i. 196) was more intimately acquainted with the Jewish knowledge of the Middle Ages. He derives his natural philosophy from Hayyim Vital, and describes the three powers of the plant soul; viz., those that nourish, those that promote growth, and those that propagate. He knows that modern botany regards all plants as growing out of the seed, though in many cases this is microscopic in size. He also mentions that plants have male and female organs of reproduction that are sometimes united in the same individual, and sometimes divided between two, in which latter case the wind carries the pollen to the female part, though bees also, in collecting the pollen on their feet, assist in the fertilization of the blossoms they afterward visit.

The microscope discloses the wonders of God in nature, and one sees—as Phineas repeatedly asserts—the whole plant pictured in the seed. Not only is the next generation represented, but, according to some modern botanists, all the later generations lie folded up in the seed from the time of its creation. This, however, has not been proved, and is only a hypothesis. It may be, he says, that each generation produces only the seed of the next. Phineas adopts the latter view, since experience shows that the unripe seed is not capable of propagation, though, in view of the minute wonders disclosed by the microscope, the former can not be called impossible. As he learns from botany that there are 20,000 known plants, while Jewish tradition counts only 2,100, he considers these latter as so many plant *families*, and subdivides these into many classes. Then follow some remarks on plants turning toward the sun. Among the plants mentioned are the sunflowers (זונע בלום) and quite correctly the Talmudic אדאני (should be 'אר) or "mallow." Of the brant-goose he treats earlier in speaking of moving plants, such as the אל תגע בי ("touch-me-not" or "Impatiens"). But the most striking botanical reference is the following (xi. 4f, 63a): "In 1744 it was discovered that when flying insects touch the plant פאליפעם ("polyps"), growing in Europe in pools among reeds and rushes, it folds its leaves together, seizes the insect, and, crushing it into dust, feeds on it." Phineas adds: "How great are the wonders of our God!" For further information on botany, see Folk-Lore, Measures, Names, Plants.

E. C. I. Lö.

BOTAREL (BOTERELLO, BOTRIL, BOTRELLI), MOSES. See Moses Botarel.

BOTON: Spanish family, which immigrated to Salonica, Turkey, in 1492, and which has produced many eminent rabbis and Talmudists. Jews bearing the name are still to be found in Constantinople, Salonica, Safed, and other cities of the East. The following genealogical chart gives the more important members of the family, the figures in parentheses corresponding to the numbers of the biographical notices in the text:



1. Aaron de Boton: Talmudic scholar; rabbi at Gallipoli, European Turkey, in the latter part of the sixteenth century and at the beginning of the seventeenth; son of Abraham Ḥiyya (No. 3).

2. Abraham de Boton: Rabbi at Salonica in the seventeenth century; son of Jacob (No. 6) and grandson of Abraham Ḥiyya (No. 3).

3. Abraham Ḥiyya de Boton: Talmudist and rabbi; born about 1560; died between 1603 and 1609. The name "Ḥiyya" was given him during a dangerous sickness (Ḥiyya = "life"; "may he live!"). He was a pupil of Samuel de Medina, and later dwelt for the most part at Salonica as rabbi and leader of a Talmudic academy. For a time he was rabbi at Polia (Michael, "Or ha-Ḥayyim," p. 95); in 1601 he lived in Palestine (Conforte, "Ḳore ha-Dorot," pp. 47b, 51a); and in 1603 was at Constantinople (Michael, *ib.*).

Even during his lifetime Boton was distinguished as a Talmudist of wide learning and acumen, though he himself did not have a work printed. His chief work is "Leḥem Mishneh" (Double Bread; also Dispute of the Mishnah), Venice, 1609: it bears also the title "Mishneh Torah." It is a commentary on Maimonides' Yad ha-Ḥazaḳah, or Mishneh Torah, especially on those passages which apparently contradict the Talmud. He not only refers to such passages as had been previously noticed, but discovers a large number of others. At the same time Boton endeavors to establish harmony between the seeming discrepancies by every possible method of interpretation. "Leḥem Mishneh" also contains many remarks on "Maggid Mishneh," Don Vidal de Tolosa's commentary on the Yad ha-Ḥazaḳah. The work is now widely spread, and is incorporated with most editions of the Yad ha-Ḥazaḳah that have appeared in the last two centuries. Conforte relates (*ib.* p. 45a) that his teacher Mordecai Kalai told him and other pupils that the "Leḥem Mishneh" was the joint work of Kalai and Boton, who were fellow-students; and Kalai is even reported to have said that most of the observations in "Leḥem Mishneh" were his own. This aspersion loses force through the fact that though Kalai lived in the same city, he never made this claim against Boton publicly.

Another work of Boton's was "Leḥem Rab" (Great Meal, or Great Dispute), responsa, published by his grandson Abraham (No. 4), Smyrna, 1660.

BIBLIOGRAPHY: Conforte, *Ḳore ha-Dorot*, pp. 37b, 43a, 43b, 44a, 45a, 48a, 50b, 51a; Azulai, *Shem ha-Gedolim*, ed. Benjacob, i. 7; Michael, *Or ha-Ḥayyim*, No. 182; Benjacob, *Oẓar ha-Sefarim*, p. 260; idem, *Leḥem Mishneh*, Amsterdam, 1703. The novellæ on *Baba Ḳamma* in Abraham Akra's *Meharere Nemerim* must be the work of another and earlier Abraham de Boton.

4. Abraham Ḥiyya de Boton: Eminent rabbi; born about 1625 at Gallipoli, province of Adrianople; died about 1700 at Jerusalem; son of Aaron (No. 1) and grandson of Abraham Ḥiyya (No. 3). He at one time lived at Smyrna, where he was a member of Joseph Eskapa's college of rabbis, and in which city he published (1660) his grandfather's "Leḥem Rab." Toward the end of his life he settled in Jerusalem, accepting the post of rabbi in the divorce court.

BIBLIOGRAPHY: Michael, *Or ha-Ḥayyim*, No. 40.

5. Abraham ben Judah de Boton: Talmudist of the eighteenth century. He wrote "Maḥazeh Abraham" (The Vision of Abraham), Salonica, 1796, comprising responsa and Talmudic discussions. The work contains some additions by his son Judah (No. 8).

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*, ii. 79.

6. Jacob de Boton: Rabbi at Salonica in the latter part of the sixteenth century or at the beginning of the seventeenth; son of Abraham Ḥiyya (No. 3).

7. Jacob de Boton: Talmudist, and rabbi at Salonica, where his father, Abraham (No. 2), and grandfather, Jacob (No. 6), had held the same position; died there 1687.

Jacob was the author of "'Edut be-Ya'akob" (Witness in Jacob), responsa, published in Salonica, 1720, with a supplement entitled "Liḳḳuṭim" (Fragments), containing Talmudic collectanea and fragments of his lost work on the "Sefer ha-'Ittur" of Isaac ben Abba Mari.

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*, ed. Benjacob, i. 86; Steinschneider, *Cat. Bodl.* No. 5513.

8. Judah de Boton: Talmudist of the second half of the eighteenth century. He wrote some Talmudic essays as an appendix to "Maḥazeh Abraham" (Salonica, 1796), a work of his father, Abraham (No. 5).

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*, ii. 78.

9. Meïr de Boton: Talmudist of the seventeenth century; son of Abraham Ḥiyya (No. 3). Meïr was rabbi at Gallipoli, and wrote a number of works, of which only his responsa were published (Smyrna, 1660), together with some novellæ on the Talmud. Other responsa by Meïr were included in the works of his contemporaries.

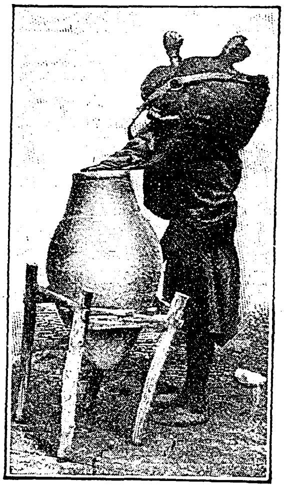
L. G. I. BER.—A. P.

BOTTLE: The Authorized Version (partly after the example of the Vulgate, which uses "lagena," I Sam. x. 3; "laguncula," Lam. iv. 2) introduced the incorrect translation "bottle" for various words that in reality signify "skins for holding liquids" ("ḥemet," Gen. xxi. 14 *et seq.*, for water; "nod," Judges iv. 19, for milk; I Sam. xvi. 20, Josh. ix. 4, 13, for wine; Ps. lvi. 8 [Hebr. 9], for water; "ob," Job xxxii. 19, for wine; "nebel," I Sam. i. 24, x. 3, etc., for wine). The R. V. corrects this only sporadically; compare I Sam. x. 3, margin; Ps. cxix. 83; while in Jer. xiii. 12 the marginal reading substitutes "jar."

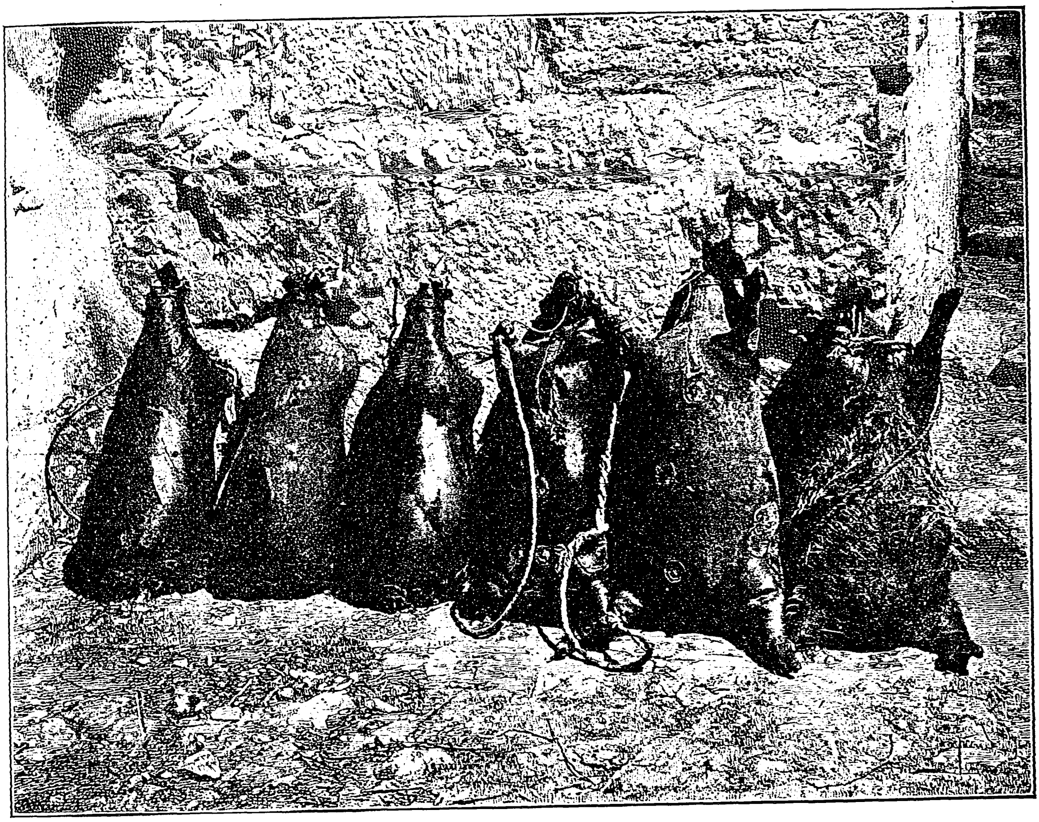


MODE OF FILLING JARS FROM WATER-BOTTLES.
(From a photograph by Bonfils.)

The various words in all these passages have reference to the skin, usually of a goat, sometimes of a sheep, in exceptional cases of an ox. The animal is skinned without making a hole in the body; the four holes where the lower legs have been cut off are closed by being sewn together, while the hole caused by the cutting of the head is bound together and serves as an aperture. The hairy side is frequently the inside, though in other cases it is left outside. To keep the skin tight it is greased or smeared with pitch. (On the habit of smoking it (Ps. cxix. 83) see WINE.) The mending, patching, and tying up, necessary with bursting skins, are referred to in Josh. ix. 4, 13: "bottles old, and rent, and bound up." The easy bursting ascribed to new skins with wine (Job xxxii. 19) is, evidently, due to an error of the text (compare the N. T. saying, Matt. ix. 17 *et seq.*). The further reading is: "like skins filled with new wine, it is about to burst" (see Budde's commentary, *ad loc.*).

The skin is the most practical vessel for wandering nomads, who were probably the first to use it. However, it was in very general use among the classical nations. Its employment still survives to some extent in Spain and Greece, while the custom in the Mohammedan world has in nowise diminished.

It is questionable whether the translation of the Authorized Version is correct in the case of the "bottle [margin for "vessel"] of potters" (Isa. xxx. 14). The expression "nebel" (rendered "[earthen] pitcher," Lam. iv. 2) seems to refer in this passage to a large earthen jar holding perhaps as much as an ordinary skin. From the present knowledge of the vessels for storing wine among the various ancient nations the form of a bottle is certainly excluded. In Jer. xix. 1 (compare 10), "a potter's earthen bottle," the word "baḳbuḳ" (Syriac, *bagbug*, perhaps from a root signifying "to gurgle") seems to mean a vessel with a narrow neck. In I Kings xiv. 3 (A. V., "cruse," margin "bottle") it is used for honey. The Septuagint renders this word, however, by *βῖκος* (a broad jar with handles and narrow neck) and by *σταμνός* (jar). On the other hand, the Greek and Latin words for bottle (*λάγηνος*, *lagena*, etc.) seem to be of Semitic origin. Moreover, the bottle-form, for which glass is specially suitable, was never much used in antiquity, least of all in the Orient. The specimens of Egyptian and Phenician glass bottles that have been found seem, on account of the costliness of glass (compare Job xxviii. 17; "crystal," A. V., parallel with "gold"), all to have been intended for perfumes. No Biblical mention of them is known.



GOATSKIN WATER-BOTTLES, NOW IN USE IN PALESTINE.

BOULÉ (בולי, plural בוליות and בולאות; Greek, *βουλή* = "council"): Court of justice, or Sanhedrin; also the seat of the senate (Josephus, "B. J." v. 4, § 2; hence also בוליוטוס, *βουλευτής* = "senator"; Giṭ. 37a; Sem. viii., "the boulés or senates of Judea"). According to Yer. Ned. iii. 2; Shab. iii. 8; Pesiḳ. R. xli.; Ab. R. N. xx. (ed. Schechter, p. 72), there were twenty-four boulés in the south of Judea, which passed out of existence on account of the general disregard of the sanctity of the oath. Compare SANHEDRIN and PROSBUL.

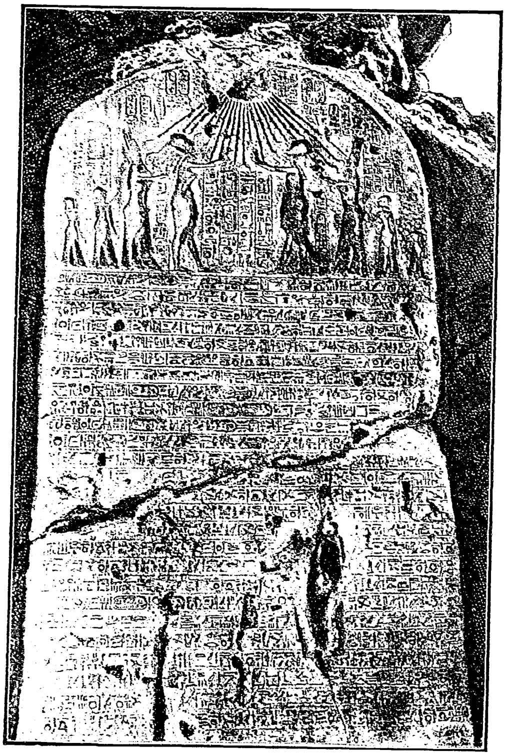
T. K.

BOUNDARIES: Limits of a tract of land. When the Hebrew tribes gave up their nomadic life and settled in Palestine in agricultural communities, the most important matter was the fixing of definite boundary-lines to separate the lands of the different tribes and of the families within the tribes. The importance of this is sufficiently shown in the Book of Joshua (xv.-xxi.), where a careful record is made of the boundaries of the tribes and their families (B. B. 56a).

The Biblical law does not enter upon the details of the law concerning boundaries, contenting itself with expressing in general terms its disapproval of the crime of removing the boundary-marks. Of the important branch of the law dealing with the details of boundary-lines, party lines and walls, fences, and the like, the Bible apparently knows nothing. These form an important part of Talmudic law.

Biblical Law.

The Biblical law solemnly prohibited any tampering with the landmarks: "Thou shalt not remove thy neighbor's landmark, which they of old time have set in thine inheritance, which thou shalt inherit in the land that the Lord thy God giveth thee to possess it" (Deut. xix. 14); and this law became proverbial (Prov. xxii. 28, xxiii. 10).



Boundary-Stone at Tell Arnamia.
(From Steindorff, "Blütezeit des Pharaonenreiches.")

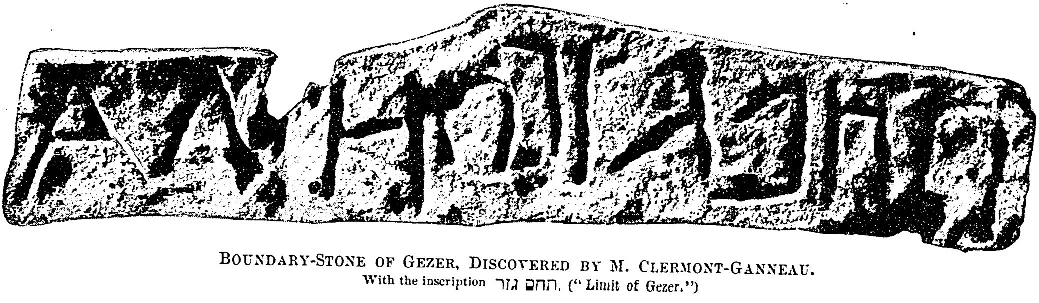
During the time of the Kings the primitive notions concerning the sacredness of the boundary-mark disappeared. The princes were among the first to set at naught the ancient law (Hosea v. 10; Job xxiv. 2). The rabbinical authorities, however, reestablished and enforced it. They appointed surveyors familiar with the boundaries of each estate, to take care that no landmark be removed ("Bar Maḥwanita," B. B. 68; "Meshoḥa'ah," B. M. 107b). The law was likewise inculcated by moral injunction. Sifre (Deut. 188) after quoting the text, Deut. xix. 10, says: "Has the Bible not already said, 'Thou shalt not rob' (Lev. xix. 13)? Why does it now say, 'Thou shalt not remove'? It is to teach that he who uproots the boundary-mark of his neighbor is guilty of two crimes, robbery and removal of the landmark."

Removal Equal to Theft.

In a similar strain Maimonides ("Yad," Genebah, vii. 11) and the Ḥoshen Mishpaṭ (376, 1) say: "He who removes his neighbor's landmark, and thus appropriates a portion of his neighbor's property, be it even a finger's breadth, if he does it with violence is a robber, and if he does it secretly is a thief." Solomon ben Adret decided that a trespasser building on the land of his neighbor may have his house razed because the owner of the ground is not obliged to part with it or "to take money for his inheritance," but may insist upon repossession of his ground (Beër Hagolah to Ḥoshen Mishpaṭ, *ib.*).

The greatest care was, therefore, taken to insure accuracy of measurement in fixing the boundary-lines, especially when a field was about to be sold. The form of conveyance of the field of Makpelah (Gen. xxiii. 17) shows great care in the formal terms, and refers to the "gebul," the boundary-lines of the estate. In Talmudic times, as stated above, official surveyors were appointed. In measuring two fields the surveyor was not permitted to measure the one in summer and the other in winter, because the measuring-line shrinks in summer (B. M. 61b; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 231, 18). In measuring the lines of land to be divided among brothers or tenants in common, the law enjoins great care, because in measuring lands the space of a finger's breadth is as valuable as if it were sown with crocus (B. M. 107b; Ḥoshen Mishpaṭ, *l.c.* 16). The lines and angles of the field had to be described, and in the deed the names of the owners of the adjoining land were given (Ḥoshen Mishpaṭ, 219, 1-5, based on B. B. 62a *et seq.*).

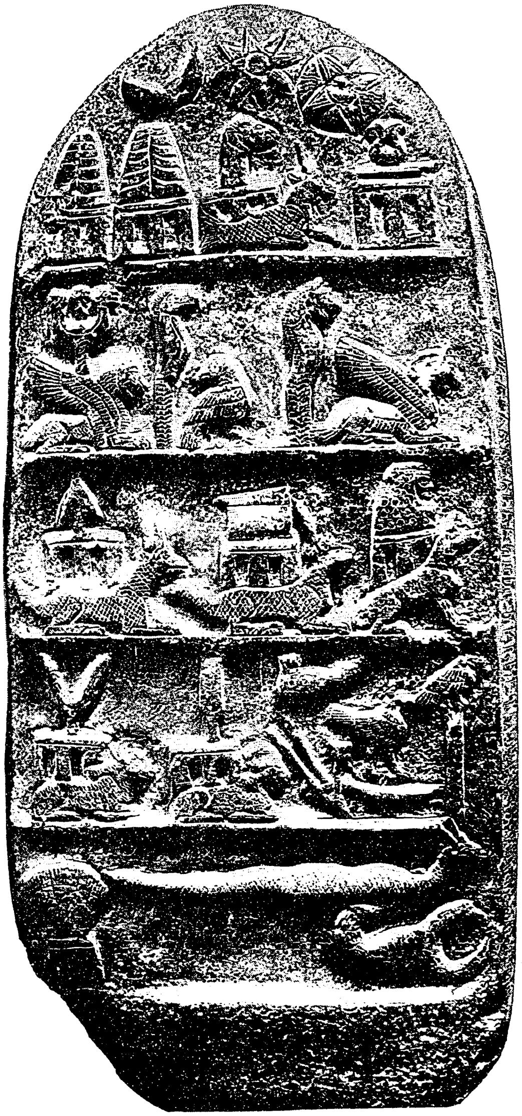
When a division of dwelling grounds held by tenants in common was made, a dividing-wall had to be built of such material as the local custom prescribed. Each of the parties had to contribute one-half of the strip on which the wall was built (B. B. i. 1). When the owners of two adjoining fields desired to build a dividing-fence, they built it on the party line, and each erected a sign on his side to indicate his ownership up to that point (*ib.* 2). If only one of them



Boundary-Stone of Gezer, Discovered by M. Clermont-Ganneau.
With the inscription תחם גזר. ("Limit of Gezer.")

Dividing-Walls or -Fences.

wished to build the fence, he had to build it entirely on his own ground (*ib.*). The owners of fields were not compelled by law to build boundary-fences except where local custom so prescribed, but the owners of gardens were compelled to do so (*ib.*; Hoshen Mishpaṭ, 158, 1). The prescribed height of such fences was ten handbreadths, or four ells (Hoshen Mishpaṭ, *l.c.* 3; "Yad," Shekenim, ii. 16), and the width was determined by the local custom (Ḥoshen Mishpaṭ, 157, 4). Such a fence might not have any opening in it; it must be a dead wall (*ib.*).



Babylonian Boundary Stone, dated 1120 B. C.
(From J. de Morgan, "Recherches Archéologiques.")

Where the boundary-fence was built to separate the lands of tenants in common, which laws had been partitioned, both parties shared the expense; and if the wall or fence fell, the materials were divided between them (*ib.* 3, 5).

The law of party walls in cities was quite well developed, its principles being substantially those prevailing in modern law. A party wall between two houses might be used by both owners: each might dig on his side, and put joists into the wall; but he must take care not to overload it. The weight of the material laid upon it was determined by local regulations (B. B. 6a; Ḥoshen Mishpaṭ, 153, 14, and gloss). If the wall was owned by one of the adjoining owners, the other had not the right to use it (B. B. *l.c.*; Ḥoshen Mishpaṭ, *l.c.* 15); but if he did use it, he might acquire a legal right by prescription (B. B. *l.c.*; Ḥoshen Mishpaṭ, *l.c.* 16).

If the wall was owned by one of the adjoiners, and in building it he had made holes in it on his neighbor's side, this did not give his neighbor the right to use them without the owner's consent. They might have been made as a matter of convenience simply; so that, if the neighbor was permitted to use the wall, he need not cut into it, and thus weaken it (B. B. *l.c.*; Ḥoshen Mishpaṭ, *l.c.* 19). See Easements, Neighbors.

Bibliography: The subject is developed in detail in *Shulḥan 'Aruk, Ḥoshen Mishpaṭ*, 147, 148.

BOURGAS: City of eastern Rumelia (southern Bulgaria) and port on the Black Sea; six hours distant from Constantinople. The Jews of Bourgas came originally from Yambol and Carnabat, the first family settling in 1879. There are a synagogue, a Talmud Torah, and a school for girls, with about 80 pupils, under the management of the Alliance Israélite Universelle. The Presente family of Bourgas is the richest in Bulgaria. In 1901, in a total population of 5,000, there were 550 Jews, mostly Greek.

Bibliography: *Bulletin* of the Alliance Israélite Universelle, 1886, 1892.

D. M. Fr.

BOURGES: Capital of the department of Cher, France. From the beginning of the Middle Ages Jews dwelt in Bourges. It is recorded that in 568, and again in 624, attempts were made to convert them to Christianity ("Gallia Christiana," ii. 13, folio ed., 1716; "Vita Sulpicii," ii., ch. 3). After an interval of more than five centuries, during which little or no trace has been left of their presence in the city, it is chronicled that the French king, Philip Augustus, delivered over to Grand Master Matthew the house of the Jew Isaac Uradis at Bourges (Leopold Delisle, "Cat. des Actes de Philippe-Auguste," No. 121; "Hebr. Bibl." xx. 14). A short time afterward (1204), in a list of the Jews authorized to reside at Châtelet, near Paris, occurs the name of Benedictus Bituricensis, a native of Bourges, as his name implies (Delisle, *ib.* No. 890). Toward the end of the same century the Jews of Bourges had become somewhat numerous, judging from the many entries against their names on the royal tax-list (Lazard, in "Rev. Et. Juives," xv. [not xiv. as given by Gross, *s.v.*] 240, 246, 248, 258), and were in a prosperous condition.

A decree of Philip V. ("the Fair"), issued to the magistrates of the province Jan. 24, 1310, regulated the procedure for the recovery of debts due to Jews within the bailiwick of Bourges (Siméon Luce, "Cat. des Documents du Trésor de Chartres," in

"Rev. Et. Juives," ii. 62) as follows: (1) Suit by a Jew for the recovery of a debt outstanding twenty years or more was prohibited, unless it was established that before the expulsion of the Jews legal steps had been taken for enforcing payment; (2) any record of payment was taken as proof of discharge of the debt; (3) the simple oath of a debtor attested by a single witness, was a sufficient answer before the court from a debtor to his creditor in all cases wherein the debtor was of good repute and the debt did not exceed ten pounds; (4) no Christian debtors of Jews were to be imprisoned if they were willing to mortgage their property for a sum equivalent to their debts; and lastly (5) magistrates were to deal leniently with debtors of Jews appealing from adverse decisions, and were to receive their appeals. We have no record of learned Jews at Bourges. Mention is made of a certain Tosafist (glossarist of the Talmud) (R. H. 24b), Elia b. Solomon of גורגוש, which word may possibly be a mistake for בורגוש, according to the reading of the "Ḳore ha-Dorot," folio 15b.

BOX-TREE (Hebrew, תאשור): Judging by Isa. lx. 13, the box-tree (A. V. "box") is a tree of the Lebanon, promised for the rebuilding of the Temple, together with the "fir-tree and pine." In Isa. xli. 19 there is a prophecy that the fir-tree, the pine, and the box-tree (R. V., margin, "cypress") would flourish in what was then the desert. In Ezek. xxvii. 6 the Revised Version, adopting a better division of the consonants, translates "boxwood from the isles of Kittim" as parallel to fir, cedar, and oak, used for ship-building. In Ezek. xxxi. 3 Ewald emends "the Assyrian" (אשור) to read "a box-tree" (תאשור) ("Behold a box-tree was in Lebanon"). Compare Cornill's Ezekiel, *ad loc.*

The tree in question is called "te'ashshur," a word occurring only in Hebrew. That Aquila and Theodotion simply transliterate the word throws a suspicion on the tradition; likewise that the Septuagint ("cedar," Isa. lx.) evidently makes a poor guess. Symmachus, as well as the Vulgate, wavers between the renderings "box-tree" (Isa. xli.) and "pine" (Isa. lx.). Peshiṭta (*shurbinta*) and Saadia understand that the *sharbin*-tree of modern Arabic is meant. This seems to be the *shurmenu* of the Assyrians, which, according to a geographical list (Delitzsch, "Wo Lag das Paradies?" p. 101), was the characteristic tree of the Lebanon. At present the sharbin of the Lebanon (called a cypress by some, a kind of juniper by others) is a pine-tree, extending its branches widely at a small angle with the stem, and bearing very small fruit-cones (Seetzen, "Reisen," i. 167). I. Löw ("Aramäische Pflanzennamen," pp. 387–388) distinguishes this *Juniperus oxycedrus* or *Phœnicea* from Syriac *sharwaina*, *Cupressus sempervirens* (Targumic *shurbina*, Syriac *shurbinta*, a differentiation which is followed at present by few writers). Hoffmann ("Ueber Einige Phönikische Inschriften," p. 21) tries to assimilate the Hebrew "te'ashshur" with the word "shurbin" by a series of emendations. But for the testimony in form of the traditional view furnished by the Hexaplar, this identification would be acceptable. The identification with the box-tree, on the other hand, is supported by Theodotion and the Targumic *eshkero'a*, which, after the Syriac *eshkar'a*, is the *Buxus sempervirens* (Löw, *ib.* p. 63); not the *Buxus longifolia*, which, besides being too low, is a shrub, and does not occur in Phenicia. The fact that it came from Kittim (Cyprus) does not help toward the solution of the difficulties involved. Possibly both branches of the tradition rest only on the graphic similarity; but with the scanty material at disposal no decision between the two explanations is possible. See Cypress.

BOZECCHI or **BUZECCHI** (בוציקי): Prominent Italian family, the members of which when settling at Rome called themselves after their native place, Buzecchio, in the province Forli. Traces of the family may be found as far back as the thirteenth century. A synagogue built by members of a family of this name existed as early as 1240. By the end of the fourteenth century the name had disappeared and had become incorporated with that of Anaw, of which family the Bozecchis were an offshoot. Four members of this family deserve mention:

1. **Benjamin ben Judah:** Exegete, grammarian, and philosopher; born at Rome about 1295; died there about 1335. He was the disciple of Joab ben Benjamin ben Solomon. Although his activity lay in the fields of exegesis and grammar, the poet Immanuel of Rome represents him as an accomplished scientist and philosopher. He was the author of the following works: (1) a commentary on Chronicles and Proverbs, still extant in manuscript (Codex de Rossi, 308^1, 691, 728^3; Paris, 214^3; Oxford, 221^2, 364^1, 714^3), in which he endeavors to avoid all haggadic explanations, condemning them and adhering to the literal interpretation based upon grammar and lexicography (he frequently quotes Ibn Gannaḥ, Ibn Ezra, and Ḳimḥi, who served him as models); (2) a supplement to Isaiah Trani's unfinished commentary on Kings (Codex Angel 1); (3) glosses to the greater part of the Bible (compare Berliner, in "Hebr. Bibl." xiv. 69); (4) "Mebo," an introduction to a Hebrew grammar which, published with Ḳimḥi's "Mohalak," Pesaro, 1560, enjoyed great success, and was often reprinted.

2. **Judah ben Benjamin:** Physician, probably son of the former; lived at Rome in the fourteenth century. He was the friend of Immanuel, who praises him in his "Maḥberot" (xxii. 94).

3. **Menahem:** Probably an uncle of Benjamin; mentioned by the latter in the glosses to Isa. xxxiii.

4. **Shabbethai ben Menahem:** Praised, together with his father, by Immanuel (*l.c.* xxviii.).

G. I. Br.

BOZRAH (LXX., Βοσορρα and Βοσορ, translated "wall"; Vulgate, "Bosra").—**Biblical Data: 1.** According to Isa. xxxiv. 6, lxiii. 1; Amos i. 12; Jer. xlix. 13, 22, one of the principal cities, or perhaps the capital, of Edom. Gen. xxxvi. 33 (= I Chron. i. 44) states that the Edomite king Jobab, son of Zerah, came from Bozrah; and in accordance with Gen. xxxvi. 42, "Mibẓar" is perhaps to be read "from Bozrah." In Micah ii. 12 "the sheep of Bozrah" has been understood as a proverbial expression for a great multitude; but the term admits of other and more plausible interpretations. Most modern translators understand "Bozrah" here as "sheepfold," while the Septuagint ("in [their] crowd") and the Vulgate ("in the fold") interpret the word as a common noun with a preposition prefixed. Eusebius ("Onomasticon") locates Bozrah "in the mountains of Idumæa." Most probably, therefore, it is the modern village Buṣêra (Buṣeireh), on the road between Ṭufîle (ancient Tophel?) and Shôbek, with fifty houses and some insignificant ruins (Baedeker-Socin, "Palestine and Syria," 2d ed., p. 151).

2. Jer. xlviii. 24 mentions another Bozrah, by the side of Kerioth in Moab, from which it would appear that the place usually known as BEZER is meant.

Care must be taken not to confound with these, as has often been done, the great city **Bosra** (Greek Βοστρα) in the Ḥaurân, the capital of that region during Roman supremacy (when it was called "Bosra Nova Trajana"), and even under Arab dominion. This place now shows considerable Roman ruins. It is mentioned (I Macc. v. 26, 28) as "Bosora," a strong and great city of Gilead, captured by Judas Maccabeus, evidently with the help of the Nabatæans *ib.* v. 25), who at a later period possessed the place.

J. JR. W. M. M.

——**In Rabbinical Literature:** According to some scholars, there was only one Bozrah; and the contradiction in the statements that the city belonged both to Edom and to Moab is explained as follows: The Moabite Bozrah was the birthplace of the Edomitish king (Gen. xxxvi. 33) when Edom no longer produced men fit to be rulers. For this reason also, the Prophets included Bozrah in their prophecies against Edom because that city furnished kings to Edom (Gen. R. lxxxiii. 3). Other scholars, however, among them the Syrian Aphraates ("Homilies," ed. Wright, p. 212), distinguish two cities by the name of "Bozrah," the birthplace of King Jobab thus being Edomitish (Num. R. xiv. 8). Bozrah is Job's legendary birthplace or residence (compare JOB IN RABBINICAL LITERATURE).

L. G.

BOZZOLO, ḤAYYIM OBADIAH BEN JACOB OBADIAH DI: Talmudist and cabalist; lived at Salonica in the middle of the sixteenth century; probably a native of Bozzolo in Italy, wherefore Conforte ("Ḳore ha-Dorot," ed. Cassel, p. 39a) calls him "Di Bozzolo," while Nepi-Ghirondi ("Toledot Gedole Yisrael," ח No. 15) has the name in the corrupt form of דוכם ("Dukes" or "Rukes"), from דיבושל.

Bozzolo was a prolific writer. Many of his halakic decisions are scattered throughout the later responsa. A more extensive work in two volumes, entitled "Be'er Mayim Ḥayyim" (Well of Living Water), the first having the separate title "Eẓ Ḥayyim," the second "Meḳor Ḥayyim," contains cabalistic explanations of the ritual laws (Salonica, 1546).

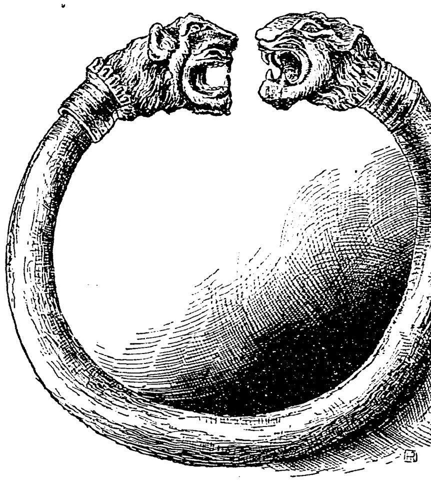
BRACELETS: Ornaments in the form of rings for the arm, worn by the Hebrews, as well as by all ancient peoples. Besides serving as ornaments they were also worn, like earrings and amulets, as a protection against demons (W. R. Smith, "Religion of the Semites," 2d ed., p. 453), and intended to protect the upper arm and the wrist, on which they were usually worn, from wounds. The women commonly adorned themselves thus; but Num. xxxi. 50 and II Sam. i. 10 show that men, especially men of rank, also wore such ornaments. An illustration printed in Layard's "Nineveh and its Remains" (p. 125, ed. 1849) shows that both arms were decorated, as is occasionally the custom with the Arabians to-day (Niebuhr, "Travels in Arabia and the Surrounding Countries," 1778, p. 164). The styles probably varied; and the bracelets may often have been coiled, like a snake (Wilkinson, "Ancient Egyptians," ii. 342; Riehm, "Handwörterbuch," i. 115). Three words for "bracelet" occur in the Bible: (1) "eẓ'adah" (Num. xxxi. 50; II Sam. i. 10), for which Wellhausen proposes to read "haẓẓẹ'adah"; but compare Nestle, "Marginalien," p. 15, who defends the Masoretic text (in II Kings xi. 12 probably "haẓẓe'adot" must be read instead of "ha'edut"); (2) "ẓamid" (Gen. xxiv. 22, xxx. 47; Num. xxxi. 50; Ezek. xvi. 11, xxiii. 42; compare "ṣamadu"—to join, to tie together—which seems to denote the bracelet worn



Gold Bracelet from Cyprus.
(From the Cesnola collection in the Metropolitan Museum of Art, New York.)

around the wrist; while "eẓ'adah" or "ẓe'adah" was worn on the upper arm; compare Gen. xxiv. 30, 47; Num. xxxi. 50); (3) "sherah" (Isa. iii. 19; compare Targum, "shere yadayya," which does not mean "necklaces" but "bracelet," like the Arabic "siwar"). "Sher" in the Mishnah denotes not only the bracelet worn by men and women, but also the chain around the neck of a horse. To these may perhaps be added "rumaz" (Ex. xxxv. 22; Num. xxxi. 50); compare Arabic "kumzat" = little ball, and often meaning little golden balls strung together, which, according to Diodorus Siculus, the Arabs were in the habit of wearing around the wrist. Others take it to mean a kind of necklace, which Diodorus also mentions.

J. JR. W. N.

BRAFMANN, JACOB: Jewish convert to Christianity; born in Russia; died in the last quarter of the nineteenth century. After having tried many professions, among them photography, tuition, and commerce, he embraced Christianity. Supplied with his certificate of baptism, which entitled him to an official position, he was appointed professor of Hebrew in the seminary at Minsk, and at the same time was charged by the Holy Synod to devise means of spreading Christianity among the Jews.

In 1866 Brafmann made his first appearance as a publicist, and at once exhibited the characteristics which made him notorious among the Russian anti-Semites. "In the last years," he says in the "Wilenski Vyestnik" (1866, No. 149), "there is among the Jews of Minsk a great religious movement favorable to Christianity." This remarkable statement at once brought forth many polemics in the Russian press. Anticipating a conversion en masse of the Jews of Minsk, the press investigated the reasons for such an unexpected triumph of Christianity among the Jews. Brafmann, encouraged by this brilliant début, thereupon undertook a systematic campaign of slander against his former coreligionists. He published a series of articles entitled "Yevreiskiya Bratstva v Gorodakh Zapadnoi Rossii," in which he endeavored to convince the reader that there existed in every town of western Russia a Jewish confraternity having for its object the acquisition and exploitation of power over the non-Jews, and possessing unlimited means to carry out this object ("Wilenski Vyestnik," 1867, Nos. 135, 137; reprinted in book form, Wilna, 1869). This series was soon followed by a work entitled "Kniga Ḳahala" (Wilna, 1869). It is divided into four parts: (1) The transactions of the ḳahal of Minsk ("ḳahal," derived from the Hebrew קהל = "community," assumed in Russian the significance of "board of the community"). The documents, which Brafmann claimed to have found in the archives of the board of education of Wilna, extended from 1794 to 1803. (2) Annotations on the transactions, in which the author interpreted them arbitrarily, asserting that all the illegalities contained therein are in constant vogue among the ḳahals, and are in consonance with the very principles of the Jewish religion. (3) Exploitation de jure. (4) Exploitation de facto.

As its author expected, the "Kniga Ḳahala" created a great sensation; and the Russian press devoted many columns to it. But impartial critics dissected the book and discovered that the "transactions" were simple forgeries. Among many proofs of their falsity the most interesting is that given by Shereshevski, who pointed out that a third of the transactions were dated on Saturdays or feast-days, when writing is prohibited.

H. R. I. Br.

BRAGADINI: Family of printers at Venice. After the decline of the Bomberg printing-press a fierce rivalry grew up at Venice among the patrician families who wished to profit by printing Hebrew books. Among these, two distinguished themselves by the bitterness of their struggles, the Bragadini and the Giustiniani. The first of the Bragadini to engage in the trade was **Aloisio I.** Among the consequences of their rivalries were the denunciation of the Talmud and the confiscation of many Hebrew books in 1553. As Giustiniani ceased to print in 1552, Bragadini remained master of the field; even in the beginning of the eighteenth century, Hebrew books could be printed at Venice only under the name and authority of the Venetian nobleman Bragadini ("Stamperia Bragadina"), who received payment in return for his patronage. The first Hebrew book issued by Bragadini was Maimonides' "Mishneh Torah" (Venice, 1550), with notes by Meïr Katzenellenbogen of Padua. When Giustiniani also issued an edition of this work in 1550–51, Katzenellenbogen, who at that time was associated with Bragadini, appealed for protection to Moses Isserles of Cracow, who decided in favor of Bragadini's edition. Aloisio Bragadini continued to print until 1575, his last work being the "Mishneh Torah," published in 1574–75. The first work of his son **Juan** was Abarbanel's Pentateuch commentary, 1579; in 1614 he issued an edition of the Bible. **Pietro Bragadini** printed an edition of the Mishnah in 1614 and another work as late as 1649. The presses were idle from 1631 until 1638, but after 1639 his brothers were associated with Pietro. The following members of the Bragadini family were also printers at Venice: **Lorenzio**, 1615–30, 1639–50; **Aloisio II.**, 1624–30, 1639–50; **Vicenzio I.**, 1639–49; **Nicolaus**, 1639–50; **Giacomo**, 1639–50; **Girolamo**, 1639–67; **Vicenzio II.**, 1697–98, and his brother **Aloisio III.**, who worked alone as late as 1710. The Christian printers in whose establishments work was done for the Bragadini, or the "Stamperia Bragadina" itself printed, were: Gara, Zanetti, Cajon, Pradoto, Vedelago, Doriguzzi, Ambrosini, Bona, and Paoli.

J. A. F.

BRAGANÇA: City of Portugal, in the province of Tras-os-Montes. In 1250 nineteen of the Jews living there were accused of usury. They increased to such an extent that a few years before their expulsion they paid 30,000 reis in taxes. Many of the

Jews that were expelled from Spain went to Bragança, which afterward became the home of a large number of Maranos. Manuel de Pina, Jacob de Castro Sarmento, and others were born here.

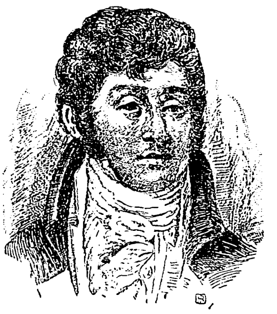
H. R. S. J.

BRAHAM, JOHN (the theatrical name of **John Abraham**): English singer; born in London 1774; died there Feb. 17, 1856. His parents dying in his childhood, he became a chorister at the Duke's Place Synagogue, till one of his former companions in the choir, named Leoni, adopted him. Under him Braham studied and made such progress that on April 21, 1787, he made his début at Covent Garden Theater. Two years later Leoni became bankrupt, and Braham was thrown on his own resources until he met Abraham Goldsmid, a man of wealth who became his patron. Next he went to Bath, where he sang under Rauzzini till 1796, when he was engaged by Storace at Drury Lane Theater to sing in his new opera, "Mahmoud" (April 30, 1796). Here Braham was so successful that he was at once engaged for the Royal Italian Opera House, as well as for the annual oratorios and at the Festival of the Three Choirs at Gloucester.



John Braham.

In 1797 Braham determined to go to Italy to study singing. On arriving at Paris he and Nancy Storace gave a series of successful concerts under the patronage of Josephine Beauharnais, which delayed their arrival in Italy till the following year. There they sang at all the chief cities, including Florence, Milan, Genoa (where Braham studied under Isola, and sang with Marchesi), Leghorn, and Venice, whence they proceeded to Triest, Vienna, and Hamburg.

In 1801 Braham reappeared at Covent Garden, and from this point his career was an unbroken succession of triumphs. On Feb. 9, 1802, was produced "The Cabinet," the libretto of which was written by Thomas Dibdin, and the music by Braham. Then came "The Siege of Belgrade" (March 15) and "Family Quarrels" (Dec. 18, 1802), the work of Dibdin, with the music of Braham, Moorhead, and Reeve, in both of which Braham appeared. On Dec. 13, 1803, he sang in "The English Fleet," the entire music of which was Braham's own composition; in this opera he introduced the duet "All's Well," which has become one of his best-known works. He wrote also the score of "The Paragraph," and on Dec. 10, 1804, sang in "Thirty Thousand," in the production of which he collaborated with Reeve and Davy. On March 27, 1806, he appeared at the King's Theater as *Sesto*, in Mozart's opera "Clemenza di Tito," the first performance of any of Mozart's operas in England.

Braham seceded to Drury Lane in 1805, and produced there most of his operas. Among these were "False Alarms," on the score of which he was assisted by King (Jan. 3, 1807); "Kais," jointly with Reeve (Feb. 11, 1808); "The Devil's Bridge" (Oct. 10, 1812); "Narensky," with the assistance of Reeve (Jan. 11, 1814); "Zuma," in conjunction with Bishop. Of other operas may be mentioned "The Americans," by Braham and King, produced at the Lyceum April 27, 1811, and in which occurred his famous song, "The Death of Nelson"; "Isidore de Merida" (1827), and "The Taming of the Shrew," both in conjunction with T. B. Cooke as librettist, in the following year.

In 1810 he joined Mrs. Billington in a tour of the provinces, and on his return the next year he appeared at the Lyceum. For two years Braham was engaged with Reeve in composing; and in 1816 he reappeared in Italian opera at the King's Theater in Mozart's "Clemenza di Tito," singing his old part, *Sesto*. This opera was followed by "Cosi fan Tutte," by the same composer, in which Braham sang *Guglielmo*. In the same year he married Miss Bolton of Ardwick, in Lancashire.

Braham published, in concert with I. Nathan, "A Selection of Hebrew Melodies, Ancient and Modern," in 1815, for which Lord Byron wrote his famous "Hebrew Melodies."

When Weber's "Freischütz" was first produced in England (at the Lyceum July 20, 1824), Braham created the part of *Max*; and in the same composer's "Oberon," presented at Covent Garden Theater April 12, 1826, he interpreted the part of *Sir Huon*, and was especially strong in the scena "O 'tis a glorious sight to see!" written expressly for him.

Braham was also actively engaged at concerts, oratorios, and provincial festivals, and for more than a generation was regarded as the national singer. His voice was of extraordinary power, sweetness, and compass (19 notes in natural tone, with a falsetto ranging from D to A in alto). Though he could sing in faultless style and taste, rarely did he resist the opportunity for sensational effects.

Braham amassed a large fortune during his forty years of professional life; but he subsequently lost it by disastrous speculation. In 1831 he bought the Colosseum in Regent's Park, London, and four years later he built the St. James's Theater. Both ventures proved ruinous; and in 1839 Braham found himself compelled to return to the stage and concert-room. In 1840 he went to America on a tour which proved unsuccessful. For several years Braham continued to sing at concerts and provincial festivals, and he did not retire until March, 1852.

BRAHE, TYCHO. See Gans, David.

BRAHM, OTTO (Abrahamsohn): German dramatic critic and manager; born in Hamburg Feb. 5, 1856. He studied philosophy, German philology, and the history of art, at Berlin, Heidelberg, and Strasburg, and was a pupil of Wilhelm Scherer, the historian of literature. Among his writings are "Das Deutsche Ritterdrama des Achtzehnten Jahrhunderts" (1880), and biographies of Gottfried Keller (1883), H. von Kleist (1884, 3d ed., 1892), Ibsen (1887), and Schiller (1888–92). Interested in the modern so-called "naturalistic" school, he, in conjunction with several others, established Die Freie Bühne, a society designed to promote the production of the works of Ibsen and his associates.

In connection with this society, Brahm published a periodical also entitled "Die Freie Bühne," in which he defended the views of the modern naturalistic school. Upon the retirement of L'Arronge from the directorship of the Deutsches Theater it was leased to Brahm, who, with a very good cast, began to produce the works of Ibsen, Gerhard Hauptmann, Sudermann, Halbe, and Hirschfeld. Gerhard Hauptmann's "Die Weber" was performed more than one hundred times at this theater.

BRAILA. See Rumania.

BRAILOV: Town in the district of Vinitza, government of Podolia. The population at the census of 1897 was 8,972, including 3,924 Jews. Of the latter a few are engaged in agriculture, the pursuit of which was nearly closed to them by the laws of 1882. Three hundred and eighty-nine Jews are engaged in manufacturing peasants' shoes, which are sold at the markets of the Kherson and Bessarabian governments. The economic condition of these Jews is getting worse every year, as may be seen by the increasing number of families asking for charity at Passover (120 families in 1898). Fifty children attend the Talmud-Torah.

S. S. J.

BRAININ, RUBEN: Hebrew publicist and biographer; born in Russia in the last half of the nineteenth century; is now (1902) living in Berlin. At different times Brainin contributed to "Ha-Meliẓ," "Ha-Ẓefirah," "Ha-Maggid," and "Ha-Shiloaḥ." In 1895 he issued a periodical under the title "Mi-Mizraḥ u-Mi-Ma-arab" (From East and West), of which only four numbers appeared.

Brainin is the author of several pamphlets, the most important of which are his sketch of Pereẓ Smolenskin's life and works, Warsaw, 1896; and a translation of M. Lazarus' essay on Jeremiah, Warsaw, 1897. He has also written about one hundred biographical sketches of modern Jewish scholars and writers.

To "Aḥiasaf" Brainin has contributed the following articles: "Ilane Sraḳ" (Barren Trees) (i. 32); "Bar Ḥalafta" (ii. 71); "Dappim Meḳuṭṭa'im" (Loose Leaves) (v. 120). He has also contributed to the same periodical the following biographical sketches: M. Lazarus (iv. 214); M. Güdemann (iv. 219); Theodore Herzl (v. 222); Israel Zangwill (v. 233); and Max Nordau (v. 247).

H. R. I. G. D.

BRAININ, SIMON: Russian physician; born at Riga, Livonia, July 15, 1854. He graduated from the gymnasium of his birthplace; studied medicine at the universities of Dorpat and Berlin; held the position of physician of the Jewish community of Riga; and was one of the directors of the community, the last independent Jewish "kahal" in Russia, until this institution was abolished by the government. He was a member of the committee of the government to investigate the rights of the Jews of the city of Riga, 1885; delegate from the government of Poltava to the rabbinical conference at St. Petersburg, 1892; and a member of the Society for the Promotion of Culture Among the Jews of Russia. In 1895 he emigrated to New York, where he is now (1902) a practising physician, and member of the county medical and German medical societies, of the Harlem Medical Association, and of the New York Historical Society. Brainin is the author of: "Oraḥ la-Ḥayyim," a work on popular medicine, in Hebrew, Wilna, 1883; "Der Aerztliche Führer," Riga, 1885; "Ueber Kefyr," Vienna, 1886; and many articles in various periodicals. H. R.

BRAMBLE: A prickly shrub. The word serves as a translation for two Hebrew terms and a Greek one, all of which, however, should receive other renderings.

(1) "Aṭad" (אטד = the Assyrian "eṭidu") figures in the parable of Jotham. It is the last tree to which the other trees came in quest of a king for themselves (Judges ix. 14, 15). In Ps. lviii. 10 "aṭad" is translated "thorns" (compare Gen. l. 11, "goren ha-aṭad"). The plant is one of the rhamnus group.

(2) "Ḥoaḥ" (חוח) is only once translated "bramble"; elsewhere it is rendered "thorns."

(3) Βάτος, out of twelve times that it occurs, is once translated "bramble" (Luke vi. 44). See Thorns and Thistles.

E. C. G. B. L.

BRAMSON, LEO: Russian jurist and writer; born at Kovno April 17, 1869; graduated from the Moscow University as a "candidatus juris." He is a member of the St. Petersburg Pedagogical Society, secretary of the Jewish Colonization Association (St. Petersburg branch), initiator and member of the school committee of the Society for the Promotion of Culture Among the Jews of Russia, of the St. Petersburg Jewish industrial schools, member of the Educational Census, 1895–1900, and of the Imperial Free Economic Society. He was also the delegate of the Society for the Promotion of Culture Among the Jews to the Pan-Russian Exhibition of 1896, and one of the directors of the reorganized Jewish industrial schools of St. Petersburg.

He wrote: "O Razvitii Russkoi Industrii," Moscow, 1896; "V Yuzhnykh Yevreiskikh Koloniakh," St. Petersburg, 1894; "K Istorii Pervonachalnavo Obrazovaniya Russkikh Yevreyev," St. Petersburg, 1896; as well as many articles in "Voskhod" (1891–1900) on education and Jewish colonization. He was one of the editors of the "Sistematicheski Ukazatel Russkoi Literatury o Yevreyakh, 1708–1889," St. Petersburg, 1892.

H. R.

BRANDAM, FERNANDO ALVAREZ: Marano and physician at Lisbon in the seventeenth century; contemporary of Manuel Fernandez de Villa-Real, who characterizes him as "insigne y illustre ingenio." At the instance of his friend Isaac Fernando Cardoso, he wrote his "Tratado em Defensa del Color Azul," still extant in manuscript, which shows wide scholarship.

Bibliography: Barbosa Machado, *Biblioteca Lusitania*, ii. 17.

BRANDEIS, BARUCH JUDAH (HA-LEVI): Bohemian rabbi and author; lived in the second half of the eighteenth and the beginning of the nineteenth century at Prague, where he was assistant rabbi (dayyan). He was the son of Bezaleel Brandeis, rabbi in Jung-Bunzlau, whose work, "Ẓedah-Baruk," he published. Brandeis wrote "Leshon Ḥakamim," Prague, 1815, in two parts, a work intended as a reference-book on regulations governing the reading of the Torah, ḳaddish, burial of the dead, and mourning observances. The book, however, is incomplete and fragmentary, and is written in a heavy, ambiguous style.

Bibliography: Fürst, *Bibl. Jud.* p. 129; Steinschneider, *Cat. Bodl.* col. 799.

L. G. I. Ber.

BRANDEIS, BEZALEEL BEN MOSES (HA-LEVI): Bohemian rabbi and author; died about 1750 at Jung-Bunzlau, where he was district rabbi and director of a Talmudic academy. His father, who was styled "Ḥarif" by his contemporaries, was rabbi at Mayence, Germany. Bezaleel wrote a collection of festival sermons and homiletic explanations on the Pentateuch, a work published at Prague in 1786 by his son, Baruch Judah Brandeis, and entitled "Ẓedah-Baruk."

Bibliography: Steinschneider, *Cat. Bodl.* No. 4590; Benjacob, *Oẓar ha-Sefarim*, p. 506; Fürst, *Bibl. Jud.* i. 129; Baruch Judah Brandeis, *Leshon Ḥakamim*, Preface.

BRANDEIS, FREDERICK: Musician; born at Vienna July 5, 1832; died at New York May 14, 1899. He studied at the University of Vienna, and received instruction in the piano from Fischhof, Czerny, and Pyrkert, and in composition from Rufinatscha. During the Revolution of 1848 Frederick's father, Emanuel Brandeis (afterward a prominent teacher in New York; died 1873), lost his fortune and emigrated to America. There the son was at once thrown upon his own resources. His talents, however, secured for him the recognition of artists; and he soon received engagements as a pianist, in which capacity he made several tours throughout the country, notably one with William Vincent Wallace, the famous violinist, in 1849.

In about the year 1850 Brandeis settled for a short time in Cleveland, Ohio, but a few years later removed to New York, where he devoted himself assiduously to composition. There, also, he formed the friendship of Julius Schuberth, the well-known publisher, who gave him great encouragement, and sent some of his earlier efforts to Schumann and Spohr, both of whom expressed themselves in highly laudatory terms in regard to the young composer. About this time he played a sonata of his own composition at one of the chamber concerts given by Theodore Thomas. In 1860 he received the appointment of organist at the Church of St. John the Evangelist, and, upon the destruction of that church by fire in 1872, a similar position was offered to him at St. James's Roman Catholic Church, which he held until 1886, from which time until his death he was identified with the Church of St. Peter and St. Paul. Brandeis was also organist of the synagogue Shaaray Tefila (West 44th St.) from 1879 to 1892, and composed six hymns for the synagogal service. He was a member of the Manuscript Society from its inception; and several of his productions were performed under its auspices, among which the song, "Fly Not Thus, My Brow of Snow" (words by Heine), received the prize offered by the society for the best composition.

Brandeis produced 104 works in all, of which the following are generally considered the most popular: song, "My Love Is Like the Red, Red Rose" (words by Burns), a beautiful composition which immediately became popular upon its publication in the early fifties; trio for violin, piano, and cello; funeral march, "Humpty Dumpty," for orchestra (also arranged for piano); "Danse Héroïque," for orchestra; polonaise for piano, op. 52; gavot for piano, op. 53; "The Ring," op. 58, ballad for soli, chorus, and orchestra; the quartets "Sunken Cloister" and "Echoes," op. 64; song, "Wunsch," op. 36; "Observe When Mother Earth Is Dry," drinking-song from "Anacreon."

The religious music composed by Brandeis includes the above-mentioned "Six Hymn-Anthems," op. 85 (quartet or chorus); "Vespers," op. 92, for soli, chorus, and organ; and "Tantum Ergo," op. 63. Among his other works may be mentioned: "Prelude to Maria Stuart," for orchestra (performed by the Manuscript Society); suite for string orchestra; "Sechs Klavierstücke"; and "The Bards," duet for tenor and bass, with orchestral accompaniment. In conjunction with F. de Sola Mendes as librettist, he was writing an oratorio, "Moses in Egypt," when he died.

S. J. So.

BRANDEIS, MOSES (surnamed **Ḥarif** = "The Keen Talmudist"): German rabbi and Talmudic teacher; born about 1685; died June 24, 1761, in Mayence. As his surname indicates, he was famous in his time as a Talmudic dialectician, but he left no writings. His father, Jacob Brandeis, was rabbi in Zorek, Russia Minor (perhaps Zaryechye in the province of Poltava; see Walden, "Shem ha-Gedolim he-Ḥadash," i. 61). Moses studied at the yeshibah of Abraham Broda in Prague, and then directed a yeshibah in Fürth, Bavaria, which was supported by his father-in-law, Gabriel ha-Levi, a rich philanthropist of that place. At the same time he performed the functions of a rabbi at Schnittach, a small place near Fürth. In 1717 he went to Jung-Bunzlau, Bohemia, as chief rabbi, and in 1733 became rabbi of Mayence. Moses was also a cabalist, observing strictly the rules of life laid down by Isaac Luria.

His sons were: Bezaleel Brandeis; Gabriel Brandeis, rabbi in Prague; and Jacob Brandeis, rabbi in Düsseldorf.

BRANDENBURG: Province of Prussia. In documents of the thirteenth century Jews are mentioned as living in the mark of Brandenburg and carrying on commerce there. In Belitz they were accused of having desecrated the host in 1243; and a similar charge caused a persecution at Pritzwalk in 1287. In 1294 the magistrate of Frankfort-on-the-Oder issued an agreement between the butchers and Jews of that city. So many Jews were living at Stendal by 1297 that a special Jews' regulation was issued. The Jews of Spandau are first mentioned in 1307, in a regulation regarding slaughtering issued by the margrave Herrmann; and Jews are similarly mentioned at Brandenburg and Eberswalde in 1315. In 1320 the margravine Agnes transferred to Berlin and Cologne her rights over the Jews in those cities, and in the same year the dukes of Pomerania did the same in regard to Prenzlau. The Jews' tax was regulated at Neu-Ruppin in 1323.

Early Settlements.

The Jews of the mark were highly favored, and their number was greatly increased under the rule of the Bavarian margraves, especially under Ludwig (1323-51). The latter gave letters of protection to the Jews at Havelberg, Arneburg, Pritzwalk, Seehausen, Werben, and Kyritz in 1334, to those at Salzwedel in 1344, and to those at Perleberg in 1345. In 1346 he granted to the butchers of Strausberg certain privileges in regard to slaughtering among the Jews. In 1348 the margrave enfeoffed a citizen of Luckau with the Jews of Guben, and pledged the Jews of Luckau with him for 150 marks silver. In 1349 the Jews of Berlin, Stendal, Angermünde, and Spandau were severely persecuted by the Flagellants, among whose victims were the rabbis Joseph and Solomon, sons of Rabbi Jacob. The Jews were driven from Königsberg in 1351. Margrave Ludwig pledged the Jews of Müncheberg with the city in 1353; in 1356 he permitted the city of Mittelwalde to receive four Jews; Margrave Otto allowed the city of Rathenow to keep two in 1371. A Jews' street is mentioned at Stendal as early as 1369; Jobst of Moravia presented the site of the former Jews' school at Salzwedel to the Georgeshospital of that city in 1401.

Under the Hohenzollerns.

The privileges that Margrave Ludwig had granted were confirmed in 1420 by Friedrich I., the first prince of the house of Hohenzollern, at Brandenburg. Conditions changed under his successors. In 1446 all the Jews of the mark were suddenly imprisoned at the command of the elector Friedrich II., and their property was confiscated. In 1509 thirty-eight Jews of Spandau, Brandenburg, and Stendal were accused of having bought a host from a thief of Bernau, and were burned at Berlin; the remainder were expelled from the country. The elector Joachim II. again admitted several Jews in consideration of 400 marks, and 3,000 marks silver paid annually to the mints at Berlin and Stendal respectively for protection. He especially favored the Jew Lippold; but his successor had Lippold executed on the pretense of having poisoned the elector, and again expelled the Jews. In 1671 fifty Jewish families, who were among the emigrants from Wiener-Neustadt, were granted permission to reside in the mark for a space of twenty years by the great elector Friedrich Wilhelm. They were exempted from the poll-tax on the payment of 400 thalers in 1684. In 1685 they numbered eighty-six families; there were 116 families in 1690; and in 1692 they had increased to 177. In 1714 King Friedrich I. issued new regulations for his protected Jews, who by that time had obtained permanent residence.

In the beginning of the eighteenth century (1703) they were much harassed on the accusation of having reviled the founder of the Christian religion in their prayers. The General Regulations for the Jews ("General Juden-Reglement") of the year 1750 contained a clause to the effect that every protected Jew should take the oath of allegiance. In 1765 the question of increasing the payment for protection was considered. Toward the end of the Seven Years' war, and later, a number of influential and wealthy Jews were granted, free of charges, the same rights as Christian merchants, on account of their services to the state. Frederick the Great used the Jews arbitrarily for his purposes. In 1779 the Jews living in the mark numbered 5,782, of whom 3,409 came from Berlin. In 1899 they numbered 18,394. See also Berlin; Prenzlau; Prussia.

G. A. F.

BRANDES, CARL EDUARD COHEN (generally known as **EDUARD BRANDES**): Danish author and politician; born at Copenhagen, Oct. 21, 1847; brother of George Brandes. At the age of eighteen he entered the university of his native city, and at first diligently followed courses in Oriental and comparative philology, devoting himself especially to the study of Persian and Sanskrit. His taste for dramatic art, however, soon got the better of his philological pursuits, and upon graduation from the university he gave himself over entirely to writing, beginning his new career by the translation of two dramas from the Sanskrit. Gradually he developed an intense interest in politics, and while he continued to devote himself with undiminished enthusiasm to dramatic art and criticism, he plunged into an active political life, which resulted in his election in 1880 to the Folkething by the Democrats of Rudkjöbing. About this time appeared his volume of character-sketches and studies on Danish dramatic art, "Dansk Skuespilkünst," Copenhagen, 1880, followed by a series on foreign dramatic art, "Fremmed Skuespilkünst," *ib.* 1881.

Brandes wrote a number of excellent plays, the chief merit of which lies in the psychological analysis and clever delineation of the characters involved. The following were the most successful of his productions that were performed on the Danish stage: "Lägemidler," 1880; "Gnygende Grund," 1882; "Et Besög," 1882 (a second edition of this play was published in 1884, and was later translated into German by Hoffory, Berlin, 1889); "En Forlovelse," 1884; "Et Brud," 1885; "Kjärlighed," 1887; "Overmagt," 1888; "Under Loven," 1891; "Asgerd" and "Mohammed," 1895; "Primadonna," 1901; besides his dramatization, in 1883, of the Norwegian novel "Garman and Worse" by A. L. Kjelland.

Brandes is also the author of a novel, "En Politiker," 1889, and of a political review, "Fra '85 till '91," 1891, both of them reflecting the same ultraradical opinions that he as a member of the extreme left (opposition) was accustomed to express in the Chamber of Deputies. His openly professed atheism gave rise to a much-discussed incident. Upon the election of Brandes to the Folkething the president of the Chamber deemed it proper to address the new member through the channels of a newspaper, asking him if his religious views stood in the way of his taking the customary oath. Brandes, while indignantly protesting against this intrusion upon the privacy of his personal views, expressed a willingness to comply with the custom. Until December, 1883, he published, in collaboration with Hörup and Berg, the "Morgenbladet," the organ of the democratic party. He was also connected with the publication of the "Nineteenth Century," a review of which his brother Georg was the editor-in-chief from 1874 till 1875. Since Feb. 1902 he has been sole editor of the daily "Politiken."

S.

BRANDES, ERNST IMMANUEL COHEN: Danish economist; born at Copenhagen Feb. 1, 1844; died there Aug. 6, 1892. He was a brother of the critic Georg Brandes and of the author Eduard Brandes. His avocation was that of banker, but he retired soon from that pursuit and devoted himself to journalistic work. Articles on banking were written by him in "Politiken," "Tilskueren," and, during the last years of his life, in "Börstidningen," of which last he was the editor. In 1885 he published an extensive work on social questions, entitled, "Samfundsspörgsmaal," published in two parts, of which the first part treats of Malthus' "Essay on Population," and the second of the theory of value and other economic and social questions. This latter part especially is characterized not only by its clear and elegant style, but also by views differing from the current economic ideas and bearing the impress of the author's individuality.

S.

BRANDES, GEORG MORRIS COHEN: Danish author and critic; born in Copenhagen, Denmark, Feb. 4, 1842. He graduated in 1859, and for a short time studied law, but soon determined to devote his life to literature and philosophy. Brandes gained the university gold medal for his essay "The Idea of Fate Among the Ancients," in 1863; and the next year he took the degree of "candidatus magisterii." He spent the years 1866–67 in Paris, and was in Germany during 1868. From 1865 onward he had been in the midst of the conflict that raged around the burning questions of the day raised by Sören Kierkegaard and the Neo-Hegelians. Brandes entered into a three-cornered controversy between Bishop Martensen representing orthodoxy as against Rasmus Nielsen with his attempted harmonization of science and faith, and Bröchner on the side of science and philosophy. Brandes sided with Bröchner, whom he called his master, and expressed himself in a pamphlet entitled "The Dualism in Modern Philosophy" (1866). The authorship is Brandes', but the ideas in it are not his own only, but also those of a group of younger men, who had chosen him as their spokesman. The pamphlet reveals Brandes as a declared advocate of free thought and as a radical opponent of the current thoughts of the day; it maintains the impossibility of squaring orthodoxy with science and philosophy, and shows the trend of Brandes' future work.

Georg Brandes.

The Martensen-Nielsen-Bröchner Controversy.

In esthetics he did not attain self-consciousness so quickly. For many years he could not liberate himself from the ruling esthetic ideas of the day—those of F. W. Hegel and P. A. Heiberg, H. Hertz, and Hostrup. Here it was French poetry and criticism that brought him freedom and clearness of thought. His practical philosophy, which was utilitarian and naturalistic, came from John Stuart Mill, whom he knew personally and greatly admired, and from positivism. His method of literary criticism he got from Hippolyte Taine; but its color is a reflex from Musset, Merimée, and St. Beuve.

Studies, controversies, and natural growth brought Brandes maturity; and in 1870 he took his Ph.D. degree, his thesis being "The French Esthetics of Our Day—An Essay on Taine." He left Denmark immediately after and spent 1870–71 abroad, visiting Taine, Mill, and Renan. When he returned in the fall of 1871 he was a mature thinker, a realist, and a literary revolutionist, entirely free from theological ethics, metaphysics, and romantic notions in esthetics. But Brandes was and is more than a radical. That he is a reformer in the best sense is proved by his constant demand for truth, by the evolution of his genius, and by his strong personality. His history has proved the need of just such a person in the Danish community and in the north in general.

His "Main Currents."

In the autumn of 1871 he began his famous series of lectures, "Main Currents in Nineteenth-Century Literature." Brandes talks much about foreign literature, but aims always at the Danish; charging it justly as being childish, insignificant, and disconnected with universal literature. As reasons for the decay, he points frequently to the political degradation of the country, and shows how it has stood still outside the main currents of civilization and has failed in originality. The charge of lack of originality is not quite correct. Brandes fails altogether to recognize the value of the revival of the Old Norse, as that, for instance, was brought about by Öhlenschläger and Grundtvig. He ridicules the prevailing German and Thorvaldsen ideas of antiquity, the northern family life and sex prudery, the state church, and he defines all things as mere products of climate, time, and race. But he also shows how completely modern life has broken with orthodoxy and romanticism. He fights for "free thought in research, and full sway of the human in art."

Altogether, the lectures were a bold presentation of French radical realism in all its strength and weakness. They aroused an enormous opposition from among the orthodox and reactionary, but gave Brandes a large following, especially of younger students and academic citizens, who understood the necessity of turning their thoughts into the universal currents. Brandes defended himself brilliantly in special pamphlets and in "Nyt Dansk Maanedskrift," which he edited together with Vilhelm Möller, and later in "Det Nittende Aarhundrede," which he, together with his brother Eduard, edited from 1874 to 1877. Brandes represents the introduction of the scientific method into the study of literature, and the exclusion of the then current so-called moral and esthetic standards represented by the Church, narrow-minded lawgivers, social conventionality, and political trammels. Though the lectures suffered considerably from loose statements, false views, and misrepresentations of historic facts, and though Brandes was not always true to his own genius, they nevertheless made him the father of modern Danish literary and art criticism, and carried his influence throughout the entire north.

Considered "a German of the Germans."

In 1877 Brandes published a literary characteristic of "Sören Kierkegaard" and a masterly psychological treatise on "Danish Poets." In the same year he left Denmark and settled in Berlin. For the time being he had become tired of polemics, and was chagrined because the university had refused him the chair in esthetics, left vacant by the death of Hauch. His farewell was an ovation and a triumph. In Berlin Brandes was considered "a German of the Germans," and he put himself in perfect rapport with German "Kultur." He contributed to the magazines, wrote several monographs, such as "Lassalle" (1877) and "Disraeli" (1880), and edited a German edition of his "Main Currents."

In 1882 he returned to Denmark on the invitation of friends who had provided funds for a professorship for him. Conditions proved favorable, and he saw the seed he had sown in literature, art, and politics bearing good fruit. In fact, Danish politics had assumed a character in perfect harmony with his teachings, which result must be ascribed largely to his own influence and to that of his brother Eduard. But Brandes himself was a different person. He was as fiery and many-sided as before, but he paid more attention to the personality of his subjects than formerly, and tried less to represent them as results of the natural environment. The new views appear in lectures delivered at the university and published under the title "Young Germany" (1890); in books like "Modern Representative Men" (1883); "Ludvig Holberg" (1884); "Impressions of Russia" (1888); "Impressions of Poland" (1888); and several collections of essays of the same period. In all these studies can be seen how the influence of Mill and Taine has vanished, and how Brandes' independent study of Lassalle, Renan, Goncourt, Nietzsche, and others has transformed him and created in his mind an appreciation of personality previously entirely lacking.

Proclaims Himself an Aristocrat.

In opposition to the views of the day, he proclaims himself an aristocrat, and he reveals a wider and sounder view of esthetics. The natural result of these changed views was a conflict with several of his former adherents and friends. Thus, in 1885 he became involved, on the question of marriage, in a polemical fight with the author of "A View of Life Founded on Love," a pupil of Mill and Spencer. In 1887 he was engaged in a similar conflict with Björnson; and in 1889 he disputed with Höffding about Nietzsche.

Brandes has written a large work on Shakespeare, which is translated into many languages, and is still (1902) a contributor to the magazines, and his subjects are most varied. In all his articles he presents new and genial views. He is more careful than in younger days, when he often gave his enemies opportunity to attack him on account of second-hand information and defective memory.

The best estimate of Brandes can be formed from the numerous congratulations that came to him on his sixtieth birthday (Feb. 4, 1902), in which he was characterized as "a genial polemic," an "insurrectionist par excellence," and one who had "given us freedom to build upon, fresh courage to breathe, and a light to lighten for us."

By the will of the late Consul Albert Berendsen a fund was bequeathed for a prize essay on "The Significance of Georg Brandes in Danish Society and Spiritual Life." By royal "patent conferring rank" of May 7, 1902, Brandes was made professor, a title which gives him precedence and is a victory for him of unusual importance.

S. C. H. B.

BRANDES, LUDVIG ISRAEL: Danish physician; born in Copenhagen Oct. 26, 1821; died there Sept. 17, 1894. In 1839 he entered the University of Copenhagen, and was graduated in medicine in 1845. After having spent some time in foreign countries, he studied for two years at the hospitals of Copenhagen, chiefly at the Almindelig Hospital, and in 1848 became assistant surgeon during the insurrection in Sleswick-Holstein. The same year he took the degree of licentiate, and in 1850 that of M.D. at the University of Copenhagen. Subsequently he became assistant physician at the Almindelig Hospital, and later at the Frederiks Hospital, and for some years practised medicine in Copenhagen, being also district physician. In 1863 he was appointed chief physician in the first division of the Almindelig Hospital, and in 1869 received the title of professor.

Brandes showed the greatest energy in philanthropic work. He was especially instrumental in founding, in 1859, the Kjöbenhavns Sygehjem, a home for incurables and the aged of both sexes in Copenhagen, and was its medical director for a number of years. He also founded a society for seamstresses, which, in addition to giving relief, provided for the intellectual improvement of its members. He was for five years trustee of the Jewish congregation of Copenhagen.

From 1873 Brandes endeavored, by means of classes and lectures, to improve nursing both in the hospitals and privately. Whereas formerly only women in the lower ranks of life had been employed as hospital nurses, Brandes induced those of the upper classes to take up the work. His paper on the use and abuse of alcoholic beverages, published in 1877, has made the restriction of their abuse a leading question.

The most important of Brandes' scientific works is his handbook on internal diseases, "Haandbog i Sygdomsloren," 4 vols., Copenhagen, 1859-66.

S. A. M.

BRANDÈS, MARTHE (Marthe-Joséphine Brunschwig): French actress; born in Paris Jan. 31, 1862. She first studied design, sculpture, and music, and, finally, the drama. Successful in private theatricals, she entered the Paris Conservatoire and studied under Gustave Worms. In 1882-83 she won prizes; and Alexandre Dumas *fils* was so struck by her histrionic talent that he engaged her for the Théâtre du Vaudeville. From the first (1884), through her interpretation of *Diane de Lys,* Brandès became a favorite actress with the Parisian public. As *Georgette* in Sardou's play, in the "Renée" of M. W. Busnach (1887), and in Moreau's "Gerfant," she obtained distinguished successes as a comédienne.

Brandès' first appearance at the Comédie Française (Sept. 27, 1887) was in the part of *Francine de Riverolles* in Dumas the younger's "Francillon." She excelled also in classical parts, such as in "Andromaque" and "Iphigénie en Aulide," and especially in "Princesse Georges" (Feb. 27, 1888), Fr. Coppée's "Passant," and Dumas the elder's "Henri III. et sa Cour" (Jan. 5, 1889).

Returning to the Vaudeville in 1890, Brandès re-created many parts, and gained splendid triumphs in "Liliane" (Feb. 24, 1891), in Jules Lemaître's "Révoltée" (April, 1891), as *Hélène Rousseau* in Ibsen's "Hedda Gabler," and in Paul Hervieu's "Les Paroles Restent." On Nov. 17, 1892, she went back to the Théâtre Français.

Henceforth Miss Brandès became the interpreter par excellence of the plays of Dumas the younger and Paul Hervieu. She excelled in the portrayal of the modern woman of the world, self-willed and nervous. De Curel's "L'Amour Brode" and Parodi's "Reine Juana" (1893) won for her an individual position as an actress. Her great successes were in Pailleron's "Cabotins" (1894) and Hervieu's "Les Tenailles" (Sept. 28, 1895). She was elected a "sociétaire" in 1896, despite some slight opposition. Her powers as an actress were further developed in these years. She played in Meilhac's "Grosse Fortune," Lavedan's "Catherine" (1898), and in most of the stock plays of the Comédie (*e.g.*, Hugo's "Ruy Blas" and "Hernani," Molière's "Tartuffe," Emile Augier's "L'Aventurière," and Beaumarchais's "Le Mariage de Figaro").

S. E. A.

BRANDES, MORDECAI BEN ELIEZER: German Talmudist; lived at Frankfort-on-the-Main in the middle of the eighteenth century. Engaged by the Jewish community as "porsher" (פרש, one who extracts from a slaughtered beast those sinews that are proscribed as food), he published on this subject a valuable work (Frankfort-on-the-Main, 1750); and was also the author of the works: "Zikron Ma'aseh" (A Memento of the Affair), reconciliatory advice to dissenting parties in the congregation of Frankfort-on-the-Main (*ib.* 1753); and "Zikron Teru'ah" (Memorial of the Trumpet), directions in regard to blowing the shofar.

K. I. Br.

BRANDES, REUBEN ASHER: Hebrew novelist and journalist; born at Wilna, Russia, 1851. Educated on the usual Talmudical lines, he came early under the influence of the Maskilim, who made it their sole aim to enlighten the Jews.

In 1868, when but seventeen years of age, Brandes was asked to become a regular contributor to "Ha-Lebanon" (הלבנון), a Hebrew weekly published by Brill in Mayence, and for several years he devoted his pen to topics of the day and to criticism.

It was as a novelist, however, that he was to make a mark in Hebrew literature. In 1874 he published in "The Dawn" (השחר), a monthly edited by Smolenskin at Vienna, his first story, entitled "The Mysteries of the Zephaniah Family" (מסתרי בית צפניה), a tale of great promise from its style and vivid descriptions. The next year appeared in book form his second novel, called "The Repentant" (מודה ועוזב), which was followed by a voluminous novel treating of Jewish life called "Religion and Life" (הדת והחיים). This remarkable work appeared in "The Morning Light" (הבקר אור), published by Gottlober at Lemberg in 1875.

Another novel of great merit, "The Two Extremes" (שתי הקצוות), appeared in Lemberg in 1885. In this Brandes pictures in vivid colors the Orthodox and Reformed camps in modern Israel.

In 1882, at the time of the anti-Semitic riots in Russia, Brandes plunged into the Zionist movement and became one of its foremost advocates. To foster this idea he went to Rumania, and began the publication at Bucharest of a weekly in Judæo-German under the title "Yehudit." At the end of two years, however, Brandes was expelled from the country.

In 1891 he went to Cracow, Galicia, and started a weekly in Hebrew which he called "The Time" (הזמן). This paper existed for nine months, when, for lack of funds, its publication was suspended. Nothing of importance has appeared from his pen in recent years.

L. G. M. Ra.

BRANDON, BENJAMIN RAPHAEL DIAS: Dutch Talmudist and Hebrew author; died about 1750 at Amsterdam, where he was cantor. He wrote: "Orot ha-Miẓwot" (Lights of the Precepts), on the purpose of the Biblical and the Talmudic precepts (Amsterdam, 1753); and "'Emeḳ Binyamin" (Valley of Benjamin), on halakic problems suggested by his friends in Amsterdam (*ib.* 1753). In very sharp contrast to the pure and simple language of his works is their content. For instance, the use of wine at "ḳiddush" and "habdalah" is to Brandon a proof that, as wine is a product of much skilled labor, so the world is not an original essence, but the work of a master ("Orot ha-Miẓwot," 9b). Brandon wrote also "Keter Torah" (Crown of the Torah), a poem on the marriage of the Hebrew poet David Franco-Mendez of Amsterdam.

Bibliography: Steinschneider, *Cat. Bodl.* No. 4547; Fürst, *Bibl. Jud.* i. 129.

L. G. I. Ber.

BRANDON, JACOB ÉMILE ÉDOUARD: French genre painter; born at Paris July 3, 1831. A pupil of Picot, Montfort, and Corot, he entered the Ecole des Beaux Arts April 5, 1849. Upon his graduation from that institution he assiduously devoted himself to the practise of his art.

Among the principal works exhibited by Brandon in the Salon have been: "La Canonisation de Sainte Brigitte" (1861); "La Jettatura di Borgo San Spirito" (1861); "La Dernière Messe de Sainte Brigitte" (1863); "La Charité de Sainte Brigitte" (1863), a design in encaustic for the oratory of the Church of St. Bridget at Rome; "Le Dimanche de la Plèbe Romaine au Transtévère" (1865; medal), a water-color; "Le Baiser de la Mère de Moïse" (1866); "Le Sermon du Daian Cardozo à la Synagogue d'Amsterdam, le 22 Juil. 1866" (1867; medal); "Les Fils de M. Octave Feuillet," portraits (1869); "La Leçon de Talmud" (1869); "Le Sabbat" (1870).

Brandon, who did not exhibit so frequently after 1870, is represented at the Museum of Lille by the pictures "The Improviser" and "A Scene in the Campagna." These, in common with his other genre pictures, are characterized by great fidelity to nature, and a powerful, vivid, though somewhat heavy coloring.

S. J. So.

BRANDON, JULES BENJAMIN: French officer and scion of an ancient Sephardic family that went to France from Spain after the exodus of 1492; born Sept. 24, 1833, at Paris; died May 22, 1871. After studying at the Collège St. Barbe, he went to the Ecole Polytechnique in 1853, and entered the artillery. He married, in Aug., 1866, the eldest daughter of Colonel Salvador, nephew of the Jewish historian Joseph Salvador. At the outbreak of the Franco-Prussian war (1870) Brandon, who was then instructor (with the rank of captain) at the Ecole Polytechnique, immediately requested to be transferred to active service. He joined the army, was made a prisoner at Sedan, and was sent to Germany, his wife following him. As soon as the armistice was signed, and he received news of the events of the eighteenth of March and of the proclamation of the Commune, Brandon was one of the first to avail himself of the permission granted to the officers to return to France. He hastened to offer his services to the leaders of the army of Versailles. Though the troops at that time were disorganized, he rapidly reformed his battery; but on entering Paris, May 22, 1871, he was killed by a stray ball fired from a window. General Berkheim placed the name of Brandon, as one of the best and bravest officers of the second army corps, at the head of the list of captains to be read at daily roll-call, in order that this tribute should be "a title of glory that will be preserved in his family."

S. M. Bl.

BRANDSTÄDTER, MORDECAI DAVID: Galician novelist; born Feb. 14, 1844, in Brzesko, Galicia. He received a good Talmudical education, and after his marriage (at the early age of fourteen) settled in the home of his wife's parents in Tarnow, pursuing his rabbinical studies for about six years longer. During that time he also became acquainted with Neo-Hebraic and German literature. At the age of twenty he established himself in business in Tarnow, and is now (1902) one of the most prominent manufacturers in the district.

Brandstädter's first attempt at literature was the translation into Hebrew of L. Philippson's pamphlet, "Haben die Juden Wirklich Jesum Gekreuzigt?" (Berlin, 1865), which was published in the Hebrew periodical "Ha-Ibri" in Brody. But his real literary activity began at the time he visited Vienna in 1869 and there made the acquaintance of P. Smolenskin, who had just started his monthly, "Ha-Shaḥar." Smolenskin recognized Brandstädter's talent and encouraged him to write novels. The first sketch from his pen, "Eliyahu ha-Nabi" (The Prophet Elijah), appeared in No. 1 of "Ha-Shaḥar," and was soon after translated into Polish and published in the "Israelita" of Warsaw. "Mordecai Kisovitz" (the story of the life of a Galician Jew) appeared in the second issue of the same paper, and was later translated into Russian and English. "Reshit Madon" (The Beginning of a Quarrel), describing the life of the quasi-enlightened Jews of Galicia, appeared the same year, and "Ha-Niflaot me-'Ir Zidutschub" (The Wonders of the City of Zidutschub) came out in No. 3 of the same periodical. About half a dozen more short stories were subsequently published in "Ha-Shaḥar" and "Ha-Meliẓ." Some of them went through several editions in book form, and several were translated into German and other languages. His collected novels, "Kol Sippure," in two volumes, containing ten short stories in prose and three in verse, were published in Cracow, 1890–91. He has also written several short stories since that time.

Brandstädter displays remarkable skill in telling simple humorous stories, and in mercilessly exposing the weaknesses of the fanatical Ḥasidim, on the one hand, and of the conceited progressive aristocracy, on the other.

Bibliography: Jos. Klausner, *Novo-Yevreiskaya Literatura xix. Vycka*, p. 49, Warsaw, 1900; *Sefer Zikkaron* (Book of Memorial), p. 10, Warsaw, 1890; Zeitlin, *Bibl. Post-Mendels.*, p. 38.

S. P. Wi.

BRANN, MARCUS: German historian; born in Rawitsch July 9, 1849; son of Rabbi Solomon Brann. He studied at the University of Breslau, attending at the same time the rabbinical seminary of that city, and was graduated from the university in 1873 and from the seminary in 1875. Subsequently he acted as rabbi and teacher in various places, until 1891, when, on the death of Professor Graetz, he was called to the chair of history and Biblical exegesis in the Breslau seminary.

Brann has written: "De Herodis Magni Filiis, Patrem in Imperio Secutis" (part i., Breslau, 1873)—his doctoral dissertation, of which the second part appeared in German under the title, "Die Söhne des Herodes" (1873); "Geschichte der Gesellschaft der Brüder [Hebrah Ḳaddishah] in Breslau," 1880; "Geschichte der Juden und Ihrer Literatur," a text-book of Jewish history (vol. i. 1893, 2d ed. 1896; vol. ii. 1894, 2d ed. 1899); "Geschichte des Rabbinats in Schneidemühl," 1894; "Ein Kurzer Gang Durch die Jüdische Geschichte," 1895; "Ein Kurzer Gang Durch die Geschichte der Jüdischen Literatur," 1896; "Lehrbuch der Jüdischen Geschichte" (vol. i. 1900; vol. ii. 1901; vol. iii, 1902); "Geschichte der Juden in Schlesien," 3 parts, 1895-1901.

Since 1890 Brann has edited a Jewish almanac, "Jahrbuch zur Belehrung und Unterhaltung," and from 1892 until the death of David Kaufmann was joint editor with him of the "Monatsschrift für Geschichte und Wissenschaft des Judenthums," which had been discontinued for several years; since 1899 he is sole editor. In 1900 Brann edited, with F. Rosenthal, a memorial volume in honor of his colleague, "Gedenkbuch zur Erinnerung an David Kaufmann," Breslau, 1900.

S. D.

BRANN, SOLOMON: German rabbi; born in Rawitsch, Nov. 3, 1814. He attended for several years the yeshibah in Lissa, and continued his studies in the Berlin University. In 1839 he was elected a member of the rabbinical board of his native city, where he was a pioneer of German preaching. Since 1853 he has been rabbi at Schneidemühl. Brann has contributed largely to scientific German periodicals, such as "Orient," "Monatsschrift," and "Jüdisches Literaturblatt." His notes on the Talmud Yerushalmi are to be found in the Krotoschin edition of 1866.

S. D.

BRASCH, MORITZ: German philosopher and litterateur; born at Zempelburg, West Prussia, Aug. 18, 1843; died at Leipzig Sept. 14, 1895. He was educated at the universities of Berlin, Greifswald, and Jena, settling at the first-mentioned place on the completion of his studies. Finally he went to Leipsic, where he became (1874–79) the chief editor of Brockhaus' "Konversations-Lexikon."

Brasch ranked high among the modern philosophical essayists of Germany. He published the following works: "Benedictus von Spinoza's System der Philosophie," 1870; "Lichtstrahlen aus Mendelssohn's Schriften nach der Ethica Dargestellt," 1875; "Die Klassiker der Philosophie," 3 vols. 1883–86; "Gesammelte Essays und Charakterköpfe zur Neuern Philosophie und Litteratur," 2 vols. 1885–86; "Philosophie der Gegenwart" (vol. iv. of "Klassiker der Philosophie"), 1887; "Welt- und Lebensanschauung Friedrich Ueberwegs," 1888; "Philosophie und Politik: Studien über Lassalle und Johann Jacoby," 1890; "Gesch. der Leipziger Universität von ihrem Ursprung bis zur Gegenwart," 1890; "Lehrbuch der Gesch. der Philosophie," 2d ed. 1893; "Wesen und Ziele der Ethischen Bewegung," 1894; "Leipziger Philosophen im 19. Jahrhundert—Porträts und Studien," 1894; "Die Facultätenfrage und die Stellung der Philosophie," 1895. He edited: Moses Mendelssohn's "Werke zur Metaphysik, Religionsphilosophie und Aesthetik," 2 vols. 1880, 2d ed. 1881; Ueberweg's "Schiller als Philosoph und Historiker," 1885; Schopenhauer's works, 2 vols., 1891; Aristotle's "Politeia" (German transl. with introduction and notes), 1894.

BRASLAW, NAḤMAN. See Naḥman b. Simḥah of Braslaw.

BRASS: A composition of copper and zinc. The application of the word in the Bible is uncertain, as instruments of copper and bronze were often used where brass is mentioned. Copper, bronze, and other metals were known to the Egyptians before the Exodus. In the Old Testament brass is referred to both actually and symbolically. In Ex. xxxviii. 2–8 the altar of burnt offering is overlaid with brass. All the vessels of the altar are made of brass. In Num. xxi. 9 Moses makes a serpent of brass. In I Sam. xvii. 5 Goliath is clad in an armor of brass. In II Sam. viii. 8 King David takes "exceeding much brass" from Betah and Berothai. In I Kings vii. 7 is the reference to Hiram, king of Tyre, "a worker in brass." In II Kings xxv. 13, 14; Jer. lii. 17, the brazen vessels and pillars carried away by the Chaldeans, and in I Chron. xv. 19 "cymbals of brass," are mentioned.

Brass is often referred to symbolically in Hebrew Scripture: Deut. xxviii. 23, "Thy heaven that is over thee shall be brass" (without clouds and rain); Job vi. 12, "Is my flesh brass?" (enduring, insensible); Dan. ii. 32, "Belly and thighs of brass" (expressing brilliancy); Dan. x. 6, "His feet like in color to burnished brass."

E. G. H. T. F. S.

BRATZLAV or **BRASLAVL:** A town in the government of Podolia, Russia, situated on the right bank of the southern Bug. It was founded in the fourteenth century. It was at different times subject to Poland, Lithuania, Russia, and the Tatars. In 1479, when the Tatars conquered and destroyed Bratzlav, more than 600 inhabitants, among them 400 Jews, were slain in one day. In 1551, when it was besieged by the Crimean khan Devlyet Girei, and the entire garrison and a large part of the population fled, the Jews heroically defended the town against the enemy. In 1569, at the time of a religious uprising of the Cossacks, the hetmans Nalivaiko and Kossinski repeatedly attacked the city, plundering and murdering without mercy; the Jews, of course, not being exempted.

But the most terrible year for the Jews was 1648, when the alderman Martin Kalinovski delivered Bratzlav into the hands of Chmielnicki, who seized the town and massacred all the Jews. In 1664 the Russians slaughtered the Poles and Jews of Kamenetz-Podolsk, Miedzybodz, and Bratzlav. When the hetmans Voinaravski and Orlik plotted with the Tatars against Peter the Great, Bratzlav became the scene of horrible cruelties perpetrated upon the Jews. The town has been a place of shelter for the followers of Shabbethai Ẓebi and other sects, especially the Frankists and the Ḥasidim.

In the town of Bratzlav in 1895 the Jews numbered 2,460, or 39.2 per cent of the total population; and in the district of that name there were 31,000, or about 15 per cent of the total population. They have a synagogue and six houses of prayer in the town.

H. R.

BRAUDO, ALEXANDER: Russian author; born in 1864. From 1889 until 1892 he was reviewer of literature on Russian history for the "Jahresbericht der Geschichtswissenschaft" and the "Istoricheskoye Obozrenie," published by the University of St. Petersburg; he translated sources for Russian history, as Grevenbruch's "Tragoedia Moscovitica," 1606 (history of the false Dmitri); and Neuville's "Relation Curieuse," 1689 (history of the riot of the Stryeltzy). He wrote a number of articles in "Russki Bibliograficheski Slovar," published by the Historical Society of the University of St. Petersburg, and a series of reviews in the "Zhurnal Ministerstva Narodnavo Prosvyeshcheniya." In the "Voskhod" for 1896 there appeared his reviews of the works of Bershadski on the history of the Jews. While secretary of the Society for the Promotion of Education Among the Jews of Russia, he succeeded in directing the activity of that organization toward the encouragement and development of elementary education among the Jews. At present he is a member of the advisory board of the Jewish Colonization Association.

H. R. S. J.

BRAUN, JOSEF: Austrian journalist, dramatist, and librettist; born at Budapest, May 5, 1840. Braun was educated for the profession of medicine at the University of Vienna, but abandoned his medical studies in 1860 to join the editorial staff of Isidor Heller's "Fortschritt," on which he was trusted with Hungarian affairs. Next he joined the staffs of the "Wanderer," "Morgenpost" (as editor-in-chief), "Debatte," and in 1869 the "Tagespresse." From 1869 to 1870 he managed the humoristic illustrated paper "Der Floh"; in 1871 he founded the "Bombe," which he sold to establish, in 1881, the "Wiener Caricaturen." Among his works are: "Emporkömmlinge," a romance, published in 1874 in the "Bombe"; "Lustige Weiber von Wien," 1881; and the following plays and libretti: "Flotte Bursche," 1861 (music by Suppé); "Die Pagen von Versailles," 1862; "Die Keusche Diana," 1864 (the first opera composed by Millöcker); "Carneval in Rom," 1877 (music by Johann Strauss); "Hector in der Tinte"; "Bibiana und Leodegar"; "In den Flitterwochen"; and "Während der Quadrille."

BRAUN, SOLOMON: French lieutenant of artillery; born at Paris, 1868; died in Togbao, Sudan, in 1899. His father, a poor pedler, observing Solomon's capacity for learning, made the greatest sacrifices to give him a good education. Solomon successfully passed the competitive examination for the Ecole Polytechnique, whence he graduated as lieutenant of artillery. In 1897 he obtained permission from the minister of war to join the perilous expedition for the exploration of Lake Tchad under Major Bretonnet. The expedition was surprised, and every member slaughtered by the Tuaregs.

BRAUNSCHWEIG (BRUNSCHWIG), ABRAHAM B. ELIEZER: Reviser of the rabbinical Bible published by the printer König of Basel in 1619; and assistant to Johannes Buxtorf, both the father and the son. At the request of Buxtorf, senior, Braunschweig was permitted to settle at Basel. Upon the circumcision of a son, in 1619, at which several Jews were present, he was fined 400 fs., König and Buxtorf 100 fs. each, and all the Jews who had been present at the celebration were imprisoned for some days. Braunschweig lived later at Lengnau (Aargau) and in Zurich, and attended the fair at Zurzach. He traded in Hebrew books, which he obtained on his journeys through Alsace. In the correspondence between Johannes Hottinger of Zurich and Johannes Buxtorf of Basel, Braunschweig took an important part. He was still living in 1644. Whether he was related to Joseph ben Jacob Braunschweig, whose name appears on the title-page of "Sod ha-Neshamah," printed at Basel in 1608, is not known.

G. M. K.

BRAUNSCHWEIG, JACOB ELIEZER: German rabbi and Talmudic author of the seventeenth and the eighteenth century; died in Vienna April 16, 1729. Of his life very little is known. He was rabbi at first in Kanitz, province of Moravia, Austria, and subsequently in Vienna, where he found a Mæcenas in Samson Wertheimer, who engaged him as his chaplain, because the Jews of Vienna were not permitted to engage a rabbi. Braunschweig wrote: "Siaḥ 'Abde Abot" (The Language of the Servants of the Fathers), a concordance to the Talmud and the Midrashim; "Ṭa'ame ha-Torah" (The Reasons of the Law), an exegetical work on the Pentateuch; "Sefer Sekar we-'Onesh" (The Book of Reward and Punishment), which seems to have been an index of all Talmudic passages bearing on divine retribution; "Gemaṭriot u-Periferaot la-Ḥokmah" (The Gemaṭria and Peripheries of Wisdom), a cabalistic work on the Pentateuch; and Gemaṭriot on the Torah, both exegetical and cabalistic, being an index of all Talmudic rabbinical interpretations of the Pentateuch. None of his works was published, and, as far as known, only the first-mentioned is extant in manuscript. It is in the Berlin Library, and has been wrongly ascribed by Steinschneider to Lazar Fried, rabbi at Kanitz. Braunschweig's family later adopted the name "Deutsch"; and one of his descendants is Gotthard Deutsch of Cincinnati.

J. M. K.

BRAY-SUR-SEINE: Small town situated between Provins and Montereau, in the department of Seine-et-Marne; belonged formerly to Champagne. In the twelfth century it had an important Jewish community, including such rabbis as Jacob the Tosafist, and R. Isaac. Several commentators were born here: R. Matathia, Phineas, and Menahem (it is possible that the latter two are identical); and there were also some very rich Jews in the city.

An Israelite having been assassinated in 1191 by a subject of the king of France, his coreligionists obtained permission of the countess Blanche of Champagne to hang the murderer, and in commemoration of the hanging of Haman they selected the day of Purim. According to Christian reports, they tied the hands of the murderer behind his back, and after having placed a crown of thorns upon his head, led him through the city, beating him with a stick. Philip Augustus, king of France, taking advantage, perhaps, of the fact that the Christian was his subject invaded the domain of the countess of Champagne, placed guards at the gates of the castle of Bray, and seized the Jews and burned more than eighty of them at the stake, among whom were the rabbis Jacob and Isaac aforementioned. According to a contemporary, R. Ephraim of Bonn, the attempt had first been made to convert them to Christianity. Only children under thirteen years old escaped the persecution.

This massacre did not put an end to the community, however, for documents show that there were still some Jews in the city in the twelfth century. Among the best known may be mentioned Matathia or Eliab, son of R. Isaac, who died in 1191; Deodatus or (Dieudonné) and Hély, bankers, who were at the Petit Châtelet in Paris in 1204-6, and in 1221 at Provins. In that year Thibaut IV., count of Champagne, was in their debt. All traces of this community have been lost since the fourteenth century. No Jews live there to-day.

G. I. L.

BRAZEN SEA.—Biblical Data: The brazen laver of the Mosaic ritual; made by Solomon out of bronze captured by David at Tibhath and Chun, cities of Hadarezer (I Chron. xviii. 8). It served the same purpose for the officiating priests of Solomon's Temple as did the laver for those officers at the tabernacle. The dimensions of the sea (I Kings vii. 23-26) were as follows: height, 5 cubits; circumference, 30 cubits (consequently it was about 10 cubits in diameter); and a handbreadth in thickness. It was capable of holding 2,000 "baths"; on the smallest calculation, about 17,000 gallons. "Under the brim of it round about there were knops which did compass it, for ten cubits compassing the sea round about; the knops were in two rows, cast when it was cast" (*ib.* 24). This great brazen vessel was set on the backs of twelve brazen oxen; three of them facing each cardinal point, and all of them facing outward; see illustration, p. 358.

The humiliation of Ahaz before Tiglath-pileser III. and his desecration of the Temple and all sacred things led him to take this sea down from its position on the oxen, and to set it upon a pavement of stone (II Kings xvi. 17). It was finally (II Kings xxv. 13) broken into pieces at the capture of Jerusalem by the Chaldeans, and the material was carried to Babylon.

J. JR. I. M. P.

——**In Rabbinical Literature:** The laver contained water sufficient for 150 ritual baths ("miḳwaot"), if forty seahs be taken as the legal measure of such bath. The laver was not entirely round, as might be inferred from Scripture (I Kings vii. 23): the upper two-fifths were round; but the lower three were square ('Er. 14a, b). The symbolism of the brazen sea is described in detail in the Midrash Tadshe. The sea represented the world; the ten ells of diameter corresponded to the ten Sefirot; and it was round at the top (according to the Talmud passage above cited) as the heavens are round. The depth of the sea was five ells, corresponding to the distance of five hundred years' journey between heaven and earth (compare Ḥag. 13a). The band of thirty ells around it corresponded to the Ten Commandments, to the ten words of God at the creation of the world, and to the ten Sefirot: for the world can exist only when the Ten Commandments are observed; and the ten Sefirot as well as the ten words of God were the instruments of the Creation. The two rows of colocynths (knops) below the rim were symbolic of the sun and the moon, while the twelve oxen on which the sea rested represented the zodiac ("mazzalot"). It contained 2,000 baths (cubic measures), for the world will sustain him who keeps the Torah, which was created 2,000 years before the world (Midrash Tadshe ii., ed. Epstein, in "Mi-Ḳadmoniyot ha-Yehudim," xvi., xvii.; Yalḳ., Kings, 185).

The Brazen Sea of Solomon's Temple.—With View of Section.
(Restored according to Calmet.)

BRAZEN SERPENT (נחשתן). — **Biblical Data:** An image set up by Moses which is said to have healed those who looked upon it. When the people of Israel, near the close of the desert wanderings, were marching southward to go around Edom to the east of Palestine, they murmured against God and against Moses. As a punishment "fiery serpents" (compare Isa. xiv. 29; xxx. 6) of the region were sent against them, and very many died of their poisonous bites. On their showing repentance Moses was bidden to put upon a lofty pole an image in bronze of such a serpent, which, according to II Kings xviii. 4, was known as "neḥushtan." The sufferers, when they looked upon the image from any part of the camp, were healed of their sickness (Num. xxi. 4-9). This "brazen serpent" became an object of adoration to Israel, and so remained until Hezekiah destroyed it by breaking it into fragments (II Kings xviii. 4).

——**In Rabbinical Literature:** Inasmuch as the serpent in the Talmud stands for such evils as talebearing and defamation of character (Gen. iii. 4, 5), the Midrash finds in the plague of the fiery serpents a punishment for sins of the evil tongue (Num. xxi. 5). God said: "Let the serpent who was the first to offend by 'evil tongue' inflict punishment on those who were guilty of the same sin and did not profit by the serpent's example."

One of the complaints in this case was dissatisfaction with the manna. Whereas the manna is believed to have had any taste desired by the person eating it, to the serpent all things had the taste of dust, in accordance with the words: "And dust shalt thou eat all the days of thy life" (Gen. iii. 14). It was very appropriate, therefore, that they who loathed the food which had given any taste desired, should be punished by means of that creature to which everything has the same taste (Tan., ed. Buber, Ḥuḳḳat, xlv. [337]; Midrash R. Num. xix. 22).

The Mishnah does not take literally the words "Every one who was bitten by a serpent would look at the serpent and live," but interprets them symbolically. The people should look up to the God of heaven, for it is not the serpent that either brings to life or puts to death, but it is God (Mishnah R. H. 29a). In the course of time, however, the people lost sight of the symbolical meaning and regarded the serpent itself as the seat of the healing power, and they made it an object of worship, so that Hezekiah found it necessary to destroy it (II Kings xviii. 4; see also Ber. 10a).

K. I. Hu.

—**Critical View:** It is not necessary to discuss here the nature of the serpents (see Seraphim) that attacked the pilgrims in the desert; for it is not specifically said that one of these, but merely a "serpent," not further defined, was represented in bronze.

The question of the form of representation is, however, of importance as a matter of religious history. In this narrative ascribed to J and E modern criticism sees an account of the way in which the serpent-worship, surviving till the days of Hezekiah, took its rise. What was its motive? Evidently the serpent in this special cult was regarded as beneficent, as was frequently the case among the Semites generally (compare Animal Worship). But at the same time the serpent was becoming odious, as a type of subtlety and seductiveness (Gen. iii.), and the two conceptions were felt to be inconsistent. The wilderness narrative does justice historically to both of these aspects of serpent nature and the corresponding beliefs. Add to this, that all sorts of image-worship were being discouraged by prophetic influence. In this special instance it was particularly obnoxious to the reforming party in Judah; because Isaiah, who was its main inspiration, had already spiritualized the idea of the "flying serpent" (Isa. vi.), seeing in the "seraphim," or swiftly changing lightning and cloud-shapes of the sky, a mode of the divine self-manifestation similar to that of the Cherubs. The name "nehushtan" suggests some interesting questions. To judge from the form, the name belongs to an old period of the language, but the explanation of it as a "brazen" object appears to be due to a species of popular etymology, "nahash" signifying in Hebrew "brass" as well as "serpent." It is likely that nehushtan as an object used in the ancient Semitic cult was a species of totem-pole, surmounted by the reproduction—perhaps in wood—of a serpent, and was placed before tents or rude dwellings as a means of driving off evil spirits, who were supposed to be lurking everywhere.

BRAZIER. See Coal.

BRAZIL: The largest of the South American states, extending from lat. 5° N. to 33° 45′ S., long. 35° to 74° W., with an area of 3,209,878 square miles. It was discovered by Vincente Yanez Pinzon in 1499, and independently in 1500 by Pedro Alvarez de Cabral, a Portuguese, whose country claimed the southeastern coast by right of discovery, and made the first permanent settlement in 1531.

The history of the Jews in Brazil begins almost simultaneously with the history of the country itself. As early as 1548 Jews were banished by the Portuguese Inquisition to Brazil, and in the same year it is stated that Portuguese Jews transplanted the sugar-cane from the island of Madeira to Brazil.

The Inquisition was never officially established in Brazil, but it had its agents there from the very start. At an early date mention is made of Neo-Christians or Maranos being sent back from Brazil to Europe to stand trial before the Holy Office. This practise became more frequent after 1580, when Portugal itself came under the dominion of Spain, and the Inquisition became supreme in both countries. The Maranos of the New World were therefore compelled to wear the mask just as they had in the Old.

As early as 1610 mention is made of the physicians of Bahia in Brazil, who are described as being mainly Neo-Christians, and who prescribed pork to lessen the suspicion of the charge of Judaism. Pyrard, the historian, who visited the place in 1610, says that a rumor was then afloat that "the king of Spain desires to establish the Inquisition here, on which account the Jews are greatly frightened." Certain it is, however, that these persons did not openly profess their faith.

These secret Jews, besides acquiring wealth, became very numerous at the beginning of the seventeenth century. They were then among the wealthiest inhabitants, some being worth from 60,000 to 100,000 crusados. "But they were despised by their narrow-minded countrymen, and were in constant danger of losing their property through the agents of the Holy Office" (Southey's "Brazil").

In the second decade of the seventeenth century the Dutch commenced their ambitious schemes for the conquest of Brazil. In connection with some of the earliest intrigues, special mention is made of one Francisco Ribiero, a Portuguese captain who is described as having Jewish relatives in Holland.

The secret Jews welcomed and assisted the Dutch in 1618, particularly as at that time they had good reason to dread the introduction of the Inquisition, which had recently arrested in Oporto almost all merchants of Jewish extraction. Many of the victims were engaged in the Brazilian trade, and the inquisitor-general applied to the government to assist the Holy Office to recover such part of their effects as might be in the hands of their agents in Brazil. Accordingly Don Luiz de Sousa was charged to send home a list of all the Neo-Christians in Brazil, "with the most precise information that can be obtained of their property and places of abode." It was the Dutch war alone that prevented the introduction of the Holy Office. It was at this period particularly that the Neo-Christians of Brazil threw off the mask and appeared as distinctive members of the Jewish faith.

The Dutch relied upon this large Jewish population for assistance when they prepared their plans for the conquest of the country. The Dutch West India Company was formed in 1622 in furtherance of the project, and it is significant that one of the

The Dutch and the Jews.

arguments in favor of the organization was "that the Portuguese themselves—some from their hatred of Castile, others because of their intermarriages with Neo-Christians, and their consequent dread of the Inquisition—would either willingly join or feebly oppose an invasion, and all that was needful was to treat them well and give them liberty of conscience."

The Dutch were not mistaken. When their fleet was sent against Bahia all necessary information was obtained from the Jews. The city was captured in 1624; and true to the policy mentioned, Willekens, the Dutch commander, at once issued a proclamation offering liberty, free possession of their property, and free enjoyment of their religion to all who would submit. This brought over about 200 Jews, "who exerted themselves to make others follow their example." Unfortunately for the Jews, Bahia was recaptured by the Portuguese in 1625; and though the treaty provided for the safety of other inhabitants, the Neo-Christians who had placed such trust in the Hollanders were abandoned, and five of them were put to death. Many of the Maranos seem to have remained, however; for they are mentioned again in 1630. See Bahia.

The Dutch soon gained another foothold and spread their conquests. The Portuguese city of Recife, or Pernambuco, was captured by the Dutch in 1631; and immediately most of the Jews and Neo-Christians from Bahia and elsewhere removed to that city, although it had a large Jewish population of its own, as it had been principally settled by Jews. The Dutch endeavored to secure colonists, and appealed to Holland for craftsmen of all kinds. Many Portuguese Jews of Holland came to Brazil in response to the call; for now that the country offered them full religious liberty, it also gave them the additional advantage of dwelling among a population where they could speak their own language. Southey asserts that these Jews made excellent subjects.

"Some of the Portuguese Brazilians gladly threw off the mask which they had so long been compelled to wear, and joined their brethren of the synagogue. The open joy with which they now celebrated their ceremonies attracted too much notice: it excited the horror of the Catholics; and even the Dutch themselves, less liberal than their own laws, pretended that the toleration of Holland did not extend to Brazil." The result was an edict by which the Jews were ordered to perform their rites more privately.

At this period the Jews in Recife alone were numbered by thousands; and one of them, Gaspar Diaz Ferreira, was considered one of the richest men in the country. Nor was the Jewish population confined to Pernambuco. Great numbers of Jews resided throughout Brazil, particularly at Tamarico, Itamaraca, Rio de Janeiro, and Parahiba.

Recife, however, was the great center of Jewish population, and soon became famous not only in the New World, but also in the Old, for its important congregation and the distinguished scholars numbered among its inhabitants. An evidence of this is found in the fact that the author Manasseh ben Israel of Amsterdam dedicated the second part of his "Conciliador" to the prominent men of the congregation of Recife. Manasseh ben Israel himself at one time intended going there.

Recife Center of Jewish Population.

In 1642 about 600 Portuguese Jews left Amsterdam for Brazil; with them were two distinguished scholars, Isaac Aboab da Fonseca and Moses Raphael de Aguilar. The former soon became the ḥakam, and the latter the ḥazan, or reader, for the congregation at Recife. The congregation at Tamarico had at its head Jacob Lagarto; while one Jacob de Aguilar is also mentioned as a Brazilian rabbi at this period.

Among the Jewish writers born in Brazil may be mentioned Elijah Machorro and Jacob de Andrade Velosino.

"Among the free inhabitants of Brazil in 1640," writes Nieuhoff, "the Jews were the most considerable in number. They had a vast traffic beyond all the rest; they purchased sugar-mills, and built stately houses in the Recife."

At Bahia, on the other hand, and in that portion of Brazil retained by the Portuguese, the most intense bigotry prevailed. After 1631, Jews are met with at Bahia in isolated cases only, and then invariably in connection with their transportation for trial by the Inquisition at Lisbon. The most famous instance of this is the case of Isaac de Castro Tartas, who left Dutch territory to visit Bahia in 1646. He was at once seized and transported for Judaizing, and was burned at an auto da fé at Lisbon.

When in 1645 Joam Fernandes Vieyra was inciting the Portuguese to reconquer Brazil, he pointed particularly to Pernambuco, or Recife, expressly calling attention to the fact that "that city is chiefly inhabited by Jews, most of whom were originally fugitives from Portugal. They have their open synagogues there, to the scandal of Christianity. For the honor of the faith, therefore, the Portuguese ought to risk their lives and property in putting down such an abomination."

Attempt to Seize Recife.

When the conspiracy was in its infancy the Dutch authorities were slow to realize what was happening; "but the Jews of Recife were loud in their expressions of alarm." "They had more at stake than the Dutch; they were sure to be massacred without mercy during the insurrection, or roasted without mercy if the insurgents should prove successful." They therefore besieged the council with warnings and accusations.

Vieyra, too, recognized the importance of the Jewish element, for at the very beginning of the insurrection he promised the Jews protection provided they remained peaceably in their houses.

The Jews, however, were loyal to the Dutch; and in 1646, when the war was raging, they raised large donations for the service of the state. So influential were they that, when in 1648 the Portuguese contemplated the purchase of Pernambuco, they considered the advisability of making the clause concerning the Jews a secret article, before even broaching the subject to Holland.

The war continued unabated; and after a desperate struggle of several years the Dutch régime was doomed. The story of the sufferings and fortitude of the Jews of Recife during its terrible siege, when general famine prevailed, has been told in a poem written by Isaac Aboab, an eye-witness.

Though the first siege was unsuccessful, Recife was again besieged, and when it became evident that the city could not hold out, the Jews clamored for a capitulation, knowing that otherwise no mercy would be shown them. By the terms of the capitulation the Jews were especially mentioned; and an amnesty was promised them by the Portuguese "in all wherein they could promise it."

More than 5,000 Jews were in Recife at the time of the capitulation. Many of these removed to Surinam; while many others, under the leadership of Aboab and Aguilar, returned to Amsterdam. Some went to Guadeloupe and other West Indian islands; while a few of the refugees reached New Amsterdam, as New York was then called.

Despite the ending of the Dutch régime, some Neo-Christians continued to reside in Brazil. Their number was largely increased toward the end of the seventeenth century, when Portugal again banished to Brazil the Maranos who had become reconciled. These transportations continued from 1682 to 1707; and the Jews again came to be known as a distinct class. They were closely watched, however, and many were sent back to Lisbon from time to time, to be tried by the Inquisition. Many Jews from Rio were burned at an auto da fé at Lisbon in 1723. Several of these martyrs were men of great repute, the most prominent being the famous Portuguese poet and dramatist Antonio José da Silva, a native of Rio de Janeiro, who was burned as a Jew at Lisbon in 1739. In 1734, Jews appear to have been influential in controlling the price of diamonds in Brazil.

Toward the middle of the eighteenth century, Jews or Neo-Christians were again a numerous class in Brazil, and transportation to Lisbon for Judaizing had again become so common and was carried on to such an extent that, as the historian relates, "so wide a ruin was produced that many sugar-mills at the Rio stopped in consequence." The influential Marquis de Pombal, with all his power, did not venture to proclaim toleration for the Jews; but he succeeded in having laws enacted making it penal for any person to reproach another for his Jewish origin, and removing all disabilities of Jewish blood, even from the descendants of those who had suffered under the Inquisition. He prohibited public autos da fé, and required all lists of families of Jewish extraction to be delivered up, making it penal to keep such lists. These statutes deprived the Inquisition of its most important means of accusation; and as a result the Maranos were ultimately absorbed in the Catholic population of Brazil.

Since then the Jews have not been known as a distinctive class in Brazil. Those living there today are not descended from the Neo-Christians, but are mainly recent immigrants from Germany, Russia, Rumania, and other European countries. Many are settled in Rio Grande do Sul.

In 1900 a number of Rumanian Hebrews went to Brazil, but effected no permanent settlement.

The Bureau of American Republics has recently published a list of the leading merchants of the various cities in Brazil; and these lists disclose a large number of Jewish names, though most of them seem to be of German origin.

The constitution of Brazil guarantees to the inhabitants liberty both of conscience and of worship; but in spite of these liberal provisions there are no Jewish congregations of consequence in the country.

BREACH OF PROMISE OF MARRIAGE

BREACH OF PROMISE OF MARRIAGE (קנס): The refusal of either party to a contract of marriage to fulfil it. In order that there may be a breach of promise, there must be a contract cognizable by the law. Unlike the law in many modern systems of jurisprudence, mere mutual promises of a man and a woman to marry do not constitute such a contract in Jewish law, which requires a written agreement embodying the terms of the contract and specifying the amount of damages ("ḳenas") payable by either party to the other upon its breach. Such contracts are commonly called "shidduḳin" or "tenaim rishonim" (first stipulations), and contain explicitly a statement of the amount of damages payable by either party to the other in case of breach of the contract.

Nature of Contract to Marry.

For the purpose of insuring greater security, promissory notes are deposited by both parties with a third person. These notes are drawn for a specific sum, to become due and payable upon the non-fulfilment of the contract, and are coupled with the condition that upon the consummation of the marriage the notes shall ipso facto become null and void. In case the promise of marriage is made secretly it is necessary that all these provisions be fully complied with in order to entitle the innocent party to a right of action against the party guilty of the breach; but if the contract is publicly entered into, damages may be claimed for the breach even though all the formalities have not been complied with, because an additional consideration enters into the contract by reason of its publicity. In such cases breach of the contract would result in shame and disgrace to the innocent party; and this is sufficient consideration for the recovery of the damages.

If, after the execution of the contract, the parties mutually agree to rescind it, there is no breach of promise, and the parties are released from all obligations to each other: all gifts must be returned unless there has been a specific agreement to the contrary; and the parties stand in the same relation

Contract May Be Mutually Rescinded.

to each other as though no contract had been entered into. In case it becomes impossible for one of the parties to fulfil the contract, the other is released. For instance, if one of the parties has agreed to give a certain amount of dowry, and is unable to fulfil this condition because of having become impoverished, the other party, if not choosing to do so, is not bound to fulfil the contract. Where one of the parties is obliged to remove from the place where they had intended to take up their residence, the other is not obliged to follow, but may declare the contract annulled.

If the near relations of either of the parties, by reason of misconduct or improper life, bring disgrace upon the family, or if one of the contracting parties is guilty of such fault, the other party is released; and if either party becomes insane, or apostatizes, a like result follows.

The obligations assumed by the respective parties to the contract are binding upon their heirs.

If the father of the prospective bride has entered into the contract with the prospective groom, and the girl then refuses to be married, her father is released from his obligation by reason of the impossibility of fulfilling the contract, provided, of course, there is no fraud or collusion between himself and his daughter.

It is generally decided by the rabbinical authorities that specific performance of the contract to marry can not be enforced after the party guilty of the breach of promise has paid the pecuniary damages specified in the contract.

When a Pledge Is Given.

In case a pledge is given by either party to the other at the time when the promise to marry is made, as security for the payment of the damages that may be recovered for the breach of contract, it is necessary that the delivery of the pledge be accompanied by an express agreement specifying that, in case the contract is broken, the pledgee shall be entitled to a specific sum out of the proceeds of the sale of the pledge. If the party guilty of the breach of promise can not pay the penalty, recourse may be had to the surety, and if the latter is obliged to pay the damages, he may have recourse against his principal at any time in the future.

As stated at the beginning of this article, all these provisions are applicable only in case the promise of marriage has been reduced to writing, and the proper formalities have been complied with. If there have been merely oral promises with the understanding that the agreement in writing shall be executed, the parties are at liberty to retract at any time before the written agreement has been signed by the witnesses; and, in case of such retraction, no breach of promise in the technical sense occurs; the parties are not bound in any way, and are free from all the obligations and responsibilities of the contract.

J. SR. D. W. A.

BREACH OF TRUST: Violation by fraud or omission of any duty lawfully imposed upon a trustee, executor, or other person in a position of trust. It is thus a branch of criminal law, and under this aspect will be considered in the present article.

Moral Basis.

Moral basis for the laws against breaches of trust may be found in such texts as: "Ye shall not steal, neither deal falsely, neither lie one to another" (Lev. xix. 11); "Thou shalt not withhold anything from [A. V., "defraud"; R. V., "oppress"] thy neighbor, neither rob him" (*ib.* 13); "Ye shall not afflict any widow, or fatherless child" (Ex. xxii. 21 [22]); "Thou shalt not see thy brother's ox or his sheep go astray, and hide thyself from them; thou shalt in any case bring them again to thy brother. . . . In like manner shalt thou do with his ass . . . and with any lost thing of thy brother's, which he hath lost and thou hast found" (Deut. xxii. 1, 3). In these texts may be found the germs of the law relating to the duties of bailees, trustees, and guardians; and in the law of trusts, the later Talmudic and rabbinical law was somewhat hampered in its logical development by the dominance of these ethical views. For instance, instead of compelling the guardian to render an account at the end of the term of his administration of the orphans' estate, the law required nothing of him except the delivery to the orphans of the balance of the estate in his hands. If they doubted the integrity of their guardian they could not compel him to account, but appealed to his religious sentiment. In such cases, instead of giving a legal account, he was required to take the rabbinical oath of purgation "that he had not stretched forth his hand unto the goods." And with this oath he was discharged (Maimonides, "Yad," Sheluḥin, ix. 1; Naḥalot, xi. 5, 12; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 93 1; 290, 17). There is no doubt that this appeal to the good faith of the guardian has resulted in the conscientious administration of orphans' estates under the Jewish law (Frankel, "Der Gerichtliche Beweis," pp. 64, 65).

The only Biblical laws on the subject of breach of trust are those in relation to bailees (see BAILMENTS).

As stated above, the trustee, at the end of the term of his administration, is not obliged to account. When orphans attain their majority, they are entitled to receive their inheritance; and the guardian, without accounting, gives them the balance of their estate left in his hands after his maintenance of them during their minority. If the guardian was appointed by the court, and the heirs have reason to suspect that he has been guilty of a breach of trust, he must take the oath of purgation. If he was appointed by the father of the orphans and is what in modern law would be called a testamentary guardian, he can not, in case of mere suspicion of malfeasance, be compelled to swear (Mishnah Giṭ. v. 4; "Yad," Naḥalot, xi. 5; Ḥoshen Mishpaṭ, 290, 16). Later authorities are of the opinion that, inasmuch as the testamentary guardian need not take the oath, he may be compelled to render an account (gloss to Ḥoshen Mishpaṭ, *ib.*); and if the guardian is appointed by the non-Jewish court, he must render an account of his trust "because that is their law" (*ib.* 17).

By analogy with the case of the guardian, all other

Oath of Purgation.

persons in positions of trust are obliged, at the end of their administration of the trust estate, to take the oath of purgation if suspected of having been guilty of a breach of trust. This applies to partners (at dissolution of the partnership); to those who rent farms, paying the rent with a portion of the products; to women having charge of their husbands' business; to a "son of the house" who manages the father's affairs (Mishnah Shebu. vii. 8; "Yad," Sheluḥin, ix. 1; Ḥoshen Mishpaṭ, 93, 1); to agents appointed to buy or to sell for their principals (*ib.* 93, 4; "Yad," Sheluḥin, ix. 5); and to the committee of an idiot or a deaf-mute (Ket. 48a; Yeb. 113a; "Yad," Mekirah, xxxix. 4; Naḥalot, x. 8; Ḥoshen Mishpaṭ, 290, 27). A son of the house, unless he really manages the father's estate, can not be compelled to take the oath to clear himself of a suspicion of breach of trust (Shebu. 48b), nor a guardian appointed by the father (see above), nor a woman who was not a guardian during her husband's lifetime and who had no charge of his business after his death (Mishnah Ket. ix. 6; "Yad," Sheluḥin, ix. 4).

Biblical sanction for employing the oath of purgation to clear the trustee of the charge of breach of trust is found in the text: "If a man deliver unto his neighbor an ass, or an ox, or a sheep, or any beast, to keep; and it die, or be hurt, or driven away, no man seeing it: an oath of the Lord shall be between them both that he hath not put his hand unto his neighbor's goods" (Ex. xxii. 9 [10] *et seq.*). The rabbinical reason for extending the oath to other persons standing in a fiduciary position is stated by Maimonides (*l.c.* 1) as follows: "Because these [various kinds of trustees] excuse themselves [for their breach of trust by the plea] that what they take of the property of the owner is due to them because they were doing business for him and were put to much trouble, hence the sages ordained that they were liable to take an oath to meet a charge of doubt [as to whether they had faithfully accounted for the property in their possession] so that they should perform all their duties in righteousness and good faith."

The oath of purgation was not administered unless the amount with which the trustee was charged exceeded the value of two silver meahs (Shebu. 48b). The predecessors of Maimonides decided that the heirs of a dead partner could not compel the surviving partner to take the oath, because they could not be certain as to the amount which the deceased suspected his partner of misappropriating. But Maimonides himself was of the opinion, following other authorities, that in such cases of doubt the heirs could compel the surviving partner to take the oath ("Yad," Sheluḥin, *l.c.* 3; followed in Ḥoshen Mishpaṭ, 93, 3).

Punishment.

The punishment for breach of trust on the part of a bailee guilty of theft is thus stated in the Bible: "Whom the judges shall condemn, he shall pay double to his neighbor" (Ex. xxii. 8 [9]). If he is guilty of lying or deceit concerning the bailment and swears falsely concerning it, "he shall restore it in the principal and add the fifth part more thereto . . . and shall bring his trespass-offering unto the Lord" (Lev. v. 24, 25 [vi. 5, 6]).

The distinction between the two cases is thus stated in the Mishnah (B. Ḳ. ix. 7, 8): If the bailee, upon being asked to account for the property entrusted to him, pleads that it is lost, and swears to it, and witnesses then prove that he himself consumed it, he must pay the value of the principal only; but if there are no witnesses and he admits that his oath was false, he is obliged to pay the principal plus one-fifth, and to bring a trespass-offering. If he pleads that it was stolen from him and swears to it, and it is then proven that he himself stole it, he must double its value. If there are no witnesses, and he admits that his oath was false, he is obliged to pay the principal plus one-fifth, and to bring the trespass-offering (for further details see BAILMENTS).

In those cases in which an oath of purgation cannot be imposed in spite of suspicious circumstances, the court may try to bring pressure to bear upon the bailee's conscience by proclaiming a general ban of excommunication on all persons who may be guilty of unlawful conduct in connection with the estate under consideration. This is implied in the Talmud where R. Ashi says, concerning the appointment of a guardian for orphans: "The court selects a man whose property is not under dispute, and who is of good repute and law-abiding, and who fears the ban of rabbinical excommunication, and gives him the money of the orphans to administer it" (B. M. 70a). It is clearly expressed by Alfasi (in Shebu. vii., end), Maimonides ("Yad," Sheluḥin, ix. 9), and Bet Joseph, citing R. Simon ben Adret (gloss to Ḥoshen Mishpaṭ, 290, 16).

If a bailee having the bailment in his possession, denies having it, and his deceit is proven, he is rendered incompetent to act as witness and to take an oath (B. Ḳ. 105b *et seq.*; Ḥoshen Mishpaṭ, 92; 294, 1). See BAILMENTS, EXECUTORS, FINDER OF PROPERTY, GUARDIAN AND WARD, OATHS, TRUSTS AND TRUSTEES.

J. SR. D. W. A.

BREAD (Hebrew, "leḥem," occasionally "pat" [piece], from "pat leḥem" = piece of bread; Aramean, "rifta"): Bread was the principal article of food among the Hebrews, while meat, vegetables, or liquids served only to supplement the meal (Gen. xxv. 34, xxvii. 17; Ruth ii. 14; I Sam. xxviii. 24; Gen. xviii. 7).

Preparation of Bread.

Originally the ears of barley or wheat were simply roasted, and this primitive custom of using "ḳali" (parched corn, Ruth ii. 14; I Sam. xvii. 17) was retained for the offering of the firstlings (Lev. ii. 14, xxiii. 14; Josh. v. 11). The primitive bread of the Hebrew, as with all Bedouins, was unleavened and was called "maẓẓot" (unleavened cakes, Judges vi. 29; Gen. xix. 3); hence it was retained for the ancient Passover ritual as "the bread of affliction" (Deut. xvi. 3). The ordinary bread consisted of dough ("baẓeḳ") mixed with fermented dough ("se'or"), which raised the mass into "ḥameẓ" (soured bread), while in the "misheret" (kneading-trough, Ex. xii. 34, 39). The shape of the bread was round—therefore "kikkar leḥem," a circular loaf of bread (Ex. xxix. 23; Judges viii. 5), also "'uggah" (cake, Gen. xviii. 6; I Kings xix. 6); while "ḥallah" (Lev. viii. 26; Num. xv. 20) is probably a perforated or punctured cake, and "lebibah" (II Sam. xiii. 6) a folded or rolled cake. The bread was baked by women. It could be taken as food on a journey (Gen. xxi. 14; I Sam. ix. 7); when kept too long it became dry and moldy (Josh. ix. 5). The SHOWBREAD was kept for a whole week and then eaten by the priests, while the fresh bread was offered anew every Sabbath (Lev. xxiv. 8, 9; I Sam. xxi. 7).

In the time of Herod, bakers furnished the people with bread (Josephus, "Ant." xv. 9, § 2), if such did not already exist in the time of Jeremiah and Nehemiah (Jer. xxxvii. 21; Neh. iii. 19, xii. 38). The priests of Bet Garmo possessed special skill in baking the showbread, but were blamed for keeping their secret to themselves (Yoma iii. 11). In Talmudical times the housewife baked the bread for the week every Friday (Ta'an. 24b, last line; see BAKING).

Figurative Use of "Bread."

"Bread" is often used in the Bible for food in general, as in Gen. iii. 19: "In the sweat of thy face shalt thou eat bread" (compare Gen. xxxix. 6, xlvii. 12; Ex. xxiii. 25; Lev. xxi. 8; Num. xix. 9; Job xxiv. 5; Ps. cxlvii. 9 [A. V. "food"]; I Sam. xx. 24 *et seq.*; Prov. vi. 8; Isa. lxv. 25 [A. V. "meat"]); but as a rule "leḥem" denotes bread, while in the Arabic it signifies meat. In Ex. xvi. 8 and I Kings xvii. 6 it is contrasted with "basar" = flesh. It is the "food" which comes forth from the earth (Ps. civ. 14; Job xxviii. 5; Isa. xxx. 23, lv. 10), and, being solid, sustains (A. V. "strengtheneth") man's heart (Ps. civ. 15; Judges xix. 5 [A. V. "comfort"]), thus becoming a "staff of bread" (Lev. xxvi. 26; Ezek. iv. 16) or "stay of bread" (Isa. iii. 1), the "breaking" of which means famine. On the other hand, "fulness of bread" (Ezek. xvi. 49), or "fatness of bread" (Gen. xlix. 20) is plenty. Giving or breaking bread to the hungry (Isa. lviii. 7; Ezek. xviii. 7; Prov. xxii. 9) is charity; to withhold it from the hungry (Job xxii. 8) is inhuman. To invite the stranger to eat bread and to prepare it for him quickly is hospitality (Ex. ii. 20; Gen. xviii. 5), the lack of which meets with due punishment (Deut. xxiii. 4; Judges viii. 15). The seed of the righteous shall not "beg bread" nor "be in want of bread" (Ps. xxxvii. 25, cxxxii. 15; Isa. li. 14), whereas the children of the wicked "shall not be satisfied with bread" (Job xxvii. 14; compare I Sam. ii. 36; II Sam. iii. 29). Abstinence from "bread" signifies fasting (II Sam. iii. 35).

A special benediction was instituted for bread: "Blessed be He who bringeth forth food out of the earth," after Ps. xiv. 14 (Ber. vi. 1). The one who presided at the table broke the bread and said the blessing (Ber. 46a; Matt. xiv. 19, xv. 36, xxvi. 26 *et seq.*; Acts xxvii. 35); and where three ate together, grace was also said in common (Ber. 50a). Divine blessing rested on the bread which Sarah baked, for she was careful to guard the dough against Levitical impurity (Gen. R. lx.). There is, however, a mark of divine favor in every piece, for when Adam heard the words: "Thou shalt eat the herbs of the field" (Gen. iii. 18), he shed tears and said: "O Lord of the Universe, must I and my ass eat out of the same manger?"; but when God said: "In the sweat of thy face shalt thou eat bread" (Gen. iii. 19), he felt relieved (Pes. 118a). The manna, or "the bread from heaven," was typical of the daily bread received by man from the hand of God; even the sweat of labor was not wanting in the former (Mek., Beshallaḥ, Wayassa', 2 and 3). "He who, having bread in his basket, still says, 'What shall we eat to-morrow?' is one of those of little faith," says R. Eliezer of the first century (Soṭah 48b), a saying corresponding with that of Jesus: "Take no thought for your life what ye shall eat" (Matt. vi. 25–30), and the prayer: "Give us this day our daily bread" (vi. 11; compare Ber. 29b).

Blessing of the Daily Bread.

Simeon ben Yoḥai said: "A loaf of bread and a rod were handed down from heaven tied together as if to say: If ye observe the Law, there will be the loaf of bread for you to eat; if not, there will be the rod for you to be punished with" (Ber. 29b). Bread with salt, the poor man's food (Ber. 2b), should be sufficient for the student of the Law (Abot vi. 4); of him it is said, "The Lord will bless thy bread" (Ex. xxiii. 25; B. Ḳ. 92b). He should be satisfied even with barley-bread (Shab. 140b). However, bran-bread is not so nourishing as fine wheat-bread (Pes. 42a), which feeds the intellect. "The tree of knowledge Adam ate of was wheat," says R. Judah (Sanh. 70b). It is best eaten with some other kind of food. "The Babylonians who eat bread together with pastry are fools" (Beẓah 16a). "Herbs together with bread promote the appetite" ('Er. 140b).

Treatment of Bread.

Bread should be treated with special regard. Raw meat should not be placed upon it, nor an overflowing wine-cup be allowed to spoil it; it should not be thrown across the table nor used to hold up any other thing (Ber. 50b; Mas. Derek Ereẓ. viii.). There is an evil spirit of poverty by the name of Nibbul ("bread-spoiler"), who has power over him who spoils bread; and there is a good spirit by the name of Naḳid ("cleanliness"), who blesses him with plenty who lets not crums of bread lie on the ground (Pes. 111b; Ḥul. 105b).

It was considered improper to hang up bread in a basket. "He who hangs his bread-basket hangs his support," was the common saying (Pes. 111b); however, to have bread in his bread-basket lessened one's hunger (Yoma 74b). "Eat thou not the bread of him that hath an evil eye" (Prov. xxiii. 6).

Whenever Rab Huna broke (or folded) bread for the meal, he first opened his door and said, "Let every one in need come and eat" (Ta'an. 20b). The virtuous woman of the Bible does not eat "the bread of idleness" (Prov. xxxi. 27), and in Talmudical times she broke her bread to the poor (Ta'an. 23b). Micah, the idolater (Judges xvii.), provided the poor on the road with bread, and was therefore not counted among those who have no share in the world to come (Sanh. 103b). The men of Sodom passed a law not to give bread to the needy, and when one maiden, moved to compassion, handed some in a jar to the poor, her countrymen on discovering it besmeared her body with honey, and placed her thus upon the roof, where bees came and stung her to death, and her cry "made the sin of Sodom and Gomorrah very grievous before the Lord" (Sanh. 109b, after Gen. xviii. 20). "He who does not leave some crums of bread for the poor deprives himself of God's blessing; but he must not leave them to a 'guardian spirit,' after the fashion of the heathen" (Sanh. 92a). During the Middle Ages the Jew took an oath by "the bread from God" (Tendlau, "Sprichwörter und Redensarten Deutsch-Jüdischer Vorzeit," p. 105).

"Cast thy bread upon the waters, for thou shalt find it after many days" (Eccl. xi. 1), is illustrated in Ab. R. N. iii., ed. Schechter, p. 17, and in Eccl. R., by the story of a man who suffered shipwreck and was saved by a spirit appearing to him personifying his charities; other similar stories are given in Eccl. R. A more drastic illustration is given by a story reproduced by Dukes' "Rabbinische Blumenlese," 1844, p. 73, from Diez, "Denkwürdigkeiten von Asien," i. 106, quoting Cabus. A man, in order to test the truth of this verse, cast each day into the water several hundred loaves with his name printed thereon. They reached the son of Calif Mutawakkil of Bagdad, who, while bathing, had become imprisoned beneath a rock and remained there for seven days, feeding on these loaves, no one knowing where he was until he was discovered by a diver. Of course, the man who had thus saved the prince from starvation was richly rewarded.

E. G. H. K.

BRÉAL, MICHEL JULES ALFRED: French philologist; born of French parentage at Landau, Rhenish Bavaria, March 26, 1832. He received his education at Weissenburg, Metz, and Paris. In the last-named city, after his studies at the Lycée Louis-le-Grand were completed, he entered the Ecole Normale. He continued his studies at Berlin under Albrecht Weber and Franz Bopp, the founder of the science of comparative grammar. Returning to France in 1859, Bréal became professor at the Lycée Louis-le-Grand and afterward an assistant in the department of Oriental manuscripts at the Bibliothèque Impériale, Paris, where he succeeded Ernest Renan and remained until chosen in 1866 to fill the chair of comparative grammar at the Collège de France, the duties of which he had already discharged for two years. In 1863 he had presented two theses to the Faculté des Lettres of Paris, "Hercule et Cacus" and De Nominibus Persicus apud Scriptores Græcos," to obtain the title of *Docteur et Lettres.* When the Ecole Pratique des Hautes Etudes was founded in 1868, Bréal became director of the section of comparative grammar, and seven years later (1875) was elected a member of the Académie des Inscriptions et Belles-lettres. From 1879 to 1888 he was inspector-general of higher education; and the rank of officer of the Legion of Honor was conferred on him in 1881. He has been commander since 1888.

Bréal did not confine his energy to comparative linguistics, but has written (in the "Revue des Deux Mondes") on comparative mythology and pedagogy, as well as on subjects of more general interest. As a linguist he follows his old teacher Bopp, whose comparative grammar he translated under the title "Grammaire Comparée des Langues Indo-Européennes," 5 vols., Paris, 1867–78. This work, to which the translator added valuable introductions and notes, is somewhat remarkable as being one of the few instances in which a translation, rather than the original text, is generally regarded as the standard of reference. Like many scholars of Latin Europe, Bréal has devoted his attention rather to the psychological than to the mechanical side of linguistics. This trend of his thought is clearly shown by his articles, "Les Lois Intellectuelles du Langage, Fragment de Sémantique," in "Annuaire de l'Association des Etudes Grecques," 1883; "Comment les Mots Sont Classés dans Notre Esprit" ("Comptes Rendus de la Séance Annuelle de l'Institut," 1884); and most of all by his last important work, the "Essai de Sémantique" (Paris, 1897; 2d ed., 1899; also translated into English by Mrs. Henry Cust, London, 1900), in which he sets forth the science of the development of different significations possessed by a word.

Michel Bréal.

In the individual languages of the Indo-Germanic group Bréal's work has been more particularly in the Greek and Italic dialects. It will suffice to mention his paper "Sur le Déchiffrement des Inscriptions Cypriotes," in the "Journal des Savants," 1877; his work on the Euguvine Tablets, published with texts, translations, and notes as a volume of the "Bibliothèque de l'École des Hautes Études" (Paris, 1877); and his "Dictionnaire Étymologique Latin" (Paris, 1885), written in cooperation with Anatole Bailly, who was also joint author with him in his "Leçons de Mots: les Mots Latins" (1881–82); while L. Person assisted him in the preparation of "Les Mots Grecs" (1882). He has done little work in languages outside the Indo-Germanic group; his brief note on an "Inscription Etrusque Trouvée à Carthage," in the "Journal des Savants," 1899, being almost his only study in this category.

Bréal has also contributed much to comparative religion. In 1862 he published a memoir, "Etude des Origines de la Religion Zoroastrienne," which was crowned by the French Institute; and in his "Hercule et Cacus," which first appeared in the following year, he sought to show the value of linguistics in the solution of problems of comparative mythology. His study, "Sur le Mythe d'Œdipe," in the "Revue Archéologique," 1863, was an attack on the symbolic mythologists by an adherent of the analogical school.

Of Bréal's contributions to pedagogics, his essays, "Quelle Place Doit Tenir la Grammaire Comparée dans l'Enseignement Classique?" (1872), "De l'Enseignement des Langues Anciennes" (1890), "La Réforme de l'Orthographie Française" (1890), and

"Quelques Mots sur l'Instruction Publique en France" (1872; 3d ed., 1881), as well as his "Excursions Pédagogiques" (1882), are especially noteworthy. Bréal's briefer contributions on linguistic subjects have appeared chiefly in the "Mémoires de la Société de Linguistique," of which he has been the secretary since 1867. He has published but one paper outside of France, a contribution "On the Canons of Etymological Investigation," in the "Transactions of the American Philological Association," 1893. Twelve of his briefer essays have been reprinted in his "Mélanges de Mythologie et de Linguistique" (Paris, 1877; 2d ed., 1882).

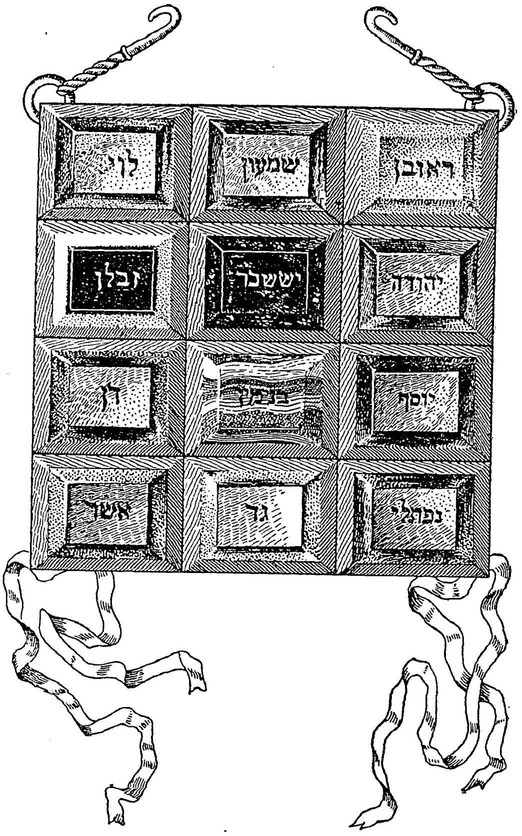
BREASTPLATE: A rendering of the Hebrew "shiryon" or "siryon," which would be more correctly translated "coat of mail" or "cuirass." The kings of Israel used in warfare (I Kings xxii. 34) such body-protectors as were in vogue among their neighbors (compare Goliath's "coat of mail," I Sam. xvii. 5). The character of this piece of armor, as seen on the monuments of Egypt, Assyria, and later in Rome, would indicate that it was a coat of various lengths, often, if not always, made of overlapping plates of metal (compare I Sam. xvii. 5; Deut. xiv. 9). It protected the breast and the back, and in some cases reached as far down as the knees. In certain passages (for example, II Chron. xxii. 14; Neh. iv. 16) the exact character of the armor specified can not be determined. It may be that some such piece of armor served the illustrative purpose of the Prophet Isaiah (lix. 17) and of the apostle Paul (Eph. vi. 14).

J. JR. I. M. P.

BREASTPLATE OF THE HIGH PRIEST "hoshen").—**Biblical Data:** A species of pouch, adorned with precious stones, worn by the high priest on his breast when he presented in the Holy Place the names of the children of Israel. The etymological significance of the Hebrew word is uncertain, but the directions for the making of the breastplate, in Ex. xxviii. 13-30 and xxxix. 8-21, are sufficiently clear.

This breast-piece was to be made in part of the same material as the Ephod. The directions specify that it was to be made "of gold, of blue, and of purple, and of scarlet, and of fine twined linen" (Ex. xxviii. 15). "Foursquare it shall be, being doubled; a span shall be the length thereof, and a span shall be the breadth thereof" (*ib.* xxviii. 16); thus before it was doubled it was a cubit long and a half-cubit wide. On the front face of this square were set, in four rows, twelve precious stones, on each of which was engraved the name of one of the twelve tribes of Israel. These jewels in gold settings were (Ex. xxviii. 17-19): in the first row, "a sardius [margin, "ruby"], a topaz, and a carbuncle [margin, "emerald"]"; in the second row, "an emerald [margin, "carbuncle"], a sapphire, and a diamond [margin, "sardonyx"]"; in the third row, "a jacinth [R. V.: margin, "amber"], an agate, and an amethyst"; and in the fourth row, "a beryl [margin, "chalcedony"], and an onyx [margin, "beryl"], and a jasper." The exact identification and the order of these stones, as well as the tribe represented by each, are matters of speculation. The breastplate was worn over and fastened to the ephod. It hung over the breast of the wearer, and was secured to the shoulders of the ephod by gold cords (or chains). These cords of "wreathen work," tied in the gold rings at the top corners of the outer square of the breastplate, were fastened to ouches on the shoulder-pieces of the ephod. The lower part of the breastplate was fastened to the ephod at some point below the shoulders by a blue ribbon, which passed through gold rings at the lower corners of the inner square. As well as being a means of securing in its place this most important portion of the dress of the high priest, these fastenings formed a brilliant decoration. The term "breastplate of judgment" (Ex. xxviii. 15, 29, 30) indicates that the name was given to this portion of the priestly dress because of its use in connection with the mysterious Urim and Thummim.



Breastplate of the High Priest.

Bibliography: Commentaries on *Exodus*; Neumann, *Die Stiftshütte*, 1861, pp. 150-159; Ewald, *Antiquities*, p. 390; Nowack, *Archäologie*, ii. 119.

J. JR. I. M. P.

——**In Rabbinical Literature:** The Rabbis explain that the breastplate of the high priest is called in Scripture חשן משפט ("breastplate of judgment") because it was intended to work atonement for errors in pronouncing judgment (Zeb. 88b; Yer. Yoma vii.

44b; compare also Targ. Yer. to Ex. xxviii. 15; Philo and the Septuagint have instead of משפט the Greek λόγιον or λογεῖον, which example Rashi follows in the passage to Ex. *l.c.*, translating משפט by "raisonnement"; similarly also Tobiah b. Eliezer, in Leḳaḥ Ṭob on the passage). Aaron and his successors wore the breastplate on the heart (Ex. xxviii. 29) as a reward, because Aaron was "glad in his heart" (Ex. iv. 14) when Moses returned to Egypt, and was not envious because his younger brother was chosen by God to deliver Israel (Shab. 139a; Ex. R. iii., end).

According to the Talmud, the breastplate was made of the same material as the ephod and in the following manner: The gold was beaten into a leaf and cut into threads; then one golden thread was woven with six azure (תכלת) threads, and another golden thread with six purple (ארגמן) threads, and similarly with the scarlet wool (תולעת שני) and the byssus. Thus there were four combinations of sixfold threads, with one golden thread woven through each; and, when these were twisted together the strand consisted of twenty-eight threads (Yoma 71b). The breastplate was fastened to the ouches (משבצות) of the ephod by means of threads of woven gold, passed through rings attached to the right and left of the upper part of the ephod. Furthermore, two rings were attached to the lower ends of the breastplate, from which azure cords passed through two rings at the lower points of the two shoulder-bands of the ephod, where they joined the girdle; so that the lower part of the breastplate was connected with the girdle of the ephod, and could neither slide up nor down, nor be detached (Rashi to Ex. xxviii. 6, in many editions also at the end of Ex.; Maimonides, "Yad," Kele ha-Miḳdash, ix. 6–9).

The Stones of the Breastplate.

The twelve precious stones with which the breastplate was decorated contained the names of the twelve tribes; each name being fully engraved on one stone, in order that, when the high priest came before Him, God might be mindful of the piety of the patriarchs (Ex. R. xxxviii. 8; Lev. R. xxi. 6). No chisel was to touch the stones, nor was it permitted to mark the names of the twelve patriarchs on the stones by means of paint or ink. The engraving was done by means of the SHAMIR, which was placed on the stone, and had the marvelous power of cutting it along the lines of the letters of the proper names, which were first traced with ink (Soṭah 48b). In addition to the names of the twelve tribes, the stones also contained, at the head, the names Abraham, Isaac, and Jacob, and at the end the words: [כל אלה] שבטי ישורן "[all these are] the tribes of Jeshurun" (Yoma 73b, where the first two words are not found, while Yer. Yoma vii., end, 44c has them, and also ישראל instead of ישורון.; Maimonides, *l.c.* 7, seems to have used a source differing both from Bab. and Yer., as his version has the words שבטי יה ="tribes of God"). These words could not be omitted from the breastplate, since the whole Hebrew alphabet had to be included, in order that, on consulting the Urim and Thummim, the high priest might be enabled to form words from the different colors of the individual letters on the stones of the breastplate, and hence might be able to answer questions put to him (Yoma, *l.c.*).

Order of the Names on the Stones.

Even in early times there were various opinions on the order of the names of the twelve patriarchs on the stones; and Baraitas existed that discussed the matter. The latter, however, have evidently been lost; for the opinions therein contained are known only through quotations found in the early authors. A Baraita, quoted by Tobias b. Eliezer in his work "Leḳaḥ Ṭob" on Ex. xxviii. 10, says that the order corresponded to that given in Ex. i. 2–4, except that Zebulun was followed by Dan, not by Benjamin, and that the last two names were Joseph and Benjamin (compare Soṭah 36a, b). This corresponds in part with the order in Num. R. ii. 7, except that there Gad precedes Naphtali; while Ex. R. xxxviii. 8 and Targ. on Cant. v. 14 correspond with the above-mentioned Baraita. According to the Targ. Yer. on Num. ii. 2 *et seq.*, however, the names on the stones of the breastplate followed in the same sequence as that observed by the tribes when marching in the wilderness (Num. ii. 2–21). Targ. Yer. on Ex. xxviii. 17 *et seq.* agrees with Josephus ("Ant." iii. 7, § 5) in saying that the names of the twelve patriarchs followed in the sequence of their ages, while Maimonides (*l.c.*) and Tobias b. Eliezer (*l.c.*) assert that the names of the patriarchs were engraved on the first stone and the words כל אלה וכ on the last, Baḥya b. Asher and Hezekiah b. Manoah say, in their commentaries on Ex. *l.c.*, that each stone contained only six letters, selected from the name of the respective tribal-patriarch, together with one or more letters of the names of the three national patriarchs or of the words שבטי ישורן. Hence the letters on the whole of the stones numbered seventy-two, corresponding with the number of letters in the SHEM HA-MEFORASH. Compare EPHOD, PRECIOUS STONES, and URIM AND THUMMIM.

BREATH. See SOUL; SPIRIT.

BRECHER, ADOLPH: Austrian physician; born at Prossnitz, Moravia, in 1831; died at Olmütz April 13, 1894. He was the son of the physician Gideon Brecher. Adolph Brecher, after attending the gymnasia at Presburg and Prague, studied in Nikolsburg and at the University of Prague, where he devoted himself first to Jewish studies, then to the study of medicine. In 1859 he took up his residence at Olmütz, and practised as a physician there until his death.

Brecher was popular and respected as a general practitioner and as a consummate master of diagnosis. He was physician for all railroads with terminals at Olmütz. Moreover, he took an active and useful part in the public affairs of the city, serving for twenty years as director of the German Association (Deutscher Verein), and sharing in the management of the musical society. The Jewish community at Olmütz chose him as their vice-president for more than a quarter of a century, and the Jewish community at Prossnitz made him an honorary member in recognition of his many services.

Brecher had a noble and richly endowed temperament; he was a clear thinker, a brilliant speaker, and a sympathetic poet full of sparkling humor and deep earnestness. He spoke and wrote in several languages, and developed a prolific and many-sided literary activity. Among his publications are: a book of riddles, "Sphynx," signed "A. B."; and later some collections of humorous poems, of which the following met with greatest favor: "Bunter Kram"; "In Müssigen Stunden," Berlin, 1890; and "Im Schaukelstuhle," Berlin, 1891. He contributed largely to the "Fliegende Blätter" of Munich. In his later years he was permanent collaborator of "Humoristische Deutschland," edited by Julius Stettenheim; "Berliner Wespen," edited by the same; and "An der Blauen Donau," Vienna. In addition to his contribution of poems to these three publications he made a number of translations into German. From the Hungarian he translated Petöfi's poems; from the Czech, Vrchlicky's; and he enriched Jewish literature by an excellent poetical rendition of the Psalms into German, "Die Psalmen Metrisch Uebersetzt," Vienna, 1862. He also revised and published the book his father left unfinished on the proper names found in the Bible, "Eleh ha-Ketubim be-Shemot," Frankfort, 1877.

S. E. N.

BRECHER, GIDEON (GEDALIAH B. ELIEZER): Austrian physician and author; born at Prossnitz, Moravia, Jan. 12, 1797; died there May 14, 1873.

Brecher, who was the first Jew of Prossnitz to study for the medical or any other profession, attained the degree of master of surgery and obstetrics in Budapest in 1824, and the doctor's degree from the University of Erlangen in 1849, with the thesis "Das Transcendentale, Magie und Magische Heilarten im Talmud," Vienna, 1850. His fame in Jewish literature rests principally on this work and upon his lucid commentary on the "Cuzari" of Judah ha-Levi, which appeared with the text in four parts (Prague, 1838–1840). Brecher's correspondence with S. D. Luzzatto about this commentary is published in part in the second volume of the work itself, and in part in Mendel Stern's "Kokebe Yizḥaḳ" (v. 28–34, vi. 95–100, vii. 77–80). The commentary is modern in its tone; and in the preface the author openly states that he attempts to explain metaphysical questions in the light of modern philosophy, and he is not afraid to criticize axioms or formulas which were accepted at the time of the author of the "Cuzari," but were shaken or rejected by later researches. He also utters the opinion, bold for his time, that philosophy is the best check to religion, preventing it from degenerating into superstition and idolatry.

In addition to many contributions to scientific and literary periodicals and collections, and some important "Gutachten" (expert opinions) on social and religious questions submitted to him by imperial and local government officials, Brecher is the author of a monograph on circumcision, "Die Beschneidung der Israeliten," etc., Vienna, 1845, with an introduction by R. Hirsch Fassel of Prossnitz, and an appendix on "Circumcision Among the Semitic Nations," by M. Steinschneider, who is a nephew of Brecher. Brecher also wrote "Die Unsterblichkeitslehre des Israelitischen Volkes," Vienna, 1857, of which a French translation appeared in the same year by Isidore Cahen; and "Eleh ha-Ketubim be-Shemot," a concordance of Biblical proper names, part of which was revised and published after his death by his son Adolph Brecher.

BREGMAN, ELIEZER B. MOSES: Russian financier and philanthropist; born in Indura (commonly called by Russian Jews "Amdur"), government of Grodno, in 1826; died in Teplitz, Bohemia, Sept. 3, 1896. He was a prominent business man of Grodno, where he settled early in life, and was known over Russia as the farmer of the Korobka (meat-tax) in many of the large cities of the empire. The government rewarded him for his various business enterprises and charities with a gold medal and with the title of hereditary honorary citizen. He spent more than 100,000 rubles for charitable institutions.

H. R. P. Wi.

BREIDENBACH, MORITZ WILHELM AUGUST: German jurist; born at Offenbach-on-the-Main Nov. 13, 1796; died at Darmstadt April 2, 1857. He first attended the gymnasium at Frankfort, and then the University of Heidelberg, from which he was graduated in 1817 as LL.D. After a supplementary course at Göttingen he began the practise of law at Darmstadt in 1820. In 1831 he became counselor of the treasury in the Ministry of the Interior, and in 1836 counselor of the cabinet, in which capacity he officiated as commissioner of the Hessian government in the Landtag. He became a member of the council of state in 1848, but was compelled to resign this office upon the outbreak of the Revolution. He was recalled, however, in 1849 as chief counselor of education, which position he held until his death. Breidenbach displayed exceptional ability in every capacity, whether as a jurist, official, or popular representative. But he was frequently opposed by those who admired his learning, because of his pronounced monarchical views. He was the principal author of the penal code of Hesse, and actively participated in framing the "Allgemeine Deutsche Wechsel- und Handelsrecht." His principal literary work is his commentary on the Hessian legal code. He was the son of Wolff Breidenbach.

S. J. So.

BREIDENBACH, WOLF: German court agent and champion of Jewish emancipation; born in the village of Breidenbach, Hesse-Cassel, 1751;

died in Offenbach Feb. 28, 1829. He went to Frankfort-on-the-Main as a poor boy, and for a time was a baḥur, being supported by others while he studied Talmud and rabbinical literature. He also secretly acquired the knowledge of Neo-Hebrew, German, and some scientific subjects, besides being the best chess-player in the town. This accomplishment attracted the attention of a wealthy nobleman, who was so impressed by the young Talmudist's intelligence and honesty that he entrusted him with the management of his financial affairs. Breidenbach proving himself astute and trustworthy, his employer lent him a large sum of money, with which he embarked in the banking and in the jewelry business. He prospered, and gained the confidence of the small German princely courts with which he had business, becoming "Hoffaktor" of the elector of Cassel, and "Kammeragent" of the prince of Isenburg, besides holding similar positions under the rulers of various other principalities.

Breidenbach used his wealth and influence to benefit his oppressed coreligionists. His untiring efforts to abolish the Jewish "Leibzoll"—an obnoxious toll which Jews had to pay on entering towns where they did not dwell or had no special privileges—place him among the foremost champions of Jewish emancipation. He effected its abolition in Isenburg April 25, 1803, and in Homburg Nov. 1 of the same year. Aschaffenburg, Schönberg, and finally Frankfort itself (Aug. 24, 1804) abolished the toll through his exertions; and the princely courts of Nassau-Usingen, Nassau-Weilberg, Löwenstein, Wertheim, Leiningen, as well as the court of Ehrbach, followed their example. In some cases Breidenbach acted as the syndic or attorney for various Jewish communities. He made an unsuccessful effort to induce the Diet of Ratisbon to abolish by a single act the "Leibzoll" in all the German states, and only succeeded in having it abrogated in that city itself and in Darmstadt (Jan. 19, 1805).

Breidenbach was the friend and protector of the grammarian and publisher Wolf Heidenheim of Rödelheim, and is said to have translated several hymns for Heidenheim's German edition of the Maḥzor.

He had three children: one daughter, Sarah, who married Abraham Gans of Cassel, and two sons, Moritz and Isaac (Julius), both of whom embraced Christianity after his death. The first was a grand-ducal "Ministerialrath," the second became ambassador in Stuttgart.

BREIER, EDUARD: Austrian writer; born at Warasdin in Croatia Nov. 3, 1811; died at Zaiwitz near Znaim, Moravia, June 3, 1886. His first novel, "Der Fluch des Rabbi," published in 1840, was written in eleven days, during his furlough while an artilleryman. This work at once brought him into prominence and caused him to decide to become a journalist and a writer of fiction. He assumed charge of the "Prager Zeitung," which he continued to edit until the paper was suppressed in 1848. He then settled in Vienna, where he soon became a popular writer of Jewish and Austrian tales. His Jewish novels, in addition to the one mentioned, were: "Die Sendung des Rabbi," "Die Sabbathianer," and "Alt- und Jung-Israel." He wrote many tales dealing with Austrian history, which are strikingly national in sentiment, the most characteristic among them being perhaps "Wien und Rom" and "Kaiser Joseph."

Bibliography: *Jüdisches Athenæum*, p. 30, Leipsic, 1851.

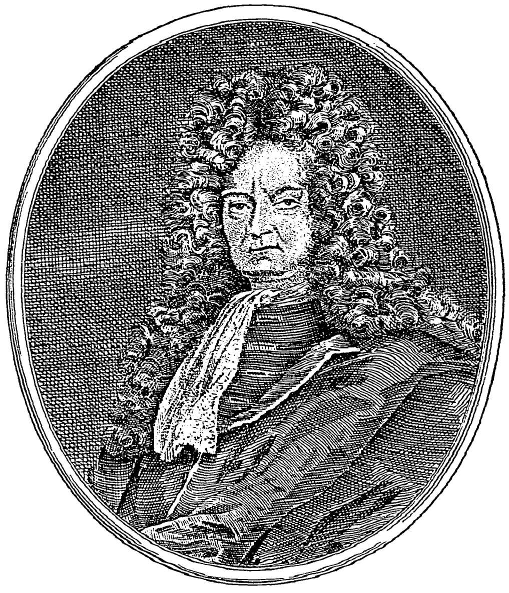
s. A. M. F.

BREITENSTEIN, MAX: Austrian writer and translator; born at Iglau, Moravia, Nov. 10, 1855. He attended the gymnasium of his native city and the University of Vienna. In 1876 he turned to journalism and founded the weekly "Alma Mater," which he conducted till 1881. Breitenstein compiled: "Akademischer Kalender der Oesterreichischen Hochschulen"; "Kommersbuch der Wiener Studenten," 1880, 3d ed. 1890; "Sammlung der Bedeutendsten Reden des Oesterreichischen Parlaments." He is also the author of several pamphlets, essays, humoristic sketches, and of translations from the English, and was the editor of the "Wiener Correspondenz" and the "Allgemeine Juristen-Zeitung."

Bibliography: Eisenberg, *Das Geistige Wien*, i. 52.

s. M. B.

BREITHAUPT, JOHN FREDERICK: Christian Hebraist and rabbinical scholar at the beginning of the eighteenth century; aulic councilor to the emperor and to the duke of Gotha. He produced an elaborate edition of Yosippon with a Latin version, under the title "Josephus Gorionides" (Gotha, 1707). The detailed subject-index at the end still renders it of value for reference. A still



John Frederick Breithaupt.
(From Breithaupt's "Rashi.")

greater exploit was his Latin translation of the commentary to the whole Bible of Rashi, whom he calls "Jarchi," which work appeared in three thick volumes (Gotha, 1710-13). Breithaupt takes note of the various readings of Rashi's text; and, on the whole, produced a version of considerable accuracy, considering the circumstances under which he wrote.

T. J.

BREMEN: Free city of the German empire; remarkable as one of the places where few Jews have ever dwelt. A baptized Jew, Paulus, is said to have taught alchemy there to Archbishop Adalbert about the middle of the eleventh century. Reference is also made to the Jew Ludbert in 1324. Even the Jews traveling through Bremen were hampered in their movements. They could remain in the city only one night, and had to report to the burgomaster, and to pay the Jews' tax. Only during the "Freimarkt" were they allowed to stay longer and to do business; and for this privilege they had to pay a special tariff. From the sixteenth century, when many of their coreligionists were settling in the districts of Hanover, the Jews made frequent attempts to obtain permission to live in Bremen. Individual Jews were often expelled.

In the beginning of the nineteenth century Bremen, and also certain villages, received some Jewish inhabitants; but they, too, were expelled in 1803 on complaints of the merchant gild of the city. About thirty families settled in the city during the French occupation (1811-13), a period most favorable to the Jews. But these also were banished after the year 1814 in consequence of the Vienna convention, though their expulsion was not totally effected until six years later.

The citizens became more tolerant after 1848, in which year a small Jewish community was founded. In 1864 it numbered only 179 persons in the city and 255 in the whole district of Bremen, or 2 per cent of the entire population. At present (1902) there are 947 Jews in the city and 1,057 in the district. M. Levinger is preacher of the community. The synagogue was inaugurated Sept. 13, 1876. Dr. Leopold Rosenak was chosen rabbi in 1896.

K. A. F.

BRENZ, SAMUEL FRIEDRICH: Anti-Jewish writer; born at Osterburg, Bavaria, in the latter half of the sixteenth century; date and place of death unknown. He was converted to Christianity in 1610 at Feuchtwangen, and wrote "Jüdischer Abgestreifter Schlangenbalg" (The Jewish Serpent's Skin Stripped), in which he bitterly attacked his former coreligionists, whom he accused of hating "the most pious and innocent Jew, Jesus Christ," and in which he denounced their religious literature. This book, divided into seven chapters, appeared at Nuremberg in 1614, 1680, and 1715.

Against him Solomon Ẓebi Hirsch of Aufhausen (not Offenhausen nor Ufhausen) wrote "Der Jüdische Theriak" (The Jewish Theriak or Antidote), Hanau, 1615. For the use of Christians as well as Jews he had it printed in German and in Hebrew, and the work was successful in refuting the false accusations of Brenz. A new edition of the "Theriak" appeared at Altorf in 1680, and a Latin translation by Johann Wülfer, together with the Schlangenbalg, was published at Nuremberg in 1681.

Wülfer strongly defended the Jews against Brenz, whose crass ignorance, hatred, falsehood, and pernicious fanaticism, as well as his plagiarism of Pfefferkorn, he exposed. A Hebrew translation under the title "Ha-Yehudim," by Alexander ben Samuel, is extant in manuscript in the library of the University of Leyden.

D. S. MAN.

BRESCH or BRES, JUDAH LÖW BEN MOSES NAPHTALI (Paulus Æmilius?): Translator of the Pentateuch into Judæo-German; lived in Germany in the sixteenth century. He is known only from De Rossi (s.v. "Guida Figlio di Mose Naftali Bres"; Hamberger, s.v. "Bress"), who credits him with the translation which first appeared in Cremona in 1560 and was reprinted in Basel in 1583, and which, besides the Pentateuch, contains a translation of the Hafṭarot and the five Megillot with extracts from Rashi's commentary. But the preface to the translation states plainly that it is the work of Paulus Æmilius, a converted Jew residing in Rome; it seems probable therefore that this was the name assumed by Bresch after his conversion, although Steinschneider ("Sitzungsberichte der Phil.-Philol. K. der K. Bayerischen Akademie der Wissenschaften," 1875, part 2, p. 185) says that the former Jewish name of Paulus Æmilius is not known. Fürst, who probably had no other source than De Rossi, knows only of Bresch, but the more critical Benjacob expresses some doubt on the matter. According to some authorities, the translation was reprinted in Basel in 1603, and in Prague in 1610, and there is also a quarto edition without date, which appeared in Augsburg. The translation is said to follow closely that of Elias Levita, which first appeared in 1544.

G. P. WI.

BRESCIA (Hebrew, בּרישה): City and province of Lombardy, Italy. The Jews first settled there during Roman times. A commemorative stone, dating from the fifth century, probably comes from a synagogue. In the Middle Ages definite information concerning the settlement of the Jews in Brescia dates from the period of the Venetian rule over the cities of Lombardy, beginning in 1426.

As in all its other possessions, Venice permitted the Jews to live under the same conditions in the communities around the Garda lake. In 1434 a Jew was solemnly baptized in Brescia. The population, however, already unfavorably disposed toward the Jews, was incited against them by fanatic monks; and the Senate of the republic was repeatedly called upon to protect the Jews, especially during the disturbances after the alleged murder of Simon of Trent in 1475. They were required to wear a badge. The old statutes of the town refer to them in the column "Maleficiorum Criminalium," "Statuti Vivili," Brescia, 1557. They gained their living by money transactions, and, as the Christians complained about their dealings, it was left to Brescia, in 1481, by the authority of Venice, to permit the Jews to remain or to expel them. During the short time of the French rule, 1509–12, the Jews were plundered and then expelled. In 1516 they were again admitted by Venice; but after the battle of Lepanto in 1571 the Senate determined to expel them, and since that time it seems that Jews have lived at Brescia only occasionally, and chiefly as money-lenders. They are mentioned in documents of 1596, 1680, and 1787. Heinrich Heine, in 1844, saw a synagogue there ("Italienische Reise," vol. i., end).

The city has no Jewish community at present (1902). In the province of Brescia there are Jews in the Riviera of Lago di Garda. There was an old settlement at Salò, and Jews were also living at Iseo, Gavardo, Palazzuolo, Gottolengo, Lazzaro, and Barco.

Brescia is famous for the printing establishment which Gershon b. Moses Soncino conducted at that city and at Barco in the same province (1491–96), publishing especially celebrated editions of the Bible (De Rossi, "Annales," i. 39, 41, 46–48, 51; ii. 30, 31). The Cod. Turin 45 was sold at Brescia in 1509, shortly before the expulsion. Among the places in the province, Salò deserves especial mention as the birthplace of Moses Sefardi b. Abraham of Salò, 1320, and of Nathan da Salò, 1487.

G. I. E.

BRESLAU. See SILESIA.

BRESLAU, ARYEH LŌB BEN ḤAYYIM: German Talmudist and rabbi; born in 1741 at Breslau, Prussia; died April 22, 1809, at Rotterdam, Holland. He lived at Lissa, Posen, and later at Berlin, where he was an inmate of the bet ha-midrash of the philanthropist Daniel Jafe. From Berlin he went to Emden, Prussia, as city and district rabbi. In 1781 he was called as chief rabbi to Rotterdam. Breslau was highly reputed as Talmudist, as is shown by his many responsa, and by the fact that such celebrated men as Phineas Hurwitz, Isaiah Berlin, and David Tevele Schiff referred Talmudic questions to him. He was also distinguished by his knowledge of the secular sciences. He enjoyed great popularity in Holland, and his reputation was not confined to Jewish circles, but many Christian scholars and theologians were also among his friends. He was buried with great ceremony, many delegates from the various Jewish communities attending his funeral. His memory is still revered among the Dutch Jews.

Breslau is the author of a volume of responsa, "Pene Aryeh" (Lion's Face), Amsterdam, 1790, which is distinguished by its logical method and reveals a thorough knowledge of the Talmud. Recognizing the latter work as the highest authority, he always applied common sense to the elucidation of Biblical and Talmudic precepts. While respecting the post-Talmudic authors, he wrote entirely independently of them and without prejudice (Nos. 14, 63). Aside from Talmudic questions, the "Pene Aryeh" also contains answers to other matters, which bring out the author's thorough knowledge of Hebrew linguistics. The style of the responsa is simple and clear, the language being that of the Mishnah with an admixture of pure Hebrew phraseology, without rhetorical flourishes. The work on the whole reveals a serious scholarly mind.

When the French revolutionary army came into Holland, in 1793, Breslau wrote a series of prayers for the synagogue, which were translated into Dutch, and were published with a detailed preface by the Christian minister Jan Karp. Some fragments of Breslau's posthumous works are still preserved in the bet ha-midrash of Rotterdam. A poem that can hardly be characterized as successful, "Mizmor le Shabbat" (Psalm on the Sabbath), has recently been published by Dr. Ritter, chief rabbi in Rotterdam. Breslau's three sons, who took the family name Löwenstamm, were Abraham, rabbi in Meseritz, and later in Emden; Ḥayyim, rabbi at Leeuwarden; and Mordecai, assistant rabbi in Rotterdam, all known as Talmudists and Neo-Hebraic writers. His grandson, Menahem Mendele ben Ḥayyim, was chief rabbi at Rotterdam.

BIBLIOGRAPHY: Ritter in *Oẓar ha-Sifrut*, v. 265 *et seq.*; Roest's *Israelitische Letterbode*, iv. 109; *Ha-Measef*, 1809, p. 209; *Allg. Zeit. des Jud.* 1837, p. 448; Steinschneider, *Cat. Bodl.* No. 4432.

L. G. I. BER.

BRESLAU, JOSEPH B. DAVID: German Talmudist and rabbi; born (probably at Breslau) in 1691; died Jan. 22, 1752, at Bamberg. He was at first a rabbi at Grabfeld near Fulda, then rabbi of Bamberg, 1743–52, where his brother-in-law, Moses b. Abraham Broda, had officiated, 1718–33. Breslau wrote the following works: (1) "Shoresh Yosef" (Joseph's Root), Amsterdam, 1730, on the legal term MIGGO; (2) "Ḥoḳ Yosef (Joseph's Law), *ib.* 1730, a partial commentary on Joseph Caro's Shulḥan 'Aruk, Oraḥ Ḥayyim, on the passages treating of the Passover; (3) "Ketonet Yosef" (Joseph's Robe), Fürth, 1769, pilpulistic Haggadah, arranged according to the weekly lessons of the year. Breslau was an apt pupil of his father-in-law, Abraham Broda, like whom he is distinguished for the great acuteness and wit shown in his writings. His first work, which especially shows these characteristics, may be considered as the most important Talmudic work that was produced by the school of Abraham Broda.

One of Breslau's sons, Abraham, was a learned merchant of Mühlhausen in Alsace. He issued the posthumous work of his father, to which he added his grandfather's work, "Toledot Abraham."

BIBLIOGRAPHY: Eckstein, *Gesch. der Juden in Bamberg*, pp. 171–173 (contains also Breslau's epitaph).

L. G.

BRESLAU, MARCUS HEYMANN: Author and journalist; born at Breslau, Germany; died in London May 14, 1864. He went to London as a youth, and for a time taught Hebrew and was attached to a synagogue. He then became connected with the "Hebrew Review," edited by Dr. M. J. Raphall. A few years later, when the "Jewish Chronicle" was started, he conducted that periodical for a number of years, in conjunction with the proprietor, and on the death of the latter became sole proprietor and editor, though he sold it a few months afterward. Being well versed in Hebrew and possessed of considerable energy and activity, he had a share in nearly every movement of the Anglo-Jewish periodical press and in several other literary undertakings started by foreign Hebraists in England. Some years later he tried to revive the "Hebrew Review," but failed, and he then retired from active work.

Breslau was the author of a Hebrew grammar and dictionary. From the German he translated devotional exercises for women, and copied various Hebrew manuscripts in the collection at Oxford. He helped to translate into English the two volumes of "Miscellanea" from the Bodleian, edited by H. Edelmann. Breslau stood forth as the ready scribe and, to some extent also, the Hebrew poet of the community. A public subscription and testimonial were presented him during his later years, in recognition of a thirty-year literary activity.

J. G. L.

BRESLAUER, HERMANN: Austrian neuropath; born at Duschnik, Bohemia, Nov. 10, 1835. He was educated at the gymnasium at Pilsen and the University of Vienna, graduating from the latter as doctor of medicine in 1860. Establishing himself as a physician in the Austrian capital in the same year, he was assistant to Professor Leidersdorf from 1861 to 1872, when he, with Dr. Fries, founded a private hospital for mental and nervous diseases at Inzersdorf, near Vienna.

S. F. T. H.

BRESLAUER, MAX: German chemist; born at Trebnitz, Prussian Silesia, June 19, 1856. He received his education at the universities of Leipsic, Heidelberg, and Breslau, graduating with the degree of doctor of philosophy. In 1880 he was appointed judicial and police chemist in Lissa, Prussia, and in 1882 chief of the experimental bureau of the board of health in Brandenburg-on-the-Havel. Four years later he was called to Berlin to fill the same position on the board of health of the German capital, which he holds at present (1902).

Breslauer has written many essays and reports in the professional journals of Germany. Among his works may be mentioned: "Einfache Methoden zur Trinkwasser-Untersuchung," 1884; "Chemische Untersuchung der Luft für Hygienische Zwecke," 1885; "Die Anwendung des Lactodensimeters zur Milchkontrolle," 1886; "Practische Anleitung zur Untersuchung der Frauenmilch," 1892; and "Chemische Beschaffenheit der Luft in Charlottenburg und Berlin," 1894.

Bibliography: Kürschner, *Deutscher Literatur-Kalender*, 1902, s.v.

S. F. T. H.

BRESLAUR, EMIL: German musician and writer on musical pedagogics; born at Kottbus May 29, 1836. He first attended the gymnasium in his native city, and later the seminary at Neuzelle. Upon his graduation from that institution he became preacher and religious instructor in the Jewish congregation of Kottbus. In 1863 he removed to Berlin in order to take a four-year course in music at Stern's Conservatory, studying with Jean Vogt and H. Ehrlich (piano), Fl. Geyer, Fr. Kiel (composition), H. Schwantzer (organ), and J. Stern (score-reading and conducting).

For eleven years (1868–79) Breslaur was teacher at Prof. Th. Kullak's "Neue Akademie der Tonkunst," his special department being the pedagogics of pianoforte-playing. Shortly after leaving the academy he formed a society among the music-teachers of Berlin, which in 1886 developed into the "Deutscher Musiklehrer-Verband." Breslaur is also the founder and director of a piano-teachers' seminary.

A work published by Breslaur in 1874, entitled "Die Technische Grundlage des Klavierspiels," obtained for him the title of professor. In 1883 he was appointed choirmaster of the Reformed Synagogue of Berlin, which position he still (1902) holds. In addition to his contributions as musical critic of the "Spenersche Zeitung" and the "Fremdenblatt," Breslaur has published the following theoretical and pedagogical works: "Die Technische Grundlage der Klavierspiels" (1874); "Führer Durch die Klavierunterrichts-Litteratur"; "Zur Methodischen Uebung des Klavierspiels"; "Der Entwickelnde Unterricht in der Harmonielehre"; "Ueber die Schädlichen Folgen des Unrichtigen Uebens"; "Klavierschule," 3 vols., 18th ed., 1898; a compilation entitled "Methodik des Klavierunterrichts in Einzelsätzen" (1887); "Melodiebildungslehre auf Grundlage des Harmonischen und Rhythmischen Elements" (1896); "Sind Originale Synagogen- und Volksmelodien bei den Juden Geschichtlich Nachweisbar" (Breitkopf and Härtel)—a pamphlet devoted to the discussion of the melodies of the Jewish liturgy.

Since 1878 Breslaur has published a pedagogical periodical entitled "Der Klavierlehrer." He edited the eleventh edition of Schubert's "Musikalisches Konversations-Lexikon" (1892), and he is the author of a number of choruses (several of them for the synagogue service), songs, and pianoforte pieces.

BRESNER, ISAAC BEN ELIJAH LEVI (called **"Melammed"** [teacher]): Austrian educator; lived at Prague in the second half of the seventeenth century and the beginning of the eighteenth. In 1795 Bresner published at Prague, under the title "Iggeret Yiẓḥaḳ" (The Letter of Isaac), an order of confession, compiled from Gerundi's "Sefer ha-Yirah" and from Isaiah Hurwitz's "Shene Luḥot ha-Berit," and now inserted in many rituals. He also published in Judæo-German a compilation of maxims entitled "Dibre Musar" (The Words of Ethics), Prague, 1812.

Bibliography: Wolf, *Bibl. Hebr.* iii., No. 1172; Steinschneider, *Cat. Bodl.* col. 1097; Fürst, *Bibl. Jud.* i. 131.

S. I. Br.

BRESNITZ, HEINRICH: Austrian author and journalist; born at Czernowitz, Bukowina, Austria-Hungary, 1844. In 1867 he established in Vienna a periodical, "Der Osten," and in 1869 a political journal, "Der Patriot." From 1879 to 1886 he was the proprietor and chief editor of the "Morgen-

Post." He is the author of the following political pamphlets: "Die Verfassungspartei und das Ministerium Hohenwart," and "Betrachtungen über den Ausgleich." In 1893 Bresnitz went to Bulgaria.

s. M. Co.

BRESSELAU, MEÏR ISRAEL: German notary and secretary of the Reform congregation of Hamburg; born 1785 (?); died in Hamburg Dec. 25, 1839. He was identified with the Reform movement in Hamburg from its beginning, and when the Orthodox party attacked the Hamburger Tempelverein in the pamphlet "Eleh Dibre ha-Berit" (These Are the Words of the Covenant; Altona, 1819), Bresselau wrote as a reply his polemical work, "Hereb Noḳemet Neḳam Berit" (A Sword That Revengeth the Quarrel of the Covenant; Dessau, 1819). The magnificent Hebrew style of the latter publication is praised even by Grätz ("Gesch. xi. 385), and it ranks among the ablest literary productions of the controversy between the orthodox and reform parties. Bresselau was also joint author with Isaac Säckel Fränkel of "Seder ha-'Abodah" (Ritual of the Service), the Hebrew-German prayer-book of the Hamburg Reform Temple, Hamburg, 1819. But Fürst ("Bibliotheca Judaica," i. 131) errs in ascribing to him the allegorical drama "Yaldut u-Baḥarut" (Childhood and Youth; Berlin, 1786), which was written by Mendel BRESSLAU, who died in 1829. Bresselau's successor as secretary of the Temple congregation was Gabriel Riesser.

BRESSLAU, HARRY: German historian; born in Dannenberg, Hanover, March 22, 1848. He studied history in Göttingen from 1866 to 1869; became teacher of the real-school in Frankfort-on-the-Main; afterward occupied a similar position in Berlin, and at the same time began his academic career as privat-docent in the university in that city. In 1877 he was appointed assistant professor at the same university, and in 1890 professor at the University of Strasburg, which position he still (1902) occupies. In 1887 he became corresponding member of the Munich Academy of Sciences. In 1888 he was elected a member of the board of editors of the "Monumenta Germaniæ Historica," a publication which has for its object the collection of all the ancient sources of German history. For this series he edits the periodical devoted to its interests, the "Neues Archiv der Gesellschaft für Aeltere Deutsche Geschichtskunde."

Bresslau also took a very important part in the foundation of the society for the investigation of the sources of the history of the Jews in Germany (Historische Commission für Geschichte der Juden in Deutschland), whose president he is (1902); and its magazine, "Zeit. für die Gesch. der Juden in Deutschland," contains a number of valuable essays from his pen. The most important are those proving that the story according to which Charlemagne called Rabbi Kalonymus from Lucca to Germany as chief rabbi of all the Jews, was a fabrication, and that the charter of Henry IV. given to the Jews of Speyer was spurious. A number of valuable works on German history have been written by Bresslau, among which are: "Die Kanzlei Kaiser Konrads II." (Berlin, 1869); "Diplomatas Centum" (*ib.* 1872); "Jahrbücher Kaiser Heinrich II." (*ib.* 1875); "Der Sturz Zweier Preussischer Minister" (*ib.* 1879); "Jahrbücher des Deutschen Reiches Unter Konrad II." (Leipsic, 1879-84); "Handbuch der Urkundenlehre für Deutschland and Italien" (*ib.* 1889).

BREST-LITOVSK (in Polish, **Brzesc**; in Russian documents, **Brestye**, and, later, **Berestov**; and in Jewish writings, **Brisḳ** [בריסק] or **Brisḳ de-Lita** = "Brisk of Lithuania"): A fortified town in the government of Grodno, Russia, at the junction of the Mukhovetz river with the western Bug; capital of the district of the same name. The Jewish population of the city in 1897 was 30,252, in a total population of 46,542; that of the district (including the city) was in the same year 45,902, in a total of 218,366, or 21.02 per cent.

Brest was the largest and the most important of the first five Jewish settlements in Lithuania, dating from the second half of the fourteenth century, and continued in that leading position till the rise of Wilna in the seventeenth century. According to Bershadski, the well-known charter of Grand Duke Vitold, dated July 2, 1388, was originally granted to the Jews of Brest only, and was extended subsequently to the other Jewish communities of Lithuania and Volhynia. Brest-Litovsk soon became the center of trade and commerce, as well as of rabbinical learning, and the seat of the administration of the Jewish communities of Lithuania and Volhynia.

Early History.

The fifteenth and sixteenth centuries must be regarded as the golden age in the history of the Jewish community of Brest. In the charter of Casimir Jagellon, granted Aug. 14, 1447, to all Jews in Lithuania and Poland, Brest is mentioned, among other important provincial towns, as controlling many territories. In 1463 the same king presented a Jew named Levan Shalomich with several estates in the district of Brest, and leased to him certain villages ("Russko-Yevreiski Archiv." i., No. 5).

When, in 1472, merchandise belonging to Itzek (Isaac) of Brest, collector of taxes, was arbitrarily seized in Prussia, the bishop of Wilna and six secular councilors of the king interceded in his behalf before the grand master Henry Richtenberg (*ib.* No. 6). From the edicts of King Casimir IV., dated May 30, 1487, and May 12, 1489, and of Grand Duke Alexander Jagellon, Oct. 14, 1494, it appears that the customs duties of Brest and its districts were farmed by Jews of Brest and Lutzk (*ib.* Nos. 14–25). During the reign of Casimir all the important commercial and financial operations of Lithuania were concentrated in the hands of the Jews, especially of those of Brest, among them the brothers Danke, Pesaḥ, and Lazar Enkovich (*ib.* Nos. 34, 46). In 1495 Alexander banished the Jews of Brest and other Lithuanian cities to Poland, whence they were permitted by him to return in 1503. During the banishment the synagogue of Brest was presented by Alexander to the Christian inhabitants of Brest to be used as a hospital ("Slownik Geographiczny," *s.v.*); but when the Jews returned it was given back to them.

"Senior" of Brest.

In 1507 the community of Brest was the object of the special attention of Sigismund I.; and its history of that period is intimately connected with the brothers Jesofovich. The eldest of these, Abraham Jesofovich, who embraced Christianity, filled several high offices and was secretary of the treasury under Sigismund during 1510–19. His two brothers, Michael and Isaac, who remained true to the faith of their fathers, also received important favors. In 1513 they were farmers of the customs duties of Brest, Lutzk, and Vladimir, and afterward held leases of the taxes on salt and wax, fumage (chimney-money), taverns (Mohilev and Vitebsk), and many other objects of revenue. An event of the highest importance in the life of the brothers Jesofovich, as well as for the community of Brest and for the Jews of Lithuania, was the appointment (Feb. 27, 1514) of Michael Jesofovich as the "senior" of all the Lithuanian Jews (R. Y. A. i., No. 60). The power of a "senior" was, as Harkavy and Bershadski have shown, of a purely temporal nature; the appointment having been actuated by economic and utilitarian motives, as the king considered it to be the best means of securing from the Jews prompt and regular payment of taxes (Grätz, "Gesch. der Juden," Hebrew transl., vii. 313, note 1). In 1519 a certain Aaron the Blind was tried for the murder of Ivan Pralevich by the Brest city court, because the Jews of Brest refused to have anything to do with the accused, who was described as a "tramp and murderer, who had lost his eyesight through stealing grapes." They even would not offer bail for him when bail was allowed. Aaron was accordingly tried by the city authorities. After the trial Michael Jesofovich and the Brest Jews, realizing the danger of creating a precedent in relinquishing the power of jurisdiction granted them by the king, brought suit against the magistrate and other authorities of Brest for interference in a matter pertaining to their jurisdiction. In 1525 the king raised Michael to the hereditary nobility—an unprecedented honor for a Jew in the sixteenth century.

In 1576 (Dec. 6) King Stephen Bathori relieved the Jews of Brest from all taxes on account of serious losses sustained by them through fires ("Akty Wilenskoi Archeograficheskoi Kommissii," v. 139).

About half a century after the death of Michael Jesofovich there lived in Brest-Litovsk another remarkable personage, named Saul Wahl or Wol, concerning whom authentic information is so scanty that it is difficult to separate legends from historical facts. The identity of Saul Judich, "the king's servant"—a most influential Jew under Stephen Bathori and Sigismund III.—with Saul Wahl, the legendary king of Poland who reigned for one night, has, however, been satisfactorily proved by Bershadski in his article, "Yevrei Korol Polski" (in "Voskhod," 1889, Nos. i.–v.). In 1580 the Jewish community of Brest entrusted him with the conduct of the very important and complicated case, before the commissioners of the king, against the Christian merchants of Brest, who would not allow the community the proportion (one-quarter) of city revenues which had been granted to the community by charter. For a detailed account of his activity in the Brest community see Saul Wahl.

Commercial Activity.

From records of the custom-house of Brest-Litovsk (published in "Archeograficheski Sbornik," iii. 289–322, iv. 252–260) it is evident that the greatest part of the merchandise imported from Germany and Austria via Lublin, or exported from Slutzk via Lublin to Gnesen, in 1583 and the following years, belonged to the Jews of Brest. They imported, among other merchandise, wax, furs, leather, olives, hats and caps, paper, nails, iron, paint, locks, knives, mirrors, mohair-yarn, cinnamon, muscatel, neckties, and wire; from Hungary, linen; from Glogau, nuts, plums, lead, needles, pins, ribbons, wine, velvet, black silk, pepper, cards, bells, sugar, raisins; and from Moravia, cloth. The exports consisted of Moscow mittens, soap, furs, bridles and harness (both black and mounted in brass), copper belts, lumber, and grain.

From a document dated Dec. 14, 1584, it is evident that Isaac (Isaiko) Shachovich, a Jew of Brest, visited Moscow on business in 1581, notwithstanding the prohibition of Ivan the Terrible, and en route stopped in Mohilev at the house of his friend, the tax-collector Isaac Jacobovich.

Of the importance of the Jewish community of Brest, there are many proofs in the official documents of Lithuania; thus in 1567, when the Lithuanian Jews were taxed by King Sigismund Augustus with a special "loan" of 4,000 "kop groschen," the share that Brest was required to furnish was 1,300 kop groschen, almost a third of the loan ("Aktovaya Kniga Metriki Litovskoi: Publichnyya Dyela," No. 7, p. 163; "Russko-Yevreiski Archiv," ii., No. 265). However, on the appeal of Jacob Jugilovich and Rubin Agronovich of Brest, acting in the name of all the Jewish communities of Lithuania, the total loan was reduced to 3,000 kop groschen ("Aktovaya Kniga Metriki Litovskoi: Zapisei," No. 48, p. 112; "Russko-Yevreiski Archiv," ii. No. 266).

From the "Pinkes" (Jewish Archives) of Lithuania it appears that the Jewish communities of the grand duchy at that time were indebted to the Jewish community of Brest to the amount of 2,143 kop groschen (in 1655 the indebtedness had increased to 32,912 kop groschen, not including interest to the amount of 14,015 kop groschen). In 1566 Brest-

Number of Houses.

Litovsk had 106 Jewish house-owners, out of a total of 852 ("Aktovaya Kniga Metriki Litovskoi: Perepisei," No. 15A; "Russko-Yevreiski Archiv," ii., No. 231). The houses were small, insignificant frame buildings, although they were inhabited by some families that consisted of fourteen persons ("Litovskie Yevrei," p. 335). The only synagogue was also a frame building. In 1569 a brick synagogue and brick houses were built, as appears from a lawsuit of the contractor against the Jews for not paying him in time ("Russko-Yevreiski Archiv," ii., No. 305). Wealthy farmers of customs, like the brothers Enkovich, had more commodious residences on their estates out of town ("Litovskie Yevrei," p. 404).

But Brest was the leading city, not as regards wealth alone, but also in learning and refinement; so that none of the rabbis or representatives of the other Lithuanian communities would render any decision of importance without the consent of the Brest community. According to tradition, the ascendency of Brest-Litovsk extended as far as the Baltic sea and the German frontier. Students came from Germany and Italy to the yeshibah of Brest. The government held the Jews of Brest in special favor. Thus, under Sigismund Augustus the wealthiest farmers of taxes and other revenues, Isaac Borodavka, Abraham Dlukgach, David and Lipman Shmerlevich, were Jews of Brest; while Joseph Shalomich was the contractor of the mint, and the Isaacovich family was favored with special privileges by the king.

Among the prominent scholars of Brest in the sixteenth century who were not rabbis, the following may be mentioned: David Drucker, son-in-law of Saul Wahl; Phoebus, the teacher of Joel Särkes ("Baḥ"); Fishel of Brest, author of notes on the "Ṭurim"; Joseph of Brest, brother of Moses Isserles; Moses ben Hillel, grandfather of Hillel ben Naphtali, the author of "Bet Hillel"; and Samuel Heller.

The Jewish merchants of Brest, like those of the rest of Lithuania, had Russian names and spoke and wrote the Russian language. They had friendly intercourse with their Christian fellow-citizens, and did not need a "speaker" before the courts, as the German merchants did (*ib.* p. 395).

Decline of Brest.

With the beginning of the seventeenth century Brest lost some of its importance as the center of wealthy farmers of taxes and other government leases. Prominent persons like Michael Jesofovich and Saul Wahl were unknown; they were succeeded in the arrangement of Jewish affairs by the Lithuanian Council ("Waad ha-Medinah be-Lita"). There were eminent rabbis, Talmudists, and other scholars, such as Moses, grandson of Rabbi Heshel; Elijah Lipschütz, father-in-law of Rabbi Abraham ha-Darshan; Abraham ben Benjamin Ze'eb Brisker; Elijah ben Samuel of Lublin, author of "Yad Elijahu"; Jacob ben Joel, author of "She'erit Ya'aḳob"; Zebi-Hirsch ben Eliezer Levi, mentioned in the "Teshubot Baḥ." But there were no communal workers of the type of those named above, to act as mediators between the Jews and the government, and having the power to protect them in cases of emergency. The leaders of the Lithuanian Jews seemed to be more occupied with religious laws and with the preservation of the inner life of their community than with general politics. The collecting of taxes and the customs duties was leased to the secretary of the treasury of the grand duchy of Lithuania, who, in turn, sublet it for a term of two years to the Jew Getzko Meerovich ("Akty Wilenskoi Archivnoi Kommissii," vi. 308).

In 1638 a lease of the city hall place was granted by the municipal government of Brest to Nachman Shlomovich (*ib.* p. 312). In 1641 the municipal government leased the cellar under the city hall to Simon Shlomich for three years at an annual rental of thirty florins (*ib.* p. 395).

Of the forty-two Jewish Lithuanian councils held from 1623 to 1761, nineteen met at Brest or at one of the cities in its district.

That the Jews were still protected by the king is evident from the privileges granted them by Sigismund III. (March 9, 1615), under which they were exempt from quartering the Polish nobility and retainers at their houses (*ib.* v. 141); by John Casimir (Feb. 17, 1649), confirming privileges granted by King Vladislaw IV. (Feb. 15, 1633, and Dec. 31, 1646); and by Sigismund III. (Oct. 10, 1592) (*ib.* p. 144). By an order issued June 23, 1655, King John Casimir forbade his subjects to build roadside inns or mills or to sell liquors, on the ground that the interests of the Brest leaseholders of the king were injured by such practises; and he warned them that all such establishments would be confiscated (*ib.* p. 153). By an order dated July 30, 1661, the same king relieved the Jews of Brest from all military duties; giving as his reason that the city of Brest and the Jews of that place were ruined by the invasion of the Moscovites (*ib.* p. 161). By a second edict (Aug. 8, 1661) he proclaimed that the Jews of Brest were released from all obligations for four years. He also released them from paying rent for the monopoly of the sale of liquors (*ib.* p. 162). In the same edict the king notified the Voyevoda of Polotzk that, on account of the losses inflicted on them by the invasion of "the enemy" (the Moscovites), the Jews of Brest were not able to pay their creditors, and that the king gave the Jews an "iron" or irrevocable charter freeing them from the payment of their debts for three years (*ib.* p. 163).

That even the factor of King John Casimir, Jonas Moizheshovich, was not very wealthy, and had to pawn his jewels and other property to the Christian merchant Vasili Proskurnich, is evident from an order issued by the king May 22, 1662, from which it appears that, having paid half of the debt, Jonas wished to pay the balance and to receive back his pledge, but that Proskurnich could not be found. The king considered that Proskurnich was trying to avoid the return of the pledge; he, therefore ordered all the clerical and other authorities to arrest Proskurnich wherever found, that he give satisfaction to Moizheshovich (*ib.* p. 164).

During the uprising of the Cossacks under Chmielnicki, 2,000 Jews were killed in Brest-Litovsk in 1649; the others escaped to Great Poland and Danzig (Kostomarov, "Bogdan Chmielnitzky,"

i. 341; Hanover, "Yaven Meẓulah"). From a report of Gregory Kunakov, a courier of the czar, it appears that in this year Brest was utterly destroyed by the Cossacks and Tatars, that the Poles and Jews with their wives and children were all slain, and that all the palaces and stone walls were destroyed, the wooden buildings burned, and the city razed to the ground ("Regesty," No. 847).

Persecution Under Chmielnicki.

From the instructions given to the delegates to the congress of the nobility of Volhynia, held at Brest in 1653, it is evident that taxes could not be collected from the Jews for the reasons above stated, and because some Jews had become victims of the pestilence, while others had fled to other countries (*ib.* No. 941). During the invasion of Brest by the Muscovites in 1660, all the deeds relating to the privileges and contracts of the Jews were lost (*ib.* No. 975).

That their relations with their Christian neighbors were not as friendly as formerly may be seen from a quarrel between the Christian citizens and the Jews over property lost by the latter during a fire at Brest in 1637. The case was, however, amicably settled on the following conditions: (1) The city government ordered the citizens to return to the Jews their lost property wherever found, and to declare the amounts of debts due to the Jews. (2) Thereafter all lawsuits relating to property or documents destroyed by the fire, to cease; the Jews to have the right to take away all of their property wherever found. (3) The citizens to assist the Jews in capturing escaped criminals. (4) Both Jews and Christians to have the right to rebuild their stores and houses, but only on the old sites and according to the original plans. (5) To preserve order in the future, a guard to be organized consisting of Jews and Christians in equal numbers. (6) Steps to be taken by the city authorities to quell any future disorders ("Akty Wilenskoi Archivnoi Kommissii," vi. 289).

Another case is cited in 1621, viz., where the Christian murderer of a Jew was released from prison by a priest in consideration of the present of a casket of money taken by him from the house of the murderer. The authorities, by removing the guards from the prison, allowed the murderer to escape; and the many citizens who saw him break away did not help the Jews to capture him (*ib.* v. 14).

Lawsuits.

Lawsuits between Jews and Christians on account of property are of frequent occurrence, as is evident from the case (in 1639) of Joseph Zelmanovich of Brest against the merchant Friedrich of Thorn (*ib.* vi. 324); of the merchant Matvei Strepkovich against the deputy of Brest, accusing him of bribery for taking the part of Jacob Josephovich, a Jew of Brest (*ib.* p. 326); and of one Kornilovich against the same deputy, for declining to register in the city records his complaint of slander against the Jews of Brest—among them Zalaman, the agent of the Kahal (*ib.* p. 336).

Of a more serious nature were the conflicts between the Jews and the Catholic and the Greek Orthodox clergy. The education of the Lithuanian Catholic youth at that time was practically under the control of the Jesuits, as had been the case in Poland for a century. As a result of the encouragement among the pupils of a spirit of mischief directed against the Jews, the latter were constantly subjected to annoyances by the students from the so called "Schülergelauf." The Jews at times retaliated upon the students. On one occasion the rector and the superintendent of the Jesuit college of Brest asked that a formal protest might be recorded against the unbelieving Jews of the city of Brest, who, it was stated, had, "in their hatred of Christian blood," insulted and beaten the students on many occasions. In 1643 it was alleged that they "had attacked little children of the officials of the Brest voeyvodeship with a heavy club, still preserved in the college as a proof of their insolence." On March 8, 1644, a student named Nesetzki asserted that he had been attacked by Jews when passing the house of Pinkes Samuelovich in the Jewish street, and narrowly escaped with his life (*ib.* v. 17).

Church Dispute.

From a document dated Feb. 10, 1662, it appears that the general commissioner of the monastic order of the Augustines directed the return to the Brest Jews of six yards of ground taken from them by the father superior of the monastery (*ib.* v. 24). In 1656 the Russian bishop Petei writes to Trotzcovich, priest of Brest, requesting him to make an effort to build a church on the ground whereon the church of Kozmo-Demyan had stood in former years, and whereon Jewish houses were then located; and to give notice to the Jews forthwith to clear the ground (*ib.* iii. 55). But from a document addressed to the kahal of Brest by the alderman of the city, it is evident that from ancient times the Jews had had a lease, at an annual rent of 20 florins, of the site of the Kozmo-Demyan church, on the Russian street, with the right to build houses (*ib.* p. 68). Notwithstanding this, the matter was not settled until 1679, when Bishop Zalenski issued a document stating that "the Jews had the right to build on that place."

A Reconversion.

On Aug. 21, 1669, the priest of the Russian church made a complaint against the Jews of Brest for reconverting to Judaism a baptized Jewess of the name of Judith, whose baptismal name was Anastasia, a daughter of Shemuel, at one time leaseholder of taxes (*ib.* v. 44). From a case between the kahal of Brest and some Russian priests of the city (Dec. 30, 1669) it appears that the latter caused much damage to the Jews of Brest, and that during the religious processions riots took place in which Jewish property was stolen and Jews were murdered or wounded by priests as well as by others (*ib.* p. 41).

Cases of outrages on the part of the Polish nobility are not wanting. On Feb. 10, 1665, a case was tried in the city court of Brest between the kahal and Vespasian and Chrysostom Kostiusko and Voitech Orinovich, the charge being that the defendants rode on horseback into the synagogue with their retainers, followed by a mob with drawn swords; that they cut almost to pieces the Jew Jovskei Aronovich, and severely wounded the agent of the kahal, Leib Itzkovich. The court condemned the Kostiuskos to death and to a payment of 200 kops for the murdered Jew. Chrysostom did not appear in court, but sent notice that he was called to the war. There is no account of his having been punished (*ib.* v. 28, 31).

Relations with Nobility.

In 1669 the nobility of Brest instructed their delegates to the Diet to bring in a law prohibiting Jews from employing Christian servants, "as the working classes, who like easy work, prefer to be employed by the Jews" (*ib.* iv. 49).

The hetman of the grand duchy of Lithuania had to warn his subordinates repeatedly that the Jews of Brest must be freed from all military duties and must not be blackmailed (*ib.* v. 180). It appears from another order of the hetman (Aug. 7, 1669) that the city of Brest was charged with the duty of supplying the army with provisions (*ib.* iv. 70). The city authorities of Brest also forced the Jews to pay extra taxes and local contributions "in violation of their privileges and agreements," as is evident from an edict issued by King Michael Nov. 5, 1669 (*ib.* v. 249).

From a safe-conduct given to the Jews of Brest by the aldermen of Brest (April 2, 1668), it is apparent that they were often annoyed, attacked, mobbed, and robbed. The officials are warned, under a penalty of 10,000 kops, not to do any further harm to the Jews (*ib.* p. 183).

From a list of the year 1662 of the Jewish merchants of Brest for the apportionment of subsidiary taxes instituted by the Diet of Warsaw it appears that the highest valuation of goods in the fifteen stores of the Jews of Brest was 650 florins; the lowest, 30 florins. The collection from the pedlers is assessed at the sum of 150 florins.

From the beginning of the seventeenth century the Jewish community of Brest, like all the other communities of Lithuania, was obliged to contract debts; borrowing money from various religious institutions, such as churches, colleges, monasteries, and religious orders. The loans were mostly perpetual, and were secured by the real estate of the kahal. In this way most of the property of the community was under continuous mortgage.

Debts of Community.

In the middle of the eighteenth century the kahals of Lithuania became insolvent. When the committee of the Diet began to liquidate the Jewish debts in 1766, it appeared that the kahal of Brest then consisted of 3,175 persons; it had a debt of 122,723 florins (Bershadski, "Litovskie Yevrei," p. 8). The chief creditors were: the Jesuit college of Brest, 26,233 florins; the college of Neswizh, 2,800; the mission of Koden, 9,600; the provost of Kobrin, 400; Alter Shereshveski, 4,000; the Trinitarians of Brest, 1,000; the Dominicans of Brest, 11,516 florins, 14 groschen; the Augustinians of Brest, 32,300; the Bridget nuns of Brest, 7,700; the communist priests of Lomaza, 8,000; the Cistercians of Wislitzy, 1,000; the Paulinists, 7,200; the Bernardines of Brest, 2,300; the Greek Orthodox Dizunites, 1,000; the Carthusians of Bereza, 3,200; the provost Chernovitzki, 2,000; in all, 122,723 florins (*ib.* p. 170).

The total income of the kahal of Brest was then 31,200 florins. It was derived from taxes on salt, tobacco, herrings, tar, mills, taverns, breweries, etc.; licenses of Jewish artisans; a certain percentage on dowries, and from the meat monopoly (*ib.* p. 9). The expenses were: salary of the superintendent or agent, who received, in addition, certain articles in kind, such as meat, fish, sweets, etc.; salaries of the rabbi and judges; supplies for the army during its movements through the district of Brest, consisting of candles, oil, paper, sealing-wax, meat, fish, etc.

When the nuncio of the pope visited the city, the kahal presented him with a hogshead of sugar. The officiating priest received a pound of sugar; the clerk, a flask of liquor.

With the fall of the Polish-Lithuanian kingdom the decline of Brest was hastened. Frequent fires, wars, and the plunder of the armies utterly destroyed the city. With the second partition of Poland, Brest, which had been rebuilt, came into the possession of Russia, and in 1796 was made a district town of the government of Slonim. In 1797 it was annexed to the Lithuanian provinces, and in 1801 was made a district town of the government of Grodno. In 1802 a fire destroyed a large part of the Jewish quarter. In 1828 fire also destroyed a great number of the Jewish buildings of Brest, among them five houses of prayer.

Nineteenth Century.

In the first half of the nineteenth century Brest had not improved, owing to the competition of other Jewish communities of Lithuania which had developed rapidly. By order of Nicholas I., Brest, in 1832, was made a first-class fortress, in consequence of which many historical buildings in the Jewish quarter and the ancient synagogue had to be demolished, others being erected on new sites, the government making partial compensation. By order of Rabbi Jacob Meïr Padua, a descendant of Saul Wahl, the architect Ferdinand Schafir made a sketch of the old synagogue, which was presented to Dennis Samuel of London, also a descendant of Wahl. In the course of work on the fortress the cemetery was destroyed; and the monuments, when removed to the new cemetery, could not be deciphered.

In 1838 the Jewish Hospital, with forty beds and a pharmacy, was erected. It then had an income of five hundred rubles from the meat-tax and from voluntary contributions. In 1851–61 the new synagogue was built; and in 1866 an asylum for widows was founded by Rabbi Orenstein. In 1877 a dispensary, poorhouse, and lodgings for the poor were built; also a Talmud-Torah for 500 pupils. All these institutions are still (1902) maintained by voluntary contributions.

Notwithstanding numerous conflagrations, Brest, in 1860, contained 812 houses and 19,342 inhabitants. In 1889 there were 2,063 buildings and 41,615 inhabitants, of whom 27,005 were Jews; of the latter, 4,364 were artisans, 1,235 licensed merchants, and 1,000 employed in manufacturing.

At present the Jews control most of the trade and industries of Brest. There are four tobacco factories. The main articles of export (mostly to Danzig) are grain, flax and flaxseed, tar, lumber, and cattle.

On May 17, 1895, on the occurrence of another large fire, the Jewish working classes were in great distress; and the minister of ways and communications permitted them free passage on the railroads for twelve days, to seek employment.

On May 11, 1901, another disastrous fire took place, resulting in a serious loss of life and property. In consequence the number of Jewish poor was largely increased.

Prominent Personalities.

Among prominent Jews of Brest, besides rabbis, may be mentioned: in the eighteenth century, Jacob Levi, author of "Ḥiddushe-Mahari"; Jekuthiel of Wilna, physician, pupil of Rabbi Moses Ḥayyim Luzzatto; Mordecai, author of "Mayyim-'Ammukkim"; Joel, grandson of Joel Särkes, and pupil of Lipman Heller; in the nineteenth century, Aaron ben Meïr, author of "Minḥat-Aharon"; Meïr ben Aaron, author of "Tebuat Shemesh"; on Maimonides, Abraham Isaac ben Joseph, author of "Pesher Dabar"; Abraham Isaac, author of "'Arba' Kosot"; Samuel Pusitz (died 1838); Iser-Judel ben Nehemiah, author of "Neḥamat-Yehudah," chief dayyan with Jacob Meïr Padua (died in Jerusalem); Isaac ben Ḥayyim of Kamenetz, chief dayyan with Ẓebi Ornstein (died 1878); Isaac ben Aba, author of "Me'ore bet-Yiẓḥaḳ"; Lipman ben David, author of "Ma'agalot Or"; Ẓebi-Hirsch Berls, author of "Or ha-Ẓebi"; Judah Epstein, author of "Ḳinamon-Bosem"; Meïr Jonah, chief dayyan, author of "Sha'ar he Ḥadash," on Isaac b. Abba Mari's "Ittur."

The following is a list of the rabbis who officiated in Brest-Litovsk:

Jehiel, son of Aaron Luria, said to have officiated about 1470, but probably was only a private scholar then.

Moses Raskovich, about 1514; wanted to marry his daughter to the son of a rabbi of Cracow, but King Sigismund prohibited the match because the prospective bridegroom was under suspicion of having been mixed up in political affairs, and the latter was banished from Poland.

Mendel Frank, 1529.

Joseph ben Moses, 1546.

Rabbi Kalonymus, about 1560; mentioned in the Responsa of Solomon Luria, No. 36. Mordecai Reiss and Rabbi Simon were at the head of the yeshibah at the same time.

Solomon Luria (d. 1574).

Naphtali Hertz, called "Hirtz der Brisker" (compare Naphtali SHOR).

Judah Liwa ben Obadiah Eilenburg, 1570.

Loeb, rabbi of Brest and of all Lithuania.

Moses Lipschütz, author of "Zikkaron Mosheh" (Lublin, 1611), about 1569.

Beinush Lipschütz, son-in-law of Saul Wahl (possibly he was the son of Moses Lipschütz).

Hirsh Shor (or Hirsh Elsasser).

Ephraim Solomon Shor.

Joel Särkes. In 1618 he left Brest for Cracow.

Ze'eb-Wolf, son-in-law of Saul Wahl; previously rabbi of Lomaz.

Joseph Casas, son-in-law of Wahl.

Abraham (Abrashky), son of Saul Wahl; was president of the yeshibah.

Meïr Wahl, son of Saul Wahl; officiated till 1631. He founded the Lithuanian Council in 1623, by permission of Sigismund III., of whom his father was a favorite.

Jacob ben Ephraim Naphtali Hertz.

Abraham ben Meïr Epstein, 1637.

Abraham ben Benjamin Aaron Solnik, 1639.

Joshua ben Joseph, author of "Magine Shelomeh."

Solomon Zalman, son of Jeremiah Jacob. His last signature in the Lithuanian Pinkes occurs under date of 1646.

Jacob Kahana, president of the yeshibah.

Jacob ben Ephraim Solomon Shor; last signature in the Pinkes under 1655.

Moses ben Judah Lima. Died before 1657.

Aaron Samuel Kaidanover (about 1657-60).

Joshua Heshel ben Jacob.

Ẓebi Hirsch ben Moses Jacob; last signature in the Pinkes under 1664.

Judah of Tropau; his signature in the Lithuanian Pinkes under 1664.

Mordecai Günzburg; officiated at Brest until 1685.

Mordecai Süsskind ben Moses Rothenburg; his last signature in the Pinkes, 1691.

Saul ben Heshel, from 1691; last signature in the Pinkes, 1695.

Saul ben Moses of Cholm, grandson of Meïr Wahl; formerly rabbi at Pinczov.

Moses ben Pesaḥ ben Tanḥum of Cracow, grandson of the author of "She'erit Joseph," and son-in-law of Meïr Wahl.

Moses ben Mordecai Süsskind Rothenburg.

Menahem ben Benjamin Katz.

David Oppenheim; accepted the rabbinate of Brest in 1698, but did not officiate there.

Judah-Löb, grandson of Joel Särkes.

Abraham ben Solomon, 1711.

Samuel Ẓebi Hirsch ben Aryeh Loeb, about 1714.

Naḥman ben Samuel Ẓebi Hertz, Sirkin, 1718-53.

Israel Isser ben Moses, 1757-60.

Abraham ben David Katzenellenbogen of Kaidan; was rabbi at Slutzk, 1752. In Brest he officiated for forty-four years (1760-1804).

Joseph ben Abraham Katzenellenbogen, 1804.

Naḥman Heilprin.

Aryeh Löb ben Joseph Katzenellenbogen, 1798-1837.

Isaac ben Israel of Pinsk, 1837-40.

Jacob Meïr Padua, 1840-55.

Ẓebi Hirsch Orenstein, 1855-64. Was expelled from Russia as a foreign Jew, he having been born at Lemberg.

Joshua Löb Diskin, 1864-67.

Joseph Bär Soloveitschik, 1869-92.

Ḥayyim Soloveitschik, son of Joseph Bär; is now (1902) officiating as rabbi.

BRESTOVITZA: Town in the district and government of Grodno, Russia, about forty miles south of the capital. From a record of a lawsuit between Paul Moskovich, parson of Brestovitza (Berestovec), and the Jew Moisei Isaacovich Khoroshenki of Grodno, brought before the court on Feb. 24, 1541, it is evident that Jews lived there before that date. The Jewish population in 1890 was 665.

H. R.

BREUER, JOSEPH: Austrian physician; born Jan. 15, 1842, at Vienna. He studied medicine at the University of Vienna, whence in 1863 he graduated with the degree of doctor of medicine and surgery. The same year he entered the service of the Vienna General Hospital (*Allgemeines Krankenhaus*); remaining there until 1866, when he was appointed assistant to Oppolzer. Five years later he resigned that position, and soon after became privat-docent at the University of Vienna.

In 1890 Breuer gave up his docentship to devote himself entirely to the practise of his profession and to writing on medicine. He has been a frequent contributor to the medical and physiological journals of Austria and Germany; his special subject of study having been the physiology and pathology of the nervous system. Jointly with Hering he wrote "Die Selbststeuerung der Athmung Durch den Nervus Vagus" (in the "Sitzungsberichte der Wiener Akademie der Wissenschaften," 1868, lviii.). In 1873 his monograph on the function of the semicircular canals in the labyrinth, "Ueber die Function der Bogengänge des Ohrlabyrinthes," appeared in the "Wiener Medicinische Jahrbücher." In this monograph he broached a complete theory of equilibrium; maintaining that the peripheral apparatus of the sense of equilibrium has its seat in the semicircular canals. He has contributed to the literature of the static sense, in "Beiträge zur Lehre vom Statischen Sinne." Breuer has also written a number of articles that have appeared chiefly in Pflüger's "Archiv" and other medical papers, and jointly with Sigmund Freud he published "Studien über Hysterie," Leipsic and Vienna, 1895.

BRIBERY: The offer or receipt of anything of value in corrupt payment for an official act done or to be done.

The moral basis for the Jewish law against bribery is clearly expressed in Deut. xvi. 19-20; see also Ex. xxiii. 8. Divine sanction for the injunction against bribery is found in another passage in Deuteronomy, wherein God is described as the perfect Judge who regardeth not persons, nor taketh reward, and who executes the judgment of the orphan and the widow (x. 17-18).

In the Bible.

These general statements are applied clearly and forcibly by King Jehoshaphat in his charge to the new judges whom he appointed to preside in the courts of the various cities of Judah: "Take heed what ye do, for ye judge not for man but for the Lord who is with you in the judgment; wherefore, now let the fear of the Lord be upon you; take heed and do it; for there is no iniquity with the Lord our God, nor respect of persons, nor taking of bribes" (II Chron. xix. 6, 7); and in a similar spirit he charged the Levites and the priests and the chief of the fathers of Israel (*ib.* 9). These admonitions seem to be a reflection of the words of Jethro in the plan which he offered to Moses for the constitution of courts, to assist the latter in judging the people. He sums up the qualifications of the judges in these words: "Thou shalt provide out of all the people able men, such as fear God, men of truth, hating gain" (Ex. xviii. 21).

The Biblical law nowhere provides a penalty for this crime. It is mentioned among the crimes for which the curse was pronounced on Mount Ebal (Deut. xxvii. 25). According to the later law it was punished by the infliction of thirty-nine stripes, following the general maxim that wherever the punishment for a crime is not specifically mentioned in the Bible, corporal punishment is to be inflicted.

It is well known that the temptation to bribery is especially strong in Oriental countries, where public opinion is not well organized and where great, almost irresponsible, power is lodged in the hands of the judges; and it appears from numerous passages in the Bible that the judges and the princes of Israel, especially during the period of kingship, freely sold judgment for money. It needs but one quotation to illustrate this condition of things: "Thy princes are rebellious, and companions of thieves; every one loveth bribes and followeth after rewards; they judge not the fatherless, neither doth the cause of the widow come unto them" (Isa. i. 23, v. 23, xxxiii. 15). Other prophets accuse them of taking bribes even to shed blood (Ezek. xxii. 12; Amos v. 12; Micah iii. 1, vii. 3). The bribe-taker is condemned not only by the Law and the Prophets, but also by the Psalmist (Ps. xv. 5) and the proverbial wisdom of the people (Prov. xvii. 23).

The only case of actual bribe-taking recorded in the Bible is that of the sons of Samuel, of whom it is said: "His sons walked not in his ways, but turned aside after lucre and took bribes, and perverted judgment" (I Sam. viii. 3); and it appears that this condition of things was the cause of the gathering of the elders of Israel for the purpose of electing a king who, the people fondly hoped, would put an end to this and other evils existing in the commonwealth (*ib.* iv. 22).

Talmudic Law.

The Talmudic law went beyond the Biblical law in its condemnation of bribery and in its regulations concerning it. The case of Ḳarna, a criminal judge of Babylonia (contemporary of Rab and Samuel), appears to have been the leading case on the question of the right of a judge to be paid for his services. Ḳarna took a stater from each of the parties before he tried a case, to pay him for his loss of time; and the Talmud, after considerable argument for and against, justifies his action on that ground (Ket. 105a). Rab Huna similarly would not try a case until the litigants had furnished a substitute to do his work while he was acting as judge (*ib.*).

The Mishnah lays down the broad rule that if a judge takes pay for rendering a judgment, the judgment is void (Mishnah Bekorot iv. 6). This, according to the reasoning in Ḳarna's case, seems to mean that if pay is taken after the judgment is rendered, or if it is taken from only one of the parties litigant, the judgment is void; and such a view may be harmonized with the view of the Talmud, that the judge is entitled to be paid for his loss of time, provided that both of the parties contribute, and provided the money is paid to him before he tries the case.

The moral sense of Talmudists is illustrated by the following statement in the Sifre to Deut. xvi. 19: "'Thou shalt not take a bribe' is not an injunction against taking it for the purpose of clearing the guilty and convicting the innocent; this wrong is covered by the prohibition 'Thou shalt not wrest judgment,' but even to convict the guilty and acquit the innocent, thou shalt not take a bribe" (see also Mek., Mishpaṭim, 20; Maimonides, "Yad," Sanh. xxiii. 1). Raba asked, "Why is it forbidden to take a bribe to free the innocent?" and he answers the question himself, saying: "As soon as one accepts a bribe, he inclines to favor the donor and considers himself 'one with him'; and no man will find himself guilty" (Ket. 105b). As it is impossible to determine judicially who is innocent and who is guilty, before the trial has taken place, the acceptance of the bribe before the trial, for the purpose of acquitting the innocent, is in itself tantamount to declaring who is innocent without going through the formality of a trial. This would seem to be the meaning of Raba's answer.

Cases Cited in the Talmud.

Raba's statement that the person accepting the bribe considers himself as one with the briber, leads the Talmud to a fanciful interpretation of the word שוחד ("bribe"). שוחד is compounded of two words, שהוא·חד ("he is one"; that is, he, the judge, "is one" with the litigant, Ket. *ib.*). Rab Papa expresses this thought in other words: "A judge should not try the case of one whom he loves or hates, because he will find no guilt in his friend and no innocence in his foe" (Ket. *ib.*). The Talmud cites a number of instances where judges refused to try cases in which the parties litigant were persons who had befriended them. There was no question of bribery in the form of money involved in such cases, but the judges refused to try them upon the broad ground that one might be bribed, by kind words or by feelings of friendship, to incline the scales of justice in favor of one of the parties; and that therefore, in order to preserve absolute impartiality, the judge should not stand on intimate footing with either of the parties litigant.

Abba Arika refused to try a case in which the innkeeper at whose inn he usually lodged was a party, and appointed another to try it (Sanh. 7b); Mar Samuel declined the case of a man who gave him his hand to assist him in landing from a ferry. Amemar refused to act as judge for a man who had picked a feather from his hair that had been lodged there by the wind; and Mar 'Uḳba, for a man who had trodden his spittle in the dust. The Talmud justifies their views upon strictly legal grounds. The law is, "Thou shalt not take a *bribe*," not, "Thou shalt not take *gain* or *money*"; hence one may be bribed even by kind words.

The most interesting case is that of R. Ismael bar Jose. It was his custom to receive every Friday from his own garden a basket of fruit, which his gardener carried to him. On one occasion the gardener brought the fruit on Thursday, that being court day. When R. Ismael asked him why he brought it on Thursday instead of the accustomed day, the gardener replied, "I have a lawsuit to-day, and I thought I would bring the fruit with me," presumably as a matter of convenience to save him the journey on the following day. But R. Ismael refused to act as judge in his case, appointing two other rabbis to try it. During the progress of the case he thought, "If my gardener will only say thus and so, he will win his case," whereupon he said, "May the souls of those who take bribes be destroyed. If I, who did not even take the basket of fruit, and who would after all only have been taking my own property, am so prejudiced in favor of this man, how much more partial must be the judge who really accepts a bribe" (Ket. 105b).

Maimonides states the matter broadly in these words: "A judge may not sit to try the case of one to whom he is favorably inclined, even though such person may not be a relative or an intimate friend, nor may he try the case of one whom he dislikes, even though such person may not be his enemy nor does not seek to do him harm; for both litigants must stand equal before the judge, and must be considered equal in heart" ("Yad," Sanh. xxiii. 6). An offensive practise of the judges, of conducting their business so that the fees of the court attendants and scribes were unduly increased, was considered a species of bribe-taking, and was condemned as such (Shab. 56a; "Yad," Sanh. xxiii. 3; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 9, 4).

If the judge nevertheless tries the case of a person who has sent him a gift before the summons issued, the other party can not attack the jurisdiction of the court on this account, for the judge is not legally disqualified from acting in such a case. It is, however, his duty, under the opinions expressed by the authorities, to refuse to try the case because of a possible prejudice in favor of the person who sent him the gift (*ib.* 9, 2). If a judge has borrowed something from a person who afterward appears before him as a litigant, he is not permitted to try the case, unless it appears that he is a man of means or has property which the lender may borrow from him ("Yad," Sanh. xxiii. 4; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 9, 1).

Under the Later Law.

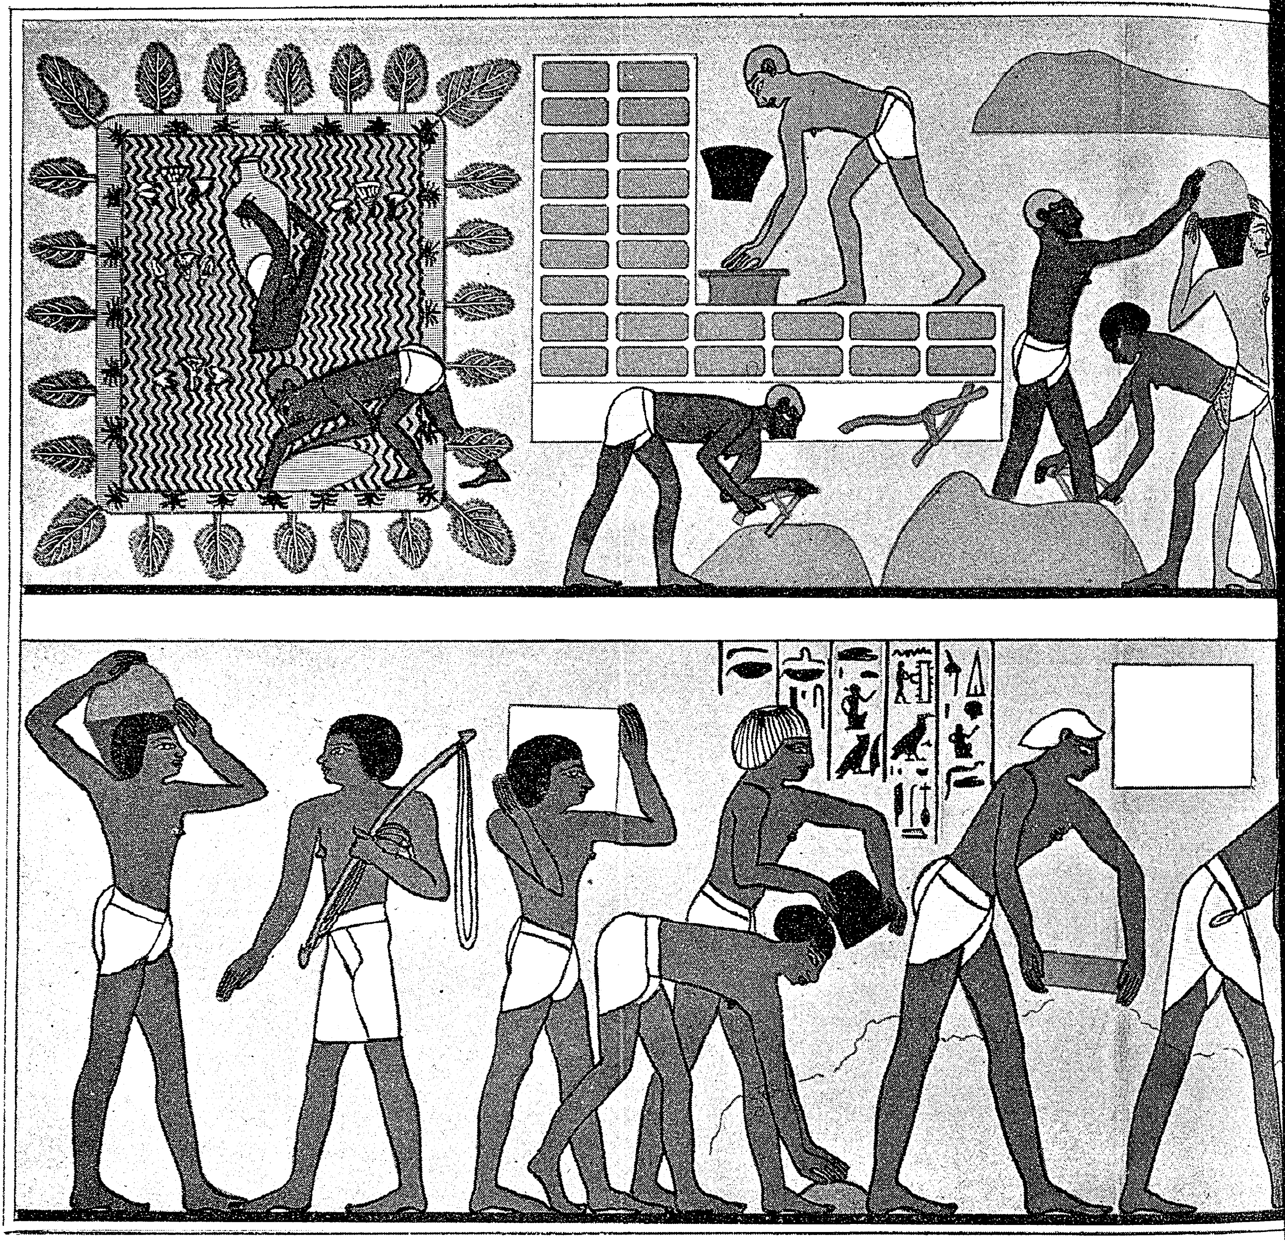
The bribe-giver and the bribe-taker are equally guilty before the law (*ib.*; "Yad," Sanh. xxiii. 2); and the bribe must be returned if the donor demands it (*ib.* xxiii. 1; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, *ib.*). The difficulty which formerly existed by reason of the fact that judges were not paid for their services, was removed under the later law. An annual tax was levied on the community for the purpose of paying the judges a proper salary for their services; and the moneys given or bequeathed for sacred uses were likewise appropriated to this purpose (*ib.* 9, 3). R. Moses Isserles thought it was best to levy these taxes for payment of the judges' salaries at the beginning of the year, in order that they might be assured of their support for the entire period, and that they need not be beholden to any person (gloss, *ib.*).

The frequent allusion in the Law to the fact that bribe-taking has the effect of blinding the eyes of the wise, did not escape the attention of the haggadists, who said: "Every judge who takes a bribe and perverts judgment will not die before his eyes have grown dim, as it is written: For a bribe blindeth the eyes of those who can see" (Mishnah Peah viii. 9; see also Midrash Tan., Shofeṭim, 8).

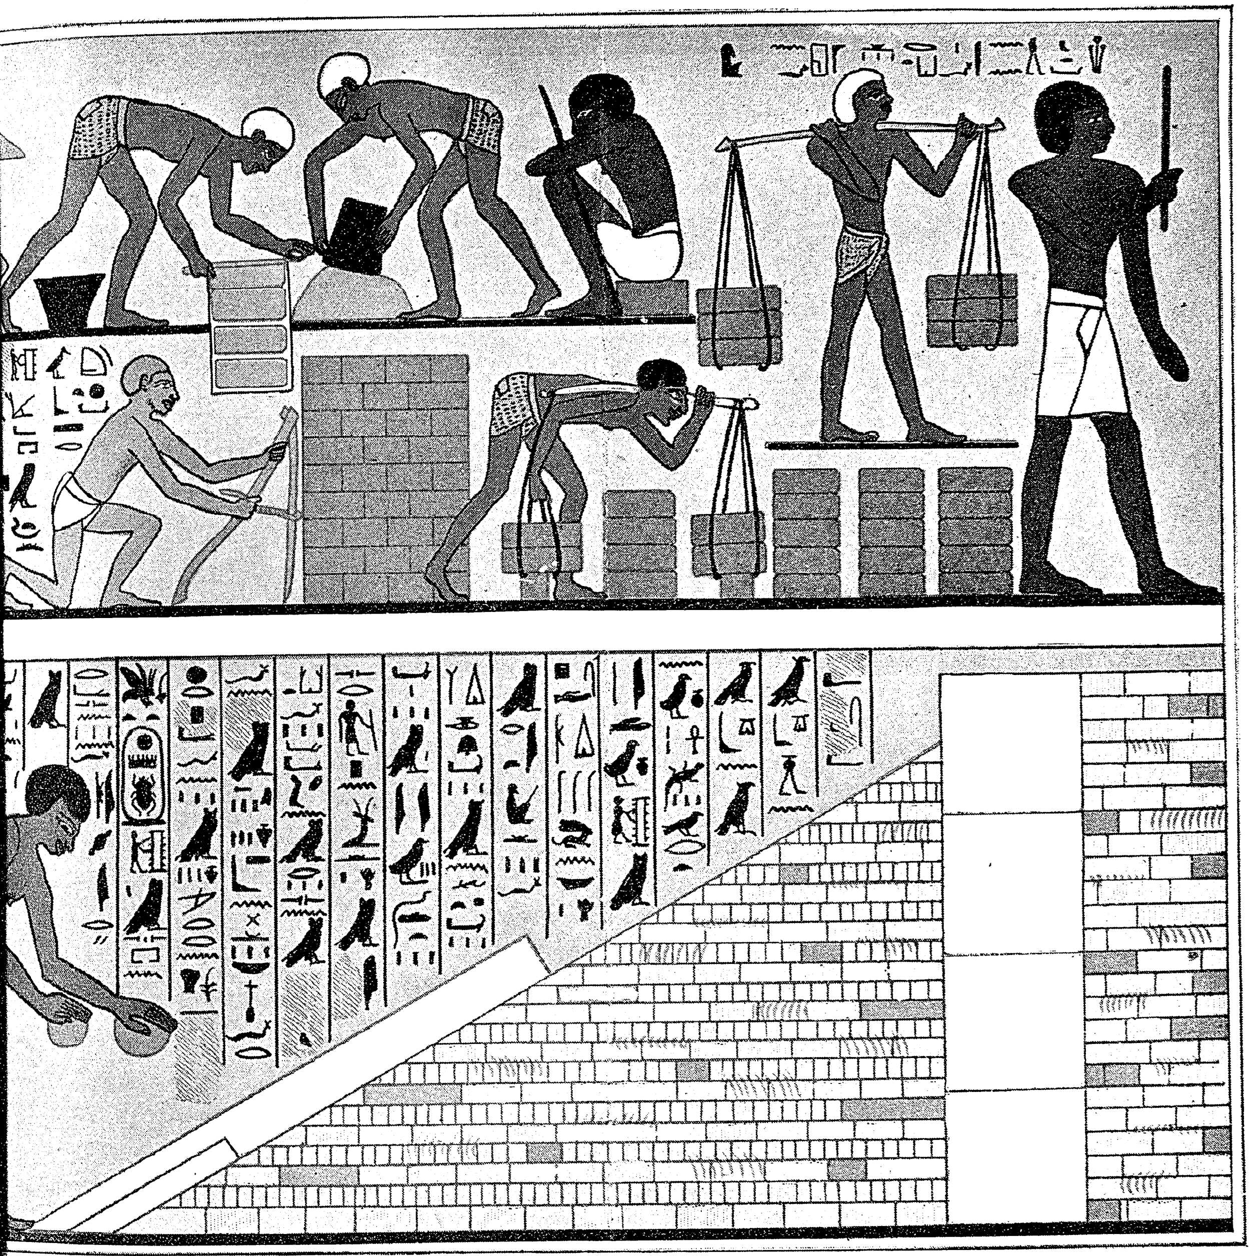
Maimonides summarizes the question of bribery most impressively in the following words: "The judge must conduct himself as though a sword were lying on his throat and Gehinnom open at his feet; he must know whom he is judging, before whom he is judging, and who will demand an account from him as to the justice of the judgment" ("Yad," Sanh. xxiii. 8). See JUDGE; JUSTICE AND EQUITY, PRINCIPLES OF.

E. C. D. W. A.

[The following example is given in the Talmud of the venality of the non-Jewish judges: Imma Shalom, R. Gamaliel's sister, wishing to expose a judge (probably a Christian) who had the reputation of being proof against bribes, presented him with a golden candlestick, with the request to award to her a portion of her parents' estate. His decision was: "Since you [the Jews] have been banished from your coun-



CAPTIVES MAKING BRICKS FOR THE TEM



LE OF AMMON AT THEBES, IN EGYPT.

(After Lepsius.)

try, the law of Moses is no longer applicable, but another law has been given that says: 'The son and the daughter shall inherit equally.'" On the following day, however, after R. Gamaliel had presented the judge with a Libyan ass, the judge said: "I have been looking over the conclusion of the new law, where it says: 'I am not come to destroy the law of Moses, but to complete it' [see Matt. v. 17], and there it is said, 'A daughter shall not inherit with the son.'" Imma Shalom then said to the judge: "Let your light shine like a candlestick," reminding him of her present; but R. Gamaliel answered, "An ass came and overthrew the candlestick" (Shab. 116a, b; see also Pesiḳ. xv. 122b *et seq.*, and parallels in Buber's notes). In one passage of the Talmud it is said that the Persians, especially the Ghebers, took bribes and relented in the execution of discriminating laws against the Jews if they were paid for it (Yeb. 63b; compare also B. Ḳ. 117a).

The Halakah with reference to not taking fees frequently gave rise to violent controversies in the Middle Ages, when the communities began to appoint permanent rabbis with salaries; since it was considered unlawful to pay a rabbi who was also judge. See FEES; see also Güdemann, "Religionsgeschichtliche Studien," pp. 65-88.]

J. SR. L. G.

BRICHANY: Town in the government of Bessarabia, Russia, with (in 1898) 7,303 Jewish inhabitants in a total population of 8,094. The Jewish artisans number 972, most of whom are furriers who export fur overcoats and caps to the extent of 25,000 per annum. About twenty-five families are occupied in the culture of tobacco and in gardening. About 700 Jews are day laborers, earning from 10 to 30 copecks per day.

H. R. S. J.

BRICK: The expression "brick" (לבנה; translated once "tile" in A. V., Ezek. iv. 1) designates both the burnt and the sun-dried brick. However, there is only one certain passage in which the first kind is referred to—viz., Gen. xi. 3—and there the Babylonian custom of "burning brick thoroughly" (thus A. V.; "thoroughly" should be omitted) seems to be treated as not less foreign to Palestine than is the use of bitumen (R. V.) for mortar. Apparently, all other passages mean the unburnt mud-brick, dried solely by the sun. This practise is current in the ancient Orient and in the modern East likewise, which still has in general a great preference for unbaked clay as building material. The A. V. in II Sam. xii. 31; Nahum iii. 14; Jer. xliii. 9, speaks of the brick-kiln, but the rendering is not correct. The first passage—which was formerly considered as a strong proof of the barbarous cruelty of David's time—is most likely to be translated, "David made them [the captives] labor with the brick-mold" (compare R. V. margin on this slight emendation). Similarly, R. V. margin in Nahum, in accordance with the Peshiṭta. In Jer. xliii. 9 the R. V. substitutes "brickwork" (margin, "pavement or square"; so also the Pesh. and Hoffmann; the former translation was defended by Hitzig and others). No version offers any support to the idea of a kiln in these passages (see G. Hoffmann, in Stade's "Zeitschrift," 1882, ii. 53 *et seq.*).

Indeed, burnt bricks in Oriental ruins seem to date from Roman times. Egypt—in which the sun-dried brick from Nile mud formed the material for all secular buildings and even for many tombs (in earliest time, for all the royal tombs and pyramids) seems to furnish the best analogue. The only means employed by the Egyptians to give greater durability to this material was the admixture of straw and stubble with the clay: mentioned in Ex. v. 7. This seems to have been a purely Egyptian custom. On Egyptian monuments there are found scenes representing brickmaking; and among these some showing captive Semites at work with the brick-mold, who have often erroneously been taken for Israelites.

In Babylonia (see above on Gen. xi.) burnt bricks were often employed for the outer layers of important public constructions, because of the copious winter rains of the country. This led to a high development of the ornamentation of buildings with glazed and painted bricks and tiles: so, for example, Nebuchadnezzar's palace at Babylon. In Egypt only a few instances of the employment of such methods can be found (Tell el-Amarna, Tell el-Yehudiye); while the Persians still used such bricks in the Babylonian manner, for instance, in the palace of Susa. But, by the side of this, the unburnt brick always played the greater part. It may be mentioned that the size of Babylonian and Egyptian bricks was larger than that of the modern brick, often enormous. In both countries the brick-mold—that is, the open box with a handle—often furnished a royal or official stamp for the bricks, stating the date, and the building for which the bricks were determined, etc. Of none of these higher developments of brick-manufacturing have examples been found in Palestine, which country offered rich material in stones for public buildings. The unburnt bricks of which the Palestinian mounds exhibit numerous examples seem to have formed the principal building material for private houses, except for a few of the most wealthy (Isa. ix. 9; Amos v. 11). See CLAY; and on the use of a "tile" for sketching (Ezek. iv. 1) see WRITING.

J. JR. W. M. M.

BRIDE.—In Mystic Lore: The allegorical use of the name "Bride" for "Israel" is based upon Hosea ii. 19-20: "I will betroth thee forever," and, in conjunction with Ezek. xvi. 8, gave rise to the allegorical interpretation of the Song of Solomon as typifying the espousal of God as the King of Peace (Solomon) and Israel (the Shulamite), at the redemption from Egypt and the erection of the tabernacle (see Pesiḳ. 1a, 6a; Pesiḳ. R., ed. Friedmann, v. 17b, 21b; Cant. R. to iv. 8-12, where the expression "kallah" [bride] is referred to Israel). However, according to Origen ("Cantic. Canticor." Homily iv.; compare also "Teḥilat Perush Shir ha-Shirim" in "Steinschneider Festschrift" and ALLEGORICAL INTERPRETATION), the Palestinian Jews gave the Song of Solomon a mystical interpretation, allowing it to be studied only by men of mature age. This would indicate that, like the "merkabah" of Ezekiel and the Creation story, the Song of Solomon served as a basis for Gnostic mysteries such as Paul suggests in Eph. v. 32, where he finds in the union of husband and wife "a sacred mystery," obviously of cosmological character. Accordingly, the bride and bridegroom were important in the Gnostic mysteries. See Irenæus, "Adversus Hæreses," i. vii. 1: "Hakamot (Sophia), the mother, after all her seed had been perfected, enters the pleroma as bride and receives the Savior or Demiurge as her spouse," which "mystery of conjunction" these heretics dramatically imitated in their illicit marriages.

Yet these mysteries borrowed the anthropomorphic form of the Deity from the Song of Solomon (Schmidt, "Gnostische Schriften in Koptischer Sprache," 1892, pp. 279–281, where Cant. iii. 11 is quoted), exactly as did the Jewish cabalists when measuring the dimensions of the Deity in the "Shi'ne Ḳomah" (Gaster, "Monatsschrift," 1893, p. 216).

In conformity with this idea Malkut, "the Kingdom," the lowest of the Ten Sefirot, is called the bride, because she desires, but has not attained, the union with Ze'er Anpin, the creative power or "Microprosopus" (the Lesser Countenance); whereas Binah ("the Intelligence"), as the Mother Supernal, is actually united with the Father, "the Ancient One," the Erek Anpin ("the Vast Countenance," or "Macroprosopus") in the Upper Sphere of the Ten Sefirot (Zohar, in Idra Zuṭṭa, pp. 267–279). See SEFIROT.

The union therefore of the bride or matron ("matronita") with her celestial spouse, that is to lift the created world into the sphere of the supreme fulness of glory (the pleroma of Paul in Eph. iii. 19), by doing works of goodness and holiness, is the object of life, according to the cabalists—a truly spiritual view in itself, yet one which led the erring to all sorts of abuse, exactly as the ancient Gnostic mystery of SIMON MAGUS and many Christian heretics had done in the second and third centuries. Shabbethai Ẓebi and his followers in the seventeenth century were entangled in sensualism of the worst character. Compare SABBATH. See also BETROTHAL.

K.

BRIDEGROOM AND BRIDEGROOM'S FRIENDS. See BETROTHAL; MARRIAGE.

BRIDEGROOM OF GENESIS (Ḥatan Bereshit). See BRIDEGROOM OF THE LAW.

BRIDEGROOM OF THE LAW (Ḥatan Torah): The somewhat poetic designation of Bridegrooms of the Law and of Genesis are given to the persons called up in the synagogue to the reading of the chapters ending and beginning the Pentateuch respectively (Deut. xxxiii. 27–xxxiv. 12; Gen. i. 1–ii. 3). This takes place on Simḥat Torah, or the Rejoicing of the Law festival, which is the second day of the Shemini 'Aẓeret, or Eighth Day of Solemn Assembly, in those communities in which the second-day festival is observed. It is considered a privilege to be the one to whom the concluding or the opening portion of the Law is read; and those persons upon whom the choice of the congregation falls are esteemed as specially honored. The honor of the bridegroom of the Law is greater than that of the bridegroom of Genesis. Other privileges are conferred upon the recipients of these dignities in order to increase the distinction of their station. They are not called to the Law by the ordinary formula, "Ya'amod" (Let N. N. arise)—which is otherwise used—but by a special, poetic invocation, beginning (in the Ashkenazic ritual) with the words מרשות האל הגדול הגבור הנורא ("by permission of the great, almighty, and tremendous God") for the Ḥatan Torah; and מרשות מרומם על כל ברכה ושירה ("by permission of Him who is exalted above all blessing and song") for the Ḥatan Bereshit. The bridegrooms of the Law and of Genesis usually make large money offerings to the synagogue, in recognition of the honor conferred upon them, and entertain the congregation at a more or less elaborate banquet, either in the meeting-room or the basement of the synagogue or at their private residences. See TABERNACLES, and SIMḤAT TORAH. For the origin of the name and the custom see CROWN OF THE LAW.

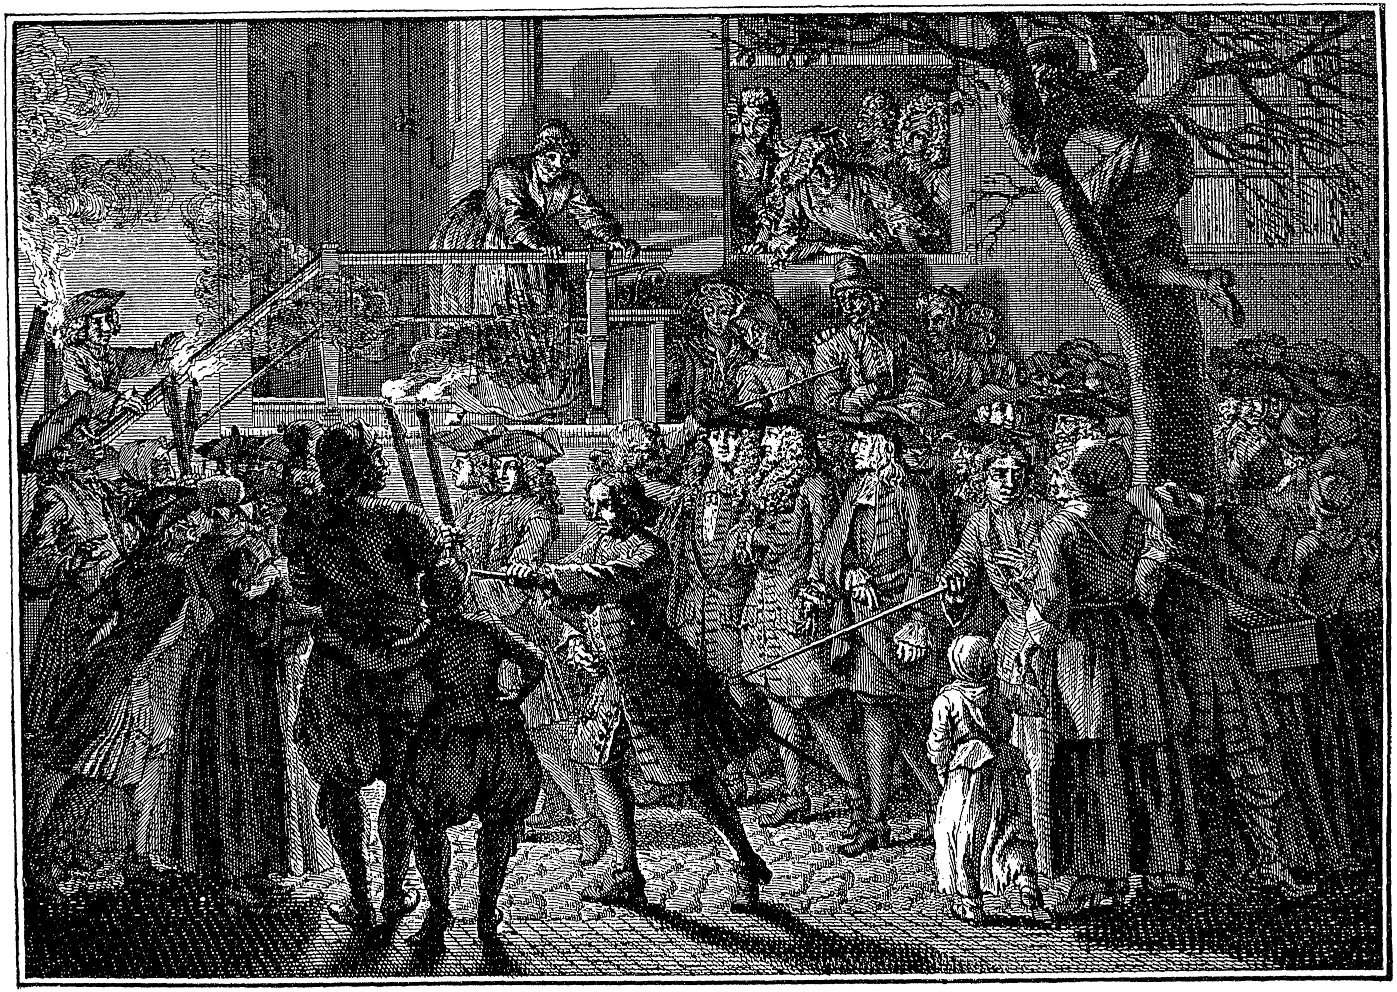
A. B. D.

BRIDEGROOM OF THE TORAH. See BRIDEGROOM OF THE LAW.

BRIDLE: A term used in the English versions of the Bible interchangeably with bit to represent the three Hebrew words רסן, מתג, and מחסום, which, however, do not as a rule denote the usual head-gear of a horse or other beast of burden, consisting of a head-stall, a bit, and reins. In many passages "halter"—*i.e.*, a simple rope or leathern strap wherewith to hold the animal in check—would seem to be the more appropriate rendering.

No description of the head-harness is found in the Hebrew Bible. As horses came into use only at a late period, and then more for purposes of luxury than utility, the pictures of steeds with elaborate head-gear found on the Assyrian monuments (see Layard, "Nineveh") can not be held to throw any light on the contrivances employed by the Hebrews, though the arrangement with bells mentioned in Zech. xiv. 20 was in all probability adopted in imitation of Assyrian fashion. The ox, the ass, as well as the mule, and to a less extent the camel, took the place of the horse. To guide and control the first-mentioned animal the goad sufficed; and, if Arabic custom may be supposed to retain the primitive habits of the ancient Hebrews, the camel was led by a rope attached to a ring of either copper ("burrah"); or hair ("ḥizamah"), which was passed through one of the nostrils.

Still, bridles were not altogether unknown, as distinct names for them were employed according as they were used for the horse or the camel. These bridles were very simple affairs, often made of mere twine; while the bits were, at least in pre-Mohammedan days, of wood ("sajarah"). Even among the modern Arabs the iron bit passes underneath the chin (jaws) of the horse, or is in front of the mouth (see Socin, "Diwan aus Central-Arabien," i. 288). This arrangement explains some passages in which the usual translation by "bridle" has produced



Procession of Bridegroom of the Law on the Eve of the Rejoicing of the Law.
(From Picart, 1723.)

confusion. Job xxx. 11, R. V., "they have cast off the bridle," refers to the slipping of the halter. Isa. xxx. 28, "bridle in the jaws" should be rendered "halter (or bridle with iron) on the jaws." A bridle with a ring arrangement through the nose is meant in II Kings xix. 28 by the Hebrew word חחי ("in thy nose"), to which מתגי ("over thy lips") is a parallel. See also Prov. xxvi. 3; Isa. xxxvii. 29, A. V.; Ps. xxxii. 9, R. V., "bit and bridle"; more accurately, "bridle and halter."

In Ps. xxxix. 2 (A. V., 1) מחסום is properly translated in the Revised Version by "muzzle." The allusion there is to the use of a basket-like network which was passed over the head of the animal and fastened behind the ears and around the neck; enveloping the mouth as with a bag, to prevent the bearer biting the yoke-mate or other animals in the caravan. In the psalm it is the tongue which thereby is hindered from "biting." As this "muzzle" also interfered with the taking of food, the humane law of Deut. xxv. 4 forbade its being put over the mouth of the ox while on the threshing-floor.

E. G. H.

BRIEG: Town in Silesia; formerly the capital of the duchy of the same name. Jews settled there about 1324, chiefly because it was situated on the commercial route to Breslau, in which place a colony of Jews had long resided. The Jewish community of Brieg had its separate place of worship from early times. In the fourteenth century the Jews of Brieg were persecuted on account of their usurious practises: and in 1392 it was claimed that all debts of the duke had been discharged by the payments to Jacob, the son of Moses, a Jew of Brieg, of a certificate of indebtedness. In 1398 the Brieg Jews bought a letter of protection from the duke, whereby they were guaranteed the peaceful possession of their privileges. But in 1401 they were driven from the city, except Jacob and Seman von Reichenbach, who had received a patent of protection from the duke's council for six years from May 1, 1399. Solomo, a capitalist, lent large sums of money to royal houses in the fifteenth century.

With the decline of Breslau as a trade center, the Jews of Brieg became little more than an isolated community; and in modern times they shared the lot of the other Silesian Jews. They carried on insignificant trade operations as a rule. The conquest of Silesia by Frederick the Great wrought but slight change in their condition.

At the present time (1902) Brieg has a Jewish community of 310 souls, of whom 55 are house-owners. Three charitable societies exist, for the care of the poor, for burying paupers, and a woman's league. Brieg is included in the union of congregations of the districts of Breslau and Liegnitz.

D. A. M. F.

BRIEGER, LUDWIG: German physician and medical writer; born at Glatz, in Prussian Silesia, July 26, 1849. He received his education at the gymnasium of his native town and at the universities of Breslau and Strasburg. From the latter he was graduated as M.D. in 1875. After a postgraduate course at Vienna and Berlin, he became assistant at the private ophthalmic hospital of Cohn at Breslau, at the same time studying under Cohnheim at the pathological institute of the university. Leaving Breslau in 1876, he went to Bern as assistant to Quincke at the medical hospital of the university.

From Bern, Brieger removed in 1878 to Berlin, attending the physiological laboratory. In 1879 he became assistant to Frerichs, and later to Leyden at the First Medical Hospital, Berlin. From 1881 he was privat-docent, and from 1887 titular professor in the University of Berlin. In 1890 he opened a private dispensary and hospital. The same year he was elected assistant professor, and in 1891 was appointed chief physician of the university hospital and dispensary for contagious diseases. In 1897 he occupied the chair of pathology and therapeutics as substitute for Professor Ehrlich. Since 1899 he has occupied the chair of general therapeutics. The following year he received the title of "Geheimer Medizinalrath."

Brieger is a contributor to numerous medical journals, and has written many essays and books dealing with pharmacology, pharmaceutical chemistry, bacteriology, pathology, and therapeutics, and is considered an authority on each of these subjects.

Of his many essays and books the following may be mentioned: (1) "Zur Physiologischen Wirkung der Abführmittel," in "Archiv für Experimentale Pathologie und Therapie," 1877; (2) "Ueber die Aromatischen Producte der Fäulniss im Eiweiss," in "Zeitschrift für Physikalische Chemie," 1879; (3) "Zur Kenntnissnahme des Physiologischen Verhältnisses des Brenzcatechin, Hydrochinon, und Resorcin" in Du Bois-Reymond's "Archiv für Physiologie," 1879; (4) "Beiträge zur Lehre von der Fibrösen Hepatitis," in Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin," 1879; (5) "Ueber Einige Bestandtheile des Jauchigen Eiters des Menschen," in "Zeitschrift für Physikalische Chemie," 1881; (6) "Beitrag zur Schrecklähmung," in "Zeitschrift für Klinische Medizin," 1881, pp. 121 *et seq.*; (7) "Ueber Febris Recurrens," in the "Charité Annalen," 1881, pp. 136–150; (8) "Ueber Spaltungs Producte der Bacterien," in "Zeitschrift für Physikalische Chemie," 1884; (9) "Ueber Ptomaine," Berlin, 1885–86 (in this work, consisting of three volumes, the author proves that the bacteria develop their injurious qualities through a specific poisonous product of the toxins and toxalbumins); (10) "Ueber das Vorkommen von Tetanie bei einem am Wundstarrkrampf Erkrankten Individuum," in "Berliner Klinische Wochenschrift," 1888, pp. 329 *et seq.*; (11) with Stadthagen, "Ueber Cystinurie, Nebst Bemerkungen über einen Fall von Morbus Maculosus Werlhofii," *ib.* 1889, pp. 344 *et seq.*, 455 *et seq.*; (12) with C. Fränkel, "Untersuchungen über Bakteriengifte," *ib.* 1890, pp. 241 *et seq.*, 268 *et seq.*; (13) with Ehrlich, "Ueber die Uebertragung der Immunität Durch Milch," in "Deutsche Medizinische Wochenschrift," 1892, pp. 393 *et seq.*; (14) "Ueber die Klinische Bedeutung des Elsnerischen Typhus-Nachweises," *ib.* 1895, No. 50; (15) "Klinische Beobachtungen an Zwei Leprösen," in "Berliner Klinische Wochenschrift," 1896, pp. 1105 *et seq.*; and (16)

"Ueber Versuche der Uebertragung der Syphilis auf Thiere und über Serumtherapie bei Syphilis," in "Klinisches Jahrbuch," 1899.

S. F. T. H.

BRIELI or **BRIEL** (בריאל), **JUDAH LEON BEN ELIEZER** (also known in rabbinical literature under the contraction **MaHaRIL**): Rabbi in Mantua; born about 1643; died in 1722.

Brieli, besides being a high Talmudical authority, as is shown in the responsa of his contemporaries Ishmael Coen, Morpurgo, and others who asked his opinion on halakic questions, was well versed in the secular sciences, which he zealously cultivated. Being highly esteemed by the Sephardic community of Amsterdam on account of his learning, his character, and his great age, he was asked by Ẓebi Ashkenazi (Ḥakam Ẓebi) and his followers for his support in their campaign against Ḥayyun and his cabalistic vagaries. Brieli, who was opposed to the Cabala in general, could have but little sympathy with Ḥayyun. He accordingly addressed two letters to Ḥakam Ẓebi (the first was published in "Milḥamot Adonai"), three to Ayllon, two to the board of the Amsterdam community, and one to Benjamin Finzi, in all of which he condemned Ḥayyun and approved the suppression of his book. Ḥayyun in his pamphlet against Ḥakam Ẓebi, entitled "Ha-Ẓad Ẓebi," says that Brieli is a Latinist and philosopher, but knows nothing about the Cabala; that he (Brieli) denies to Simeon ben Yoḥai the authorship of the Zohar; that he (Brieli), contrary to the Jewish law, has never married, and wears no beard.

Brieli was the author of the following works: (1) "Shefer Kelale ha-Diḳduḳ" (The Beauty of the Grammatical Rules), a Hebrew grammar; (2) "Hassagot 'al Sifre ha-Sheluḥim" (Criticisms on the Books of the Apostles); (3) "La Sinagoga Disingannata dagli Inganni del Padre Pinamonti"; (4) "Esame delle Riflessioni Teologiche," on the miracles. Of these only the first-named was published (Mantua, 1724); the others are still extant in manuscript (Dei Rossi, Nos. 22, 23; Neubauer, "Cat. Bodl. Hebr. MSS." *s.v.*). Brieli also translated into Hebrew the letters of Seneca ("Kerem Ḥemed," ii. 119).

An elegy on Brieli was published by his pupil Cohen Modon, under the title "Ẓir ha-Ẓirim," in which Brieli's knowledge of mathematics, logic, and natural history is highly praised.

BRIER. See BRAMBLE.

BRIGHT, JOHN: English statesman and orator; born at Greenbank, Nov. 16, 1811; died in Rochdale March 27, 1889. It has been stated that his mother, Martha Jacobs, was a Jewess; but this statement is erroneous, such Biblical names being not uncommon among the English peasantry. During his long public career he more than once distinguished himself as an unflinching advocate of the political emancipation of the Jews of England, on the ground of what he designated "justice to the Jewish population of the country." On May 14, 1849, on the introduction of the Parliamentary Oaths' Bill—which dealt with the question of the right of Jews to sit in Parliament—Bright delivered a powerful speech in the House of Commons, fervently advocating the claims of the Jewish race and declaring that he "should vote for the bill, as far as it goes, because it admitted Jews into Parliament." On many other occasions he took the same position, as, for instance, in 1851, when the question of Jewish disabilities was raised in Parliament by the action of Alderman Salomons. But in his speech delivered in the House of Commons on April 15, 1853, during the debate on the JEWISH DISABILITIES BILL, Bright gave the most vigorous expression to his principles of religious equality as applied to the Jews. His attitude toward the Jews was independent of any personal feeling, and was a direct outcome of his religious and political principles.

J. B. B.

BRILL, AZRIEL: Hungarian rabbi and author; lived in the first half of the nineteenth century; assistant rabbi (dayyan) at Pest, Hungary. He wrote: "Hadrat Ḳodesh" (Beauty of Holiness), containing the Mishnah treatises, Rosh ha-Shanah, and Yoma, with a commentary and German translation; a collection of the prescriptions and prayers for the ten penitential days; also an essay on the Temple ritual for the Day of Atonement, and a Jewish calendar up to 6000 (Ofen, 1827).

L. G. I. BER.

BRILL, JEHIEL: Russian journalist. According to Zeitlin he was born in 1836 in Tultschin, Russian Poland; but Fuenn, who knew him well, states that he was born in British India. He died in London Nov. 12, 1886. Taken to Constantinople when quite young, and later brought to Jerusalem, he grew up in the latter city and there received a Talmudical education and the strictly Orthodox training common to natives of Russia living in Palestine. In 1863, with the assistance of his father-in-law, the traveler Jacob Safir, he established the Hebrew monthly "Ha-Lebanon," which, after the appearance of the twelfth number, was suppressed by the Turkish government. After many tribulations Brill went to Paris, where he again commenced to publish the "Lebanon," first as a semi-monthly (1865–68), and later as a weekly (1868–70). The Franco-Prussian war and the siege of Paris, by cutting off communication with his readers—practically all of whom were outside of France—forced him to suspend the publication of his journal for the second time. He went to Mayence, where he established a Hebrew printing-office and renewed the publication of the weekly "Lebanon," this time as a Hebrew edition of the "Mainzer Israelite," edited by M. Lehmann, who occupied in German Jewry a position corresponding to the one occupied by Brill among the Jews of eastern Europe.

In Mayence the publication of the "Lebanon" was continued from 1872 to 1881. This journal became the acknowledged organ of ultra-conservative Jews; and many pious rabbis contributed to and took an interest in its Talmudical literary department, the "Yarkete Lebanon." During part of this time Brill also edited and published a Yiddish or Judæo-German weekly entitled "Ha-Yisrael," which, like his Hebrew publication, circulated mainly in Russia. The Orthodox class, however, never evinced sufficient interest in journalism in general to make its organ a financial success; and the "Lebanon" had for the third time to be discontinued.

When the movement to establish colonies in Palestine or its vicinity was inaugurated, after the outbreak of persecutions in Russia, Brill, who was well acquainted with the Holy Land and with the languages spoken there, was, through the recommendation of Rabbi Samuel Mohilever, chosen by the Alliance Israélite Universelle and by Baron Edmond de Rothschild to conduct from Russia to Palestine a small group of experienced farmers, who were to be established in or near the Alliance colony, Mikweh Israel. He started from Rosinoi, Russian Poland, with eleven men—ten farmers and a "melamed" (teacher)—Nov. 21, 1882, and arrived at Palestine the following month. The story of his journey and of its results is given in detail in his work, "Yesod ha-Ma'aleh" (The Base of the Slope), which Brill published in 1883 in Mayence, whither he had returned a sadly disappointed man. In 1884 Brill settled in London, and there established a new Yiddish weekly newspaper, the "Sulamith." In 1886 he started, for the fourth time, to publish the "Lebanon," but was forced to announce its suspension after the publication of a few numbers. He died suddenly in London the same year.

"Yesod ha-Ma'alah" is the only book written by Brill. He published, while in Paris, three works containing inedited manuscripts from the library of Baron Günzburg, which are described in Zeitlin, "Bibliotheca Hebraica Post-Mendelssohniana," p. 42. He also published, with an introduction, an old anonymous manuscript, "Be'er ha-Golah," on Jewish archeology (Mayence, 1877), with notes by Jacob Tarpower and Reuben Rapoport.

Bibliography: Fuenn, *Keneset Yisrael*, pp. 520, 521; idem, in *Ha-Ẓefira*, 1886, No. 172; Zeitlin, *Bibliotheca Hebraica Post-Mendelssohniana*, pp. 41, 42.

BRILL, JOEL. See Loewe, Joel.

BRILL, JOSEPH (also known under the pseudonym of "Ayob" [איוב contracted from Ani Joseph Brill]): Russian teacher and Hebrew writer; born at Gorki, near Mohilev, on the Dnieper, 1839. He studied Talmud at the yeshibot of Shklov and Vitebsk, and later settled in Minsk, where he opened a school for Jewish boys, and in which town he is still active as teacher and writer.

Brill's first articles appeared in the early sixties in the Hebrew periodicals "Ha-Maggid," "Ha-Meliẓ," and "Ha-Karmel." An excellent Hebrew style and a fine humor are the chief characteristics of his writings. Besides numerous articles in Hebrew yearbooks and periodicals, he has published: "Ish Jehudi" (The Jew), a translation from the English of the five-act drama by Richard Cumberland, Wilna, 1884; "Kiẓẓur Shulḥan 'Aruk" (Satirical Instructions for Teachers and Pedagogues), in the collection "Oẓar ha-Sifrut," Cracow, 1890; "Midrash Soferim," satirical characteristics of contemporary Hebrew writers, in "Ha-Shaḥar," Vienna, 1879; "Lefanim" (In Times of Old), a sketch in "Oẓar ha-Sifrut," 1892, iv. He has prepared for publication a volume of poems, a volume of aphorisms, proverbs, and a volume of stories. Some of his correspondence with Hebrew writers is published in H. Rosenberg's "Oẓar Miktabim we-Sippurim," St. Petersburg, 1882.

Bibliography: *Oẓar ha-Sifrut*, iv. 643-650, Cracow, 1892.

H. R.

BRILL, SAMUEL LÖW: Hungarian rabbi and Talmudical scholar; born Sept. 14, 1814, in Budapest; died April 8, 1897. He was carefully educated by his father, Azriel Brill (1778-1853), who was teacher and associate rabbi at Pest, and the author of several works in the Hebrew language. After having been carefully grounded at home in Hebrew studies, and graduating with honors from the Protestant Lyceum of his native city, he attended the Talmud schools at Eisenstadt (1832) [under M. J. Perls], Presburg (1834-35) [under Moses Sofer], and Prague (1836), where he obtained, at the age of twenty-two, his rabbinical degree. In 1842-43 he was registered in the University of Berlin, where he attended the courses of famous teachers, such as Boeckh, the classical philologist; Ritter, the geographer; Leopold Ranke, the historian; Schelling, and others, and associated with Leopold Zunz and Michael Sachs.

Returning to his native city, he was appointed assistant rabbi in 1843, and associate rabbi in 1850. Although he did not come before the public at large either in print (his only publication was an anonymous necrology of his teacher Moses Sofer, in the "Allg. Zeit. des Judenthums," 1838) or on the platform, he soon became widely known by his Talmudic lectures, which he enlivened with material drawn from Hebrew and general literature. Among his earliest pupils were W. Bacher and I. Goldziher.

Brill was highly esteemed not only by his coreligionists, but also by the Hungarian government, and was its first counselor when it was preparing to institute a rabbinical seminary (see Moritz Bloch [Ballagi]). He was also one of the founders of the Jewish Theological Seminary ("Landesrabbinerschule"), inaugurated in 1877, in which institution he held the position of teacher of Talmud from 1877 till 1887, having previously (since 1872) been president of the rabbinical college of Budapest. He also took part in the Israelitic county-congress of 1868-69. During Brill's lifetime a number of subtle extracts from his Talmudic glosses were published in the "Monatsschrift," 1896-97, and the "Magyar Zsidô Szèmle," of the same years, by Ludwig Blau. A few sermons have also been printed in the last-named periodical.

Brill's valuable Hebrew library became the property of the seminary at Budapest.

S. L. B.

BRIMSTONE: Sulfur in a solid state. It is found in Palestine, in the region along the banks of the Jordan and around the Dead Sea, both in combination with other elements and in its pure state. In the latter condition it is still employed medicinally for skin-diseases by the wandering Arab tribes, who make further use of it in the preparation of gunpowder. Brimstone is also found in the hot springs that line both shores of the Dead Sea. In one of these springs (at Callirrhoe), Herod took baths in the hope of finding a cure for his ailment (Josephus, "Ant." xvii. 6). Besides these two sources there was still a third which was known in Bible times. The two passages in Isaiah (xxx. 33, xxxiv. 9) point clearly to sulfur produced by volcanic eruptions. Sulfur is very inflammable; and this accounts for the fact that it is nearly always mentioned in connection with fire (Gen. xix. 24; Deut. xxix. 23; Ps. xi. 6; Ez. xxxviii. 22).

Biblical writers do not refer to the useful qualities of brimstone; whenever it is mentioned it is always as an instrument of God in exacting the penalty from the wicked (besides the above passages see Job xviii. 15); and this idea is continued in the New Testament (Rev. xiv. 10, xix. 20, xx. 10). This may be due in a measure to the recollection of the traditions of the destruction of Sodom and Gomorrah; the large quantities of brimstone found in the region suggesting it as the agent of destruction.

J. JR. G. B. L.

BRINDISI (Hebrew, פרנדיסי): Seaport on the coast of Calabria, Italy, whence the ancient Romans embarked for the East. Jews undoubtedly settled there at a very early period. In the Talmud ('Er. iv. 1) it is recounted that four illustrious Mishnaic doctors (tannaim), among whom was R. Gamaliel, returned from this city to their home. Benjamin of Tudela says that at his time ten Jewish families were living there, all engaged in the art of dyeing.

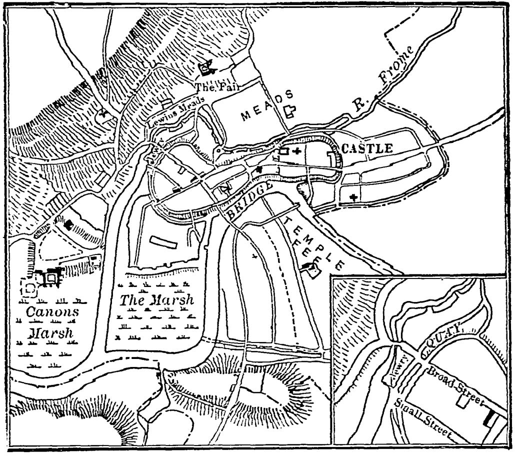
Early History.

BRISTOL: Commercial seaport city in the counties of Gloucester and Somerset, England. Jews settled very early at Bristol, which was the center of the slave-trade between England and Ireland, until its discontinuance, under the influence of St. Winibald, (?) in 1172, after the conquest of Ireland by Henry II. The names are known of no fewer than eighteen Jews of the twelfth century who lived in Bristol. Of these the most important was Moses of Bristol, father of Yom-Ṭob, the author of "Sefer ha-Tannaim," and grandson of Rabbi Simon of Trier (Treves), a martyr of the Second Crusade. In Richard of Devizes' account of English cities, as given by a French Jew, Bristol is described as a city of soap-boilers (Jacobs, "Jews of Angevin England," p. 149). After the decline of the slave-trade in Bristol, many Jews left the town; Moses going to Oxford, others to Nottingham and London. When, however, John imprisoned and fined all the Jews of England in 1210, it was from a Jew of Bristol, Abraham, that he extorted no less than 10,000 marks by extracting the victim's teeth successively till he consented to give up his wealth (Matthew Paris, "Chronica Majora," ed. Luard, ii. 528).



Plan of City of Bristol, Showing Position of Jewry, About 1250 C.E.
(After William Hunt, "Bristol.")

The Jewry was situated on the quay between Broad street and Small street, outside the inner but within the outer wall of the city. The synagogue was in Small street, under the building which was afterward St. Giles's Church. As far as can be ascertained, no Jews were in Bristol at the time of the Expulsion, no houses of Jews falling into the king's power at that time. On the other hand, Jews resided there during a considerable portion of the thirteenth century, as an Archa was retained there to hold their deeds.

Bibliography: Jacobs, *Jews of Angevin England*, p. 374; Hunt, *Bristol*, pp. 27-30; Seyer, *Bristol*, i. 527-529; Pryce, *Bristol*, pp. 72-73.

J.

Since the Eighteenth Century.

There is no record of congregational life earlier than about the middle of the eighteenth century. At that time the congregation, which included not a few families which since then have become most eminent in the English Jewry—that of Jessel, for instance—was able to build a synagogue which was regarded as one of the ornaments of the old town. It was situated in the very center of the present city, in the main thoroughfare, Temple street. A local topographical description, dated 1794, states that "the Jews' synagogue is very well fitted up, painted, and furnished with altar-piece, branches, candlesticks, etc., in such a style that though it is not one of the largest, it is one of the handsomest places of worship in Bristol." The present synagogue is situated in Park row, and is a commodious and well-fitted building. It was opened in 1870.

In the middle of the nineteenth century Bristol was one of the foremost provincial congregations in the British Isles, and it has been served by a succession of able ministers, many of whom have since

Rabbis.

achieved distinction in larger spheres of work. The earliest known of these were the Rev. David M. Isaacs (afterward minister and professor at Liverpool and Manchester) and the Rev. Abraham Barnett (afterward of the New Synagogue, London).

The Rev. Aaron Levy Green, afterward eminent as minister of the Central Synagogue, London, was stationed at Bristol from 1838 to 1851, taking locally a share in the emancipation struggle which attracted the notice of Sir Moses Montefiore, and preaching occasional English sermons, at that time a very rare feature of Anglo-Jewish devotions. Among other Jewish divines attached to the congregation may be mentioned the Rev. Isaac Samuel (now minister of the Bayswater Synagogue, London); the Rev. Meyer Mendelssohn (afterward minister at Kimberly, Cape Colony); the Rev. Burman Berliner (afterward minister of the St. John's Wood Synagogue, London); the Rev. Joseph Leonard Levy, B.A. (lately attached to Congregation Keneseth Israel, Philadelphia, and now rabbi of Congregation Rodeph Shalom, Pittsburg); the Rev. Moses Hyamson, B.A., LL.B. (afterward minister of the Dalston Synagogue, and now dayyan of the United Synagogue, London); the Rev. Lewis Mendelssohn, B.A. (afterward of Dublin); and the Rev. Joseph Abelson, B.A., the present minister.

Of recent years, and concurrently with the revival of the West-Indian trade and the enterprising enlargement of the port, an increase of the Jewish population has become evident, and much activity is again being brought to bear on communal work. In addition to the Ladies' Benevolent Society, dating from about 1860, there exist a board of guardians (founded 1894); a Hebrew school (founded 1890), the classes of which are attended by seventy children; a literary and social society (founded 1894), with fifty-one members; and a Zionist association (1899). Jewish organization is not confined to the residents in the city itself. At the great public school, Clifton College, situated in the suburbs, there has been for some years a Jewish house—that is, one of the residences forming part of the collegiate buildings—the domestic life of which is carried out in accordance with Jewish custom. The master presiding over this house is the Rev. Joseph Polack, B.A., previously minister of the Liverpool (Old) congregation. It has existed long enough to form a tradition in the college; and its first generation of students has already taken a leading position in Anglo-Jewish communal life.

J. F. L. C.

BRITISH MUSEUM, London: Chief library and museum of the United Kingdom. It contains many books and objects of Jewish interest.

The Hebrew MSS.: The Hebrew manuscripts in the British Museum already fully catalogued or briefly described number about 1,200. This total includes fifty recently assigned to fragments belonging to the collection brought from Cairo. Between eighty and a hundred additional ones are likely to be obtained from the remainder of the same interesting collection. There are also thirty Hebrew charters (business deeds of the Anglo-Norman period) in the Museum; and if the seventy-one Samaritan manuscripts and the very ancient Aramaic papyrus (marked cvi.*, 2d century B.C.) be treated as part of the Hebrew collection, the entire library may be estimated to contain close upon 1,400 numbers.

Classification of MSS.

Of these over 1,050 are briefly described in the "Descriptive List of Hebrew and Samaritan MSS. in the British Museum," which appeared in 1893. A rough classification into subjects shows that in the total just mentioned Biblical texts are represented by 165 numbers; Biblical commentaries by 175; Midrashim and Midrashic discourses by 45; Talmud and Halakah by 190; liturgies by 115; cabalistic manuscripts by 130; ethics, philosophy, and poetry by an aggregate of 84; philology, mathematics, and astronomy by 75; medicine by 20; miscellaneous manuscripts by 73; charters by 30; and Samaritan literature by 64. The later acquisitions may be assumed to show a similar proportion of subjects, with the very notable additions, however, of a large number of letters and other historical documents forming part of the collection brought from the Cairo Genizah.

Sources of the Collection.

The distribution of Hebrew manuscripts among the earlier Museum collections is as follows: The Sloane and Harley collections, which formed the nucleus of the British Museum at its opening in 1753, respectively contained twelve and ninety-five Hebrew manuscript volumes. The Old Royal Library, presented to the Museum by King George II. in 1757, included seven Hebrew numbers. A like contingent was contributed by the great library collected by Thomas Howard, earl of Arundel, Surrey, and Norfolk. Three Hebrew manuscripts were presented (together with a much larger number of printed books; see below) by Solomon da Costa in 1759, and two other numbers of the collection have been filled up with his own catalogue of the printed books and manuscripts thus presented. The Lansdowne collection (purchased in 1807) and the library formed by King George III. (presented to the nation by King George IV. in 1823) contained one Hebrew volume each; and the Egerton collection (bequeathed in 1829) included three Hebrew numbers.

Of the 520 Hebrew volumes embodied in what is known as the Additional Series of manuscripts, no less than 323 came from the famous collection of Joseph Almanzi; and the few Hebrew manuscripts which form part of the Rich collection (acquired in 1829) are also included in the total of 520 just mentioned. The series which followed the Additional, and into which fresh acquisitions are now constantly being incorporated, is the Oriental. The latter now contains about 550 Hebrew numbers. A large proportion of these (not less than 260 volumes) was purchased from M. W. Shapira between the years 1877 and 1883. The rest came to the Museum in smaller consignments through the agency of the late Fischel Hirsch and other booksellers.

The sources from which the Museum collection became from time to time enriched also include manuscripts purchased at the duke of Sussex's sale in 1844; the collection of ten important Biblical manuscripts which were in the possession of the families of Schultens, John van der Hagen, and Dr. Adam Clarke successively; four Megillah scrolls once the property of Sir Moses Montefiore; and several numbers formerly owned by Dr. Adolf Neubauer, Dr. C. D. Ginsburg, F. D. Mocatta, and S. J. A. Churchill (British consul at Teheran).

It will now be useful to note some of the more important features of the collection, and in doing so the classified order adopted in the "Descriptive List" published in 1893 will be followed.

I. Biblical Texts.—(*a*) *Scrolls:* None of these is, unfortunately, of any great antiquity, the oldest (MS. Harley, 7619) probably belonging to the fourteenth century. Mention should, however, be made of a number of Yemenite Pentateuch rolls exhibiting what are technically called "dry points," employed to mark pauses, and to distinguish some words of equal spelling but dissimilar pronunciation. As the writing of synagogue scrolls is strictly limited to the consonantal text, this device of impressing a small inkless circle was adopted (with the permission of the Yemenite rabbis?) as a help to the reader. One roll of the collection (Add. 19,250) was written (probably in the eighteenth century) for the use of the Jews at Kai-Fung-Fu in China.

(*b*) *Biblical Texts in Book Form:* Special mention may be made of MS. Or. 4445, which was brought from Teheran, and probably belongs to the ninth century. It is at any rate not later than the famous codex of the Prophets preserved at St. Petersburg, which is dated 916 C.E. This Museum manuscript contains, however, only the Pentateuch. The oldest dated copy of the entire Bible in the Museum (Or. 2201) belongs to A.M. 5006 (1246 C.E.), and was written at Toledo. A very fine specimen of Spanish calligraphy and marginal illumination is the Bible in three volumes, numbered Or. 2626-28. It was written in 1483. Of very considerable interest and importance are a number of codices (mostly Yemenite) exhibiting what is known as the superlinear, or Babylonian, punctuation. The collection generally contains excellent specimens of almost all styles of writing and all Masoretic schools (Spanish, Italian, German, North African, etc.). One codex of the Pentateuch (Or. 2451) was written at Kum in Persia A. GR. 1794 (1483 C.E.). Of the Karaite codices special attention should be directed to Or. 2540, belonging to the tenth century. The Hebrew text is there written in an archaic form of the Arabic character, the Hebrew vowel-points and accents being added in colored ink. This manuscript is also provided with ancient Oriental ornamentations.

II. Biblical Commentaries: In this section a great wealth of material for the study of early Karaite literature will be found. Special mention may be made of commentaries on the Pentateuch and other Biblical books by Abu Yusuf Ya'akub al-Ḳirḳisani, Salmon b. Jeroham, David b. Boaz, and Abu al-Faraj Furḳan ibn Asad. Japheth is most amply represented. Noteworthy is the fact that a copy of his commentaries on Ruth and the Song of Songs (Or. 2554) is dated Ramlah, A.H. 395 (1004-5 C.E.), and that the reference to Japheth in the colophon shows clearly that the manuscript was written in the author's lifetime.

The collection of Rabbinite commentaries is also a very good one. The principal unique texts are: (1) the commentary on the Second Book of Samuel by Isaac b. Samuel ha-Sefardi (eleventh to twelfth century); (2) a commentary on the Pentateuch by Rabbi Meyuḥas b. Elijah (probably a Greek writer of the twelfth century); and (3) fragments of a Persian commentary (Hebrew character) on a portion of the Prophets.

III. Midrashim and Midrashic Discourses: These include copies of the three important Yemenite Midrashic compilations known as the "Midrash ha-Gadol," "Midrash ha-Ḥefeẓ," and "Nur al-Ẓulum." Unique are the texts contained in Add. 27,292, and probably also Harley 5704 (containing a Midrash on the Minor Prophets in the style of the Yalḳut ha-Makiri). One may notice, besides, Midrashic discourses by David b. Abraham Maimuni and Sa'id ibn Da'ud al-'Adani.

IV. Talmud and Halakah: In the older British Museum collections only one volume of Talmudic texts of the twelfth and another of the fourteenth century are contained; but by the latest acquisitions from the Cairo Genizah three other important fragmentary numbers have been added to the library. Of the Jerusalem Talmud the Museum possesses three volumes of the sixteenth century, with the commentary of Joseph Syrillo. Noteworthy for its antiquity is a volume containing Rashi's commentary on Baba Meẓi'a, dated 1190 C.E.

The Halakah portion of this section is very rich in interesting and valuable codices, including five copies of the Yad ha-Ḥazakah of Maimonides, important copies of the סמג, the סמק, Alfasi, and various responsa. As unique may be noted the additions of Samuel b. Meïr (RaSHBaM) to Alfasi, contained in Add. 17,049-50 (mistaken by Leopold Dukes for notes by Samuel Schletstatt). A fine specimen of richly illuminated title-pages and headings is presented by Harley 5698-99 (Maimonides, "Mishneh Torah").

Karaite Halakah is also represented; *e.g.*, by Yusuf al-Baṣri's "Questions and Answers," Ḳirḳisani's "Book of Commandments," and Samuel al-Maghrebi's "Al-Murshid," not to mention several other works which still await a thorough investigation.

V. Liturgy: This section is also a very rich and important one. It includes very fine specimens of almost all important rites. Margoliouth's study of a number of these manuscripts has revealed many features that were unknown to the great liturgiologist Leopold Zunz. Very many hymns will have to be added to the known list when these manuscripts are fully catalogued. Special mention may here be made of several fine copies of the illustrated Haggadah, belonging to the Spanish school of the fourteenth century. It may also be noted that a fine copy of the North African Liturgy (Or. 5600) was recently acquired by the trustees at the sale held at Amsterdam of the late D. H. de Castro's library. The Karaite ritual is also fairly well represented.

VI. Cabala: It has already been stated that this section contains no less than 130 numbers. It includes Abraham Abulafia's commentary on the "Moreh Nebukim" (perhaps unique), and works by Joseph Gikatilla, Moses b. Shem-Ṭob of Leon, Moses Cordovero, and Moses Ḥayyim Luzzatto (Add. 27,110 being his autograph). Some interesting additions to the section are supplied by the Cairo Genizah.

VII.-IX. Ethics, Philosophy, and Poetry: These sections are small; but specialists will no doubt find in them a number of interesting codices for collation. The most noteworthy manuscripts are: in ethics, the unique "Ge' Ḥizzayon" of Abraham b. Jacob, and two copies of a Persian version in Hebrew characters of Abraham b. Ḥasdai, "Ben ha-Melek we-ha-Nazir" (Balaam and Josaphat); in philosophy, four manuscripts of early Karaite speculations, besides some important codices of well-known Rabbinite works; in poetry, a copy of Al-Ḥarizi's "Taḥkemoni," dated 1282 C.E., a unique volume of poems by Joseph b. Tanḥum Yerushalmi, and Bible stories in Persian verse (Hebrew characters) by Mollah Shahin.

X. Philology: This section contains fifty-three numbers. Noteworthy are a fine early copy of Abu al-Walid's "Kitab al-Uṣul" (which came from Yemen), several good though fragmentary copies of Nathan b. Jehiel's "Sefer ha-'Aruk," two early copies of the "Maḥberet" of Menaḥem b. Saruḳ (1091 and 1189 C.E.), and the "Mushtamil" of the early Karaite grammarian Abu al-Faraj Harun.

XI.-XIII. Mathematics, Astronomy, and Medicine: These sections can, of course, be properly appreciated by specialists only. On account of the language in which it was written, Add. 7701 may be noted here, containing works on astronomy and the calendar in Persian (Hebrew characters).

XIV. Miscellaneous MSS.: This section is full of interesting matter of various kinds. Special mention should, perhaps, be made of the controversial works (Jews and Christians, Rabbinites and Karaites). But the gem of the section is no doubt Add. 11,639, containing a great variety of works written partly in the body of the page and partly on the margin. It is accompanied by fine pictorial illuminations of the French school of the thirteenth century (latter half).

Of the charters it need only be said that they nearly all belong to the thirteenth century (some few being earlier), and that besides throwing some light on the circumstances of the time immediately preceding the expulsion of the Jews from England in 1290, they give a good idea of Anglo-Hebrew caligraphy of the time.

The latest noteworthy addition to the interesting and important Samaritan collection is a fine copy of the Samaritan liturgy, dated 1258 C.E.

The Printed Books: The collection of Hebrew printed books in the Museum now consists of about 15,000 volumes. Of these upward of 10,100 are described in Zedner's "Catalogue of the Hebrew Books in the Library of the British Museum," published in 1867, and the greater part of the remainder are entered in S. Van Straalen's "Catalogue of Hebrew Books in the British Museum Acquired During the Years 1868-92."

The distribution of volumes among the more important classes of books described in Zedner's catalogue is as follows: Bibles, 1,200 volumes; commentaries on the Bible, 510; Talmud, 730; commentaries on the Talmud, 700; codes of law, 1,260; grammars and dictionaries, 450; poetry and criticism, 770.

Of the 4,650 volumes described in Van Straalen's catalogue the greater part was published within the last fifty years. This large contingent is rich in specimens of works in the Judæo-German dialect, and in modern Hebrew belles-lettres, such as the publications of Mapu, Smolenskin, Gordon, and Lebensohn, and also Hebrew translations of works by Shakespeare, Milton, Schiller, Lessing, and other European writers. The numbers of volumes to be assigned to the classes mentioned above must, therefore, necessarily be smaller in proportion than those given in connection with Zedner's catalogue.

Printed Books, Whence Acquired.

The history of the acquisition of the printed books is naturally not so varied as that of the manuscripts. In 1753, when the Museum was first opened to the public, the editio princeps of the Talmud was the only Hebrew work in the collection, forming part of the royal library presented by King George II. But Solomon da Costa, a Jewish merchant who had immigrated from Holland, and whose name has already been mentioned above in the account of the manuscripts, presented to the Museum in the same year a collection of no less than 180 volumes, containing some of the most valuable works of Rabbinic literature. From the preface to Zedner's catalogue we further learn that "during the succeeding eighty-nine years the Hebrew books increased to about 600." But the great importance of the Hebrew library dates from the year 1848; for it was then enriched by the addition of 4,420 volumes purchased from the famous collection of H. J. Michael of Hamburg. "This acquisition gave," to use the words of the preface of 1867 just mentioned, "an impetus to this branch of the library, which has been constantly maintained" ever since, "and has resulted in making the national collection of Hebrew books the largest in the world."

The next notable addition to the library came from the collection of the late Joseph Almanzi, which had first passed into the hands of Asher of Berlin, and from which the trustees of the British Museum were able to select such works as were not already in the Museum library. The books acquired since that time came to the Museum gradually through the ordinary medium of booksellers, among whom the late Fischel Hirsch of Berlin was one of the most frequently employed.

The list of early printed books and other rare works in the collection is a pretty large one. The following statement relates to the books described in Mr. Zedner's catalogue:

1. Of works of the fifteenth century, mentioned by De Rossi, there were then 65 in the Museum.
2. Of works printed from 1500 to 1540, mentioned by De Rossi, there were 237.
3. Of works printed from 1480 to 1540, not mentioned by De Rossi, 32.
4. Of books of which no other copy, or only one or two copies, was known to exist, 38.

It has already been stated that the greater number of books described in Van Straalen's catalogue were printed in recent times. The proportion of early books must, therefore, be necessarily small. There are, however, to be noticed such works as Jacob b. Asher's code, printed at Mantua in 1476 (with MS. notes by G. B. de Rossi); the Pentateuch, printed at Bologna in 1482 (also with MS. notes by De Rossi); the Talmudical tractate Beẓah, printed at Soncino in 1483; the Pentateuch, printed at Faro in 1487; the books of Isaiah and Jeremiah, printed at Lisbon in 1492.

It may finally be mentioned that the trustees recently acquired a rather curious copy of the Talmudical tractate Ketubot which probably belongs to the sixteenth century, and appears to have been printed at Salonica. It is specially noteworthy that the foliation of this copy differs from the uniform arrangement adopted in the editions generally.

The antiquities contained in the Museum also include many objects of Jewish interest, notably a fine series of ancient Jewish coins in the department of coins and medals.

J. G. M.

BRITTANY (French, **Bretagne**): Ancient province of France corresponding to the present departments of Finistère, Côtes-du-Nord, Morbihan, Ile et Vilaine, and Loire-Inférieure. The name occurs in Hebrew writings under various forms, such as בירטנייה, בירטאניה, בריטאנייה. Little information can be gathered concerning the epoch of the settlement of Jews in Brittany, where they were never numerous. The first official documents referring to the Jews there date from the beginning of the thirteenth century. These are two charters, one dated April, 1209, and the other March, 1235. In the first the Jews are indirectly mentioned as creditors of Guillaume de Mareil; the second is a receipt delivered to the prior of Donege discharging him from all debts to the Jews Creisson and Bonastru of Guérande.

There were Jews also at Clisson, Aucenis (where a street still exists called "Rue de la Juiverie"), Segré, and Nantes, the last-named place being, according to Michael Guimar, the center of the Jews of Brittany. There they possessed a large synagogue in the street above-mentioned, and their own tribunal, where disputes among themselves were adjusted according to the Mosaic law. The chief occupation of the Jews of Brittany was money-broking, and many interested parties eagerly sought a pretext to rid themselves of their creditors. This pretext soon presented itself in the new crusade preached by Gregory IX. in 1235. In order to win believers, Gregory granted the crusaders and the promoters of the crusade full indulgence, and forbade their creditors, both Jews and Christians, to take any interest from them. The crusaders of Brittany, however, not willing to pay even the principal, demanded the banishment of the Jews. They not only forbade them to claim what was due, but forced them to return the goods given in pledge; then, in order to make sure of their complete riddance of these creditors, they massacred most of the Jews in 1236, soon after Easter. Three years later, at the request of the barons and prelates, Duke Jean le Roux issued a decree enacting the following: (1) the banishment of the Jews from Brittany, and prohibition of their entering his lands or those of his subjects; (2) the abolition of all debts, of whatever nature, contracted with Jews; (3) the return to the debtors or their heirs of both personal property and real estate given in pledge; (4) the interdiction of commitment for trial on the charge of having murdered a Jew; (5) the confirmation of this decree by the king of France. The duke engaged himself by an oath to observe the provisions of this decree during his life, and bound his successors to a similar fulfilment.

Some years later, however, it seems that Jews again settled in Brittany, and were banished thence only in 1391, when Brittany became a definite French province. In the early part of the seventeenth century, Jews, and especially Portuguese Maranos, sojourned there notwithstanding the decree of their banishment issued April 23, 1615, by Louis XIII.

BRIVIESCA (not **Birviesca** or **Briviasca**): The ancient Virovesca; city in Old Castile, not far from Burgos. A Jewish community dwelt there, which in 1290 was taxed 11,700 maravedis. At the request of his sister, the Infanta Doña Berenguella, Don Ferdinand III. of Castile presented to the convent San Maria la Real of Burgos, in perpetuity, the taxes of several Jews living in the quarter San Cæcilia in Briviesca, including those of Abraham del Bao, Judah Mocaniz, and Moses, his son-in-law, and others, and their descendants. In the internecine war between Don Pedro and Henry of Trastamare the Jews valorously defended the walls of the city, until they were attacked in the rear by the troops of Bertrand du Guesclin, and were either killed or taken prisoners. According to Samuel Ẓarẓa's account not a single one of the two hundred heads of families that had lived there remained alive; "their corpses became food for the birds of heaven and the beasts of the field." In 1455 Don Mosse was living at Briviesca as farmer of taxes.

BROCINER, JOSEF B.: President of the Union of Hebrew Congregations of Rumania; born in Jassy, Rumania, Oct., 1846. From 1864 to 1866 he studied law at the university of his native city, and during that time cooperated with Dr. Landesberg and others in founding the Uunimea Israelita, a Jewish defensive publication society. In 1867 Brociner settled at Galatz as a merchant. He joined (1868) the Galatz Lodge of the Masonic Order (Grand Orient de France), and as a Freemason was active in bringing about a modification of rituals, finally obtaining for himself the thirty-third degree. Up to the present time (1902) he is the only Jew among the eighty-four Freemasons of the Grand Orient who has attained this degree.

In 1873 Brociner was chosen president of the local committee of the Alliance Israélite Universelle.

Together with Dr. Leopold Stern of Bucharest, he was delegated in 1876 to represent Rumania at the conference of the Alliance Israélite Universelle for the defense of Jews in the Orient, held under the chairmanship of Adolphe Crémieux at Paris. During the war of Russia and Rumania against Turkey in 1877, Brociner was secretary of the committee for maintaining ambulances on the battle-field; and in April and May, 1878, he accompanied Dr. Adolph Stern to Budapest, Vienna, and Berlin to obtain the cooperation of their coreligionists in championing the cause of the Rumanian Jews at the Berlin Congress. In June he was a member of the commission sent to Berlin to furnish the congress of the European powers with information on the Rumanian question. In August, 1878, with the late Benjamin F. Peixotto, American consul-general at Lyons, he represented the Rumanian Jews at the second conference of the Alliance Israélite Universelle, held at Paris.

Brociner accompanied his brother, Dr. Marco Brociner (another brother, Maurice, is secretary to King Charles of Rumania), to Vienna, Berlin, and Paris (1879), in order to further the interests of the Rumanian Jews in these cities. At that time he obtained from Professor Bluntschli of Heidelberg the famous juristic brochure "L'Etat Roumain," in favor of the Rumanian Israelites. He was president of the Jewish community of Galatz in 1874, 1878, 1884, and 1893. In 1884 he was vice-president of the Galatz committee for establishing the colonies in Palestine which were afterward taken under the protection of Baron Edmond de Rothschild of Paris.

The Union of Rumanian Jewish Congregations was due to Brociner's initiative, and in recognition of his services he was unanimously elected first president. In addition to many articles on the Jewish question, and various reports published by the B'nai B'rith Lodge, Brociner wrote a pamphlet entitled "Law of Moadim" (Days of Meeting), for the Independent Order of B'nai B'rith, which was well received.

S. M. W. L.

BRODA, ABRAHAM BEN SAUL: Bohemian Talmudist; born about 1640 at Bunzlau; died April 11, 1717, at Frankfort-on-the-Main. Saul Broda sent his son to Cracow to pursue his Talmudic studies with Rabbi Isaac ben Ze'eb Ḥarif of that city, in order to withdraw him from the evil influences of Shabbethaism, at that time spreading throughout Bohemia. After receiving his rabbinical diploma, Broda returned to his native city, but was soon called as rabbi to Lichtenstadt, and thence to Raudnitz. Even then his reputation was so great that Shabbethai Bass asked for his approbation to a book that Bass had written. Hence, when the office of chief rabbi of Prague became vacant about 1693, it was offered to Broda, who accepted it, although it was probably not very remunerative in consequence of the great fire of 1689, which impoverished many members of the congregation. This office, from which he had doubtless expected much pleasure, involved him, on the contrary, in many difficulties; for when a difference arose between Broda and Ẓebi Ashkenazi in regard to a ritual question, all the rabbis of Prague took sides against the former.

It was probably this that induced Broda, who disliked quarrels, to seek another position. He was called to Metz. The documents available are conflicting as to the date of his entry into office; but the contract of the community of Metz with Broda, dated Oct. 30, 1708, has been discovered by Kaufmann, from which it is evident that Broda went to Metz in 1709, as claimed by Carmoly, and not in 1703, as Cahen assumed. Here, as at Raudnitz and Prague, Broda's chief activity consisted in founding and directing a yeshibah; it is said that he had an excellent method of initiating into the style of the Talmud those who had never before pursued such study. His stay at Metz was of short duration; for in 1713 he was called to Frankfort-on-the-Main, where, also, he founded a yeshibah. This had a large attendance, many of his pupils becoming eminent rabbis.

Broda's collected works appeared after his death. They include: (1) "Ḥiddushe Geonim" (Offenbach, 1723), consisting of scholia to the treatises Baba Ḳamma, Baba Meẓi'a, and Sanhedrin; (2) "Ḥiddushe Halakot," on Giṭṭin, Wandsbeck, 1731; (3) "Shema'ta Ḥadta," on Ketubot and Giṭṭin, Frankfort-on-the-Main, 1722; (4) "Eshel Abraham," on Pesaḥim, Ḥullin, Baba Batra, Frankfort-on-the-Main, 1747; (5) "Toledot Abraham," on Ḳiddushin and Ketubot, Fürth, 1764; (6) "Halikot 'Olam," the Jewish laws in the German language, Budapest.

Aside from these works written by him, many of his explanations of different questions are found in the works of other scholars, as in Nathaniel Weil's "Ḳorban Netanel," Carlsruhe, 1755; and Ẓebi Ashkenazi's "Ḥakam Ẓebi," *et seq.*

L. G. A. Pe.

BRODA, ABRAHAM B. SHALOM: Russian rabbinical author; born in Wilna about the beginning of the nineteenth century; died there after 1860. His father, R. Shalom b. Aaron, who was quite young at the time of his death (1805), was one of the leaders of the community (see R. Israel Ginzburg's approbation to "Bet Wa'ad"). R. Abraham is known as the author of two works: "Bet Wa'ad," a collection of regulations which refer to sitting down and standing up during various religious exercises, with an appendix relating to weights and measures, Wilna, 1832; "Bayit ha-Gadol," a commentary on Pirḳe Rabbi Eliezer, which is published with the text, Wilna, 1838. At the end of the work the author states that he has also written a commentary on the Mekilta, but does not possess the means to publish it. The commentary has no distinguishing feature except the numerous corrections made in the original text, which had been corrupted by various copyists and printers.

BRODA, BENJAMIN B. AARON: Lithuanian rabbi and Talmudist; died Sept. 1, 1818, at Grodno. He was the best-known Talmudist of the five sons of Aaron Broda, an eminent Talmudist and rabbi of the old Polish community of Kalvarien. Owing to his wealth and family connections—he was a direct descendant of the famous Abraham b. Saul Broda—Benjamin, in 1791, secured appointment to the rabbinate of Grodno, one of the oldest and most important communities of Lithuania, as successor of R. Eliezer b. Ẓebi, who had recently died. Although the letters of appointment had been signed by the king Poniatowski himself, Broda's nomination gave rise to a warm dispute in the community; many members having favored the appointment of R. Tanḥum, son of the late Rabbi Eliezer, who had officiated as "rosh bet-din" (head of the court) even during his father's lifetime. The quarrel, which lasted until almost the end of Broda's incumbency, was so bitter that at his death it was decided, in order to avoid a recurrence of similar quarrels, to leave the office of the chief rabbi forever vacant. Among Broda's sons, **Ḥayyim Broda** may be mentioned, the author of the work "Torah Or we-Derek ha-Ḥayyim" (Grodno, 1823), a detailed commentary to the sixty chapters of Caro's "Yoreh De'ah."

L. G.

BRODSKI: A family which has produced many rabbis and notable men in the last three hundred years. It is a branch of the SCHOR family. **Meïr Schor** of Brody, Galicia, married and settled in Zlatopol, government of Kiev, Russia, where he assumed the name "Brodski" (from Brody). His father, **Alexander Ḥayyim Schor,** was a son of Deborah Babad, daughter of R. Alexander Schor, author of "Simla Ḥadashah," who lived in Zolkiev in the latter part of the seventeenth century. Meïr had five sons, all of whom became very wealthy; and the Brodskis are now considered the richest Jewish family in Russia. **Israel** (b. 1823; d. 1889), who surpassed his brothers in wealth and philanthropy, settled in Kiev, where his sons, **Lazar** and **Leon,** who are practically at the head of the sugar industry in Russia, now reside. They own 22 sugar factories, including 3 refineries. They are both councilors of commerce, and have been decorated by the Russian government and by the French government with the order of the Legion of Honor.

The best known of the other sons of Meïr was **Abraham,** who was born in 1816 and settled in Odessa in 1858. He, too, was prominently identified with the sugar industry and other large enterprises, and was for many years the most influential member of the city council of Odessa, occupying for a long time the position of vice-mayor. He, like his brother Israel, distributed large sums for various charitable and educational purposes, and founded important benevolent institutions in Odessa and in Zlotopol, where he died Oct. 28, 1884. His son **Samuel** (b. 1846; d. Dec. 28, 1896) married a daughter of the journalist and author Ossip (Joseph) Rabinovitch. He was also a member of the Odessa city council (by appointment, for no Jew can be elected to that position).

BIBLIOGRAPHY: H. D. Friedberg, *Toledot Mishpaḥat Schor*, pp. 19-20, Frankfort-on-the-Main, 1901; *Aḥiasaf*, 5658; *Oẓar ha-Sifrut*, v. 327-328; *Ha-Asif*, ii. 78, 755; *Ha-Meliẓ*, xiv. No. 9, xx. No. 84; Efrati, *Dor we-Dorshaw*, p. 45, Wilna, 1889; *Allg. Zeit. des Jud.* 1878, p. 297; *Jewish Messenger*, March 14, 1902. A genealogy of the family is presented by Wolf Kratuschinsky in his *'Aṭeret Tiferet Israel*, Vienna, 1883; but it deals only with Israel, not even mentioning the other brothers. The work is imperfectly done.

H. R. P. WI.

BRODSKY, ADOLPH: Russian violinist; born in Taganrog March 21, 1851. At the age of nine he played in a concert at Odessa, attracting much attention. He received his musical education from Professor Helmesberger in Vienna, where he played in his teacher's quartets and in the Vienna court orchestra. After a concert tour in Russia he was appointed (1875) professor at the Moscow Conservatory of Music. In 1879 he directed the symphony concerts in Kiev; and since 1882 has been professor at the Conservatory of Leipsic. The quartet composed of Brodsky, Hans Becker, Novacek, and Julius Klengel has a wide reputation. In 1891 Brodsky went to the United States, where he toured for three seasons. Returning to Germany, he accepted the position of head teacher at the Manchester Royal College of Music and leader of the Hallé concerts. After Sir Charles Hallé's death in 1895, Brodsky was appointed his successor as principal of that college. The quartet arranged by him, and comprising himself, Rawson Briggs, S. Speelman, and Carl Fuchs, has become well known in England.

BRODY. See GALICIA.

BRODY, HEINRICH: Austrian rabbi; born May 21, 1868, at Ungvár, Hungary; descendant of **Abraham Broda.** Educated in the public schools of his native town, and at the rabbinical colleges of Tolcsva and Presburg, Hungary, Brody also studied at the Hildesheimer Theological Seminary and at the University of Berlin, being an enthusiastic scholar of the Hebrew language and literature.

He was for some time secretary of the literary society Mekiẓe Nirdamim, and in 1896 founded the "Zeitschrift für Hebräische Bibliographie," of which he is coeditor with A. Freiman.

Brody is now (1902) rabbi of the congregation of Nachod, Bohemia. He has taken great interest in the Zionist movement.

Brody is author or editor of the following works: "מתק שפתים, Hebräische Prosodie von Imm. Frances, mit Einleitung und Anmerkungen," Cracow, 1892; "ס' השלמה, Haschlamah zum Talm. Tractat Berachot, von R. Meschullam b. Mose," Berlin, 1893; "ר' שלמה דאפיאירה, Beiträge zu Salomo da-Piera's Leben und Wirken," Berlin, 1893; "תולדות ר"ד קאסל, David Cassel's Biographie," Cracow, 1893; "וכוח לבני ושמעי, Ein Dialog von Imm. Frances," Cracow, 1893; "Offener Brief an Herrn Prof. M. Hartmann," Berlin, 1894; "מטמוני מסתרים, Literarhistor. Mitteilungen," No. 1, Cracow, 1894; "Studien zu den Dichtungen Yehuda ha-Levi's," i.: "Ueber die Metra der Versgedichte," Berlin, 1895;

“עשר שירות משירי רמ"בע, Zehn Gedichte aus dem Dîwân Moses ibn Esra,” Leipsic, 1896; “דיואן, Der Dîwân des Yehuda ha-Levi,” vols. i. and ii. 1, 1894–1901; “שיר השירים, Weltliche Gedichte des Abu' Ajjub Soleiman b. Yahja (Solomon) ibn Gabirol,” No. 1–2, Berlin, 1897–98; “מקדא קדש, Arnold B. Ehrlichs, Mikra ki-Peschuto Kritisch Beleuchtet,” Cracow, 1902; “Mikra Kodesch,” 1902.

He has also published, under the assumed name of Dr. H. Salomonsohn, “Widerspricht der Zionismus Unserer Religion?” 1898, and is a contributor to “Ha-Maggid,” “Israelitische Monatsschrift,” “Magazin für die Wissenschaft des Judenthums,” “Monatsschrift für Geschichte und Literatur des Judenthums,” “Allgemeine Zeitung des Judenthums,” “Evkönyv,” “Ha-Eshkol,” “Ha-Shiloah,” etc.

s. F. T. H.

BRÓDY, SÁNDOR: Hungarian author and journalist; born at Erlau in 1863. After attending the schools of that city he devoted himself entirely to literature. From 1888 to 1890 he was editor of the “Erdélyi Hiradó,” published at Klausenburg, and was also connected with the “Erdélyi Képes Ujság” and the political daily “Magyarság.” Since 1890 he has been a member of the “Magyar Hirlap,” and since 1882 a prolific contributor of articles, feuilletons, stories, and novels to the leading literary publications of Hungary. In his works he depicts the dark side of life, and is a disciple of the modern French realistic school.

The following are his principal works: “Regénytárgyak,” tales, 1892; “A Kétlelkü Asszony,” novel, 1893; “Az Egri Diákok,” 1894; “Nyomor,” stories, 1884; “Faust Orvos,” novel, 1888–90; “Don Quixote Kisasszony,” novel, 1888; “Emberek,” stories, 1888; “Szinészvér,” stories, 1891; “Hófehérke,” novel, 1894; “Apró Regények,” 1895; “Két Szöke Asszny,” novel, 1895; “Ejszaka,” stories, 1895; “Rejtelmek,” stories, 1895; “Az Asszonyi Szépség,” 1897; “Tündér Ilona,” novel, 1898; “Az Ezüst Kecske,” de luxe edition, 1898; “Egy Férfi Vallomásai,” 1899; “Fehér Könyv,” 1900–01. Bródy justly enjoys a wide popularity. All his works have been translated into German, and many of his shorter productions have also appeared in French, English, Danish, Croatian, Rumanian, and Servian newspapers and other periodicals. His contributions to the “Magyar Hirlap” are mostly of a political or critical nature. In 1901 he essayed the drama in his preparation of a play founded upon his novel “Hóféhérke”; this has been frequently performed with marked success at the National Theater at Budapest.

BRÓDY, SIGMUND: Hungarian journalist, and member of the Upper House of the Hungarian Parliament; born Nov. 15, 1840, at Miskolcz. He attended the gymnasium at Budapest, and late studied law at the university. He began his journalistic activity early in life, and in 1859 published his first leader. As early as 1860 he occupied the post of editor of the “Pesti Hölgydivatlap,” and in conjunction with Károly Grosz founded the German periodical “Pannonia,” whose purpose was the publication of Hungarian literature in the form of critical studies and translations. In 1859–60 he wrote some poems, as well as a number of hymns for the Jewish congregation which are still in use. As collaborator on the “Magyar Sajtó,” he became very widely known as a journalist of the first rank.

After the compromise with Austria (1867), Bródy was associated with Sigmund Kemény as editorial writer on the “Pesti Napló”; and this was the most brilliant period of his career as publicist, his sound logic and comprehensive views being especially noticeable. In 1872 he became secretary at the Ministry of the Interior, but voluntarily resigned this position; a year later he purchased the “Neues Pester Journal,” which paper under his management attained an unprecedented circulation throughout the country.

Bródy is also a distinguished philanthropist, and on the anniversary of his fiftieth birthday he donated 100,000 gulden to journalistic institutions. Further donations to the amount of 250,000 gulden were made in memory of his wife. In 1896 he was appointed a life-member of the Hungarian Upper House.

BROGLIE, VICTOR-CLAUDE, PRINCE DE: French statesman; opponent of Jewish emancipation; born at Paris, 1757; beheaded in 1794 for intriguing against the French Revolution. He wrote “Opinion sur l'Admission des Juifs à l'Etat Civil” (Paris, 1791), in which he argues against the admission of the Jews into French citizenship simply because the reformed Jewish oath is sufficient proof of the complete renunciation of the rights of citizenship. De Broglie found a vigorous and bitter opponent in the representative Prugnan, who signally defeated his exclusion bill (Sept. 27, 1791).

Prugnan's chief argument against his opponent was that the civil laws of the Jews were identified with their religious laws, and, consequently, that their reformed oath had absolutely nothing to do with the conditions necessary for French citizenship, which were fixed by the constitution. After De Broglie's death a legend circulated among the Jews of Avignon, Dijon, and Carpentras to the effect that De Broglie had been beheaded soon after having issued his book against the Jews, and that, in the last moments of agony, he had asked forgiveness for his anti-Jewish sentiments. There is no historical basis for this legend, which the present writer heard for the first time in 1881 from Lazare Isidor, the grand rabbi of France, and from Michel Erlanger.

G. G. Se.

BROKER: One who acts as middleman between seller and buyer, or makes it his business to bring buyer and seller together; also one who acts as agent for hire. The Neo-Hebrew word for broker is “sirsur.” It occurs with the former and more proper meaning in the Mishnah (B. B. v. 8, very briefly commented on in the Babylonian Gemara 87a), where the case is put of a package of oil or wine breaking while being measured, and “if a broker stands between the parties the loss falls on him," by reason of the doubt whether title to the goods has passed from the seller to the buyer. In the codes the word is defined in the latter sense—that of one who acts as agent for hire; and illustrations are given as well of purchasing agents as of men employed to sell. This occupation of a paid agent was rather infrequent, in Palestine and Babylonia, in the time when the Mishnah and Gemara were evolved, as the nation was still mainly engaged in farming and grazing; hence the references to the Talmud made by the codes on this subject are rather far-fetched.

The broker (says Maimonides in Hilkot Sheluḥin ii. 6) is a paid agent; hence, if he deviates from the intent of the owner, he must make good the loss caused. Thus, if *A* gives an article to *B*, the broker, and says, "Sell this for me for not less than a hundred zuz," and *B* sells it for fifty, he must make up the other fifty from his own pocket; but if he sells it for two hundred, the whole belongs to *A* (see also Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 185, 1 *et seq.*). According to R. Moses Isserles (gloss to *ib.*), a mere present sent to a buying or a selling agent turns him into a broker.

When a dispute arises about the instructions, there being no witnesses, and the broker insisting that he was permitted to sell at the price which he realized, he may clear himself by his oath. On the question when the "oath of the Torah" or when the rabbinic oath is required see Decisory Oath.

The broker can not sell to himself, thus gaining the ownership of the article entrusted to him; but when he is limited to a price at which he may sell, and he pays that price to the principal, who accepts it, the latter can not afterward object to the broker's keeping the article. If the owner offers to the broker the surplus over a named price as the reward for his trouble, the mere silence of the broker is deemed an acceptance of these terms; and he may upon a sale retain such surplus accordingly (*ib.* 125, 5).

When an article entrusted to a broker is lost or stolen from him, even on the way, being a hired keeper (see Bailments), he is bound to make it good. Should he lose a precious stone out of a ring or other jewel, he should swear that he has it not in his possession, and what it is worth, and make good its value (*ib.* 8). Where a broker is entrusted with goods for the purpose of pawning them, and he claims not to know to whom he has pawned them, this is an act of faithlessness, and he is answerable at once. If he has pawned the goods as directed and discloses the pawnee, and the latter denies having received them, the broker, in the opinion of Joseph Caro (*i.e.*, the text of the Ḥoshen Mishpaṭ, *ib.* 9), goes free; but other authorities (dating back to Alfasi) hold him liable, as it was his duty to have proof by witnesses or otherwise to the act of pawning (see "Beer ha-Golah," *ad loc.*). If the broker gives an article to a purchaser on trial, and it is not returned, or if he sells it on credit and can not collect the price, he must answer to the owner, unless he has acted as he did with the latter's assent (*ib.* 10).

It may be noticed that R. Moses Isserles, in his note on Ḥoshen Mishpaṭ, *l.c.*, mentions the "shadkan" or match-maker as a lawful species of broker, and refers to the customs of different countries, in some of which the fee is due as soon as the terms as to dowry, etc., are made (see Betrothal), while in others it becomes due only upon the marriage. The absence of older authorities indicates that the trade of the Jewish match-maker is comparatively modern.

The rights of third parties growing out of the acts of a broker or paid agent are the same as if he were acting without compensation. These are defined under Agency.

The word "safsar" or "safsira" also occurs (B. M. 42b, 51a, 63b): once in the sense of a purchasing agent, and once in that of a commission merchant.

J. SR. L. N. D.

BROKERS, JEW: A term used to indicate the Jewish merchants who had the right of trading at the Royal Exchange, London. The word "brokers" was first applied to traders, merchants, and middlemen in the time of Edward III.; but it was not until the resettlement of the Jews in England (1656) that the term was used in connection with the Jews resident in London and doing business there. Much opposition to the Jews was then manifested, especially concerning the privilege of trading as brokers; but the important position occupied by them through their manifold connections in the East and West Indies, made them too powerful to be ignored.

Jews Admitted to Royal Exchange.

At that time wholesale trade was carried on mainly through the Royal Exchange, from which Jews were excluded. This proved so troublesome to the traders that in 1657 Solomon Dormido, a nephew of Manasseh ben Israel, applied for membership in the Exchange. His application was favorably considered by the court of aldermen, who purposely refrained from asking questions and from forcing him to take the oath, because of its doctrinal character. There were in England at this time a number of influential Jews, trading as brokers under assumed names. Don Antonio Fernandez Carvajal, or Antonio Fernandez, was for some years a contractor for corn for the English government. In 1650 he and Don Rodrigues sued a Captain Peters in the Admiralty Court for a shipment of goods that had not been delivered; and in the same year, under the name "Don Antonio Fernandez Carvagall," he petitioned the Admiralty committee to consider his claim for the seizure of certain shipments to Francisco Botelio Chacone and Botelio Silveria in Portugal, which, because of the unrest in the country, had been ordered shipped to Holland instead. All the names mentioned in these suits were those of founders of the Bevis Marks congregation.

First Jew Brokers.

The first documentary mention of Jew brokers, so far as is known, is in the Rawlinsonian manuscripts of the Bodleian Library, and occurs in a rough slip similar to that used at the present day by the brokers and underwriters at Lloyd's. Particulars are given of the risk accepted on the cargo of "Augustin Coronell, the Littell Jue, in the Yonge Tobias, the 6th June, 1655, from London to Lixbo," the premium being 2½ per cent, and the policy being underwritten in "Thridnedel Stret" (Threadneedle Street). Another risk was effected upon the cargoes of the "Dominego Vass and de breto, the 9th May, 1655, from London to Barbadoes in the Jno. Cli. at 3½." Coronel and De Brito (whose names are incorrectly spelled in the premium slip) were also Jews. Probably the first judicial mention of a Jew acting as a bill-broker at the period of the Commonwealth is in the year 1656, when Lady Hall gave evidence before the commissioners of the protectorate respecting a sum of £4,000 lent to Charles Stewart on a bill of exchange. According to the Thurlow state papers, Lady Hall declared "that there is a Jew named Da Costa, a great merchant in London, who hath, and is presently to receive, the sum of £4,000 for the use of Charles Stewart," which sum was to be returned to Da Costa by Mr. Leger of Newcastle.

"Jews' Walk" in the Royal Exchange.

The admission of Solomon Dormido to membership in the Royal Exchange, as mentioned above, led to a suspension of the law excluding Jews; and soon they entered in such numbers that a special space, known as the Jews' Walk, was allotted to them. As the law had been abrogated for the Jews, a similar suspension as regards the taking of the oath had to be generally adopted; and in consequence the Exchange was soon overrun with doubtful characters. Abuses grew so rapidly that public clamor resulted in a reorganization of the Exchange and its laws in 1697. The "Post Boy" of April 27 of that year records that "the Lord Mayor and the Aldermen have been busy this week in receiving petitions from a great number of persons, who put in to be Exchange brokers: they are to be 100 in number, 80 of whom are to be Englishmen and the rest foreigners and Jews, each of whom is to carry a medal in his pocket with his name on it, the King's effigy on one side and the city arms on the other, and they are to show it on the making of any bargains."

The Brokers' Medals.

According to the archives contained in the Guildhall Library, London, the number of Jew brokers or alien brokers was limited to twelve, the election being the prerogative of the lord mayor and the court of aldermen. An entrance-fee of forty shillings was charged, with an annual payment of a similar amount. In addition, the broker had to give surety in two bonds of £500 each, as a guaranty of the faithful performance of his duties. When these conditions had been complied with, the applicant received his medal, which, in the case of a Jew broker, was transferable. The purchase of brokers' medals caused much competition, the usual purchase price ranging from £1,000 to £1,500. In the event of a Jew broker dying before a transfer could be made, the privileges accruing from the sale became perquisites of the lord mayor.

The last recorded sale of a broker's medal took place in 1826, when Joseph Barrow Montefiore paid 1,500 guineas to Sir William Maguay, the then lord mayor, for a medal which had lapsed through the death of its owner. In 1828 the corporation removed the limit on the number of Jews admitted to the Exchange, and abolished the purchase of the medal and the heavy entrance fee. Under an old charter of Edward III. English brokers were forced to be freemen, but it was not until 1832 that the freedom of the city was extended to the Jews.

BROMBERG. See Posen.

BROOCH or **BUCKLE:** A term which occurs in I. Macc. x. 89, xi. 58, xiv. 44, as the translation of the Greek πόρπη; Latin, *fibula*. This was a ring made of metal (often gold) and set with precious stones, through which passed a pin. It was used, in the manner of the modern safety-pin, to fasten the overgarment to the shoulder. By the Romans brooches were often given as presents; and in the army they were bestowed as marks of distinction or rewards for meritorious service, like modern orders and decorations. When of gold, they resembled the epaulets now worn by the higher military officers. From the passages quoted above it is evident that in the East kings or high dignitaries (priests) were exclusively the recipients; something of the ancient Taboo apparently surviving in this restricted use. In Ex. xxxv. 22, R. V., "brooch" is the rendering of the Hebrew חח, which, however, was a nose-ring (see Bridle; compare II Kings xix. 28).

BROOKLYN. See New York.

BROTHER: Son of the same father and mother (or of either), but principally son of the same father and mother (see Gen. xlii. 3, 4, 5, 13; xliv. 11, 23, 29; II Sam. xiii. 4 *et seq.*; Judges ix. 3). The brother was expected to give his consent to his sister's marriage (Gen. xxiv. 50–55, xxxiv. 11 *et seq.*). The Mosaic law declares the marriage of brother and sister, whether the latter be the daughter of the same father or of the same mother, to be incestuous (Lev. xviii. 9, xx. 17); whereas in the patriarchal time, and even later, it was not considered unlawful to marry the daughter of the same father (Gen. xx. 12; II Sam. xiii. 13). To marry the brother's wife was incest (Lev. xviii. 16, xx. 21); but if a brother died childless, then the surviving brother was enjoined to marry the widow, and the first-born son of this marriage bore the dead brother's name and was his legal heir. In case of the refusal of the brother-in-law to marry her, the widow was required to summon him before the city elders and loose his shoe from off his foot, saying: "So shall be done unto that man that will not build up his brother's house" (Deut. xxv. 5–9; see Ḥalizah and Levirate).

The nearest relative occasionally took the place of the brother (Ruth iv. 13; v. 3, 4). The brother was the first, as Goel, to redeem the property sold by an impoverished man, and to avenge the murder of a brother (Lev. xxv. 48; Ps. xlix.). It is probably due to this primitive idea of kinship that the name "brother" came to have the following significations:

(*a*) A kinsman. Thus, Lot, the nephew of Abraham, and Jacob, the nephew of Laban, are each called "brother" (Gen. xiii. 8, xiv. 14, xxxix. 15). Furthermore, inasmuch as the whole tribe formed in this sense one family, the name "brother" became also the designation for

(*b*) A tribesman (Lev. xxi. 10; Deut. xviii. 7; II Sam. xix. 13 [12]) or one belonging to the same nation (Ex. ii. 11, iv. 18; Num. xxxii. 6; Deut. x. 9, xvii. 20, xxiii. 19, xxiv. 7; Jer. xxxiv. 14).

(*c*) Kindred tribesmen, who are also called "brothers" (Num. xx. 14; Deut. ii. 4, 8; xxiii. 7; Amos i. 11).

(*d*) Friends by concluding a covenant become actual brothers (II Sam. i. 26; Amos i. 9—"berit aḥim" [covenant of brothers]; compare "aḥavah" [brotherhood], Zech. xi. 14); although, according to Prov. xviii. 24, "there is a friend that sticketh closer than a brother."

(*e*) The name "brother" has a higher meaning, and implies brotherly sentiment, in such verses as: "Open thine hand wide unto thy brother, to thy poor" (Deut. xv. 11); "Lest by exceeding the number of stripes thy brother should be vilified unto thee" (Deut. xxv. 3, Hebr.); "Fear thy God that thy brother may live with thee" (Lev. xxv. 36). Indeed, proverbial wisdom states as an experience of life among the Jewish people that "a brother is born for adversity" (Prov. xvii. 17); that is to say, mere sight of distress rouses brotherly compassion.

(*f*) Finally, the word "brother" means a fellowman as son of the same God and Father: "At the hand of every man's brother will I require life" (Gen. ix. 5). "Have we not all one father? hath not one God created us? Why do we deal treacherously every man against his brother" (Mal. ii. 10). "Thou shalt not hate thy brother in thine heart" (Lev. xix. 17). The feeling of brotherly union which gave rise to Ps. cxxxiii., "How good and how pleasant it is for brethren to dwell together in unity," prompted also the prayer recited in the Temple every morning: "May He who dwelleth in this house plant brotherliness and love, peace and friendship, amongst you" (Yer. Ber. i. 3c; compare iv. 7d, a similar prayer by R. Johanan). "Years of plenty and prosperity make of the creatures brothers to each other" (Gen. R. lxxxix.; Midrashic explanation of אחו, Gen. xli. 2). In a far higher sense Abraham by his piety and philanthropy "made brothers" of the whole world (Gen. R. xxxix.; see Brotherly Love).

(*g*) "Brother" is also used in the sense of "friend" as a form of politeness (Gen. xix. 7), and (*h*) figuratively in the sense of "companion": "He that is slothful in his work is brother to him that is a great waster" (Prov. xviii. 9); "I am a brother to dragons, a companion to owls" (Job xxx. 29).

E. C. K.

BROTHERHOODS. See Fraternities.

BROTHER-IN-LAW. See Levirate.

BROTHERLY LOVE: The love for one's fellow-man as a brother. The expression is taken from the Greek word φιλαδελφία ("love of brothers"), which trait distinguished the early Christian communities. Rom. xii. 10; I Thess. iv. 9; John xiii. 35; I John ii. 9, iii. 12, iv. 7, v. 1; and I Peter iii. 8, v. 9 express the idea of Christian fellowship and fraternity. It originated among the Essene brotherhoods, who practised brotherly love as a special virtue (Josephus, "B. J." ii. 8, § 2; Philo, "Quod Omnis Liber Probus," § 12). Brotherly love is commanded as a universal principle in Lev. xix. 18: "Thou shalt love thy neighbor as thyself," the preceding verse containing the words: "Thou shalt not hate thy brother in thine heart." This commandment of love, with the preceding sentence, "Thou shalt not avenge nor bear any grudge against the children of thy people," may originally have referred, and has by some scholars (Stade, "Gesch. des Volkes Israel," i. 510a) been exclusively referred, to the Israelitish neighbor; but in verse 34 of the same chapter it is extended to "the stranger that dwelleth with you . . . and thou shalt love him as thyself." In Job xxxi. 13-15 it is declared unjust to wrong the servant in his cause: "Did not he that made me in the womb make him? and did not one fashion us in the womb?"

A Biblical Command.

The principle of brotherly love, including all men, is plainly stated in the Book of Wisdom i. 6, vii. 23, xii. 19: "Wisdom is man-loving" (φιλάνθρωπον); "the righteous must be man-loving." The Testaments of the Patriarchs (Issachar v., vii.) teach the love of God and love of all men "as [His?] children." Commenting upon the command to love the neighbor (Lev. *l.c.*) is a discussion recorded (Sifra, Ḳedoshim, iv.; compare Gen. R. xxiv. 5) between Akiba, who declared this verse in Leviticus to contain the great principle of the Law ("Kelal gadol ba-Torah"), and Ben Azzai, who pointed to Gen. v. 1 ("This is the book of the generations of Adam; in the day that God created man, in the likeness of God made he him"), as the verse expressing the leading principle of the Law, obviously because the first verse gives to the term "neighbor" its unmistakable meaning as including all men as being sons of Adam, made in the image of God. Tanḥuma, in Gen. R. *l.c.*, explains it thus: "If thou despisest any man, thou despisest God who made man in His image."

The Golden Rule.

Hillel also took the Biblical command in this universal spirit when he responded to the heathen who requested him to tell the Law while standing before him on one foot: "What is hateful to thee, thou shalt not do unto thy neighbor. This is the whole of the Law, the rest is only commentary" (Shab. 31a). The negative form was the accepted Targum interpretation of Lev. xix. 18, known alike to the author of Tobit iv. 15 and to Philo, in the fragment preserved by Eusebius, "Preparatio Evangelica," viii. 7 (Bernays' "Gesammelte Abhandlungen," 1885, i. 274 *et seq.*); to the Didache, i. 1; Didascalia or Apostolic Constitutions, i. 1, iii. 15; Clementine Homilies, ii. 6; and other ancient patristic writings (Resch, "Agrapha," pp. 95, 135, 272). That this so-called golden rule, given also in James ii. 8, was recognized by the Jews in the time of Jesus, may be learned from Mark xii. 28-34; Luke x. 25-28; Matt. vii. 12, xix. 19, xxii. 34-40; Rom. xiii. 9; and Gal. v. 14, where the Pharisaic scribe asks Jesus in the same words that were used by Akiba, "What is the great commandment of the Law?" and the answer given by Jesus declares the first and great commandment to be the love of God, and the second the love of "thy neighbor as thyself." To include all men, Hillel used the term "beriot" (creatures [compare κτίσις]; Mark xvi. 15; Rom. viii. 19) when inculcating the teaching of love: "Love the fellow-creatures" (Abot i. 12). Hatred of fellow-creatures ("sinat ha-beriyot") is similarly declared by R. Joshua b. Hananiah to be one of the three things that drive man out of the world (Abot ii. 11; compare I John iii. 15).

Hate Thy Enemy, Un-Jewish.

That brotherly love as a universal principle of humanity has been taught by the Jewish rabbis of old, is disputed by Christian theologians, who refer to the saying attributed to Jesus in Matt. v. 43: "Ye have heard that it was said, Thou shalt love thy neighbor and hate thine enemy, but I say unto you, Love your enemies," etc. This statement, however, lacks all foundation in Jewish literature (see Grätz, "Gesch. der Juden," iii. 312, note). Güdemann thinks that Jesus' words had a special political meaning, and that they refer to a view expressed by the zealots who wanted to exclude dissenters from the command of love by such teaching as is found in Abot R. N. xvi., ed. Schechter, p. 64: "Thou shalt not say, I love the sages but hate the disciples, or I love the students of the Law but hate the 'am ha-areẓ [ignoramuses]; thou shalt love all, but hate the heretics [" minim "], the apostates, and the informers. So does the command, 'Thou shalt love thy neighbor as thyself,' refer only to those that act as one of thy people; but if they act not accordingly, thou needst not love them." Against this exclusive principle, Jesus asserted the principle of brotherly love as applied by the liberal school of Hillel to all men. Indeed, the Talmud insists, with reference to Lev. xix. 18, that even the criminal at the time of execution should be treated with tender love (Sanh. 45a). As Schechter in "J. Q. R." x. 11, shows, the expression "Ye have heard . . ." is an inexact translation of the rabbinical formula שומע אני, which is only a formal logical interrogation introducing the opposite view as the only correct one: "Ye might deduce from this verse that thou shalt love thy neighbor *and* hate thine enemy, but I say to you the only correct interpretation is, Love all men, even thine enemies."

The Good Samaritan.

The story of the good Samaritan, in the Pauline Gospel of Luke x. 25-37, related to illustrate the meaning of the word "neighbor," possesses a feature which puzzles the student of rabbinical lore. The kind Samaritan who comes to the rescue of the men that had fallen among the robbers, is contrasted with the unkind priest and Levite; whereas the third class of Jews—*i.e.*, the ordinary Israelites who, as a rule, follow the Cohen and the Levite—are omitted; and therefore suspicion is aroused regarding the original form of the story. If "Samaritan" has been substituted by the anti-Judean gospel-writer for the original "Israelite," no reflection was intended by Jesus upon Jewish teaching concerning the meaning of neighbor; and the lesson implied is that he who is in need must be the object of our love.

The term "neighbor" has at all times been thus understood by Jewish teachers. In Tanna debe Eliyahu R. xv. it is said: "Blessed be the Lord who is impartial toward all. He says: 'Thou shalt not defraud thy neighbor. Thy neighbor is like thy brother, and thy brother is like thy neighbor.'" Likewise in xxviii.: "Thou shalt love the Lord thy God"; that is, thou shalt make the name of God beloved to the creatures by a righteous conduct toward Gentiles as well as Jews (compare Sifre, Deut. 32). Aaron b. Abraham ibn Ḥayyim of the sixteenth century, in his commentary to Sifre, *l.c.*; Ḥayyim Vital, the cabalist, in his "Sha'are Ḳedushah," i. 5; and Moses Ḥagis of the eighteenth century, in his work on the 613 commandments, while commenting on Deut. xxiii. 7, teach alike that the law of love of the neighbor includes the non-Israelite as well as the Israelite. There is nowhere a dissenting opinion expressed by Jewish writers. For modern times, see among others the conservative opinion of Plessner's religious catechism, "Dat Mosheh we-Yehudit," p. 258.

Accordingly the synod at Leipsic in 1869, and the German-Israelitish Union of Congregations in 1885, stood on old historical ground when declaring (Lazarus, "Ethics of Judaism," i. 234, 302) that "'Love thy neighbor as thyself' is a command of all-embracing love, and is a fundamental principle of the Jewish religion"; and Stade, when charging with imposture the rabbis who made this declaration, is entirely in error (see his "Gesch. des Volkes Israel," *l.c.*).

K.

BROTHERS, RICHARD: English visionary and founder of Anglo-Israelism; born Dec. 25, 1757, at Placentia, Newfoundland; died at London Jan. 25, 1824. He entered the British navy in 1771, but was discharged as a half-pay lieutenant in 1783. In 1790 he refused to draw his pension on account of the oath which he was required to take; and two years later he began his prophetic career by declaring he had a divine mission to announce the fulfilment of Dan. vii. Brothers described himself as the "nephew of the Almighty," because he considered that he was descended from one of the brothers of Jesus, and claimed that on Nov. 17, 1795, he would be revealed as the prince of the Hebrews and ruler of the world. Before that date, however, he had been removed to a lunatic asylum, where he wrote his "Revealed Knowledge of the Prophecies" (1794), "A Description of the New Jerusalem" (1801), and "The New Covenant Between God and His People" (a posthumous work, 1830).

Brothers seems to have been the first person to claim that the English are descendants of the Lost Ten Tribes; and his views are still referred to with respect by the adherents of Anglo-Israelism. His "Description of the New Jerusalem" contains a series of plates of the various officials of the new kingdom which was to be restored in Palestine under his leadership. These officials are all dressed in the court costume of George III.

J.

BROUGHTON, HUGH: English Christian divine and rabbinical scholar; born 1549 at Oldbury, Shropshire; died at Tottenham, near London, Aug. 4, 1612. Broughton was entered at Magdalene College, Cambridge, where he began his Hebrew studies under the French scholar Chevalier. He graduated as B. A. in 1570, and subsequently went to London, where he distinguished himself in the pulpit as a rep-representative of Puritan sentiment. In his first work, "A Concent of Scripture," which appeared in 1588, he made an effort to determine the Biblical chronology, as well as to correct the profane writers by it.

Broughton seems to have been anxious to convert the Jews to Christianity. In the course of his travels in Germany (he probably started at the end of 1589 or at the beginning of 1590) he engaged in religious discussions with several Jews. In Frankfort, early in 1590, he disputed in the synagogue with "Rabbi Elias." This dispute resulted in a letter from a certain Rabbi Abraham Reuben, written in 1596 at Constantinople and transmitted to Broughton in Germany by his (Broughton's) disciple "Top." Broughton anticipated good results from his discussions with Jews; and often referred to his disputations with Rabbi David Farrar. He was desirous of translating the New Testament into Hebrew; but, receiving no encouragement, he translated the Apocrypha only.

Broughton was one of the chief instruments in bringing about the Authorized Version of King James; but, keenly disappointed at being overlooked by the king when the latter appointed the fifty-four learned men to undertake the revision (July 22, 1604), Broughton attacked vigorously the new translation. His own versions of the Prophets, while marked by all his peculiarities, have a majesty of expression which entitles them to be better known.

BROVARY: Small town in the government of Chernigov, Russia. In 1898 it had 1,344 Jewish inhabitants in a population of 5,166. Most of them were engaged in mercantile pursuits; while 258 followed various handicrafts. The prevailing trade is tailoring, in which 102 Jews are engaged. Besides, there are 22 Jewish day-laborers and 75 persons who earn their livelihood in the local cigarette, tar, and chair factories.

The Jewish charitable institutions consist of a hospital for the poor, a home for the aged, and a few similar establishments. The educational needs of the Jewish community are supplied by 12 "ḥedarim" (136 pupils) and a Talmud-Torah (28 pupils).

H. R. S. J.

BROWN, SAUL. See under New York.

BROWN, WILLIAM: Scottish clergyman; born 1766; died 1835; for forty-three years minister of Eskdalemuir, Scotland. He is the author of "Antiquities of the Jews Carefully Compiled from Authentic Sources, and Their Customs Illustrated from Modern Travels," in two volumes, with a map showing the ground-plan of the Temple (London, 1820; 2d edition, Edinburgh, 1826). The work is compiled mostly from Latin, French, and English sources, such as Arius Montanus' "Aaron," Calmet's dictionary, Goodwin's "Moses and Aaron," Owen's "Exercitation on the Hebrews," Buxtorf's "De Synagoga Judaica," and Basnage's history. He borrowed much from Dr. Lightfoot's "Prospect of the Temple" and "Temple Services," but states in the preface of his work that he takes "a wider range than Dr. Lightfoot, who professes to despise rabbinical learning."

For the improvements in the second edition Brown used Surenhusius' Latin translation of the Mishnah and several additional treatises by Maimonides and Abravanel, also from Latin translations; for his familiarity with Hebrew seems to have been very limited. The work is of more interest to the bibliographer than to the student.

BROWNING, ROBERT: English poet; born in Clerkenwell, London, 1812; died at Venice Dec. 12, 1889. From his somewhat Jewish appearance, knowledge of Hebrew, and sympathy with Jews, it was for a long time thought that Browning was of Jewish descent, but this has been disproved by the tracing of his genealogy by Dr. Furnivall. His interest in Jews may to some extent be due to the fact that his father obtained a position in the Bank of England through the influence of the Rothschilds, with whom the poet was personally acquainted throughout his life. Several of Browning's poems deal with Jewish subjects. "Holy Cross Day" gives the soliloquy of a Jew of the Roman ghetto who was unwilling to attend the sermons of a Dominican friar. The concluding lines state the case forcibly of the Jew against Christian persecution:

"By the torture, prolonged from age to age,
By the infamy, Israel's heritage,
By the Ghetto's plague, by the garb's disgrace,
By the badge of shame, by the felon's place,
By the branding tool, the bloody whip,
And the summons to Christian fellowship—
We boast our proof that at least the Jew
Would wrest Christ's name from the Devil's crew."

His principal Jewish poems were "Rabbi Ben Ezra" and "Jochanan Haḳḳadosh," the former giving the life-philosophy of a Jewish sage, who may perhaps be identified with Abraham ibn Ezra; it is full of true Jewish optimism. "Jochanan Hakkadosh" is an account of a great rabbi who obtains the privilege of additional months of life given up to him by his pupils, through whose experience he passes. He declares that all is vanity, after three months' experience of the life of a married lover, of a warrior, of a poet, and of a statesman. But by accident he has also obtained the gift of three months from the life of a little child, and this experience harmonizes all the discrepancies, and enables the sage to feel that life is not altogether in vain.

Other poems of Jewish interest are: "Filippo Baldunecci on the Privilege of Burial" and "Ben Karshook's Wisdom"—the latter an extension of the saying in Pirḳe Abot, "Repent the day before your death."

Besides his poems, Browning showed his sympathy with Jews by signing, in 1881, the memorial to the lord mayor to summon a meeting to protest against the persecution of the Jews of Russia; and by joining the Council of the Anglo-Jewish Exhibition in 1887.

J.

BROYDÉ, ISAAC: Russian Orientalist; born at Porozowo, government of Grodno, Russia, Feb. 23, 1867. After attending the gymnasium at Grodno he went in 1883 to Paris. There he studied at the Sorbonne, receiving his diploma from the Ecole des Langues Orientales in 1892, and from the Ecole des Hautes Etudes, Section des Sciences Historiques et Philologiques, in 1894. From 1890 to 1895 he was secretary to Joseph Derenbourg, and on the death of the latter, in 1895, was appointed by the publication committee of the Alliance Israélite Universelle one of the collaborators to continue the publication of Saadia's works, which Derenbourg had commenced. In 1895 Broydé was appointed librarian to the Alliance Israélite Universelle, which position he resigned in 1900. He then went to London, and during his short stay there catalogued the library of Elkan Adler. The same year he went to New York and joined the editorial staff of the JEWISH ENCYCLOPEDIA.

Broydé is the author of the following works: "Résumé des Réflexions sur l'Ame de Baḥya ben Joseph ibn Pakuda," Paris, 1894; "Torat ha-Nefesh": "Réflexions sur l'Ame de Baḥya ben Joseph ibn Pakuda," translated from the Arabic into Hebrew, with notes and an introduction, Paris, 1894; "La Prise de Jérusalem par les Perses, sous Heraclius," Orléans, 1896, translated from an old Arabic manuscript in Count Couret's collection of documents relating to the Crusades. He has also contributed several articles on Jewish subjects to "The Jewish Quarterly Review" and the "Revue des Etudes Juives."

S. F. T. H.

BRUCHSAL: City in the grand duchy of Baden. Jews resided here as early as the beginning of the twelfth century. In 1337 the Jews of Bruchsal joined with those of a number of other places in paying an annual tribute of 700 marks (in lieu of the taxes levied) to the bishop of Speyer. They also lent various sums to the bishop, which money was credited against the tribute due. At the time of the Black Death (1348-49) many Jews of Bruchsal were martyred. During the Middle Ages and the Reformation the Jews of Bruchsal suffered in common with their coreligionists throughout Germany. Until the French Revolution the Jewish community numbered only one or two hundred persons; and there were never so many as at the present time (1902), when about 100 families are to be found in the place.

The most famous of the rabbis was David Friedberg of Mosbach, who officiated in Bruchsal from 1857 to 1871.

BRUCK, ABRAHAM JACOB: Russian educator; author of works in Hebrew and in Russian; born in the district of Rossienny 1820; died in Yekaterinoslav 1893. He received his education at the yeshibah of Volozhin, but studied Hebrew grammar and the Russian, German, French, and English languages without the aid of a teacher. For many years he was instructor in Hebrew at the government school for Jewish boys in Kherson, and later established a private school for Jewish girls, which the government subsidized. For his zeal as an educator he was awarded a medal by the government. He contributed extensively to Jewish periodicals, Russian and Hebrew. A Hebrew translation of a French novel by L. Z——ski—which had been published in the "Archives Israélites"—was made by him under the title of "Ḥatan Damim," Lemberg, 1878. The novel portrays the life of the Jews in Russia.

H. R.

BRUCK, JACOB: Hungarian physician and author; born at Pápa Oct. 20, 1845; died at Budapest 1901; brother of Lajos BRUCK. He studied at the gymnasium and at the University of Budapest; and graduated as doctor of medicine in 1870. He began to practise at Budapest in 1874, and in 1875 became consulting physician at the Erzsébet salt-water baths of the city, which position he held till his death in 1901. He was one of the judges at the National Exposition of 1885, and notary of the sanitary department; subsequently he was appointed a member of the National Sanitary Council. He was also a member of the committee of arrangements for the Millennial Exposition of 1896. His literary works, principally on the treatment of female diseases and hydropathy, appeared in the medical journals "Gyógyászat," "Fürdöi Lapok," and "Pester Medicinische Presse," of which last-mentioned publication Bruck was for a time editor.

BIBLIOGRAPHY: *Pallas Lexicon*.

S. M. W.

BRUCK, JULIUS: German dentist and writer on dentistry; born at Breslau Oct. 6, 1840; died there, April 20, 1902. He studied dentistry and medicine at the universities of Breslau, Berlin, Bonn, and Paris; receiving his diploma as dentist from Berlin in 1858, and as doctor of medicine from Breslau University in 1866. In 1859 he became assistant to his father, Dr. Jonas Bruck, a dentist in Breslau, and succeeded him in his practise. In 1871 he was admitted to the medical faculty of the Breslau University as privat-docent, receiving the honorary title of professor in 1891.

Bruck is the author of: "Die Krankheiten des Zahnfleisches"; "Beiträge zur Pathologie und Histologie der Zahnpulpa"; "Ueber Angeborene und Erworbene Defekte des Gesichts und des Kiefers"; "Das Urethroscop und Stomatoscop Durch Galvanisches Glühlicht."

S. F. T. H.

BRUCK, LAJOS: Hungarian painter; born at Pápa, county of Veszprim, Nov., 1846. Though his father intended him for commercial life, he early showed a liking for drawing and painting, and resolved to become an artist. He frequented the Academy of Art in Vienna, and made portraits in private; this latter occupation absorbing his time to such an extent that often he had to miss the lectures and go to Budapest and Erlau in order to complete the portraits which had been ordered. In 1871, after having received a stipend from the government, he went to Italy to study the masterpieces of art. He remained two years in Venice, and then proceeded to Rome and Naples, everywhere producing a large number of sketches and studies. An outcome of this journey was the picture with which in 1873 he first came before the public, "The Rialto at Venice." On his return from Italy he completed his sketches, but succeeded in finding only a single patron, General Türr, who purchased three of his pictures. As a consequence he undertook another pilgrimage, visiting the cities of Salzburg, Munich, Augsburg, Heidelberg, Cologne, Rotterdam, Amsterdam, Antwerp, Brussels, Ostend, and London.

In 1874 he went to Paris, where he was subjected to many struggles, his German style not appealing to the French taste. Hitherto his style had inclined to idealism and sentimentalism, while Paris demanded the forceful representation of actual life. His first notable painting, "On the Edge of the Wood," was exhibited in the Salon in 1876. This was followed by "The Departure for the City"—exhibited at the Salon, 1877—which made him widely known. Since that time he has been a regular annual exhibitor of pictures treating of Hungarian folk-life, such as "The Letter from the Absent One," "Deserted," "The Emigrant," and "In the Forge." These pictures have become widely known through engravings and photographs, which have found many purchasers in America. Bruck recently removed from Paris to London, where he ranks among the most popular painters.

S. M. W.

BRUCK, MAX (Miksa): Hungarian painter; born at Budapest 1863; a brother of Lajos Bruck. He graduated from the schools of his native city, and when still a pupil at the Realschule showed a predilection for drawing. He continued his studies at the National Academy of Design, where he occupied himself with wood-carving. In 1880 he accompanied his brother to Paris, where he remained for several years. He also spent three years in Munich. On his return to Budapest he entered Benczúr's School of Arts, and is to-day professor at the Academy of Painting. His best-known pictures are "Zwei Liebespaare," "Nach Hause," "Im Walde" (which are at the imperial castle at Vienna); "Bis Wir Alt Werden" (in the imperial castle at Budapest); "Am Rande der Theiss," "Das Gänse-Mädchen."

Bibliography: *Selbstbiographie*; *Pester Lloyd*, 1899.

S. M. W.

BRUCK, MOSES: Hungarian theological writer; born about 1812 in Prerau, Moravia; died in 1849. He studied at Prague, and, as he could find no position as tutor in Moravia, went to Hungary. On the outbreak of the Revolution of 1848 he enlisted in Gross-Becskerek on the side of Hungarian independence, became a Honvéd officer, died at Hód-Mezö-Vásárhely, and was buried with full military honors in the Jewish cemetery there.

Bruck was one of the most enthusiastic supporters of the Reform movement, and was among the pioneers of modern Jewish theological literature. He wrote "Die Reform des Judenthums"; but especially his "Rabbinische Ceremonialgebräuche" and "Pharisäische Volkssitten und Ritualien" are of great value to the student of Jewish customs and practises, and were favorably criticized by Geiger ("Wissenschaftliche Zeitschrift," iii. 426) and Fürst ("Allg. Zeit. des Judenthums," i. 324), and were widely read.

S. L. V.

BRÜCK, SOLOMON B. ḤAYYIM: Austrian Hebraist; born in the latter part of the eighteenth century; died about 1846. He is the author of "Ḥaḳirat ha-Emet" (Altona, 1839; 2d ed., Vienna, 1842), a volume of collectanea, including in the first edition a sermon which he delivered in England in the English language, and which was excluded by the Austrian censor from the second edition. His other work, "Ḥezyone Layil," was published posthumously by his son, Isaac Levi Brück (born 1817), a veteran of the Italian wars under Radetzky. In a German preface which he appended to his father's work, Isaac Levi tells his own interesting biography and his experiences with Samuel David Luzzatto while he was stationed at Padua. The work consists of a series of imaginary dream-visits to the other world, in which the manners and conduct of certain classes are severely criticized.

S. P. Wi.

BRUCKMAN, HENRIETTA (née **Kahn**): Founder of the first Jewish women's lodge in America; born in Bohemia April, 1810; died in New York city April, 1888. She married Dr. Philip Bruckman, and, about the year 1842, came with him to the United States, settling in New York city. Dr. Bruckman and his wife did much to assist their fellow-countrymen who emigrated to New York, the former winning the sobriquet of "Der Böhmische Vater."

Mrs. Bruckman conceived the idea of organizing a women's lodge and broached the subject to several ladies of the Congregation Emanu-El. An informal meeting was held at her house in 1846, resulting in the foundation, on April 21 of that year, of the "Unabhängiger Orden Treuer Schwestern" (Independent Order of True Sisters), a secret benevolent society.

Bibliography: *Buch des Goldenen Jubiläums* (*U. O. T. S.*), New York, 1896.

A. C. Br.

BRUHL, LUCIEN LEVY. See Levy-Bruhl.

BRUHL, L. S. See Levy-Bruhl.

BRÜLL, ADOLF: German writer and theologian; born in Kojetein, Moravia, April 27, 1846; son of Rabbi Jakob Brüll. He was educated at Kremsier and at the universities of Vienna, Prague, and Breslau, and received his theological training at the Jewish Theological Seminary at the last-named city. In 1871 he received a call as teacher at the Philanthropin in Frankfort-on-the-Main. Here he founded (1879) the Mendelssohn Society and edits the "Populär-Wissenschaftliche Monatsblätter."

He is the author of "Fremdsprachliche Redensarten und Ausdrücklich als Fremdsprachlich Bezeichnete Wörter in den Talmuden und Midraschim," Leipsic, 1869; "Trachten der Juden im Nachbiblischen Alterthume," part i., Frankfort-on-the-Main, 1873; "Das Samaritanische Targum zum Pentateuch, zum Ersten Male in Hebräischer Quadratschrift Nebst einem Anhange Textkritischen Inhaltes Herausgegeben," *ib.* 1875; "Zur Geschichte und Literatur der Samaritaner," *ib.* 1876; "Beiträge zur Kenntniss der Jüdisch-Deutschen Literatur," in Brüll's "Jahrbücher," 1877, iii. S.

BRÜLL, IGNAZ: Austrian composer; born at Prossnitz, Moravia, Nov. 7, 1846. In 1848 his parents removed to Vienna, where he became a pupil of Epstein (pianoforte), Rufinatscha (composition), and Dessoff (instrumentation). In 1861 Epstein played with great success a pianoforte-concerto composed by his youthful pupil. After giving pianoforte-recitals at Vienna, at which he played principally his own compositions, Brüll made extensive tours through Germany and England. An orchestral serenade of his, performed at Stuttgart in 1864, served to spread his fame, and in 1872 he was appointed professor at the Horak Institute, Vienna.

Ignaz Brüll

Brüll's first opera, "Der Bettler von Samarkand" (1864), was never played; but the second, "Das Goldene Kreuz" (Berlin, 1875), rapidly became very popular in Germany and abroad. At its first performance at the Imperial Opera House in Berlin, the emperor, William I., personally complimented the composer on his success. The opera was also given in English by the Carl Rosa Company, and was very favorably received in London. It was followed by "Der Landfriede" (Vienna, 1877); "Bianca" (Dresden, 1879); "Königin Mariette" (Munich, 1883); "Das Steinerne Herz" (Prague, 1888); "Gringoire" (one act, Munich, 1892); "Schach dem König" (Munich, 1893); and a two-act comic opera, "Der Hussar" (Vienna, March 2, 1898), a work which has met with great success. The other compositions of Brüll include: "Im Walde"; "Jagd-Ouverture für Orchester"; 3 orchestral serenades; overture to "Macbeth"; a dance-suite for orchestra; 2 pianoforte-concertos; a violin-concerto; a suite and 3 sonatas for piano and violin; a trio; a sonata for violoncello and pianoforte; a sonata for two pianos; songs, part-songs, and pianoforte pieces.

Brüll is one of the ablest and most diligent composers of the present day; he has exercised a most wholesome and fruitful influence upon every department of composition in which he has been active. In his chamber-music he reveals the influence of Schumann and Mendelssohn, but finds in the field of opera a wider scope for his inventive powers. "Das Goldene Kreuz" to-day occupies a position unapproached by any other modern production in the field of popular German opera, not excepting Nessler's "Trompeter von Säkkingen." Brüll is an excellent pianist, and has especially distinguished himself as an interpreter of the compositions of Brahms, with whom he was on terms of intimate friendship.

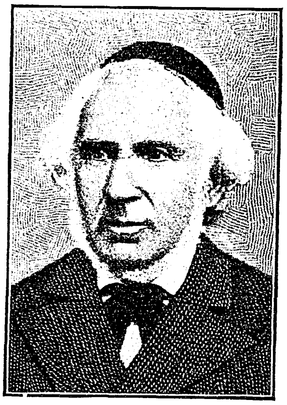
s. J. So.

BRÜLL, JAKOB: Austrian Talmudist and author; born at Neu-Raussnitz, Moravia, Nov. 16, 1812; died at Kojetein Nov. 29, 1869. He attended the yeshibot of Bonyhad, Presburg, and Budapest. After serving as assistant rabbi in his native city, he was elected rabbi at Kojetein (1843), where he remained till his death. Among his pupils were his two sons, Nehemiah and Adolf Brüll, as well as David Kaufmann.

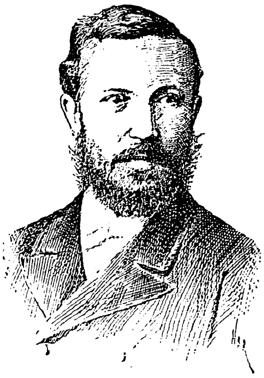
Brüll wrote "Forschungen über Targumim und Midraschim" (1852); "Die Mnemonik des Talmud" (1864); "Mebo ha-Mishnah" (2 vols., 1876, 1885); and a week before his death he published "Ben Zekunim" (A Child of Old Age). He contributed to Löw's "Ben Chananja" and Weiss's "Bet-Talmud." His writings are characterized by extensive learning and critical insight. S.



Jakob Brüll.

BRÜLL, NEHEMIAH: Rabbi and scholar of varied attainments; born March 16, 1843, at Neu-Raussnitz, Moravia; died Feb. 5, 1891, at Frankfort-on-the-Main. Brüll received his rabbinic-Talmudic education from his father, Jakob, who combined wide Talmudic knowledge with acute historical perception. He then studied classical and Oriental languages and history at the University of Vienna, having at the same time a good opportunity to continue his Talmudic studies at the Vienna bet ha-Midrash, then under the direction of men like I. H. Weiss, M. Friedmann, and Adolf Jellinek. Here, too, Brüll, the son of a conservative rabbi, and the grandson of the arch-Orthodox chief rabbi of Moravia, Nahum Trebitsch, developed into a decided Reformer and a disciple of Geiger.

Brüll was called as rabbi to Bisenz, one of the Reform communities of Moravia, an office that he resigned in 1870 in order to take charge of the rabbinate of Frankfort-on-the-Main. He owed this appointment to Abraham Geiger, who drew the attention of his native community to the young Moravian rabbi. Brüll remained with this ancient community until his death, although his position was fraught with disappointment. As a result of the movement inaugurated by S. R. Hirsch at Frankfort, even the circles that were not Orthodox tended gradually toward the conservative party. Brüll cared as little for compromise as did his opponent Hirsch. An enthusiastic representative of the Reform movement, for religious as well as scientific reasons, he was decidedly opposed to any attempts at reconciliation between Reform and Orthodoxy. Yet he was not the man to influence the masses: his sermons, less effective from the pulpit, had to be read in order to be appreciated. Not until he saw that all his efforts were in vain, and he had been personally attacked (compare FRANKFORT-ON-THE-MAIN), did he retire to devote himself to his studies, greatly to the honor and advantage of Jewish learning.



Nehemiah Brüll.

Brüll's Scientific Importance.

Brüll's researches ranged over almost all the branches of Jewish science, including Bible exegesis and grammar, Jewish history and literature, the Apocrypha, Biblical Halakah, casuistics, responsa, general history, philology, poetry, Jewish-German literature; and he contributed to all these by original investigation. No less a man than Adolf Jellinek says of Brüll: "His range of reading in Jewish literature was hardly paralleled, and he evinced a peculiar acumen found in no other scholar of modern times" (in Adolf Brüll's "Monatsblätter," xi. 50). Brüll collected the results of his scholarship in the ten volumes of his "Jahrbücher" (Frankfort-on-the-Main, 1874–90). He contributed almost the entire material to these "Jahrbücher"—the longer and shorter essays as well as the numerous criticisms on new books. Many of these essays have also been printed separately. Following is a list of the more important of them, arranged according to subjects—Bible: "Beiträge zur Erklärung des Buches Hosea" ("Jahrb." v.–vi. 1–62); "Historische Basis des Buches Ruth" (v.–vi. 63–70); "Das Apokryphische Susannabuch" (iii. 1–69); "Die Epistolischen Apokryphen und die Apokryphischen Zusätze zum Buche Daniel." Talmud: "Die Talmudischen Tractate über Trauer um Verstorbene" (i. 1–57); "Fremdsprachliche Wörter in den Talmuden und Midraschim" (i. 123–210); "Die Entstehungsgeschichte des Babylonischen Talmuds als Schriftwerkes" (ii. 1–123); "Verschollene Baraitas und Midraschim" (ii. 124–133); "Entstehung und Ursprünglicher Inhalt des Tractates Abot" (vii. 1–17); "Eingeschaltete Partien im Babylonischen Talmud" (viii. 59–60). History: "Adiabene" (i. 58–86); "Das Geschlecht der Treves" (i. 87–122); "Die Polemik für und gegen Maimuni im Dreizehnten Jahrhundert" (iv. 1–33); "Zur Gesch. der Jüdisch-Ethischen Literatur des Mittelalters" (v.–vi. 71–93); "Sprüchwörter in der Nachtalmudischen Literatur des Judenthums" (vii. 18–30).

Brüll's extraordinary range of reading and critical insight constituted him an almost unexcelled reviewer of new books in the field of Jewish science. His "Jahrbücher" contain 183 reviews, all of which illuminate more or less the subjects with which they deal. In 1890 Brüll undertook a continuation of the "Hebräische Bibliographie," edited by Steinschneider, under the title "Central-Anzeiger für Jüdische Literatur"; but only one volume appeared (Frankfort-on-the-Main, 1891), as the undertaking was cut short by Brüll's death. At the instance of Steinschneider, the Zunz-Stiftung had commissioned Brüll to add a supplement to Zunz's "Gottesdienstliche Vorträge," the basic work of modern Jewish science. Steinschneider remarked in his preface to the second edition of the work in question (xvi.): "Dr. Brüll appeared to me to possess the rare combination of ability and leisure, zeal and perseverance, requisite for editing such a supplement." Brüll had intended to devote his whole scholarship to this undertaking. The scattered notes that were found in his papers after his death were in part incorporated in the second edition of the "Gottesdienstliche Vorträge" (*ib.* 1892). Brüll was among the few German scholars who also wrote in Hebrew, as may be seen by his many contributions to the Hebrew periodicals "Bet-Talmud," "Bet ha-Midrash," "Ha-Karmel," and "Oẓar ha-Sifrut." Of these, "Toledot Shabbethai Ẓebi" (Wilna, 1879) and "Ner la-Maor," a biography of Aaron Worms, in "Oẓar ha-Sifrut," ii. 20–31, deserve special mention. Brüll also printed his sermons (1869) and addresses (1878). "Grabreden" (Frankfort-on-the-Main, 1895) and "Trauungsreden" (*ib.* 1891) were published posthumously.

BRUNA, ISRAEL. See ISRAEL BEN ḤAYYIM OF BRÜNN.

BRUNETTI, ANGELO (better known as **Ciciruacchio**): Popular Roman leader, and advocate of the emancipation of the Jews; born in Rome 1800; died there Aug. 10, 1849. Inspired by the patriot Mazzini, Brunetti labored not only for the deliverance of his native city, but also for the unhappy inhabitants of the Roman ghetto. He utilized the great influence he had gained during the prerevolutionary epoch, in effecting a reconciliation between the Jews and their Christian fellow-citizens. On July 8, 1847, he won over the inhabitants of Regola, a suburb of Rome, and a week later an immense mass-meeting in favor of the Jews was held in the capital itself. On the evening of that meeting (July 15) 6,000 Roman citizens went to the ghetto and fraternized enthusiastically with its inhabitants. When on April 17, 1848 (the first day of Pesaḥ), the order of Pius IX. to tear down the walls of the ghetto was made public, Ciciruacchio hastened thither with a large number of his friends, and they were the first to begin the work of demolition. In the following year Ciciruacchio, together with two of his sons, was killed in a riot in the streets of Rome. The Jewish congregation of Rome erected in its council-room a tablet to his memory, with an inscription recording his great services in the emancipation of the Jews of Rome.

S. I. E.

BRÜNN: Capital of Moravia. At the instigation of Capistrano, the Jews were expelled from Brünn July 27, 1451, by King Ladislaus, the posthumous son of the fanatical Albrecht II. Among the exiles was Israel Bruna, author of a well-known set of responsa, and recognized as the greatest Talmudic authority of his time. Not until the beginning of the nineteenth century did the Jews attempt to found a new community. In obedience to a royal decree of Sept. 5, 1811, they paid 50 florins a year, and 12 florins into the poor fund, for permission to have a small Torah (law-scroll) in their possession. David Ashkenazi, whose son, Joel Deutsch, was director of the institute for deaf-mutes, officiated as rabbi, although he was only allowed to assume the title of meat-inspector. In 1852 the Jews were permitted to lay out a cemetery, and in 1853 to build a synagogue. The statutes of a religious society formed in 1853 were provisionally confirmed Sept. 1 of that year; but not until Feb. 7, 1859, did the ministry give permission to organize a provisional religious community. On March 15, 1860, all the Jews living at Brünn were released from paying the communal dues of their several communities, and on Nov. 7 of the same year the protest of the district community against this decree, that injured it in its finances, was refused. Dr. B. Placzek, who was chosen rabbi in the same year, was appointed district rabbi by the ministry May 5, 1885.

The Jewish-Moravian orphan asylum and the proseminary are at Brünn; the city is the center for the Moravian general fund ("Landesmassenfonds") derived from the excise. This fund, which had been used for Jewish educational purposes since the time of Joseph II., was handed over to the management of the Jews of Moravia by Emperor Francis Joseph I. Sept. 28, 1869.

D. A. F.-G.

BRUNNER, ARNOLD WILLIAM: American architect; the son of William Brunner and Isabelle Solomon; was born in New York city Sept. 25, 1857. He was educated in Manchester, England, and in New York, and is a graduate of the special architectural course in the Massachusetts Institute of Technology. Brunner was one of the founders of the Architectural League of New York (1881), is a member and vice-president (1898) of the New York Chapter of the American Institute of Architects, a fellow of the Institute, and (1902) a member of the Board of Education of New York city. He has designed and erected many buildings, notably the new United States post-office, custom-house, and court-house at Cleveland, Ohio, won in competition. He was also the architect of the Temple Beth-El, the synagogues of the congregations Shearith Israel and Shaaray Tefila, the Educational Alliance Building, the Mt. Sinai Hospital, the Clara de Hirsch Home for Working Girls, the Jewish Theological Seminary of America, all in New York, and of the Temple Mishkan Israel at New Haven, Conn., and the Frank Memorial Synagogue at Philadelphia.

Brunner has written a work on "Cottages," another on "Interior Decoration," and is a contributor to the "Encyclopedia of Architecture," edited by Russell Sturgis.

A.

BRUNNER, SEBASTIAN: Austrian Catholic theologian, editor, and anti-Jewish writer; born Dec. 10, 1814, in Vienna; died in Währing, near Vienna, Nov. 26, 1893. He was ordained as priest in 1838, and after officiating in various parts of the diocese of Vienna, was employed by Metternich (1843-48) in arranging all reports on religious and political movements that came into the minister's office. In 1846 he was sent by the chancellor to France and Germany to report the situation in those countries.

Brunner founded in 1848 the "Wiener Katholische Kirchenzeitung," which he edited until 1865, making himself notorious by his rabid attacks in its columns on Jews and Judaism. Citing the actions of David and Elijah, he insisted that the Old Testament was permeated by a spirit of vindictiveness, and for this reason he maintained that the Jewish morals endangered those of the Christian neighbors of Jews ("Kirchenzeitung," 1860, p. 12). For a long time the Jews ignored his denunciations; but finally, in 1860, Ignaz Kuranda, editor and publisher of the "Ostdeutsche Post," took up the cause of his coreligionists, calling attention to the fact (Jan. 28, 1860) that Brunner's attacks were for the most part mere repetitions of the charges made by Eisenmenger and Pfefferkorn, and that, moreover, they were undertaken by Brunner not in a spirit of zeal for the Church, but in the hope of increasing the circulation of his paper.

Brunner sued Kuranda for libel April 27, 1860; but on trial the latter was acquitted as having sustained every item of his charges against Brunner, who in addition was severely rebuked by the presiding judge for conduct unbecoming a priest. The importance which the Jews attached to the result of the trial may be seen from the fact that a stenographic account of its proceedings was printed in pamphlet form in both Hebrew and German for the purpose of commemorating Kuranda's victory over Brunner.

Brunner held several high offices in the Catholic Church.

BRUNSWICH, LÉON LÉVY (known as **Lhérie**): French dramatist; born at Paris April 20, 1805; died at Havre April 29, 1859. Favorite collaborator of Ad. de Leuven, he wrote together with him, as well as with Dumersan, Dupeuty de Beauplan, etc., many vaudevilles and comic operas, among which were: "Gothon du Passage Delorme," 1831, a parody on Victor Hugo's "Marion Delorme"; "Faublas," 1833; "Le Postillon de Longjumeau," 1837; "Le Brasseur de Preston," 1838, the last two set to music by Adolphe Adam; "Le Mariage du Tambour," 1843; "Gibby la Cornemuse," 1847, to the music of Clapisson; "La Foire aux Idées," 1849; "Le Roi des Halles," 1853; "Dans les Vignes," 1856.

S. J. W.

BRUNSWICK (German, **Braunschweig**): Duchy of Germany, the capital of which has the same name. The first settlement of Jews in the duchy was at Blankenburg; for a record states that in 1241 the abbess of Quedlinburg owed Jacob, a Jew, probably the first one in Brunswick, 213 pounds of silver; some of the lands of the nunnery were sold to extinguish this debt. At another time a payment of eighty pounds of silver between the same parties is mentioned. In 1247, Jews were settled at Helmstedt. The abbot of Verden was their lord. At the time of the Black Death in 1349, the Jews of Brunswick were persecuted; and in 1540, by reason of Martin Luther's polemics, anti-Jewish outbreaks occurred. In the eighteenth century Israel Jacobson, a noted Jewish financier, lived in Brunswick. Mendelssohn often visited the ducal family, with which he was on intimate terms.

The Jews at the beginning of the nineteenth century were barely tolerated in Brunswick. However, their condition was gradually ameliorated; for, by the laws of Oct. 29, 1821, Jews were permitted to become apprentices in all trades. On dissolving the Chambers July 11, 1823, the duke of Brunswick announced that steps to relieve Jews of their disabilities were contemplated. Again, in 1831, the Jews petitioned Duke William of Brunswick to change the laws affecting them. As the Jews had always fulfilled their duties as citizens, they demanded to be admitted to full privileges as such. This petition was unsuccessful.

On Oct. 12, 1832, measures for the relief of the Jews were passed. It was enacted that those who had the legal right to reside in Brunswick were to be regarded as inhabitants and native residents. It was ordained that right of residence did not depend on religious convictions, but rather on the possession of some means, or of freedom from criminal acts. The Jews were allowed to vote for and act as deputies and as minor officials. As late as 1820 these rights were exclusively enjoyed by the Christians. It is to be noted that in 1833 the director of the Samson Free School in Wolfenbüttel was a candidate for the office of deputy and was defeated by one vote. The Jews had, however, no extensive property rights; for they could buy land only with the permission of the government. They were permitted to act as attorneys, but not as procurators or notaries.

In 1843 and 1844, through the "Allg. Zeit. des Judenthums," Ludwig Philippson summoned a rabbinical conference for the discussion of questions affecting Judaism, to meet at Brunswick early in 1844. The sessions lasted from June 12 to June 19, and were attended by twenty-two, and later by twenty-five rabbis, who worked to improve the Jewish ritual and to preserve the religious instinct in the Jews themselves. One of the results of the conference, which drew attention to the position of the Jews, was the repeal of the Jews' oath, "More Judaico," May 16, 1845. In 1850 permission was granted to Jews to become officers in the army and to marry Christians without first being baptized.

At the beginning of the nineteenth century S. L. Eger was rabbi in Brunswick. In 1840 Dr. Herzfeld was the rabbi, the government having full power to appoint.

In the duchy two famous institutions now flourish; (1) the Samson Free School at Wolfenbüttel, mentioned above, founded in 1733 by Gumpel Moses (also known as Marcus Gumpel Moses Fulda), the first Jewish resident of Wolfenbüttel; and (2) the Jacobson Free School and Asylum at Seesen, of which Immanuel Wohlwill was superintendent in 1838.

In 1840 the Jews of Brunswick numbered 1,300. The latest figures give 2,000 Jewish residents in the duchy.

D. A. M. F.

BRUSA: City of Anatolia, 54 miles from Constantinople and 21 miles from the port of Moudania. According to some chroniclers, the Jews of Brusa were the first to enter into relations with the Ottoman Turks and to come under their dominion. According to others, Sultan Urkhan, on capturing Brusa (1326), drove out all the inhabitants, and, in order to repeople it, imported Jews from Damascus, Aleppo, and other places in the Byzantine empire. Hence Brusa was the first Jewish community of Turkey. Sultan Urkhan, in consideration of a poll-tax called "kharaj," granted to the Jews a firman authorizing them to live in a special quarter (Yahudi-Mahalesi), to build a synagogue there (that of 'Eẓ Ḥayyim), and to have a chief rabbi. The Jewish magistrates ("memunnim"), popularly called "kharajros," receivers of the kharaj or tax, collected this tax and delivered it to the governor, under oath upon the roll of the Law.

Historical Data.

According to the historian Ubicini, persecutions obliged Spanish Jews to leave their country in 1415. "When they arrived at Brusa, the beauty of this Oriental city, the freshness of its waters, the multitude of its palaces and gardens that reminded them of Granada and Andalusia, induced them to settle here." Upon the great expulsion of 1492 other Spanish Jews settled in Brusa, and founded two new synagogues named, respectively, "Ḳahal Ḳadosh Mayor" and "Ḳahal Ḳadosh Gerushah."

Toward the end of the sixteenth century and at the beginning of the seventeenth there existed in

Brusa an important yeshibah, from which proceeded the well-known family of rabbis Algazi or Al-Gâzi. At this time Solomon Algazi I., "the Elder," author of thirteen rabbinical works; his brother Moses Algazi, also an author; and Joseph Gansou (1628), teacher of the Algazis, flourished here. As one of the remarkable events of the period 1600-1800 a conflagration is reported toward the end of the eighteenth century that destroyed half the city as well as the Jewish quarter. The rabbis of Brusa during the nineteenth century have been, in chronological order: Abraham Shilṭon; his son Elijah Shilṭon; David Carasso from Salonica; Abraham Ḥabib from Bosnia; Rab Shabbethai Halévy, brother of the grand rabbi Moses Halévy of Constantinople; a rabbi from Ismid; and R. Uzziel from Constantinople.

Legend.

The older Jews of Brusa tell the following legend: At the end of the eighteenth century a learned rabbi came incognito to that city from Salonica. He fell ill and died almost immediately upon his arrival, and was buried like any ordinary man. But a strange light was seen to hover over his grave for several nights in succession, which greatly excited the community. Upon inquiry it was learned that the stranger was a very pious and learned rabbi, Rab Segalia by name; and the people then decided to render him the last honors due to his position, by erecting a fine tombstone over his grave. The stone, accordingly, was placed on the mound. The next morning, however, it was found thrown down some distance away. It was restored, but again mysteriously removed overnight, and now the people no longer dared to replace it. At this tomb of Rab Segalia the people were wont to pray for rain in times of drought. Every trace of the tomb has now disappeared, owing to the construction of a road to the railway station.

Population and Institutions.

In 1901 the Jewish population of Brusa numbered 3,500 in a total of 100,000 inhabitants. The community possesses three very handsome synagogues, belonging to the congregations 'Eẓ Ḥayyim, Mayor, and Gerushah. Of Jewish antiquities, there is in the synagogue 'Eẓ Ḥayyim a scroll of the Law more than 160 years old; and in that of the Gerushah congregation a unique old "rimmon" (a silver pomegranate forming part of the ornaments of the Torah scroll; the mate of this rimmon was stolen), dating back to the first half of the eighteenth century; and the Shilṭon family possesses some old manuscripts written by rabbis of that name. The notable families of Brusa are: Baraza, Caraco, Shilṭon, Franco, Saban, and Sévilla.

The Brusa community has the following philanthropic societies: Haknasat Oraḥim, 'Ozer Dallim, Biḳḳur Ḥolim, 'Ose Ḥesed. The Jews of Brusa are very benevolent, and visit the poor in their own homes. There is not a single beggar in the city.

In 1901 there were four hundred Jewish pupils—namely, one hundred and twenty-eight boys and seventy-two girls—in the two schools supported by the Alliance Israélite Universelle, and two hundred in the Talmud Torah.

Communal Administration.

The chief rabbi of Brusa in 1901 was David Pappo of Constantinople. This official presides at the communal council elected by the notables of the city. The revenues of this council consist of taxes upon meat and wine and the rent of some real estate (a bath, an oven, and some shops). As formerly, the Jews still pay to the government a tax for exemption from military duty, called "bédèle." When the notables are short of funds and unable to pay this tax, the communal council draws upon the treasury of the three synagogues. These are governed by syndics ("gabba'im").

As a matter of fact the majority of the Jews are generally poor. Among them are two or three merchants, about fifteen money-changers, and a large number of small shopkeepers, pedlers, and dealers in tinware. Although the silk industry is a specialty there, no Jews are engaged in it, beyond some two hundred Jewish women working as operatives in the mills. The Alliance Israélite maintains at Brusa a system for apprenticing boys as carpenters, blacksmiths, tinsmiths, compositors, and for teaching girls to weave. Some young Jews occupy subordinate positions in European business houses and banks established at Brusa. No Jews are employed by the government, nor are any engaged in the professions.

In the neighborhood of Brusa there are some places containing a small number of Jews originally from Brusa, as Climasti-Cassaba, Yeni-Yol, Yeni-Shehir, Eski-Shehir, and Yeumlek.

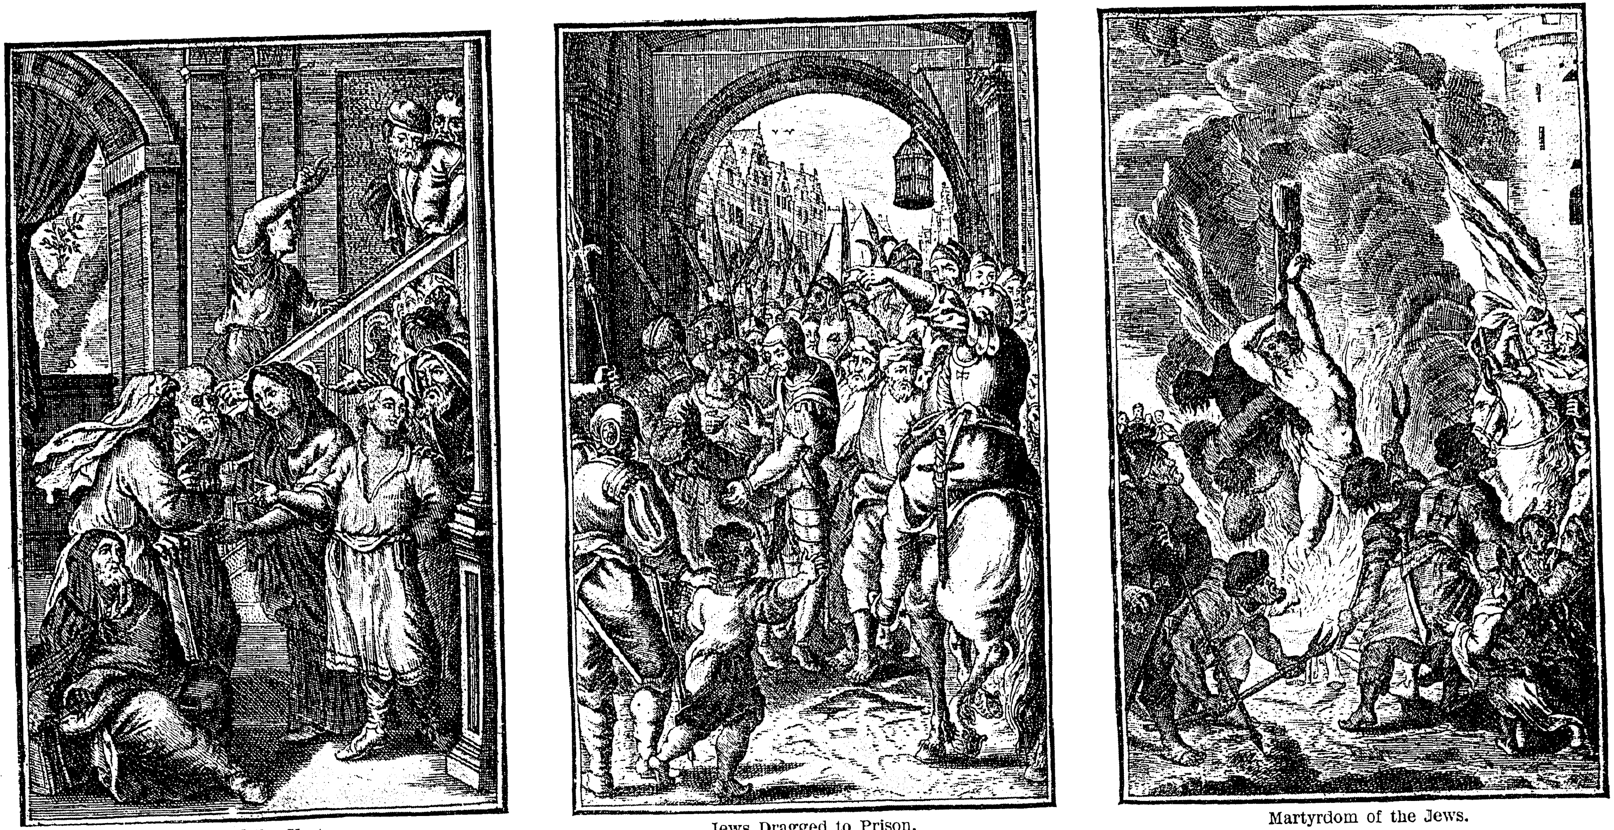
Bibliography: Azulai, *Shem ha-Gedolim*; *Bulletin de l'Alliance Israélite Universelle*, 1899; Ubicini (reported in *El Dia*, a Jewish journal of Philippopolis).

D. M. Fr.

BRUSILOV: Town in the government of Kiev, Russia, with a Jewish population (1898) of 2,800, in a total of 6,500. Of the 541 Jewish artisans, 112 are tailors and 206 tanners. About eighty families receive alms at Passover. There is a Talmud Torah, attended by more than one hundred children. Brusilov has also twenty-two private schools, a hospital, a poorhouse, and a "Gemilut Ḥesed" (society for lending money without interest).

H. R. S. J.

BRUSSELS (French, **Bruxelles**): Capital of Belgium. There are no records as to the date when Jews first settled in Brussels; but as many of them were scattered over the province of Brabant at the time of the Romans, it may be assumed that they established themselves at Brussels as soon as it was founded by St. Gery, bishop of Cambray, in the seventh century. The Jews of Brussels underwent all the vicissitudes of their Belgian coreligionists. The Crusaders left many sanguinary traces of their passage at Brussels. During the thirteenth century and at the beginning of the fourteenth the Jews of Brussels, protected by the subsequent rulers, attained, in common with those of other communities of Brabant, a high degree of prosperity. The calamities which culminated in the massacre and banishment of the Jews of Brussels in 1370 began with the spreading of the Black Death throughout Europe. A chronicler of that time, Li Muisis, gives an account of this tragedy, for which see Belgium.



Sale of the Host.

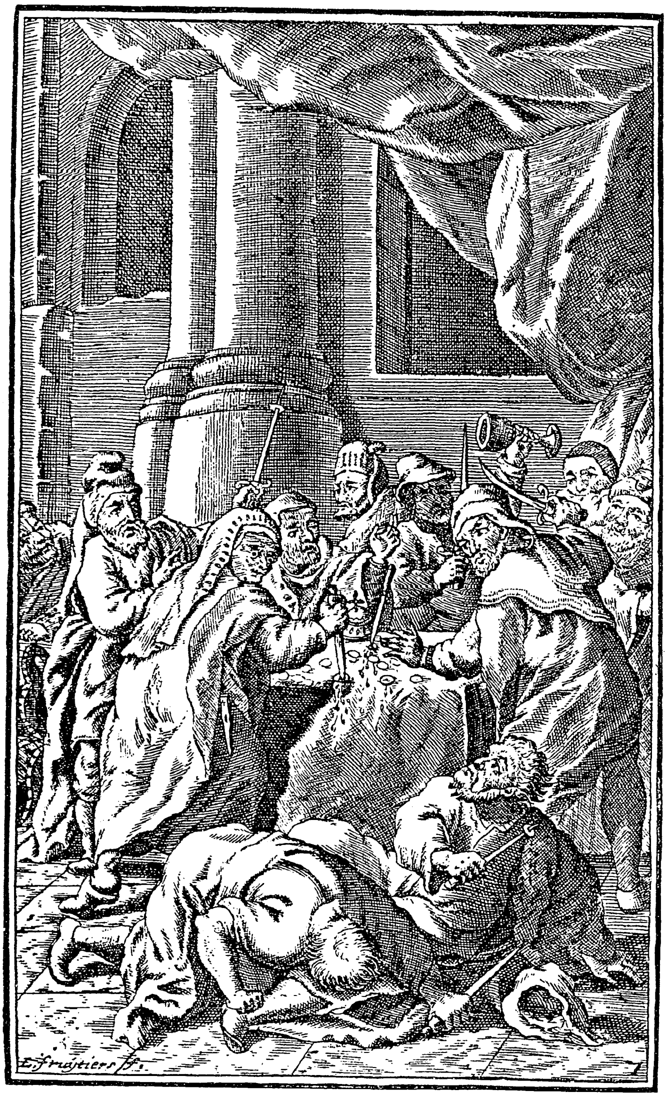
Jews Dragged to Prison.

Martyrdom of the Jews.

HOST-TRAGEDY AT BRUSSELS, 1370.

(From "Histoire des Hosties Miraculeuses," 1770, after the Gobelin Tapestries in the Cathedral of St. Gudule, Brussels.)

This catastrophe, which took place in 1349, was followed twenty-two years later by a similar one. A banker of Enghien, distinguished by his wealth as well as by his philanthropy, was assassinated in his own garden. His wife and son took refuge in Brussels. The assassins spread the report that the Jews had stolen from a church consecrated wafers in order to pierce them with poniards. This brought about the burning of hundreds of Jews at Brussels (May 22, 1370) and a general banishment from Belgium. The event is known locally as the miracle of St. Gudule, and was commemorated by an annual festival. Eighteen tableaux, which represented the piercing of the host and the miracle of the spurting of the blood, were painted; and these paintings are still preserved in the Church of St. Gudule. On the Jewish side, the martyrs of Brussels were commemorated in the "Memorbuch" of Mayence and in a Hebrew elegy.



E. Fruytiers f.

Jews Represented as Transfixing Hosts.
(After the Gobelin Tapestries in the Cathedral of St. Gudule, Brussels.)

After the Peace of Utrecht.

From 1370 till the end of the Spanish domination over Belgium, there is no trace of Jews at Brussels. Their reappearance there dated probably from the Peace of Utrecht (April 11, 1713), when Belgium became part of Austria. A decree banishing Jews from Brussels was issued July 18, 1716; but it was not enforced: a gift to the crown overcame all difficulties. A similar decree issued forty years later had the same result. Several Jews received the right of citizenship in Brussels. Among them was one named Philip Nathan, who, in 1783, requested the government to assign a place for a new cemetery for the Jews; the old one, situated near the Porte de Namur, having disappeared in consequence of the dismantling of the fortress.

Many families of position from Germany and Holland, such as the Landaus, the Lipmanns, the Fürths, the Hirschs, and the Simons, settled in Brussels. The Jews were still subjected to special imposts. It was only after 1794, when the French became masters of Belgium, that Jews could settle freely in Brussels and enjoy the rights of citizenship. An imperial edict dated March 17, 1808, divided the Jews living in French countries into consistories. Brussels was included in the consistory of Crefeld. On the overthrow of Napoleon, Belgium was united with Holland; and the Jewish community of Brussels became the head of the fourteenth religious district of Holland. After the revolution of 1830 Brussels became the head of the Belgian consistories, and a chief rabbi was nominated. The chief rabbis have been: E. Carmoly, Henri Loeb, Aristide Astruc, Abraham Dreyfus, and the present (1902) rabbi, Armand Bloch. The government contributes largely to the support of Jewish worship. In 1890, according to the official statistics, Brussels had 150 registered Jewish households.

Brussels has the following Jewish communal institutions: Société de Bienfaisance Israélite, Société des Secours Efficaces (Dames), Société des Mères Israélites et Ecole Gardienne, Orphelinat, Comité d'Apprentissage de la Jeunesse Israélite, Maison de Retraite pour les Vieillards, Hakeneset Kallah, Cercle des Amis Israélites, l'Egalité (mutual aid), and Ménahem Abélim.

G. I. Br.

BRUTISH (בער): A term applied by the Biblical writers to men whose disposition or spirit was like that of beasts. It is used in close conjunction with "foolish" (Jer. x. 8; Ps. xlix. 10, xciv. 8), and, as indicated in the Hebrew, may mean "stupid." In a few instances it seems to indicate that the persons under consideration are both ignorant and reckless (Jer. x. 14, li. 17; Ps. lxiii. 22, xcii. 6). Again, brutishness, or beastlikeness, implies not a passive but an actively dangerous quality of character (Ezek. xxi. 31). The man who is persistently ignorant is also called "brutish" (Prov. xii. 1). The prophets who did not call upon the Lord, to inquire of Him, were included in the same category (compare Jer. x. 21). To sum up, "brutishness" in the Old Testament is descriptive of a foolish, stupid, recklessly and persistently ignorant, and dangerous man.

J. Jr. I. M. P.

BRUTZKUS, JUDAH LOEB BEN DAVID: Russian writer; born 1870 at Polangen, in the government of Courland; studied at the gymnasium and University of Moscow, from which city his family was expelled in 1892. He received his diploma as physician in 1894. Brutzkus took part in the Russo-Jewish bibliographical work, "Sistimaticheski Ukazatel Literatury o Yevreyakh." Since 1895 he has contributed to the Russo-Jewish periodical "Voskhod"; and in 1899 he was appointed assistant editor on that periodical.

H. R. V. R.

BRÜX: Town of Bohemia, 14 miles north of Saaz. Documents prove that, as early as the fourteenth century, Jews were living at Brüx. In 1393 Borso the Younger, of Riesenburg and Petschau, gave his note for fifty schock of Prague groschen to the Jews Isaac and Asher of Brüx; and similar notes were given in 1394, 1413, and 1419 to the Jews Eberleyn and his wife Esther, Michael and Heyneman, Michael the Larger, and Michael the Smaller. In a document dated Feb. 17, 1456, a Jewish cemetery of Brüx is mentioned, which Frederick, duke of Saxony and margrave of Meissen, gave to a certain Hans Wickart. According to a Latin document, dated June 20, 1464, the king of Bohemia, George Podiebrad, forbade the Jews to reside at Brüx or within a mile of it, for which the city had to pay an annual tribute of six shocks of Prague groschen to indemnify the king for his loss of the Jews' annual toleration tax (*Schutzgeld*). For four hundred years there was no Jewish community at Brüx; in fact, since the sixteenth century Jews were not permitted to live in the mining towns of Bohemia.

Jewish congregations existed in Harreth and Lischnicz (about one hour's distance from Brüx), and these became parents of the congregation of Brüx, which was founded in 1868. A synagogue was built in 1873, and the cemetery was dedicated in 1878. The prosperity, harmony, and high standing of the congregation are due primarily to its able and public-spirited leader, Joseph Spitz, who took charge in 1885. The following associations may be mentioned: The Ḥebrah Ḳaddishah, the Hebrew Women's Benevolent Society, and the Kronprinz Rudolf Stiftung for poor wayfarers. There are, besides, the Kaiser Franz Joseph Jubiläums-Stiftung, for poor Hebrew artisans, and a Ludwig Bloch Stiftung. A pension fund for the Jewish clergy is to be founded. Adam Sattler, for many years religious instructor in the public schools and at the gymnasium, on being pensioned was decorated with the Golden Cross of Merit. Among the rabbis and religious teachers at the public schools and the gymnasium may be mentioned: Alexander Kisch, 1874–1877; I. S. Bloch, 1877–80, editor of the "Oesterreichische Wochenschrift," and at one time a member of the Reichstag; Jacob Tauber, 1880–86; Gotthard Deutsch, 1887–91, later professor in Cincinnati; and, since 1891, Adolf Biach.

The Jewish population of about 1,000—one-twentieth of the entire population—speak German. There are among them 10 lawyers, 5 physicians, and 2 clerks of the court; but the larger number are merchants.

D. A. Bi.

BRYANSK: Town in the government of Grodno, Russia, with a Jewish population (1898) of 2,365, in a total population of 6,342. Of the Jews 525 are artisans and 85 gardeners and farmers.

H. R. S. J.

BUBER, SOLOMON: Galician scholar and editor of Hebrew works; born at Lemberg Feb. 2, 1827. His father, Isaiah Abraham Buber, was versed in Talmudic literature and Jewish philosophy, and was Solomon's teacher in the latter subject; but for his son's Biblical and Talmudic studies he carefully selected competent professional teachers. The desire was soon aroused in Solomon to make independent research and to put the result of his work into literary form—a disposition which proved of the utmost value to Jewish literature.

Biographical Data.

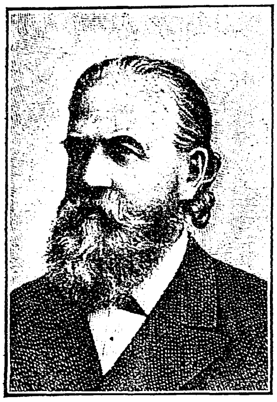
At twenty years of age Buber married and entered commercial pursuits. He rose by rapid degrees until he became "Handelskammerrath," and auditor of the Austro-Hungarian bank, the national bank, and the Galician savings-bank. This last position he still (1902) retains. Buber is also president of the "Geschäftshalle," vice-president of the free kitchen, and honorary member of a working men's union. For more than a quarter of a century he has been one of the directors of the Lemberg congregation; he is on the committee of the Bernstein foundation, and takes a leading part in various philanthropic associations.

While active in public life, Buber has also devoted himself to learned research. The Midrash literature had special attractions for him; and his activity in this field has been remarkable in extent. Its first result was an edition of the so-called "Pesiḳta de-Rab Kahana," with an elaborate commentary and

Midrash Editions.

an introduction which exhaustively discuss all questions pertaining to the history of this old Haggadah collection. The book appeared as a publication of the society known under the name of "Mekiẓe Nirdamim," Lyck, 1868. Buber's method of dealing with the difficult undertaking was new to scientific literature; and both introduction and commentary received the unstinted praise of the scholarly world. The introduction was translated into German by Aug. Wünsche, and published by him with his translation of the Midrash, Leipsic, 1884.

Other Midrashic works edited on a similar method and scale by Buber are: collectanea from Midrash Abkir, Vienna, 1883; Tobiah b. Eliezer's Midrash Leḳaḥ Ṭob, Wilna, 1884; the original Midrash Tanḥuma, Wilna, 1885; collectanea from Midrash Eleh ha-Debarim Zuṭṭa, Vienna, 1885; Sifre d'Agadta, short Midrashim on the Book of Esther, Wilna, 1886; Midrash Tehillim, Wilna, 1891; Midrash Mishle, Wilna, 1893; Midrash Shemuel, Cracow, 1893; Midrash Agada, an anonymous haggadic commentary on the Pentateuch, Vienna, 1894; Midrash Zuṭṭa, on the Song of Solomon, Ruth, Lamentations, and Ecclesiastes, Berlin, 1894; Aggadat Esther, haggadic treatises on the Book of Esther, anonymous, Cracow, 1897; Midrash Ekah Rabbati, Wilna, 1899; Yalḳ. Makiri, on the Psalms, Berdychev, 1899; Menahem b. Solomon's Midrash Sekel Ṭob, on the Books of Genesis and Exodus, ii. vol. 2, Berlin, 1900–02. This last work is also published by the society Mekiẓe Nirdamim.



Solomon Buber

Method as Editor.

As this array of publications shows, Buber is a prolific writer; yet the scientific quality of his work does not suffer on this account. At the outset he adopted a certain system to which he has consistently adhered. For a determination of the reading of the text he avails himself of all accessible manuscripts and printed works—and everything is accessible to him, as he spares no expense in obtaining copies of manuscripts and the rarest printed editions; he conscientiously records the various readings in foot-notes, and he bestows special care, chiefly in the older Midrashim, on the correction and explanation of words in the text borrowed from the Greek and the Latin. In the introductions, which almost assume the proportions of independent works (the introduction to the Tanḥuma embraces 212 pages octavo), everything that bears upon the history of the work under consideration is discussed, and a compilation is given of the authors or works cited by the Midrash or serving as sources for it, and those which in turn have drawn upon the Midrash. His work is distinguished by thoroughness, and reveals his synthetic ability as well as the vast extent of his reading. The only serious opposition to the views encountered by Buber has been in regard to his theory concerning the Tanḥuma.

Buber has distinguished himself in other departments of literature. His first work was a biography of the grammarian Elias Levita, published at Leipsic in 1856. After this he edited the following: "De Lates' Gelehrtengeschichte Sha'are Zion," Jaroslaw, 1885; Zedekiah b. Abraham's liturgic work, "Shibbole ha-Leket," Wilna, 1886; "Pesher Dabar," Saadia's treatise on the Hapax Legomena of the Bible, Przemysl, 1888; Samuel b. Jacob Jam'a's "Agur," introduction and additions to the 'Aruk, Breslau, 1888 (in "Grätz Jubelschrift"); Samuel b. Nissim's commentary on Job, "Ma'yan Gannim," Berlin, 1889; Biurim: Jedaiah Penini's explanations of Midrash Tehillim, Cracow, 1891, and a commentary on Lamentations by Joseph Caro, Breslau, 1901 (in the Kaufmann Gedenkbuch); "Anshe Shem," biographies and epitaphs of the rabbis and heads of academies who lived and worked at Lemberg, covering a period of nearly four hundred years (1500–1890), Cracow, 1895. In these works Buber appears as a philologist and as a careful writer of biographies of scholars, especially of the Jewish scholars of Poland.

Buber's extensive knowledge of Jewish history and literature is also displayed in additions to the works of others and in numerous contributions to Hebrew magazines, such as: "Meged Yeraḥin," Kobak's "Jeschurun," "Ha-Lebanon," "Ha-Maggid," "Maggid Mishneh," "Ha-'Ibri," "Ha-Meliẓ," "Ha-Ḥabaẓelet," "Ha-Karmel," Joseph Kohn's "Oẓar Ḥokmah," "Bet Talmud," "Ha-Shaḥar," "Ha-Asif," "Keneset Yisrael," "Zion," "Oẓar ha-Sifrut," "Ha-Eshkol."

Among the works of his more recent years the following may be mentioned: "Yeri'ot Shelomoh," a supplement to Abraham b. Elijah Wilna's "Rab Po'alim," Warsaw, 1894; a criticism of Yalḳuṭ Makhiri, on Isaiah, ed. Schapira, Cracow, 1895; a criticism of the Pesiḳta, with an introduction by David Luria (ed. Warsaw, 1893), Cracow, 1895; "Ḳiryah Nisgabah," on the rabbis in Zolkiev up to the letter ר, published in "Ha-Eshkol," i.-iii., 1898–1900; and his contribution to the "Steinschneider Festschrift," wherein he propounds a new theory concerning the "Petiḥtot" (Introductions) in Midrash Ekah Rabbati.

Buber corresponds on learned subjects with many well-known Jewish scholars. He has proved himself a veritable Mæcenas of learning. The cost involved in the publication of his works has usually been borne by him, and he has presented gratuitous copies to libraries and indigent scholars.

L. G. H. B.

BUCHHEIM, CHARLES ADOLPHUS: Professor of the German language and German literature at King's College, London; born in Moravia

1828; died at London June 4, 1900. He was educated at the University of Vienna, whence he received the degree of Ph.D.; settled in Paris; but after 1852 removed to London, where he lived till his death. In 1863 Buchheim became professor in King's College. He was also examiner in German to the universities of London (1875–90), Oxford, and Cambridge, and at one time was German tutor to the children of the Prince of Wales (afterward King Edward VII.).

Buchheim was the author of several critical works on German writers. He translated several of Dickens's novels into German, and published, through the Clarendon Press, annotated editions of a large number of German classics. In the "Golden Treasury Series" he published the popular "Deutsche Lyrik," 1875; "Balladen und Romanzen," 1891; and Heine's "Lieder und Gedichte," 1897. Of a more scholarly nature is his work "First Principles of the Reformation," which he published, conjointly with the Rev. Dr. Wace, in 1883.

In recognition of his learning and services the University of Oxford in 1898 bestowed on Buchheim the honorary degree of M.A.

J. A. R.

BUCHAREST: Ancient capital of Wallachia, and the present capital of Rumania. The oldest Jewish tombstone is dated 1682; but Jews settled in the city much earlier. In 1573 a Jew, Isaiah b. Joseph, was secretary to Prince Alexander Mircea. When Michael the Brave rose against Turkey in 1594, all the Jews of Bucharest were massacred. Not much is known of Jews resident here during the seventeenth century, except that they were engaged in commerce and in the manufacture and sale of liquor, while a few practised medicine. Under Constantin Brancovan (1689–1714) a Jew surnamed "Salitrariul" (maker of saltpeter) furnished that prince with the gunpowder needed in the army. The Jews formed a corporation of their own with a "staroste" (provost) at their head, and were restricted to one suburb, as were also the Armenians. In addition to their personal taxes, special assessments were levied upon them as a corporate body, out of all proportion to those imposed on other organizations of the city. In 1695 they were assessed 150 thalers to support the Turkish army in the war against Austria, and 100 thalers for boats.

The Eighteenth Century.

In 1715 Stephen Cantacuzene ordered the synagogue to be demolished. This led to a riot, during which the Jewish provost was killed. Upon payment of a heavy sum the Jews were permitted to rebuild their synagogue and resume worship. Better times came with the enlightened Prince Nicholas Mavrocordato. This ruler maintained most friendly relations with the physician Tobias Cohen of Constantinople, and with Daniel de Fonseca who was physician to the sultan as well as to the French ambassadors at Constantinople, with whom he was on terms of intimate friendship. Nicholas in 1719 established De Fonseca at his court in Bucharest, and lent him his influence. Nicholas also favored Mentech Bally, banker of the grand vizier, upon whom he conferred valuable privileges.

Under the successors of Mavrocordato the Jews were again more or less persecuted. Michael Racovitza (1730–31 and 1741–44), taught by the loss of his Moldavian throne in consequence of his difficulties with the Jews, did not oppress them more than he did his other subjects. His son Constantine even renewed the privileges of the "ḥaham bashi" of Moldavia, recognizing the latter's authority over the Jews of Wallachia, and granting them the right to have a deputy at Bucharest (1764).

The number of Jews increased after the Austro-Turkish wars, so that it became necessary to open a second synagogue in a central part of the city. Alexander Ghika (1764–66) demolished it upon the advice of the patriarch Ephraim of Jerusalem, who was passing through Bucharest. The Jews opened a new synagogue during the Russian occupation (1769–74), but this also was destroyed by Alexander Ypsilanti (1774–82). Not until 1787 did they receive permission from Peter Mavroyeni (1786–89) to have a new synagogue, on condition that it was located in a distant suburb. During the Russo-Turkish war (1769–74) the Jews suffered from the violence and spoliation of the janizaries. In 1770 they were unexpectedly attacked by the populace; many perished, but the greater number were saved by the boyars. Urged by the need of money, Mavrogyeni, though not unfavorably disposed toward the Jews, pressed them hard. On pretense of taxing them, he made the Jewish tailors, furriers, and jewelers of Bucharest work for the Turks, who were then at war with Austria. The plague, which broke out in 1792, under Michel Sutzu, brought disaster to the merchants already ruined by the Austrian occupation (1789–91). The distilleries, which were mostly owned by the Jews, were also closed.

Alexander Moruzi (1793–96) closed the synagogue which had been opened in 1790 in the center of the city, and punished the Jews who had defended themselves against their oppressors. Encouraged by the attitude of their prince, the populace heaped indignities upon the Jews; so that Moruzi found himself obliged—for a consideration in money—to direct the authorities to defend them: he even had to condemn to the bastinado and to exile a Christian tailor who had forcibly baptized a Jewish child. Under pretext of sumptuary laws, Moruzi forbade the Jews to sell cosmetics. At the same time the reappearance of the plague crippled the business of the second-hand dealers, pedlers, retailers, and even of the artisans. Constantine Hangerli (1797–99) treated the Jews somewhat better; giving them a tract of land on which to erect distilleries, granting privileges to artisans, and exempting them from taxation. But the plague, that had become endemic, paralyzed all business.

In spite of the obstacles put in the way of the Jews at Bucharest, the artisan class especially developed during the eighteenth century; its members often occupied exceptional positions, owing to their skill and the services which they rendered to the princes, the boyars, and even the people. The provost of the Jews occupied under several princes the position of "kuyunju pasha" (grand provost of silversmiths). In 1787 he gave way to a Christian; but six years later the position was again held by a Jew, Eleazar, who bore the title of "jevahirji-pasha" (grand provost of jewelers). There were also among the Jews manufacturers of pipes, potash, and rackets; also excellent engravers, lace-makers, and bookbinders. Certain Jews attached to the court obtained privileges and were exempt from taxes; and they acquired influence with the princes, the high dignitaries, and the boyars.

Development of Artisan Class.

Massacre of 1801.

The populace was still hostile to them, and the nineteenth century opened with a bloody massacre. The Jews were accused of espionage and of ritual murder; and on April 8, 1801, the rabble, aided by some soldiers, pretending to possess orders from the authorities, fell upon them, maltreated them, pillaged their houses, and massacred 128. Alexander Moruzi, who in 1799 had again come into power, being frightened by the massacre and his responsibility to the Porte, condemned the ringleaders to the salt-mines for life.

The Jews had hardly recovered from this terrible blow, when they were obliged to leave Bucharest hastily, together with the rest of the population, on account of the invasion of Pasvan Oglu, the rebel pasha of Rustchuk (1802). When they returned to their homes the specter of ritual murder again confronted them, so that Constantine Ypsilanti was obliged to request the metropolitan to instruct the priests to proclaim from their pulpits the falsehood of the accusation, which had been spread by persons whose only purposes were riot and pillage (1804). Nevertheless, the populace had their way two years later (Dec., 1806). When the Russo-Turkish war recommenced Ypsilanti abdicated just as the Russians were approaching Bucharest. The populace drove out the Turks, and, taking advantage of the disorder, fell upon the Jews, pillaged them, massacred a considerable number, and penned up the remainder in a certain locality, giving them a few days in which to choose between baptism and massacre. The entrance of the Russians rescued the Jews from this terrible plight.

Their fate during the Russian occupation (1806–1812) was not an enviable one. The well-to-do families removed to Transylvania; and the less fortunate ones who remained behind were subjected to heavy taxes, in which, however, they were not treated differently from the Christian merchants. Jews were forbidden to open their shops on the Christian festivals, and even to work at home during these days. Certain manufacturers of potash were driven from their factories, and pedling was interdicted. The Jews lived in continual fear of being accused of ritual murder, and finally, in order to extort money from them, their provost was imprisoned, and his office given to a German Catholic. Later the provost was liberated and restored to office. The Russian Jews residing at Bucharest only received a certain amount of liberty and a few privileges.

Position at Beginning of Nineteenth Century.

The impecunious prince Jean Caradja (1812–18), in order to extract money from the Jews, revived the order forbidding them to employ Christian minors as servants, or to rent or buy shops in the vicinity of churches. A fresh and violent outbreak of the plague furnished a pretext to Caradja, who accused the Jews of living in filth and of thus spreading the pestilence. Various measures taken by the authorities completely paralyzed the business of the merchants, pedlers, brokers, and others. In order to increase his revenues and to tax foreign Jews who should have been exempt, Caradja granted to the native Jews the exclusive privilege of establishing Jewish butcher-shops. Alexander Sutzu (1818–1821) confirmed this privilege.

During the first quarter of the nineteenth century the situation of the Jews of Bucharest was not enviable, in spite of the considerable influence which some of them enjoyed. They were treated worse than the gipsies, and were continually exposed to the insults of the populace. They could not venture into certain streets without risking their lives. Their domestic life was exemplary; but the communal life was filled with quarrels, originating with Polish or Russian rabbis of mediocre attainments, who did not know much more than their flocks, and who were driven from office as soon as the opposing party gained the upper hand.

The death of Alexander Sutzu precipitated the Hetæria (Greek insurrection) and the rising of Theodore Vladimirescu. Panic reigned at Bucharest. The well-to-do Jews fled to Cronstadt, while others sought refuge in the neighboring monasteries, where they camped in the courtyards in tents or on mats. Business was suspended, and the workmen were entirely out of work. The Jews suffered untold misery, for the entry of the Hetærists into Bucharest was marked by the pillage of the Jewish quarter. The Turkish occupation that followed was a period of unlimited oppression. For a Jew to venture into the streets meant almost certain death. The merchants closed their shops and left the country. On March 7, 1822, the Turkish soldiers, after a quarrel, charged upon the people, killed and wounded fifteen Christians and sixty Jews and Armenians, and looted the shops.

Further Difficulties.

In the second year of the reign of Gregory Ghika (1822–28) a fire destroyed the Jewish synagogue and one hundred and fifty houses inhabited mainly by Jews, many of whom lost all their possessions. In the same year the populace fell upon the Austrian Jews, who, on repelling the attack, were arrested by the police. The plague again offered an opportunity for extortion; the Jews, being declared infected, were driven from the city, and allowed to return only on payment of a sum of money. The anti-Semitic feeling also showed itself in the decree forbidding Moldavian Jews to settle at Bucharest (1827). The decree became a dead letter when the Russians again occupied those principalities (1828–34), bringing with them a number of Russian and Moldavian Jewish traders. During this occupation the Jews of Bucharest experienced better times.

The communal quarrels in the mean time continued among the followers of the German and the Portuguese ritual, and among the native Russian, Austrian, and Prussian Jews, not abating even after the reorganization of the community, which was granted by the authorities in 1832. Rabbis were installed and deposed by the different parties, thus causing embarrassment to the government, the all-powerful consuls, and the boyars, each of whom had a favorite Jew. Further, the populace here and there brought up the accusation of ritual murder (1834). Nevertheless, the importance and the influence of the Jews increased; their provost was named grand provost of the gild of tinmen; and their artisans and merchants were sought and honored by the boyars. Some among them were appointed to remunerative and honorable positions. The cashier of the Bucharest prefecture of police from 1839 to 1848 was a Jew. The banker Hillel Manoaḥ, on being knighted, was made a member of the commission appointed by the prince in 1847 to aid the suffering Jews, and in the following year he was elected to the municipal council. The physician Barasch was appointed a professor at the college in 1852. The Jews owned houses, vineyards, and estates. They were readily permitted to build synagogues, and in order to reduce the number of these they decided in 1845 to build a large one.

The Jews of German origin especially took an active part in the revolution of 1848, sacrificing themselves for it. The painter Daniel Rosenthal was naturalized and devoted himself heart and soul to his country. This epoch marks the beginning of the real regeneration of the Jews of Bucharest. The native Jews as well as the Austrian and Prussian subjects founded modern schools (1852), and took the initiative in reforming divine worship; erecting a temple with modernized service in 1857. Physicians increased in number; and young men turned to the higher studies. This progress did not cease even when the anti-Semitic spirit began to show itself, about 1866.

The Sephardim, who are called "Spaniards" in Rumania, were at first united with the rest of the Jews; but as early as 1818 they built their own synagogue and were subsequently recruited in numbers by Turkish immigrants. During the reign of Alexander Ghika (1834–43) they completely separated themselves from the other congregations, even having their special cemetery. This separation, however, while profitable to them materially, injured them morally, retarding their spiritual progress. After 1866 the two communities were no longer officially recognized. Yet the Sephardim, although less numerous, were able to maintain their organization; while that of the Ashkenazim was dissolved. All the educational and philanthropic institutions and agencies have been supported solely by societies or committees appointed for raising funds, since the salt-tax, which was a profitable source of income, was abolished.

The Jewish population of Bucharest, numbering between 4,000 and 5,000 at the beginning of the nineteenth century, had risen to 43,274 in 1899, according to the census of that year. The Sephardim have two synagogues; the Ashkenazim, a large number in addition to the Temple. The only congregation organized by the Ashkenazim is that of the Temple using the western ritual, with M. Beck at its head as rabbi and preacher.

Present Condition. Since the law of 1893 practically excluding their children from the public schools, the Jews of Bucharest have maintained six primary schools for boys and two for girls, a professional school for boys and one for girls, a business school, and a gymnasium. They also have a hospital, two homes for the aged, two burial societies (ḥebrah ḳaddishah), and a large number of philanthropic societies and institutions. See also Rumania.

Bibliography: See Rumania.

D. E. Sd.

BUCHBINDER, BERNHARD (pen-name, **Gustav Klinger**): Austrian journalist; born July 6, 1854, in Budapest, where he received his education, being destined for a mercantile career. A one-act comedy, which he wrote after he left school, and which was played successfully in Budapest, decided his future. Both of his parents having died when he was very young, and his father having been but a poor pedler, Buchbinder had to care for his younger brothers and sisters. Under great hardships and privations he adopted the profession of journalist and became very successful as a novelist and dramatic writer.

Among his numerous works may be mentioned the novels, "Vergessen im Armenhause," 1882; "Väter und Söhne," 1885; "Bettelstudent," 1886; "Freimann," 1891; "Eine Wiener Theaterprinzessin," 1894, and the dramas "Herrgotts Mörder," "Vater Deák," "Wer Ist der Herr im Hause," "Gräfin von der Strasse," "Die Flüchtlinge," "Heirat auf Probe," "Heiratsschwindler," "Der Schmetterling," "Göttin der Vernunft," "Verlogenes Volk," "Leute von Heute," "Die Diva," Rother Schnabel," "Die Dritte Eskadron," "Grubers Nachfolger," and "Er und Seine Schwester."

S. F. T. H.

BUCHHOLZ, CARL AUGUST: German Christian lawyer and author; born in the latter half of the eighteenth century; died at Lübeck Nov. 15, 1843. He was a doctor of laws and of philosophy, and, at the time of his death, occupied the position of second "Stadt-Syndicus" of Lübeck. Although that city was notorious for its hostility to the Jews, both before and after the Napoleonic wars, Buchholz, who was one of its leading citizens, voluntarily undertook to champion their cause in a work entitled "Ueber die Aufnahme der Jüdischen Glaubensgenossen zum Bürgerrecht" (Lübeck, 1814; 2d ed., Leipsic, 1816). This led to his being selected by the Jewish communities of the three Hanse towns (Lübeck, Hamburg, and Bremen) as their representative at the Congress of Vienna (1815), where he rendered valuable service. He was also sent as representative of the foregoing Jewish communities to the German Diet at Frankfort. At that time appeared his "Actenstücke, die Verbesserung des Bürgerlichen Zustandes der Israeliten Betreffend" (Stuttgart and Tübingen, 1815), a collection of laws and decrees concerning the Jews, issued by various princes and commonwealths of Germany. It is preceded by an introduction of about 75 pages, which forms one of the best and most comprehensive pleas for Jewish emancipation advanced by a Christian in that period of reaction. This work, which may be considered as a brief, showing his capacity as defender of the rights of the Jews of Germany, is alike creditable to his erudition, to his logical mind, and to his love of justice.

S. P. Wi.

BUCHHOLZ, P.: German rabbi; born Oct. 2, 1837; died in Emden, Hanover, Sept. 20, 1892. He became rabbi of Märkisch-Friedland in 1863, where he remained till 1867, in which year he was called to the rabbinate of Stargard, Pomerania. In 1875 he became chief rabbi of Friesland, which position he filled with ability and distinction until his death. He was a good Talmudical scholar and well versed in modern philosophy.

Buchholz was the author of a small work on the legal and moral relations of the family according to Jewish law, "Die Familie in Rechtlicher und Moralischer Beziehung nach Mosaisch-Talmudischer Lehre" (Breslau, 1867); and some of his more important speeches and lectures were published by him or by his friends. He has also written a number of articles on historical and other scientific subjects in the Jewish periodicals of Germany, of which his "Historischer Ueberblick über die Mannigfachen Codificationen des Halachastoffes" ("Monatsschrift," 1864, pp. 201–241) and "R. Azaria Figo und Seine Predigtsammlung Binah la-'Ittim" (Beilage zur "Isr. Wochenschrift," 1872, Nos. 4–9) are probably the most important.

S. P. Wi.

BÜCHLER, ADOLF: Austrian historian and theologian; born Oct. 18, 1867, at Priekopa, Hungary. In 1887 he began his theological studies at the Budapest Seminary, and at the same time studied in the department of philosophy of the university under Goldziher and Kármán. Büchler continued his studies at the Breslau Seminary, and in 1890 was graduated as Ph.D. at Leipsic University, his dissertation being "Zur Entstehung der Hebräischen Accente," which was afterward published in the "Sitzungsberichte der Wiener Akademie der Wissenschaften" of 1891.

Büchler returned to Budapest to finish his theological studies, and was graduated as rabbi in 1892. He then went to Oxford for one year, where he worked under the direction of his uncle, Dr. Adolf Neubauer, and published an essay, "The Reading of the Law and Prophets in a Triennial Cycle" (in "Jew. Quart. Rev." April, 1893). The same year he accepted a call as instructor at the Vienna Jewish Theological Seminary, where he still (1902) teaches Jewish history, Bible, and Talmud.

Büchler has published the following works: "Die Priester und der Cultus im Letzten Jahrzehnt des Tempelbestandes," Vienna, 1895; "Die Tobiaden und die Oniaden," *ib.* 1899; "Das Grosse Synedrion in Jerusalem und das Beth-Din in der Quaderkammer des Jerusalemischen Tempels," *ib.* 1902. He has also contributed some essays to the "Jewish Quarterly Review," the "Monatsschrift," the "Revue des Études Juives," and other periodicals, mainly on the last days of the Second Temple, which essays have attracted much attention on account of their originality.

S.

BÜCHLER, ALEXANDER: Born in Fülek, Hungary, in 1869; son of the Talmudist rabbi Phineas Büchler of Moór. He was educated at the gymnasium in Székesfehérvár and at the university and the seminary of Budapest; he received the degree of Ph.D. in 1893, and was ordained as rabbi in 1895. In 1897 he was called to Keszthely.

Büchler's works include essays on the history of the Jews in Hungary, published in the "Magyar Zsidó Szemle" and the "Oesterreichische Wochenschrift," and the following books: "Niederlassungen der Juden in Europa im XVI. und XVII. Jahrhundert, mit Besonderer Rücksicht auf Ungarn," Budapest, 1893 (in Hungarian); "Schay Lamoreh," "Kolel Miktebe Ḥakme Yisrael," Budapest, 1895 (in Hebrew); and "History of the Jews in Budapest," 1901 (in Hungarian).

S. L. V.

BUCHNER, WOLF B. DAVID HA-KOHEN: Hebrew stylist; born at Brody in the latter half of the eighteenth century and lived into the nineteenth. In his boyhood Buchner enjoyed the hospitality which every Talmud student found in those days in the bet ha-midrash, and during his manhood he traveled with Hebrew books through Germany, Galicia, Poland, and Lithuania (Letter 83).

At times he earned his livelihood by writing letters for illiterate people. His own publications were another source of income to him (*ib.*). He corresponded with Baruch Jeiteles (Letter 72); Jacob Landau, son of Ezekiel Landau (Letter 81); and Beer Ginzburg, the Galician poet and friend of Naḥman Krochmal (Letters 3, 82, 83). He suffered very much in his travels through foreign countries, and in Berlin he sustained an injury which cost him the sight of his right eye (Letters 19, 20). As he never speaks in his letters of wife or child, it is impossible to tell whether he was married.

His works are: (1) "Zebed ha-Meliẓah," an imitation of Al-Ḥarizi's "Taḥkemoni," written in 1770, but published (Prague, n.d.) not earlier than 1794, the date of the censor's approbation; (2) "Zebed Ṭob" (*ib.*), a collection of poems; (3) "Keter Malkut" (Lemberg, 1794), a hymn in imitation of Gabirol's; (4) "Shire Tehillah" (Berlin, 1797), hymns and parodies; (5) "Ẓaḥut ha-Meliẓah" (Prague, 1805), a collection of his private letters. The "Shir Nifla" (Frankfort-on-the-Oder, 1802) and "Shir Yedidut" (*ib.* 1810) are to all appearance partial reprints from the "Shire Tehillah." His parodies of the marriage and betrothal contracts were later abridged and published separately ("Seder Tenaim Rishonim me-Ḥag ha-Pesaḥ," Lemberg, 1878) and wrongly ascribed to Israel Nagara.

Buchner is one of the modern representatives of the medieval school of artificial poetry. His prose is flowery and full of conceits; while his poetry devotes more attention to the number of letters in the words than to the sense which the words are supposed to convey. He endeavored to imitate Gabirol, Al-Ḥarizi, and Bedersi; but he had not the depth of the first, the invention of the second, or the force of expression of the third. He showed a predilection for similitudes (משל); but his arguments are generally encumbered rather than strengthened by these. Though his works had considerable vogue in his day, and went through several editions, they have fallen into oblivion.

BIBLIOGRAPHY: His letters (צחות המליצה); Zeitlin, *Bibl. Post-Mendels.* s.v.; Delitzsch, *Zur Gesch.* p. 86; Fuenn, *Keneset Yisrael*, p. 301.

L. G. I. D.

BUCHSBAUM: Family of Jewish physicians of Frankfort-on-the-Main, whose activity extended over a century. Its prominent members were:

1. **Amschel Gutman Buchsbaum:** Son of Gutman Wolf (No. 3). He graduated from the University of Giessen in 1729; died 1743.

2. **Benjamin Levi or Wolfgang Buchsbaum:** Born at Frankfort 1645; died June 26, 1715. He devoted many years to the study of medicine and philosophy at the universities of Heidelberg, Vienna, Pisa, and Padua, and graduated from the last-named in 1669. The same year he returned to his native town, where he was given permission to practise medicine, and enjoyed a high reputation among both Jews and Christians.

3. **Gutman Wolf Buchsbaum:** Born 1678; died 1770; a son of Wolfgang (No. 2). He graduated from the University of Leyden in 1697, and returned to Frankfort to practise. He held a respected position in the community.

4. **Lipman Buchsbaum:** Brother of Gutman Wolf (No. 3); born 1677; date of death unknown. With his brother he graduated from the University of Leyden in 1697, and returned to Frankfort to practise medicine. He also held a high position in the community. Confined for a time in the tower of Bornheim on account of false accusations brought against him, he utilized his imprisonment by writing a long treatise on medicine.

BUCKLER. See SHIELD.

BUCURESTEANU (BUCURESHTEANU), ABRAHAM COHEN: Rumanian publicist; born at Bucharest 1840; died there Jan. 24, 1877. From his earliest youth he was passionately fond of the theater, and obtained some success on the stage; but by the advice of his family he devoted himself to commerce. At the same time, being gifted with spirited wit and having an inordinate fondness for puns and repartee, he composed a number of satirical poems and epigrams, love-songs, theatrical skits, and anecdotes, which were most favorably received by the public (1860–74). His songs were favorites alike in the parlors of the wealthy and the hovels of the poor, and, although mediocre, are still (1902) to be heard in Bucharest. The best known among them are: "S'o vezi Mama n'o mai uită"; "Gândul meu la tine sboara"; "Cu Chimir."

Bucuresteanu's life was a wild one; insatiable love and furious jealousy soon deprived him of his wife, and brought him to the grave, a victim of physical suffering and remorse. His songs are to be found in numerous popular collections; but he himself published only "Urdubelea si Norocul," Bucharest, 1873, and "Buchetul, Culegere de Anecdote," Bucharest, 1874.

As Jew and philanthropist, he has to his credit the foundation of the Zion Society, which assumed large dimensions, and became an integral part of the American B'nai B'rith in Rumania, under the name "Zion Grand Lodge."

BUCZACZ, ABRAHAM DAVID B. ASHER ANSHEL: Galician Talmudist; born 1770 at Nadworna; died 1840 at Buczacz. Even as a boy he attracted, by his acuteness in Talmudic knowledge, the attention of the leading Talmudists to such a degree that Ẓebi Hirsch, the author of "Neṭa' Sha'shu'im," chose him in his tenth year as a son-in-law. At the age of twenty he was ready to accept the office of rabbi at Goslowitz.

The chief event of his life was the struggle awakened in him by the opposition between the Talmud and the Cabala. Unacquainted with the tendencies and modes of life of the Ḥasidim, Buczacz did not believe in the miracles of their rabbis; and his wife and friends had great difficulty in persuading him to take his sick son to a Ḥasidic rabbi, Levi Isaac of Berdychev. The latter, however, influenced him to take up the study of the Cabala; but in trying to reconcile these new views—so utterly antagonistic to those of the extreme Talmudists, which he himself had hitherto held—he nearly became insane. The Ḥasidic rabbi Levi Isaac of Berdychev helped him through this struggle and won him over, to the great joy of the Ḥasidim, who feared his wide Talmudic learning. Buczacz adopted the Ḥasidic mode of living; but in his decision of halakic questions was guided, not by cabalistic, but by purely Talmudic, principles. In 1813 he succeeded his late father-in-law as rabbi of Buczacz, and remained in office until his death.

Buczacz is the author of the following works: (1) "Da'at Ḳedoshim," to the Shulḥan 'Aruk, Yoreh De'ah, Lemberg, 1870; 2d ed., *ib.* 1879; (2) "Dibre Abot," commentary on Abot, *ib.* 1879; (3) "Eshel Abraham," annotations to the Shulḥan 'Aruk, Oraḥ Ḥayyim, *ib.* 1885; (4) "Birkat David," cabalistic-haggadic commentary on Genesis, Zolkiev (date 1766, given on title-page, wrong); (5) "Maḥazeh Abraham," commentary on the Pentateuch, and "Ḥozeh David," on the other Biblical books, Lemberg, 1871; (6) "Amarot Ṭehorot," on the purification of Niddah and vessels, in Judæo-German, *ib.* 1878; (7) "Tefillah le-David," on benediction and prayer, *ib.* 1886; Kolomea, 1887; (8) "Tehillah le-David," on the Psalms, *ib.* 1872.

BUDA. See BUDAPEST.

BUDA, PURIM OF: In 1684 the Christian armies laid siege to Buda (Ofen) to drive out the Turks, who had held possession of the city from 1541; their design was, however, frustrated by the stout resistance of the Turks and Jews. The participation of the latter in this opposition to Christian forces was followed by great embitterment against the Jews, particularly in Italy, where in Rome they could not venture into the street without a guard from the pope's troops; any not thus protected being sure of immediate assault and possibly murder. The towns of Moncellis, Montaniana, Castel-Franco, and Citadella followed the example of Rome; and in Padua, where Jews and Christians had lived side by side for many centuries, a sharp outbreak of anti-Jewish feeling was felt in 1670. The outbreak in that city was the outcome of commercial jealousy, brought to a head by a calumnious publication which was widely circulated among the people. Although the publication was interdicted by the authorities, it nevertheless implanted deep animosity against the Jews; and when the news came of the part which they had taken in the defense of Buda, the latent hatred broke into flame. The Capuchin Marco d'Aviano, who had passed two months with the besieging armies outside Buda, when asked concerning the part which the Jews had taken in bringing disgrace upon the Christian armies, replied truthfully that the Jews of Buda were not blameworthy. The populace, however, refused to accept this generous estimate, and pictures of Buda in which the ghetto was over-prominent were widely circulated, greatly increasing the popular resentment.

Jews of Padua Besieged.

On the Ninth of Ab the Jews of Padua gathered as usual to celebrate their annual fast-day commemorating the destruction of the Jerusalem Temple; but no explanation would convince the people that the object of the fast was other than to implore divine assistance in behalf of the Turks and Jews then besieged in Buda, and to offer prayers for the defeat of the imperial troops. Although the Jews notified the authorities of this cruel misconception on the part of their Christian fellow-citizens, no weight was attributed to their statement. On Sunday, Aug. 20, 1684, the news was passed from mouth to mouth that Buda had at last been captured. It appears that a special messenger had arrived at Venice from Buda the day before, and the people had erroneously taken him to be the bearer of tidings of victory. The Padua populace, joined presently by armed men, gathered in the vicinity of the ghetto, and, in exultation over the supposed victory, bombarded the Jewish dwellings with stones and attempted to break down the barred gates of the ghetto. The authorities who tried to pacify the mob were silenced with volleys of stones; all who endeavored to make peace were assailed with reproaches of having been bought by the Jews. The Jews themselves attempted to pacify the raging people with gifts of money and food; but to no purpose. The magistrates threatened the severest punishment to any who should assault or despoil Jews, but their warnings availed only for the moment. The Jews decided to send an appeal for help to the doge of Venice, but when the ghetto-gate was opened to give egress to the messenger, the mob poured in by thousands, broke open warehouses, and destroyed the windows of the synagogue. The besieged barricaded the doors of their dwellings and awaited their fate. Finally a detachment of Italian and German cuirassiers cleared the ghetto of the rioters, wounding several of them. This still further incensed the populace, and two cuirassiers were slain by the mob. When a wicked woman, with a terrible outcry, announced that the Jews had stolen her only child to use its blood, popular fury knew no bounds. The riotous mob rushed with the woman to the city hall, demanding the heaviest punishment for the offenders. In vain did the educated and respectable element of the city government endeavor to pacify them. It was only by the lavish use of gold that any impression was made upon the mob, which presently dispersed. When, some time later, the Jews offered to repay the sum thus disbursed by the burgomaster, he refused to accept it.

At the request of the people the military was withdrawn from the ghetto. No sooner had this taken place, however, than the fury of the people broke out afresh; the ghetto was again assailed and its massive doors attacked with fire and sledgehammers. The Jews passed the night in consummate terror; distrusting the guards who had been assigned for their protection, some crawled on ladders into the houses of their Christian friends outside the ghetto. Deliberate attack was prevented by the proclamation of the authorities that death awaited any man who harmed the Jews, and the next day stringent orders came from Venice commanding immediate cessation of the riot. Popular indignation therefore was forced to content itself with burning Jews in effigy at the stake.

These anxious days are still commemorated by the Jews of Padua, who on Elul the 10th annually celebrate a festival called the Buda (Ofen) Purim, in memory of the valiant deeds of their ancestors in that city, the sufferings brought by it upon the Jews of Padua, and their deliverance therefrom.

D. A. Bü.

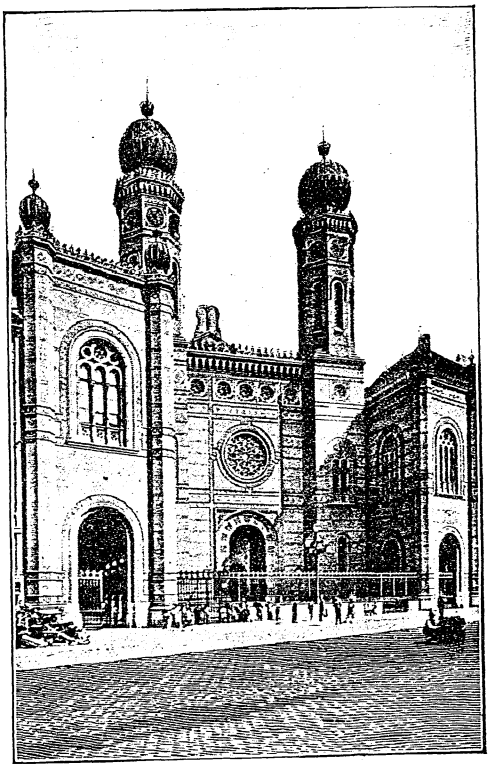
BUDAPEST: The capital of Hungary. Of the several congregations within this tripartite city, Buda (Ofen), Ó-Buda (Alt-Ofen), and Pesth, that at Buda is the oldest (see ALT-OFEN); Jewish population in 1900 was 166,198. The first mention of the Jews of Pesth dates back to 1406, in which year Saul of Pesth and Saul of Ofen obtained from Béla IV. certain privileges which were countersigned by the chapter of Stuhlweissenburg, when they settled in the last-named city. In 1504, Jews owned houses and lands at Pesth. At the time of the Turkish rule their cemetery was situated in the present Leopoldstadt. After 1686, in which year the Turks were driven from Pesth, no Jews were allowed to live there for nearly a century; and the magistrate of Pesth collected a tax of thirty kreutzers from every Jew traveling through the city, and one thaler from every Jew remaining in it overnight—a right that Pesth claimed by virtue of the letter of privileges granted by King Leopold I. Oct. 23, 1703, according to which it was left in the hands of the municipal council to admit Jews or to refuse them admission. When the governor enrolled the Jews of Hungary in 1735, the city of Pesth decreed that neither a heretic nor a Jew could live or settle there in future; but they were allowed to visit the markets of the city from the sixth decade of the eighteenth century.

Under Joseph II.

In endeavoring to gain a permanent residence in the city, the Jews were always frustrated by the magistracy. The latter in 1762 even begged the prince primate, Count Franz Barkóczy, who had become the protector of the city, to exclude the Jews. This resistance of the city authorities was finally overcome by the emperor, Joseph II., after whose decree of March 31, 1783, Jews slowly began to settle at Pesth. The first arrivals came from Alt-Ofen and settled generally in the Theresienstadt, which at the present time (1902) is most thickly populated by Jews. The city of Pesth would not allow them to live elsewhere, and would have transformed the Theresienstadt into a ghetto, but failed to do so when Israel Abraham Offenheim, with the permission of the authorities, rented a house and a store in the inner city itself in 1786. Jews were allowed to live in the city only with the permission of the king, and those who bought this right for large sums were called "tolerated Jews"; those who were only temporarily received by the city were called "Commoranten" (sojourners). In 1787 fourteen tolerated Jews were living at Pesth; the settlement numbering 114, including servants. At first they were not allowed to have their own butcher-shop, the kosher meat being cut up twice a week by the municipal butcher. Jews staying temporarily in the city or those traveling through it had to obtain their food and drink at the public cook-shop, the high rent paid for the same being a large source of income for the city. At first travelers were allowed no lodging except in this cook-shop.

After Joseph II.

When Joseph II., on his death-bed (Jan. 28, 1790), revoked all his decrees, the citizens of Pesth determined to expel the Jews, who competed with them in business; and the magistracy had already fixed upon the first of May as the day of expulsion, when the Diet interfered. Being compelled to endure the presence of the Jews, the city endeavored to make their residence unpleasant. The Commoranten were often expelled; and only those were allowed to stay in the city who had a toleration-permit. The city forbade them to organize a community or to use a seal. In 1804 it attempted several times to drive them from various parts of the city and to concentrate them in the Theresienstadt. The Jews, stung by this animosity and conscious of the commercial services they were rendering to the community, pointed out that the creation of a ghetto would be the surest means of injuring the commerce of Hungary, which was then in its infancy. They claimed that nowhere else had Jews been so instrumental in developing trade as in Pesth; and that they did not deserve insult as a reward. They declared that Jews lived amicably with Christians in every port and emporium of Europe, and that in those cities in which they were influential in commerce, such as Triest, Hamburg, Dresden, and Berlin, they even owned their houses; while in places where a special Jewry was assigned, the more prominent merchants were allowed to live in open places outside of the ghetto. The Jews warned the city not to carry out its intentions, pointing out the damage that the Leopoldstadt would suffer if they were expelled from it, and directing attention also to the formidable increase which would ensue in rents if the owners of the houses in the Theresienstadt had the monopoly of renting to Jews.



The Tabakgasse Synagogue at Budapest.
(From a photograph.)

Foreign Jews Forbidden Entrance, 1808.

A most severe decree against the Jews of Pesth was issued in 1808: it forbade any foreign Jew to settle at Pesth, even though he married the daughter of a tolerated Jew. The parent's right to trade and to be tolerated passed by inheritance only to one male descendant; while all the other children were regarded merely as Commoranten and as assistants in their father's business. In 1828 the Jews addressed a petition to the king requesting the abrogation of this decree. "Out of love to our children," thus wrote the community, "we wish to die with the assurance that we may leave to our descendants at least an assured home, the honest means of gaining a livelihood, and independence, if not wealth."

If the father died all the children who had been working with him as "assistants" had to emigrate, with the sole exception of the tolerated son. It happened often that the only available husbands for their daughters were shiftless and undesirable Jews, whose sole merit was that they possessed the right of toleration. Honest and industrious strangers were out of the question because they were forbidden to remain at Pesth or to engage in commerce.

Progress of Community.

That all these endeavors to place difficulties in the way of Jews intending to settle at Pesth were futile may be seen by the fact that of 1,346 Jewish families living there in 1833, only 530 had the right of toleration or were Commoranten. The community of Pesth, increasing in numbers, wealth, and education, thus became from 1839 the foremost of the Hungarian-Jewish communities; working as such for the emancipation of Hungarian Judaism, and often convoking gatherings of representative Hungarian Jews for that purpose.

It was due to the energetic interposition of the community of Pesth that King Ferdinand V. (1835–1848) abrogated the toleration-tax by which the Jews had been branded for a century. The Jews of Pesth sympathized with the nation at the time of the Hungarian struggles for liberty. Although the populace attacked and plundered the Jews on the second day of Passover, April, 1848, and the intolerance of the people excluded them from the national guard, the Jews were not long discouraged. The rabbi Schwab stirred up their patriotism, for which he was arrested after the uprising had been quelled. The Jews were so enthusiastic in the cause of Hungary that they even offered to sacrifice the silver paraphernalia of the temple and of the Ḥebrah Ḳaddishah; and all Jews entering the revolutionary army received their full equipment from the community. Haynau punished them for this patriotism with a heavy war-tax, part of which, however, King Francis Joseph I. remitted.

Occupations.

Emperor Joseph sought to forbid the Jews to engage in retail business and in pedling, for which reason in 1788 he decreed that tolerated Jews should be received in Pesth only when they established a wholesale house or some manufacture. Within the community they were allowed to deal only in such goods as the Christian population lacked or in which they could not compete with Christian dealers. Only wholesale merchants were allowed to keep an open shop. Many Jews, therefore, who did not wish to engage in pedling, petitioned for the rights of a wholesale dealer, although they had neither the money nor the capacity for such business. Their profits were curtailed by visiting dealers, who came from near and far to the markets; there were heavy taxes and living expenses; and the shops had to be closed not only on the Jewish, but also on the Christian, holidays.

Yet with all these drawbacks the Jewish business men of Pesth materially aided the development of the city. Noteworthy among the many eminent merchants is the Ullmann family, a member of which, the apostate Moritz, who was ennobled, was the first to propose the organization of the Commercial Bank of Pesth; he also originated the plans for the railroad from the Austrian frontier to Pesth and thence to Debreczen. Not only Jewish merchants, but artisans also settled at Pesth, among them the lace-maker Joel Berkovits, a descendant of Rabbi Heilmann of Metz, who had learned his trade with a relative, Ephraim Kossmann, at Berlin. Berkovits was also skilful in making Turkish fancy boxes.

Although the gilds largely interfered with the development of Jewish industry, the Jewish community of Pesth encouraged many young men to learn trades. It instituted a fund to aid Jewish youths who followed laborious handicrafts, and with the assistance of Jacob Kern it was instrumental in founding in 1842 the Hungarian Israelitish Trades and Economic Association, which had benefited many Jews. Thus in due time the Jews contributed to the industrial development of the city, as well as to its culture, through the many teachers and university professors, judges, physicians, lawyers, and engineers they furnished to the community.

Worship.

Immediately after their settlement the Jews organized a place of worship in the Hausler homestead in the Königsgasse, paying a rent of 200 gulden for their synagogue. The necessary Torah-rolls were lent to them by the community at Alt-Ofen. On Aug. 17, 1787, the government gave them a permit to continue worshiping quietly in private houses of prayer without a rabbi. In 1796 they rented a room for a new synagogue in the house owned by Baron Orczy, an immense building that is still called the "Judenhof." In the year 1800 there were, in addition to the Orczy temple (called the "large temple"), a Polish temple, and a separate house of prayer belonging to the Sephardim. The first place to adopt an improved (moderate Reform) manner of worship was the temple of the Ḥesed Ne'urim association, in the house of the "White Goose" ("Fehér Lud"). It was considered merely as a private synagogue; but when all private and association temples were dissolved in 1830, the community included this temple among its institutions, and transferred it also to the Orczy house, adjoining the "large temple." The communal temple was transferred in 1859 to the present magnificent building in the Tabaksgasse. In the seventies a synagogue was organized for the Conservatives in the Rombachgasse, while their temple in the Orczy house was rented by the Orthodox congregation, which still worships there (1902). The temple of the Reform Society was from 1848 to 1852 in the Valero house in the Königsgasse.

Cemeteries.

The Jews of Pesth at first buried their dead in Alt-Ofen. The city in 1788 assigned to them a free cemetery, which was situated on the plot now occupied by the Westbahnhof. A new cemetery was given to them in 1808 behind the city dike, in the Weitznerstrasse, and they transferred thither in 1839 their dead and their tombstones. Gravestones with sculptured images of men and women were erected in this cemetery as early as 1832, a practise against which Moses Sofer, rabbi of Presburg, vigorously protested. As this cemetery proved to be too small, a new one was assigned to them near the Kerepeserstrasse. Lately the community bought for burial purposes a large plot of ground behind Köbanya.

Philanthropic Associations.

The Ḥebrah Ḳaddishah was founded in 1790. It is one of the largest benevolent societies, its budget for 1902 being 511,671 crowns. In 1800 Israel Wahrmann founded the Shi'yur society. The hospital was organized in 1805. There are also the following associations: Ḥesed Ne'urim, Biḳḳur Ḥolim, Menaḥem Abelim, and Tomke Yetomim; the Women's Society, founded in 1866, which owes its success largely to the noble Johanna Bischitz de Heves; the People's Kitchen, the hospital, the Adela Brody Children's Hospital, named after its founder; an orphan asylum for girls, and one for boys, which was founded by a philanthropist named Fochs: the new building of the last-named, inaugurated in 1901, is a monument to the labors of Jacob Deutsch. Many Jews have perpetuated their names by large foundations, among them Wolf Holitscher, Solomon Taub, Alexander Wahrmann, Philip Kunewalder, and Moses Ehrlich. The Jews of Pesth have always been public-spirited and philanthropic. During the cholera epidemic of 1831 they not only relieved Jews, but also furnished daily rations to eighty-two Christian families, earning the gratitude of the count palatine Joseph. They are, in addition, liberal contributors to the general philanthropic institutions of the country.

Earlier Rabbis.

The religious life of the community was at first under the supervision of the rabbinical council of Alt-Ofen, and, beginning with 1789, under Moses Münz, rabbi of that city. When Rabbi Wolf Boskovitz settled at Pesth in 1793, the community elected him rabbi. The government, however, deprived him of his office Dec. 27, 1796, in consequence of the intrigues of Moses Münz, and ordered the community to elect any one it chose to conduct its religious affairs, with the exception of Münz. In the spring of 1799 it elected Israel ben Solomon Wahrmann, rabbi at Bodrogh-Keresztur, against whom Münz again began to plot. In the following year the government ended these intrigues, and the enlightened Wahrmann was able peacefully to conduct the affairs of the community. He died June 24, 1826 at the age of seventy. His dayyanim were Simon, Oppenheimer, Azriel Brill, and Moses Kunitzer. After Wahrmann's death certain educated and wealthy members of the community, delighted with the organization of the new Vienna temple and the sermons of its preacher, Noah Mannheimer, proceeded to introduce Reformed worship at Pesth and to elect a preacher. They chose Joseph Bach of Alt-Ofen as preacher, and Edward Karl Denhof, also of Alt-Ofen and a pupil of Sulzer of Vienna, as precentor. This temple, or "choir synagogue," as it was also called, was for a time a bone of contention in the community. Attempts were made to prohibit worship in it; and only the endeavors of the president of the community, Gabriel Ullmann, preserved it from the fanatics.

These changes in the life of the community made it imperative that a man should officiate as rabbi who could meet the demands of the Conservatives as well as of the Reform party. In 1829 the community elected David Joseph Wahrmann, son of the deceased rabbi; but as he delayed his coming, Löw Schwab, rabbi at Prossnitz, was called instead. Entering upon office in Jan., 1836, Schwab's incumbency was a blessing not only to the community of Pesth, but also to the entire Hungarian Jewry. He fostered the development of all culture and religious institutions, acting always with tact and avoiding dissensions. His rabbinical council included the scholarly Samuel Löw Brill (b. 1814; d. 1897), later professor of the Talmud at the rabbinical seminary at Budapest, and Judah Wahrmann, author of the "Ma'areket ha-Ha'taḳot" (Ofen, 1831), on Hebrew punctuation ("trop"), and of an ethical book, "Dat Yehudah." Schwab's literary activity included sermons, and works in which he defended Judaism against the slanders of Gasparich Kilit, translated into Hungarian by Moritz Bloch, a convert; a religious book, "Erinnerung an den Erhaltenen Religionsunterricht" (Pesth, 1846), in German and Hungarian; and a responsum directed against the Jewish Reform Association at Pesth. This association had been called into life by the Hungarian struggles for liberty in 1848. Its first rabbi was Ignatz Einhorn, who subsequently became secretary of state in the Hungarian ministry under the name of Eduard Horn. When Horn fled from Hungary, after the Revolution had been put down, his place was taken in 1852 by Dr. David Einhorn, district rabbi of Mecklenburg-Schwerin. However, he officiated for only a short time, as the government dissolved the Reform Association in 1852 in consequence of the remonstrances of Rabbi Schwab, the members going back to the original congregation.

Successors of Schwab.

After Schwab's death, April 3, 1857, the community extended an invitation to Dr. Michael Sachs of Berlin; but as he refused the call, Dr. W. Alois Meisel was chosen May 11, 1859. This preacher was much hampered in his activities not only by the president of the community, Dr. Ignatz Hirschler, but also by the rivalry between the Hungarian and the German element. It was in consequence of the strengthening of the Hungarian element that the office of a preacher in the Hungarian language was created, Dr. Samuel Kohn being called to fill it. His researches contributed largely to the systematization of the history of the Hungarian Jews. After Meisel's death (Nov. 30, 1867), the position of chief rabbi remained vacant, and the office of a German preacher was created, Dr. M. Kayserling being chosen to fill it. Rabbi L. Pollak was called to the temple in the Rombachgasse. Dr. Julius Weissburg has been assistant rabbi since 1895. After Brill's death the position of chief of the "bet din" was filled in 1901 by Moses Feldmann, rabbi at Galantha. The first rabbi of the Orthodox congregation founded in the seventies was Joachim Schreiber, after whose death Koppel Reich was elected (still officiating in 1902).

The education of Jewish children was at first in the hands of private teachers. In Aug., 1787, the government decreed that all the Jewish children of Pesth should attend the Christian schools, and that there should be no private instruction except that

Education.

of one religious teacher. Some of these private teachers contributed to Hebrew literature, among others I. L. Löwinger, Joseph Rottenbauer, Adolf Pevani, L. Moses Fochs, Filipp Weil, Leopold Breuer, and Karl Kohlmann, who, after renouncing Judaism, was appointed censor of the Hebrew books printed at Ofen. A public school was opened through the endeavors of Rabbi Israel Wahrmann, through whose influence the pupils of the gymnasium received religious instruction. Rabbi Schwab procured royal protection for the school, and also induced the community to organize an infant-school. After the Revolution, during the Germanizing régime of Bach, the school became the nursery of the Hungarian national spirit. Ignatz Reich, the enthusiastic Hungarian teacher, was active at this time. He is the author of "Bet El," a work containing the biographies of eminent Hungarian Jews. The community of Pesth did much for its schools. In addition to the elementary schools for boys and for girls, it has a secondary school for them, with capable instructors. The religious instruction in the municipal schools, as well as in all the intermediate schools (Mittelschulen), is provided by the congregation, and consists of a staff of religious teachers, some of whom are graduate rabbis. The supervision of all the schools at present is in the hands of B. Munkácsi, appointed by the congregation.

Internal Government.

Ever since the Jews settled at Pesth their governing board has consisted of the seven members of the so-called "Deputation," which originally regulated the rents derived from Jewish taverns. The arbitrary proceedings of this board were restricted by the statutes of 1800, according to which twelve members in addition to the seven directors supervised the affairs of the community. New by-laws were imposed upon the community by the city in 1816 and 1828. It had no constitution confirmed by the government until 1833. Since this date the Jews of Pesth have formed an officially recognized community. It drew up new by-laws in 1861, when Dr. Ignatz Hirschler was chosen as president, by whom the institutions of the community were reorganized. He was succeeded as president by Moritz Wahrmann, who was the first Jewish deputy in the Hungarian House of Representatives. The present president of the congregation is Sigmund Kohner; its secretary (since 1874), the well-known Orientalist Ignaz Goldziher. See Alt-Ofen.

D. A. Bü.

BUDEK: Polish Catholic priest; canon of Wislica at the beginning of the fifteenth century, and one of the most vigorous Jew-baiters of his time. It was he who instigated the attack on the Jews of Cracow on the third day of Easter (March 27), 1407; charging them with the murder of a Christian boy and with having attacked a priest who was carrying the sacrament (see Cracow). H. R.

BÜDINGER, MAX: Austrian historian; born April 1, 1828, at Cassel, Germany; died at Vienna Feb. 23, 1902; son of Moses Mordecai Büdinger.

Büdinger devoted himself from 1847 to 1851 to the study of history at the universities of Marburg, Bonn, and Berlin. In 1857 he became privat-docent of history at the University of Marburg; but seeing no prospect of attaining a professorship, on account of his Jewish faith, he soon left this position and went to Vienna. In 1861 he received a call to the University of Zurich as professor of history. From 1872 until his death in 1902 he occupied the chair of history at the University of Vienna. In 1887 he was elected a member of the Vienna Academy of Sciences.

Büdinger was the editor of two series of historic essays written by his pupils under his direction: (1) "Untersuchungen zur Römischen Kaisergeschichte," in 3 vols., Leipsic, 1868–70; and (2) "Untersuchungen zur Mittleren Geschichte," in 2 vols., *ib.* 1871. He is the author of the following works: (1) "Zur Kritik Altbayrischer Geschichte," Vienna, 1857; (2) "Zur Kritik Altböhmischer Geschichte," *ib.* 1857; (3) "Oesterreichische Geschichte bis zum Ausgang des 13. Jahrhunderts," Leipsic, 1858; (4) "König Richard III. von England," Vienna, 1858; (5) "Die Königinhofer Handschrift und Ihr Neuester Verteidiger," *ib.* 1859, where he proved the spuriousness of this pretended Old-Bohemian literary monument; (6) "Nachrichten aus Altrussischen Jahrbüchern," *ib.* 1859; (7) "Ein Buch Ungarischer Geschichte, 1058–1100," Leipsic, 1866; (8) "Wellington," *ib.* 1869; (9) "Lafayette," *ib.* 1870; (10) "Aegyptische Einwirkungen auf Hebräische Kulte," Vienna, 1872–74; (11) "Zur Aegyptischen Forschung Herodots," *ib.* 1873; (12) "Lafayette in Oesterreich," *ib.* 1878; (13) "Vorlesungen über Englische Verfassungsgeschichte," *ib.* 1880; (14) "Cicero und das Patriziat," *ib.* 1881; (15) "Poesie und Urkunde bei Thukydides," in 2 vols., *ib.* 1890–91; (16) "Don Carlos' Haft und Tod," *ib.* 1891. He embraced Protestantism.

BÜDINGER, MOSES ISRAEL BEN ISAAC: Teacher at Metz at the end of the eighteenth century and the beginning of the nineteenth. He devoted himself to Hebrew grammar and literature and trained a large number of grammarians and writers of elegant Hebrew. Büdinger was the author of the following works, all published at Metz: "Em le-Mikra" (Mother of Reading), a manual of the Hebrew language, compiled from various elementary books, 1816; "Ḥanok le-Na'ar" (Train up the Child), an extract of the preceding work, 1816; "Iggeret Purim" (Essay on Purim), the ritual laws concerning the Feast of Purim, together with the roll of Esther, 1816; "Maḥzor," a commentary on the festival prayers, together with the text and a German translation by Prosper d'Alsace, in 9 vols., 1817; "Derush le-Bar Miẓwah" (Lecture for a Confirmee), with a German translation by Prosper d'Alsace, 1819; "Seliḥot," a commentary on the penitential prayers, together with the text, 1822.

In addition, Büdinger reedited the ethical work of Isaac Aboab, "Menorah ha-Maor," with the Hebrew commentary, "Nefesh Yehudah," and a

Judæo-German translation by Moses Frankfurter, Metz, 1769.

BÜDINGER, MOSES MORDECAI: German educator; born at Maidorf, a village in Hessen, Jan., 1783; died at Cassel Jan. 31, 1841. At the age of twenty he became a servant in the house of a petty Jewish merchant, and later, by dint of indefatigable zeal, became shoḥet, ḥazan, and religious teacher in a small congregation. After making the necessary preparatory studies during his four years' residence in Naumburg, where he was private teacher, he went to the University of Marburg. In 1820 he became tutor in the family of the court banker Kaulla, in Stuttgart. From 1824 he occupied with great distinction the position of principal teacher of the Jewish pedagogical seminary at Cassel. Büdinger was also a prominent preacher, and very often delivered lectures in the little synagogue attached to the seminary, on moral and religious subjects. In 1830 the philosophical faculty of the University of Marburg gave him the degree Ph.D. for his "Leitfaden beim Unterrichte der Religion." The government rewarded him by appointing him member of the "Landrabbinat." His only son was the historian Max Büdinger.

Büdinger's first work was "Derek Emunah, oder die Kleine Bibel" (1823), which was introduced as a text-book in many schools. Of his numerous sermons and addresses may be mentioned "Zehn Geistliche Reden" (Stuttgart, 1821).

(After a photograph.)

BUDNY, SIMON: Calvinist priest of Lithuania in the sixteenth century; founder of the Polish sect of the Budnians, who were surnamed "Half-Jews" ("Semi-Judaizantes"). He studied at the Academy of Cracow, where he became acquainted with some of the disciples of Socinus, Blandrata, and other Unitarians, who, being outlawed by Catholics and Reformers alike, had found shelter in Poland, where they could live and speak freely. Budny was invited by Prince Nicholas Radziwill in 1562 to take the place of pastor in the newly built Calvinist church at Kleck. Here he began his Polish translation of the Bible, which was published in Nieswicz in 1572. He then turned to the Socinians, and was one of their most ardent missionaries in Lithuania.

Budny associated much with Jewish scholars, and was a great friend of the Jews. He was somewhat familiar with the Hebrew language and literature. Hezekiah David Abulafia mentions him in his work "Ben Zeḳunim" in the following words: "There is another wise man, by the name of Simon Budny, who praises the Talmud very much and considers it to be the best work of all literatures."

The exact date of Budny's death is unknown; but he died before Faustus Socinus—according to Grätz in 1584. His works are very rare, the Catholics having collected and burned all that they could obtain.

H. R.

BUDUSHCHNOST ("The Future"): Russo-Jewish weekly, established (1900) and edited by S. O. Gruzenberg. Like the "Voskhod," it gives valuable information concerning the history of the Jews and their social life and institutions; but while the former periodical is in favor of assimilation, the latter is of a Zionistic tendency. Most of the leading Zionist writers of Russia are among its contributors. The "Budushchnost" publishes a "sbornik," or literary annual, as a supplement.

H. R. M. R.

BUDWEIS: City of Bohemia. Jews were settled there in the first half of the fourteenth century, possibly earlier. In 1337 the community was destroyed by the Flagellants. In 1341 King John I. of Bohemia again admitted two Jews, who were granted remission of taxes for a period of ten years. They were compelled, however, to pay an impost to the city, which was set apart to cancel its debts to foreign Jews. They also erected a synagogue, which fact shows that many other Jews joined them. In 1390 a Jews' quarter ("vicus Judæorum") is mentioned; it was situated close to the parsonage, because the Jews, on account of their financial and commercial importance, had to be near the authorities.

A responsum concerning the Jews of Budweis is recorded in the fifteenth century. In 1506, Jews were expelled from Budweis, and were not permitted even to visit the annual fairs. Hence the "persecutions in Budweis" in 1505, during which thirteen Jewish women drowned themselves, and those of 1564, which are mentioned in the Nachod "Memorbuch," can not refer to the Bohemian city of Budweis.

Since 1848, Jews have again lived at Budweis, and they have had an incorporated congregation since 1859. The cemetery was laid out in 1866; the synagogue (see p. 421), a building in the pointed style of architecture, was built by Max Fleischer of Vienna. There is also an organization of Jewish artisans in the city. The district rabbi is (1902) Adam Wunder. The nineteen communities of the district of Budweis include 252 families, numbering 1,263 persons.

D. A. F.

BUENA ESPÉRANZA, LA ("The Good Hope"): Title of a Jewish weekly, published in Judæo-Spanish and in rabbinic characters at Smyrna since 1874. It first appeared under the name "La Esperanza." Aaron de Joseph Ḥazan has been its editor from the beginning.

G. M. Fr.

BUENO (BONUS): Family of Spanish origin, members of which, including many physicians and scholars, have settled in southern France, Italy, Holland, England, and America, as well as in the Orient.

Abraham Bueno: Physician in Amsterdam, where he died in 1633.

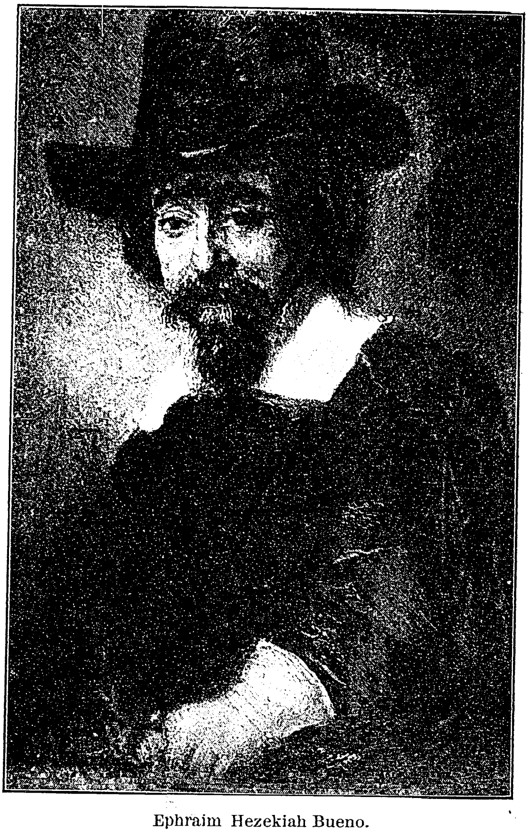
Benjamin Bueno de Mesquita: Died in New York, Nov., 1683. The monument erected to his memory is one of the oldest in that city ("Publications Am. Jew. Hist. Soc." i. 91 *et seq.*).

David Bueno: Lived at Leghorn in the seventeenth century. He was wealthy and fostered Jewish science. He directed that Solomon Adret's collection of responsa ("Toledot Adam") be printed at his own expense at Leghorn in 1657, but died at an advanced age before the work was completed.

David Bueno de Mesquita: Lived in Amsterdam in the seventeenth century. He was the husband of a granddaughter of Francisco Fernandez de Mora. He was the "resident" of Duke Christian Ernst of Brandenburg-Bayreuth, and in 1684 served as agent-general of the dukes of Brunswick-Lüneburg (De Barrios, "Aumento de Israel," p. 172).

David ben Raphael Ḥayyim Bueno: Editor in Venice from 1704 to 1732.

Ephraim Hezekiah Bueno: Died at Amsterdam Nov. 8, 1665; son of Joseph Bueno. According to the inscription placed beneath a portrait of him painted by Rembrandt about 1647 and engraved by Lyrius, he was "Alter Avenzoar, magnus in medicis, magni discipulus patris" (a second Avenzoar, a distinguished physician and pupil of his celebrated father). In 1650, in conjunction with Jonah Abravanel, he published several liturgical works, among which were a Spanish translation of the Psalms, entitled "Psalterio de David, en Hebrayco Dicho Thehylim, Transladado con Toda Fidelidad Verbo de Verbo del Hebrayco," Amsterdam, 1650, and "Pene Rabbah" (1628), the first work of Manasseh ben



Ephraim Hezekiah Bueno.
(From Rembrandt's painting of the "Jewish Doctor.")

Israel, with whom he, as well as his father, was on terms of intimate friendship.

In 1656 Bueno, together with the pious and charitable Abraham Pereira, founded the scientific society "Torah Or" in Amsterdam.

Isaac Bueno: Ḥakam in Jerusalem about 1685. He was the author of dialectal notes on the codes Oraḥ Ḥayyim and Yoreh De'ah, entitled "Shulḥan Melakim" (The Kings' Table; Azulai, "Shem ha-Gedolim," *s.v.*).

Jacob Bueno: Physician; died at Amsterdam in 1661; probably a son of Abraham Bueno.

Joseph Bueno: Physician; died at Amsterdam Aug. 8, 1641; father of Ephraim Bueno. After having received his degree of doctor of medicine in Bordeaux, he went to Amsterdam some time before 1625. In that year this "new Jewish physician," as the French ambassador D'Espesses states, was summoned to the sick-bed of Prince Maurice of Orange. "The Jewish physician," he continues, "Joseph Bueno, has made the prince of Orange take some powders, and will not allow any one to despair of his life." But Bueno had been deceived in his hopes, for the prince died April 23, 1625.

According to Daniel Levi de Barrios, Bueno was also a poet, and celebrated the "Conciliador" of his friend Manasseh ben Israel in a Spanish sonnet. Sarah, Bueno's wife, died May 15 (not 25), 1654.

Joseph Bueno: Poet; lived in Amsterdam in the seventeenth century. In the martyrology entitled "Elogios que Zelosos Dedicaron," etc., he celebrated the martyr Bernal, who was burned at Cordova May 3, 1655. From the fact that this composition was of the kind known as a "silva," Wolf ("Bibl. Hebr." iii. 385) and Steinschneider ("Hebr. Bibl." iv. 91) have erroneously called him "Bueno Silva."

Joseph Bueno: Went, probably from London, to New York about 1680. In the latter city he became a highly respected merchant, and in 1681 purchased land for a Jewish cemetery ("Publications of the Am. Jew. Hist. Soc." i. 91, ii. 81 *et seq.*, 85 *et seq.*).

Joseph Bueno de Mesquita: Rabbi in the Orient; mentioned by Samuel Ẓarfati in his "Nimuḳe Shemuel" (Nepi-Ghirondi, "Toledot Gedole Yisrael," p. 168).

Joseph Morenu Bueno: Physician in Amsterdam. He possessed extraordinary talent, and died at the early age of twenty, Sept. 16, 1669.

Samuel Bueno: A contemporary of Solomon Alkabeẓ, and, like him, devoted to the study of mysticism; lived in Safed, Palestine, about 1550.

Solomon Bueno: Physician in Amsterdam, where he died 1681.

Solomon ben Jacob Bueno: Editor in Cremona, Italy, in 1576.

BUENOS AYRES. See South America.

BUFFALO: A name common to different species of *Bovidæ*. The best known is the *Bubalus buffelus*, or *Bos bubalus*, generally called in Eastern countries *jamoos* or *chamoosh*, a word of Persian origin, meaning "ram-cow." From India, its native home, the buffalo has been gradually introduced into western Asia, Greece, southern Italy, and northern Africa. Some writers have tried to identify the buffalo with the "re'em" (ראם) of the Bible, and Gesenius ("Thesaurus," p. 1249) was one of them. This theory of identity, however, is now generally abandoned. The re'em appears to have been a much wilder animal, an animal utterly impossible to domesticate (Job xxxix. 9–12). Besides it seems established that the buffalo was not introduced into western Asia until shortly before the common era. Hence the re'em, identical with the Assyrian "rimu," is now generally regarded as the wild ox of the mountain.

BUFFALO: The second city in New York state. Its first connection with the history of the Jews occurred in 1825, when Mordecai M. Noah laid the corner-stone of his projected city of Ararat in one of its churches.

Though a flourishing city of over 15,000 inhabitants, Buffalo in 1835 contained but one Jew, named Flersheim, from Frankfort-on-the-Main; he gave private instruction in German.

The earliest Jewish arrivals were German, and one Englishman. The first attempt at a religious organization was the holding of the Passover services, in the spring of 1847, in Concert Hall, on the southwest corner of Main and Swan streets. On Oct. 3, in the same year, the Jacobsohn Society was organized; it disbanded five years later. The society purchased a piece of land for burial purposes on Fillmore avenue, which has been unused since 1861.

First Congregation, Beth-El.

In 1847 the first congregation, Beth-El, was established, under the presidency of Mark Moritz, and had as its reader the Rev. Isaac M. Slatky. Services were held for more than two years on the third floor of the Hoyt Building, at the corner of Main and Eagle streets. In 1850 this congregation bought a schoolhouse on Pearl street, near Eagle, which it converted into a synagogue, and dedicated July 22 of the same year. In 1874 this congregation, which uses the Polish liturgy, built its own synagogue, which it still occupies.

New Temple.

The German element in Buffalo organized in Nov., 1850, the Beth Zion congregation, which found great difficulty in maintaining itself, but continued to exist until 1864, when it merged into the newly established Reform congregation. In 1863 a number of Jews requested the Rev. Isaac M. Wise of Cincinnati to send them a minister to conduct the services of the New-Year and the Day of Atonement according to the Reformed liturgy. These services were held in Kremlin Hall. The following year, at a meeting held (Oct. 9) in Kremlin Hall, at which Leopold Kaiser presided, the congregation Temple Beth Zion was organized. A year after its organization the congregation purchased for its place of worship a Methodist church in Niagara street. This building was dedicated May 25, 1865, and the Rev. I. N. Cohn was elected minister. He was succeeded in 1866 by the Rev. Samson Falk, who continued his ministration until his death, Dec. 24, 1886.

The congregation called as his successor Rabbi Israel Aaron, D.D., then at Fort Wayne, Ind., who was installed May 1, 1887. During his incumbency a new and more commodious temple was erected on Delaware avenue.

The influence of this congregation in promoting fellowship among the religious bodies of Buffalo has been very great. Upon the walls of the temple are tablets recording the sentiments of Episcopalians and Baptists. Its minister has been invited to preach in most of the principal churches of the city.

The educational and social-settlement work of the congregation is managed by the Sisterhood of Zion, founded in April, 1891, by Dr. I. Aaron. This body of women owns, free of debt, Zion House, a busy center in the heart of that section of the city inhabited by Russian Jews.

Russian Jews at Buffalo.

There is a large colony of Russian Jews in Buffalo, who own five synagogues. Among their rabbis have been several Hebrew scholars and writers of note; *e.g.*, Rev. Harry Singer, author of "Sefer Zikkaron basefer," published in Wilna.

There are a number of benevolent societies in Buffalo, but the chief work is under the efficient supervision of the Hebrew Board of Charities, which represents several organizations, and receives into its treasury nearly all funds for the relief of the poor.

Buffalo is associated with Rochester and Syracuse in the support of the Jewish Orphan Asylum of western New York, situated at Rochester.

The Union of American Hebrew Congregations held its second council in Buffalo in 1875, at which it was finally determined to open a Hebrew Union College. In 1900 the Central Conference of American Rabbis met in Buffalo.

The present (1902) Jewish population is estimated at 7,000. Among the Jews of Buffalo who have held public positions are R. Wolfsohn, United States consul at Mannheim; Hon. Louis W. Marcus, judge of the surrogate court; and Simon Fleischmann, president of the common council.

A. I. AA.

BUK: Town in Prussia, province of Posen, which, after the second partition of Poland, in 1793, passed under Prussian rule. Jews then began to settle in the place, which, as an old episcopal town, had hitherto excluded them. By 1820 many Jews were living there. The Ḥebrah Ḳaddishah Gomle Ḥasidim, an association for nursing and burial which is still flourishing, was founded in that year. The synagogue was built in 1846-47.

The year 1848 was disastrous to the Jews of Buk. Their synagogue was almost completely demolished during an uprising of the Poles, and several Jews were killed. After order was restored, the synagogue was renovated, and in 1894 it was entirely rebuilt.

At present (1902) there are about 250 Jews in Buk.

D. M. L. B.

BUKKI: **1.** Son of Jogli, prince of the tribe of Dan, who represented his tribe in the division of the land (Num. xxxiv. 22). **2.** Son of Abishua' and father of Uzzi, a priest, the fourth in line from Aaron (I Chron. v. 31), and ancestor of Ezra (Ezra vii. 4). In the Apocrypha his name is given as **Boccas** (I Esd. viii. 2) and **Borith** (II Esd. i. 2).

J. JR. G. B. L.

BUKOWINA. See GALICIA, CZERNOWITZ, RADAUTZ, SERETH, SUCZAWA.

BUL: The name of the month in which the building of Solomon's Temple was completed, as mentioned in I Kings vi. 38. It would seem that at the time of the writing of that passage the name was obsolete; for the writer found it necessary to define "Bul" as the eighth month. The name is Canaanitish, occurring in the Phenician inscriptions, on the Eshmunazar tablet ("C. I. S." i. 3, line 1), on an inscription from Cyprus (*ib.* i. 10, line 1), and on one from Idalium (*ib.* i. 90, line 2). It was adopted by the Israelites on their entrance into Canaan, and was retained by them during preexilic days. In post-exilic times בול, along with the names of three other months, "Ziv" (I Kings vi. 37), "Abib" (Ex. xiii. 4, xxiii. 15; Deut. xvi. 1), and "Etanim" (I Kings viii. 2), was supplanted by the names current in Babylonia, and "Bul" became "Ḥeshwan." This could only have been an approximation, however; for the old calendar of the Canaanites was solar and was adapted to an agricultural people, whereas the Assyrian calendar was lunar, with compensations to harmonize with the solar year.

The etymology of the word is still in doubt. The Septuagint simply transliterates Βαάλ. The Targum attempts an etymology in its translation מיסף אבביא ("destroying the crops"), pointing clearly to the root נבל ("to destroy"). This derivation is also given by the Rabbis (Yer. R. H. i. 56d): "The month in which the leaf is destroyed and the earth becomes full of clods," referring to the great rains in that month. A somewhat fanciful explanation fastens on בלל ("to provide"; Judges xix. 21). "It is the month in which they provide food for the cattle from the house" (Tan., Noaḥ, 11), the fields being waste.

BULAN: King of the Chazars, who in 620 embraced Judaism. Joseph, "Chaghan" (king) of the Chazars, in answer to a letter from Ḥasdai ibn Shaprut (960), informs him that 340 years earlier one of his ancestors, Bulan, became ruler of the Chazars. To him the Lord appeared in a dream, promising him might and glory. Bulan went by the Daralan road (Caucasus) to Aradavil (Ardebil), the capital of Adherbaijan in Armenia, and gained great victories. He then determined to adopt the Jewish religion. The Byzantine emperor and the calif of Ismael each sent to him deputations with valuable presents and wise men versed in religious matters to convert him to their respective religions. Bulan summoned wise men of Israel also, and examined them all. As both the representatives of the religion of the Nazarene and those of Islam referred to Judaism as the foundation of their faiths, Bulan declared that they, the opponents of Judaism, had themselves made an impartial avowal of the excellence of the Jewish religion; and he therefore accepted it. See CHAZARS.

BULAT (בולאט), ABRAHAM IBN: Talmudic scholar; lived in Spain in the fifteenth century. He was the disciple of Isaac de Leon, and in a vigorous dispute of the latter with Isaac Gayyal concerning a halakic decision, Balat took the part of his master and wrote a booklet demonstrating that Gayyal's decision was against the law. This booklet was published, together with the arguments of Isaac de Leon and Isaac Gayyal, in the miscellany "Shib'a 'Enayim" by Jacob London and Abraham Meldola (Leghorn, 1745).

L. G. I. BR.

BULAT (בולאט), JUDAH BEN JOSEPH IBN: Spanish Talmudist and rabbi; born at the end of the fifteenth century at Estella, Navarre; died probably at Constantinople about 1550. He was the author of "Kelal Ḳazer mi-Kol ha-Rashum Beketab" (Short Abstract of All That Has Been Published), containing a short compendium of rabbinic theology, Halakah, morals, ethics, jurisprudence, and political science. The book appeared in manuscript at Constantinople in 1530, and could be obtained from the author only for a limited time, on the payment of one florin as a fee for perusal. At present, also, the work is rare. Besides, Bulat published the Talmud methodology "Halikot 'Olam" of Joshua ben Joseph (Constantinople, 1510). Tam ibn Yaḥyah, in his work "Tummat Yesharim," and Elijah Mizraḥi, in his responsa, both colleagues of Bulat at Constantinople, cite some of his responsa.

Bulat, possessing a thorough knowledge of the Talmud, depth of thought, and excellent judgment, opened up new methods in Talmudic study. He became aware of the fact that the method of Talmud interpretation practised by some of his contemporaries was contradictory to the real meaning of the Talmud. It was their custom to regard every opinion, even every sentence, in the Talmud as a binding rule; and they went so far as to look upon every "poseḳ" (post-Talmudic Halakah) in the same way. Consequently, a vast number of new "ḥumrot" (intensifications of the Law) continued to be introduced; and it was considered a duty of the pious to refrain from acts tabooed by their predecessors, though only by a few of them.

Similarly, the theoretical opinions of earlier Talmud commentators were studied in a receptive, uncritical spirit. Bulat, however, returned to the Talmud itself. He distinguished between the decisions arrived at in the Talmud, that should be regarded as standard, and the opinions of individuals, which might be disregarded. He sought for the true meaning, the motives and aims of the Talmudic controversies and Halakot; and he considered needless intensifications of the Law, especially in marital and juridical questions, as criminal. He maintained that whoever was unable to find in the Talmud a true solution of new circumstances, by means of logic and analogy, was not worthy to work in the province of Halakah; and that investigations into the meaning of "poskim" as a rule lead to nothing. "Many times," said Bulat, "the reader is perplexed because of the disagreement between the various writers; and often the different parts of a poseḳ contradict one another, thus perplexing and completely bewildering the reader. For this reason the true rendering of the text must be sought in the original source" במקוך התחלתו ("Tummat Yesharim," No. 34).

It was natural that in his endeavor to carry his views into practise he should meet with the opposition of his colleagues at Constantinople (*ib.* No. 39). Nevertheless, even his opponents respected him; and one of them, Tam ibn Yaḥyah, used to address him with the most flattering epithets (*ib.* Nos. 35, 38).

BIBLIOGRAPHY: Conforte, *Ḳore ha-Dorot*, pp. 33*a*, 34*a*; Azulai, *Shem ha-Gedolim*, p. 64; Steinschneider, *Cat. L. G. I. BER.

BULGARIA: Principality of southeastern Europe, under the suzerainty of Turkey. According to Josephus ("Ant." xxii.) and Belloguet ("Les Cimérieux," p. 24) the Jews knew of Mœsia (old name for the Balkan peninsula) at a very early age. But the first Jewish community of Bulgaria was founded at Nicopolis under Trajan, after the victories gained over the Dacians. The Bulgarian czar Krum brought some Jews among the 30,000 prisoners carried away from Thessaly in 811. A large number of Byzantine Jews established themselves in Bulgaria in 967, at Nicopolis, Widdin, Silistria, and Sofia (compare Solomon Abraham Cohen,

Early Jewish Settlements.

Responsa, Leghorn, 1592). The rabbinical authors called them Romanim Jews. They preserved their Greek customs, one of these being to choose a chief rabbi from without their own city, and another to close their shops on the day of a burial; this latter custom having been observed until the year 1720 ("Mayim Rabbim," Amsterdam, 1637).

In 1189 the two brothers Assen and Peter founded the Bulgarian kingdom, this being the second foundation. They entered into relations with Venice, Ragusa, and Geneva. As the majority of the merchants in these cities were Jews, offices were established by them (according to Ubicini, "Provinces Danubiennes") in the ports of Bulgaria on the Danube, especially at Widdin. Under the czar Assen II. (1218–41), the successor of Assen I., the number of Jews increased. The pope in a letter to Bela IV., king of Hungary (1238), complains that the above-mentioned czar received heretics into his dominions (Gh. Sincat, "Cronica Romanilou," p. 262, Jassy, 1853). The Tatars invaded Bulgaria about 1290, under their chief, Khan Tchoca, who was killed by a Jew at the siege of Tirnova. Muralt (ii. 402) places this event in 1293, other historians, as Hammer-Purgstall ("Goldene Horde"), in 1299. An anonymous work, printed by R. Jonah of Constantinople in 1743, mentions the communities at Philippopolis (1344), at Zagora (1344), and at Nicopolis and Silistria (1377), as existing at the time when Bulgaria fell into the hands of the Turks. When Czar Ivan Alexander came to the throne, in 1330, he was a widower, and father of two children, Michel-Assen and Dobritch. The following year he married his second wife, the daughter of a woyewode, by whom he had one son, Ivan Strachenir. After a time he repudiated this wife, and married in 1335 a beautiful Jewess of Tirnova, Sara by name, who was converted to Christianity (Jirecek, "Gesch. der Bulgaren," p. 312, Prague, 1876).

The Jewish Czarina.

The new czarina received the name of Theodora or "Newly Enlightened Czarina and Sole Support of all the Bulgarians and Greeks." Gifted with a remarkable intelligence, according to the historians, she aided the czar in all affairs of state. But when Ivan Alexander grew old, Theodora, wishing to secure the future of her children, Ivan Chichman and Tamar (or Mara or Marie), divided the kingdom in 1355, Ivan Chichman receiving one part, with Tirnova as the capital, Dobritch receiving the Dobroudja, and Strachenir the province of Bdin or Widdin. Thus Theodora, moved by maternal sentiment, made the mistake of enfeebling the land by dividing it. Ivan Chichman, the son of the Jewess, succeeded his father in 1346, and in 1367 he hospitably received the Jews who had been driven from Hungary and had settled at Nicopolis, Plevna, and Widdin. Mention is made of R. Shalom of Neustadt, who settled at Widdin. The community of Sofia, formerly called Stredetz, and founded by Byzantine Jews at the end of the tenth century, erected a synagogue, which is still known under the name "Kahal de los Gregos." Ashkenazic Jews established themselves at Sofia in 1360. The Bulgarian Jews were then divided into the following four rituals: (1) Bulgarian Jews properly so called; (2) Italian Jews from Venice; (3) Roman or Byzantine Jews; and (4) Ashkenazim, of German origin.

It appears that after the death of Ivan Chichman a reaction was felt against the Jews of Tirnova, which led to their emigration to Nicopolis. The Spanish Jews who arrived in that city in 1492 found there a Jewish community, having at its head Ḥayyim b. Albalgui or Albalgri (the Bulgarian). Among the immigrants were Ephraim Caro and his son Joseph, from Toledo; the latter married the daughter of this rabbi, and later became famous by his work, the Shulḥan 'Aruk. Widdin is also an ancient settlement, judging from a manuscript of the beginning of the fifteenth century, entitled "Perush we-Tosafot," by R. Dossa b. Moses of Widdin. Bazarjik, or Tatar Bazarjik, received its first Jewish settlement about 1500, with the arrival of some Spanish refugees, Aobi being its first rabbi.

The Russo-Turkish War.

Under Turkish rule the Jews of Bulgaria were little known; all Jewish life seems to have centered in the communities of Constantinople, Salonica, Smyrna, and Adrianople. All that is known is that from time to time they were severely oppressed by rapacious Turkish officials as well as by the Greeks. During the next three centuries and a half (1500–1876) the only distinguished Jewish name is that of Joseph Caro. It was not until the Russo-Turkish war of 1877–78 that the Jews of Bulgaria came into notice. Goaded by the insolence of the peasantry who were in rebellion against the sultan, they did not know whether to favor the movement for the emancipation of Bulgaria or to remain faithful to the Turks. Their hesitation cost them much suffering. As soon as the Russian forces appeared before a town, the Bulgarians would denounce the Jews as hostile, and would set about to punish them. They were expelled in a body from Kezanlik, Zagora, Widdin, Shipka, and elsewhere, plundered of all their property, and forced to take to the road under miserable conditions. Their sufferings aroused a cry of horror throughout Europe, reaching even to America (see "Bulletins" of the Alliance Israélite Universelle); thousands took refuge in Constantinople, where their needs were looked after through the munificence of Baron Maurice de Hirsch.

Upon the close of the war the Jews of Bulgaria enjoyed comparative repose for the space of fourteen years (1878–92). In 1877, when the Turks set fire to the city of Sofia, it was the Jews and Jewesses, according to Bianconi ("Carte Commerciale de la Bulgarie," p. 12, published by Chaix, Paris), who fought the flames, and, armed with whatever weapon came to hand, beat off the soldiers employed in setting fire to the buildings. Thus the Bulgarian capital owed its preservation to its Jewish inhabitants, and, in recognition of their bravery, Prince Alexander decreed in 1879 that the fire-brigade should be chosen exclusively from Jewish citizens; and on all occasions of reviews, processions, etc., the Jewish firemen have the place of honor next to the picked troops of the Bulgarian army. When, in 1885, Bulgaria was waging war against Servia, the Bulgarian Jews distinguished themselves so highly in the battles of Pirot and Slivnitza that Prince Alexander publicly thanked them, calling them "true descendants of the ancient Maccabees."

Present Condition.

The Bulgarian constitution accords all civil rights to Jews, in obedience to the Treaty of Berlin (1878). They are electors, are eligible to office, and are to be represented in every municipality by one or two members. They may become members of the Sobranje (Chamber of Deputies). They are subject to military service and have the right of military promotion. Each Jewish community is governed by its "synagogal committee," which levies a tax upon each individual. From this revenue, together with the voluntary offerings of the faithful, the committee, whose members serve three years and are officially recognized by the prince, provide for all the communal expenses as well as for the maintenance of Jewish schools. The liberality of the new constitution was at once received with enthusiasm by the Jews. Three graduates of the military school of Sofia attained the rank of major. They are Mochonoff Garté of Philippopolis, Moréno Graziani of Shumla, and Behdjet, or Behdjetoff, of Rustchuk; the last has recently resigned his commission.

Since 1890, however, anti-Semitism has made its appearance in Bulgaria, so that both elementary and high schools have become almost closed to Jews by reason of the hostility of the Christian students. M. Gabbé, a certain large landed proprietor, was elected to the Chamber of Deputies, whereupon his Christian colleagues made their utmost endeavors to invalidate the election because of his Jewish race. An accusation of murder for ritual purposes was made against the Jews of Wratza in 1891, but the jurist Stoïloff (later minister), proved their innocence ("Bulletins" of the Alliance Israélite Universelle). Anti-Semitism has developed to such an extent in Bulgaria that the Jews are now emigrating in large numbers to Turkey in Asia.

Literature.

The Jews of Bulgaria have not contributed to the national literature; they have written nothing in the Bulgarian language up to the present time (1902). They have four journals: one, which might be called peripatetic, "El Amigo del Pueblo," is published alternately at Sofia and at Rustchuk; the others are: "El Eko Judaico," "La Verdad," and "Ha-Shofar." A Judæo-Spanish journal, "El Dia," was published at Philippopolis in 1897, and a Judæo-Spanish review, "La Alborada," at Rustchuk in the same year. A Jewish journal in the Bulgarian language appeared for the first time at Philippopolis for some months in 1899, under the name "Tcheweschky-Prava" (The Rights of Man). The Alliance Israélite Universelle has fifteen schools in Bulgaria, nine for boys, with 2,235 pupils, and six for girls, with 1,760. From the year 1886 the Jews of Sofia evinced the desire to be worthily represented in the person of their chief rabbi, and, no longer content with a simple Talmudist, more or less learned in rabbinical matters, they called Dr. Dankowitz that year to be their spiritual head, a widely read scholar, linguist, and possessor of administrative capacity. He warmly defended the interests of his constituents with word and pen, particularly in the Wratza affair; but, owing to the machinations of some of his flock, he resigned in 1889. In 1891 Dr. Moritz Grünwald was called from Jung-Bunzlau in Bohemia, and remained until 1895, when he died while on a visit to London. Grünwald instituted pastoral tours, visiting the Jewish communities in turn over the entire country. Since 1890 the Jews of Bulgaria, on account of communal dissensions, political troubles, and possibly the Zionistic agitation, have been without any chief rabbi or official defender, until quite recently, when Dr. Ehrenpreis was appointed to the position.

Industries.

Until 1880 the Jews of Bulgaria, like those of other portions of Turkey, occupied themselves exclusively with trading; but since the foundation of trade-schools by the Alliance Israélite, there have been among them carpenters, blacksmiths, coppersmiths, typesetters, leather-workers, and furriers. The most prominent Jewish families of Bulgaria are those of Présénté at Bourgas, Davitchon Levi at Sofia, and Canété at Rustchuk.

Population.

In a total population of three and a half million inhabitants there are 30,000 Jews, and these are divided into thirty-five communities, nearly all of which observe the Sephardic ritual. Some cities, among them Sofia, Rustchuk, Philippopolis, Varna, Widdin, and Bourgas, have, in addition to the Sephardic community, also a small group of Ashkenazic Jews. Following is an exact list of the places in Bulgaria inhabited by Jews, and the Jewish population of each: Aïthos, 45 Jews; Bercootza, 250; Bourgas, 550; Bazarjik (Tatar), 1,700; Carlova, 200; Carnabat, 400; Dobritz, 200; Dubnitza, 1,100; Ferdinand, 160; Haskovo, 465; Kustendil, 1,000; Kezanlik, 200; Lom-Palanka, 325; Nova-Zagora, 180; Novi-Bazar, 20; Nicopolis, 150; Philippopolis, 3,075; Pleven or Plevna, 405; Pravady, 250; Rasgrad, 200; Rustchuk, 3,000; Shumla, 1,000; Sistov (Svitchov), 135; Silistria, 280; Slivno, 225; Samakoff, 1,350; Stanimaka, 140; Sofia, 8,000; Stara-Zagora, 520; Tchirpan, 200; Tozztrakan, 50; Varna, 1,050; Widdin, 1,950; Wratza, 75; Yambol, 1,010. Total, 29,860.

BULL. See OX.

BULL WORSHIP AMONG ANCIENT HEBREWS. See CALF, GOLDEN.

BULLOCK. See CATTLE.

BULLS, PAPAL, CONCERNING JEWS. See POPES.

BULRUSH: A rush or reed. The term "bulrush" in the Bible occurs once as a translation for "agmon" (Isa. lviii. 5) and twice for "gome" (Ex. ii. 3; Isa. xviii. 15). Both of these words occur elsewhere in the Bible, where they are translated "rush." Both in Hebrew and in English the words "bulrush" and "rush" seem to be used interchangeably. According to Isa. lviii. 5, bulrushes grew quite high and had a large flower that, because of its weight, drooped over. The plant was peculiar to swampy places (Isa. xxxv. 7; Job viii. 11). By this description any one of the water-rushes might be meant, but the *Typha elephantina* comes nearest to it. The ancients put bulrushes to various uses. They made boxes (Ex. ii. 3) and even boats of them (Isa. xviii. 2). The bulrush was naturally used as fuel (Job xli. 12); and it would appear that it was used as a piercing-tool (Job xl. 26). See Reeds.

BULWARK. See War.

BUN: As a personal prenomen this name is a dialectic abridgment of "Abun" ("Abin," "Rabin"; see Jastrow, "Dictionary," 147a; compare Pesiḳ. xxx. 192b; Yer. Ḥag. i. 76c; Yer. Suk. v. 55d), and appears exclusively in Palestinian literary sources (Yer. Ter. viii. 45c; Yer. Pes. iii. 29d; Yer. Sheḳ. iv. 48b; Yer. Yeb. iii. 4c). Several amoraim so cited are mentioned under the full name as it appears in the Babylonian Talmud (see, for example, Abin b. Ḥiyya, Abin b. Kahana); and a Palestinian scholar of the fourth century is cited once under the name of "Bun b. Bisna" (Yer. Yeb. iv. 7b), and once (*ib.* i. 2d) under that of "Abun b. Bizna."

J. SR. S. M.

BUNNEY, EDMUND: English preacher and Hebrew scholar; born at Vache, near Chalfont, St. Giles, Buckinghamshire, in 1540; died at Carwood, Yorkshire, Feb. 26, 1618 or 1619. He was made prebendary of Oxgate, St. Paul's, London, in 1564; and in 1565 master of arts of Oxford, and in the same year a fellow of Merton College. At Bolton Percy Rectory he was made subdean; but after 1579 he turned itinerant preacher. His principal works are: "The Whole Summe of Christian Religion," 1576; "The Scepter of Judah; or, What Manner of Government It Was That unto the Commonwealth or Church of Israel Was by the Will of God Appointed," 1584; "The Coronation of David: Wherein Out of That Part of the Historie of David That Showeth How He Came to the Kingdome Wee Have Set Forth unto Us What Is Like to Be the End of These Troubles That Daylie Arise for the Gospel's Sake," etc., 1588. Bunney's work on the Hebrew polity was an indication of the Puritan tendencies toward a commonwealth, which were afterward to be put into practise.

BUNZLAU. See Jung-Bunzlau.

BUNZLAU (BUMSLO), MEÏR BEN EPHRAIM FISHEL (called also **Meïr Fishels** and **Meïr Fisheles**): Bohemian rabbi and Talmudist; born at Bunzlau (Jewish-German, "Bumslo"); died Nov. 23, 1770, at Prague, where he had been for forty years "rosh bet din" and director of a Talmudic academy. His works were never published, since all the manuscripts were destroyed by fire in 1754.

The epitaph of Bunzlau testifies to the unbounded love and admiration which he enjoyed among his contemporaries. In addition to his study of the Talmud he devoted himself to the Cabala, and, it is said, was also well versed in secular sciences. He was reputed to be an eminent preacher, his popularity not being confined to his own community, since his fame as a Talmudist had spread abroad. A very important decision of Bunzlau concerning the treatment of a first-born animal has been preserved in Ezekiel Landau's "Noda' be-Yehudah" (Yoreh De'ah, §§ 82 and 83). Two of his responsa in the "Noda' be-Yehudah" *l.c.* (§§ 72 and 89) testify to his humane disposition and true scholarship.

BUOL - SCHAUENSTEIN, JOHN RUDOLPH, COUNT VON: Austrian diplomat; born Nov. 21, 1763; died Feb. 12, 1834, in Vienna. He entered the diplomatic service, and was sent as ambassador to The Hague in 1790, to Basel in 1792, and finally to Dresden. In 1816 he was elected president of the Bundesrath which convened in Frankfort on Nov. 5 of that year, and evinced his liberalism by embracing the cause of the Patriots. At the outbreak of the riots against the Jews of Frankfort, Aug. 9 and 10, 1819, Buol summoned a conference of the members of the council, and called out the federal troops to protect the Jews, as the city militia could not be relied upon. As a result of his liberal views the count came in conflict with Metternich, and was recalled March 20, 1823.

D. A. R.

BURDEN OF PROOF: In law, the obligation resting upon one or other of the parties to a suit to bring proof of a fact when the opposite party alleges the contrary. The Talmudic phrase is "'alaw ha-rayah" (on him is the proof). Of course, the plaintiff who seeks to make out a case for relief states his side first; and whatever the defendant admits need not be proved. But in the jurisprudence of the Talmud there is a broad exception; for everything in the nature of a penalty ("ḳenas")—*e.g.*, the twofold, fourfold, and fivefold compensation in case of theft—can only be adjudged upon the testimony of witnesses. An acknowledgment by the defendant may be of no use, or may even result in averting the penalty. In an ordinary suit for debt, the plaintiff would first prove by witnesses, or by the production of a bond, that the defendant owes him a given sum for a loan or on a credit-sale; and the defendant would then have to produce his acquittance in writing ("shober"), or the witnesses in whose presence either the debt was repaid or the creditor acknowledged its discharge.

So far there is no difficulty. But some cases are more complex; and to these two maxims are applied: (1) "hammoẓi me-ḥabero 'alaw ha-rayah" (he who takes away from his neighbor [that is, who asks a judgment for money or property], on him is the proof), and (2) "nekasim be-ḥezḳatan" (property [abides] in its status); that is, no change in rights is presumed unless proved.

The first maxim is illustrated in a case where two of the defendant's oxen, one "forewarned" and the other "innocent," have pursued the plaintiff's ox, and one of them has killed the latter, but the witnesses can not say which of the two caused the death. It will be presumed that the "innocent" ox did it; and the plaintiff will recover only half-damages. As half-damages are paid only out of the price of the injuring animal, if both the defendant's oxen were "innocent," it will be presumed that the injury was committed by the less valuable of the two (B. Ḳ. iii. 11, where other instances of the same rule are also found).

The other maxim is illustrated where a man and his father are killed by one and the same accident, and it can not be shown who died first. The father's heirs say the son died first; the son's creditors say the father died first. According to the opinion of the school of Hillel, which prevails, the property goes to the heirs upon the ground that "property abides in its status"; though here the other maxim would lead to the like result. If a man and his wife die together, the maxim of the abiding status gives the property brought into the marriage by the wife, not assumed by the husband at a fixed value and which is still on hand, to the wife's heirs, but frees the husband's heirs from paying her jointure (B. B. ix. 8, 9).

In cases of doubt which can not be solved by these rules—for instance, where husband and wife die together, as to the disposal of the "iron flock property" (that is, such part of the dowry as the husband has converted to his own use and is personally bound for)—the only rule is, divide into halves. In such a case the husband's heirs would take one-half, and the wife's heirs one-half (see Gemara on last-cited section, 158b *et seq.*).

It will be seen that no allowance is made for circumstances that would raise a greater likelihood on behalf of one of the alternatives—*e.g.*, that the "forewarned" ox rather than the "innocent" one had done the mischief, the larger ox rather than the smaller one. And where two persons die through one and the same accident, no presumption is indulged, as in the Roman law, that the one who by age or sex had the greater power of resistance lived the longer.

Another maxim may be mentioned here. When A has no proof but B's admission for one fact, he must give B credit for such other fact as the latter chooses to couple with it. For instance (Ket. ii. 2), B says to A, "This field in my possession belonged to your father, but I bought it from him." If A has no other proof of his father's title, he must admit the purchase; for "the mouth which bound is the mouth that loosed." But if A has witnesses of his father's title, then B must bring proof of his purchase.

BURG, MENO: German military officer; was born in Berlin Oct. 9, 1789; died there Aug. 26, 1853. His father was in very poor circumstances, but his cousin, S. Sachs, had secured an official position as government building inspector, and received the boy as apprentice. In 1807 Burg was advanced to the position of field-surveyor.

At the outbreak of the Napoleonic wars, Burg wished to join the army; but his application at Breslau to serve in the Guards was refused on account of his being a Jew. His acquaintance with Prince August, however, secured for him admission to the artillery; but his desire to go to the front was not fulfilled, and he had to be content with service in the fortresses. At the end of the war he was appointed instructor at the provisional military school at Danzig; and when the school at Berlin was established, in 1817, he was transferred thither. Burg's principal subject of instruction was geometry, on which science he wrote a text-book that attained great popularity, being frequently republished and translated into many modern languages. He was promoted to a first lieutenancy, and in due course became eligible for a captaincy; but the appointment was withheld by the king, who expressed the wish that Burg should first adopt Christianity. Burg, who was supported by Prince August, demurred, and defended his course with such courage and vigor that the king finally conceded the point and sanctioned the promotion.

Burg was honored with the Medal for Merit, the Gold Medal for Art and Science, and the Order of the Red Eagle. In 1847 he became a major. During the years 1847–49 Burg was engaged in writing his autobiography, which was published in 1854 in Berlin under the title "Geschichte Meines Dienstlebens."

For a year Burg was one of the elders of the Jewish congregation in Berlin, and was active on various committees.

BURGDORF: Town in the canton of Bern, Switzerland. It contained a few Jewish inhabitants in the fourteenth century. In 1347 Simon, a Jew living there, loaned to the cathedral provost Ulrich forty pounds of pennies. On Feb. 16, 1349, the poverty-stricken Eberhard von Kiburg drove all the Jews out of Burgdorf in the night. After effecting this, "because of their wrong-doing," as he professed, he seized their possessions. In 1900 a few Jews still lived at Burgdorf, though not forming a congregation.

BURGEL (BURGIL), ELIJAH ḤAI VITA: Rabbi of Tunis; son of Nathan Burgel. He is the author of "Migdanot Natan," a work in two parts. The first part, printed with a literary production by his father (Leghorn, 1778), contains a commentary on the tractate Baba Meẓi'a and notes on several tracts of the Babylonian and Jerusalem Talmuds and on the Yad ha-Ḥazaḳah. The second part (Leghorn, 1785) contains novellæ on various treatises and a funeral oration.

L. G. M. K.

BURGEL, JOSEPH: Rabbi of Tunis; son of Elijah Ḥai Burgel; born in 1791; died at Tunis in 1857. He was the author of "Zar'a de-Yosef," on the Tosafot (Leghorn, 1849), and of "Wa-Yiḳen Yosef," various responsa (Leghorn, 1852).

L. G. M. K.

BURGEL, NATHAN BEN ABRAHAM: Rabbi at Tunis about 1750; pupil of Isaac Lumbroso. Considered a rabbinical authority, people from far and near brought him cases difficult to decide. When he was an old man he went to Jerusalem, where he died soon after his arrival, in Dec., 1791. He is the author of חק נתן, containing novellæ, explanations on the Mishnaic order Ḳodashim, of the treatise Horayot, etc. (Leghorn, 1776–78). This was reprinted in the edition of the Talmud, Wilna, 1895–97.

L. G. M. K.

BÜRGER, HUGO (pen-name of **Hugo Lubliner**): German dramatist; born in Breslau April 22, 1846; now (1902) living at Berlin. He came to Berlin at the age of twelve, and at seventeen began to produce short dramatic works, one of which, a one-act comedy entitled "Nur Nicht Romantisch" (1865), was well received. He became the proprietor of a textile establishment, and traveled in Belgium, France, and Italy, in the interest of his business. But the great success of his three-act comedy "Der Frauenadvokat" (1873) induced him to devote himself entirely to the theater. That comedy, presented on all the German stages, and the following four-act comedy, "Die Modelle des Sheridan," were published together under the title "Theater" (Berlin, 1876).

Between the years 1876 and 1891 Lubliner wrote about fifteen comedies and dramas, and was also joint author with G. v. Moser of the comedy "Glück bei Frauen" (1884), and with P. Lindau of the drama "Susanne" (1885). A collection of his dramatic works appeared in four volumes in Berlin, 1881–82. He also published two novels, under the collective title "Berlin im Kaiserreich," of which the first, "Die Gläubiger des Glücks," went through numerous editions (6th ed., Breslau, 1886), and the second, "Die Frau von Neunzehn Jahren," also appeared in Breslau (1887). Some of his best-known dramatic works are: "Die Florentiner" (1876), "Die Adoptierten" (1877), "Gabriele" (1878), "Der Jourfix" (1882), and "Die Mitbürger" (1884). Of his later productions, "Gräfin Lambach," "Gold und Eisen," "Im Spiegel," and "Der Kommende Tag" have attracted considerable attention. Lubliner's mastery of stage effects makes his plays almost uniformly successful, while his knowledge of the world, and the ability with which he exposes the weaknesses of modern social life, have added several works of lasting value to the German repertoire.

BÜRGER, SOLOMON BEN DAVID. See Borger, Solomon ben David.

BÜRGER, THEODOR (pen-name of **Daniel Pillitz**): Rabbi and preacher in Szegedin, Hungary, 1843–47. Two years after entering upon his office he published a book, "Der Talmud und die Perfectibilität des Mosaismus vom Standpunkte der Reform," in which he completely denied the authority of the Talmud. The theme of this work caused some sensation. In spite of the pen-name the authorship was at once traced to him, and he was forced to resign his office of rabbi. He left his congregation and retired to private life, after first holding memorial services for Archduke Joseph Feb. 7, 1847. In 1849 he published a prayer-book, "Andachtsstunden für Israeliten Beiderlei Geschlechtes."

Bibliography: Immanuel Löw and Sig. Kulinyi, *A Szegedi Zsidók*, p. 168.

S. L. V.

BURGLARY.—Biblical Data: In English and American law burglary is the offense of breaking into a dwelling-house at night, with the intent to commit a felony, generally with the intent to steal. The Biblical passage on the subject (Ex. xxii. 1-2 [A. V. 2-3]) reads thus: "If the thief be found breaking in ["be-Maḥteret," literally, "in the breach"] and be smitten that he die, there shall be no blood-guiltiness for him. If the sun be risen upon him, there shall be blood-guiltiness for him: he should make restitution; if he have nothing, he shall be sold for his theft."

The offense of breaking into a house at night is deemed graver than simple theft only in so far as the offender exposes himself to death at the hands of the inmates; but no greater punishment can be inflicted by the judges. Of the old Jewish versions the Septuagint renders the first half of the second verse thus: "If the sun rise upon him, he is guilty and should die in return." But Onkelos, in the spirit of the tradition, says: "If the eye of the witnesses has fallen upon him, there is blood-guiltiness." Among the commentators, Rashi, as is his usage, gives to the verse a construction found in the Mekilta and in the Talmud; but Ibn Ezra holds to the literal meaning of the text, and maintains that the word ("maḥteret") used for "breaking in," like the English word "burglary," implies breaking in at night.

The word "maḥteret" also occurs in Jer. ii. 34, where the prophet complains that he found at Jerusalem the blood of innocent poor men, killed, but not in the act of housebreaking—an indication that violent death to the housebreaker had become a common occurrence.

——**In Rabbinical Law:** The Mekilta on the passage in Exodus (Mishpaṭim xiii.) treats the shining of the sun as a mere figure of speech, signifying that it was clear as the sun that the housebreaker meant to do no harm to the inmates. The Mishnah treats of burglary among capital offenses (Sanh. viii. 6): "He who comes through the breach is judged on account of his latter end [*i.e.*, on account of what he is expected to do in the end]. If one has come through the breach and broken a jar, if there is blood-guiltiness for him, he is bound to pay damages: if not, he is free from paying them." This is ruled on

A Capital Offense.

the principle that where an act is punishable with death (though only with death at the hands of the injured party), the actor does not pay damages.

In the discussion of this Mishnah some of the Babylonian sages (Sanh. 72a) go so far as to claim that even when the burglar has carried the goods away, he can not be held to double restitution, except in the cases where the figurative light of the sun—that is, the certainty of his not intending harm to the person in the house—would raise blood-guiltiness for his death. The apparent result of the discussion is that single restitution is to be made even by the burglar, who has taken his life in his hands; that he has not "with his life" acquired the stolen goods; but at any rate he seems not to be liable to double restitution like the ordinary thief.

Proof of Intent.

As to estimating the intent of the burglar, the Gemara, by way of illustration, puts the case of the father breaking into the house of the son, where it may be taken for certain that the housebreaker would not kill the owner, even if the latter should stand up for the retention of his goods (Sanh. 72d *et seq.*). One argument for this figurative meaning of the text is drawn from the words: "If the sun rise upon him," as though the sun shone on him alone and not on all alike; hence the light cast upon him by the circumstances must be meant (Mek. *l.c.*; Sanh. 72d; Yer. Ket. iv. 28c).

The question is also raised (Sanh. 72b) whether any one other than the master of the house is justified in killing the burglar; and it is solved in the affirmative, as the text says, "and be smitten," in the passive, not defining who smote him. Also, whether there must be a breaking into the house proper, or whether coming into another man's courtyard or stable, or upon his roof, would constitute burglary; and the decision is that it would (Sanh. *l.c.*; Yer. Sanh. viii. 26c; Maimonides, "Yad," Genebah, ix. 7–12). Except Maimonides, the codifiers have taken but little trouble to clear up these points or to decide what the true Halakah is, as questions of criminal law had long ceased to be of practical value (Ṭur. Ḥoshen Mishpaṭ, 351, 2; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 425, 1, gloss).

J. SR. L. N. D.

BURGOS (בורגיש): City of Old Castile, having a long-established, large, wealthy, and cultured Jewish community up to the time of the expulsion of the Jews from Spain in 1492. It is reported that the Jews of Burgos, who as early as 1070 had made a loan to the Cid, organized a large squadron in 1123, and fought bravely against Sancho Aznar, as faithful subjects of the king of Castile (Sandoval, "Historia de los Reyes de Castilla," p. 132a, Pamplona, 1634).

The Jews of the city, "in sustentatione pauperum," were compelled to make an annual donation of two solidos and one denar to the hospice presented by the king of Castile to the church there (Florez, "España Sagrada," xxvi. 472). Special privileges, and immunities against the arbitrary acts of officials, were granted to the Jewish residents by Ferdinand III. and Alfonso X. (the Wise), and were again confirmed by D. Sancho el Bravo on April 23, 1295. The era of greatest prosperity extended from the close of the thirteenth century to the middle of the fourteenth; the taxes in 1290 amounting to 87,760, and the various other imposts to 22,161, maravedis. The Cortes assembled in this ancient diocese in 1301, 1315, and 1345 gave considerable attention to the charges of usury brought against the Jews, who were occupied as merchants, tradesmen, and mechanics.

In the civil war between King Pedro the Cruel and Henry de Trastamare, the Jews of Burgos remained faithful to the king. The story goes that when the archbishop proposed to surrender Pedro on the ground of the latter's devotion to Judaism, the Jews of the city agreed, declaring that the inclination of a Christian for Judaism is as much a defection as is the conversion of a Jew to Christianity. This story, however, is a pure invention. In reality they offered obstinate resistance to Henry de Trastamare: fortifying themselves in their quarters (Juderia), and replying to Henry, when summoned to surrender, that they could recognize no ruler other than their legitimate sovereign, for whom they were willing to sacrifice their lives (Aboab, "Nomologia," p. 290). This fidelity to the vanquished ruler met with the frank admiration of the victor Henry, who nevertheless, according to the reports of both Jewish and Christian chroniclers (Ayala, "Cronica," year 18, ch. xxxv.; Samuel Ẓarẓa in "Shebeṭ Yehudah," ed. Wiener, p. 131), imposed a fine of 50,000 doubloons, or 1,000,000 maravedis, which reduced the Jews to such extremity that they were compelled to sell the crowns and ornaments of the scrolls of the Law. Those unable to pay their contribution were sold into slavery, and all debts payable to Jews were ordered to be canceled.

On the day of the coronation of Juan I. (1379), Yusaph Pichon, the chief tax-collector of Henry II., was executed by the Jews as a "malshin" (slanderer). The king, whose authorization had been surreptitiously obtained, was incensed at this act, and ordered the death of the Jewish executioners, Zulema and Zag, as well as of the "Merino Rabbi Mayor [chief rabbi] de la Juderia Burgalesa." This unauthorized act on the part of the Jews produced a very bad impression over all Castile, and was used to good effect by Ferrand Martinez, archbishop of Ecija. In the same year the king ordered that, on payment of a stipulated sum, the Jews of Burgos were to be relieved from the obligation of gratuitously furnishing raiment and bedding to the court.

During the great persecution of 1391 the Jews of Burgos were subjected to much suffering; among those who accepted baptism on that occasion was the rich and scholarly Solomo ha-Levi, who, as Paul de Burgos, or de S. Maria, became primate of Spain and an arch-enemy of the Jews. Burgos was the birthplace of Abner de Valladolid, or de Burgos. The community, once so rich and great, sank into ever greater poverty, so that in 1474 it was capable of paying only 700 maravedis in taxes; the wealthiest resident at that time being R. Ephraim, who left the country in 1492. There was a famous scroll of the Law at Burgos, to which pilgrimages were made ("Jew. Quart. Rev." xiii. 257).

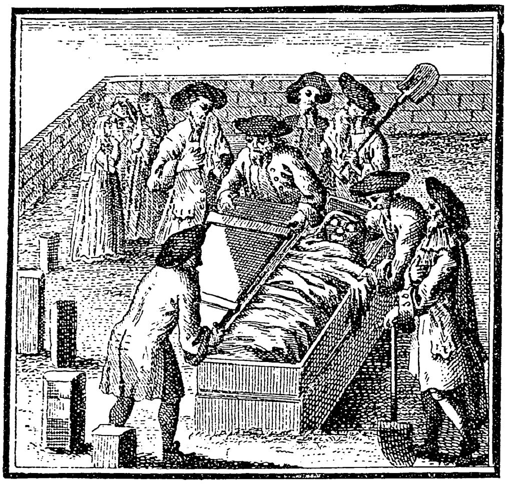
BURGUNDY. See France.

BURIAL: Placing the corpse in the earth or in caves of the rock, the chief modes adhered to by the Jewish people of disposing of the dead (Gen. xxiii. 19, xxv. 9, xxxv. 8, xlix. 29 *et seq.*; Deut. xxxiv. 6; Josh. xxiv. 30; Judges viii. 32; I Sam. xxv. 1, and elsewhere). The burning of the bodies of Saul and his sons was exceptional, and is explained in different ways (see I Sam. xxxi. 12, and the commentaries; also Schwally, "Das Leben nach dem Tode," p. 48); the same is the case with the allusion to burning in Amos vi. 10 (see commentaries, and Schwally, *l.c.*). The burning of the body so that even the bones were consumed was considered a disgrace (Amos ii. 1); and was inflicted as a punishment (Josh. vii. 25. Compare Tacitus, "Hist." v.5: "They [the Jews] bury rather than burn their dead." See, also, Cremation.

To be denied burial was the most humiliating indignity that could be offered to the deceased, for it meant "to become food for beasts of prey" (Deut. xxviii. 26; I Kings xiii. 22, xiv. 11, xxi. 24; II Kings ix. 34-37; Jer. vii. 33; viii. 1, 2; ix. 21 [22]; xiv. 16; Ezek. xxix. 5; Ps. lxxix. 2, 3).



Placing the Body in the Coffin.
(From Bodenschatz, "Kirchliche Verfassung.")

Duty of Burial.

The law, therefore, requires even the criminal to be buried who has been put to death (Deut. xxi. 23). So, too, the slain enemy was buried (I Kings xi. 15; Ezek. xxxix. 15), not merely because the dead body defiled the land, but from a feeling of compassion, as is seen in the case of Rizpah (II Sam. xxi. 10; compare Josephus, "B. J." iv. 5, § 2).

While it was incumbent upon the relatives to bury their dead (Gen. xxiii. 3, xxv. 9, l. 7; I Macc. ii. 70; Tobit vi. 15, xiv. 11), it was regarded as one of the laws of humanity "not to let any one lie unburied" (Josephus, "Contra Ap." ii. 29 [30]; Philo, "Hypothetica," ed. Mangey, ii. 629; Bernays, "Gesammelte Schriften," i. 277 *et seq.*, who shows this to have been also an old Athenian law of Buzyges). The Rabbis call it מת מצוה ("an obligation to the dead claiming the service of the finder") (Massek. Sem. iv. 29; Sifra, Emor, Introduction; Sifre, Num. 26; Meg. 3b; Naz. 43b, 47b, and elsewhere). Tobit devoted himself entirely to the task of burying the unclaimed bodies of the slain (Tobit i. 17, ii. 7). According to Josephus, "B. J." iii. 8, § 5, a suicide was not buried before sunset; but Ahithophel, who committed suicide, was placed in his grave in the usual manner (II Sam. xvii. 23; see Shulḥan 'Aruk, Yoreh De'ah, 345, and "Sifte Kohen," thereon; see Suicide).

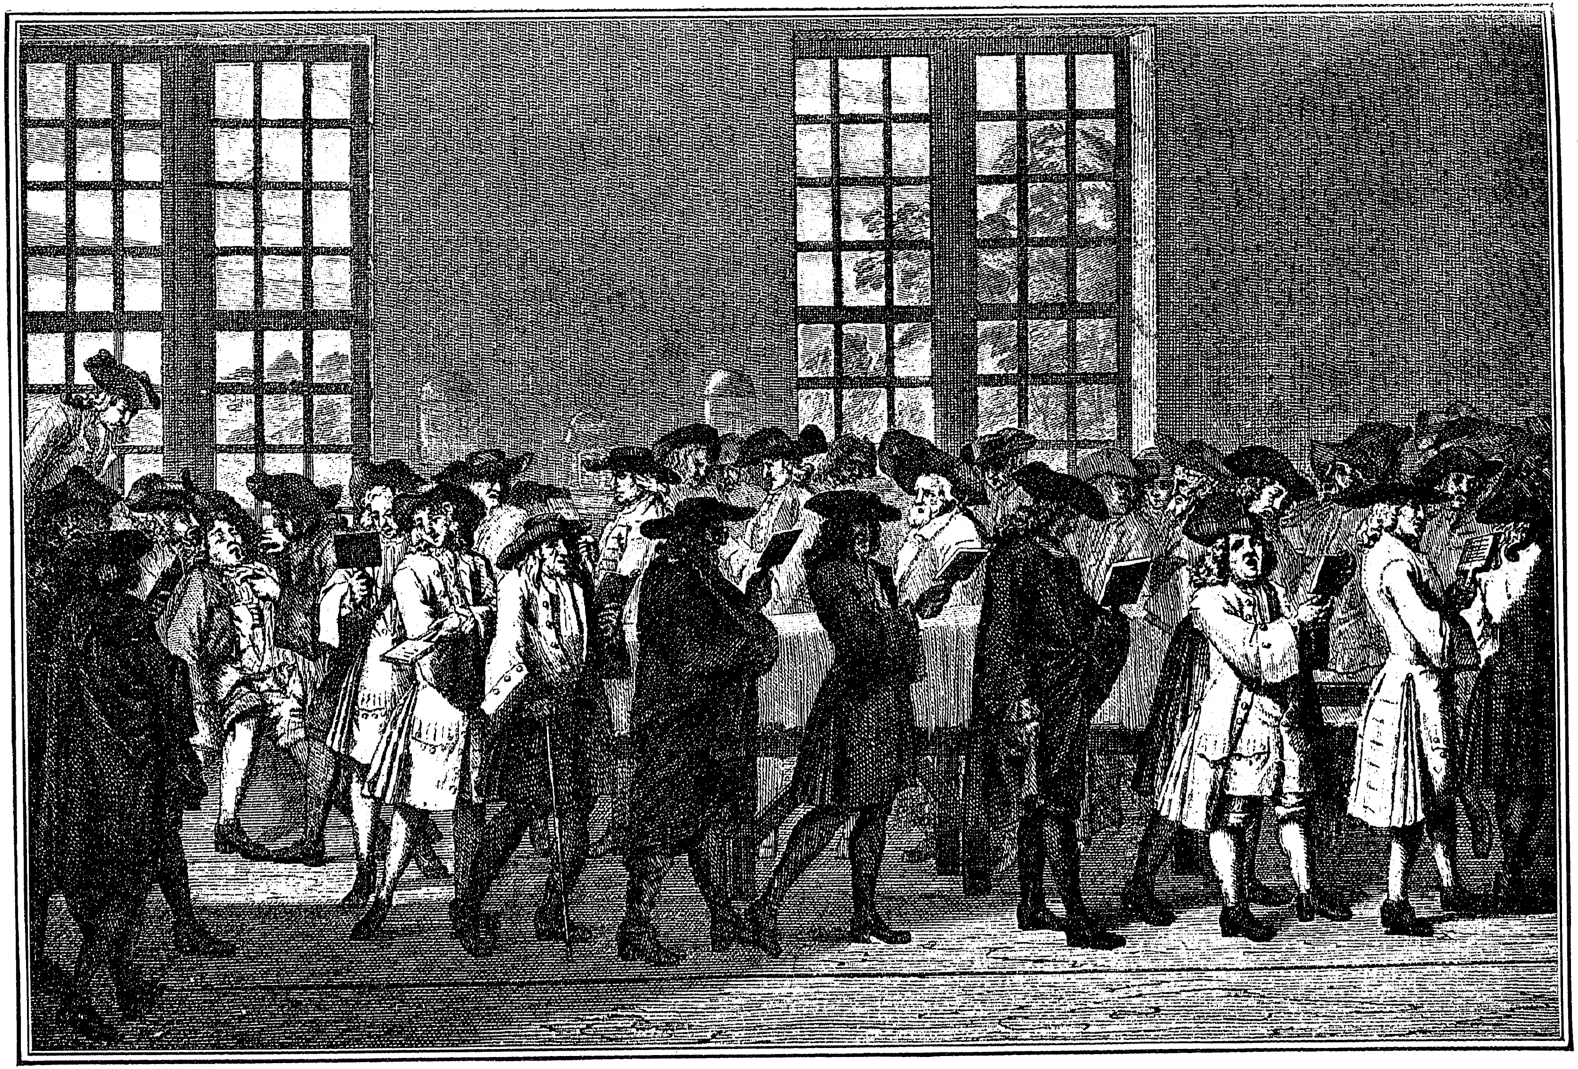
Object of Burial.

In Sanh. 46b the law of burial is derived from Deut. xxi. 23, "Thou shalt bury him on that day," which is construed as a law affecting all men. Still in the Talmudic passage the question is discussed whether burial is to prevent disgrace of the body, or is a means of atonement for the soul for sins committed during lifetime—that is to say, a means of reconciliation of the shade, which finds no rest before being united with the body under the earth (see Schwally, *l.c.* pp. 52, 53). The process of decay in the grave was believed to be painful to the body, and therefore to be the means of atonement (compare Ber. 18b; Tosef., Sanh. 46b; Sanh. 47b). Atoning power of the ground per se (Ket. 111a) was attributed to Palestine exclusively (compare Tosef., Sanh. 46b; Sanh. 47b). This view concerning the atoning effect of the decaying process induced some to bring the body into close contact with the earth by either having the coffin perforated or by dispensing with the coffin altogether (Yer. Kil. vii. 32b, top; R. Nissim to Sanh. 46b; Ṭur, Yoreh De'ah, 362). Earth of the Holy Land, as based upon Deut. xxxii. 43, וכפר אדמתו עמו = "the earth shall atone for his people," is therefore often put under the body in the coffin to accelerate the dissolution and the ceasing of the pain (see Isserles to Shulḥan 'Aruk, Yoreh De'ah, 363, 1), if not on account of the Resurrection (see Yer. Kil. ix. 32c).

According to Pirḳe R. El. xxi., Adam and Eve learned the art of burial from a raven whom they saw bury one of its kin in the sand (Tan., Bereshit, 10, has "two clean birds" instead; Gen. R. xxii., "clean birds and beasts buried Abel," is probably incorrect; see Abel).

Time of Burial.

Although the law in Deut. xxi. 23 refers only to the culprit exposed on the gallows, the rabbinical interpretation derives from it that "no corpse is to remain unburied overnight" (Sanh. vi. 4, 46a, b; Maimonides, "Abel," iv. 8; Shulḥan 'Aruk, Yoreh De'ah, 357, 1). With reference to Num. xx. 1, it is even urged that burial should follow death closely (M. Ḳ. 28a; compare Acts v. 6-10; and see Tobler, "Denkblätter aus Jerusalem," 1853, p. 325, as to the present usage: "The burial takes place within as few hours after death as possible"). "To keep the dead overnight was not permitted in the city of Jerusalem" (Tosef., Neg. vi. 2; B. Ḳ. 82b; Ab. R. N. xxxv.). Whether this was due to the



SEPHARDIC JEWS IN PROCESSION ROUND A COFFIN.
(From Picart, 1723.)

climate, which causes decomposition to ensue rapidly—compare Abraham's words: "Let me bury my dead out of my sight" (Gen. xxiii. 4)—or to the defiling nature of the corpse (Num. xix. 11–14), the generally accepted view was that the acceleration of the burial was a praiseworthy act unless preparations for the honor of the dead made delay desirable (M. Ḳ. 22a; Maimonides and Yoreh De'ah, *l.c.*).

Early Burials.

The tomb, however, was not immediately closed over the dead. During the first three days it was customary for the relatives to visit the grave to see whether the dead had come to life again (Massek. Sem. viii.; see Perles, "Leichenfeierlichkeiten," p. 10, and Brüll, "Jahrb." i. 51). In the course of time the Mishnaic law was insisted upon, notwithstanding the altered conditions, and quick burials involved the danger of entombing persons alive. When, therefore, in 1772, the Mecklenburg government, in prohibiting such burials and insisting that three days should intervene between death and interment, provoked great opposition on the part of the rabbis, who considered it an infringement upon Jewish law and custom, Moses Mendelssohn, who was asked to intercede, justified the governmental measure, declaring the Jewish custom to be in conflict with the ancient view and practise (see Kayserling, "Moses Mendelssohn," 1862, pp. 276 *et seq.*, and the "Meassef" of the year 1772). This view has been adopted by all modern rabbinical authorities, though the Eastern Jews still adhere to the old custom with its abuses (see Altschul, "Kritisches Sendschreiben über das Bisherige Verfahren mit den Sterbenden," 1846, and David Einhorn, "Ueber die Nothwendigkeit der Einrichtung von Leichenhäusern," in "Sinai," 1862, pp. 213 *et seq.*, 243).

Spices and Plants at the Burial.

Embalming, practised in Egypt (Gen. l. 2, 26) and in the case of Aristobulus in Rome (Josephus, "Ant." xiv. 7, § 4), was unknown, or at least exceedingly rare, in Judea. But—undoubtedly with the view of removing the odor—spices were put on the coffin or otherwise used at funerals (Ber. viii. 6; John xii. 7, xix. 39), and myrtles and aloes (in liquid state) were carried in the procession (Beẓah 6a; John xix. 39). In honor of dead kings "sweet odors and diverse kinds of spices" were burned (Jer. xxxiv. 5; II Chron. xvi. 14, xxi. 19), together with the bier and the armor (see 'Ab. Zarah 11a), or carried along in the procession (Josephus, "Ant." xv. 3, § 4; xvii. 83; *idem*, "B. J." i. 33, § 9). Onkelos (Aquila), the proselyte, burned 80 manehs of balsam in honor of R. Gamaliel the Elder (Sem. viii.; 'Ab. Zarah 11a). Later practise added an infusion of the spices to the water with which the dead was washed (see Ṭaharah).

As soon as the last breath was drawn, the eyes of the dead were closed by the oldest or the most dis-

(From Picart, 1723.)

Preparation for Burial.

tinguished son or next relative (Gen. xlvi. 4), the mouth was shut, and kept in position by a band on the cheek-bones, and the body placed upon sand or salt on the floor to retard decomposition, metal or glass being put upon the navel to prevent swelling. Then the body was washed and anointed with aromatic unguents, and wrapped in linen clothes (Shab. xxiii. 5; Sem. i. 2, 3; Acts ix. 37; John xi. 44, xii. 7, xix. 39 *et seq.*, xx. 6 *et seq.*; Matt. xxvii. 59; Mark xv. 46 *et seq.*; Luke xxiii. 53 *et seq.*; Testament of Abraham, xx.).

In Biblical times persons, especially of high rank, were arrayed at burial in the garments, ornaments, and weapons which they had worn in life (I Sam. xxviii. 14; Isa. xiv. 11; Ezek. xxxii. 27; compare Josephus, "Ant." xv. 3, § 4; xvii. 8, § 3; "B. J." i. 33, § 9; and "Ant." xiii. 8, § 4; xvi. 7, § 1). To be buried without garments was considered a disgrace (Shab. 14a; compare Spiegel, "Avesta," ii., Introduction, p. xli.). As a token of honor, it was customary to cast the most costly garments and ornaments upon the bier of a dear relative or friend, and as such objects could no longer be used for other purposes, אסור בהנאה, the Rabbis deprecated such practise (Sem. ix.; Sanh. 48a *et seq.*). In fact, since funeral expenses became common extravagances and an object of alarm to the relatives, R. Gamaliel II. set the example by the order he gave for his own funeral, and thus introduced the custom of burying the dead in simple linen garments (Ket. 8b; M. Ḳ. 27b). In the Testaments of the Twelve Patriarchs, Judah enjoins his sons "not to bury him in costly garments nor to cut open his body" (for embalming), as is done to kings (Judah xxvi.; compare Josephus, "Contra Ap." ii. 27).

Simplicity of Funerals.

In R. Papa's time cheap clothes became the rule (Ket. 8b). White garments, which were the robes of state (Yer. R. H. i. 57b; Eccl. ix. 8), were at all times preferred. R. Jannai, however—some versions have "R. Johanan"—wished to be buried in colored garments, saying: "Not in black, lest I appear as a mourner among the righteous who are clad in white in paradise, nor in white, lest I be clad in festal garments when I should bewail my sad lot" (Yer. Kil. ix. 32b; Shab. 114a; Gen. R. xcvi., and elsewhere). R. Jeremiah said (Yer. Kil. *l.c.*; Gen. R. c.): "Dress me in white garments with sleeves, put on my slippers, and place a cane in my hand and my sandals by my feet, and set me by the high road so that I may be ready when the Resurrection call comes." The use of the shroud, or Sargenes, is a later custom. Objects used or favored by the dead, such as a writing-tablet, a pen or inkstand, a key or bracelet, were often put into the coffin or grave (Sem. viii.). Formerly the face was covered only in case of disfigurement; in course of time, when long privation caused the poor to look disfigured and the rich only seemed to enjoy the privilege of having their faces uncovered, it became the rule to cover the faces of all; the bridegroom alone, whose death appealed to universal sympathy, being excepted (Sem. *l.c.*; M. Ḳ. 27a). Brides had their hair loosened (Sem. *l.c.*). As a rule, the hair was cut (M. Ḳ. 8b). The body was placed in the coffin face upward, the hands folded across the breast, and the feet stretched out; a curved or bent-over position was deprecated (Yer. Naz. ix. 57d; Bab. Naz. 65a; B. B. 74a, 101a, b; Ṭur, Yoreh De'ah, 362).

Coffins or Biers.

Coffins, though used in Egypt (Gen. l. 26), were not in general use in Biblical times; in most cases the dead were carried out to the burial-place upon a bed or bier ("miṭṭah," II Sam. iii. 31; Ber. iii. 1; Josephus, "Ant." xvii. 8, § 3, κλίνη; compare II Kings xiii. 21, and the story of the sham funeral of Johanan ben Zakkai, Giṭ. 56a). Occasionally coffins were used, either of wood or of stone (M. Ḳ. 8b; Yer. M. Ḳ. i. 80d), those of wood suggestive of the tree which brought death to man (Gen. R. xix.); cedarwood, "which does not decay," being preferred (Test. Patr., Simeon, 8; compare Levi, 19; Zebulon, 10). In France it became customary to use for the coffin-boards the table upon which food for the poor had been served (Baḥya b. Asher, commentary to Ex. xxv.).

At first the bier used for the rich was more elaborate than that used for the poor; later, simplicity and equality became the rule (M. Ḳ. 27b).

Funeral Procession.

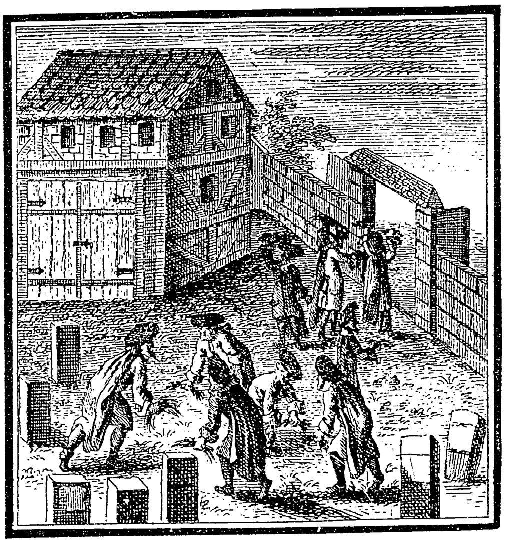
The bearers, who carried the bier on their shoulders (hence their name, "kattafim" [shoulderers]), walked barefooted, one set of bearers changing with another from time to time to give as many as possible an opportunity to honor the dead (Ber. iii. 1; Yer. Naz. vii. 56a). In the case of a child under twelve months, the coffin was carried by the handles (Sem. iii. 2; M. Ḳ. 24b). The women went, as a rule, in front of the bier, the reason given (Yer. Sanh. ii. 20b; Gen. R. xvii.) being that "woman brought death upon the world"; in reality because the mourning women singing the dirge and beating the drum led the funeral procession, as they still do in the East (Jer. ix. 16; M. Ḳ. iii. 8-9; Kelim xv. 6; Schwarz, "Das Heilige Land," p. 342), though at times they follow the bier (Lane, "Customs of the Egyptians," ch. xxviii.).

Besides the relatives and friends (Gen. l. 7), any stranger was also expected to follow when he saw the dead carried to the grave, lest it be said of him "the one who mocketh the poor reproacheth his Maker" (Ber. 18a, after Prov. xvii. 5). A teacher of the Law was honored by having a scroll of the Law placed upon the bier, or carried alongside of it, and placed in the tomb (B. Ḳ. 17a).

The Family Sepulcher.

The burial-place received its chief sanctity from the fact that it was the resting-place of the members of the family. To the ancient Hebrew, to die was "to be gathered unto his people" and "to lie with his fathers" (Gen. xlix. 29; Num. xxvii. 13; Judges ii. 10, and elsewhere); to be buried in the grave of his father and mother was his fondest wish (II Sam. xix. 38, xxi. 14; Tobit iv. 3-4, xiv. 10-12). Thus the cave of Makpelah became the family sepulcher of the Patriarchs (Gen. xxiii., xlix. 29-31). The kings were buried in a family sepulcher (II Kings xxi. 18, 26; xxiii. 30). These sepulchers were either dug in the ground in the neighborhood of the family dwelling (I Kings

ii. 3-4; I Sam. xxv. 1, xxviii. 3) or hewn out of the rock, often during one's lifetime (Isa. xxii. 16; II Chron. xvi. 14; see also for the thirteenth century Isaac b. Sheshet, Responsa, No. 114, quoted by Perles, *l. c.* p. 29). In the one case, stone buildings in the shape of houses or cupolas, after Phenician custom called נפש ("the soul or" "bird-house") ('Er. v. 1; Sheḳ. ii. 5), were erected over the graves; in the other case, either caves (מערות) (B. M. 85b; M. Ḳ. 17a; Judith xvi. 23) were selected, or the rocks were so excavated as to furnish compartments or galleries with as many vaults ("kokim," כוכים) at the three sides as the family required. Into these vaults the corpse could be horizontally moved, the stone rolled upon the entrance forming the cover or door, while the porch on the fourth side was large enough to afford room for the bier and the visitors (B. B. vi. 8; Yer. B. B. iii. 13d; Ket. 84a; M. Ḳ. 8b). While the kings claimed the privilege of being buried in the Holy City and so near the Temple as to provoke the protest of the prophet (Ezek. xliii. 7-9), the rule was that the burial-place should be at least fifty cubits distant from the city (B. B. ii. 9; Luke vii. 12); but it was often placed in a garden (John xix. 41), with flowers planted around (Ṭoh. iii. 7). In those old family sepulchers of Palestine the interment did not take place immediately, but the body was left in the sepulchral chamber for some time until it was reduced to a mere skeleton, and then the bones were collected anew, wrapped in linen clothes, tied closely together like mummies, and then solemnly interred (Yer. M. Ḳ. i. 80d; Sem. xii., xiii.).



Mourners Throwing Grass Behind Them as They Leave the Cemetery.
(From Bodenschatz, "Kirchliche Verfassung.")

To disturb the rest of the dead by removing the body or the bone-remnants from one place to another was considered a great wrong; but it was allowed for the benefit of the dead in the case of a transfer of the body to the family plot, or when the place of burial had become unsafe from desecration or elementary ruin (Sem. xiii.; Yer. M. Ḳ. ii. 81b; Shulḥan 'Aruk, Yoreh De'ah, 362, 1). See also CEMETERIES, DISINTERMENT, FUNERAL RITES, MOURNING, ṬOHARAH.

K.

BURIAL SOCIETY: Organization for providing proper burial rites. There is hardly a congregation of Jews in the world without an association specially organized for the following purposes: to conduct the burial service without charge; to be present at the death of a member; to watch over the corpse, to cleanse and shroud it, and to accompany it with funeral procession; and to bury the body with religious ceremonies. The members are called מתעסקים ("mit'asḳim" = attendants, undertakers; (M. Ḳ. 24b). The society is known as חברח קדישא ("holy association"), also as חברת גמילות חסדים ("society for mutual benevolence"), or ח״ ג״ חסד של אמת ("of true mutual benevolence"), derived from the last words of Jacob to Joseph: "I pray thee . . . deal kindly and truly [חסד ואמת] . . . and bury me," etc. (Gen. xlvii. 29, 30). The members are also called גומלי חסדים ("interchangers of kindness," Ket. 8b). A burial society bearing this name is quoted in the Responsa of Simon b. Ẓemaḥ Duran, iii., No. 13 (תשב״ץ, 1361-1444). The existence of a burial society is mentioned in the Talmud. R. Judah commanded that all citizens suspend work in order to honor and bury the dead. When R. Hamnuna went to Daromta and observed that some of the people attended to their usual vocations in the event of a death, he wanted to excommunicate them, but accepted the excuse that there was a society in the town to render such services (M. Ḳ. 27b). It seems that the people were divided into two sections; the one attending the burial duties on certain days, while the other was relieved (Ṭur and Shulḥan 'Aruk, Yoreh De'ah, Abelim, 343).

Sanctity of Burial.

Burial has always been considered by the Jews as the greatest act of benevolence. R. Ḥama b. Ḥanina said: "'Walk after the Lord your God' [Deut. xiii. 5] means 'Follow the path of God . . . and . . . bury the dead, even as He did bury Moses in the valley of Moab'" (*ib.* xxxiv. 6; Soṭah 14a).

The object of the burial societies in the Middle Ages is thus described in the responsa of R. Asher b. Jeḥiel (הרא״ש): to be with the mourner on the night of the death; to accompany the funeral; to assist in the burial; to furnish consolation meals (סעודת הבראה) to the mourners; to pray in the house of mourning (Responsa, Rule 13, No. 12). The membership was apparently limited, and a deceased member could be replaced by a son over thirteen years of age (*ib.* Rule 13, No. 13).

The first burial society of later times was organized by R. Eliezer Ashkenazi in 1564 at Prague,

Early Burial Societies.

with rules, regulations, and amendments by R. Moses Möln (מהרי"ל) in 1573. It received the sanction of the Austrian government on June 1, 1742 (Preface to זכרון ליום אחרון, Prague, 1828). Some of the societies, however, exercised arbitrary power in the communities. They virtually owned the cemeteries and usurped the right to dispose of the plots as they pleased. When the ground became expensive and government taxes burdensome, it was customary for the rich to pay for their burial-plots, the income so derived being employed to defray the burial expenses of the poor.

Often the societies exacted exorbitant sums from the rich, and even from the middle classes. To remedy this abuse a conference of the Council of Four Lands (ארבע ארצות) assembled at Gramnitz in 1683, and passed resolutions to nullify the practise of the societies in dealing unjustly both with the dead and the living by delaying burial till the payment of a compulsory compensation was settled. The conference passed a decree excommunicating and imposing a fine of fifty ducats upon the leaders of any congregation which permitted the members of a burial society to extort more than 150 gulden for the burial of a rich man; and the approbation of the leaders and the chief rabbi was to be obtained before payment was made of the minimum sum of 30 gulden, or upward. This decree was renewed and promulgated on market-day in every congregation at Bieroslav in 1698, and was registered in the congregational record (פנקס). The society, in order to prevent abuses, appointed one day in the year as a fast-day, to be devoted to prayer and to visiting the cemetery, to attend to necessary repairs of the graves and headstones, and to be followed at night by a sacred feast, to which every member was invited (see in G. Wolf, "Die Jüdischen Friedhöfe und die Chewra-Kadischa in Wien," an invitation from the seven Jewish town councilors to the members of the holy association to partake of the sacred banquet on Tuesday in the week of the sidra Shemini, in the year 5080 = 1320).

On May 5, 1764, the Vienna burial society was reorganized by R. David Wertheim; and among the rules adopted was one fixing the annual fast-day for Adar 7. A proviso was inserted that the feast after the fast must not be too costly.

One of the largest Ḥebrah Ḳaddishahs is the one in Budapest, which includes several societies. It has a yearly budget of half a million crowns.

A burial society was organized in 1793 at Kiev, Russia. The burial charge for members and dependent persons was ten gulden. The members were granted certain privileges in the synagogue, such as leading in prayer and reading the Torah on Hoshanah Rabbah and Shemini 'Aẓeret in the Tabernacle festival. On the former day the election of the officers took place. The annual fast and feast were held on Kislew 15, which is the day observed by most of the societies. On reorganizing the Ḥebrah Ḳaddishah of Odessa in 1878, the maximum price for a rich burial was 60 rubles, the minimum for middle classes 12 rubles, and free burials for the poor ("Ha-Ẓefirah," 1878, v., No. 48).

In America.

In New York the oldest burial society, Ḥebrah Ḥesed ve-Emet ("loving kindness and truth"), was established by the Portuguese-Jewish congregations in 1802. The society recently celebrated its one hundredth anniversary at the Shearith Israel synagogue. The German-Jewish communities all through America organized free burial societies, following the example of their brethren in Europe; and these were, or are being, in the course of time merged into the united Hebrew relief societies of each town. The Ḥebrah Ḳaddishah of the Russian-American congregation Beth Hamedrash Hagadol was organized in 1859. The Agudat Ahim Ḥesed Shel Emet ("Society of Friends for True Benevolence"), managed by Russian Jews on the East Side of New York and incorporated in 1889, has 2,200 members, and up to Jan. 1, 1901, had given free burials on 8,263 occasions.

BURMANIA, BARTHOLD DOWE: Dutch statesman and ambassador to the court of Vienna; lived in the eighteenth century. He was a man of broad humanitarian sympathies and an especially stanch friend of the Jews. When, on Dec. 18, 1744, Maria Theresa ordered the expulsion of the Jews from Prague (to take place before the end of Jan., 1745) and from all Bohemia (before the end of June, 1745) Burmania, at the request of the Jewish communities of Amsterdam, Rotterdam, and The Hague, exerted all his influence at the court to have the edict revoked. He was assisted by the English minister, Sir Thomas Robinson. The result of his efforts was the postponement of the date of exile to the last day of Feb., 1745. Again the Jewish communities of Holland appealed to Burmania, and again he pleaded, urged, and remonstrated with the Austrian Reichskanzler, that "sovereigns, more than other persons, are responsible to God and man for their deeds." Another month of grace was granted, but on March 31, 1745, the Jews of Prague were exiled. Thereupon, Burmania, upheld by the ambassadors of England, Poland, and Turkey, directed his energies toward averting a still greater impending catastrophe—the expulsion of the Jews from the whole of Bohemia, which was to take place in June.

A royal edict was issued April 8, 1745, ordering all Jews of Moravia also to emigrate within a short time. Again Burmania pleaded for the unfortunate people, and the edicts were modified (May 15, 1745), the Jews being allowed to remain in Bohemia and Moravia "until further orders." Burmania endeavored to have the edict repealed which was issued June 25, 1746, prohibiting all Jews from coming within two hours' distance of Prague; but he was not successful. For two years the condition of the Bohemian Jews was miserable. Finally, however

(July 14, 1748), Maria Theresa revoked the edict of Dec. 18, 1744, "on account of the pressure from the foreign ambassadors," and the Jews were allowed to return to Prague.

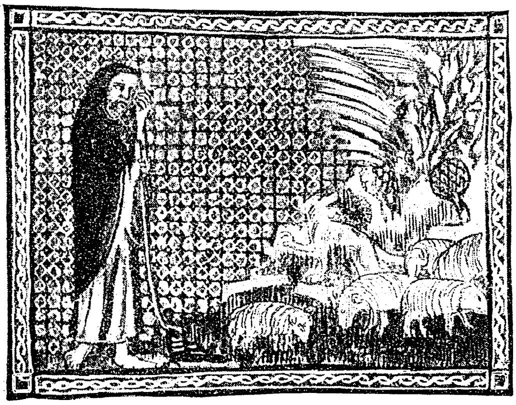
BURNING BUSH.—Biblical Data: The name commonly given to the tree from which the angel of Jehovah manifested himself to Moses in a flame of fire; the distinctive feature of the revelation being that the tree was not consumed (Ex. iii. 2-4).

——**In Rabbinical Literature:** The discrepancy between Ex. iii. 2, where it is said that an angel appeared to Moses in the burning bush, and verse 4, where it is stated that God spoke to Moses out of the bush, is answered in various ways by the Midrash. According to one opinion, an angel appeared first and after him the Shekinah; while according to others the appearance of the angel merely indicated to Moses that the Shekinah was near, and this angel was Michael (or, as some say, Gabriel), the constant attendant of the Shekinah. When Moses beheld this heavenly apparition other persons were with him, who did not, however, perceive anything. According to Joshua b. Ḳarḥah (Rabban Gamaliel, Num. R. xii. 4) God revealed Himself to Moses for the first time in a thorn-bush to prove to him that "nothing"—not even such an insignificant plant as the thorn-bush—"is void of the Shekinah." The thorn-bush itself receives various symbolic interpretations. Thus, as this shrub is among the least of the plants, so Israel occupied a lowly and despised position in Egypt. As the thorn-bush is used for a hedge, so Israel is a fence and protection for the other nations. The burning but not consuming fire of the bush indicated to Moses that Israel would successfully endure all the sorrows and pains inflicted upon it by the Egyptians. It was "heavenly fire" (compare Darmesteter, in "Rev. Etudes Juives," i. 186 *et seq.*), that burns and consumes not (Ex. R. ii. 5).



"Moses at the Burning Bush."
(From the Sarajevo Haggadah, 14th century.)

J. SR. L. G.

——**Critical View:** The word rendered "bush" (סְנֶה) is found only in this passage and in Deut. xxxiii. 16, where, however, it is possible that the right reading is "Sinai." It is generally held that a thorn-bush of some sort is meant; but the exact species has not been determined. The ground about the bush was holy (verse 5), showing that the place was a residence of the Deity.

The main purpose of the theophany is made plain by the context. Yhwh, whose seat was in Mt. Sinai, was about to take the Israelites as a people under His direct protection and to deliver them from bondage; and after their deliverance they were to enter into a covenant with Him at this sacred spot (iii. 7-12). The motive of the special mode and form of the apparition may be arrived at as follows: God's self-manifestation in fire is a familiar episode in ancient Israel. Indeed, this appearance to Moses has its counterpart in the greater display of lightnings and thunderings in the same region in the presence of the whole of Israel, when the covenant was actually made. On the latter occasion, and in the other theophanies (Ps. xviii. 8, 12 *et seq.*; l. 3; Micah i. 4; Hab. iii. 3 *et seq.*; compare Deut. iv. 24; Heb. xii. 29), the fire is destructive; whereas here it is shown to be harmless by the preservation of the tree that was enveloped in its flames.

The explanation is found in the particular design of the revelation. Fire is an emblem of the purity or holiness of God; while, ordinarily, this attribute is represented as being visibly displayed when God intervenes in the way of judgment and retribution, the object here is to show that Yhwh brings Israel into a sure relation to Himself, which means preservation or salvation.

The sacred tree has not an equal significance. The burning bush is not to be compared with the sacred terebinths and other trees which play so large a rôle in the earlier history of Israel, and which have a permanent sanctity of their own. It was, however, a living thing, the only object on Sinai that had life in it; and it belonged, moreover, to a class of objects often made the abode of divinity. The explanation often given, that the bush symbolized the people of Israel unconsumed by the oppression of Egypt, can not have been the primary meaning of the phenomenon.

BURNING OF THE DEAD. See Cremation.

BURNT OFFERING.—Biblical Data: The ordinary translation in modern versions of the Hebrew "'olah" (עֹלָה). This term does not mean literally "burnt offering," but "what is brought up" or presented to the Deity. The name is a translation of the Septuagint rendering, which is itself based upon the descriptive phrase often attached to "'olah" in the ritual prescriptions: "an offering made by fire unto the Lord" (Lev. i. 9 *et seq.*). A synonym is

כָּלִיל, which defines the offering as complete; *i.e.*, when it is placed upon the altar, to distinguish it from the other forms of animal sacrifice (see I Sam. vii. 9; compare Ps. li. 21). The burnt offering was the highest order of sacrifice in the Old Testament ritual. The bloodless offerings were made only in connection with it.

The following is a concise statement of the Levitical law concerning burnt offerings:

Mode of Sacrifice.

The Offerings: These were wholly animal, and the victims were wholly consumed. They might be from the herd or the flock, or in cases of poverty birds might be substituted. The offerings acceptable were: (*a*) young bullocks; (*b*) rams or goats of the first year; (*c*) turtle-doves or young pigeons. These animals were to be free from all disease or blemish. They were to be brought to the door of the tabernacle, and the offerer was to kill them on the north side of the altar (if a burnt offering), except in the public sacrifices, when the priest put the victims to death, being assisted on occasion by the Levites (II Chron. xxix. 34). The blood was then sprinkled around the altar. The victim, if a large animal, was flayed and divided; the pieces being placed above the wood on the altar, the skin only being left to the priest. If the offering was a bird a similar operation was performed, except that the victim was not entirely divided. The fire which consumed the offerings was never allowed to go out, since they were slowly consumed; and the several kinds of sacrifice furnished constant material for the flames. Every morning the ashes were conveyed by the priest to a clean place outside the camp (Ex. xxix. 38–42; Lev. i., vi. 8–13, ix. 12–14; Num. xv.).

Stated and Occasional Offerings.

Kinds and Occasions of Burnt Offering: (*a*) STATED OFFERINGS were: (1) **The Daily Burnt Offering,** presented at the time of the morning and the evening prayer (the third and ninth hours). The victim was a lamb or kid a year old. This was always accompanied by a vegetable offering ("minḥah") and a libation of wine (Ex. xxix. 38–42; Num. xxviii. 3–8). (2) **The Sabbath Burnt Offering,** which included double the amount of all the elements of the ordinary daily sacrifice (Num. xxviii. 9, 10). (3) **The Festal Burnt Offerings,** celebrated at the new moon, the Passover, Pentecost, the Feast of Trumpets, the Day of Atonement, and the Feast of Tabernacles. On these occasions, especially on the last-named, the number of victims was increased (Num. xxviii. 11–xxix. 39).

(*b*) OCCASIONAL OFFERINGS: (1) When a priest was consecrated (Ex. xxix. 15; Lev. viii. 18, ix. 12); (2) at the purification of women (Lev. xii. 6–8); (3) at the cleansing of lepers (Lev. xiv. 19, 20); (4) at the purgation of ceremonial defilement (Lev. xv. 15, 30); (5) in connection with the vow of a Nazarite (Num. vi. 11, 16).

Voluntary Offerings.

These sacrifices were prescriptive and obligatory; but voluntary burnt offerings might also be made. Some of them are recorded which involved the immolation of a large number of victims (Num. vii.; I Kings viii. 64).

These were the regulations of the Levitical ritual. All of the sacrifices were to be made under priestly auspices; and even when a private offerer killed the victim the main parts of the ceremony were performed by the priests. Yet both before and after the time of Moses the 'olah was offered by laymen without distinction of persons and without restriction as to mode or measure—*e.g.*, Gen. viii. 20, xxii. 2 *et seq.* (compare xv. 17); I Sam. vi. 14; Amos v. 22; Isa. i. 11; Hosea vi. 6; Job i. 5, xlii. 8—not to speak of the more or less heathenish offering of human victims (Judges xi. 31; II Kings iii. 27; Jer. xix. 5).

J. JR. J. F. McC.

——**In Rabbinical Literature:** The name עולה for burnt offering is explained in various ways. Some scholars take it to be an offering of atonement for the evil thoughts that steal over one, עולה על רוחו ("ascend in his mind," Tan., Lek Leka, ed. Buber, i. 71; Lev. R. vii. 3); others derive the name from עליון ("to the Highest"), because it is entirely intended for God, the Most High, men taking no part therein (Tan., ed. Buber, iii. 13).

The 'olah is the only offering which may be accepted in the Temple from non-Jews, the drink-offering appertaining to it being in such cases furnished at the cost of the community (Men. 73b; Tem. 2b; compare Maimonides, "Yad," Ma'ase ha-Ḳorbanot, iii. 2, 5). The 'olah was laid entire upon the altar, even the horns of the animal and the beard of the goat not being removed (Zeb. ix. 3, 85a; "Yad," *l.c.* vi. 2). Before being offered upon the altar the carcass was cut into pieces, not at haphazard, but according to the detailed directions given in the Talmud (Tamid 31). The several pieces were then laid upon the altar, the number of priests officiating being eight, eleven, or twenty-four, according as the animal was a sheep, ram, or ox (Yoma 26b). This, however, applies only to the 'olah offered by the whole congregation, not to the individual 'olot, which could be cut up into any number of pieces, and be offered by any number of priests (*l.c.*). The skins of these animals belonged to the priests, who divided them among themselves every Friday, provided the offering had not proved unfit (פסול) before skinning (Zeb. xii. 3; Tosef., Men. xiii. 18). As the more prominent priests forcibly took possession of the skins, it was decreed that the latter should be sold and the proceeds be given to the Temple (Tosef., *l.c.* 19).

BIBLIOGRAPHY: Maimonides, *Yad*, *Ma'ase ha-Ḳorbanot*, vi. 1–23.

K. L. G.

——**Critical View:** What most obviously requires explanation is the fact that while the Levitical law insists on the observance of minute prescriptions relating to the burnt offerings and other bloody sacrifices, defines the several occasions, and provides a special ritual for each, these were not conformed to during the greater portion of the history of Israel. This is a matter of too general a character to be treated here. Suffice it to say that the difficulty is satisfactorily met by the hypothesis, now accepted by most modern scholars that the prescriptions themselves were of late origin, and formed part of a rigorous and comprehensive system of worship designed for the community of Israel under the Second Temple.

Only by cutting loose this final ceremonial law from the tribal and monarchical history of the Hebrews can one gain any rational conception of their sacrificial usages. With this general principle in view one is in a position to answer the two questions of most immediate concern: (1) What was the origin of burnt offerings in Israel? and (2) What were the historical occasions and modes of these sacrifices?

Aspects of Sacrifice.

There seem to be three stages or phases in the development of sacrifice as representing the relations between the worshipers and the Deity. In the first, communion is prominent; in the second, homage or devotion; in the third, expiation. The most primitive notion was that of communion with the object of worship, held to be akin to his votaries, who partook of his life. The Deity, however, was also a benefactor. It was from Him that the various kinds of offerings, animal and vegetable, as the produce of the land, came to the offerers. Hence, on the one hand, a sacrifice was a part of a social feast—a family meal in a wider and deeper sense. On the other hand, it was the giving back to the beneficent Deity of a part of what He had bestowed: it was in fact the most tangible and obvious mode of rendering homage to one's God.

Origin of Burnt Sacrifices.

Only a part of the whole was at first offered; otherwise there would have been no sacrificial feast, no communion with the Divinity. But what should be chosen as the offering? and how should it be rendered? The Deity, being invisible, would be most suitably entertained by a more ethereal form of nourishment than solid food. Hence arose the custom of burning certain portions of the animal offerings or materials of the feast. The most appropriate of all were the fatty parts of the animal, which in general among ancient peoples, as among the Hebrews, were consumed by fire, while the remainder of the flesh was eaten by the human participants. This was the "zebaḥ," the fundamental animal offering.

Characteristics of the Oblation.

From this universal type of sacrifice the 'olah was differentiated. The "wholeness" of the oblation was what distinguished it from other fire-offerings, at least in outward form. But this wholeness was not an exclusive mark of burnt offerings among sacrifices in general; for it merely implied that no part of the oblation was to be consumed by any one except the Deity, to whom it was wholly surrendered. Among various peoples it may be observed that offerings of any sort of vegetables were given unconsumed by the offerers; and among the Hebrews even some forms of the fire-offerings were wholly consumed on the altar. Thus the "minḥah," or cereal-offering, when offered by a priest, was to be entirely burned (Lev. vi. 20 *et seq.*). Also the bullock of the sin-offering, when the offense had been committed either by a priest or by the whole people, was burned entire outside the camp (Lev. iv. 3-21), even the skin being consumed, which was not the case with the burnt offering.

Distinctive Character of Burnt Offerings.

What, then, is the distinctive meaning of the whole burnt offering? It is plain that it was not of a sacramental character, implying a communion with the object of devotion; for it is expressly distinguished from those in which the elements were portioned out between the Deity and the worshipers. Nor was it, in any sense or degree, a festal ceremony. Was, it then, piacular or expiatory? Not distinctively so, according to the Levitical ritual, though it must be borne in mind that the idea of expiation was probably never wholly absent from the stated order of animal sacrifice in the final legislation. From the special occasions of its celebration as given above, it may be inferred that it was honorific and devotional, implying homage to Yhwh and a complete surrender to His service. Was this always the case in Israel? Some light may be thrown upon this question from the Biblical statements as to the occasions of such sacrifices in the earlier history, and from the details which are added to some of the accounts.

Piacular Human Sacrifice.

Piacular sacrifice seems historically to have begun with human immolations. This is the view taken by the writer of Gen. xxii. (E), where the burnt offering of Isaac by Abraham is commuted by the sacrifice of a ram. The sacrifice by Mesha, king of Moab, of his eldest son (II Kings iii. 27) was expiatory; for, in the view of the narrator, the "wrath" of the offended deity was diverted upon Israel. Such were also the horrible sacrifices made to Moloch in the later days of the kingdom. These practises are amply illustrated from other ancient nations. But not all Old Testament human sacrifices were burnt offerings. Agag was not burned (I Sam. xv. 33); nor were the seven sons and grandsons of King Saul (II Sam. xxi. 8, 9). Both of these executions were made "before Yhwh," and were therefore real sacrifices, the latter being expressly stated to be expiatory.

Animal Offerings of Various Motives.

When animals took the place of human offerings a motive for the immolation of the whole victim was not present, or at least not urgent. When the sacrifice was representative the shedding of the blood of the victim was in general a sufficient expression of a sense of guilt, and as animal oblations were already made from other motives, burnt offerings also, of which the sprinkling of blood formed in any case an essential part, naturally came to have a varied use and significance. Accordingly, while, on the whole, animal burnt offerings were mainly honorific and devotional in the latter legislation, they were often piacular in the earlier history (*e.g.*, I Sam. vi. 14; vii. 9 *et seq.*).

Development of the Whole Burnt Offering.

There are some interesting passages which seem to show the development of the principle and practise of whole burnt offerings. They were written in the eighth and seventh centuries B.C. In Judges vi. 19 *et seq.* Gideon's sacrifice of a kid and unleavened cakes is wholly consumed by fire from heaven (compare vs. 26 *et seq.*). Still more significant is Judges xiii. 15 *et seq.*, where Manoah, who had intended to present a kid for food to the angel of Jehovah, is commanded to make of it a burnt offering. Thus we may observe the development of the zebaḥ into the 'olah. Jeremiah, when he says: "Add your burnt offerings to your [ordinary] sacrifices" (vii. 21), seems to have in mind the ritual tendency just indicated.

It may be observed, finally, that by the very nature of the case private offerings, which were an essential part of the every-day life of the normal Israelite, were very seldom holocausts, and that the more fixed and statutory the public ritual became, the larger was the place given to the burnt offering. As early as the time of Ahaz, in 732 B.C. (II Kings xvi. 15), a morning burnt offering was part of the stated ritual. See SACRIFICE.

BURY ST. EDMUNDS: Town of Suffolk, England, and seat of a monastery the ruins of which still exist. Under the rule of Abbot Hugh (1173–80) the monastery fell deeply into debt to the Jews, especially to Isaac Fil Joce, Benedict of Norwich, and Jurnet of Norwich, to an amount exceeding £3,025. The Jews were accordingly favored by the sacristan William, who used to take charge of their deeds and money in times of war (Jocelin de Brakelond, "Cronicon," pp. 1, 2, 4, 8). The town was the site of a case of blood accusation in 1181, when a boy named Robert was said to have been martyred (*ib.* pp. 12, 114). No details are extant as to this alleged martyrdom. Abbot Samson, who was the rival candidate for the position of abbot with William, the sacristan, on succeeding Abbot Hugh in 1182, found great difficulty in freeing the abbey from indebtedness to the Jews, but succeeded in doing so within twelve years of his accession. On March 18, 1190, fifty-seven Jews were slaughtered at Bury, and almost immediately afterward Abbot Samson obtained their expulsion from the town on the ground that a man of the town had to be a "man"—*i.e.*, vassal—of St. Edmund (*ib.* p. 33).

There still exists at Bury a building which is known as Moyse Hall and is supposed to have been a former synagogue of the Jews. It is of late Norman or Transition character, and therefore its date is probable; but no continuous evidence of a tradition associating it with Jews can be obtained, and a careful inquiry made by the Jewish Historical Society of England negatives its identification.

J.

BUSH. See BURNING BUSH.

BUSH (BUSCH), ISIDOR: Litterateur, publicist, and viticulturalist; born in Prague, Bohemia, Jan. 15, 1822; died in St. Louis, Mo., Aug. 5, 1898. His maternal great-grandfather was Israel Hönig, Edler von Hönigsberg, the first Jew raised to nobility in Austria (see Kompert, "Oesterreichische Adelshalle für Israeliten"). When seven years old Bush was seriously burned at a conflagration, suffering all his life from the effects, but rising superior to the consequent physical infirmities through an iron will and a naturally strong constitution. Bush received his education from private teachers, and owed his literary bent to the cultured circles and rare minds (such as Leopold Zunz and Michael Sachs) with which he came in contact from boyhood.

His "Jahrbücher."

When fifteen years of age, he entered Schmid's Oriental printing establishment in Vienna, which his father had acquired. The Talmud published with the imprint of Von Schmid and Bush is still prized for its exactness. For six years (1842–47) Bush edited and published the "Kalender und Jahrbuch für Israeliten" (Vienna). Its plan was the presentation in the same book of the productions of leading Jewish scholars of divergent views. Among these were Leopold Zunz, S. L. Rapoport, S. D. Luzzatto, Gotthold Salomon, Ludwig Philippson, Michael Sachs, Noah Mannheimer, Joseph Wertheimer, Leopold Stern, Theodor Creizenach, Ludwig August Frankl, Leopold Kompert, Leopold Löw, and Simon Szanto. Some of these made their first appearance as writers in the pages of the "Jahrbücher." In 1844 he edited "Mesillat ha-Limmud" (Way of Instruction), which was published by his father after Bush had left for America.

Liberal in politics, he edited the "Organ für Glaubensfreiheit," and other revolutionary papers issued from his press. When the Revolution of 1848 failed he had to flee to New York, where he arrived Jan. 8, 1849. There Bush opened a store for the sale of newspapers and stationery, and on March 30, 1849, published the initial number of "Israel's Herold," the first Jewish weekly in the United States, which, however, lived only three months. He was assisted in producing it by leading members of the Order B'nai B'rith. In the summer of 1849 Bush went to St. Louis, where he conducted a general store for six years. In 1857 Bush was made president of the People's Savings Bank. When the Missouri Convention was called to determine whether the state should join in the secession movement, Bush was chosen a member on the Unconditional Union ticket, and was made a member of the Committee of Nine, to which most important matters were referred.

Military Career.

When Fremont took command in 1861, with headquarters in St. Louis, Bush was made his aide-de-camp, with the rank of captain. He submitted to Secretary of the Treasury Chase a plan for a government loan of one hundred million dollars, similar to the famous Rothschild premium loans of Austria. Mr. Chase feared its rejection by Congress, but was impressed with Bush's financial genius, and offered him a Treasury clerkship. Bush returned shortly afterward to St. Louis, and became for six years general freight and passenger agent of the St. Louis and Iron Mountain Railroad Company. He assisted in forming Congregation B'ne El in St. Louis and in establishing the Independent Order B'nai B'rith in the West, and was henceforth prominently identified with the Order, rendering invaluable service, especially in connection with its endowment or insurance feature, and in forming the Cleveland Jewish Orphan Asylum. His interest in the society led him to become an insurance actuary.

Bush was chosen member of the state convention called to abolish slavery and to form a new constitution. He was elected a member of the Missouri state board of immigration to repair losses in population resulting from the war, which post he retained for twelve years. Later in life Bush became interested in viticulture. He purchased a tract of land (named by him "Bushberg") outside the city, which became noted for its products; and he even sent large quantities of cuttings from his vineyards to France to replace ravages by phylloxera. Bush, after years of preparation, published a catalogue of grapes, "The Bushberg Catalogue," which has gone through several editions and has been translated into several languages.

A. P. Co.

BUSH, LEWIS: American soldier; born in Philadelphia; died 1777; member of the well-known Bush family, Jewish merchants of Philadelphia. He received the commission of first lieutenant of the Sixth Pennsylvania Battalion Jan. 9, 1776, and was made captain of the same June 24, 1776. He was transferred on Jan. 13, 1777, to Col. Thomas Hartley's additional continental regiment. Of this troop Bush was commissioned major March 12, 1777. He was a brave soldier, serving with distinction during many engagements. At the battle of Brandywine, Sept. 11, 1777, he received a fatal wound and died shortly after.

Soc.* iii. 39; Linn and Egle, *Pennsylvania Archives*, second series, x. 8, 185, 780, Harrisburg, 1880; Wolf, *The American Jew as Patriot, Soldier, and Citizen*, pp. 45-47, Philadelphia, 1895.

A. A. M. F.

BUSH, SOLOMON: American soldier; born in Philadelphia; son of Matthias Bush, one of the signers of the non-importation agreement (Oct. 25, 1765).

Solomon Bush was an officer in the Pennsylvania militia, 1777-87. On July 5, 1777, he was appointed deputy adjutant-general of the state militia by the supreme council of Pennsylvania. In Sept., 1777, he was dangerously wounded in the thigh during a skirmish, and had to be taken to Philadelphia. When the British captured the city in Dec., 1777, he was taken prisoner, but released on parole. As he could not earn his living, being kept, on account of his wound, at his father's home (Chestnut Hill, Philadelphia), the council passed a series of resolutions, Oct. 20, 1779, respecting him, and on Oct. 27 of that year he was promoted to lieutenant-colonel, with pay in accordance with the rank. Bush was in destitute circumstances in later years, and on Nov. 5, 1785, the council of Pennsylvania, under the presidency of Benjamin Franklin, ordered that a pension be paid him for his meritorious services. His brother, Jonas Bush, was on the roll of Revolutionary soldiers.

A. A. M. F.

BUSNACH, WILLIAM BERTRAND: French dramatist; born in Paris March 7, 1832; nephew of the composer Fromental Halévy. His father was associated with BAKRI, to whom France was indebted to the amount of some twenty-odd million francs for provisions furnished to Bonaparte in Egypt. The lawsuit lasted for more than fifty years, and Busnach and his partner were not paid in full at the end. The elder Busnach, an Algerian Jew, became a naturalized Italian in the time of the deys, and was the first interpreter of the French army. He established himself at Paris in 1835. William—an Italian Jew born in France of an Algerian father, with a German surname and an English given name—was at first employed in the customs department. He subsequently devoted himself to dramatic work, writing many plays, a number of which have been successful. The following may be mentioned here: "Les Virtuoses du Pavé," 1864; "Première Fraîcheur, Paris-Revue," 1869; "Héloïse et Abélard," with music by Litolff, 1872; "Forte en Gueule," "La Liqueur d'Or," in collaboration with A. Liorat, music by Laurent de Rillé, 1873; "Kosiki," with Liorat, music by Lecocq, 1876.

In 1867 Busnach assumed the direction of the Athénée, where several of his operettas ("Fleur de Thé," etc.) were performed. His greatest successes he achieved, however, with his adaptation of celebrated novels for the stage; for example, "L'Assommoir," 1881; "Nana," 1882; "Pot-Bouille," 1883, all by Emile Zola; "Le Petit Jacques," by Jules Claretie, 1885; "La Marchande des Quatre Saisons," etc.

Busnach is also the author of the following novels: "La Fille de M. Lecoq," 1886; "Le Petit Gosse," 1889; "Cyprienne Guérard," 1895, etc.

S. J. W.

BUSNASH, NAPHTALI: Chief of the Algerian Jews and statesman; born at Algiers in the middle of the eighteenth century; assassinated June 28, 1805. He was engaged—first alone, and later with Bakri Brothers—in the grain trade, of which the dey Ḥasan, with whom Busnash was on friendly terms, granted him a monopoly. The firm of Bakri & Busnash soon attained a wide reputation, and Busnash became the most influential man in Algeria.

In 1800 he was appointed by the dey Mustapha—whom he had helped to attain to power—chief of the Algerian Jews, a post to which was attached the office of broker to the dey, and the consul-generalship of Ragusa. In this position Busnash displayed so much ability that he won the entire confidence of the dey, who practically left the government in his hands. It was he who received the consuls and settled differences between Algeria and foreign countries.

His power did not, however, last. The janizaries and the fanatical Moslems reluctantly submitted to the domination of a Jew; and Busnash, after having escaped several attempts on his life, was at last shot dead by a janizary at the gate of the dey's palace.

BUTRYMOWICZ, MATHEUS: Polish statesman and landlord of the eighteenth century; a descendant of one of the oldest families of Lithuania and Samogitia, and one of the most enlightened members of the Diet assembled in Warsaw from 1788 to 1792.

He took a special interest in the development of the industry and commerce of Poland and Lithuania, and to this end considered it of the utmost importance to utilize the energy and the abilities of the Jewish inhabitants. Together with Castellan Yezierski and other Liberal members of the "last" Polish Diet, he endeavored to prove to the Polish representatives how harmful to the welfare of the country was the abnormal position of the Jews, and urged the taking of measures leading toward their emancipation. In 1789 he elaborated a plan for transforming the Jews into useful citizens, which he set forth in a pamphlet entitled "Sposób Uformowania Żydów Polskich w Pożytecznych Krajowi Obywatelow" (Warsaw), and which he submitted to Stanislaus Poniatowsky at the session of the Diet of Dec. 4, asking the king to favor it with his support. In this pamphlet he points out that the Polish law does not include the Jews in the three estates of the realm (the nobility, country gentry, and burgesses); that the Polish legislation had always regarded the Jews as a foreign element, and, though burdening them with exceptional taxes, had not granted them the rights of citizens, while Polish society had treated them with contempt, defamed their religion, and would not tolerate the notion that a Jew could be a son of his fatherland. He adds:

> "And after all this, you demand from the Jew that he shall be useful to the country which does not profess to be his fatherland, that he shall be faithful and devoted to those who constantly oppress him! The Jew did not take to agriculture, because he did not care to exchange one kind of misery for another; the law would not permit him to own land, and he had no desire to become a serf and to work for others. He showed strong inclinations to trade and industry; but the towns either would not admit him at all to these pursuits, or at best allowed him to be only a haberdasher. It was a constant struggle between the Jews and the Christian merchants: and therein lies the cause of the decay of trade and the impoverishment of the towns."

When the Diet appointed, in June, 1790, a committee "to reform the condition of the Jews," Butrymowicz was one of its most active members. He pleaded in behalf of the inviolability of the Jewish faith, and of the union of "the peoples" (the Christians and the Jews) by the reception of the latter into the national organism through mutual concessions, through the abolition or the reorganization of the KAHAL, and even through the influence of the courts in the propagation of education and culture among the Jewish youths. See CZACKI and POLAND.

BUTTE, MONTANA. See MONTANA.

BUTTENWIESER, LAEMMLEIN: German Talmudist and linguist; born in Wassertrüdingen, Bavaria, Jan. 16, 1825; died in New York city Sept. 23, 1901. He was descended from a well-known family of German rabbis, his father being rabbi of Wassertrüdingen, and his grandfather and great-grandfather having been rabbis at Buttenwiesen, Germany. Buttenwieser received his education at the gymnasium at Aschaffenburg, where he studied Talmud under Rabbi Adler, and at the universities of Würzburg and Prague. While attending the universities he also studied for the rabbinate; and he received his diploma as rabbi from Judah Löb Seligman Bär Bamberger of Würzburg, from Rapoport and Samuel Freund of Prague.

In 1854 Buttenwieser emigrated to America, and, not liking the conditions of the ministry, became a teacher of languages. He taught in the Talmud Yelodim School in Cincinnati, and in 1867 became instructor in the Hebrew Education Society of Philadelphia and in the Maimonides College at that place. He went to New York (1873) as a private tutor in Hebrew and Talmudic studies. The same year Buttenwieser was appointed teacher of languages in the New York public schools, which position he held until 1886, when he resigned.

BUXTORF (BUXTORFF), JOHANNES (usually called "Father," or "the Elder"): The principal founder of rabbinical study among Christian scholars; born Dec. 25, 1564, at Kamen, Westphalia; died Sept. 13, 1629, at Basel. He studied at Marburg and afterward at Herborn, where Johann Piscator persuaded him to study Hebrew. He continued his studies at Basel in 1584, where he became the close friend and tutor of the children of Leo Curio, whose daughter Margaret he afterward married. In Aug., 1590, he graduated as doctor of philosophy, and in the following year was appointed professor of Hebrew at the University of Basel, which position he continued to fill until his death.

Appointed Professor of Hebrew.

Buxtorf displayed remarkable enthusiasm and diligence in the investigation of Jewish science. In order to obtain a thorough knowledge of the Bible—which book he chose as his basis of inquiry—he was led to the study of the Masorah, the Talmud, and the Targum; and as many books were requisite to this end, he gradually acquired a valuable Hebrew library, and, unconsciously, obtained a knowledge of bibliography which eventually carried him to the threshold of post-Biblical Hebrew literature. By the publication of a catalogue of his Hebrew books, he made one of the first attempts in the wide field of Jewish bibliography. For the correction of his edition of the Bible, as well as for his personal instruction, he employed from 1617 onward the services of two Jews, one of whom was the learned Abraham ben Eliezer BRAUNSCHWEIG. These men naturally were compelled to live in the neighborhood of Buxtorf's house. As, however, since the year 1557 "the Jews had been absolutely forbidden to enter Basel during the merchants' fair and at other times," Buxtorf was compelled to secure a special permit for them from the municipal authorities. When, in 1619, a son was born to Abraham Braunschweig, curiosity and zeal for investigation induced Buxtorf, accompanied by his son-in-law, the printer König, and the sergeant of the common council, to attend the circumcision. For this offense Buxtorf and König were fined each 100 gulden. Though Buxtorf was not a friend of the Jews, as is evident from his "Synagoga Judaica," he nevertheless maintained a correspondence with a number of Jews in Germany, Amsterdam, and even in Constantinople. His eulogists declare that his writings were welcomed and extolled in synagogues in every part of the world, and that Jews everywhere were accustomed to regard him as their leading oracle even on the most subtle questions of their belief. But this statement is undoubtedly an exaggeration. The mainspring of his activity in the domain of Jewish literature was his polemical zeal against Judaism, the ultimate object of which was the conversion of the Hebrews. Hence it comes that his first work was the above-mentioned "Synagoga Judaica," which, under the title of "Juden-Schül" (Basel, 1603), appeared in several editions (with additions, 1664), and was translated into Flemish and Latin. Even Buxtorf's contemporaries condemned the superficial and malicious character of the book and its numerous intentional distortions of fact. Moréri criticizes the work as "très peu judicieux, et il s'y est trop attaché à des bagatelles, et à ce qui peut rendre les Juifs trop ridicules." Buxtorf's attention was constantly directed toward the conversion of the Jews; and from 1615 on he entertained the design of editing again the notorious "Pugio Fidei Contra Mauros et Judæos" ("Judendolch"), or "Dagger [Defense] of the Faith," of the Dominican Raymund MARTIN, a manuscript copy of which had been sent to Buxtorf by Philipp Mornay-Plessis of Saumur. This design was defeated by his death.

Fined for Attending a Circumcision.

His Zeal Against Judaism.

The most noteworthy of Buxtorf's publications is his rabbinical Bible, containing the Hebrew text, the Masorah, and various commentaries, published in two folio volumes (Basel, 1618–19), together with a supplement entitled "Tiberias, Commentarius Masorethicus" (1620), which for a long time was the best work of its kind. The best grammatical work of Buxtorf was the "Præceptiones Grammaticæ de Lingua Hebræa" (Basel, 1605), later published under the title "Epitome Grammaticæ Hebrææ," and afterward successively edited about sixteen times by Buxtorf's son and others, and translated into English by John Davis (London, 1656).

Lexicographical Works.

Buxtorf's work as a lexicographer began with the "Epitome Radicum Hebraicarum et Chaldaicarum" (Basel, 1607, not 1600), afterward published in numerous editions at Basel (1615–1735), Amsterdam (1645), London (1646), and Franeker (1653–54), under the title "Lexicon Hebraicum et Chaldaicum." An extract from it also appeared at Basel (1612; 6th ed., 1658), under the title, "Manuale Hebraicum et Chaldaicum." As especially important may be mentioned his "Concordance," based upon the older work of Isaac Nathan ben Kalonymus, and published after Buxtorf's death by his son; and his "Lexicon Chaldaicum Talmudicum," begun by Buxtorf in 1609, and completed by his son in 1639, after nine years of indefatigable labor. This lexicon, despite its numerous imperfections and errors, became an indispensable guide to specialists; a new but very imperfect edition was published as late as 1866. As the "Bibliotheca Rabbinica"—containing about 324 rabbinical writings arranged according to the Hebrew alphabet—was the first serious endeavor toward a compilation of a Jewish bibliography, so the "De Abbreviaturis Hebraicis," which was first published about the same time (Basel, 1613, 1640; Franeker, 1696; Herborn, 1708), and is still useful, furnished the basis for a knowledge of the Hebrew abbreviations. Finally, it is necessary to mention Buxtorf's "Institutio Epistolaris Hebraica, sive de Conscribendis Epistolis Hebraicis Liber, cum Epistolarum Hebraicarum Centuria" (Basel, 1610; "Cum Append. Variarum Epistolarum R. Maiemonis et Aliorum . . . Excell. Rabbinorum," Basel, 1629), a work containing over one hundred family and other letters, partly supplied with vowels, and partly translated into Latin and furnished with explanations of words; the letters being taken from the epistolary guide,

T. M. K.

BUXTORF, JOHANNES: Johannes Buxtorf, the son of the elder; known as **Johannes Buxtorf II.**; Christian Hebraist; born at Basel Aug. 13, 1599; died there Aug. 16, 1664. Before the age of thirteen he matriculated at the University of Basel, and in Dec., 1615, graduated as master of arts from that institution. He then went to Heidelberg, where he continued his studies under David Pyräus, Abraham Scultetus, Alting, and others. In 1618 he attended the synod at Dordrecht [Dort], where he formed a friendship with Simon Episcopius, Ludwig Crocius, and others. He succeeded his father, after the death of the latter, in the chair of Hebrew at the university; and so closely did he follow in his father's footsteps that it became proverbial to say, "Non ovum ovo similius quam Buxtorf pater et filius." He gained an almost equal reputation in the same domain as his father. Although he received offers from Groningen, Leyden, and various other places, he preferred to retain his position at Basel. He was four times married, and in his latter years experienced many sorrows.

Becomes Professor of Hebrew.

Like his father, Buxtorf maintained relations with several learned Jews. He employed Abraham Braunschweig (see Johannes Buxtorf) to purchase Hebrew books for him; and for many years he corresponded with the scholarly Jacob Roman of Constantinople regarding the acquisition of certain Hebrew manuscripts and rare printed works. For Buxtorf was also engaged in the sale of Hebrew books; among his purchasers being the commercial representative of Cardinal Richelieu, Stella de Tery et Morimont, who occasionally sojourned at Basel, and Joh. Heinrich Hottinger, a professor of Zurich, with whom Buxtorf was on terms of close friendship. He also frequently furnished Hebrew books to the Zurich library. Buxtorf corresponded not only with Jacob Roman and Leon Siau of Constantinople (the latter of whom afterward embraced Christianity and became physician-in-ordinary to a Transylvanian prince), but with the teacher Simon Gai, and with the friend of the latter, Florio Porto of Mantua, both of whom were commissioned by Buxtorf to purchase Hebrew books in Italy; with the learned rabbi Menahem Zion Porto Cohen of Padua, whom Buxtorf did not treat in a very friendly manner; with Menasse b. Israel; David Cohen de Lara of Hamburg; Jacob Abendana of Amsterdam, for whose "Miklol Yofi" he wrote an approbation; Isaac Abendana, brother of the foregoing; Joseph Del Medigo, with whom he was personally acquainted; and many others.

His Eminent Correspondents.

Buxtorf prepared new editions of several of his father's works [especially the "Tiberias"]; and, as in the case of the "Concordance" and the "Talmudic-Rabbinical Lexicon," completed and prepared for publication those that had been left unfinished. Nineteen years after the death of his father he became involved in a controversy with Louis Cappellus regarding the antiquity of the Hebrew vowel-signs; and although the question was one purely historical, it nevertheless contained a substratum of dogma, and in a number of polemical writings was conducted with great intensity and bitterness on both sides. The following original works of Buxtorf were published: "De Linguæ Hebraicæ Origine et Antiquitate" (Basel, 1644; not as Herzog, 1643); "Florilegium Hebraicum Continens Elegantes Sentencias, Proverbia, Apophthegmata: ex Optimis Quibusque Maxime vero Priscis Hebræorum Scriptoribus Collectum et . . . Alphabetice Dispositum" (Basel, 1648). Especially noteworthy also are Buxtorf's Latin translations of the "Moreh" of Maimonides, "Doctor Perplexorum" (Basel, 1629), and the "Cuzari" of Judah ha-Levi, "Liber Cosri" (Basel, 1660). Buxtorf also wrote a long series of dissertations on the writings of Abravanel, among which may be mentioned "De כרת Sive de Excitii Poena," "De Longa Vita Primorum Parentum," "De Statu et Jure Regio," "De Mosis Nomine." All these first appeared singly, and then either as "Dissertaciones Philologo-Theologicæ" (Basel, 1662), or in Ugolino's "Thesaurus" (xxv.); while several others, such as "De Lepra Vestimentorum et Ædium," "De Poesi Veteri Hebraica in Libris Sacris Usitata," "De Principio Anni," etc., were appended to the translation of the "Cuzari."

His Original Works.

Bibliography: *Revue Etudes Juives*, viii. 74-95, xiii. 260-276. Rich biographical material on Buxtorf the Younger may be found in his unpublished correspondence, and also in that addressed by him to Hottinger (which is preserved in the public libraries at Basel and Zurich).

T. M. K.

BUXTORF, JOHANNES B.: Nephew of Johannes Jakob Buxtorf; born Jan. 8, 1663; died June 19, 1732. He was professor of Hebrew at Basel, and published "Specimen Phraseologiæ V. T. Hebr." (Frankfort-on-the-Main, 1717).

T. M. K.

BUXTORF, JOHANNES JAKOB: Professor of Hebrew at Basel; son of Johannes Buxtorf II. by his fourth wife; born Sept. 4, 1645; died April 4, 1705. According to a letter written by his father to Coccejus ("Op. Anecd." ii. 738) in 1663, he was able at eighteen to read the Hebrew text of the Bible and of the Targums; and he is said also to have had some acquaintance with the Rabbinic and the Syriac. After his death the library collected by the three Buxtorfs (I., II., and III.), and valued at 300 louis d'or, was secured for 1,000 thalers by the public library at Basel, where it still forms a separate department.

T. M. K.

BUXTORF, JOHANNES RUDOLPHUS: Great-grandson of Johannes Buxtorf I.; born at Basel Oct. 24, 1747; died 1815. After completing his studies in his native city, he became private tutor in the family of the count of Schaumburg-Lippe. On his return to Basel he became professor of rhetoric and theology at the university (1793). He also lectured and wrote on Biblical archeology.

T. M. K.

BUZ: Second son of Nahor (Gen. xxii. 21). From the language of the genealogical lists, however, it is to be inferred that the name applies to a tribe; and from Jer. xxv. 23 it is clear that it was an Arabic one. It is probable that Elihu, the friend of Job (Job xxxii. 2, 6), was of this tribe.

J. JR. G. B. L.

BUZAGLIO, BUZAGLI, or **BUSAGLO, SHALOM BEN MOSES**: Cabalist; born in Morocco (where his father was "rosh yeshibah") at the beginning of the eighteenth century; died in 1780. He was a disciple of the cabalist Abraham Azulai, rabbi of Morocco, and filled the position of dayyan. Owing to voyages in the Orient made in his capacity of collector of alms for the relief of the poor in Palestine, he became acquainted with the chief cabalists of the period. He also visited Europe, and sojourned some time in London.

Buzaglio published the following works: (1) "Miḳdash Melek" (The Sanctuary of the King), a commentary on the Zohar, published by Meldola (4 vols., Amsterdam, 1750); (2) "Hadrat Melek" (The Beauty of the King), a commentary on the Zohar, compiled from Isaac Luria and Ḥayyim Vital (2 vols., Amsterdam, 1766; London, 1772); (3) "Kisse Melek" (The Throne of the King), annotations on the Tiḳḳune Zohar (Amsterdam, 1769); (4) "Hod Melek" (The Majesty of the King), commentary on the book Zeni'uta of the Zohar (London, no date); (5) "Sefer ha-Zohar," notes on the Zohar, published together with the text (London, 1772); (6) "Kebod Melek" (The Honor of the King), a collection of cabalistic derashot (London, no date); (7) "Ma'aseh she-Hayah Kak-Hayah" (What Happened Was in This Fashion), report of the proceedings of a lawsuit (London, 1774); (8) "Ḳuntras Ma'aseh Adonai Ki Nora Hu" (Fascicle on the Work of God, Which Is Majestic), an appeal to the public concerning the authority of Buzaglio's judgment in a lawsuit, in Hebrew and Judæo-German (London, 1774); (9) "Tokaḥat le-Shobabim we-Taḳḳanah le-Shabim" (Admonition for Transgressors and Rehabilitation for the Repentant), consisting of two letters to Israel Meshullam Solomon, also concerning Buzaglio's lawsuit (London, 1774).

Although these cabalistic works bear his name on the title-page, they are merely compilations of teachings attributed by Azulai, his teacher, to Luria and Ḥayyim Vital. Buzaglio took part in the discussion that arose among many cabalists, whether Jews should be allowed to undergo vaccination, discovered shortly before that day. Buzaglio pronounced himself in favor of vaccination, but disputed the priority of Jenner in regard to its discovery.

K. I. BR.

BUZAGLO, WILLIAM: English inventor and empiric; died at London in 1788. His first claim to distinction was his introduction of stoves made on a new plan, and intended for the heating of large public buildings. He afterward practised medicine and professed to be able to cure the gout without drugs, by muscular exercise alone. Whatever may have been the real efficacy of his method—which seems analogous to the modern massage—he was generally regarded as an empiric because of the nature of his advertisement, abounding, as it did, in self-laudation. His manifesto was humorously parodied by Captain Grose in a handbill, given with a caricature, entitled "Patent Exercise, or Les Caprices de la Goutte."

BUZECCHI. See BOZECCHI.

BYELAYA TZERKOV (called in Hebrew שדה לבן): Town in the government of Kiev, Russia. Its Jewish settlement must have been formed after 1550, when the waywode of Kiev, having built there a castle, attracted many inhabitants to the town by granting them numerous privileges.

The Jewish community of Byelaya Tzerkov is mentioned in the list of those given by Nathan Naṭa of Hanover as having been destroyed by the hordes of Chmielnicki in 1650 ("Yaven Meẓulah," ed. Dyhernfurth, p. 3b). As the town, however, was the stronghold of the Cossacks before 1648 (Kostomarov, "Bogdan Chmielnicki," i. 24 *et seq.*), it is hardly probable that the Jews could have remained until the arrival of Chmielnicki. In any case, the fact that Samuel Faibush of Vienna, in his account of the Chmielnicki persecutions ("Ṭiṭ ha-Yaven"), does not mention Byelaya Tzerkov proves that the Jewish community in the town was not of great importance. From 1651 until its occupation by the Russians in 1793, Byelaya Tzerkov was dominated alternately by the Cossacks and by the Poles, and could scarcely have had a large Jewish population.

Its importance as a Jewish community dates from the end of the eighteenth century, when it numbered about 12,000 Jews in a population of 20,700. In 1817 a Hebrew printing-office was established there, from which many Hebrew books were issued. The first work published was a book of sermons for Ḥanukkah and Purim, entitled "Or he-Ḥadash." Byelaya Tzerkov now (1902) has a synagogue and seven houses of prayer, the greater part of its Jews belonging to the Ḥasidic sect. The Jewish population in 1898 was about 9,000 out of a total of 22,703.

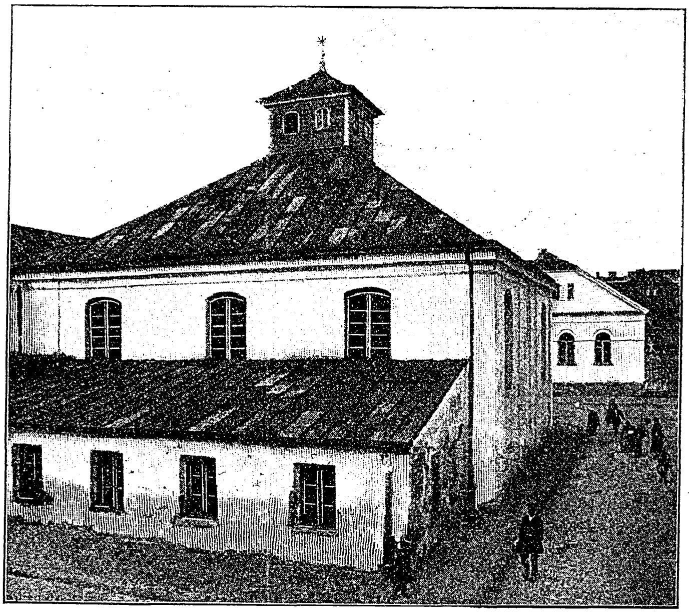
BYELAYA VEZH. See SARKEL.

BYELOSTOK (Polish, **Bialystok**): Town in the government of Grodno, Russia; by rail 52 miles southwest of Grodno; one of the youngest in Lithuania. Little is known of the history of its Jewish community. There is a tradition (see "Ha-Ḳol," i., Nos. 41 *et seq.*) that its last owner before its incorporation into Russia, the waywode Count Branitzky—at whose instance in 1749 King Augus-

Early Tradition.

tus III. of Poland raised the proprietary village to the dignity of a town—invited Jews to settle there in houses and stores which he built for them at his own expense. He also erected for them a synagogue—a wooden structure which is to-day one of the curiosities of the city. There is no record of the effect which the transition from Polish to Prussian dominion in 1793, and later from Prussian to Russian rule after the Treaty of Tilsit in 1807, had on the Jewish community, which must have been considerable in those times. But there is reason to believe that the short-lived German rule helped to stimulate commerce and industry and was the cause of German predominance in the business affairs of Byelostok at the beginning of the nineteenth century.

Rabbi Kalonymus Kalman Lichtenstein, brother of R. Abraham Yekutiel, author of "Zer'a Abraham" on Sifre (Dyhernfurth, 1811), who, in the work of his grandson, Rabbi Abraham of Prossnitz, entitled "Ha-Torah we-ha-Mizwah" (Wilna, 1820), is referred to as rabbi of Byelostok, is probably the first rabbi of the community of whom there is any record. In the "Shem ha-Gedolim he-Ḥadash" mention is also made of Rabbi Solomon of Byelostok (second half of the eighteenth century), and of his successor, R. Aryeh Loeb b. Baruch Bendet, author of the work "Shaagat Aryeh," on the tractate Makkot of the Babylonian Talmud (Byelostok, 1805). Then probably came Rabbi Nehemia, whose responsum upon the reading of the "ketubah," or marriage contract, at weddings, written by him in 1835, was published by Benzion Zechnilopovitch of Russia, in Vienna (printed by Adalbert della Torre, 1859). The existence of this Rabbi Nehemia is known only through that responsum, and is doubted by both Benjacob and Zedner, who seem to believe that Zechnilopovitch printed it under an assumed name. This would agree with Fuenn's statement ("Keneset Yisrael," p. 301) that Rabbi Moses Ze'eb became rabbi of Byelostok in 1824. Moses Ze'eb was the author of "Mareot ha-Ẓobeot," a work on abandonment (Byelostok, 1810), and of "Aggudat Ezob," sermons (*ib.* 1824), and formerly rabbi of Tiktin.



The Old Synagogue of Byelostok.
(From a photograph.)

Eminent Rabbis.

After Ze'eb's death there was an interregnum, during which R. Eliakim Getzel acted as rabbi without having the title, until about 1860, when R. Yom-Ṭob Lipman Heilprin of Meseritz was called to Byelostok. Heilprin, who in his former community had had many quarrels with the Ḥasidim about his crusade against smoking in the synagogue, encountered many difficulties in his new position. His refusal to officiate at a wedding ceremony in the "chorschul," or quasi-Reform synagogue, caused him to be imprisoned at Grodno; and he was freed only after a long and expensive struggle. After his death in 1878, his son, R. Ḥayyim Herz (born 1850), who edited his father's voluminous work of responsa, "'Oneg Yom-Ṭob," was acting rabbi for about five years, until R. Samuel Mohilewer of Radom was elected to the rabbinate in 1883 (see Samuel Mohilewer). After the death of Mohilewer in 1898, R. Ḥayyim Herz Heilprin again became acting rabbi. Meïr Marcus, a graduate of the rabbinical seminary of Wilna, has been the government rabbi of Byelostok for more than thirty years (d. Dec. 1900).

Jewish Manufacturers.

Byelostok was always an industrial city; and the material condition of its inhabitants is therefore superior to that of the population of other cities in poverty-stricken Lithuania. Its chief industry, the manufacture of cloth, was up to the middle of the nineteenth century mostly in the hands of Germans, who, however, relied largely on Jewish capital. Nahum Mintz and Sender Bloch were the first Jews to engage in the manufacture of cloth (1850); Mintz being also the first to employ the steam-engine in that industry at Byelostok. Among the other pioneer Jewish manufacturers were J. S. Barish, Breinin & Zabludovsky, and A. Halberstamm; the last-named being the father of the prominent banker Henry Halberstamm, who went to Germany to study the system of manufacturing in western countries. At present the Jews equal, in some points even excel, the Germans in cloth-making.

The growth of the population and the prosperity of Byelostok for the last forty years must be attributed almost entirely to the Jews. There does not seem to have been any increase of the Gentile population during that period. Semenov, "Geographical and Statistical Dictionary of the Russian Empire" (i. 372), gives the Jewish population of Byelostok in 1860 as 11,288 in a total population of 16,544. In 1889, according to "Entziklopedicheski Slovar," 1896 (the latest official authority available), it was 48,552 in a total population of 56,629. S. R. Landau, in his excellent description of the Jewish community of Byelostok at the present time says, in his "Unter Jüdischen Proletariern" (Vienna, 1898), pp. 45-58, that there are hardly 5,000 Christians among its 65,000 inhabitants. Semenov mentions only 3 cloth-factories in Byelostok in 1860; the present number, according to Leonty Soloweitschik ("Un Prolétariat Méconnu," p. 100, Brussels, 1898), is 60, besides about 20 establishments of allied industries. The number of Jewish weavers, according to Landau, is in round numbers 2,000. Almost all other industries and trades, as well as commercial enterprises, are in Jewish hands. The tobacco industry, which in Byelostok is second in importance only to the cloth industry, is entirely in the hands of Jews. In the earlier part of the nineteenth century Byelostok had a Hebrew printing-office, from which the first book known to have been printed was issued in 1805 and the last in 1824.

Vital Statistics.

The Jewish community of Byelostok is the most prosperous in Lithuania, and its communal institutions are models of their kind. The Korobka (meat-tax) and the yearly quota of conscripts to the army, which are the cause of much trouble in most Russo-Jewish communities, are dealt with here in a spirit of justice which satisfies all parties concerned. Byelostok has one large synagogue, or "schul," one "chorschul," four or five large "batte midrashim," and about twice as many small ones, or "minyanim." It has also one of the finest Jewish hospitals in the empire, a home for the aged, two "gemilut ḥasadim," or free loan institutions, a Talmud-Torah with about 500 pupils, and many other benevolent societies.

Notable Jews.

The number of distinguished Jews born or who have made their home in Byelostok is considerable. Isaac Zabludovsky, the ancestor of the most influential family in Byelostok, is said to have been the first Jewish millionaire in Russia. Michael Zabludovsky (1803-69), author of a work, "Mish'an Mayim," on the rational interpretation of the Haggadah, and Professor Zabludovsky, specialist in massage at the University of Berlin, belong to the same family. Eliezer Halberstamm, the wealthy scholar and author, was connected with them by marriage. Jacob Bacharach, who corresponded with Rapoport, Zunz, Luzzatto, and other great scholars of the century, and wrote on the Hebrew alphabet and other subjects, lived in Byelostok. The Nestor of modern Hebrew literature in Russia, A. B. Gottlober, spent his last years in Byelostok, and is buried there. The poet M. M. Dolitzky; Arthur Freeman, son of the Hebrew writer; A. D. Lieberman; and Leo Weiner of Harvard University, Massachusetts, U. S. A., were born there. J. Chazanovitz, the noted Zionist, who devotes his energy and almost his entire income to the national library which he founded in Jerusalem, is one of the interesting characters of Byelostok. Lazar Atlas, the critic, and formerly editor of the "Ha-Kerem," has been a bank official in the city since 1895.

BYELSK: Town in the government of Grodno, Russia. It is impossible to name the exact date when Jews first settled here. In the sixteenth century, during the reign of Sigismund Augustus, the Byelsk Jews were accused of ritual murder, but were acquitted. This trial, together with a similar one at Narva, resulted in the promulgation of a royal edict, termed "Privilegia," forbidding the torture of Jews accused of using Christian blood for their ritual. The king himself was to try these cases; and the accusation had to be proved in the manner mentioned in the "Privilegia."

Byelsk has a total population of 7,461, including (in 1898) 5,500 Jews. The economic conditions of the latter are generally poor. There is fierce competition among the petty shopkeepers, constituting about 75 per cent of the Jewish population. About 440 Jews are engaged in tailoring, baking, shoemaking, etc., while 60 are laborers. The increase of poverty is manifested by the number of applicants for charity at the Passover. These increased from 95 in 1894 to 195 in 1898. The committee of charities, numbering 300 members, collects annually about 2,000 rubles for the poor. There is a Talmud-Torah with 113 pupils, and an elementary public school having two classes.

BYESHENKOVICHI: Town in the district of Lepelsk, government of Vitebsk, Russia. In 1898, in a total population of 5,000, about 4,000 were Jews, of whom 576 were artisans. They had a synagogue, many houses of prayer, three benevolent societies, and numerous religious schools.

S. S. J.

BYK, EMIL: Austrian lawyer and deputy; born Jan. 14, 1845, at Janow, near Trembowla, in Galicia.

In 1885 Byk was chosen chairman of the charity committee of the Cultusrath of Lemberg, and is now (1902) president of the Jewish community there; in 1890 he was a "Stadtverordneter" and president of the Shomer Israel Society; in 1891 he was elected to represent Brody and Zloczow in the Reichsrath; and he was reelected at every subsequent election. Byk has served on several important committees of the Reichsrath, such as the Volkswirthschaftsausschuss and Justizausschuss. Some of his more important speeches in that body are: an address in 1893 against Prince Lichtenstein on the establishment of a Jewish theological seminary; an address, May 4, 1898, against the proposition that the sittings of the committee to consider the charges against ex-Prime Minister Badeni should be public; and a stirring address, Nov. 24, 1898), on the "Ausnahmszustand" in Galicia, which was very well received. Byk is prominent in the legal profession, and takes a leading part in Jewish affairs not only in Lemberg but in Galicia generally.

BYKHOV: District town in the government of Mohilev, Russia. At the census of 1898 the total population was 6,536, including 3,172 Jews, of whom 587 were artisans. Most of the Jews are extremely poor, and at times they lack the simple necessities of life. One hundred and twenty-seven families had to apply for relief at the Passover. There are a "biḳḳur ḥolim" society (for the visitation of the sick), a "linat ha-ẓedeḳ" (poorhouse), and a "kibbud yom-ṭob" society (an organization for providing help during holidays). In the vicinity of Bykhov are situated **Sapezhinka** (a village where 44 Jewish families own 357 deciatines of land) and an agricultural colony, **Vynn** (with 20 Jewish families who own a tract of 200 deciatines).

H. R. S. J.

——**Historical Data:** During the uprising of the Cossacks under Bogdan Chmielnicki, 1648–49, the greater part of the Jews of Bykhov, who did not embrace Christianity, were killed. From a report of the Polish agent Voisha to King Jan Cazimir (dated Mohilev on the Dnieper, Aug. 25, 1662) it is evident that the Jews of Bykhov who were forcibly baptized did not become true adherents of the Greek Orthodox Church, and that they gave their support to the Polish commander Grochowski, who had been captured by the Russians on the Bykhov road and imprisoned. At the same time Major Jacob Shtreg, an engineer from Moscow, who was dissatisfied on account of the humiliation he received from the Russians during the siege of Smolensk and Bykhov, reported that he would soon come to Mohilev in the service of the Polish king, together with the Jews of Bykhov, with whom he had made arrangements for the occasion.

The Russian archimandrite, Vasilevich of Slutzk (Lithuania), in a letter addressed to Prince Radziwill, lord of the manor, complained of the great losses he had sustained by the Jews—not the old settlers of Slutzk, but those who emigrated from Bykhov and from the Ukraina, among whom there were many who had been converted to the Greek Orthodox religion and had now turned back to Judaism. Thus, for instance, a Jewess from Russia who had been converted to Christianity more than ten years before, and who had married a Muscovite Christian, persuaded him to remove to Slutzk, where she and the sister and children of her husband, as well as her own children, changed their faith to Judaism.

Owing to an application of Abraham Wolfovich, a Jew from Bykhov, a copy of a document of the city records of Orsha, given to Isaash and Abraham Wolfovich of Bykhov, was entered Aug. 13, 1671, in the city records of Brest-Litovsk. It contained a privilege granted by King Michael to the city of Old Bykhov, Oct. 20, 1669, releasing the community from the payment of taxes for twenty years on account of the deplorable condition of its inhabitants, who had been utterly ruined by the attacks of the Cossacks and the Muscovites.

H. R.

BYRON, GEORGE GORDON, LORD: English poet; born in Halles street, London, Jan. 22, 1788; died at Missolonghi, Greece, April 19, 1824. The only one of his works which has any relation to Jewish topics is his "Hebrew Melodies," some of which have proved as popular as any of his lyrics. These melodies were written to oblige Byron's friend Douglas Kinnaird. Their meter lacks spontaneity; the subject-matter has often nothing whatsoever to do with anything Hebraic; and their imagery is often conventional and unpicturesque. "She Walks in Beauty," for example, might be Irish as well as Hebrew. It was written on Byron's return from a ball, where he had seen and admired Mrs. (later Lady) Wilmot Horton, wife of the poet's relative, the governor of Ceylon. She appeared at the ball, dressed in black and covered with spangles.

Much the same may be said of "It Is the Hour When from the Boughs." On the other hand, "Oh Weep for Those" is essentially Jewish in its subject-matter, and is written in a strain worthy of its author. The last verse is well known:

> "Tribes of the wandering foot and weary breast,
> How shall ye flee away and be at rest?
> The wild dove hath her nest, the fox his cave,
> Mankind their country—Israel, the grave."

Another poem, symbolic of Judaic history, "The Assyrian Came Down Like a Wolf on the Fold," is not written, however, in Byron's usual smooth and euphonious style.

The "Hebrew Melodies" never satisfied their author. Twitted on the subject by Moore, he exclaimed:

> "Sunburn Nathan! [the composer who had set them to music] Why do you always twit me with his 'Ebrew nasalities? Have I not already told you it was all Kinnaird's doing and my own exquisite facility of temper?"

The poems constituting the "Melodies" were written in 1814 for music composed by Isaac Nathan, who had been introduced to Byron two years previously. The music was mainly "a selection from the favorite airs sung in the religious ceremonies of the Jews" ("Nathan's Fugitive Pieces," p. ix., ed. 1829, p. 144); and Kinnaird, who was a dilettante, induced Byron to supply the words. Subsequently John Braham arranged and sang the songs, but did not assist in composing them.

BYZANTINE EMPIRE: Name given to the eastern division of the Roman empire. On May 11, 330, Constantinople became the capital of the Roman empire, and the Greek Orient thereafter developed independently. In these countries of the Eastern empire, including Palestine, the Jews lived in great masses, so that the fate of the Jewish people was decided in Constantinople.

Privileged Position.

The association of "navicularii" (ship- and cargo-owners) of Constantinople had attempted to force the Jews and the Samaritans to join them and to share in the burdens of the society; but a decree dated Feb. 20, 390, bearing the names of the emperors Valentinian II., Theodosius, and Arcadius, decided that the communities of the Jews and the Samaritans could not legally be forced to join the navicularii, and that at most their wealthy members only could be taxed ("Codex Theodosianus," xiii. 5, 18). This decree was most important to the Jews, for many of them were ship-owners, and more than one-half of the shipping in Alexandria was controlled by Jews (Synesius, "Epist." iv.). While in the Western empire the Jews were compelled to fill civic offices, the Eastern empire accorded certain privileges at least to the elders ("viri spectabiles") and to the patriarchs of the community ("Cod. Theod." xvi. 8, 14). The rule of Arcadius was on the whole favorable to the Jews, and these privileges of the patriarchs were renewed Feb. 3, 404. In 412, disturbances of the Jewish service and the confiscation of Jewish synagogues were forbidden (*ib.* xvi. 8, 21). In 438 Theodosius II. had all laws codified and published relating to the Jews ("Novellæ Theod." title iii.).

Ill-Feeling Between Jews and Christians.

In the mean time several events had occurred to disturb the relations between Jews and Christians. In 343 a riot is said to have broken out among the Jews of Palestine, during which they killed many Greeks and Samaritans (Theophanes, "Chronographia," ed. Migne, cviii. 139); and similar events are reported in the "Chronicon" of Jerome (compare Theodoret, iv. 6) as occurring in the fifteenth year of Constantius' reign (352). In fact, even Talmudic sources speak of the hardships inflicted upon the Jews under Cæsar Gallus at the hands of his general, Ursicinus. The Roman army captured Diocæsarea (Sepphoris), the stronghold of the uprising, and, among other cities, Lydda and Tiberias, which were completely destroyed. The leader of the rebellion is called by the Romans "Patricius," and in Jewish sources "Natrona"; the latter, however, seems to be an assumed Messianic name, like that of Nehemiah ben Ḥushiel, who, according to an obscure passage of the Midrash (on Ps. lx. 3), died before the gates of Jerusalem in the war against Constantinople. Among other severe penalties, Constantius renewed the law which forbade the Jews to enter Jerusalem (Sozomen, ii. 9, iii. 17). The severe measures against them were somewhat relaxed during the short reign of Julian the Apostate, but as early as the reign of Theodosius I. outrages were committed upon them, the bishop of Callinicus burning the synagogue in Osrhoene (Ambrosius, "Epist." xxix.; see Ambrose). Though in 402 Atticus, bishop of Constantinople, cured a paralytic Jew by baptizing him (Theophanes, *l.c.* p. 223), Arcadius did not encourage such baptisms, and issued a decree "de his qui ad ecclesias confugiunt" ("Cod. Theod." l. 2).

But under the bigoted Theodosius II. the clergy had a free hand in Jew-baiting. In Alexandria, through the fanatic bishop Cyrill, open hostility broke out between the Jews and the Christians, and Cyrill succeeded in cruelly expelling the Jews from the city in 415 (Socrates, "Hist. Eccl." vii. 15; Theophanes, *l.c.* p. 223). The prefect of the city complained, but at Constantinople the bishop was supported; nor did the authorities there interfere when the Jews were driven from Crete. On the other hand, Theodosius II., with perfect justice, threatened punishment to the Jews for insulting the Christian religion by some Purim joke ("Cod. Theod." xvi. 8, 18, 21).
